kābōd. *Glory, glorious, honor, honorable*. A noun, often in construct with a preceding word, thus taking on an adjectival aspect ("King of Glory" equals "Glorious King"). Occurs two hundred times, never with the idea of weight or heaviness directly in view.

k' būddā. *An adjective only used in the feminine, glorious, stately, carriage*. In Ps 45:13 [H 14] where KJV reads "glorious," RSV reads "wealth." In Jud 18:21 KJV translates "carriage," evidently meaning "things to be carried" (RSV "good").

J.N.O.

קְבִדוּת (k' bēdūt). See no. 943g.

944 קָבָה (kābâ) *quench, put out, be quenched, be put out*. (ASV and RSV similar.)

kābâ occurs twenty-four times, thirteen in the prophets. The root also appears in Arabic with the same meaning. It always relates to fire and to the act of putting a fire out. It is to be distinguished from *dā'ak* (q.v.), which has a similar meaning, by the fact that *dā'ak* commonly refers to a lamp which has gone out while *kābâ* in more than half of its occurrences refers to a fire which cannot be quenched by anyone other than God (the fire referring to his wrath).

Out of the six references to literal fire, five are fires which do not go out. Of these, four refer to lamps and fires in the temple (Lev 6:12–13 [H 5–6]; I Sam 3:3; II Chr 29:7). This concern that something not be quenched is reflected also in the figurative usages where life (II Sam 14:7; 21:17) and love (Song 8:7) are figured as fire.

The majority of the figurative usages relate to God's anger which no one but he can quench. In particular, the prophets speak in this way calling for repentance, lest this "fire" break out (Jer 4:4, etc.). Similar language is picked up by Jesus con-

cerning hell in Mark 9:48. But, at the same time, when the Messiah comes his gentleness will be such that he will not even quench smoking flax (Isa 42:3), i.e. he will not extinguish the weak and poor—even dull—of society; rather he will save them.

J.N.O.

קָבוֹד (kābōd). See nos. 943d,e.

קְבוּדָה (k' būddā). See no. 943f.

קַבִּיר (kabbir). See no. 947a.

קָבִיר (kābir). See no. 948a.

945 כָּבַל (kbl). Assumed root of the following.

945a כְּבֵל (kebel) *fetters* (Ps 105:18; 149:8).

946 קָבַם (kābas) *wash, be washed, perform the work of a fuller*. (ASV and RSV similar.)

This root occurs fifty-one times, all in verbal forms. Of these, all but nine appear in the Pentateuch, thirty-one in Lev alone, and twenty-one in Lev 13–15. It also appears in Arabic ("to knead, stamp") and Akkadian ("tread down"). In Hebrew it means "to full," that is "to make stuffs clean and soft by treading, kneading and beating them in cold water" (KB, p. 422). Thus it is always used of clothing, "to launder" and never of "washing" the body, where *raḥaṣ* (*rāḥaṣ* which see) is used or of "rinsing" which is denoted by *shāṭap*.

In all but one case (II Sam 19:24), washing is associated with ceremonial cleanness. Both the priests and the people were to be in clean clothes when they appeared before God (Ex 19:10, 14; Num 8:7; 19:7). Involvement in the rituals which dealt specifically with atonement and death resulted in ceremonial uncleanness and necessitated washing the clothes (Lev 16:26, 28; Num 19:7, 8, 10, 19, 21).

The bulk of the references have to do with washing of clothes which have become contaminated in one way or another (28 times). Particularly important contaminants would be leprosy and related maladies for, aside from the hygienic factor, these were evidently types of sin. This imagery is picked up in Ps 51 (2 [H 4], 7 [H 9]) and Jer 2:22 and 4:14. That David depicts his sin as a contagious leprosy in need of cleansing is further validated by his petition that God use hyssop, the instrument employed in cleansing a leper (Lev 14:6–7). Jeremiah 2:22 and 4:14 are significant because while speaking of the impossibility of washing out the stain, they proclaim the necessity of such cleansing. The answer to this dilemma is found in Mal 3:2 in the one who would appear as refiner's fire and fuller's soap to deal with the sins of his people.

J.N.O.

- 947 קָבַר (*kābar*) I, multiply, be in abundance. (ASV, RSV similar.)

Derivatives

- 947a קַבִּיר (*kabbîr*) many, mighty.
 947b קִבְרָה (*kibrâ*) distance.
 947c קָבַר (*k'bar*) I, already. Occurs nine times, only in Eccl.
 947d קִבְרָה (*k'bar*) II, Chebar.

This root and its derivatives occur twenty-four times, only two of which are verbal. Both of these verbal uses occur in the Hiphil in Job (35:16; 36:31). It seems likely that they are denominative. The root meaning is "to be much." It is perhaps to be distinguished from *rāb* (q.v.) on the basis of its stress upon volume ("mighty waters," Isa 17:12; 28:2) rather than number, but this should not be overdrawn. The meanings are similar in Akkadian, Aramaic, and Arabic; cf. the Arabic expression *Allah akbar*, "Allah is great."

The word is used in both negative and positive ways. From the negative point of view its usages stress the vanity of greatness apart from God. Job's comforters feel that Job's abundance of words is vain (8:2; 35:16). Similarly the mighty men who stand up against God will be broken (Job 34:24) until they see their smallness (Isa 16:14).

Only God is the source of true might (Job 36:5). In his hand is abundance of power (Isa 17:12), justice (Job 34:17), and provision (Job 36:31).

kabbîr. Many, mighty, much, strong, most. Nine occurrences, six of which are in Job. Commonly used adjectivally stressing the greatness of the noun modified.

kibrâ. A little way. This meaning is that derived from the construction *kibrat-'ereš*, lit. "much of land," which is the way this word is found in its three occurrences. The rendering "a great way" which one would expect from the etymology seems contradicted by the contexts as well as the LXX.

k'bar. Chebar. (ASV and RSV similar; NIV "Kebar.") A channel of the Euphrates which leaves it near Babylon and returns near Warka (60 miles south). The group of Judean captives among whom was Ezekiel were settled along the Chebar (Ezk 1:1; 3:15). It was here that Ezekiel had the vision which shaped the rest of his ministry (1:1, 3; cf. 3:23; 43:3, etc.).

J.N.O.

- 948 כָּבַר (*kbr*) II. Assumed root of the following.
 948a קָבַר (*kābir*) something netted, either a quilt or a fly net spread over the face of a sleeping person (I Sam 19:13, 16).

- 948b קִבְרָה (*k'barâ*) sieve (a net-like instrument), only in Amos 9:9.

- 948c מִקְבֵּר (*makkbēr*) netted cloth or coverlet, only in II Kgs 8:15.

- 948d מִקְבָּר (*mikkbār*) grate. ASV, RSV "grating."

The root of this noun does not occur in verbal form, but evidently it meant something like "to intertwine." *mikkbār* appears six times, all in Ex, and all with reference to a grating, or grillwork, which extended around the altar of burnt offering at its midpoint. Its function is unknown. On its four corners were rings through which poles were inserted for carrying the portable altar of the tabernacle.

J.N.O.

- 949 כֶּבֶשׂ (*kebeš*), כֶּשֶׁב (*kešeb*) lamb, sheep. (ASV and RSV similar.)

This root and its derivatives occur 128 times in the Old Testament. Of these, only 17 do not occur in the context of sacrifice. *kebeš* itself occurs 106 times with only 6 of these being non-sacrificial. As might be expected, 105 of the total occurrences are in the Pentateuch, but Num has a high proportion of these: 60, with 26 in chap. 7, 14 in chap. 28 and 23 in chap. 29.

This root is attested in Akkadian, where it also means "lamb," and in Arabic (*kabšun*) where it means "young ram." It is interesting to note that *kbs* is not attested in Ugaritic and that the common Ugaritic term for sacrificial lamb, 'imr, if it appears at all in Hebrew, only does so in a few priestly names. This may reflect a conscious repudiation on the part of the Hebrews of certain Canaanite technical religious terms.

- 950 כִּבְשָׂה (*kibšâ*), כִּשְׂבָה (*kišbâ*) ewe lamb, lamb. Feminine form of *kebeš*. In the sin offering a female kid or lamb was required (Lev 4:32; 5:6; 14:10; Num 6:14).

kešeb seems to be a metathesized form of *kebeš* (cf. Ges 19n). However, it appears to be used slightly differently in that it normally occurs in circumstances where a distinction is being drawn between the two kinds of animals of the flock: sheep and goats. In only two cases (out of a total of thirteen) is this not the case.

Although the initial instructions for the sacrifice (Lev 1-8) do not, for the most part, specify that lambs must be offered as opposed to full-grown sheep, it is clear from both preceding and following materials that lambs (sheep less than one year old) were important elements in the sacrificial system.

In four circumstances lambs were required: the Passover observance (Ex 12:5; Lev 23:12); the sin offering (Lev 4:32, etc.); certain purification

ceremonies (childbirth, Lev 12:6; leprosy, 14:10; Nazirites, Num 6:12) and the morning and evening sacrifice. The number of lambs offered in the daily sacrifice was increased at the new moon (Num 28:11) and during the great festivals (Num 28, 29). It was perhaps because the daily offering was a burnt offering that lambs came to be included along with rams and bulls as the burnt offering on special occasions. Whatever the reason, this was in practice as early as the dedication of the tabernacle in Num 7 and continued in force as late as Ezra's return (Ezr 8:35).

As with all the sacrificial animals, the elements of perfection, costliness and substitution were primary elements in the sacrifice of every lamb.

It was undoubtedly the association of lambs with Passover, the sin offering and the daily sacrifice which led John the Baptist to proclaim that Jesus Christ was "the Lamb of God, which takes away the sin of the world" (Jn 1:29,36; cf. also Rev 5:9). Then too, Isaiah had already used this imagery for the Suffering Servant who would passively accept God's judgment for the sin of the people as a lamb (Heb *śeh*) is led to slaughter (Isa 53:7).

J.N.O.

- 951 קָבַשׁ (*kābash*) *subdue, bring into bondage, keep under, force.* (ASV, RSV similar.)

Derivative

- 951a קֶבֶשׁ (*kebesh*) *footstool.* Refers to the footrest of Solomon's throne (II Chr 9:18; cf. *hādôm*).

This verb and its derivative occur fifteen times in the OT. It is evidently related to Akkadian *kabāsu* "to tread down," and Arabic *kabasa* "to knead, stamp, press" (cf. also Arabic *kabaša* "to seize with the hand"). In the OT it means "to make to serve, by force if necessary."

Despite recent interpretations of Gen 1:28 which have tried to make "subdue" mean a responsibility for building up, it is obvious from an overall study of the word's usage that this is not so. *kābash* assumes that the party being subdued is hostile to the subduer, necessitating some sort of coercion if the subduing is to take place. Thus the word connotes "rape" in Est 7:8, or the conquest of the Canaanites in Num 32:22, 29; Josh 18:1; I Chr 22:18. In II Chr 28:10; Neh 5:5; Jer 34:11, 16 it refers to forced servitude.

Therefore "subdue" in Gen 1:28 implies that creation will not do man's bidding gladly or easily and that man must now bring creation into submission by main strength. It is not to rule man. However, there is a twistedness in humanity which causes us to perform such a task with fierce and destructive delight. Try as we might, we cannot subdue this. But it can be subdued and

this is the promise of Mic 7:10, "He will subdue our iniquities."

J.N.O.

- 952 קִבְשָׁן (*kibshān*) *kiln, for lime or pottery* (e.g. Gen 19:28; Ex 19:18). Derivation uncertain.

קָדַר (*kad*). See no. 953a.

- 953 קָדַד (*kadd*). Assumed root of the following.

953a קָדַר (*kad*) *jar* (e.g. I Kgs 17:12; Eccl 12:6).

953b קִידוֹד (*kīdōd*) *spark* (Job 41:11).

953c קָדְקֹד (*kadkōd*) *a precious stone, perhaps a ruby* (Ezk 27:16; Isa 54:12).

קָדְדוּר (*kaddūr*). See no. 954b.

קָדְקֹד (*kadkōd*). See no. 953c.

- 954 קָדַר (*kdr*). Assumed root of the following.

954a קִידוֹר (*kīdōr*) *onset, attack* (Job 15:24).

954b קָדְדוּר (*kaddūr*) *ball* (Isa 22:18).

- 955 כֹּה (*kōh*) *thus, here.* Demonstrative adverb of manner, place, or time.

- 956 קָכָה (*kākā*) *thus, perhaps a more emphatic form than kōh.* Probably derived from 955.

- 957 קָהָה (*kāhā*) *I, be dim, darkened, restrained, faint, fail.* (ASV and RSV similar, except that RSV reads "blinded" instead of "darkened.")

Derivatives

957a קֵהֶה (*kēheh*) *be dark.*

957b קֵהָה (*kēhā*) *healing.*

The root and its derivatives occur seventeen times with the general idea of being weak, ineffective, or colorless. The idea of the eyes becoming weak in old age is prominent. The cognate in Akkadian means "to be weak" and in Arabic "to grow disheartened."

kēheh. *Be dark, wax dim, smoke, heavy.* An adjective occurring chiefly in Lev 13 ("if the plague be somewhat dark," six times). Cognate evidence seems to suggest "colorless" as a better translation (RSV "dim," NEB "faded").

kēhā. *Healing* (ASV and RSV "assuaging.") According to Nahum 3:19, Nineveh's destruction cannot be done away with.

J.N.O.

- 958 *קָהָה (*kāhā*) *II, rebuke.* Occurs only in the Piel, in I Sam 3:13, "he did not rebuke them."

959 קָהָן (*kāhan*) *minister in a priest's office, act as priest.* Denominative verb.

Parent Noun

959a קֹהֵן (*kōhen*) *principal officer or chief ruler, priest.*

959b קִהְנָה (*k^chūnnā*) *priesthood.*

The verb *kāhan* occurs twenty-three times, only in the Piel. It is translated "minister in a priest's office," "be priest," or "serve as priest" (RSV).

kōhen. *Chief ruler, priest.* The underlying verbal root of *kōhēn* does not appear in the OT and is of unknown etymology (KB, p. 424). In light of its early secular usage, the idea of *khn* might be of "serving as a minister" (cf. S. R. Driver, *Notes on the Hebrew Text of the Books of Samuel*, pp. 284–85). Four summaries, pertaining to the time of the United Kingdom, mention both Levitical high priests and, simultaneously, others who occupy a similarly designated office of *kōhēn* (I Kgs 4:5; II Sam 8:18; 20:26; I Chr 18:16, 17). Zabud son of Nathan was "principal officer" under Solomon (I Kgs 4:5, כֹּהֵן). During the lapse between the earlier and later lists under David, the occupancy of this second type of *kōhēn* office shifts from David's own sons (II Sam 8:18) to Ira the Jairite (20:26). This is doubly significant, for the former were necessarily non-levitical, and their replacement by the latter suggests responsibilities adversely affected by the intervening failures of the king's sons. *kōhēn* seems therefore to connote "confidential advisor" (KD, *Samuel* p. 369); cf. the further description of Zabud as "king's friend" and of David's sons as, literally, "the first ones at the king's hand" in the parallel passage (I Chr 18:17; n.b., liberal criticism here dismisses Chr as a later attempt to disguise an originally non-levitical priesthood, ICC, *Samuel*, p. 310).

Another possibility may be considered in view of the overwhelming usage and the fact that in Ugaritic also *khn* means "priest." All of these four verses may be differently interpreted.

Not only does I Chr 18:17 lack the designation *kōhēn* for David's sons, the LXX of the parallel passage II Sam 8:18 itself lacks it. The Hebrew of II Sam 8:18 may be in error. As it stands it has the impossible reading, "And Benaiah son of Jehoiada and the Cherethites and the Pelethites and the sons of David were priests."

Ira the Jairite (II Sam 20:26) who is mentioned nowhere else may indeed have been a priest who served David especially and personally as Abiathar had done (cf. I Sam 30:7).

Finally, Zabud (I Kgs 4:5) is also not mentioned elsewhere. He may have been a priest who served Solomon personally. Or the word "priest" here could even refer to Nathan,

Zabud's father. Actually most MSS of the LXX omit the word "priest" here and they could be correct. At least it is of interest that only these four verses suggest that *kōhēn* may refer to a different kind of office.

Elsewhere in the OT, *kōhēn* reflects the more restricted concept of a minister for sacred things, especially sacrifice; cf. the functioning of Melchizedek and of Jethro, the first priests named in Scripture (Gen 14:18; Ex 18:12; negative criticism, by contrast, usually associates priestly origins with the delivery of oracles, TDNT, III, p. 260). In the beginning men served at sacrifice as their own priests (Gen 4:3; Job 1:5), but already in Noah's time priestly ministration had become the responsibility of the patriarchal family head (Gen 8:20; cf. Gen 12:8; Job 1:5; Ex 19:22, 24 in subsequent periods).

In a sense, all Israel were the Lord's priests (Ex 19:6; cf. Hos 4,6 on their rejection from *kihēn* "being a priest" to God). But at Sinai he restricted legitimate priesthood to the family of Moses' brother Aaron, of the tribe of Levi (Ex 28:1; 40:12–15; Num 16:17; 17:8; Cf. the evolutionary views of supposedly Canaanitish serpent-worshipping Levites and bull-worshipping Aaronites, T. J. Meek, *Hebrew Origins*, pp. 119–47). Indeed, efficacious priesthood can exist only when it is established by the Lord (Num 18:7, *k^chūnnā*), for according to Scripture only God or his official representative can accomplish the atonement by which satisfaction is made for sin (Ps 65:3 [H 4]; Ex 29:36; A. B. Davidson, *The Theology of the OT*, p. 321). Aaron wore the names of the twelve tribes inscribed on his vestments (Ex 28:12, 21, 29) so as to bring them before God when he appeared to minister divine propitiation and reconciliation (v. 38). He continued to occupy his post, despite failure at the incident of the golden calf (32:4, 21).

Shortly after the completion of the tabernacle (Ex 35–38, 40), including the elaborate priestly regalia (Ex 39; cf. Isa 61:10, as a bridegroom "decketh himself," *kihēn*, marg., "deck as a priest") and the revelation of God's laws of sacrifice (Lev 1–7), Aaron was consecrated as Israel's high priest and his four sons as priests (Lev 8–9). Their primary function was to officiate at the new sanctuary (Deut 18:5) and pray on behalf of the people (Joel 2:17). They were also to set a personal example of holiness (Deut 33:9), to "enquire of God" for oracles (see *ʾūrim*), and to teach the law (Lev 10:11; Mic 3:11; Mal 2:7; even traveling, II Chr 17:9). The latter two responsibilities made it appropriate for the priests to serve also as judges (Deut 17:9). Soon after their appointment, Aaron's two older sons were slain by God for violating their office (Lev 10:2). But descent from Eleazar and Ithamar, who remained, continued to be the basis upon which

Israel henceforth distinguished their divinely authorized priests (Ezr 2:62; I Chr 24).

The OT priests were types of Christ (Heb 8:1), who accomplished the ultimate propitiation for the sins of the people (2:17). Prophecy suggests a future reappearance of Levites (Jer 33:18; Zech 12:13; Ezk 41:46ff); but the NT church exhibits a universal priesthood of believers (I Pet 2:5; Rev 5:10; Jer 31:34).

Bibliography: AI, pp. 345–405. Payne, J. B., *Theology of the Older Testament*, Zondervan, 1971, pp. 372–80. Richardson, TWB, pp. 210–11. TDNT, III, pp. 260–63.

J.B.P.

960 כֹּבֵעַ (*kôba'*) **helmet**. (ASV and RSV similar.)

Although T. H. Gaster has suggested that this is a loan word from Hittite (*kupahi*), (JAOS, 57, 73ff., followed by KB²); more recently J. L. Palache (*Semantic Notes on the Hebrew Lexicon*, pp. 17, 40) has claimed that it is part of a bi-consonantal family, kb, qb, gb which denotes an upward or downward convexity. If this claim were correct it would help to explain the alternate spelling of this word: *qôba'* (q.v.) which appears in I Sam 17:38 (note *kôba'* in 17:5) and Ezk 23:24 (*kôba'* in 27:10 and 38:5; cf. also Ugaritic *gb't* "goblets.")

kôba' appears six times in the Old Testament (*qôba'* twice); two of these are in historical literature, the others in the prophets. In II Chr 26:14 Uzziah is said to have gathered a considerable armory, including helmets, while I Sam 17:5, in describing Goliath's armor, mentions his bronze helmet.

In the prophets, shields and helmets are mentioned with respect to the great armies (often of mercenaries, Ezk 27:10) which surged across the near east in the Iron Age. The prophets envisioned such armies on the move again in the end times (Ezk 38:5). Against the mighty of the earth, and eaten away by sin inside, it would seem that God's people would be helpless. Yet God himself has entered the battle against oppression and sin and stands forth victorious (Isa 59:17).

J.N.O.

961 כָּוָה (**kāwā*) **burn, scorch, brand**. Occurs only in the Niphal (Isa 43:2; Prov 6:28).

Derivatives

961a כִּי (*kī*) **burning, branding**. Occurs only in Isa 3:24.

961b כִּוְיָה (*k'wiyā*) **burning, branding** (Ex 21:25).

961c מִכְוָה (*mikwā*) **burned spot; burn scar** (Lev 13:24, 25, 28).

כֹּהַ (*kôah*). See no. 973a.

כִּוְיָה (*k'wiyā*). See no. 961b.

כֹּכַב (*kôkâb*). See no. 942a.

962 כֹּל (*kâl*) **contain, hold, abide, bear, nourish, provide**. (ASV, RSV similar, except that RSV translates "endure" instead of "abide" or "bear.")

The primary meaning of this root is "to contain as does a vessel." It occurs thirty-eight times. The Qal stem occurs but once, with the remainder in either the Hiphil or the intensive. In six cases, it is not possible to distinguish the meanings of the Pilpel from the Hiphil. The other nineteen occurrences, however, show the particularized meaning "to provide with food." Evidently this reflects the causative function of the Pilpel stem: "to cause to contain, supply."

Examples of the primary meaning are found in passages such as I Kgs 7:26, 38; 8:64; II Chr 4:5; 7:7 where the sizes of the molten sea and the bronze lavers in Solomon's temple are described in terms of the number of *baths* of water they contain.

Jeremiah then uses the word in a figurative sense when he expresses the impossibility of containing within himself the Lord's fury which is like a burning fire (Jer 6:11; 20:9). In a somewhat similar vein, Solomon remarks in his prayer at the dedication of the temple that it is silly to think of that house as containing God since the heaven of heavens cannot contain him (I Kgs 8:27; II Chr 2:6 [H 5]; 6:18).

As a logical extension of the above meanings are those which express the possibility or impossibility of enduring (or containing) something (Prov 18:14; Joel 2:11; Amos 7:10; Mal 3:2). Two of these (Joel and Mal) express the impossibility of enduring God's wrath when he comes and are reminiscent of Rev (6:15, 16, etc.).

J.N.O.

963 כֹּוֹם (*kwm*). **Assumed root of the following.**

963a כִּימָה (*kimā*) **Pleiades**. (ASV and RSV similar.)

Group of seven stars in the constellation Taurus. The word appears in Amos 5:8 and Job 9:9 and 38:31. In each of these places it is used in connection with the creative power of God. In view of his capacity to put the stars in place, both ungodly living (Amos), and the questioning of God's wisdom (Job) are inappropriate. (See also *mazzal(r)ot*, *āyish*, and *k'sil*, which are used in the same contexts to refer to stars or constellations).

J.N.O.

כֹּוֹז (*kūmaz*). See no. 990a.

964 כוון* (kûn) *established, prepared, made ready, fixed, certain, right.* (ASV, RSV similar.)

Derivatives

- 964a כֶּן (kēn) *I, right, true.*
 964b כֶּן (kēn) *II, thus, so.*
 964c מְכוּון (mākōn) *place.*
 964d מְכוּוֹנָה (m'kōnâ) *base.*
 964e תְּכוּוֹנָה (t'kūnâ) *fashion.*
 964f כַּוּוֹן (kawwān) *cake.*

This root occurs with its derivatives more than 288 times. Two hundred seventeen of these occurrences are verbal, appearing in all stems but the Qal. The Niphal and the Hiphil occur most often. The root meaning is to bring something into being with the consequence that its existence is a certainty. This latter is not so much in view in the cognate languages which seem to stress existence, or the bringing into existence, of a thing. With this meaning the root appears in Ugaritic, Akkadian, and Arabic.

Five somewhat different connotations can be discovered in the usages of this root, all having basic theological significance. These connotations move from provision through preparation and establishment to fixity and rightness.

1) As noted above, the word as used in Hebrew, rarely means simply to bring into being. So rare is it, in fact, that BDB and KB suggest that the root meaning is "to be firm" (KB also adding "straight"). However, evidence of the original etymology may be found in those occurrences where something is said simply to have been formed or fashioned (brought into existence) (Jud 12:6; Job 31:15; Ps 119:73; Ezk 16:7). In none of these is the idea of fixity or firmness in view, but rather of basic formation. Particularly in the second and third of these, God's role in forming the human body is significant.

Probably this same basic idea is involved where the word is translated "to provide for" (cf. II Chr 1:4; Job 38:41; Ps 65:9 [H 10]; 78:20; Prov 6:8). Especially in question here is God's ability to provide food for his people and creation. At numerous points it is difficult to know whether certain usages should be translated "provide" or "prepare." It seems likely that the several references in Chr to David's "preparing" materials for the temple could just as appropriately be understood as referring to his "providing" such materials.

2) At any rate, however, it is clear that a very significant group of occurrences must be translated with "prepare." In view of something in the future, certain things are set in order. Meal preparation (Gen 43:16; Josh 1:11; Neh 8:10) and military preparation (Josh 8:4; Ezk 7:14; 38:7; Amos 4:12) are two circumstances in which the word is used in this way. In the latter case many of the

references indicate it is God who will war on the ungodly and they should prepare themselves as best they can (cf. Job 15:23; Jer 46:14; 51:12, etc.). On the other hand, God has made preparations as well. These would include his creative functions (Ps 147:8; Job 28:27; Prov 8:27) as well as his judicial ones (Ps 7:11, 13 [H 12,14]; 9:7 [H 8]; Prov 19:29; Zeph 1:7).

The meaning of a group of references which speak of persons "preparing" their hearts to seek the Lord (cf. I Chr 29:18; II Chr 12:14, etc.) is somewhat unclear. It seems likely that the RSV rendering "set," in keeping with the several passages in Ps (cf. 57:7 [H 8] "my heart is fixed [RSV "steadfast"], O God") is more appropriate.

3) As with the previous connotation, there is some ambiguity at the border between "prepare" and "establish." This is especially true in God's creative acts. While Prov 8:27 says that God "prepared" the heavens, Prov 3:19 has him "establishing" the heavens. Here come the special overtones of certitude. They are implicit in the very character of the biblical deity, a God who does not change (Ps 119:90). Because God has brought heaven and earth into existence they are fixed forever (Jer 33:2). So the use of "establish" is especially appropriate. The references where this translation is appropriate may be divided into three groups. All three of these have royal overtones. God, as the divine king has established the heavens as his throne (Ps 103:19) and the earth as his dominion (I Chr 16:30; Ps 93:1; Isa 45:18). As the divine king, his work is accomplished through wisdom and understanding (Prov 3:19; Jer 10:12; 51:15). This in itself leads to the fixity of what he has done.

4) It is the divine king who then guarantees or refuses to guarantee human kingship. Some twenty-five times the word is used with reference to the establishment of a dynasty. It is made plain that, in and of itself, no human line can be established. Only by relation to the One in whom kingship abides is this possible (Ps 89:37 [H 38], etc.). The culmination of this thought is found in Isa 9:6 [H 7] where the kingdom of the Messiah is established by God.

On a somewhat more human level, the book of Prov shows that establishment, on the throne or elsewhere, is not possible apart from adherence to the divine standards of righteousness (16:12, etc.).

But the great test of God's kingship is the problem of sin. This problem is dealt with through the establishment of a people (Deut 32:6). The particular creation language of this verse is significant. Redemption is a part of the total work of creation. Furthermore, God overcomes sin by establishing his sanctuary in the midst of his people (Ex 15:17; Isa 2:2).

5) The sense of well-being which results from

being under God's hand is best expressed in the final connotation. If our heart is fixed on God (Ps 112:7, etc.) then we may be sure that he will establish (also direct, order) our ways (Ps 37:23; 90:17; Prov 16:9). Apart from this kind of confidence, a person's ways are temporary and shaky. But with it there comes a certainty, a rightness (Jer 23:10, etc.), which imparts some of the glory of the infinite to the finite.

kên I. Right, true. An adjective, occurring at least twelve times, perhaps more often since its usage is often difficult to distinguish from the following. Used in modern Hebrew for "yes."

kên II. Thus, so. A widely used adverb expressing the realization of something previously spoken. Often coupled with prepositions such as 'ahârê, 'ad, 'al and l'.

mākôn. Place. Occurs seventeen times, all but one (Ps 104:5) referring to God's dwelling place, either in heaven or the temple.

m^ckônâ. Base. Occurs almost entirely in I Kgs 7, and always with reference to the ornate bases designed to support the ten brass lavers in the Solomonic temple.

t^ckûnâ. Fashion, store, seat. Occurs three times, each translated differently: the "fashion" of the temple (Ezk 43:11); the "store" of Nineveh's pleasant furniture (Nah 2:9 [H 10]); the "seat" of God (Job 23:3).

kawwân. Cakes. Occurs twice, both referring to an element used in the worship of the Queen of Heaven (Jer 7:18; 44:19).

Bibliography: THAT, I, pp. 812-16.

J.N.O.

965 כֹּס (kôs) **I, cup.** (ASV and RSV similar.)

Of the four words usually translated "cup" (*gābia'*, 'aggān, sâp), *kôs* is the most common, occurring thirty-three times. *gābia'* occurs next most frequently with thirteen occurrences. *kôs* seems to denote a drinking goblet, whereas *gābia'* may (Jer 35:5) or may not (Ex 25:31) be associated with drinking. An 'aggān is more of a bowl, a larger vessel; a sâp also is larger, like a bowl, but it was used for drinking (Zech 12:2). Both Ugaritic and Arabic have cognate nouns for drinking cup from this root.

Of the thirty-one occurrences, about ten speak of literal cups. Of these, five occur in Gen 40 where Joseph interprets the dream of Pharaoh's cupbearer. It is interesting to note that Joseph's cup discussed in Gen 44 is *gābia'*.

Sixteen of the figurative usages present the cup in a negative light. Primarily these relate to God's judgment upon sinful nations (Jer 25:15). They now drink to the bitter dregs (Isa 51:17, 22) the

folly which they have chosen. The result is as drunkenness; staggering (Isa 51:22) and shame (Hab 2:16). It is the cup of the Lord's fury (Jer 25:15). It was this cup which stood before Christ's eyes in Gethsemane (Mt 26:39).

Because of God's forgiveness through Christ the cup offered to us may be one filled with blessing and not curse (Ps 16:5; Ps 23:5). Human beings must choose the cup they will drink: fury or salvation (Ps 116:13).

J.N.O.

966 כֹּס (kôs) **II, a kind of owl** (Lev 11:17; Deut 14:16; Ps 102:7).

967 כּוּר (kwr) **I. Assumed root of the following.**

967a כָּר (kār) **basket-saddle**, only in Gen 31:34, *b^ckar-haggāmāl* "in the camel-basket," a sort of palanquin bound on the saddle itself.

967b כּוּר (kūr) **furnace**.

967c כִּיר (kīr) **range** (for cooking).

967d כִּיּוֹר (kiyôr) **laver, pan**.

kūr. Furnace. (ASV and RSV similar.) A smelter's furnace for the refining of metal. It is only used figuratively in the Old Testament, appearing nine times. Three times it is used of Egypt, from which Israel was delivered (Deut 4:20; I Kgs 8:51; Jer 11:4). In these references there seems to be no stress upon refinement, but merely on the heat symbolizing affliction. On the other hand, the furnace of the exile is definitely depicted as one of refinement (Ezk 22:18, 20, 22) from which Israel will once more emerge as God's chosen (Isa 48:10).

kīr. Range (for pots). (ASV similar; RSV "stove.") Evidently a platform which held pots over the cooking fire. Occurs in Lev 11:35 where it is said to be unclean if an unclean animal dies on it.

kiyôr. Laver, pan, hearth, scaffold. (ASV and RSV similar.) Apparently a pan-like construction, having low sides (thus II Chr 6:13, Solomon stood on a bronze scaffold [RSV "platform"]). Apart from the preceding, all other references have to do with a pan as such. The word appears twenty-three times, of which twenty have to do with the laver of the tabernacle or those of the temple. Whereas that in the tabernacle was for the washing of the priests' hands and feet (Ex 30:18), the ten lavers in the temple were for the washing of sacrifices (II Chr 4:6). The molten sea (II Chr 4:2, 6) filled the function of the earlier laver. [It is probable that the great sea also served as a reservoir from which the basins were filled. The basins were on wheeled stands so they could be moved to the sea for filling then taken to various places for use. The priests doubtless did not

wash in the sea which was a high structure. They washed their hands and feet with the water of the sea (cf. Ex 30:18–21). R.L.H.]

J.N.O.

- 968 כּוּר (kūr) *II, bore, dig, hew* (meaning dubious). Occurs only in Ps 22:16 [H 17], and there with a medial aleph, *kā'ārū* in some few MSS. The LXX also has a verb *orussō* dig, for the MT *ka'āri*. The verb in Ps 22:10 [H 17] may be an hapax *kā'ar*. The meaning "dig, wound, pierce" would derive from the context and LXX.

Derivatives

- 968a כּוּרָה (m^ekōrā), כּוּרָה (m^ekūrā) *origin (place of digging out?)* (e.g. Ezk 29:14; 21:35).

- 968b כּוּרָה (m^ekērā) *the name of a weapon* (Gen 49:5).

R.L.H.

- 969 כּוּשׁ (kūsh) *Ethiopia, Cush, Ethiopians.* (ASV, RSV similar.)

Derivative

- 969a כּוּשִׁי (kūshī) *Ethiopian.*

kūsh refers to the region immediately south and east of Egypt, including modern Nubia, the Sudan, and the Ethiopia of classical writers (not modern Abyssinia). It would begin at about the First cataract, where the Aswan dam now stands. A satellite, and sometimes ruler, of Egypt. The name derives from Egyptian *ksh*. Along with its gentilic (see below) it appears fifty-seven times in the Old Testament.

As indicated in the table of nations (Gen 10:6–8), Cush was associated with the southernmost parts of the known world, falling in Egypt's sphere of influence. Other indications of this view of Cush's extremity are found in the statement of extent of the Persian empire (from India to Ethiopia, Est 1:1; 8:9) and in the promise that exiles would return from beyond Cush (Isa 11:1; Zeph 3:10; cf. Isa 18:1). To the Israelites who in pride saw themselves located at the center of the world and also at the center of God's favor, the Lord (Amos 9:7) said that the distant Ethiopians were just as much his children.

The conjunction of Cush with Sheba (in southern Arabia, Isa 43:3; 45:14, etc.), statements of her mercantile wealth (Job 28:19; Isa 45:14) and the fact that Moses' wife is called a Cushite (Num 12:1; but cf. Ex 2:21 where Zipporah is clearly Midianite) have all combined to lead some students to believe that there was a Cush in Arabia. However, a glance at a map will show that southern Arabia is only separated from Ethiopia by a

small expanse of water. Furthermore the fact that the Ethiopian language is Semitic is a further indication of the connection. A number of other possible solutions make it unnecessary to identify Zipporah and the Cushite woman.

Although a number of suggestions as to the location of Cush in Gen 2:13 have been put forward, none has yet proven conclusive. The view of Speiser may be mentioned, however, that *kūsh* sometimes equals Akkadian *kashshu* Cassites, and refers to the mountain country east of Mesopotamia. In this view, the river Gihon of Gen 2:13 ran into the Tigris-Euphrates valley from the east (Speiser, E. A., "The Rivers of Paradise" in *Oriental and Biblical Studies*, Univ. of Penna., 1967, 23–30. Also Harris, R. L., "The Mist, The Canopy, and the Rivers of Eden," JETS 11: 177–79).

In several cases, especially in the prophets, Ethiopia is used in parallel construction as a synonym of Egypt (Isa 20:3–5; Ezk 30:4; Nah 3:9). This probably represents the dominance of Ethiopia (or, more precisely, Nubia) over Egypt between 750 and 663 B.C. Terhakah was a notable Nubian pharaoh who tried, unsuccessfully, to block Sennacherib's westward expansion (II Kgs 19:9; Isa 37:9). After 663 B.C. Egypt was independent of Nubia (Jer 46:9; Ezk 25:4, 5, 9). The Ethiopian army of Zerah referred to in II Chr 14:9 [H 8] ff. is somewhat puzzling in that no extra-Biblical evidence as yet supports the idea of this large an Ethiopian force (one million) operating that far north in the time of Asa (c. 900 B.C.).

kūshi. *Ethiopian, Ethiopians, Cushite.* Usually a gentilic of the above (Cushite), it also appears three times as a Hebrew proper name: 1) II Sam 18:21–32, a soldier appointed to run to David with news of Absalom's death. RSV translates "Cushite." His apparent ignorance of the nuances of the situation may indicate that he was a foreigner and that RSV is correct; 2) Jer 36:14 great grandfather of Jehudi, a Judean prince; 3) Zeph 1:1, father of Zephaniah.

J.N.O.

כּוֹשָׁרָה (kōshārā). See no. 1052a.

- 970 קָזַב (kāzab) *lie, be found a liar, be in vain, fail.* (ASV, RSV similar.)

Derivatives

- 970a קָזַבָּ (kāzāb) *lie.*

- 970b אָקַזַב ('akzāb) *lie, a noun occurring twice* (Jer 15:18; Mic 1:14).

This root and its derivatives occur forty-nine times in the Old Testament. The basic meaning is to speak that which is untrue and therefore false to reality. It is often used in connection with *shāw'* "vanity, emptiness." In distinction from

words translated "deceive, lie," etc., *kāzab* stresses the actual act of lying. The cognate is found in Aramaic, Arabic, and Akkadian.

Fundamental to the concepts of truth and falsehood in the Old Testament is the understanding that the God of Israel does not lie (Num 23:19; Ps 89:35 [H 36]). He is faithful to all that he has said and expects his followers to do the same. This is why false witness was such a serious offense (Prov 6:19; 19:5, etc.). Not only was a person denying the truth, but he was calling the God of Truth to be a witness to his crime.

An equally serious offense was false prophecy in God's name (Ezk 13:6-9, 19; Mic 2:11, etc.). Such prophecy was vanity because it was empty of any reality.

Because of man's alienation from God the Truth, lying has become endemic to us (Ps 4:2 [H 3]). Having lied to ourselves about the true nature of our relation to God and thus lost the security of trusting him, we are forced into greater lies about life (Isa 57:11). The essence of wickedness then is a denial of faithfulness and commitment, either to people or to facts (Ps 62:4 [H 5]). Indeed, it becomes a commitment to lies (Isa 28:17). By contrast, a faithful person will not lie (Prov 14:5).

But trust in anything or anyone other than God is vain—a lie (Job 41:9 [H 1]; Prov 30:6). Indeed *kāzāb* "a lie" is probably used in Isa as a derogatory substitute for "idol" (Isa 28:15, 17, cf. also Am 2:4; Ps 40:4 [H 5]). Lies can only deceive and fail one (Prov 23:3). It is this which God was trying to demonstrate to Israel through the prophets. Israel's hope that she could get her temporal needs supplied without commitment to God was a lie (Amos 2:4) and the longer she followed that road the more barren she became (Hos 12:2). Her only hope was to accept God's redemption and return to reality (Isa 28:17; Hos 7:13). Then she would discover freedom (Zeph 3:13) and fruitfulness (Isa 58:11) in life as it was meant to be (Ps 40:4 [H 5]; 25:10-13).

kāzāb. *Lie, deceitful, false, lying, leasing.* (ASV and RSV similar, but use one of the other words instead of "leasing.") A noun occurring thirty-one times, all but two (Jud 16:10, 13) in Ps, Prov, and the prophets.

Bibliography: THAT, I, pp. 817-22.

J.N.O.

971 כזר (*kzr*). **Assumed root of the following.**

971a אַכְזָרִי (*'akzār*) *cruel, fierce.*

971b אַכְזָרִי (*'akzārī*) *cruel.*

971c אַכְזָרִיּוּת (*'akz'riyūt*) *cruel.*

'akzār. *Cruel, fierce.* (ASV and RSV similar.) Occurs four times, all in poetic passages. Connotes insensitivity and lack of compassion.

'akzārī. *Cruel.* (ASV and RSV similar.) Occurs eight times in Prov, Isa, and Jer. Twice in Jer (6:23; 50:42) cruelty is defined as being merciless and in Prov 12:10 even the mercies of the wicked are said to be cruel. The Day of the Lord, for the wicked, will be one of cruelty (Isa 13:9).

'akz'riyūt. *Cruel.* Occurs in Prov 27:4 where wrath is said to be cruel.

J.N.O.

971.1 כֹּהֶה (*kōah*) *a small reptile, lizard(?)* Occurs only in Lev 11:30.

972 *כָּהַד (*kāhad*) *kick, conceal, cut off, cut down, make desolate.* (ASV and RSV similar.)

This verb, which appears in the Nilhal, Piel, and Hiphil, occurs thirty-two times in the Old Testament. It means to keep something back, to refuse to make it known. Since something which is unknown has no independent existence, the verb also denotes non-existence or effacement. There are no known cognates in the other Semitic languages.

In distinction from the other Hebrew words rendered "hide" or "conceal" (*hābā'*, *tāman*, *sātar*, and *ālam*, which see), *kāhad* has to do with refusing to declare something. When someone was asked to report something, he was charged "not to hide anything" (Gen 47:18; Josh 7:19; I Sam 3:17; II Sam 14:18, etc.). Similarly, if a person was possessed of some special knowledge, he ought not to keep it to himself (Job 15:18). Particularly was this so about the faithful character of God (Job 6:10; 27:11; Ps 40:10 [H 11]; 78:4).

The Hebrews were convinced that in the last analysis nothing could be hidden, or kept from God's knowledge: neither one's nature (Ps 139:15), nor one's character (Ps 69:5 [H 6]; Hos 5:3).

The word in the sense of cutting off or annihilating is used by Israel's enemies (Ps 83:4 [H 5]) by the Lord against those enemies (Ex 9:15; Ex 23:23; II Chr 32:21; Zech 11:8) and against sinful Israel (I Kgs 13:34; Zech 11:9).

J.N.O.

973 כֹּחַ (*khh*). **Assumed root of the following.**

973a כֹּחַ (*kōah*) *strength, power, ability, might, force, substance.* (ASV and RSV similar.)

Capacity to act, understood both in physical and figurative terms. The word, a noun, appears 126 times in the OT. It is relatively evenly distributed in its occurrences, the most in any one book being twenty in Job. It also occurs twelve times in Isa and Dan, and eleven times in Ps. The only cognate language in which this root appears is

Arabic where it has the verbal idea "to batter down."

In a static sense *kôah* suggests the capacity to endure, as of a stone (Job 6:12), but more commonly it expresses potency, capacity to produce. This may be expressed in sexual terms (Job 40:16; Gen 49:3), or it may express the product of the earth's potency (Gen 4:12; Job 31:39; etc.), but usually physical strength is intended, as in the references to Samson (Jud 16:5; etc.). By extension the word comes to connote general ability to cope with situations (Deut 8:17-18; I Chr 29:14; Ezr 10:13; etc.).

When applied to God, this term suggests that he is indeed omnipotent. His power is seen in creation (Jer 10:12; 32:17; etc.), in the Exodus events (Ex 9:16; 15:6; etc.), in his capacity to subdue his enemies (Job 36:19) and deliver his people (Isa 63:1). As compared to his power, human strength is nothing (II Chr 20:6; Job 37:23; Ps 33:16; Amos 2:14; etc.). The folly of relying upon human strength alone is seen both in Job and in the story of Samson. He is strongest who has discovered the finite limitations of his own capacities in the light of the limitless resources of God through his Spirit (Job 36:22; Isa 40:31; Mic 3:8; Zech 4:6).

Bibliography: THAT, I, pp. 823-24.

J.N.O.

974 קָהַל (*kāhal*) *paint (eyes)*. Occurs only in Ezk 23:40.

975 קָהַשׁ (*kāhash*) *fail, be found liars, belie, deceive, deny, dissemble, deal falsely, lie*. (ASV, RSV similar, except that RSV has "come fawning," or "come cringing" in place of "submit to.")

Derivatives

975a קָהַשׁ (*kāhash*) *leanness*.

975b קֶהַשׁ (*kehash*) *lying*.

The word *kāhash* which, with its derivatives, occurs twenty-nine times in the Old Testament, has an unusually large range of meanings. This might suggest two, or even three separate, but homophonous roots. However both KB and BDB see only one root involved. BDB suggests the unifying idea to be "to disappoint" and thus, "to deceive, fail, grow lean." KB has no overarching meaning to suggest. The Hebrew usage seems to stress the relational aspect of the word, emphasizing the undependable nature of a person or thing in a given relationship. The root is not attested in any other Semitic language unless Albright's suggestion (BASOR 83:40, n. 7) is correct that Ugaritic *tkh* (Gordon UT "shine") is a metathesized form of *khash*.

In thirteen other places the prominent idea is

that of dealing falsely with someone to that person's detriment. In such cases it is associated with treachery and robbery. In Lev 6:2 [H 5:21] deceiving a person in a matter of deposit or security is a trespass, as is lying about something one has found (6:3 [H 5:22]). The prophets (especially Hos [4:2; 7:3; 10:13; 12:1]) forecast a grim harvest from the climate of deception and unfaithfulness in which Judah and Israel lived.

It may be the idea of deception which lies behind those usages which KJV translates "submit" and RSV "cringe" (Deut 33:29; II Sam 22:45= Ps 18:44 [H 5]; 66:3; 81:15 [H 16]). Both BDB and KB suggest that feigned obedience or fawning are involved here. The remainder of the occurrences are translated by "deny." Here the idea is to fly in the face of the facts (Gen 18:15; Job 8:18). Five of these references have to do with denying God. To deny God is to live a lie. One may deny him by forgetting what he has done (Josh 24:27), by despairing of his goodness, or forgetting one's own need and living without dependence on him (Prov 30:9). One may deny him without ever intending to do so by leading a crooked and corrupt life (Job 31:28; Isa 59:13). And if one doubts his ultimate justice as applied to oneself, God is denied (Jer 5:12).

kāhash. Leanness, lies, lying. (ASV and RSV similar.) A noun translated "lies" or "lying" five times, "leanness" once.

In four cases the idea of failing is involved. In Ps 109:24 the Psalmist complains that his body "fails from fatness" (RSV has "become gaunt"). In Job 16:8, Job sees his leanness as a sign of God's judgment, and in Hab 3:17 the writer says he will trust God even if the olive crop fails (cf. also Hos 4:2). One may not depend on either body or crops in place of God.

kehash. Lying. Occurs once in Isa 30:9 where Israel, because of her refusal to trust God, is said to be a "rebellious people, lying (or false) sons."

Bibliography: THAT, I, pp. 825-27.

J.N.O.

976 כִּי (*kî*) *as though, as, because that, but, certainly, except, for, surely, since, that, then, when, etc.* (ASV and RSV similar.)

A particle expressing a temporal, causal, or objective relationship among clauses expressed or unexpressed. It is perhaps related to the inseparable preposition *k* "like, as." The same particle used in similar ways is found in Ugaritic (*k*), Phoenician, Moabite, Akkadian (*kî*), and Arabic. It occurs about 4250 times in the Old Testament.

In Hebrew *kî* is used in four ways: to introduce an objective clause especially after verbs of seeing, saying, etc. and translated "that"; to introduce a temporal clause and translated "when"

(some of these are almost conditional clauses, thus making "if" appropriate); to introduce a causal clause, "because, for, since"; and with 'im to express the reason why some case might not occur "except, but rather." In all four usages *ki* introduces a given which is the result of some other fact or action or will influence some other fact or action. Some would add an asseverative usage giving emphasis to what follows.

Examples are as follows: (objective) "believe that the Lord... has appeared to you" (Ex 4:5); (temporal) "when you buy a Hebrew servant..." (Ex 21:2); (causal) "The earth is the Lord's... for he has founded it..." (Ps 24:1, 2); (with 'im) "I will not let you go, except you bless me" (Gen 32:27).

J.N.O.

כִּי (ki). See no. 961a.

977 כִּיד (kyd). Assumed root of the following.

977a כִּיד (kid) *destruction*. Derivation and meaning uncertain. Used only in Job 21:20.977b כִּידֹן (kidôn) *dart, javelin* (e.g. Josh 8:18; Jer 50:42).

כִּידֹד (kidôd). See no. 953b.

כִּידֹן (kidôn). See no. 977b.

כִּידֹר (kidôr). See no. 954a.

978 כִּיּוּן (kiyûn) *kiyyun*. (ASV similar, RSV "kaiwan.")

This word occurs once in the Old Testament, in Amos 5:26, along with *sikkût* (q.v.). It is evidently an Assyrian loan word, being the name of one of the Mesopotamian star gods. *skt* and *kyn* both seem to denote the star god Saturn in the mythic literature of that region.

Both *sikkut* and *kiyyun* have apparently been revocalized with the vowels from *shiqquš* "abomination." This was one of several means by which Biblical writers expressed their contempt for paganism (replacing Baal in names with *bōshet* "shame" [II Sam 9:6], calling Bethel "house of God," Bethaven "house of iniquity," after the golden calves had been established there [Hos 5:8], speaking of the "dung" of the pagans instead of the "idols" of the pagans [Ezk 20:7, etc., *gillulim*, q.v.]), etc.

As noted in the article on *skt*, becoming subject to the Assyrians involved worship of their gods. Amos here says that such action will result in the destruction of Israel.

כִּימָה (kimâ). See no. 963a.

978.1 כִּילָפוֹת (kilappôt) *axe*.979 כִּים (kis) *bag, purse* (e.g. Deut 25:13; Mic 6:11).

כִּיר (kîr). See no. 967c.

כִּישׁוֹר (kîshôr). See no. 1052c.

קָקָה (kākā). See no. 956.

כֹּל (kôl). See no. 985a.

980 כָּלָא (kālā') *withhold, shut up, keep back, refrain, forbid*. (ASV, RSV similar.)

Derivatives

980a כָּלָא (kele') *imprisonment*.980b כְּלוּא (klw') *Kethib, כְּלִיא (k'li) Qere, imprisonment* (Jer 37:4; 52:31). See *kele'*.980c מִכְלָה (miklā) *enclosure, fold*.980d כִּלְאִים (kil'ayim) *two kinds*.

The basic meaning of this root is to restrict the flow or movement of a thing or person. The root appears in Ugaritic, Akkadian, Aramaic, and Ethiopic with similar meanings. In Arabic it means "to protect." It is somewhat similar to *kālā* (q.v.) but distinct in meaning and apparently unrelated.

kālā seems to indicate the interruption of what is in progress or would naturally be in progress. Thus, the windows of heaven were stopped up after pouring out the Flood (Gen 8:2). Similarly, the calves of the cattle pulling the cart with the ark were shut up from following them (I Sam 6:10). The only thing which can prevent the great natural processes is disobedience (Hag 1:10). Given the fallen nature of humanity, such disobedience itself must be restrained (I Sam 25:33; Ps 119:101).

The speaking of truth and praise to God ought not to be stopped (Num 11:28, Ps 40:9 [H 10]). If they are not, then neither will God's mercies be stopped (Ps 40:11 [H 12]). If such intercourse with men and God is stopped, a nearly intolerable pressure will build up (Ps 88:8 [H 9]).

kele'. Imprisonment. Always used in construct with another word, chiefly *bayit* "house," in which case the construct is translated "prison" (I Kgs 22:27, etc.). It is one of several words translated by "prison" (e.g. *maṭṭarâ, masgâr, 'ēsûr* [all of which see]). While there may be slight differences in the connotations of these according to the different root meanings, they seem to be used interchangeably.

It is of interest that imprisonment is not a penalty under the Mosaic code. But it was well-known in Egypt, as Joseph found out, and it was used by the Kings of Israel.

J.N.O.

קָלַיִם (*kil'ayim*). See no. 980d.

981 קָלַב (*klb*). Assumed root of the following.

981a קָלֵב (*keleb*) dog.

981b קָלוֹב (*k'lûb*) basket, cage (Jer 5:27; Amos 8:1).

keleb. Dog. The thirty-two occurrences of *keleb* are divided among four emphases, none of them positive. In eleven instances outright contempt is involved. To treat someone like a dog was to treat them as worthless (I Sam 17:43, etc.). Furthermore dogs were to be feared because they were rapacious (Jer 15:3). As an extension of these nuances, for one's body to be eaten by dogs was the ultimate in tragic ends to a life. Finally, the barking of a dog is compared to the sniping of an enemy (Ps 59:6 [H 7]).

The expression, "the hire of a dog" (Deut 23:18 [H 19]) is commonly interpreted to refer figuratively to wages from male prostitution; but some think that *klb* designates a type of Canaanite cultic personnel, and not a dog (See J. Gray, *The KRT Text in the Literature of Ras Shamra*, Brill, 1964, p. 64).

J.N.O.

982 קָלָה (*kālā*) I, accomplish, cease, consume, determine, end, fail, finish.

Derivatives

982a קָלָה (*kālā*) full end.

982b קָלָה (*kāleh*) failing with desire, longing. Occurs only in Deut 28:32, *w'ênēkā rō'ôt w'kālôt 'ālêhem* "while your eyes look and fail longingly for them."

982c קָלָיוֹן (*killāyôn*) failing, pining (of eyes, Deut 28:65); annihilation (Isa 10:22).

982d מִקְלָה (*miklā*) completeness, perfection, only in II Chr 4:21 in the phrase *miklôt zāhāb* "perfections of gold," i.e. purest gold.

982e תִּקְלָה (*tiqlā*) perfection.

982f תִּקְלִית (*taklit*) end, perfection.

982g קָלִי (*k'li*) vessel, utensil.

The basic idea of this root is "to bring a process to completion." The root occurs in all its forms 237 times. Of these 206 are verbal. As a verb it occurs with an intransitive meaning in the Qal stem 64 times. Transitively it appears in the Piel 140 times. The two remaining occurrences as a verb are in the Pual. The root also appears in Ugaritic and Akkadian. The fact that the Akkadian root is *kālû* which would reflect an original *kl'* and that *kālû* has both the meanings "cease, end, finish" and "delay, hold back" has suggested to some that *kālā* "cease" is a derivative of *kalā* "hold back" (q.v.). While this is

possible the usages of the two roots in the Hebrew Bible show little connection.

The processes which are brought to an end may be either positive or negative. That is, something may be continually added to until it is full or complete, or something may be taken away from until there is nothing left. The English word "finish" coincides very nicely with *kālā* in that it too can have either positive or negative connotations.

Processes which are brought to completion include the building of the temple (II Chr 8:16, etc.), speaking (Gen 17:22, etc.), eating (I Kgs 1:41, etc.), drinking (Gen 24:19, etc.), offering (I Sam 13:10, etc.), harvesting (Ruth 2:21, etc.) and numerous others. There seems to be an emphasis upon totality in these references. It is not that a person simply came to a certain point in the process and stopped, but that he or she carried it out in full. An example is found in Ruth 3:18 where Naomi tells Ruth that Boaz will not rest "until he has finished the thing." The noun *kālā* demonstrates the same point in that it must often be translated "full end" to differentiate it from some other end which may be merely a stopping place. On the other hand, to say that *kālā* means "to bring to perfection" is somewhat misleading in modern English idiom. "Perfect" implies "without flaw" whereas "complete" does not address the question of flaws.

On the negative side something which is "used up, vanished, spent, consumed" is also finished. The first three connotations occur chiefly in the Qal, while the fourth occurs often in the Piel. So one's days can be spent (Job 7:6) as can one's strength (Isa 49:4). Grass can dry up and fail (Isa 15:6; 32:10) and, through weeping, the eyes can also (Jer 14:6; Ps 69:3 [H 4]; 119:82, etc.). The spirit and the soul, because of separation from God, can pine away to the point of fainting (Ps 84:2 [H 3] 119:81; 143:7). Finally, the body itself must be consumed (Job 33:21; Prov 5:11).

The idea of being consumed is most commonly applied to violent destruction, often by war (Deut 7:22; I Sam 15:18; Jer 16:4). In the biblical context such destruction is directly connected to one's relation with God. Those who forsake the Lord will be consumed (Isa 1:28) as will the terrible ones and the scorners (Isa 29:20), the wicked (Ps 37:20), and all his enemies (Ps 18:37 [H 38]). In such destruction God's wrath is accomplished (rsv "completed," Ezk 5:13; 7:8, etc.). So Israel was commanded to consume the Canaanites (Deut 7:22), Amalekites (I Sam 15:18), and Syrians (II Kgs 13:17). As a corrective to any temptation to say that such commands are merely projections upon God of the Israelite lust for battle, are the many more numerous references to God's consuming an apostate Israel (Josh 24:20; Jer 5:3; Ezk 22:31, etc., etc.). God's holiness

could no more be at peace with pagan Israelites than with pagan Canaanites.

However, the consuming fire of God's anger is not the last word. The truly faithful Israelites were conscious of the fact that God would have been totally justified in destroying Israel long before he did, and that utterly (Ex 32:10; 33½3; Num 16:21; Lam 3:22). That they were not consumed was only because of his mercy (Lev 26:44; Num 25:11; Ezk 20:17). Even in the exile, when destruction did come, a merciful God would not make a "full end" of his own (Neh 9:31; Jer 4:27; 5:10; 5:18; 30:11, 46:28). If Boaz could not rest until he had finished the task of redeeming Ruth, neither will God rest until he has accomplished his purpose of redeeming all who will let him (Job 36:11; Dan 12:7; Jn 19:28).

kālā. *Altogether, consume, consumption.* This noun form must be translated as an English verb in several instances in order to make the sense plain. It expresses the limits of a thing or an idea. Occurs twenty-two times.

miklā. *Perfect* (rsv "pure"). Occurs in II Chr 4:21 with reference to gold. Here the meaning evidently is "unblemished."

tiklā. *Perfection.* Occurs once in Ps 119:96 where the author makes a- pun saying that he has seen the end (*qēs*) of all completeness (*tiklā*).

taklit. *End, perfection, perfect.* The sense here is of totality rather- than of being unblemished. A noun occurring five times, three of which are in Job.

k^eli. *Armor, bag, carriage, furniture, instrument, jewels, sacks, stuff, thing, tools, vessel, weapons.* (ASV and RSV similar.) A noun denoting the equipment, containers, tools, etc., appropriate to a given service or occupation. KB takes *k^eli* to be from the otherwise unattested root *kālā* III, "to contain." The word occurs 319 times.

As is evident from the variety of words used to translate *k^eli*, the translators have used English words appropriate for the situations involved. Thus a soldier's equipment will be armor or weapons (Jud 18:16) or even baggage (I Sam 17:22). A musician's equipment will be an instrument (I Chr 15:16), whereas a builder's will be a tool (I Kgs 6:7). Finely worked items of gold and silver are called jewels (Gen 24:53; Num 31:50-51) or vessels (II Kgs 12:13 [H 14]), depending on the context.

One hundred seven of the occurrences have to do with the equipment of the tabernacle and the temple. The כֵּלִים commonly uses "vessels" or "furniture" as the translation in these instances (as does ASV) while RSV uses "utensils." The term does not refer to the main items in the sanctuary such as altar or lampstand, but to the equipment

used in serving these. Nebuchadnezzar, finding no idol in the temple to take into captivity, could only take off this equipment as symbolic of its owner (II Chr 36:7). However, God was not controlled by the equipment, as Belshazzar was to discover (Dan 5:2).

J.N.O.

983 כלה (klh) II. Assumed root of the following.

983a כִּלְיָהּ (kilyā) *kidneys, reins.* (ASV similar. RSV translates with "heart," "mind," or "soul" whenever כֵּלִים and ASV use "reins" as a figurative term.)

Occurs thirty-one times in Hebrew as well as in Akkadian, Aramaic, Arabic, Ethiopic, and Ugaitic. In all of these languages, the term refers to the twin organs located in the lower back, the function of which is to filter impurities from the blood. With the fat they were of special significance in certain Hebrew sacrifices. When used figuratively, the term refers to the innermost aspects of personality.

Sixteen of the occurrences relate to sacrificial practices: twelve occurring in God's instructions and four in statements of the fulfillment of the commands. Animals given for the peace, sin, and trespass offerings, as well as those offered for consecration of the priests, were to have the internal fat, the kidneys, and the caul above the liver removed and burned on the altar (Ex 29:13, 22; Lev 3:4, 10, 15; 4:9; 7:4; 8:16, 25; 9:10, 19).

No clear reason for the removal is specified in the Scripture, nor has any been forthcoming as yet from cognate studies. Suggestions have included: fat was a special delicacy reserved for God and since the kidneys are usually encased in fat they belonged to him (ISBE, III, p. 1797); perhaps because of their density and color they were associated with the blood (IDB, III, p. 9f.). Furthermore it might be suggested that there was an understanding of the vital connection of the kidneys with the purity of the blood. On the whole, the first suggestion probably has the fewest difficulties. The idea of the special delicacy of the fat and kidneys is apparently born out by Deut 32:14 where the choicest wheat is called "the fat of the kidneys of wheat" (RSV "with the finest of the wheat"). (Cf. also Isa 34j;6.)

Twice (Job 16:13; Lam 3:13) death and destruction are spoken of as arrows slashing into the kidneys. If a near eastern warrior could be fired on from the rear, he was very vulnerable. Here both writers are claiming that God has surrounded them and overcome them with his superior strength.

In two other places the kidneys are used as a

figure for the entire body. The psalmist (139:13) says that God has possessed his "body" from the beginning, having clothed it in the womb. On the other hand, Job (19:27) testifies that when his "body" is no more, he will still have eyes to see God. (NEB contests this rendering, rather connecting the phrase to the next line and reading, "My 'heart' failed me when you said.")

The remaining nine references all use kidneys as a symbol of the innermost being. This is probably so since in dismembering an animal the kidneys are the last organ to be reached. In this usage it is frequently paralleled with heart (as it is at least once in Ugaritic). Jeremiah seems to be emphasizing this innermost idea when he says that the religion of the wicked is superficial, on their lips, but far from their kidneys (12:2). The idea that the wicked would prosper grieves the heart and kidneys of the psalmist (73:21), but they rejoice in the writer of Proverbs when his son speaks right (23:16). Five times in Jer and Ps the importance of inner religion is stressed when it is said that God tries the heart and the kidneys (Jer 11:20, etc.).

- 985 כָּלָל (*kālāl*) *I, perfect, make perfect*. (ASV, RSV similar.)

Derivatives

- 985a כָּל (*kōl*) *all*.
 985b כָּלִיל (*kālil*) *perfect*.
 985c מִכְלֹל (*miklōl*) *most gorgeously*.
 985d מִכְלָל (*maklāl*) *all sorts of things*.
 985e מִכְלָל (*miklāl*) *perfection*.

Except for the particle *kōl* "all," which occurs upwards of 5000 times, this verb and its derivatives occur 21 times, 8 of which are in Ezekiel. The root meaning is "to be complete, whole." The verb is perhaps denominative since it appears but twice, both in Ezk 27 (v. 4, 11). Both of these verbal usages are associated with

"beauty." The translation "perfect" only appears when the root is so associated (St. in Ezekiel [4t. with ref. to Tyre], once in Lam 2:15 and Ps 50:2, both of which refer to Jerusalem as the "perfection of beauty.")

kōl. *All, every, any, whole, none*. A very common particle, occurring about 5400 times. Of these all but about 800 are in a genitive relation with the following word, signifying thus, "the whole of something." It is commonly translated "all" if the following word is plural, and "every" if the word is singular and without the article. It can also have a suffix attached to it: "the whole of it, all of it." This particular formation may then follow a given noun, stressing the aspect of totality (II Sam 2:9). It can also be used in this way with the noun understood, as does Isaiah when he expressed the corruption of the entire people by saying, "All of it loves a bribe" (1:23; cf. also 9:17 [H 16]). In some contexts it denotes "all kinds of," "of all sorts." Thus Eliezer took with him "all of the good thing of his master" i.e. "a great variety of good things" (Gen 24:10; cf. Lev 19:23).

kōl can also stand by itself, or absolutely, to express "everything." The sense in which "all" is to be taken must be gathered from the context (cf. Jer 9:3). When used with the article it refers to something just mentioned (Lev 1:9; etc.), or, in a wider sense, to the whole of creation. Such passages as Ps 103:19; 145:9 and Jer 51:19 use this construction when expressing the idea of God's lordship over all things.

kālil. *Perfect, whole, wholly, all*. A noun used both adjectivally and verbally. It occurs fifteen times expressing totality, both of accomplishment and of destruction.

kālil the substantive is used in three ways, all closely related and having to do with wholeness, or completeness. Four occurrences relate to beauty, and, as noticed above, are translated with "perfect." That which is wholly beautiful is said to be perfectly beautiful. Israel is spoken of in this sense (Ezk 16:14). Her beauty is that of the chosen bride of the Lord, but she has prostituted that beauty with other lovers so that the final result is destruction and the mocking question recorded in Lam 2:15 "is this the city men call the perfection of beauty?" So also the term is used of Tyre and her king (Ezk 27:3 and 28:12; cf. also verbal usages in 27:4, 11). All of these usages remind the reader that perfection of beauty apart from submission to the Lord may finally be more of a curse than a blessing.

Three occurrences have to do with making an entire object of one color, namely blue. Two times one of the high priest's garments, the robe of the ephod, is referred to (Ex 28:31; 39:22), and the third reference (Num 4:6) is to the cloth

which was to cover the ark when it was being moved.

The remaining occurrences of *kālil* (eight) refer to total consumption. Of these, six refer to the whole burnt offering, while of the remaining two, one (Isa 2:18) speaks of God's utter destruction of idols, and the other (Jud 20:40), of a whole city going up in smoke (ASV and RSV; KJV "the flame of the city ascended").

The usual word for the burnt offering (Lev 1) is 'ōlā (q.v.). This offering was the chief sacrifice, being offered both daily and at every great festival. It dealt not so much with specific sins as it did with the general alienation of man from God and the need for continual sacrificial atonement if holy God and fallen man were to live together in fellowship. From the Gospels (Jn 1:29) to the Revelation (21:9, 14, 22, 27) Christ is seen to be the fulfillment of this sacrifice, in particular, and all the sacrifices in general.

When *kālil* is joined with 'ōlā (I Sam 7:9; Ps 51:19 [H 21]) it is emphasized that unlike the other offerings, where certain portions belonged to the offerer or to the priest, the burnt offering belonged wholly to God. At least once (Deut 33:10; 13:16 [H 17], RSV) *kālil* is used by itself as "whole burnt offering." This emphasis upon totality seems to indicate that atonement can be achieved by God alone and that only through a total surrender and consumption of the sacrifice as seen finally in Christ.

miklōl. *Most gorgeously, all sorts of armor.* There is little agreement over the correct translation of this word. The fact that it occurs but twice (Ezk 23:12; 38:4), does not ease the problem. In both cases it is used in contexts describing the splendid appearance of military men. A literal translation would seem to be "clothed fully." But clothed in what? RSV has "in full armor" in both cases, while NEB gives "in full dress" for 23:12 and "all fully equipped" for 38:4. ASV duplicates the KJV.

maklūl. *All sorts of things.* Occurs once in Ezk 27:24 describing the wares of Tyre's clients. ASV translates "choice wares," RSV "choice garments," NEB "gorgeous stuffs." BDB suggests "thing made perfect."

miklāl. *Perfection.* Occurs once in Ps 50:2 "Zion, the perfection of beauty" (cf. Lam 2:15).

Bibliography: THAT, I, pp. 828-30.

J.N.O.

986 כָּלָה (*kll*) II. Assumed root of the following.

986a כַּלְהָא (*kallā*) *daughter-in-law.*

986b כַּלְהָא (*k'ālā*) *espousal.*

kallā. *Daughter-in-law, spouse, bride.* (ASV and RSV similar, except that RSV does not use

"spouse.") Denotes the circumscribed relationship of a woman who is sworn to one's self or one's son. It may refer to a bride or to a woman long married, like Tamar (Gen 38:11) or Ruth (Ruth 1:6). The root is presumed to be *kll*, but this is not certain. In Akkadian *kallatu* is a "reserved one" and in Ugaritic *klt* refers to goddesses (51:1.16; 4.54) or human beings (1175.2) who are reserved to the gods. Joel 2:16 refers to the fact that the bride was "closeted."

In this sense nine of the references have to do with sexual irregularity involving the daughter-in-law or bride. Anything which breaks the sanctity of the created order of relationships is sternly forbidden (Lev 18:15, etc.). Though Judah and Tamar out of deception on the part of both entered into an incestuous relationship, a crime worthy of death according to the Law of Moses (Lev 20:12), God's grace overruled their sin so that Perez, the offspring of that union, became part of Israel's royal lineage (Gen 38).

Seven occurrences are in Ruth where the stress seems to be upon the fact that the relationship can become something much more than simply official as God's providence works through it (e.g. 4:15).

The Song of Solomon six times in ten verses (4:8-5:1) refers to the beloved as the bride (and sister). In the context the point seems to be that she is a lovely enclosed garden reserved for her husband alone.

The joy of the consummation of the marriage agreement is dwelt on in Jer and Isa. Jeremiah says three times that because of judgment such festal scenes as marriages will be stopped (7:34; 16:9; 25:10). But that is not the final word. The prophet foretells the day when such joys will be restored (33:11).

Isaiah sees redeemed Israel as God's chosen bride, responsive to him alone, decking herself with jewels and a robe of righteousness in preparation for his coming (49:18; 61:10). In that day, says Isaiah, God will delight over her as a bridegroom over a bride (62:5). It is evident that this imagery provides the prototype for the figure of the Church as the Bride of Christ in the New Testament (Rev 21:2).

k'ālā. *Espousal.* Occurs once in Jer 2:2 where God remembers the love which Israel professed to him in the early days of the covenant in the wilderness. Israel's agreement to serve God only is compared to a young girl's oath to know no other man as her husband (cf. *kallā* "daughter-in-law, bride").

J.N.O.

987 כָּלָם (*kālam*) *be ashamed, confounded, reproached, hurt, be put to shame, be put to confusion, blush.*

Derivatives

- 987a כְּלִמָּה (*k'limmā*) *confusion, dishonor, reproach, shame*.
 987b כְּלִמּוֹת (*k'limmūt*) *shame*. Occurs only in Jer 23:40.

kālam denotes the sense of disgrace which attends public humiliation. In thirty cases the root is used in parallel with *bōsh* "to be ashamed" (q.v.). Any distinction between the meanings of the two roots is therefore small. However, when *kālam* appears by itself it does not often have the idea of disgrace which comes through a failed trust (a prominent element in *bōsh*). Rather it is a more general disgrace resulting from any kind of humiliation. The fact that the Arabic cognate means "to wound" suggests the idea of a "wounded" pride.

kālam seems to refer to 1) wounding of the body, 2) wounding of the spirit through public humiliation, and 3) wounding of the spirit because of defeat and captivity.

The first usage is supported by two references, both in I Sam 25 (7, 15) where Nabal's men are said not to have been "hurt" by David.

An example of the second kind of usage is found in I Sam 20:34 where Saul is said to have done shame (or hurt) to David by maligning his character to Jonathan. Other examples of such undeserved humiliation are: "I hid not my face from shame and spitting" (Isa 50:6; cf. also Num 12:14; II Sam 10:5). To be charged with wrongdoing brought its own shame (Jud 18:7), whether the charge was correct or not. So Boaz told his workers not to shame (or reproach) Ruth for gleaning among them (Ruth 2:15), and Job's "comforters" felt it necessary to shame Job for mocking God (Job 11:3; 19:3).

There were some kinds of activity by which a person ought to be humiliated even without being reproached for them. Prostitution was one of these and the prophets charged the Hebrew people with religious prostitution. (Even the Philistines were embarrassed by the Hebrews' actions according to Ezk 16:27.) However, the people had not even the grace to blush (Jer 3:3; 6:15; 8:12). Therefore, the prophets promised that shame would come from another quarter: defeat and captivity. If they would not be embarrassed and ashamed because of their sins, they would be so because of their helplessness (Isa 30:3; Ezk 32:30).

However, Israel will not finally be ashamed through God's punishment, but rather through his goodness. According to Ezekiel (16:54, 61, 63; 43:10-11) it is when God, in undeserved grace, restores Israel and defends her (cf. Isa 54:4) that Israel will become truly ashamed of the way she has treated him.

- כִּכָּר (*kikkār*). See no. 1046c.
 כְּלִמּוֹת (*k'limmūt*). See no. 987b.

- 988 כָּמָה (*kāmah*) *faint* (Ps 62:3).

- כִּמּוֹ (*k'mō*). See no. 938.

- 989 כְּמוֹשׁ (*k'mōsh*) *Chemosh*. (ASV and RSV similar.)

God of Moab, referred to eight times in the Old Testament and known from contemporary Assyrian inscriptions, as well as the Moabite Mesha Inscription. [*Chemosh* in the form *kamīshu* is now reported to be attested in the Ebla tablets (R. Youngblood)].

Little is known about the character or worship of Chemosh. It is striking that the Moabite king, Mesha, in his inscription on the famous Moabite stone thanking Chemosh for deliverance from Israel, uses language which is very reminiscent of that used in the Bible to praise Yahweh (cf. also Jud 11:24). It is possible that Moab, long under the domination of Israel, had appropriated some of her conceptions about God or that such honorific expressions were common in the ancient near east.

It is clear from the Bible that the influence of the worship of Chemosh also went in the other direction. Along with Ashtoreth (Astarte) of Sidon and Milcom of Ammon, Chemosh had been given a worship center on the outskirts of Jerusalem by Solomon (I Kgs 11:7, 33). These were probably part of Solomon's system of alliances with these countries. The worship centers remained influential for some 300 years until deified by Josiah (II Kgs 23:13).

In two aspects, the separation between Yahweh and Chemosh is clear. One is the idolatry of Chemosh. So long as he was represented by an image he was subject to this world. He could go into captivity (Jer 48:7) and Yahweh could not. As an embodiment of this world he could only fail Moab as Israel's bulls had failed her (Jer 48:13).

Furthermore, Yahweh, as the giver of life, forbade human sacrifice. It is clear that Chemosh, like the other ancient near eastern deities, accepted, and may have demanded, such sacrifice. Milcom (or Molech) with whom Chemosh seems to be identified in Jud 11:24 was clearly such a blood-thirsty deity and is condemned as such by the writers of Scripture.

Bibliography. Cross, F., and Freedman, D., *Early Hebrew Orthography*, American Oriental Society, 1952, p. 39, n. 13.

J.N.O.

- 990 כִּמּוֹ (*kmz*). Assumed root of the following.

- 990a כִּימָז (*kūmāz*) *tablets*. (ASV "armlets," marg. "necklaces"; RSV

991 כִּמְנֹ (kmn)

“armlets,” “beads,” NEB “pendants.”

It is clear from the context in which this word occurs that it is some kind of ornament (Ex 35:22; Num 31:50). Further precision is not possible. In both cases they are part of freewill offerings to God.

J.N.O.

991 כִּמְנֹ (kmn). Assumed root of the following.

991a מִכְמָן (mikmān) *hidden stores* (Dan 11:43).

991b כַּמּוֹן (kammōn) *cumin*.

992 קָמָם (kāmas) *store up* (Deut 32:34).

993 קָמַר (kāmar) *I, yearn, be kindled, be black* (ASV similar, RSV instead of “be black” has “be hot.”)

The root meaning is to be warm, hot. Three of the four occurrences (Gen 43:30; I Kgs 3:26; Hos 11:8) all of which are Niphal express the emotions of filial attachments, in the latter case those of God for his people.

J.N.O.

994 כִּמְרִי (kimrî) II. Assumed root of the following.

994a כִּמְרִיר (kimrîr) *darkness, gloominess* (Job 3:5).

995 כִּמְרִי (kimrî) III. Assumed root of the following.

995a מִכְמָר (mikmār) *net, snare* (Isa 51:20).

995b מַכְמֹר (makmôr) *net, snare* (Ps 141:10, 11).

995c מִכְמֶרֶת (mikmeret) *net, fishing net* (Hab 1:15).

995d מִכְמֹרֶת (mikmôret) *net, fishing net* (Isa 19:8).

996 כֹּמֶר (kômer) *priest, idolatrous priest*. (ASV and RSV similar. RSV always translates “idolatrous priests.”)

This word occurs three times in the Old Testament: II Kgs 23:5; Hos 10:5; Zeph 1:4. All of these refer to priests who had led Israel in idolatrous worship. The references cover the broad spectrum of pagan influences in Hebrew religion: bull worship in North Israel, Baalism in Judah and fertility rites on the “high places.”

The root meaning of the word is not known. Mowinckel, in an article which appeared in ZAW 38:238f. suggested that it was drawn from the root *kmr* I “to be warm, hot.” If this were so *kômer* would mean “the excited one” and would refer to the dervish aspect of pagan worship. However,

the word may be related to an Egyptian root (cf. KB p. 442). This would be very appropriate in view of the interrelations between Canaanite and Egyptian religions. The word is used in old Aramaic but does not appear in Ugaritic which uses the root *khn*. Albright argues that the word refers to eunuch priests—which, of course, were forbidden in Israel (Deut 23:1 [H 2]; Albright, FSAC, p. 234).

J.N.O.

כִּמְרִיר (kimrîr). See no. 994a.

כֶּן (kên). See nos. 998a, 999a, 964a,b.

997 קָנָה (kānâ) *give flattering titles to, surname, be surnamed* (ASV and RSV similar.)

Occurs four times, only in Piel and Pual (Job 32:21–22; Isa 44:5; 45:4). Twice Eliphaz says he does not know how to give false titles. In Isa God promises that in the Restoration, Israel’s title will be a truth, not a misnomer.

קָנָה (kānâ). See no. 999b.

כִּנּוֹר (kinnôr). See no. 1004a.

998 כֶּן (kên) I. Assumed root of the following.

998a כֶּנֶף (kên) *foot, base, place, office, estate*. (ASV and RSV similar.)

A noun from a theoretical root *knn* “to be firm, substantial.” It denotes the physical base or foundation of something (especially the bronze laver). The remainder of the occurrences refer to a person’s position or office.

J.N.O.

999 כֶּן (kên) II. Assumed root of the following.

999a כֶּן (kên), כִּנּוּם (kinnim), כִּנְאָם (kinnām) *gnat, gnats, gnat swarm*. Meaning dubious.

999b קָנָה (kānâ) *support (of tree)*, i.e. root, stock (Ps 80:16).

1000 קָנָם (kānas) *gather, collect, wrap* (in a cover, Hithpael).

Derivative

1000a מִכְנָסִים (miknās) always plural *miknāsayim, trousers*.

kānas occurs eleven times in the OT, seven times in the Qal, three in the Piel, and once in the Hithpael.

One usage of *kānas* refers to David’s gathering people in order to prepare for Solomon’s construction of the temple (I Chr 22:2). In a similar vein Esther sent word to Mordecai to gather together all the Jews who were in Shushan (Est 4:16). The power of God is extolled (Ps 33:7) in gathering the waters of the sea as though in a heap.

Nehemiah 12:44 records the appointment of men to collect offerings, tithes, and portions of the harvest for priests and Levites. Israel is warned that God intends to gather them to undergo the fire of his anger (Ezk 22:21). Isaiah likens Israel's untenable international position to a man whose bed covering is so narrow that he cannot wrap himself in it (Isa 28:20).

miknās. *Trousers or drawers* (for priests) (KJV, ASV, RSV render similarly, breeches). This noun occurs only in the dual (*miknāsayim*). It is found five times in Ex and Lev and once in Ezk 44:18. Trousers were ordered by God in the interests of decorum, and were made of linen to absorb perspiration.

C.L.F.

- 1001 קָנַעַ (kāna') *be humbled, subdued, brought down, low, under, brought into subjection.* (ASV, RSV similar.)

Derivative

- 1001a קִנְיָה (kin'ā) *bundle, pack.* Occurs only in Jer 10:17, "pack your bundle (and take it) out of the land."

This verb occurs thirty-six times. It denotes bringing a proud and recalcitrant people or spirit into subjection. The only cognate is found in Arabic where the root means "to fold (the wings of a bird)."

No thoroughgoing distinction is possible between *kāna'* and the two other words *ānā* and *shāpēl* which are most commonly translated "be humble." However, slight distinctions may be drawn: *ānā* seems to stress the aspects of forcible humiliation (including rape), whereas *shāpēl* contrasts height and lowness. *kāna'* compares dominion and subjection (Ps 106:42).

Eighteen of the occurrences refer to military subjection, most of these being nations which had oppressed Israel or at least threatened to do so. But Israel's God has made them subject to her (Neh 9:24, etc.).

Of the eighteen references to a spiritual submission, fifteen relate the actions of a king in submitting himself and his nation to God (I Kgs 21:29, etc.). The emphasis is upon a proud and independent spirit abasing itself.

Two key references are Lev 26:41 and II Chr 7:14 which indicate that so long as a person, or nation, is arrogant and self-sufficient, God can do nothing for them.

J.N.O.

- 1002 קְנַעַן (*kēna'an*) *I, Canaan.*

Derivatives

- 1002a קְנַעֲנִי (*kēna'ānī*) *Canaanite.*
1002b קְנַעֲנִי (*kēna'an*) *II, merchant.*

kēna'an is the name of either a person or a territory. Most of its ninety occurrences are in the Pentateuch (thirty-nine in Gen). The expression "land of Canaan" occurs sixty-two times.

Canaan, one of the sons of Ham, is first mentioned in Gen 9:18. He is listed as the father of Sidon, Heth, and nine other peoples including Jebusites and Amorites (I Chr 1:13). The curse upon Canaan which destined him to be a servant to his brothers (Gen 9:25, 27) likely pointed forward to the later subjugation of the inhabitants of Canaan at the hands of the Israelites in the times of Joshua and the Davidic monarchy. The name of the land may derive from this forbear, or there may be in Gen 10:15-18 a play on the word "Canaan" which is identical in sound with the name of Noah's grandson. Speiser derived the word "Canaan" from a word for purple dye found in Nuzi. (The Greek word for Phoenicia, *phoinix*, means purple.) Later study makes this unlikely. Maisler and Albright argued for an original meaning "purple merchant." Millard, following Landsberger, claims that derivation from a purple color is impossible, but is not able to offer a fully defensible origin. See the bibliography for references.

In such expressions as "inhabitants of Canaan" (Ex 15:15) or "kings of Canaan" (Jud 5:19) the population of a territory is in view. The "language of Canaan" in Isa 19:18 is the Hebrew language though there were also other dialects.

Canaan, as an Egyptian administrative district in the second millennium, comprised Palestine and southern Syria. Biblically, Canaan consists of the land west of the Jordan and is distinguished from the area east of Jordan (Num 32:29-33; 35:14; Josh 22:32). Though its extent is variously described in the Bible, the land of Canaan broadly includes the area from the wilderness of Zin in the south to Rehob at Lebo-hamath in the north, a distance of approximately three hundred miles, yet as the excavations at Ras Shamra have shown, Canaanite culture actually extended along the Syrian coastline as far north as Hamath itself. Its western border was the Mediterranean Sea and its eastern border the Jordan river (Num 13:2; 17-33; 34:2-12; cf. Gen 10:19). More narrowly considered, Canaan referred to the coastal strip, especially the northern section which was known also as Phoenicia (Num 13:29; Josh 5:1). In Israel's early history, the Canaanites inhabited the coastlands and plains, and the Amorites the hills (Num 13:19; Josh 5:1; 11:3; Jud 1:27ff.).

Canaan was an inhabited land (Ex 16:35; cf. Josh 5:12). The patriarchs lived there (Gen 31:18; 37:1). The territory when referred to as the "land of the Canaanites" is described as a "land flowing with milk and honey" (Ex 3:8; 13:5), an expression which signifies the fertility and abundance of the land. Located in Canaan were the

cities of Hebron (Gen 23:2, 19), Shechem (Gen 33:18), Luz (or Bethel, Gen 35:6), Mamre (Gen 49:30), and Shiloh (Josh 21:2). Once Canaan is referred to as the "land of the Philistines" (Zeph 2:5).

A few Scriptures give a negative evaluation to Canaan. Isaac admonished Jacob not to take a wife from the daughters of Canaan (Gen 28:1, 6; cf. 36:15). Israel was also instructed, "You shall not do what is done in the land of Canaan" (Lev 18:3). A later author complained, however, that Israel disobeyed and "sacrificed to the idols of Canaan" (Ps 106:38).

The land of Canaan takes on a theological character not only as "the land in which they (the patriarchs) dwelt as sojourners" but as the land which is God's gift (Ex 6:4). Canaan is the land which the Lord gives to Israel (Num 13:2). God said to Abraham, "I will give to you and to your descendants after you . . . all the land of Canaan for an everlasting possession" (Gen 17:8). This covenant with Abraham is referred to in Ex 5:22-6:8, a significant passage which summarizes God's intentions with Israel in response to Moses' inquiry. It is part of God's intention that Israel dwell in Canaan, the place of abundance, and to this place she returns following the Exile. God desires good for his people. Canaan is given Israel for a possession (Lev 14:34; Deut 32:49) and for an inheritance (I Chr 16:18=Ps 105:11). Many interpret Isa 11:10-12 to say that all the dispersed Jewish remnant is to be regathered to their ancestral land under the lordship of the messianic Root of Jesse.

k^ena'āni. *Canaanite(s)* refers either to the descendants of Canaan or to the inhabitants of Canaan and sometimes to merchants (see *k^ena'an II*).

One of Simeon's descendants had a Canaanite mother (cf. Gen 46:10=Ex 6:15)—an example of intermarriage that kept Israel from remaining an ethnically "pure" race.

Those who inhabited Palestine before the conquest were known as Canaanites (Gen 12:6). Their destruction had been ordered by God and they were listed as dispossessed by Israel (Josh 5:1; 11:3; 13:4). Israel's failure to obey fully meant that Canaanites continued to live among the Israelites (Josh 16:10; Jud 1:27-33). The Canaanites were immoral in their practices, as is clear both from Scripture (Ex 23:23-24) and from literature found since 1929 at ancient Ugarit. Negative evaluations of them were already expressed in the time of the patriarchs (Gen 24:3; 28:8). Israel was therefore directed to demolish their idols, refrain from covenant with them (Ex 34:11-16) and destroy them lest they pervert Israel's pure religion (Deut 7:1-5ff.; 20:17-18). Actually the Israelites did not destroy the Canaan-

ites through weakness or misplaced mercy or some other reason. They reaped a bitter harvest in the sacrificing of their own innocent children (Ps 106:35-38). Albright says that archaeological evidence fully supports the claim of the moral degradation of the Canaanites before the Hebrew conquest (FSAC, pp. 231-5, 281). The Canaanites who lived on the plain are to be distinguished from the Amorites who were hill people (Num 13:29; Josh 5:1). One view holds that Canaanites were urbanized Amorites (Kenyon).

The term *k^ena'āni* is generally used collectively but may occasionally refer to an individual (cf. king of Arad, Num 21:1). The term can also mean "merchant" (q.v. Canaan, II). In Zech 14:21 ASV renders "Canaanite" and RSV "trader," in a context where the ancient versions favor the meaning "trader" since the sanctity of bowls and pots in the coming age will make exchange at the temple unnecessary.

k^ena'an II. Trader, merchant. (ASV renders "traffic"; RSV "trading," "trade.") Since the Canaanites were known for their trading expertise, it is not always clear whether the term refers to a race or to the trading profession (cf. various translations of Zeph 1:11; Ezk 16:29; 17:4 where considerations of poetic parallelism make "trade" the preferable reading). The trade, originally in red-purple wool, led to the use of "trader" as a general term, quite without stigma (cf. Prov 31:24).

A stele of Amenophis II (c. 1440 B.C.) demonstrates the antiquity of this usage. From this Maisler concludes that the term denoted the "merchant plutocracy" of the coastal and trading centers of Syria and Palestine (see bibliography).

כְּנַעֲנִי (*k^ena'āni*). See no. 1002a.

1003 כנף (*knp*). Assumed root of the following.
1003a כָּנָפָה (*kānāp*) wing, winged, border, corner, shirt. (ASV, RSV similar.)

Occurs 107 times: Ezk 26; Ps, 12; I Kgs, 10; II Chr, 10. Appendage of a bird with which it flies, denoting speed as well as protection. The word occurs in Arabic, Akkadian, Aramaic, and Ugaritic with the same meaning. No verbal prototype for the noun is known; the verbal usage which exists (only once, *yikkānēp*, Isa 30:20) has de-

nominative meanings (hide, enclose, assemble) based on the uses of the noun.

Only ten of the occurrences of this noun literally refer to a bird. Of these ten references, in at least eight "wing" is used to qualify "bird" (cf. Gen 1:21 "every fowl of a wing").

Many more references use the term figuratively, most of these referring to God and most having a positive connotation. The deliverance from Egypt is twice described in terms of God bearing his people upon eagle's wings (Ex 19:4; Deut 32:11). But mostly he is seen as sheltering his own beneath his wings as a hen does her chicks (Ps 17:8; Ruth 2:12). Commonly some statement of God's proven trustworthiness is related to the statement of an intent to seek shelter under his wings (Ps 36:7 [H 8], "How excellent is thy loving-kindness, O God, therefore the children of men put their trust under the shelter of thy wings"). Malachi 3:20 speaks of the Sun of righteousness rising with healing in his wings. Evidently this is an appropriation of the winged sun disc symbol which is used throughout the ancient near east as a manifestation of the deity's protection. The appropriation of this ancient theme in a prediction of Christ is very significant. He alone is the true manifestation of God's benevolence and he comes to heal (not merely protect) those who cast away their pride through fear of God.

However those wings which offer deliverance and security to those who fear him, can bring terror to those who defy him. Jer 48:40; 49:22 tell that God will spread his eagle's wings over Moab and destroy them, just as an eagle may swoop upon a hapless rabbit. In Isa 8:8 Assyria is the eagle overshadowing Judah (cf. also Ezk 17:3, 7).

The remaining figurative usages speak of the speed of wings. The wind is said to have wings (I Sam 22:11, etc.). Three of the six occurrences deal with God's riding on the wind. Money is said to have wings (Prov 23:5), as does gossip (Eccl 10:20). The lovely passage in Ps 139:9 speaks of the wings of the morning being unable to outstrip God's care.

The exact origin of a separate set of figurative usages is difficult to determine. Here the word either means the flowing hem of a robe or the ends of the earth. Perhaps the similarity of the robe to wings, and then the "end" of the robe to the ends of the earth accurately describes the transference.

The remainder of the references to *kānāp* have to do with either the cherubim over the ark, or Ezekiel's visions. It is tempting to see in these numerous occurrences some theological statements concerning Yahweh, especially in the light of the winged seraphim in Isa 6:2. It may be that the wings of his messengers speak of his ability to transcend his creation and yet be at any moment

immanent in it. The fact that he is elsewhere said to ride on the wings of the wind may support such conjectures. However, apart from more explicit biblical statements they must remain in the realm of conjecture.

Bibliography: THAT, I, pp. 833–35.

J.N.O.

- 1004 כנר (*knr*). Assumed root of the following.
 1004a כִּנּוֹר (*kinnôr*) harp.
 1004b כִּנְרֵת (*kinneret*), כִּנְרֹת (*kinârôt*)
Chinneret.

kinnôr. Harp. (ASV and RSV similar.) A musical instrument having strings and a wooden frame. Commonly associated with joy and gladness. The word seems to be of Indian derivation, there being an Indian stringed instrument called a *kinnâra*. The word itself, if not the entire instrument, seems to have come into the Hebrew vocabulary via Hittite (cf. KB, *in loc*). Probably the *kinnôr* was a lyre rather than a true harp. Lyres are pictured in a number of ancient paintings and sculptures.

Although most of the references to harps depict them in a cultic context, about six references indicate that it was a general accompaniment for recreation and relaxation. Its accompaniment was common in feasts (Gen 31:27), presumably played by dancing girls (Isa 23:16). The *kinnôr* is the first musical instrument mentioned in the Bible.

Both Job (21:12) and Isa (5:12) declare that it is the wicked who have times of rejoicing and gladness, and both contemplate the injustice of this.

Most of the references show the harp in a religious setting. It and other instruments characterized the sons of the prophets (I Sam 10:5; Ps 49:4 [H 5]; cf. I Sam 16:23). After the prevalence of the harp and other instruments in the rejoicing over the ark's return (II Sam 6:5; I Chr 13:8), instrumental music seems to have come into its own in Israel's worship (I Chr 25:1, 3, 6). Study of the joyous psalms associated with harps shows that the steadfast love, faithfulness and justice of the Creator-Redeemer were central to Israel's rejoicing.

Bibliography: Best, H. M., Huttar, D., "Music, Musical Instruments," in ZPBD. Sellers, O. R., "Musical Instruments of Israel," BA 3:33–48.

kinneret, kinârôt. Chinnereth, Chinneroth. Lake in northern Palestine significant as a boundary point for the land of Israel. The NIV spells it with a "k" to avoid a common mispronunciation. It is known as the Sea of Galilee or Genesaret in the New Testament. Occurs four times with the ending—*eth* and three times with—*oth*. The name appears in Egyptian topographical lists. No Semitic etymology has been agreed

upon. Albright suggests a connection with the goddess of the lyre, Kinnār in Ugaritic (YGC, p. 144).

In Num 34:11 Chinnereth is given as one element in the eastern border of the land of Canaan. In Josh 12:3 the westernmost border of Sihon's territory was designated as the Jordan Valley from the Salt Sea to Chinneroth. In Deut 3:17 this same designation is given for the western side of the territory which was given to the half tribe of Mannaseh, and the tribes of Gad and Reuben (cf. also Josh 13:27).

As in New Testament times the region just west and north of the lake (roughly the same as the territory of Naphtali) was called by the same name as the lake. So Ben-Hadad of Syria is said at one time to have captured all Chinneroth (I Kgs 15:20). There was also a city in Naphtali of the same name, provisionally identified with tell el-'oreimeh (Josh 19:35).

J.N.O.

כִּנְרֵת (kinneret). See no. 1004b.

1005 כִּנְתָּ (k^enāt) *associate, colleague* (Ezr 4:7).

1006 כֶּסֶּא (kese') *full moon* (Prov 7:20; Ps 81:4).

1007 כֶּסֶּא (kissē') *seat, stool, throne*. (ASV, RSV similar.)

Occurs 136 times, of which 34 are in I Kings, 17 in Jeremiah and 15 in Chronicles. Of these occurrences, all but 7 refer to royal or divine thrones. In all cases it is a seat of honor. The identical root appears in Ugaritic (*ks'*) and Akkadian (*kussû* < Sumerian GU. ZA), while both Aramaic and Arabic show an additional r: *karsa'* (Aramaic), *kursīyu* (Arabic). Perhaps a loan word.

As mentioned above, the basic idea of the root seems to be "seat of honor" (Ehud, Jud 3:20; Eli, I Sam 1:9; 4:13; 18, etc.). The one possible exception to this is found in the description of the prophet's chamber (II Kgs 4:10) where כִּנְתָּ simply translates "table and stool" (RSV "chair").

In the usages translated by "throne" the minority have to do with literal thrones. These are either descriptions of thrones (I Kgs 10:18; Ezk 1:26, etc.) or statements concerning kings sitting on specific thrones for matters of judgment (Est 5:1; Jer 1:15; etc.), affairs of state (I Kgs 22:10), or royal honor (II Kgs 25:28).

The great bulk of the references to throne take the term figuratively. Thus to sit on the throne of the kingdom was to rule the kingdom, or in some cases, to begin to rule the kingdom (cf. I Kgs 16:11, etc.). Of the eighty-seven figurative usages, at least forty-seven indicate that it was God

who either placed a person on, or removed him from, the throne. Many of these are related to the establishment of the Davidic line, and of these the vast majority relate to Solomon's accession (I Kgs 1-2). The frequent statement that God has "established" (*kûn*, q.v.) someone's throne further indicates that royal stability, wherever it is found, is a function of God's sovereignty.

The book of Prov on several occasions emphasizes that no throne is established by force, but rather through mercy, justice, and righteousness (Prov 16:12; 20:8, 28; 25:5; 29:14). But, of course, the immediate question is: according to whose standard? For the Hebrew this was not a difficult question. It is plain that the true King by whom all humans, even kings, are judged is the Heavenly One. Study of *kissē'* as it relates to God bears this out. His throne is established forever (Ps 93:2; 103:19; Lam 5:19). It is fixed in the heavens (Isa 66:1; Jer 3:17) as well as in his chosen place, Jerusalem. The pronouncements from his throne of judgment are altogether true and right (Ps 74:8 [H 9]; 89:14 [H 15]). Nowhere is the dichotomy between the fallible human king and the infallible divine king more clearly brought out than in I Kings 22. Here Jehoshaphat and Ahab sit on their splendid royal thrones to receive Micaiah's prophecy (v. 10). But Micaiah reports that he has seen God sitting on his throne and that he has given a word of doom concerning their royal enterprises against Syria (v. 10). God is the king of Israel and Judah (cf. also Isa 6:1).

This dichotomy is forever resolved in the Messiah. As the Israelites looked at the long string of sorry kings visited on them, and as they compared these with God's perfect standard they came to long for that Son of David who would rule them, and the world, out of love and not selfishness, with equity and not partiality (Isa 9:7 [H 6]; 16:5; Jer 22:11-23:6; Zech 6:13). The testimony of the NT is that he has come and that all creation waits breathlessly for his coronation day when he will assume his throne forevermore.

J.N.O.

1008 כָּסָה (kāśā) *I, cover, conceal, hide*. In a few places used in the sense of "forgive." (RSV, NASB and NIV similar.)

Derivatives

1008a כָּסוּי (kāśūy) *outer covering* of the tabernacle. Used only in Num 4:6, 14.

1008b כִּסּוֹת (k^esūt) *covering*.

1008c מִכְשָׁה (mikseh) *a covering*.

1008d מִכְשֶׁה (m^ekasseh). In form, this word is a Piel participle and in its four usages can be handled as an active noun, "that which covers."

The usual usage of the verb *kāsā* I is the literal meaning "to cover." Frogs covered Egypt (Ex 8:6 [H 2]). The pillar of cloud covered the tabernacle (Num 9:16).

It is also used more generally to mean "conceal" (Gen 37:26; Prov 10:18, KJV "hide") or "overwhelm" (Prov 10:6, 11, NIV "overwhelm"). In Gen 7:19–20 the hills were "covered;" the Hebrew does not specify with what. The NIV specification of water goes beyond the Hebrew. The Hebrew may merely mean that the mountains were hidden from view by the storm.

It is probably the meaning "hide" that leads to the sense, forgive. In the well-known verse, Ps 32:1, "cover," *kāsa* (Qal) is paralleled by "forgive" (*nāsā*). The word is used in v. 5 in the sense of "hide." Psalm 85:2 [H 3] is very similar and has the same parallel (*nāsā*). This sense also occurs in Neh 4:5 [H 3:37] where the parallel is "blot out" (*māhā*). In Prov 17:9 and 28:13 the meaning is likely "conceal" (so NIV in the latter verse). The contrast is to confess or to make known. It is probably too much to found an OT theology of forgiveness on these verses in Ps and Nehemiah. It has been argued, more on the basis of *kāpar* "atone" (q.v.), which some translate "cover," that the OT sacrifices merely covered sin until it was dealt with *de facto* on the cross. This view of course has the truth that the blood of bulls and goats could not pay the price of sin in the OT. But it seems that we should say that the OT sin was indeed forgiven by God on the basis of the final sacrifice to come. The OT sacrifices were symbolic and typical but the forgiveness was real. At least, the other words *nāsā* (take away), *māhā* (blot out), *sālah* (forgive), etc. imply a real forgiveness so that sins were removed to an immeasurable distance (Ps 103:3, 11–12).

k'sūt. Covering. Used only eight times, most of these referring to clothing. But note Gen 20:16 where "covering of the eyes" (*'ēnayim*) is taken by the NIV as "to cover the offense" (probably reading *'ēwōnim*).

mikseh. A covering. This noun refers mostly to the leather (KJV badgers' skins, NASB porpoise skins, NIV hides of sea cows) covering of the tabernacle. Once it refers to the covering of Noah's ark. Does this mean that the ark had a protective roof of animal hides?

R.L.H.

1009 כֶּסֶת (*ksh*) II. Assumed root of the following.

1009a כֶּסֶת (*keset*) band, fillet.

1010 קָסַח (*kāsaḥ*) cut off or away, a plant (Ps 80:17; Isa 33:12).

קָסִיל (*k'esil*). See no. 1011c,e.
קָסִילוּת (*k'esilūt*). See no. 1011d.

1011 קַסַל (*kāsal*) be foolish.

Derivatives

- 1011a קֶסֶל (*kesel*) confidence, hope.
1011b קֶסֶלָה (*kislā*) confidence, folly.
1011c קָסִיל (*k'esil*) I, fool, dullard.
1011d קָסִילוּת (*k'esilūt*) stupidity.
1011e קָסִיל (*k'esil*) II, constellations, Orion.

kāsal the verb occurs once, in Jer 10:8, where idol worshippers are called foolish. The Arabic cognate seems to have an original meaning "to be sluggish," referring to that which is thick, plump, or fat (BDB). From *kāsal* come a number of derivatives.

k'esil I. Fool, dullard. This noun, except for three occurrences in Ps, is found only in Prov and Eccl. In Prov three words are rendered fool, *k'esil* referring to the dull or obstinate one, referring not to mental deficiency, but to a propensity to make wrong choices. *'ewil* refers to moral insolence, and *nābāl* to the boorish man of mean disposition.

Folly and fool are opposite to wisdom and wise. *k'esil* refers to a way of life that is enticing to the immature, but can lead to destruction and ruin. Qohelet sums up the argumentation for either wisdom or folly by stating that wisdom excels folly as light excels darkness (Eccl 2:1–13). Involved in this conclusion is that wisdom leads a person on the right path to the brightness of the full day while folly entices one to the way that leads into darkness (Prov 4:18–19).

We note the kind of choices which the *k'esil* makes. His eyes are unable to see any proper way or conduct. He may roam the earth seeking it, but miss it completely. Apparently he does not concentrate on what is right (Prov 17:24). The fool imagines that he can buy wisdom when actually he has no inclination for it (Prov 17:16). He takes no delight in understanding (Prov 18:2), hates knowledge (Prov 1:22), and therefore does not choose the fear of the Lord (Prov 1:29). The end of the fool's complacency is destruction (Prov 1:32).

The fool is a serious menace to the community. Associating with a fool, who has a twisted sense of values deprives one of knowledge (Prov 14:7). He can cause serious problems to his fellow man, for he actually enjoys doing wickedness (or lewdness; Lev 18:17; Prov 10:23). A fool's utterances bring strife and involve him in blows with his adversaries (Prov 18:6). Anyone who befriends him will be destroyed (Prov 13:20). Parents of the fool suffer greatly. His mother is grieved with him (Prov 10:1) and his father can never have any joy over him (Prov 10:1; see also

Prov 17:25; 19:13a). Yet for his part, the fool despises his mother (Prov 15:20).

kesel. *Confidence, hope.* Confidence and hope relate to trust (or lack of it) in God (Prov 3:26; Job 8:14). As folly, it is identified as evil (Eccl 7:25) and applied to the person whose way of life is to live for this world only (Ps 49:13 [H 14]). In five other usages, *kesel* is rendered "flanks" (Lev 3:4, 10, 15; Ps 38:7 [H 8]).

kislā. *Confidence, folly.* The fear of God was Job's confidence (Job 4:6) while at the same time a people who have experienced the peace of God are not to turn back to folly (Ps 85:8 [H 9]).

k'silūt. *Foolish.* Describes Folly, in opposition to Wisdom (*hokmā*), personified as a woman. Sexual immorality, characterized as *k'silūt*, is contrasted to Wisdom who calls the immature to a life of rectitude.

k'sil II. Constellations (Isa 13:10), **Orion** (Job 9:9; 38:31; Amos 5:8). (ASV and RSV same.) The relation to *k'sil* is uncertain, since in the Job and Amos passages, *k'sil* refers to a specific star, while in Isa the plural *k'silēhem* "their constellations" is used more generally.

In Job 9:9 the LXX translates *k'sil* as "Hesperus" (related to the mythological Evening Star, therefore, the West). The Vulgate does the same. In Job 38:31, "loose the bands of Orion" (KJV), the LXX is similar, "opened the barrier of Orion." The Vulgate here reads Arcturus for Orion.

There are differences of opinion concerning the astral groups. Arcturus is used differently in the versions: in Job 9:9 Arcturus is used to render the group *āsh* but the LXX translate "Pleiades," and the RSV and NASB "the Bear." Arcturus is used in the LXX for the astral *kīmā* (Job 9:9), but in 38:31, Pleiades is used for *kīmā*. The Vulgate uses Arcturus for *k'sil*. In Isa 13:10, "the stars of heaven and the constellations thereof," the plural *k'silēhem*, is rendered by the LXX, "for the stars of heaven and Orion."

There are other possibilities. Targum Jonathan renders *k'sil* as "giant" in Job 9:9 and 38:31. For Isa 13:10 the Targum reads, "the stars of the heavens and their titans." In modern usage the Arabic designation for the constellation Orion is *al gibbar*, modern Hebrew *gibbôr* "the strong one."

L.G.

1012 כִּסְלֵו (*kislēw*) **Chislew.** The ninth month of the Babylonian calendar. Used only in the post-Exilic books Zech 7:1; Neh 1:1. For other months see *hodesh*, no. 613b.

1013 כָּסָם (*kāsam*) **shear, clip** (Ezk 44:20).

Derivatives

1013a כִּסְמֵת (*küssemet*) **spelt.**

1013b *כִּרְסֵם (*kirsēm*) **tear off.** Occurs only in the Piel, in Ps 80:14 "boars from the forest tear it off."

כִּסְמֵת (*küssemet*). See no. 1013a.

1014 כָּסָם (*kāsas*) **compute** (Ex 12:4).

Derivatives

1014a מְכָס (*mekes*) **computation, proportion to be paid, tax** (Num 31:28).

1014b מִכְסָּה (*miksā*) **computation** (= number, Ex 12:4; = valuation, worth, Lev 27:23).

1015 כָּסַף (*kāsap*) **yearn for, long after** (with *l'*, Ps 17:12; Job 14:15).

Derivative

1015a כֶּסֶף (*kesep*) **silver, money.**

In the Niphal stem it means yearn for (Gen 31:30); be ashamed (Zeph 2:1, so KB, BDB, GB, ZOR.). With *lō'*, it means be shameless. (Some trace connection with *kesep* "silver" as the pale metal; hence Middle Hebrew *hiksīp*, become pale with yearning.)

kesep. *Silver; (silver) money.* *Kesep* refers to silver as freshly mined and smelted (Prov 25:4; 26:23; Ezk 22:18); as material for vessels, trumpets, idols (Gen 44:2; 24:53; Num 10:2; Ex 20:23; Isa 2:20). It is often used with numbers to indicate shekels of silver (with *sheqel* or *sh'qālim* omitted; Gen 20:16; 45:22). It is also used with minas (Ezr 2:69) or talents (Ex 38:27; 1 Kgs 20:29; 1 Chr 19:6). It may be used for price (of sale, Lev 25:50).

Silver is found as native metal in some mines in Greece. It was also extracted from its ores by smelting with lead. The lead-silver alloy was purified by heating and burning off the lead as oxide. The impurities are skimmed off. There are frequent references to the refiner's fire and the dross of silver (Ezk 22:18-22).

Silver was the usual standard of trade. Two shekels was the price of a ram in Moses' day (Lev 5:15). Silver coins were used in Greece as early

as 670 B.C. There are no clear references to silver coins in the OT, but the Persian gold daric may be mentioned in Ezra 8:27.

G.L.A.

כֶּסֶת (*keset*). See no. 1009a.

- 1016 קָאָס (*kā'as*) *be vexed, indignant, angry, wrath, be grieved, provoke to anger and wrath.* (ASV, RSV similar.)

Derivatives

- 1016a קָאָס (*ka'as*) *vexation, grief.*
1016b קָאָשׁ (*ka'as*) *vexation.* Dialectical variation of *ka'as*.

The root meaning of *kā'as* is to vex, agitate, stir up, or provoke the heart to a heated condition which in turn leads to specific actions. This term, as well as the synonyms for anger and wrath (*'ap*, *hēmā*, *qasap*, and *'ebrā*; see discussion of synonyms at *qāšap*) are used anthropomorphically and anthropopathically of God. They refer to God's inner self as vexed and provoked by rebellion or sin. The term when applied to God, implies that man can affect the very heart of God so as to cause him heat, pain, or grief to various degrees of intensity.

In the Qal stem the verb is used five times to indicate the state of vexation in men. Thus, king Asa was vexed or exasperated when he was rebuked by the prophet Hanani (II Chr 16:10); likewise Sanballat when he saw builders at work on the walls of Jerusalem (Neh 4:1 [H 3:33]). From these instances we may gather that the state of vexation is not normally proper for a true child of God. In fact, Eccl 7:9 teaches that the child of God should not be hasty in spirit to be vexed, because such vexation rests in the bosom of fools.

God is said not to continue in this state of vexation when his jealousy is quieted (Ezk 16:42). Indeed, vexation is not an abiding attribute of God. Yet, his people may provoke him to anger and wrath by their unfaithfulness. Because God is holy and loving he will only share himself with a people whom he has bound to himself in covenant love, and whom he has taken to himself for fellowship and service. He never shares himself with the profane and wicked. Hence when his covenant people become unfaithful to him, he, by virtue of his holiness and jealous love (Ex 34:14), is provoked to anger and wrath against them. Thus he may be deeply vexed, agitated, pained, or grieved by disobedient Israel. This is the general burden of the forty-five passages in the OT in which the Hiphil stem of the verb is used. E.g.,

Moses warned the Israelites that if their descendants, after having been in the promised land, corrupt themselves by making graven images in any form, the Lord will be deeply vexed at them. He calls heaven and earth to witness that God in his vexation will make them to utterly perish from off the earth (Deut 4:25). Moses speaks also of his fear of God when God has been aroused to a highly vexed state (Deut 9:1-8). And when God has been continuously and deeply provoked, vexed, grieved, much is required to quiet the heart of God. E.g. king Manasseh provoked God so deeply by his pervasive involvement in idolatry (cf. II Kgs 21:1-26) that when Josiah attempted reforms, the Lord was not appeased. Judgment had to fall upon Judah (II Kgs 23:26), a judgment which destroyed many of the people and removed the nation from the promised land. This judgment, in keeping with God's justice is not contrary to divine love. Rather, it is an expression of divine love which has been offended, rejected and deeply grieved. Divine love suffers long; it also defends itself and removes the objects of its vexation and sorrow.

ka'as. *Vexation, provocation, anger, wrath, spite, grief, sorrow* (ASV and RSV have "provocation" in place of "wrath").

This noun is not used of God in quite the same way the verb is. Rather it speaks of what man does in relation to God.

Man vexes and provokes God to anger. This act of man is referred to a number of times: Jeroboam provoked God by his sinful provocations, i.e. calf worship (I Kgs 15:30) as Israel did later with her idolatries, which are called "provocations" (Ezk 20:28). This emphasizes the fact that man vexes God; man, created and called to please and glorify God, when he falls into sin, gives him a deep agitation of heart.

Man also is a source of vexation to his fellowmen. Peninnah provoked Hannah to vexation and caused her much grief (I Sam 1:7, 16). A foolish son produces vexation or grief for his father (Prov 17:25). Adversaries, physical and spiritual, are a source of vexation and tears for the righteous (Ps 6:7 [H 8]). Thus sinful man, by nature, tragically fails to live in peace and happiness with his fellow men as God commands him to do.

Bibliography: THAT, I, pp. 838-41.

G.V.G.

קָאָשׁ (*ka'as*). See no. 1016b.

- 1017 קָה (*kēp*) *rock* (Jer 4:29; Job 30:6).

קָה (*kap*). See no. 1022a.

- 1018 קָפָה (*kāpā*) *subdue* (Prov 21:14).

1019 קָפַל (*kāpal*)

- קָפַר (*k^cpôr*). See nos. 1026a,b.
 קָפִיס (*k^cpis*). See no. 1021a.
 קָפִיר (*k^cpîr*). See no. 1025a.

1019 קָפַל (*kāpal*) *fold something double, double over* (Ex 29:6; 28:16; 39:9). Niphal: be doubled (over, Ezk 21:19, of two ways at a crossroads). (Arabic *kiflun* "double"; Akkadian *kapālu* "to coil, twist.")

Derivatives

- 1019a קָפַל (*kepel*), קִפְלִים (*kiplayim*) *a double* (Job 41:13 [H 5]), i.e. the doubled thickness of the crocodile's hide). The dual *kiplayim* refers to a double portion (of chastisement, Isa 40:2).
 1019b מַכְפֵּלָה (*makpēlā*) *Machpelah* (perhaps Double-cave?).

Name of the cave purchased by Abraham for Sarah's burial, and later for himself and for Jacob, in the northeastern field of Hebron belonging to Ephron son of Zohar, the Hittite (Gen 23). It was purchased for four hundred shekels of silver. The location faced Mamre (v. 19).

[The transaction has been much discussed. It has been treated as a typical oriental bargaining match with Abraham as a semi-foreigner ending up having to pay a large figure. M. Lehmann (see bibliography) held that here we have an example of Hittite law. Abraham asked for only the cave. But Ephron insisted that he take the whole property and thus Ephron divested himself of feudal responsibilities to his overlord. Speiser (in AB, *Genesis*, pp. 171–73) doubts that Ephron was a member of the distant Hittite nation. He thinks rather that Ephron was a non-Semite who could more readily be persuaded to sell to an alien like Abraham. At least it is agreed that four hundred shekels was dear.

The tomb of Machpelah shown to tourists today was built in Herodian times, as its lower masonry testifies. Over that was built a church, now a mosque. The site therefore has been identified since before the dispersion. It may be the authentic place. See the article by H. G. Stigers (see bibliography) who assisted in the Hammond excavations at the tell of ancient Hebron. R.L.H.]

Bibliography: Lehmann, M., "Abraham's Purchase of Machpelah and Hittite Law," BASOR 129:15–18. Stigers, H. G. "Machpelah," in ZPEB, IV, pp. 26–28.

G.L.A.

1020 קָפַן (*kāpan*) *be hungry, hunger*. Occurs only in Ezk 17:7, *kāpnā* 'al "stretched hungrily."

Derivative

1020a קָפָן (*kāpān*) *hunger, famine* (Job 5:22; 30:3).

1021 כָּפַס (*kps*). Assumed root of the following.
 1021a כָּפִיס (*kāpis*) *rafter, girder(?)*. Occurs only in Hab 2:11.

1022 כָּפָה (*kpp*). Assumed root of the following.

- 1022a כָּהָ (*kap*) *the palm of the hand, hand* (opened or turned upward so as to expose the hand, in contrast with *yad* "hand" in general, whether open or closed in a grasp or fist); flat of the hand, sole of the foot (Gen 40:11; II Kgs 4:34; Lev 14:16; Gen 8:9; Josh 3:13). Also "handful" (of meal, II Kgs 17:12).
 1022b כִּפָּה (*kippā*) *branch, leaf*.

kap. Palm of the hand. *kap* is also used of hands spread out in prayer (Ex 19:29; Isa 1:15). It may also refer to a pan or concave vessel (Ex 25:29; Num 4:7); or the hollow of a sling (I Sam 25:29). Not used as extensively as *yad* nor so much in the various extended usages of that word (e.g., *yad* also means "strength, force"). In Ugaritic *kp* is used to refer to the amputated hands of the enemy apparently used in body count (UT 19: no. 1286). This gruesome usage is not clearly witnessed in the OT, but may be suggested in Jud 8:6, 15.

G.L.A.

1023 קָפַר (*kāpar*) *I, make an atonement, make reconciliation, purge*. (Denominative verb.) This root should probably be distinguished from *kāpar* II "to smear with pitch."

Parent Noun

- 1023a כֹּפֶר (*kōper*) *I, ransom, gift to secure favor*.
 1023b כִּפְּרָ (*kippūr*) (used in the plural *kippūrim*) *atonement*, used especially in the expression "day of atonement."
 1023c כִּפְּרֶת (*kappōret*) *place of atonement*; כִּיּוּר, "mercy seat."

The root *kāpar* is used some 150 times. It has been much discussed. There is an equivalent Arabic root meaning "cover," or "conceal." On the strength of this connection it has been supposed that the Hebrew word means "to cover over sin" and thus pacify the deity, making an atonement (so BDB). It has been suggested that the OT ritual symbolized a covering over of sin until it was dealt with in fact by the atonement of Christ. There is, however, very little evidence for this view. The connection of the Arabic word is

weak and the Hebrew root is not used to mean "cover." The Hebrew verb is never used in the simple or Qal stem, but only in the derived intensive stems. These intensive stems often indicate not emphasis, but merely that the verb is derived from a noun whose meaning is more basic to the root idea.

kōper. Ransom. Every Israelite was to give to the service of the sanctuary the "ransom" money of half a shekel (Ex 30:12). Egypt, in God's sight, was given as a "ransom" for the restoration of Israel (Isa 43:3). This word "ransom" is parallel to the word "redeem" (*pādā*, which see) in Ps 49:7. There is a warning that a man guilty of murder must be killed—no "ransom" can be given in exchange for his life (Num 35:31). The word is also used in a bad sense as a "bribe" which wrongly purchases favor (I Sam 12:3).

From the meaning of *kōper* "ransom," the meaning of *kāpar* can be better understood. It means "to atone by offering a substitute." The great majority of the usages concern the priestly ritual of sprinkling of the sacrificial blood thus "making an atonement" for the worshipper. There are forty-nine instances of this usage in Leviticus alone and no other meaning is there witnessed. The verb is always used in connection with the removal of sin or defilement, except for Gen 32:20; Prov 16:14; and Isa 28:18 where the related meaning of "appease by a gift" may be observed. It seems clear that this word aptly illustrates the theology of reconciliation in the OT. The life of the sacrificial animal specifically symbolized by its blood was required in exchange for the life of the worshipper. Sacrifice of animals in OT theology was not merely an expression of thanks to the deity by a cattleraising people. It was the symbolic expression of innocent life given for guilty life. This symbolism is further clarified by the action of the worshipper in placing his hands on the head of the sacrifice and confessing his sins over the animal (cf. Lev 16:21; 1:4; 4:4, etc.) which was then killed or sent out as a scapegoat.

kippūr. Atonement. kapporet. Mercy seat. These two nouns are derived from the verb as used in the intensive stem: The first is used today in the name of the Jewish holiday *yom kippur* "day of atonement" (used only in the plural in the OT) which was the tenth day of the seventh month, Tishri. This solemn day was the only day of fasting prescribed for Israel. It was celebrated by a special sin offering for the whole nation. On that day only would the high priest enter within the inner veil bearing the blood of the sin offering (cf. Heb 9:7). A second goat was released as an escape goat to symbolize the total removal of sin (see 'āzā' zēl "scapegoat").

kappōret. Mercy seat. This noun is used twenty-seven times and always refers to the golden cover of the sacred chest in the inner shrine of the tabernacle or temple. It was from above the mercy seat that God promised to meet with men (Num 7:89). The word, however, is not related to mercy and of course was not a seat. The word is derived from the root "to atone." The Greek equivalent in the LXX is usually *hilastērion*, "place or object of propitiation," a word which is applied to Christ in Rom 3:25. The translation "mercy seat" does not sufficiently express the fact that the lid of the ark was the place where the blood was sprinkled on the day of atonement. "Place of atonement" would perhaps be more expressive.

R.L.H.

1024 כָּפַר (*kāpar*) II, *cover over with pitch.*

This denominative verb is used only in Gen 6:14 in the waterproofing of the ark. The cognate word is used in the Babylonian flood story.

Parent Noun

1024a כֹּפֶר (*kōper*) II, *pitch.* A noun, from which the above verb was doubtless derived. Pitch, bitumen, asphalt was used in early antiquity as an adhesive to hold inlays into statues. It was a logical material for caulking the ark as specified both in the Bible and the Babylonian flood story.

R.L.H.

1025 כפר (*kpr*) III. *Assumed root of the following.*

1025a כִּפְיָרָא (*k'pīr*) *young lion.*

1025b כָּפַר (*kōper*) III, *name of a plant* (henna?, Song 1:14; 4:13). Derivation uncertain.

1025c כָּפַר (*kāpār*) *village.* Derivation uncertain. An element in the NT name "Capernaum."

1025d כָּפַר (*kōper*) IV, *village.* A variant of *kāpār*. Possibly the same as the plural in Neh 6:2.

k'pīr. Young lion. That the word specifies the age of the lion is doubtful. To distinguish between the different words for lion is difficult. Cf. *lābi*'.

Often it is used in parallelism with 'aryeh "lion" (the generic term, usually an adult). In Ezk 19:3, the *k'pīr* learns how to catch prey. Occurs frequently in narrative, prophetic books, and poetry. Other words for lion are *lābi*', *layish*, *shahal* and *shaḥaṣ*. It is difficult to distinguish between these words. Some may refer to age, some to prowess, etc.

G.L.A.

1026 כפר (*kpr*)

1026 כפר (*kpr*) **IV. Assumed root of the following.**

1026a כפּוֹר (*k'pôr*) **I, bowl** (I Chr 28; Ezr 1:10; 8:27).

1026b כפּוֹר (*k'pôr*) **II, hoarfrost** (Ps 147:16; Ex 16:14; Job 38:29).

כפּוֹרֶת (*kappōret*). See no. 1023c.

1027 כָּפַשׁ* (*kāpash*) **make bent, press or bend together.** Occurs only in the Hiphil (Lam 3:16).

1028 כַּפְתּוֹר (*kaptôr*) **I, the island of Crete.** In Egyptian spelled *k-f-t-y(w)*; Akkadian *kaptara*; Ugaritic *k-p-t-r*. Homeland or at least a staging center of the Philistines (Amos 9:7; cf. Deut 2:23; Jer 47:4). The gentilic is *kaptōri* "Cretan." (At Mari spelled *ka-ap-taru-u*.)

1029 כַּפְתּוֹר (*kaptôr*) **II, a capital on top of a pillar** (Amos 9:1; Zech 2:14). (2) A knob or bulb on the lampstand (Ex 25:31; 37:17). (Apparently derived from the name of Crete, as the place from which such ornamentations were first imported.)

G.L.A.

1030 כָּר (*kar*) **pasture.** Derivation uncertain.

1031 כֹּר (*kôr*) **a measure, usually dry.** Equal to a homer, therefore 10 ephahs (q.v.).

1032 כַּרְבֵּל* (*krbl*) **be-mantle or bind around.** Occurs only in the Pual, in I Chr 15:17, "bementled with a robe of byssus."

1033 קָרָה (*kārâ*) **I, dig, excavate; dig through.**

Derivatives

1033a קָרָה (*kārâ*) **cistern or well.**

1033b מִקְרֶה (*mikreh*) **pit—of salt(?)** Only Zech 2:9.

1033c מִכְרָה (*m'kūrâ*), מְכֹרָה (*m'kūrâ*) **origin.**

The object of this verb is usually a pit, trench, or cistern. It is used figuratively for entrapping a person with an evil plot or stratagem (Prov 16:27). In the Niphal it means "be dug" (Ps 94:13). There is a different root, *kārâ*, meaning "to trade in" (a commodity), do business in; buy (Job 6:27 with 'al, with dir. acc., Deut 2:6; Hos 3:2).

G.L.A.

1034 קָרָה (*kārâ*) **II, get by trade, trade.**

1035 קָרָה (*kārâ*) **III, give a feast.** Occurs only in II Kgs 6:23, *wayyikreh lāhem kērâ*

g'dôlâ "and he gave a great feast for them."

Derivative

1035a קָרָה (*kērâ*) **a feast** (II Kgs 6:23).

1036 כְּרוּב (*k'rûb*) **Cherub.**

The name of various representations of angelic beings which are represented as part human, part animal. Usually used in the plural, cherubim. The English, cherubims, uses a superfluous plural ending.

The derivation of the word is dubious. The Akkadian cognate verb means, "to bless, praise, adore" (CAD). As one of the characteristics of the cherubim was adoration of God, this derivation would appear suitable.

Cherubim are mentioned first as angelic guardians of Paradise lost (Gen 3:24). Next they appear as winged figures of pure gold facing each other and overshadowing the atonement cover (NIV, the KJV is mercy seat, Ex 25:20). They were also a prominent figure in the decorations of the tabernacle curtains (Ex 26:1, 31). Nothing is said here of their shape except that they had faces, presumably human, and wings. Significantly, Ex 25:22 says that God will speak with men from above (*mē'al*) the atonement cover from between (*mib-bin*) the cherubim (so also Num 7:89). It is assumed by Albright *et al.* that the iconography represented Yahweh standing on the cherubim as the storm god of Syria, Hadad, is represented as standing on a sacred bull (W. F. Albright, "What Were the Cherubim?" in *The Biblical Archaeologist Reader*, I, p. 95). Indeed, in most places the RSV translates the phrase "dwells (at) the cherubim" (no preposition is expressed) as "on" (II Sam 6:2; II Kgs 19:15; I Chr 13:6; Ps 80:1 [H 2]; 99:1; Isa 37:16). In these places the NASB supplied "above," the KJV and NIV "between" in line with the use of *bin* in Ex 25:22.

In Solomon's temple, cherubim were widely used for decoration (I Kgs 6:29, 32; 7:29). In the most holy place he made two large cherubim of olive wood overlaid with gold. These cherubim faced forward with their two inner wings touching above the ark and their two outer wings touching the walls of the shrine. Thus the wingspread of each was fifteen feet. Presumably the original ark with its two solid gold cherubim was under these large touching wings.

In Ezekiel's symbolic or millennial temple, cherubim were used for decoration (Ezk 41:18–20, 25) but no ark with its cherubim are mentioned. The cherubim of the decorations each had two faces, of a man and of a lion, facing in opposite directions. The easiest way to understand this is to hold that the cherub was standing upright with faces turned right and left something like the

Hapsburg eagle, but certainty is not possible. There is no need to suppose with Albright and many that they were sphinxes.

More detail can be gleaned from the vision of Ezk 1 which is mentioned again in 9:3 and chapter 10 and in 11:22. There the cherubim stand as corner posts of the structure bearing the throne of God. They had a human body and hands (1:5; 10:7) but the feet went straight down like a calf—without the human ankle and toes. These cherubim had four wings. Two covered their bodies in modesty, two were extended upward so that their tips touched the wings of the cherubim at the other corners. The seraphs (fiery ones) of Isa 6 seem to be similar creatures. They had six wings using the extra two to fly on God's errands. The description of Rev 4:6-8 has features reminiscent of both Ezk and Isa. The cherubim of Ezk 1 had four faces—of a man, lion, ox and eagle. Why these four we do not know. It may be that they represented birds, tame animals, wild animals and men in attendance before God. Their four faces were so placed that the structure could travel east, west, north and south with lightning speed and always go face forward with no steering mechanism. The intersecting wheels (Ezk 1:16, NIV) looking something like a gyroscope had the same result. That these cherubim bore the throne of God is perhaps the reason that the temple cherubim are called a chariot in one verse (I Chr 28:18) though the reference is obscure. In the theophany of Ps 18:10 [H 11] parallel to II Sam 22:11, the imagery is that God "mounted the cherubim and flew, he soared on the wings of the wind" (NIV).

Evidently the representation of these high angelic beings varies from place to place, but they are regularly near the throne of God engaged in worship and service.

R.L.H.

כְּרִיתוּת (*k'ritût*). See no. 1048a.

1037 כֶּרֶךְ (*krk*). Assumed root of the following.

1037a תַּכְרִיךְ (*takrik*) *robe*. Occurs in the phrase *w'takrik bûš w'argā-mān* "a purple robe of fine linen" (Est 8:15).

1038 כֶּרֶכֶב (*krkb*). Assumed root of the following.

1038a כַּרְכֹּב (*karkōb*) *a rim* (Ex 27:5; 38:4) referring to the *ledge* of an altar. Middle Hebrew, a bowl.

1039 כַּרְכֹּס (*karkōs*) *saffron* (Song 4:14).

כַּרְכָּרָה (*karkārâ*). See no. 1046.

1040 כָּרַם (*kāram*) *tend or dress vineyards or vines*. A denominative verb.

Parent Noun

1040a כֶּרֶם (*kerem*) *vineyard*.

Vineyards are mentioned over ninety times in the OT, first in connection with Noah (Gen 9:20). Grape growing was and still is an important part of Palestinian farming. The "grain, new wine, and oil" were the three prominent products of the field (see *tirôsh*). Grapes were trodden to make juice for wine and also were dried to make raisins which were widely used, to judge from Abigail's gift to David (I Sam 25:18; cf. II Sam 16:1). Treading the winepress became a forceful figure of divine judgment (Isa 63:3; Rev 14:19). The grapes of Palestine were part of the proof of the productivity of the land (Num 13:23), especially significant because Egypt did not specialize in grapes. Vineyards were not to be picked clean, but gleanings were to be left for the poor (Lev 19:10). Famous is Naboth's vineyard, his patrimony which he would not part with, but which Ahab secured to his own destruction.

Israel is God's vineyard (Isa 5:1ff.; Jer 12:10). God gave it special care, but it yielded bitter fruit. "He looked for justice, but saw bloodshed; for righteousness, but heard cries of distress" (Isa 5:7, NIV). Vineyards are part of the figures of plenty and peace in the millennial day (Isa 65:21; Amos 9:13). The vine is also used in the precious NT figure, "I am the vine, you are the branches" (John 15).

R.L.H.

1041 כַּרְמֶל (*karmel*) *I, plantation, garden-land; garden-growth, fruit; orchard*.

Often a garden planted between rows of fruit-bearing trees (Isa 10:18; Jer 2:7; Jer 48:33; of a garden-like forest (Isa 37:24) or of a stand of stately cedars (II Kgs 19:23). Also of a kind of food, whether made from fruit or from mashed or compacted kernels forming a paste (Lev 23:14; 2:14).

1042 כַּרְמֶל (*karmel*) *II, a promontory just below Haifa* (fertile and fruitful, Josh 19:26; I Kgs 18:19); *a mountain town on the west of the Dead Sea* (Josh 15:55; I Sam 25:5).

The Carmel range is prominent and famous. It forms today the harbor of Haifa, which, however, was blocked by marshes in former times. The southern boundary of the fertile valley of Esdraelon, it stretches back about thirteen miles to

the southeast attaining a height of 1742 feet. Megiddo, situated by a pass through the range, was the scene of crucial battles in the past. There Thutmosis III won a famous victory and Josiah met his death at the hands of Pharaoh Necho.

The Carmel area has been inhabited since very ancient times. The caves of Skhul and Tabun and others in the Wadi el-Mugharah have yielded the important skeletons of "Carmel Man." First dated about 130,000 years ago they are now dated by Carbon 14 at about 35,000. The presence of Neanderthal features mixed with modern features was a surprise and possibly suggested the restudy of Neanderthal man which has concluded that he was erect and modern in many ways (cf. Albright, W. F., *The Archaeology of Palestine*, rev. ed., Pelican, 1961, p. 55; for the dating, see *Time and Stratigraphy in the Evolution of Man*, publ. 1469, National Academy of Sciences, Washington, 1967, p. 20.).

Bibliography: Baly, D., *Geography of Palestine*, Harper, 1957, especially pp. 152-53. Mare, W. H., "Carmel," in ZPEB, I, pp. 754-55.

R.L.H.

- 1043 כַּרְמִיל (*karmil*) *crimson, carmine*.

כֶּרֶסֶם (*kirsēm*). See no. 1013b.

- 1044 קָרַע (*kāra'*) *bow down, kneel, sink down to one's knees, kneel down (to rest, of an animal), kneel in reverence, before God or a king* (Ps 22:30; 72:9).

Derivative

- 1044a קֶרַע (*kera'*) *leg*. Always used in the dual and always of legs of an animal. Once used of the hopping legs of locusts, etc (Lev 11:21).

The verb means to bow down, but is applicable both to bending in general and to bowing in worship or obeisance (thirteen times). It clearly refers sometimes to kneeling. At least in II Kgs 1:13 the captain went down on his knees. Also, in Jud 7:6 the majority of Gideon's army got down on their knees to drink. Job 4:4 refers to the knees, "you have strengthened the feeble (bowed) knees."

But the word can be used more generally. It refers to an animal's crouching to rest (Num 24:9). It also refers once to a woman bending in labor pains (I Sam 4:19). The Hiphil more often refers figuratively to bringing one low.

It is a natural picture that one who falls on his knees in obeisance also bends his back. This apparently is the connotation of the word as used for the posture of worship. It does not mean to fall prostrate on the ground; it means to fall on the knees and bow in worship.

The important thing, naturally, is not the posi-

tion, but the attitude. The word may give a clue, however, to ancient positions used in prayer and worship. Other words are *qādad*, bow the head, *shāhā* (properly *hāwā*) the most common word for bow in worship.

R.L.H.

- 1045 קָרָפֶס (*karpas*) *cotton or fine linen* (Est 1:6).

- 1046 *קָרַר (*kārar*). Occurs only in the Pilpel, *m'karkar* "dancing" (literally whirling, only in II Sam 6:14, 16).

Derivatives

- 1046a קָרָא (*kar*) *lamb*.
1046b קִרְקָרָה (*kirkārā*) *beasts*.
1046c קִכְּרָא (*kikkār*) *round disk*.

kar. *Lamb, ram, captains*. (ASV and RSV similar.) This word, which occurs thirteen times, has no clear verbal root in Hebrew. Similar nouns are found in both Akkadian and Ugaritic. It refers to lambs raised for slaughter but not necessarily in a cultic setting. Three times in Ezekiel it refers to battering rams.

kirkārā. *Swift beasts*. (ASV and RSV "dromedaries," NIV "camels.") Appears only in Isa 66:20 relating the swift modes of travel by which their former captors will hurry the Jewish exiles back to the homeland.

G.V.G.

kikkār. *Round disk; district; loaf of bread*. This noun carries three different meanings. (1) A *round disk*: of a leaden lid (Zech 5:7); of a disk of gold or silver bullion, usually weighing one talent (II Sam 12:30; I Kgs 10:10); as a unit from which smaller objects are made (Ex 25:39; I Kgs 9:14; the talent weighed c. 75 pounds or 34.3 kilograms). (2) A (circular) *district, territory*, used especially of the Jordan Valley (Gen 13:10; I Kgs 7:46), or of the district of Jerusalem (Neh 3:22; 12:28). (3) A *circular loaf of bread* (I Sam 2:36; Prov 6:36). (The *kikkār* as a talent weighed 3000 shekels.)

G.L.A.

- 1047 כָּרַשׁ (*krś*). *Assumed root of the following*.
1047a כָּרֶשׁ (*kārēs*) *belly* (Jer 51:34).

- 1048 קָרַת (*kārat*) *cut off a part of the body, e.g. head, hand, foreskin; cut down trees, idols; cut out, eliminate, kill; cut (make) a covenant*.

Derivatives

- 1048a קִרְיֹתוֹת (*k'ritūt*) *dismissal*.
1048b קִרְרֹתוֹת (*k'erūtôt*) *beams*.

Cognates are found in the Akkadian verb *karātu* "to cut off" and verbal adjective *kartu* "cut up,"

as well as in Tigre where the verbal equivalent means "to bring to an end."

In addition to the literal meaning of this root, "to cut off" (Ex 4:25; I Sam 5:4) and "to cut down" (I Kgs 5:20; a "woodcutter" in Isa 14:8) there is the metaphorical meaning to root out, eliminate, remove, excommunicate or destroy by a violent act of man or nature. It is sometimes difficult in a given context to know whether the person(s) who is "cut off" is to be killed or only excommunicated. Verses like Gen 9:11, "Neither shall all flesh be cut off any more by the waters of a flood" clearly refer to destruction, but Ex 12:15 appears to refer to exclusion from the community. An interesting passage which illustrates the difficulty in deciding whether the word is literal or metaphorical in usage is Num 11:33. Did the Lord strike the Israelites with a plague before the meat of the quails was chewed (literally "cut off") or was it while they were still eating quails before the quails ceased to come or were removed?

The most important use of the root is "to cut" a covenant *b'rit* (q.v.). The word here is pregnant with theological meaning. A covenant must be cut because the slaughter of animals was a part of the covenant ritual (Speiser, *Genesis*, in AB, p. 112; BA 34:18). Genesis 15 is a significant passage in this regard. The Lord made (cut) a covenant with Abram (v. 18) involving a mysterious ceremony. Animals were cut in half and the parts laid opposite each other. E. Kutsch (THAT, I, p. 859) says that this ritual does not mean (a) the union of the two contracting parties (Gen 15:18) designated by the flame's passing through between the two pieces (so C. F. Keil) because this meaning does not fit in Jer 34:18 (J. J. P. Valetton, ZAW 12:227); (b) the "mystical-sacramental unification" of the two partners (B. Duhm, *Das Buch Jeremia*, 1901, p. 284; J. Henninger, *Biblica* 3:344–53, esp. 352f.), because in Gen 15:18 and Jer 34:18 only the subject of the *b'rit* goes through, not the partner; (c) neither "the purification" of the one who goes between the halves of the animal (cf. O. Masson, "A propos d'un rituel hittite pour la lustration d'une armée," *Revue de l'Histoire des Religions*, 137:5–25), nor (d) that to this one is communicated the living power released by the death of the animal in order to increase his capabilities (W. R. Smith, *Die Religion der Semiten*, 1899, p. 243; E. Bickerman, "Couper une alliance," *Archives d'histoire du droit oriental*, 5:133–56; F. Horst, *Gottes Recht*, 1961, p. 309) because neither of these interpretations finds support in the context (D. J. McCarthy, *Treaty and Covenant*, 1963, pp. 55ff.). Rather it depicts the self-destruction of the one making the contract in an analogous way: that the fate of the animal should befall him in the event that he does not keep the *b'rit* (so already Rashi and today the majority of interpreters). This meaning is suggested by Jer 34:18 and is sup-

ported by parallels in classical antiquity (cf. R. Kraetzschmar, *Die Bundesvorstellung im AT*, 1896, pp. 44f; e.g. Livius I, 24), and in Israel's world (e.g. E. Kutsch, *kārat b'rit* "eine Verpflichtung festsetzen," F. S. Elliger, 1971 [Rem. 26]). An eighth-century treaty reads, "As this calf is cut to pieces so may Mati'el be cut to pieces" (Sefireh, I,A). God's covenant with Abraham involved the redemptive history of the world. And so the Creator of the universe binds himself through this theophany-ritual to an unconditional promise ratified by blood. The binding is symbolized by the smoking furnace and flaming torch passing between the pieces of the slain victims. Perhaps it was a symbol that ultimate fulfillment would come only when the God-man as an innocent victim bore the curse of a broken body in behalf of those who have broken the Covenant.

k'ritūt. Dismissal, divorce. It seems very likely that this word is related to the root *kārat*. The word is used only a few times in the OT (Deut 24:1, 3; Isa 50:1; Jer 3:8).

k'rūtōt. Beams hewn and cut off (I Kgs 6:36; 7:2, 12).

Bibliography: THAT, I, pp. 857–60.

E.S.

כָּרַתוֹת (*k'rūtōt*). See no. 1048b.

כֶּשֶׁב (*kešeb*). See no. 949.

- 1049 קָשָׂה (*kāšā*) **be sated, gorged with food.**
Occurs only in Deut 32:15, "you grew fat, became thick, were gorged."

קָשִׁיל (*kashshil*). See no. 1050a.

- 1050 קָשַׁל (*kāshal*) **stumble, totter, stagger**
(usually from weakness or weariness, or in flight from attackers).

Derivatives

- 1050a קָשִׁיל (*kashshil*) **ax** (perhaps as an instrument for felling trees) only Ps 74:6.
1050b קִשְׁשָׁלוֹן (*kishshālōn*) **a stumbling, a calamity.**
1050c מִקְשׁוֹלֵי (*mikshōlî*) **a stumbling, a stumbling block.**
1050d מַקְשֵׁלָה (*makshēlā*) **decay, ruin.**

The verb is usually used of physical falling, but numbers of times the figurative use of failing or ruin occurs (Ps 64:8 [H 9]; II Chr 25:8). However, the root is rarely used in the sense of the NT *skandalizō* "cause one to fall into sin." The nearest to this is Mal 2:8 where the priests by their teaching "have caused many to stumble" (NIV). In Jer 18:15 it says the idols made the people "stumble in their ways," but here the fig-

1051 *קָשַׁפַּ (kāshap)

ure is the frequent one of a path representing the path of life. Proverbs 4:16 says the wicked cannot sleep "till they make someone fall" (NIV) which probably, like Jeremiah, refers to stumbling in the path of life. It is perhaps from this figure that the idea of causing someone to stumble into sin arose in the NT and in the Syriac usage of this root.

mikshōl. *Stumbling-block*, means or occasion of stumbling: Lev 19:14; Isa 57:14; obstacle, cause for guilt, occasion of stumbling (Job 7:19; 14:4; Ezk 7:19; 14:4). Or: defense of the heart (I Sam 25:31); *šūr mikshōl* "a rock of offence."

R.L.H.

קִישְׁשָׁלוֹן (kishshālōn). See no. 1050b.

1051 *קָשַׁפַּ (kāshap) *use witchcraft*. Denominative verb.

Related Nouns

1051a קֶשֶׁפַּ (keshep) *witchcraft*.

1051b קַשְׁשָׁפַּ (kashshāp) *sorcerer*.

This verb and its related nouns mean the same as the Akkadian *kašapu* and the Ugaritic *kīp* (sorcery). It occurs six times, in the Piel stem only. The participial form is used five times.

The pharaoh of the exodus had those who practiced this variety of the occult in his retinue of advisers (Ex 7:11). They are grouped with the *hākāmim* (wise men) and *ḥarṭummim* (magicians, q.v.).

These sorcerers were outlawed in Israel. In Ex 22:17 the feminine form appears (*m^e kashshēpā*) and in the long list of Deut 18:10 the masculine (*m^e kashshēp*). The penalty was death.

Among the sins of King Manasseh was witchcraft (II Chr 33:6). This is the only occurrence of the finite verb form.

Another occurrence of the participle is in Dan 2:2. Like the pharaoh, King Nebuchadnezzar summoned his "sorcerers" along with his "magicians" (*ḥarṭummim*), enchanters (*ash-shāpīm*, q.v.), and Chaldeans (*kašdim*).

Malachi saw these sorcerers being judged in the end along with adulterers, liars, and oppressors of widows, orphans, and foreigners (3:5).

keshep. *Witchcraft, sorcery, soothsayer, spell*. This masculine noun occurs six times in the OT, always in the plural (II Kgs 9:22; Isa 47:9, 12; Mic 5:12 [H 11]; Nah 3:4 twice).

kashshāp. Occurs only once, Jer 27:9, "sorcerer."

Bibliography: Davies, T. W., *Magic, Divination, and Demonology*, 1898, reprint, KTAV, 1969.

R.L.A.

1052 קָשֶׁר (kāshēr) *be right and proper to* (in the eyes of, Est 8:5); to prosper (Eccl 11:6). Cf. Akkadian *kašāru* "succeed"; *kishrōn* is: skill; success (Eccl 2:21; 4:4); advantage (Eccl 5:10). (Medieval Hebrew *kosher* = "right and proper," i.e. according to the rules of ritual purity.)

Derivatives

1052a קוֹשְׁרָה (kōshārā) *singing*. Cf. UT 19: no. 1335.

1052b קִישְׁרֹן (kishrōn) *success*.

1052c קִישׁוֹר (kishōr) *distaff*.

G.L.A.

1053 קָתַב (kātab) *write, record, enroll*.

Derivatives

1053a קְתָב (k^e tāb) *writing, document, edict*. Only used in exilic and postexilic books.

1053b קְתִיבָה (k^e tōbet) *a mark, perhaps a tattoo* (Lev 19:28).

1053c מִקְתָּב (miktāb) *writing, the thing written*.

kātab is the only general word for "write" and it is widely used. Curiously, it is not used in Genesis. Moses wrote on a scroll God's curse on the Amalekites (Ex 17:14). God himself wrote the Ten Commandments (Ex 31:18). Moses also is specifically said to have written the Book of the Covenant (Ex 24:4), the Sinai legislation (Ex 34:27), the names of the leaders of the tribes (Num 17:2-3 [17-18]), the wilderness itinerary (Num 33:2), the law "from beginning to end" (Deut 31:9, 24) and Moses' final song (Deut 31:22, 24). It is quite possible that the general references of Deut 31:9 and 24 refer to the whole of the Pentateuch (cf. Deut 28:58-61; 29:20-21) although critical scholars refer it only to Deut—and question even that.

References to writing abound in the rest of the OT. Joshua wrote (Josh 24:26), a young man wrote for Gideon (Jud 8:14, NASB, NIV), Samuel wrote the constitution of the kingdom—and others, prophets, kings, scribes and common people wrote as well. It appears from the many references in I and II Kgs that the court records of both Israel and Judah were written, preserved and available. The series of such notations begins with Solomon (I Kgs 11:41) and goes to the breakup of the kingdom under Jehoiakim (II Kgs 24:5). Similar records were kept by the Babylonian kings and some have been discovered (Wiseman, D. J., *Chronicles of the Chaldean Kings*, British Museum, 1956). Fortunately for Mordecai such records were also kept by the Persian kings. Like modern minutes and records, they apparently made dry reading (Est 6:1-2).

The enigmatic references to the Book of Jasher may possibly be explained as referring to similar records. The word Jasher (like Jeshurun, Deut 33:26) is probably a poetic name for all Israel. The Book of Jasher may thus have been a record book of the events of Israel in the pre-monarchy days as the annals of the kings of Judah and of Israel were in later days. It is mentioned only in Josh 10:13 and II Sam 1:18. It bears no relation to the apocryphal book of the same name.

According to R. K. Harrison, Wellhausen still in his day held that the Hebrews did not write before the times of the monarchy (HIOT, p. 201). Such a view seems odd today, but it reminds us how little archaeology was really known one hundred years ago. Writing began among the Sumerians shortly before 3000 B.C. and at about the same time in Egypt. There was a wealth of literature by Abraham's day and Moses, trained in the learning of the Egyptians, surely could write Egyptian, Akkadian and Hebrew, possibly also Hurrian and Hittite.

Some have argued that although writing was available it was little used among the Hebrews who have left us few examples of their writing in comparison to the nearly one million clay tablets found in Mesopotamia and the abundant inscriptions and papyri in Egypt. Actually, we do have sporadic Hebrew writing scattered from Solomon to Ezra. We have very little after Ezra until the Dead Sea Scrolls. One possible explanation for this is that the Hebrews who used alphabetic script wrote on papyrus and leather. These materials are well preserved in Egypt (and the Dead Sea caves), but soon deteriorate in the Palestinian rainy season.

F. F. Bruce rightly emphasizes that the Hebrews in Palestine had a great advantage over the Egyptians and over those in Mesopotamia who wrote on clay tablets. The Hebrews had an alphabet. Whereas one must know several hundred signs to read Akkadian and also a large number to read Egyptian, the Hebrews only had to learn twenty-two. Says Bruce, "It is worth noticing that it was the alphabet that made it possible for all classes to be literate; its invention is therefore a landmark of great importance in the history of civilization," and, we may add, in the spread of the knowledge of God's word (*The Books and the Parchments*, rev. ed., 1963, p. 30). Harrison draws a significant conclusion, "It is no longer necessary to assume that an extended period of oral transmission is a necessary prerequisite to the written form of many if not all of the OT documents as is common in liberal circles" (HIOT p. 209).

Bibliography: Bruce, F. F., *The Books and the Parchments*, 3d ed., Revell, 1962. Cerny, J., *Paper and Books in Ancient Egypt*, Ares, 1977. Driver, Godfrey R., *Semitic Writing: From Pic-*

tograph to Alphabet, rev. ed., 1954. HIOT, pp. 201-207. White, W., in ZPEB, V, pp. 995-1015. R.L.H.

קָתֶּבֶת (*k'ṭōbet*). See no. 1053c.

קָתִית (*k'ṭit*). See no. 1062a.

1054 כֶּתֶל (*ktl*). Assumed root of the following.
1054a כֶּתֶל (*kōtel*) *wall of house*.

1055 *קָתַם (*kātam*) I, only Niphal: *be stained, be defiled*. (Aramaic *k'ṭam*; *kitmā*, a stain; Syriac *k'ṭam* "be defiled." Akkadian *katāmu* "to cover.")

1056 כֶּתֶם (*ktm*) II. Assumed root of the following.

1056a מִקְתָּם (*miktām*) *miktām*. A technical term which appears in Psalm titles. Meaning unknown. For related terms, see *sela*.

This term is used in six Psalm titles, always linked with *l'dāwid* "of" or "belonging to David" (Ps 16, 56-59). All six are psalms of lament and four of the headings have historical references to David's struggles with the Philistines (56), Saul (57, 59) and the Arameans (60). If it comes from a root "to cover" (cf. Akkadian *katāmu*), *miktām* could mean a "song of covering" or "atonement." Another view understands the term to mean an "engraving," such as an inscription on a stone slab, perhaps with gold letters (*ketem* = gold). For other such terms see *selā*.

H.W.

1057 כֶּתֶם (*ketem*) *gold*.

Apparently this word is of Nubian origin. Egyptian spells *k-t-m.t* in syllabic writing, implying a loan word. But cf. Akkadian *kitimmu* "goldsmith". See Ps 45:10; Job 28:16, 19; Isa 13:12; Prov 25:12; Dan 10:5.

G.L.A.

1058 כֶּתָן (*ktn*). Assumed root of the following.

1058a כֶּתָנֶת (*kuttōnet*) *tunic, a long shirt-like garment, usually of linen* (Gen 37:3; II Sam 15:32; Isa 22:21).

Adam's was made of fur (Gen 3:21). Also worn by women (II Sam 13:18; Song 5:3). Worn especially by priests (Ex 28:4; 29:5; 39:27; Lev 8:7; 10:5; Ezr 2:69; Neh 7:69). (Cf. Akkadian *kitinnu* or *kitintu*, a linen garment made from *kitū* linen; the Aramaic *kittūnā'* is the same as the Hebrew.) The word was borrowed by the Greek χιτών.

כֶּתָנֶת (*küttōnet*). See no. 1058a.

1059 קָתֶּפֶת (*kātēp*) *shoulder, shoulder-blade, side or slope* (of a hill).

1060 *קָתַר (*kātar*)

(Distinct from שָׁכַם *sh'kem* which includes neck and shoulders.) Of man: I Sam 17:6; Deut 33:12; of refractory beasts: Neh 9:29; of butchered meat: Ezk 24:4; shoulder-piece of ephod: Ex 28:7; mountain-slope: Num 34:11; supports of the bases for the lavers beside the temple: I Kgs 7:30. G.L.A.

1060 *קָתַר (*kātar*) *surround* (Piel); *surround* (with hostility, Hiphil).

Derivatives

- 1060a קֶתֶר (*keter*) *crown* (Est only).
 1060b *קָתַר (*kātar*) *to crown*. Denominative verb.
 1060c כְּתֶרֶת (*kōteret*) *capital of a pillar*.

כְּתֶרֶת (*kōteret*). See no. 1060c.

1061 קָתַשׁ (*kātaš*) *pound, pound fine, bray*. Occurs only in Prov 27:22, 'im-tiktošh 'et-hā'ēwīl bammaktēšh "if you pound the fool in the mortar."

Derivative

1061a מִקְתֵּשׁ (*maktēš*) *mortar* (Prov 27:22).

1062 קָתַת (*kātat*) *crush to pieces, crush fine*.

Derivatives

- 1062a קָתִית (*kātīt*) *beaten, pounded fine, in a mortar, costly*.
 1062b מְקִיטָה (*m^ekittā*) *crushed fragments* (Isa 30:14, only).

1063 ל (l^e) *to, at, in, in reference to, of, by etc.* In recent translations, occasionally "from."

Even though Hebrew possessed, at least in its later stages, a large number of prepositions, many prepositional functions remained concentrated in the four prefixes; *b^e*, *k^e*, *l^e*, and *min*. Of these, *l^e* most nearly corresponded to the Indo-European dative case. (The present article relies very heavily on the BDB entry.)

l^e may indicate direction, either of physical movement ("that I may go 'to' my country" Gen 30:25) or of personal attention or attitudes. The Psalmist asked God to attend "to" him (Ps 55:2 [H 3]). The Psalmist also affirmed that his soul would not be deserted "to" Sheol (Ps 16:10). God mocked "at" rebels (Ps 2:4; rsv "have in derision.").

It may indicate the direction or result of a transformation or change. God's fashioning of Adam's rib "into" a woman (Gen 2:22) and the expressions, "who put bitter 'for' sweet and sweet 'for' bitter" (Isa 5:20) are clear examples. A process might endow a given object with a new character or role. Plant life was designated as being man's "for food" (Gen 1:29). The Levite took on service "for a priest for Micah" (Jud 17:13).

It expresses location both in space and in time. Spatial location is exemplified in such phrases as "at the door" (Gen 4:7) and "at Michmash" (Isa 10:28); temporal location by such phrases as "in times of trouble" (Ps 9:9 [H 10]) and "in the spring of the year" (II Sam 11:1).

A very numerous and vaguely defined body of usages is grouped under the heading, "reference." In these usages, the meaning of *l^e* is best regarded as something rather vague like "in reference to" with the exact meaning derived from the context. Abraham requested of Sarah, "Say, 'in reference to' me" (Gen 20:13). A census could be conducted "'in reference to' (i.e. 'according to') fathers' houses" (Num 1:2).

It can indicate possession as in "the man 'of' you" (I Sam 2:33) and "your sons" (II Kgs 10:30; lit "sons 'to' you"). Such a construction, "my own possession" (Ex 19:5; lit. "possession 'to' me"), expresses God's special relation to his people within the requirements of the covenant.

l^e may express the construct relation in cases in which a construct chain would be grammatically awkward or impossible. It is especially useful if the writer wished to keep the possessed item indefinite (e.g. "two slaves 'to' Shimei" meaning two of Shimei's slaves, I Kgs 2:39).

The subject of passive verbal ideas may be thus

introduced: "Blessed be Abram 'by' God" (Gen 14:19). From a purely descriptive perspective, the direct object of some verbs is marked by *l^e* "with which your enemies shall distress you" (Deut 28:53; i.e. "make distress 'for' you") and "save us" (Josh 10:6; i.e. "make deliverance 'for' us"). This is common in Aramaic.

Used with infinitives, it may indicate purpose ("for bearing," Eccl 3:2), result ("so as to' walk . . . and 'to' fear," Deut 8:6), an infinitive of reference ("do not go far 'in reference to' going," Ex 8:28), or an objectival infinitive ("began 'to' multiply," Gen 6:1).

There is an additional meaning of *l^e* suggested from Ugaritic and now accepted by many in Hebrew, the meaning "from." Gordon says that the most interesting feature of Ugaritic prepositions is the meaning "from" for both *b* and *l* (UT 10:1). He alleges that Ps 84:11 [H 12], also Josh 2:4 where "from the tribes of Israel" with *l^e* is paralleled by 4:4, "from each tribe" with *min*. Dahood gives other examples from the Ps (Psalms, AB, III, p. 394). Holladay's Lexicon does not offer this usage, but does admit an emphatic and asseverative use in agreement with Dahood.

1064 לֹ (lō') *not, no.*

lō' was the primary Hebrew term for factual negation in contrast to *al* which typically described potential negation. Other negatives functioned less frequently for factual negation (e.g. *'ayin*, *bal* and *b^e'li*). This article will, first, examine the major syntactical functions of *lō'*, and, secondly, study some theologically significant negations expressed by this term.

Major syntactical functions. *lō'* negates factual statements in all time frameworks. It serves to negate omnitemporal, general statements. The happy man does not walk in the counsel of the ungodly (Ps 1:1). Further, he is likened to a tree whose foliage does not wither (vs. 3). It negates past statements ("I did not call," I Sam 3:6), present statements ("I am not a prophet," Amos 7:14 [many would take this as past time, but there are plenty of other possible illustrations. R.L.H.]), and future statements ("It will never be inhabited," Isa 13:20). It is used in emphatic future negations ("Surely, you shall not die," Gen 3:4). It negates adjectival attributes such as "a son, not wise" (Hos 13:13) and "a way, not good" (Ps 36:4).

It may be used in an emphatic negative command: "You shall not kill" (Ex 20:13). For a mild negative, *al* with the jussive is used. The Hebrew imperative is never used with a negative.

lō' is used in negative final clauses as in Ex 28:43. "So that they not (i.e. "lest they") bring guilt." *lō'* followed by *l'* with an infinitive states that something cannot or must not happen (e.g. "He could not drive out," Jud 1:19, and "We must not mention," Amos 6:10). As a negative adverb, it may indicate denial or refusal (Jud 12:5). Like English "not" it may indicate a question: "And should I not pity . . . ?" (Jon 4:11). Double negation occurs (Zeph 2:2).

lō' is used in several negative compounds: *b' lō'*, without; *hālō'*, not so?; *wālō'*, and/if not; *k' lō'*, as though not; *l' lō'*, without; and *'im lō'*, if not.

Some theologically significant negations. Philosophers have long referred to language of negation in describing the transcendent attributes of God. Biblical negations using *lō'* frequently describe God. God transcends humanistic models: "God is not a man" (Num 23:19). God so transcends human capacities, especially man's moral capacities, that men cannot see God and live (Ex 33:20). God is immutable; his character does not change (Mal 3:6). God's unchanging faithfulness is spoken of, most particularly in regard to his covenants (Ps 89:33-34). God's nearness ("not a God afar off," Jer 23:23) implies his omnipresence. God is not confined by finite (or infinite) space (I Kgs 8:27). Nor is God bound by time (Ps 102:27 [H 28]). God's holiness is shown in that evil cannot exist in his presence (Ps 5:4-5).

There are other negations worthy of notice. Several describe the powerlessness of idols: they are impotent (i.e. "They are not able") in the time of captivity (Isa 46:2); they cannot move from their place, do not answer, and cannot save (Isa 46:7). Finally, in the Davidic covenant, the Hebrews will someday be settled in the land not to be disturbed or afflicted again (II Sam 7:10). Neither shall God's covenant faithfulness turn from the Davidic dynasty (II Sam 7:15).

On occasion there is uncertainty as to whether *lō'*, not, or *lō*, to him, is intended in the Hebrew text (e.g. Job 13:15; כִּנַּן "Yet will I trust him," i.e. "to him," and rsv "I have no hope"). Context, versions, and general theology must be relied on in such cases.

1065 לֹאֵב (*l'b*). Assumed root of the following.

1065a תַּלְאָבָה (*tal'ūbā*) drought (Hos 13:5).

1066 לָאָה (*lā'ā*) be weary, grieved, offended.

Derivative

1066a תַּלְאָה (*t' lā'ā*) toil, hardship.

lā'ā refers either to physical or psychological weariness and is used in poetic figures based upon both. The physical weariness of the runner

is thus described (Jer 12:5). The Sodomites are described as physically wearied from searching for Lot's door (Gen 19:11). Physical weariness is sarcastically attributed to Moab from much activity in idolatry (Isa 16:12; cf. Prov 26:15).

Psychological weariness expresses several attitudes. On Job's part, discouragement (Job 4:5) and annoyance (Job 4:2) are thus described. Disgust is also indicated by *lā'ā* when the Egyptians are said to be too "tired" to drink the corrupted waters of the Nile (Ex 7:18) and when God is depicted as "tired" of the Hebrews' insincere religious rituals (Isa 1:14). As a poetic figure weariness describes the land struck by drought conditions (Ps 68:9 [H 10]).

Often the idiom of "being weary" with something serves as a dramatic, poetic way of asserting that there is an objectionable excess of what causes weariness. The Hebrews were wearied by "too many" pagan, religious advisors (Isa 47:13). Attempting to hold in God's message of wrath was too much for Jeremiah to bear (Jer 6:11). God himself was weary from too much relenting (Jer 15:6).

t' lā'ā. Toil, hardship (RSV "hardship," "adversity"). The primary reference is to that which produces weariness. It refers to the wilderness hardships of the Hebrews (Ex 18:8; Num 20:14), the troubles of the restored Hebrew community (Neh 9:32), and the judgments which God brought upon his sinful people (Lam 3:5). Correspondingly, insincere religious services were called a source of weariness for God (Mal 1:13).

A.B.

1067 מִלְאָה (*lā'at*) cover. Occurs only in II Sam 19:5, "the king covered his face."

מִלְאָה (*lā't*). See no. 1092a.

1068 מִלְאָה (*l'k*). Assumed root of the following.

1068a מַלְאָךְ (*mal'āk*) messenger, representative.

1068b מִלְאָכָה (*m' lā'kâ*) work, business.

1068c מַלְאָכֻת (*mal'ākūt*) message, only in Hag 1:13.

mal'āk. Messenger, representative, courtier, angel. "Messenger" is an inadequate term for the range of tasks carried out by the OT *mal'āk*. These were 1) to carry a message, 2) to perform some other specific commission, and 3) to represent more or less officially the one sending him. There were both human and supernatural *m' lā'kim*, the latter including the Angel of Yahweh (i.e. the Angel of the Lord).

Human messengers. The human *mal'āk* could be a message bearer (Gen 32:2). The kinds of messages varied. They may have announced

good news (I Sam 6:21), threats (I Kgs 19:2), or requests (Num 20:14; 22:5; Jud 7:24). However, the term was applied to courtiers or retainers sent for other purposes. They could spy (Josh 6:25) or kill (I Sam 19:11; II Kgs 6:32). David sent "messengers" to summon Bathsheba (II Sam 11:4). The *m^elā'kim* could serve as diplomatic representatives (Jud 11:12–14; II Sam 5:11; I Kgs 20:2).

Men, particularly the prophets, could serve as God's messengers. For the prophets, the term implied official representation of God as well as message bearing (II Chr 36:15–16; Hag 1:13). David is called an "angel/messenger of God." A possible interpretation is that David represented God in that he represented some particular divine attribute: innocence (I Sam 29:9), wisdom (II Sam 14:17), or hoped-for graciousness (II Sam 19:27). In Isaiah, God's messenger is seen in weakness (Isa 42:19).

Supernatural messengers. (This section deals only with the term *mal'āk*, not with the broader area of angelology.) Supernatural messengers represented the same general range of functions as human messengers. Message-bearing might be central (Zech 1:9; 5:5). More often they performed some particular commission such as guarding a human effort like the search for Isaac's bride (Gen 24:40) or protecting the Hebrews in the wilderness (Ex 23:20). They executed judgment (II Sam 24:17; Ps 78:49), delivered (Gen 19:12–17), and protected (Ps 91:11).

A special function of supernatural messengers/angels is that they, by their very presence, present an aspect of God's glory (Gen 28:12–17; cf. angels in Isa 6, Ezk 1, Rev 4:6–8, and the cherubim in the Holy of Holies). In addition they join in active praise to God (Ps 148:2; cf. Isa 6:3).

The Messenger/Angel of Yahweh. This figure has the same general range of functions as other messengers. He brought messages, good (Gen 16:10–13) and threatening (Jud 5:23). He performed specific commissions of judgment (II Kgs 19:35; Ps 35:5–6) and deliverance (Gen 22:11; Ps 34:7 [H 8]). He could also be called the "angel of God" (Jud 13:6, 9, cf. v. 3), though this title is not exclusively his. He alone had the ministry of intercession with God in behalf of men (Zech 1:12; 3:1–5).

There has been extensive discussion of his identity. He seems to be God, since those who see him marvel that they have seen God (Jud 13:21–22) and he speaks for God in the first person (Gen 16:10; Ex 3:2, 6; Jud 2:1). He is identified with the pre-incarnate Christ on the grounds of similarity in functions, especially the intercessory function noted above.

m^elā'kā. *Work, business, craftsmanship, goods, property.* Like the English "work," *m^elā'kā*

could refer either to the activity of working, the requisite skills of work, or to the results of work. In contrast to terms like *'āmal* and *yāga* which emphasized the toilsome, laborious side of work, this term emphasized work as involving skill and benefits.

All work was banned both on the weekly Sabbath (Ex 20:9–10) and on the festal Sabbaths (Lev 16:29). God himself ceased from working on the Sabbath day (Gen 2:1–2).

Turning to specific usages of *m^elā'kā*, it could refer to a particular task or project at hand (Neh 5:16) or it could refer to one's routine or habitual work, i.e. one's business (Gen 39:11; Prov 18:9). It referred to the king's business (I Sam 8:16) and that of the royal bureaucracy (I Kgs 9:23).

"Work" referred to skilled craftsmanship when God endowed men with supernatural skills for the skilled work of the tabernacle (Ex 31:3; rsv, "craftsmanship"), and Solomon imported Phoenician craftsmen for the skilled work of the temple (I Kgs 7:14).

The resulting products of work, both skilled and unskilled, were described by this term. Moses looked upon the skilled "work" of the tabernacle (Ex 39:43). Or it could refer to property in general without regard to special skills or value (e.g. I Sam 15:9, "all that was despised" for "every despised work"; cf. also Ex 22:8, 11).

Bibliography: Funderburk, G. B., "Angel," in ZPEB 1, pp. 160–66.

A.B.

1069 מלא (l'm). **Assumed root of the following.**

1069a מלא (l'ōm), מלא (l'ōm) *nation(s), people(s).* (ASV and RSV agree.)

The Semitic root (as seen in Arabic *la'ama* "assemble") suggests that the meaning of the word is togetherness, i.e. the common people considered as a whole. The word is also found in Ugaritic, (UT 19:no 1346) Girdlestone (*Synonyms of the Old Testament*, Eerdmans, reprint, 1975, p. 257) translates *l'ōm* as "race." However, it is used to refer to peoples in their varied walks of life (Ps 44:14 [H 15]; Prov 11:26).

In Gen 25:23, Rebekah is told that two nations (*gōyim*) are in her womb and two *l'ūmmim* are to be separated from her. One *l'ōm* is to be stronger than the other. Isaac's progeny would consist of two distinct types of people, each identified by their unique quality. In Gen 27:29 *'am-mim* appears as a near-synonym for *l'ūmmim*. The thought expressed is that people, in unified groups and reflecting varying characteristics, are to express homage to Abraham's grandson.

In Ps, *l'ōm* is used in synonymous parallelism with *gōyim* (44:2 [H 3]) and *'ammim* (Ps 7:7 [H 8]). In Ps 67 all three terms express the Psal-

mist's desire that all men, of whatever relationship or characteristic, praise the Lord. In Prov and Isa, parallel phrases indicate that the term is qualified by its synonyms, but the thrust of the term remains: all people in their definable groups. This clearly suggests the unity and the diversity of humanity.

G.V.G.

לב (lēb). See no. 1071a.

1070 לבא (lb'). Assumed root of the following.

1070a לבי (l'bi) *lion*. Occurs only in Ps 57:5 in phrase *napshî b'ê tōk l' bā'im* and Nah 2:13, *lib'ōtāyw*.

1070b לבא (l'biyā') *lioness*, only in Ezk 19:2.

1070c לבא (lābi') *lion* (often "lioness" in RSV).

The Akkadian cognate is *labbu* (from an original *lab'u?*), Ugaritic *lbu*, Arabic *labu'at*, possibly the source of Greek *leon*.

lābi' often serves as a symbol of the violence of men (Gen 49:9; Num 23:24); the violence of God in judgment (Hos 13:8); desolation (Isa 30:6). God's great power overwhelms even the mighty lion (Job 4:11). Other words for lion include *k'pîr*, *'āryēh*, *layish* and *shahāl*.

A.B.

1071 לבב (lābab) *ravish* (Piel), *become intelligent* (Niphal). Denominative verb.

Parent Noun

1071a לב (lēb), לבב (lēbāb) *heart, understanding*.

1071b לבב (libbā) *heart*.

1071c לבב (l'bibā) *bread*.

1071d לבב (libbēb) *cook bread*. Denominative verb, occurring only in the Piel.

lābab occurs as a denominative verb from *lēb* (Song 4:9). Translated "ravished my heart" (KJV, RSV) and "made my heart to beat faster" (NASB). BDB suggests "encouraged."

"Become intelligent" suits the single Niphal usage (Job 11:12).

lēb, lēbāb. *Heart, understanding, mind* (also used in idioms such as "to set the heart upon" meaning "to think about" or "to want").

Concrete meanings of *lēb* referred to the internal organ and to analogous physical locations. However, in its abstract meanings, "heart" became the richest biblical term for the totality of man's inner or immaterial nature. In biblical literature it is the most frequently used term for man's immaterial personality functions as well as

the most inclusive term for them since, in the Bible, virtually every immaterial function of man is attributed to the "heart."

Very few usages of *lēb* refer to concrete, physical meanings. The death accounts of Nabal (I Sam 25:37) and Joram (II Kgs 9:24) likely refer to the physical organ. The physical organ defined the location of Aaron's breastplate (Ex 28:29). Psalm 38:9 probably refers to the beating of the physical organ. Physical "innerness" is expressed by "heart." The deeps congealed "in the heart of" the sea (Ex 15:8) and the fires of Sinai rose "to the heart of" Heaven (Deut 4:11). The usage of "heart" for a divinely given vital principle may best fit Job 34:14-15 ("if he take back to himself the heart he gave," writer's paraphrase).

By far the majority of the usages of *lēb* refer either to the inner or immaterial nature in general or to one of the three traditional personality functions of man; emotion, thought, or will.

In referring to the inner nature, *lēb* may contrast some relatively obscure or less visible aspect of man's nature with the more public side of his being. It may be regarded as an inner reflection of the outer man (Prov 27:19; RSV "mind"). Dream consciousness may be meant when the heroine's "heart" was awake though her body slept in the Song of Songs (5:2). Statements such as "Why does your heart carry you away?" (Job 15:12) contrast the heart with the remainder of the person. However, in other contexts, "heart" expresses the totality of a man's nature and character, both inner and outer (I Kgs 8:23; Ps 9:1 [H 2]).

Closely related to the above is the usage of *lēb* as an emphatic personal term (cf. similar usage of *nepesh*, *'ešem*, etc.) The plagues are sent, not just upon Pharaoh, but upon Pharaoh's heart (Ex 9:14). Thus, Jacob's stealing of Laban's heart might emphasize Laban as the object of Jacob's actions rather than Jacob's subtlety (Gen 31:20; cf. RSV, "Jacob outwitted Laban"). Similarly, the breastplate of judgment on Aaron's heart may emphasize Aaron as the bearer of judgment as well as a bodily location (Ex 28:29). A variation of this usage is "heart" as reflexive: "Refresh your hearts" for "Refresh yourselves" (Gen 18:5) and "strengthen your heart" for "strengthen yourself (with food)" (Jud 19:5).

The whole spectrum of emotion is attributed to the heart. Examples of positive emotions are the following: Hannah's heart rejoiced (I Sam 2:1) as should the hearts of those who seek the Lord (I Chr 16:10). Love may be centered in the heart, as when Delilah complained that Samson's heart was not with her (Jud 16:15). Absalom gained for himself the loyalty of the Hebrew nation by stealing their hearts (II Sam 15:6). The joyful excitement from the news that Joseph was alive made Jacob's heart faint (Gen 45:26). Reception of

comfort is seated in the heart as in the idiom "to speak to the heart" (Gen 34:3; Isa 40:2) for "to comfort."

As for negative emotions, grief is "evil of heart" (Neh 2:2; rsv "sadness of heart"). David's regret or bad conscience at cutting Saul's garment is expressed as "his heart struck him" (I Sam 24:6; cf. II Sam 24:10). God's regret at creating man is centered in God's heart (Gen 6:6). The broken heart accompanies being oppressed (Ps 34:18 [H 19]). Contempt (II Sam 6:16), envy (Prov 23:17), and anger (Prov 19:3) are all functions of the heart.

Idioms relating the heart to fear and bravery are so numerous as to deserve separate treatment. Fear is expressed as follows: The heart may "go out" or "leave" (Gen 42:28; KJV, rsv, "fail"); it may "fall" (I Sam 17:32; rsv, "fail"). To remove courage is to hinder the heart (Num 32:7, 9). Fear occurs when the heart "deserts" its owner (Ps 40:12 [H 13]; KJV, "fails") or "melts" (Josh 14:7). Trembling of heart may represent emotions ranging from the complete demoralization of God's people under judgment (Deut 28:65; cf. I Sam 28:5) to Eli's anxiety over the welfare of the ark of God (I Sam 4:13). On the other hand the "heart of a lion" speaks of courage (II Sam 17:10).

Thought functions may be attributed to the heart. In such cases it is likely to be translated as "mind" or "understanding." To "set the heart to" may mean to "pay attention to" (Ex 7:23) or to "consider important" (II Sam 18:32). Creative thought is a heart function. Wicked devices originate in the heart (Gen 6:5). The rsv translates "which came upon Solomon's heart" as "all that Solomon had planned" (II Chr 7:11).

Wisdom and understanding are seated in the heart. The "wise heart" (I Kgs 3:12; rsv, "wise mind") and "wise of heart" (Prov 16:23) are mentioned. This idiom can be so strongly felt that "heart" virtually becomes a synonym for such ideas as "mind" (II Chr 9:23; rsv) or "sense" (Prov 11:12; rsv). The heart functions in perception and awareness as when Elisha's heart (i.e. Elisha's perceptive nature; rsv "spirit") went with Gehazi (II Kgs 5:26). As the seat of thought and intellect, the heart can be deluded (Isa 44:20; rsv "mind").

The heart is the seat of the will. A decision may be described as "setting" the heart (II Chr 12:14). "Not of my heart" expresses "not of my will" (Num 16:28). The "hearts" of the Shechemites inclined to follow Abimelech (Jud 9:3). Removal of the decision-making capacity is described as hardening the heart (Ex 10:1; Josh 11:20). Closely connected to the preceding is the heart as the seat of moral responsibility. Righteousness is "integrity of heart" (Gen 20:5). Moral reformation is to "set one's heart aright" (Job

11:13). The heart is described as the seat of moral evil (Jer 17:9).

Personality dispositions may be considered as more or less permanent personality patterns. Some typical dispositions located in the heart are generosity ("generous heart"; Ex 35:5), pride ("his heart became high"; II Chr 26:16), and faith ("the heart made firm"; Ps 78:8).

libbā. *Heart* (KJV, rsv), *rage* (KB). Unique form of unclear meaning (Ezk 16:30). Perhaps a variant of *lēb*.

l^ʿbibā. *A kind of bread.* Perhaps pancakes (BDB) or heartshaped (KB) bread (II Sam 13:6, 8, 10).

libbēb. Piel denominative verb for cooking the *l^ʿbibā* bread (II Sam 13:6, 8).

1073 לִבִּי (*l^ʿbī*) *lion.* A form from *lb'* q.v.

לִבְיָא (*l^ʿbiyā*). See no. 1070b.

לִבְיָא (*lābī*). See no. 1070c.

1074 לבן (*lbn*). Assumed root of the following.

1074a לָבָן (*lābān*) *white.*

1074b *לָבֵן (*lābēn*) *be white.* Occurs only in the Hiphil.

1074c לְבָנָה (*l^ʿbānā*) *moon.*

1074d לְבָנָה (*l^ʿbōnā*), לְבוּנָה (*l^ʿbōnā*) *frankincense.*

1074e לְבָנוֹן (*l^ʿbānōn*) *Lebanon.*

1074f לִבְנֶה (*libneh*) *poplar.* Occurs only in Gen 30:37; Hos 4:13.

1074g לְבִנָּה (*l^ʿbēnā*) *brick.*

1074h לָבֵן (*lāban*) *make bricks.* Denominative verb.

1074i מִלְבֵּן (*malbēn*) *brick mold.*

The Semitic root *lbn* referred to a range of light colors including: the white of snow, the light brown or creamy color of fresh wood and manna, the grey of the moon, the white of yogurt (Lebanese Arabic), and, finally, either the white snow caps of the Lebanon mountains or their light colored limestone. The Hebrew derivatives vary in their individual theological overtones.

lābān. White. Describes goats (Gen 30:35), peeled wood (Gen 30:37), manna (Ex 16:31), horses (Zech 1:8; 6:3), milk (Gen 49:12), and the infection of leprosy (Lev 13). Its theological significance is relatively limited. As the color of leprous infection, it may represent corruption and death. Zechariah's white horses, particularly in comparison with the white horse of Revelation (6:2), may signify military conquest. In contrast, the white garments advocated by the Preacher accompany a restrained hedonism (Eccl 9:7–9). In Gen 49:12 the whiteness is probably descriptive and refers to prosperity and abundance.

lābēn. Be white. A denominative verb derived from *lābān*. Its major theological motif relates whiteness to moral purity. The cleansing which God brings to the sinner makes the sinner white as snow (Ps 51:7 [H 9]; Isa 1:18). The cleansing of martyrdom also makes white (Dan 11:35). A fourth (in the Hithpael) has been translated both reflexively (Dan 12:10; rsv "make themselves white"; and passively (כִּינ "made white"). While either translation is grammatically defensible, the latter translation avoids the misleading suggestion that such moral cleansing comes by self-reformation. The white tree branches of Joel 1:7 represent the judgment accomplished by voracious locusts.

l'ḇānā. Moon. A poetic term for the moon (cf. *yārēah*). It is used in poetic figures both for beauty and for glory. As a figure for beauty it describes a beautiful maiden (Song 6:10). The increased light of the moon symbolizes the miraculous glory of the coming golden age (Isa 30:26). On the other hand, the glory of the moon will be superseded by God's glory which is to be revealed in that same age (Isa 24:23).

l'ḇōnā, l'ḇōnā. Frankincense. A resin from the bark of trees of the genus *Boswellia*. As the amber resin dries, white dust forms on the drops or tears of frankincense thus giving rise to its Semitic name. In biblical times most frankincense came either from or via Sheba in southern Arabia. It was a major item in the ancient luxury trade in spices.

In the OT it is significant as one of the ingredients of the holy incense (Ex 30:34) and as part of the cereal offering (Lev 2:1; כִּינ "meat offering"). The frankincense seems to have held a high degree of sanctity since all the frankincense was included in that portion of the cereal offering given as God's memorial portion (Lev 6:15). It was excluded from the cereal offering for jealousy (Num 5:15). It was also sprinkled on the shewbread (Lev 24:7). Frankincense seemed to be such a characteristic element in the sacrificial system that the term could be used to represent the entire system (Isa 43:23; Jer 6:20).

It could also symbolize luxury and sensuality (Song 3:6; 4:6, 14).

l'ḇānōn. Lebanon. Generally refers to the Lebanon mountain range more or less coinciding with the present Mount Lebanon. In OT ideology "Lebanon" was important both as a part of the promised land and as a literary symbol for such ideas as majesty, power, or grandeur.

Lebanon in Old Testament History. From early times Lebanon, or part of it, was included in the promised land (Deut 1:7; Jud 3:3). The Lebanese coast, Phoenicia, up to and including the land of the Gebalites (i.e. Byblos) is listed in the promised but unconquered lands (Josh 13:5). Hebrew military and commercial activities in the Lebanon (I Kgs 9:19; II Chr 8:6) were probably confined to the foothills of Mount Lebanon bordering the Beqaa Valley. The Lebanon range provided cedar wood for building the Old Testament temples (II Chr 2:8; Ezr 3:7).

Lebanon in Literary Symbolism. Lebanon and its cedars were symbols of greatness in popular proverbs (II Kgs 14:9), folk tales (Jud 9:15), and in the more literary imagery of the prophets. The Assyrian is said to have indicated the magnitude of his conquests by boasting that he had penetrated Mount Lebanon (II Kgs 19:23). God's greatness is shown in that God planted the cedars (Ps 104:16) and in the manner in which the Lebanon skips or leaps at the sound of his voice (Ps 29:5). Yet God's power is such that he can also destroy those cedars (Isa 10:34). The mighty cedars are used elsewhere as appropriate symbols for proud, arrogant men (Ezk 31:3). They may also symbolize flourishing prosperity (Ps 92:12).

The Lebanon region also served as a poetic image for the mysterious and romantic, as notably in the Song of Solomon. It is used in romantic entreaties (Song 4:8, 11, 15; cf. 3:9). Its connotations may have been a factor in naming one section of the Solomonic palace the House of the Forest of Lebanon" (I Kgs 7:2).

l'ḇēnā. Brick. Most usages of this term occur in contexts showing the toil and futility of human effort. A sarcastic, poetic doublet emphasizes that the Tower of Babel, an archetype of futile, human effort, was built of brick (Gen 11:3). Futility is seen again when the apostate Ephraimites under judgment defiantly boast that they will rebuild the fallen bricks of Samaria (Isa 9:9). Brick-making characterized the Hebrew toil in Egypt (Ex 5:6–14). In light of the above, the brick used by Ezekiel for an object lesson (4:1; כִּינ "tile") may conceivably have emphasized the futile toil of the Jewish defense effort. A variant form of this word refers to the surface beneath God's feet in theophanies (Ex 24:10), a surface

which elsewhere is referred to as the firmament (*rāqia'*; Ezk 1:26).

A.B.

לְבִנָּה (*libneh*). See no. 1074f.

לְבָנוֹן (*l'banôn*). See no. 1074e.

1075 לָבֵשׁ (*lābēsh*) *dress, be clothed.*

Derivatives

1075a לְבוּשׁ (*l'būsh*), לִבְשׁ (*l'būsh*) *garments, apparel.*

1075b מַלְבוּשׁ (*malbūsh*), מִלְבָּשׁ (*malbūsh*) *vestments.*

1075c תְּלִבוּשֶׁת (*tilbōshet*) *garment.*

lābēsh and its derivatives show three levels of usage: 1) being clothed, 2) being clothed as a sign of rank, status, or character, and 3) poetic figures likening abstract qualities to clothing.

In addition to simply referring to clothes as something to be put on (Song 5:3), clothes may reveal something about the wearer. David's daughters showed both their royal status and their virginity by their clothing (II Sam 13:18). The purple of Ezk 23:6 was intended to show nobility or royalty. The king's favor, and resulting positions, were marked by special clothing for both Joseph (Gen 41:42) and Mordecai (Est 6:11). Clothing could reveal sensuous luxury (Jer 4:30) or prosperity (Prov 31:21). A change in garments will typify the holiness needed to enter the Holy of Holies of Ezekiel's future temple (Ezk 42:14). Professional offices could be revealed by garb such as the prophet (Zech 13:4) or the warrior (Ezk 38:4).

Occasions of grief were marked by the wearing of special clothing. Garments of widowhood may be the best known example (Gen 38:19). Mourning (II Sam 14:2; Est 4:1) and repentance (Jon 3:5) could be marked by wearing special clothing. In Zechariah's vision Joshua's sinful state is revealed by his filthy garments (Zech 3:3; see below). The poetic figure describing Job as "clothed with worms" (Job 7:5) showed Job's unhappy state.

When God clothed Adam and Eve in skins (Gen 3:21), he provided a rich symbol of their new status. These garments are generally interpreted as showing the need for sacrifice through the need to kill the animals to provide the skins. However, the conversation between the Mesopotamian hero, Gilgamesh, and Utnapishtim suggests that the wearing of skin clothing might also symbolize all the frailties of fallen human life.

The richest level of usage is using clothing as a poetic figure for abstract qualities. God wears majesty and strength as garments (Ps 93:1). God is challenged to put on strength, i.e. to use his power (Isa 51:9). God clothes himself in righteousness, salvation, vengeance, and fury in preparing for judgment (Isa 59:17).

Men may be "clothed" in various qualities. Job was clothed in righteousness (Job 29:14). Salvation (II Chr 6:41) and strength (Isa 52:1) may be worn. Men were clothed in the Spirit for specific purposes (Jud 6:34; I Chr 12:19; II Chr 24:20). Negative qualities like shame (Ps 35:26; cf. Job 8:22) and cursing (Ps 109:18) also were worn like clothing.

The most significant figure of this sort is the one likening God's imputed righteousness to clothing. The individual's own good deeds are filthy rags (Isa 64:6; cf. Joshua in Zech 3:3) which God removes and then clothes his own in salvation and righteousness (Isa 61:10). Then, like Joshua in Zechariah's vision, men clothed in God's righteousness can stand before God.

l'būsh. Garments, apparel. This and other derivatives cover the same general range of meanings as the verb. *l'būsh* may refer to the formal vestments of an office (II Kgs 10:22). It could refer to literal clothing representing grief (Ps 35:13), luxury (II Sam 1:24), glory (Ps 45:13 [H 14]), and transitoriness (Ps 102:26). It was used as a poetic figure for abstract qualities like strength and dignity (Prov 31:25).

tilbōshet. Garment. Used once likening vengeance to a garment (Isa 59:17).

malbūsh. Vestment, garment. Used to refer to literal clothing such as royal livery (I Kgs 10:5) and priestly garments (II Kgs 10:22) and as a poetic figure for abstract qualities. Red-stained garments symbolized vengeance (Isa 63:3) and certain fine garments showed luxurious glory (Ezk 16:13).

A.B.

1076 לֹג (*lōg*) *a liquid measure, about one-half liter* (Lev 14). There were probably seventy-two logs in one bath (*bat*, q.v.).

1077 להב (*lhb*). Assumed root of the following.

1077a לָהַב (*lahab*) *flame, blade.*

1077b לִהְבֵּה (*lehābā*) *flame, tip of weapon.*

1077c שְׁלֵהֶבֶת (*shalhebet*) *flame.*

lahab. Flame, blade, point. This term refers either to the flame of fire or to the tip or blade of a weapon probably due to the rough similarity in

appearance between the two objects. The Arabic *lahiba* means "burn with thirst." The Akkadian *la'bn* means "fever." The Aramaic shaphel form *shalhēl* is "burn (up)."

lahab refers to the tips or blades of daggers (Jud 3:22), spears (Job 39:23; "point of spear" rather than "flashing spear" as in rsv), and swords (Nah 3:3).

It denotes the flames from Leviathan's mouth (Job 41:21) and the literal flames of an altar on which the angel ascended to Heaven (Jud 13:20). The "crackling of a flame" is one of the noises of invasion (Joel 2:5).

A supernatural "flame of fire" will be among God's great judgments at the end of history (Isa 29:6; cf. Isa 30:30; 66:15–16).

lehābā. Tip (of weapon), flame. Once describes a weapon tip, that of Goliath's spear (I Sam 17:7).

In all other usages, it serves as a poetic figure for some human or divine act. The "flame" from Sihon symbolized military conquest (Num 21:28; cf. Jer 48:45). Anger was described as a "fire of flame" (Hos 7:6; rsv "flaming fire"). The "flame" represented dangers from which God would protect his people (Isa 43:2).

God's judgment was repeatedly likened to a flame. The "flame" is associated with God's judgment upon his own sinful people (Isa 5:24), on Egypt during the Exodus (Ps 105:32; rsv "lightning that flashed"; literally "fire of flame"), and the Negev (Ezk 20:47; rsv "blazing flame"; Hebrew *lahebet shalhebet*, see below). God's "holy one" will someday be a flame of judgment upon God's enemies (Isa 10:17) as will God's people also (Ob 18). God's very presence is symbolized by a "fire of flame" (Isa 4:5; rsv, כִּנּוֹן "flaming fire").

The overlap between the meanings "blade" and "flame" raises the possibility that at some point the image of the voice as a flame of fire (Ps 29:7) and the image of the tongue as a sword (Rev 19:15) were originally the same image.

shalhebet. Flame. Used as a poetic symbol, twice of judgment (Job 15:30; Ezk 20:47) and once as a symbol of jealousy (Song 8:6). Apparently this was derived from a shaphel form from the root *lahab*. See the Aramaic form cited above.

A.B.

1078 להג (*lhg*). Assumed root of the following.

1078a להג (*lahag*) *study*, i.e. devotion to books (Eccl 12:12).

1079 לקה (*lāhā*) *languish, faint* (Gen 47:13).

1080 *להלם (*lihlēah*) *amaze, startle*. Occurs only in the Hithpalpel participle in Prov

26:18, "like a madman shooting fire-brands" (niv).

1081 להט (*lāhaṭ*) *kindle, burn*.

Derivative

1081a להט (*lahaṭ*) *flame, blade(?)*.

lāhaṭ may refer to literal burning, or it may be used as a poetic figure to describe God's judgment. The Akkadian *la'aṭu* means "consume with fire." The Aramaic *l'haṭ* means "consume," "burn up."

Some typical examples of *lāhaṭ* in the sense of literal burning are: the burning of Korah's followers (Ps 106:18; cf. Num 16), the burning of mountain forests (Ps 83:14 [H 15]), and of trees (Joel 1:19). The breath of Leviathan kindled coals (Job 41:21 [H 13]). It refers to the burning behind the invaders mentioned in Joel (2:3). Once it refers to the way in which lightning burns up God's enemies (Ps 97:3) and it describes as "flaming" the fires which serve God (Ps 104:4).

In purely figurative usages, it describes men as "burning" in their desire to destroy others (Ps 57:4 [H 5]; cf. rsv "greedily devour"). It describes divine attributes and acts such as God's anger in burning the foundations of the mountains (Deut 32:22). Evil-doers will burn as chaff in the great coming day of judgment (Mal 4:1 [H 3:19]). The verb may even describe God's own people as burning in God's judgment (Isa 42:25).

lahaf. Flame, (blade?). Used once (Gen 3:24) where it is usually translated as "flaming" (literally "flame of the sword"). However, the overlap in meaning between "flame" and "blade" (cf. *lahab*) suggests that "blade" (of a sword) deserves consideration as a possible interpretation.

A.B.

1082 *להם (*lāham*) *swallow greedily*. Occurs only in the Hithpael, in Prov 18:8, *mit-lahāmim* "bits greedily swallowed" (see also Prov 26:22).

1083 להו (*lāhēn*) *on this account, therefore* (Ruth 1:13).

1084 להקה (*lahāqā*) *band, company* (I Sam 19:20). Meaning and etymology dubious.

1085 לו (*lū*), לוֹ (*lū'*) *would that, I wish, perhaps*. A Hebrew particle used to mark several kinds of potential constructions.

1085a לולא (*lūlē'*) *if not, unless* (e.g., Jud 14:19; I Sam 25:34).

lū marks three degrees of personal desire or agreement: wishes, entreaties, and statements of

assent. It also marks two types of potential clauses: "perhaps" clauses and conditional clauses.

When used to express a wish, it may be translated "would that" or "I wish." Abraham's desire that Ishmael might live before God (Gen 17:18) and Joshua's rhetorical wish that the Hebrews had remained beyond the Jordan (Josh 7:7) are both marked by this particle. Combined with other devices to indicate potentiality, it may express a very strong wish (I Sam 14:30). In Abraham's petition that the Hebronites would hear him (Gen 23:13), *lû* serves as a particle of entreaty. Finally, it marks Laban's agreement with Jacob's proposition on wages (Gen 30:34).

When introducing pure potential clauses, it may be translated as "perhaps" as when Joseph's brothers speculated that Joseph might hate them (Gen 50:15; rsv "it may be"). When accompanied by a statement of consequence, i.e. an apodosis, the *lû* clause becomes the protasis of an unreal conditional sentence. "If the Lord had meant to kill us" (Jud 13:23) and "if Absalom were alive" (II Sam 19:7) are good examples of this (cf. Job 16:4; Ezk 14:15).

A.B.

1086 לו' (*lô'*) *not*. Alternative form of לו (q.v.).

1087 לוה (*lāwā*) *I, join, be joined*.

Used once in the Qal (Eccl 8:15); the remaining usages are in the Niphal. *lāwā* refers to the joining of an item or person to someone or something else. Most significant theologically is its usage to refer to foreigners who join themselves to God's people as converts.

In general usage it refers to the way in which hedonistic pleasures "stay with" a man (Eccl 8:15); also it is used for joining in a military alliance (Ps 83:8 [H 9]), the conjugal joining of husband to wife (Gen 29:34), and the joining of the Levites with Aaron for service at the tabernacle (Num 18:2-4).

As a term referring to conversion it describes those who, impressed by God's work in restoring his people, will join themselves to the Hebrews in the worship and service of God, i.e. will be spiritually converted (Isa 14:1). Others will join themselves to God as a result of some divine judgment (Zech 2:15; cf. Est 9:27). Such Gentile converts are assured that they will not be separated from God's Covenant (Isa 56:3-6). Someday God's repentant people will (re)join themselves to a true covenant relationship to God (Jer 50:5).

This usage of *lāwā* to reflect religious dedication supports the notion that the name "Levi" expressed the religious dedication of the tribe of that name to the Lord's service.

Bibliography: "Levi," in ZPEB. Albright, W. F., *Archeology and the Religion of Israel*, 5th ed., pp. 106, 203.

A.B.

1088 לוה (*lāwā*) *II, borrow (Qal), lend (Hiphil)*.

This may be a specialized usage of *lāwā* (*supra*). In contrast to the purely economic significance of borrowing and lending in modern life, these acts were endowed with a special theological significance in the OT. Only once is borrowing referred to as a primarily economic act in the borrowing of the restored Hebrew community to raise money for paying taxes (Neh 5:4). Also, the borrower and the lender are once referred to as one of several pairs expressing all classes of society (Isa 24:2).

Remaining usages reflect the special theological and moral perspectives of the OT. The Hebrew was not permitted to receive interest for loaning to another Hebrew (Ex 22:24-25). [Another view (reflected in KJV) is that interest on loans was allowed but not excessive interest (usury). In defense of this position, E. A. Speiser shows that in the surrounding cultures a loan was discounted with interest paid in advance. The thing prohibited in Akkadian sources and in the biblical laws was additional interest after a defaulting debtor was enslaved. See the fuller discussion and refs. under *neshek*. R.L.H.] Willingness to lend was a sign of righteous graciousness (Ps 112:5). Sometimes, the expectation or obligation of concrete repayment may be so remote or inappropriate that "lending" becomes almost synonymous with "giving" (Prov 19:17; note also "loan" and "give" as parallel in Ps 37:26).

The want or poverty which leads to borrowing is said to indicate the absence of God's blessing (Deut 28:44), while the ability to grant a loan characterizes a God-given prosperity (Deut 28:12). Inability to repay debts shows the futility of the wicked (Ps 37:21). Finally, Scripture observes that the borrower is a slave to the lender (Prov 22:7).

Bibliography: "Loans" in *JewEnc*.

A.B.

1089 לוה (*lwh*) *III. Assumed root of the following*.

1089a לויה (*liwyā*), לויה (*lōyā*) *wreath*.

Occurs in the phrase *liwyat hēn*, referring to the instruction of parents (Prov 1:9), and to the work of Wisdom (Prov 4:9).

1089b לויתן (*liwyātān*) *large aquatic animals*, may be crocodile (Job 41:1 asv marg.), serpent (Isa 27:1), or whale (Ps 104:26), usually rendered

"Leviathan" (consistently in KJV, ASV, and RSV).

liwyātān appears six times in the OT, as a literal animal, a figure for Egypt (Ps 74:14), and a figure for sinful mankind in general (Isa 27:1).

Derived from a root attested in Arabic, *lwy* "to twist" (*liwyā* "wreath," Prov 1:9), *liwyātān* is reflected in Ugaritic *ltn*, a monster called Lotan. Biblically, however, it appears only with other beasts: *nāhāsh* "snake" (Isa 27:1), or *tannin* "large reptile" (Ps 74:13–14).

Yahweh overawed Job by confronting him with his invincible creature *liwyātān* (Job 41 [H 40:25ff.]). Clearly the Nile crocodile, with scaly hide (vv. 7, 15–17 [H 40:31; 41:7–9]), terrible teeth (v. 14 [H 6]), and swift swimming (v. 32 [H 24]), it is described poetically, i.e. "his sneezes flash forth light . . . out of his nostrils smoke goes forth" (vv. 18–21 [H 10–13]), but not mythological. Other hyperbolic comparisons follow: "he spreads out like a threshing sledge on the mire; he makes the depths boil like a pot" (vv. 30–31 [H 22–23], NASB). In the Psalter (cf. *rahab* [q.v.] in Isa 51:9–10) the power of the crocodile becomes a natural symbol for the troops of Egypt, overthrown by the Lord at the Red Sea:

Thou didst divide the sea . . .
Thou breakest the heads of Leviathan
Thou gavest him to be food to the people inhabiting the wilderness (Ps 74:13–14).

Perhaps here *liwyātān* refers to the corpses of Egyptian soldiers that were washed up on the shore before Israel (Ex 14:31).

Elsewhere *liwyātān* swims in God's "sea, great and wide," a creature "whom Thou hast formed to play therein" (Ps 104:25–26), presumably a Mediterranean whale or dolphin (NBD, p. 729). Yet unlike the hostile beasts in the somewhat parallel "Hymn to the Sun," composed by the reform pharaoh Akhenaten, Leviathan et al. wait humbly upon God (v. 27) as mankind's "fellow pensioners" (C. S. Lewis, *Reflections on the Psalms*). The noun *liwyātān* may also designate serpents, such as might be roused by snake-charming magicians, who were also reputed to impose curses (Job 3:8; cf. Num 22:5–6). "Leviathan" thus comes to denote a swift sea serpent, slain of God, to symbolize his eschatological "punishing the inhabitants of the earth for their iniquity" (Isa 26:21–27:1).

Many scholars identify the OT leviathan with such mythological monsters of chaos as Lotan of Ugarit or Tiamat and Kingu of Babylon. Its crushed heads in Ps 74:13 (assumed to be seven) are equated with those of seven-headed dragons (illustrated in IDB, III, p. 116) slain by Baal (Scripture substituting the name Yahweh), and its aroused coils in Job 3:8 with those which were

supposed to cause eclipses when wrapped about the sun.

Negative criticism holds that the writers of the Old Testament had a real faith in these creatures. But that the OT authors actually believed in such mythology should be roundly denied. However, some have held that the references to Leviathan as many-headed in Ps 74:14 and to its serpent character in Job 3:8 may be allusions to the current mythological themes (cf. Smick, bibliog.). Albright calls this a proper demythologizing by the biblical authors (YGC, pp. 183–93).

J.B.P.

1090 לִז (lûz) *turn aside, depart.*

Derivatives

1090a לָזַט (lāzûṭ) *deviation, crookedness.*

1090b לִז (lûz) *almond tree, almond wood.* Occurs only in Gen 30:37, referring to the rods which Jacob stirred.

The verb *lûz* occurs in the Qal, Niphal, and Hiphil stems. The Qal imperfect is used in Prov 3:21, as Wisdom instructs her son not to let sound wisdom and discretion "slip from sight" (NEB). Maintaining such a focus assures him of life and grace.

In Prov 4:21 Wisdom encourages her listeners to heed her words and not let them slip out of mind (NEB; literally, do not let them depart from your eyes). In this passage *lûz* occurs in the Hiphil imperfect.

In the four following examples, *lûz* occurs in the Niphal participial form. Two passages use it figuratively of crooked or devious ways (Prov 2:15; Prov 14:2). (Note NEB "double-dealer" in 14:2.) Isaiah 30:12 also denounces those who rather than trusting in the Word of God, trust in oppressive and devious practices of their own scheming. In so doing, however, they draw the judgment of God.

Finally, Prov 3:32 uses the word figuratively of a crooked, perverse person who is detested by the Lord.

lāzûṭ. *Deviation, crookedness.* Proverbs 4:24, the only passage that uses the word figuratively urges men to put away *l'zûṭ š'pāṭayim* the "deviation of the lips," i.e. perverted talk.

W.C.K.

1091 לִוְהַ (lwh). **Assumed root of the following.**

1091a לִוְהַ (lūah) *tablet, plank, board.*

A cognate of the Akkadian *li'u^m* or Sumerian *GIS.LI.U⁵UM*, *lūah* appears over forty times in the OT. Since Sumerian uses the determinative for wood (*GIS*), we may suppose that originally tablets were made from wood. Any such wooden tablets have long since perished. The first known tablets consist of pictographs on clay, found in layer IV B of Uruk (cf. D. J. Wiseman, *Illustrations from Biblical Archaeology*, Eerdmans, 1958, pp. 10–11). *lūah*, however, can refer to writing surfaces of stone (the tablets of the Ten Commandments in Ex 24:12; 34:28), the wooden planks of the tabernacle (Ex 27:8; 38:7) or of a ship (Ezk 27:5), and the metal plates on the base of the lavers in Solomon's temple (1 Kgs 7:36).

lūah is also used figuratively. Men are told to write God's commandments on the "tablet of [their] heart" (Prov 3:3; 7:3). The sin of Judah, ironically, is engraven on the "tablet of their hearts" (Jer 17:1). The prophet Habakkuk is instructed to write the vision on a billboard(?) so that it will be plain for a messenger to read and run (Hab 2:2).

The stone tablets handed to Moses were the work of God and the writing of God (Ex 31:18; 32:16; 34:1); yet God employed Moses, as a secondary agency, to write the words he wanted on the tablets (Ex 34:27, 28). This is in keeping with other biblical statements which attribute to God directly what is accomplished through the agency of men. Ultimately, all must and does originate and end with God (e.g., the crucifixion, Acts 2:23).

Just as Moses is commanded to record the battle with the Amalekites as a memorial for young Joshua (Ex 17:14), so Isaiah is told to write the prophecy against dependence on Egypt "on a tablet and note it in a book" (Isa 30:8). These texts with such others as Jer 36 document the process of inspiration.

W.C.K.

1092 לוּט (lūt) *wrap closely, envelop.*

Derivatives

1092a לָטַח (lāt), לָטַח (lā't) *secrecy.*

1092b לוּט (lōt) *envelope, covering.* Occurs only in Isa 25:7.

lāt. Secrecy, mystery. Used in Ex 7:11, 22; 8:7 [H 3], 18 [H 14] in the plural with the preposition *b^c* to refer to the enchantments or secret arts (RSV) practiced by Pharaoh's magicians (*ḥarṭūmmīm*, a name borrowed from an Egyptian word *hry-tp* "chief lector-priest") in their attempt to keep up with Moses' and Aaron's

plagues of God. In four other nontheological contexts it is used as an adverb, secretly, softly (Ruth 3:7; Jud 4:21; 1 Sam 18:22; 24:5).

Bibliography: Vergote, J., *Joseph en Egypte*, 1959, pp. 66–73.

W.C.K.

1093 לָוִי (lāwī) *Levi.*

Derivative

1093a לָוִי (lāwī) *Levite, denoting a member of the tribe of Levi.*

Levi was the third son born to Jacob by Leah, his less-favored wife (Gen 29:34).

Levi, progenitor of the tribe of Levi, took part in a distinctly odious incident (Gen 34). His sister Dinah had been raped by Shechem, son of the Canaanite Hamor. He would be permitted to marry her if he and his whole city would consent to be circumcised. This they did, but while they were still recovering from the operation, Simeon and Levi went and slew all the males of the city (Gen 34:25–26).

Jacob was so indignant over this deed that he still remembered it on his deathbed. Instead of blessing Levi, he predicted that both it and Simeon would be scattered in Israel (Gen 49:7). While this curse turned out to be the eventual end of Simeon's identity in the land of Canaan, Levi's descendants by faith turned it into a blessing. Their scattering became the occasion for ministering on behalf of the Lord to all Israel. God adopted this tribe as his own inheritance in lieu of the firstborn male of every household (Num 3:11–13).

No other information is given about the man Levi or his tribe until the family went down to Egypt. The historicity of their sojourn in Egypt may be attested in part by the number of Egyptian names among the Levites: Merari, Moses, Phinehas, and Hophni (*mrry* "beloved"; *mss* "born of," according to some; *3p-nḥsy* "the bronze-colored one, and *ḥfnr* "Nubian").

An unnamed descendant of Levi married an unnamed Levite woman who bore Moses, Aaron, and Miriam (Ex 2:1ff.). The reference to Amram and Jochebed in Ex 6:20 "giving birth" to Moses and Aaron is typical of biblical genealogies. The immortalized ancestors are frequently credited with bearing the children of subsequent generations. (Note the language of Gen 46: 15, 18, 25.) There were 8,600 descendants of four brothers or cousins, of whom 2,750 were between the ages of 30 and 50 years (Num 3:17–20, 27–28; 4:35–37). Obviously, the record implies that there are more than four generations connecting Levi and Moses; this Amram was not Moses' actual father, who remains unnamed (Ex 2:1).

Aaron becomes the high priest in the line of the

Levites who showed their fidelity in Ex 32:26–29. Aaron in turn hands the office to his son Eleazar (Deut 10:6) and he hands it to his son Phinehas (Jud 20:27, 28). Then the high priesthood is transferred from the line of Eleazar to the Aaronic line of Ithamar in Eli (I Chr 24:3; I Sam 2:22, 28). Eli's sons are too wicked to deserve this pre-eminence (I Sam 2:27–36), so in Solomon's day Abiathar is deposed and the Aaronic Zadok takes over as predicted by the "man of God" in I Sam 2:27–28, 35; I Kgs 2:26–27, 35).

lêwi. *Levite.* Despite strong disclaimers to the contrary, it is evident that the tribe of Levites was descended from the ancient Levi. Levi was Jacob's third son by his wife Leah (Gen 29:34). Since Leah was competing with her prettier sister Rachel for Jacob's attentions and affection, she named her son Levi, adding the wordplay, "My husband and I shall surely be united [or joined]."

The Lord alluded to this remark when he instructed Aaron that he and his sons would bear the responsibility for the sanctuary and the priesthood, while the tribe of Levi was joined to him to assist him in carrying out these duties (Num 18:1–2). Note how the NEB translation of these verses distorts the Hebrew distinctions in the text so as to favor a critical interpretation!

The Wellhausen theory insists that division of the priesthood into priests and Levites derives from the reform of Josiah (621 B.C.) at the earliest. Wellhausen claimed that the high priest was still unknown even to Ezekiel, for the first actual reference to such a division is Ezk 44:6ff. where the services of the temple and altar are assigned to the sons of Zadok.

Why then is the high priest expressly mentioned in II Kgs 12:10; 22:4, 8; 23:4 and possibly in II Sam 15:27? Why does Deut 18:1–8 make such an obvious distinction between the "priest" ministering at the sanctuary (vv. 3–5) and the "Levite" otherwise occupied (vv. 6–8)? Even the phrase "the priests the Levites" (Deut 17:9, 18; 18:1; 24:8; 27:9; Josh 3:3; 8:33; Jer 33:18, 21 [note reverse order in v. 21]; Ezk 43:19; 44:15; II Chr 23:18; 30:27) only implies that all priests are Levites, not the reverse. In Hebrew the limiting word is always placed after the word it limits, hence the phrase means "the Levitical priests." (Note the rsv wrongly inserts "that is" between the phrases "the Levitical priests" and "all the tribe of Levi" (Deut 18:1). The Levites are not to be equated with the priests on the basis that the terms used to describe the Levites' duties in Deut 18:7 are the same as those used of priestly duties, i.e. "to minister in the name" (cf. 18:5 of priest, 17:12; 21:5) "to stand before" (cf. I Kgs 10:8, etc.). These terms are used of priestly duties, but so are they used of subordinates like young Samuel (I Sam 2:11, 18; 3:1).

In the hierarchical order of the cultures, the Levites take second place after the Aaronite priests as compared with other Israelites. According to the Mosaic legislation, some of the Levites' duties included bearing the ark (I Sam 6:15; II Sam 15:24), performing various services in the tabernacle (Ex 38:21; Num 1:50–53), and ministering to Aaron and his sons (Num 3:9; 8:19). David placed them in charge of the liturgical music (I Chr 15:16, 17, 22) and of policing the temple (I Chr 9:26; 26:17). In the time of Ezra, they taught the people the Law (Neh 8:7–8; cf. Deut 31:25).

But most important of all, the tribe of Levi was to serve as a substitute for the firstborn of all Israelite males (Num 3:11–13). Scripture thereby resists the analogical deduction (hence a warning in other areas such as double predestination) that would demand human sacrifice, since all the firstborn of the earth belong to the Lord. Instead of human sacrifice, God once again accepted a substitute; this time one Levite for each firstborn male in Israel.

לויָה (liwyâ). See no. 1089a.

לויָתָן (liwyâtân). See no. 1089b.

1094 לול (lûl) *shaft or enclosed space with steps or ladder.* Occurs only in I Kgs 6:8, ûb' lûlim ya'âlû.

1095 לולו (lwlw). *Assumed root of the following.*

1095a לולי (lûlay) *loop.*

לולֵה (lûlē'). See no. 1085a.

לולי (lûlay). See no. 1095a.

1096 לון (lûn), לוין (lûn) *lodge, spend the night.*

Derivatives

1096a מלון (mālôn) *lodging place, inn.*

1096b מלונה (m' lûnâ) *lodge, hut.* Occurs only in Isa 1:8; 24:20.

Usually lûn is used of men lodging for the night in some place. Thus Lot graciously invited the two angels, who had come to destroy Sodom (Gen 19:2), to lodge with him. Jacob spent the night at Bethel (Gen 28:11). But more interesting illustrations of the use of the word are figurative: Ps 30:5 [H 6] says, "Weeping may endure for a night, but joy comes in the morning." The theological usage

emphasizes the brevity of God's anger as opposed to the life-giving power of his abundant favor.

Righteousness lodges in a faithful city (Isa 1:21), while the man who fears the Lord dwells at ease (Ps 25:13). Indeed, he who listens to life-giving reproof will abide among the wise (Prov 15:31). Proverbs 19:23 says it succinctly: "The fear of the Lord is life indeed [emphatic lamed], and he who has it shall abide satisfied." The converse is likewise briefly stated: "Man being in honor does not endure; he is like the beasts that perish" (Ps 49:12 [H 13]).

The best verse of all is Ps 91:1. "He who dwells in the secret place of the most High shall abide in the shadow of the Almighty."

mālōn. Lodging place, inn. There are eight references to lodging places such as the one chosen by Joseph's brothers as they returned from Egypt (Gen 42:27; 43:21). The most famous is the one where Moses and Zipporah stopped for the night on their way back to Egypt. There God sought to kill Moses (afflict him with a fever or disease?) because he had failed to circumcise his son (apparently because of Zipporah's protestations, Ex 4:24).

In other cases, it is the prophet who longs for some sort of camp in the wilderness so that he can leave his people, because their sins are loathsome (Jer 9:2 [H 1]). In Isa 10:29 the approach of the Assyrian king and his nightly stopovers are noted with fear. Indeed, a proud Sennacherib boasted that he would enter Lebanon's remotest campground (II Kgs 19:23; cf. Isa 37:24).

The feminine form *m'lūnā* also occurs. It refers to a hut or cottage in a vineyard (Isa 1:8) built for the watchman of the crop. An eschatological passage states that the earth will reel to and fro and totter like a cottage (Isa 24:20). Notice then, both its proverbial fragility and isolation.

W.C.K.

1097 לִנּוּ (lūn) *murmur, rebel (against).*

Derivative

1097a לִנְנוּ (l'ūnnā) *murmuring.*

Except for Josh 9:18, a reference to Israel's displeasure with Joshua's handling of the Gibeonite lie, all occurrences of the verb *lūn* are to be found in six chapters in the Pentateuch: Ex 15, 16, 17; Num 14, 16, 17, each with the preposition 'al "against." In each case the subject of the murmuring is all of the congregation of Israel. Numbers 16:11, however, may refer only to Korah (cf. 16:19). The object of their verbal assaults is usually Moses and Aaron (Ex 16:2; Num 14:2); occasionally, Moses is singled out (Ex 15:24; 17:3; Num 14:36) or Aaron (Num 16:11); at other times the Lord himself is the object of their

abuse (Ex 16:7-8; Num 14:27, 29). In the final analysis their murmuring was always against God who commissioned the leaders of the people. The murmuring, of course was not without reason, namely, hunger or thirst in the desert, or an apparently unattainable goal. But they sinned because they doubted God and cast aspersions on his justice, goodness, and power.

Noeldeke suggests that a double 'ayin root, *lnn*, or (on the basis of an interchange between *lamed* and *resh*,) *rnn* "to cry aloud." But no evidence exists to support either idea. Even KB's connection with Arabic *l(y)m* "to blame" likewise fails. Whether in the Niphal or Hiphil form, the verb means to express resentment, dissatisfaction, anger, and complaint by grumbling in half-muted tones of hostile opposition to God's leaders and the authority which he has invested in them.

The true nature of this murmuring is seen in the fact that it is an open act of rebellion against the Lord (Num 14:9) and a stubborn refusal to believe God's word and God's miraculous works (Num 14:11, 22, 23). Thus the right attitude in real difficulty is unconditional acceptance and obedience. God's own must never stand in judgment upon him.

l'ūnnā. Murmuring. Always used of Israel's murmurings (pl. const. noun) against the Lord; an act of rebellion, disbelief, and disobedience to duly constituted authority (Ex 16:7, 9, 12; Num 14:27; 17:5, 10 [H 20, 25]).

1098 לוּעַ (lū'a'), עָלַעַ (lā'a') *I, swallow, swallow down.*

Derivative

1098a לוּ (lō'a') *throat.* Occurs only in Prov 23:2, "and you will put a knife to your throat" (to restrain oneself from overindulgence in food).

1099 לוּעַ (lū'a'), עָלַעַ (lā'a') *II, talk wildly.*

לוּץ (lūš). See no. 1113.

1100 לוּשׁ (lūsh) *knead.*

לִזְזוּת (lāzūt). See no. 1090a.

לָחַ (lah). See no. 1102a.

לָחַ (lēah). See no. 1102b.

1101 לַחַה (lḥh). **Assumed root of the following.**

1101a לַחִי (l'ḥi) *jaw, cheek.*

This noun occurs twenty-one times in the OT and is attested in the Ugaritic *lhy* (e.g. UT, 16:II

Aqht:1:29–30 *ṭbq lḥt niṣh* “who will shut the jaws of his detractors”).

The most famous jawbone appears in Jud 15:15–17, 19. Samson uses it to slay or vanquish (see *nākā*) one thousand men, and thereby names the place Ramath-leḥi, “hill of the jawbone.”

In Job 41:2 [H 40:26], God reduces Job to thoughtful silence while asking him if he is capable of taming Leviathan (poetic name for a crocodile) by putting a hook through its jaw. But God is able to put the hook in its jaw and in the jaw of *tannim*, an aquatic figure for the Egyptian Pharaoh (Ezk 29:4) and in the jaw of Gog (Ezk 38:4). He will put a bridle in the jaws of the people of the nations (Isa 30:28) but take it from the jaws of his own so that they may eat (Hos 11:4).

While men like Micaiah, the true prophet of the Lord, may be smitten on the cheek by false prophets like Zedekiah (I Kgs 22:24; II Chr 18:23) and Job may be verbally smitten on his cheeks by his miserable comforters (Job 16:10), God will deliver the last blow to the enemies’ cheeks (Ps 3:7 [H 8]). Men will even smite with a rod the leader of Israel on the cheek (Mic 5:1 [H 4:14]). The Servant of the Lord, the Messiah, will voluntarily submit his “back to the smiters and [his] cheeks to those that pluck out the beard” (Isa 50:6), but he too will emerge triumphant.

W.C.K.

לחם (*l’ḥūm*). See no. 1104b.

1102 לחה (*lḥh*). **Assumed root of the following.**

1102a לח (*lah*) **moist, fresh, new.**

1102b לֶחֶם (*lēaḥ*) **moisture, freshness.**

לחי (*l’ḥī*). See no. 1101a.

1103 לָחַק (*lāḥak*) **lick** (e.g. Num 22:4; I Kgs 18:38).

1104 לָחַם (*lāḥam*) **I, fight, do battle.**

Derivatives

1104a לָחֶם (*lāḥem*) **war** (?). Only in Jud 5:8.

1104b לחים (*l’ḥūm*) **intestine, bowels** (?).

1104c מִלְחָמָה (*milḥāmā*) **battle, war.**

The most significant usages of the verb *lāḥam*, which occurs 171 times, pertain to God’s role in Israel’s wars. When God calls Israel to arms against an enemy, it is because of the enemy’s moral degradation (Deut 7:4, 16, 25; 20:18, etc.). In such conflicts, it is the Lord who does battle on Israel’s behalf (Ex 14:14, 25; Deut 1:30; 3:22; Josh 10:14, 42; Jer 21:5; Neh 4:14; II Chr 20:29). In doing so, Yahweh often calls into his service

not only Israel, but also the elements of nature (Josh 10:11; 24:7; Jud 5:20). Nevertheless, the Israelites must also join the battle and fight with the Lord. Even though their land has been deeded to them as an inheritance, they must conquer it in battle (Ex 23:27–33). Bauernfeind comments: “Nevertheless, neither their equipment (Jud 7:2ff; I Sam 14:6; 17:45, 47) nor their numbers (Jud 7; II Sam 24:1ff; Ex 30:12) turned the scale. It was Yahweh who went before them (Jud 4:14; Deut 20:4; II Sam 5:24), gave them courage (I Sam 30:6) and took it from their foes (Ex 15:15–16; 23:27f) by miracles (Josh 10:11; 24:7; Jud 5:20; by terror, I Sam 14:15). To him and him alone belonged the praise (Ex 14:4, 18; Zech 4:6)” (TDNT, VI, p. 508).

Israel constituted the “armies of the Yahweh” (Ex 12:41) whose troops had to be holy (Isa 13:3). Even the Israelites’ weapons and campgrounds had to be holy if the Yahweh was to camp with them (Deut 23:10–15; II Sam 1:21; Isa 21:5). Thus “if it had not been the Lord who was on our side, when men rose up against us, then they would have swallowed us up alive” (Ps 124:1–3 [H 4]; 118:10–14). “Fight against those who fight against me, O Lord” (Ps 35:1). But Israel’s trust must be in the Lord, warn the prophets, not in horses, chariots, weapons, or men (cf. Deut 17:16–17; I Sam 17:47; Isa 31:1–3; Hos 8:14).

Israel itself was subject to attack from God if they flaunted his laws and indulged in sin. Amos 2:14–16 comes very close to describing all-out warfare against Israel. Isaiah 63:10 states explicitly that when the Israelites rebelled against the Holy Spirit, God became their enemy and fought against them.

There is yet coming a time when God will fight once more; this time against all the nations which have attacked Israel (Zech 14:3). Yahweh has decreed the death of the beast and the end of his power (Dan 7:11, 26; 8:25; 11:45). God will personally put on the breastplate of righteousness, helmet of salvation, suit of vengeance, and coat of zeal as he judges the enemies from the nations, until the fear of him is spread from east to west (Isa 59:17–19).

lāḥem. War (?). This word appears only in Jud 5:8 and is usually translated “then was there war [at] the gates.” Others read it as “then was there barley bread” or “the barley bread was exhausted.” The first is probably to be preferred.

milḥāmā. Battle, war. Of the 319 occurrences of this noun, our interest centers on the battles in which Yahweh was involved. While much has been made of the concept of “holy war” popularized by von Rad, the demure of men like A. Weiser must be raised. There is greater breadth to the concept than simply the fulfillment of an ancient sacral ordinance.

True, Yahweh is a "man of war" (Ex 15:3) and his name Yahweh *š"bā'ōt*, "Lord of hosts" does on occasion reflect the fact that he is commander-in-chief of Israel's armies (I Sam 17:26, 45). David acknowledged that "the Lord saves not with the sword and spear: for the battle is the Lord's" (I Sam 17:47). And there was a book containing "the wars of the Lord" (Num 21:14). However, not every battle was a war of *herem* wherein everything in the captured city was devoted to destruction.

Further, many of Israel's wars were fratricidal wars between the tribes (Jud 19–21) and even selfish wars of aggression (II Sam 24; I Kgs 22; Jud 17). Israel also fought defensive wars (Num 31; I Sam 11–17; 28–30; II Sam 5, 8) and offensive wars (Num 21:21–35; Deut 2:26–3:17; Josh 6–12).

Just before Yahweh makes "wars to cease" (Ps 46:9a [H 10]) and forever destroys the implements of war (Ps 46:9b [H 10]; Isa 2:1–5; Mic 4:1–5) the nations shall raise their arms against Israel and their Messiah, but to no avail (Ps 2; Ps 45:3ff. [H 4]; Zech 14).

W.C.K.

1105 לַחֶמֶת (*lāḥam*) II, use as food, eat.

Derivative

1105a לֶחֶם (*leḥem*) *food, bread, grain.*

This noun occurs 296 times in the OT. But "man does not live by bread alone, but by every word that proceeds from the mouth of the Lord" (Deut 8:3). Man is not what he eats!

Yet all food is the gift of God. He planted the garden of Eden and caused all the trees to grow which were good for food (*ma'ākāl*, Gen 2:9). Likewise the Psalmist asserts that God "caused the grass to grow for the cattle and vegetables for the service of man: that he may bring food from the ground... and bread which strengthens man's heart" (Ps 104:14–15). Yes, he "gives food to all flesh" (Ps 136:25); to the hungry (Ps 146:7) and to the beasts and young ravens (Ps 147:9). God himself even instructs man the art and principles of agriculture: how to prepare the ground, how to sow the seed in rows or to broadcast others, and how to harvest each after patiently waiting the appointed number of days (Isa 28:24–29, note grain in v. 28).

Man must never presume that this "staff" on which he leans will always be available, regardless of how he acts. God can and did "break the

whole staff of bread" (Ps 105:16; Isa 3:1; Ezk 4:16; 5:16; 14:13; Amos 4:6). This was the principle announced by Moses in Lev 26:26: God would send increasingly severe judgments on any nation that refused to walk in righteousness before he brought the ultimate calamity. Even worse than a famine of bread was famine of the Word of God (Amos 8:11) both of which resulted from the same cause: compounded sin.

Sadly enough, even though God was richly supplying Israel with her grain, fine flour, oil, and honey (Ezk 16:19), she, like the adulterous Gomer, insisted on running after her lovers, not realizing that God had been the source of those gifts (Hos 2:5, 7–8 [H 7, 9–10]).

What could the few righteous like Habakkuk do when they saw their nation headed for such disaster as a result of hardened and entrenched sinfulness? He would "rejoice in the Lord" and "joy in the God of [his] salvation" even though outwardly he was shaking with fear and the fields yielded no food (*'ōkel*), (Hab 3:17–18).

There is another kind of bread, wine, and milk that can be bought without money or labor. Men may have it if they repent and seek the Lord (Isa 55:1–7). Jesus later calls himself the true bread from heaven just as the manna in the wilderness was "bread from heaven" (Ex 16:4ff.). Even Elijah was fed food by God's ravens when there was none to be had (I Kgs 17:6). At other times, God provided grain by sending visions and leadership in Joseph (Gen 41:54, 55; 43:25, 31, 32; 45:23; 47:12, 13, 15, 17, 19, 20). Both spiritual and physical bread come from the Father of all good gifts.

The dough which the Israelites took with them from Egypt was unleavened, because they had to leave in haste (Ex 12:34, 39). Note, however, Lev 23:17. The Pentecost wave loaves were to be baked with leaven! So leaven cannot always be a principle of evil. The "bread of wickedness" (Prov 4:17) or the "bread of deceit" (Prov 20:17) is always obtained by wrong and results in bitterness of life. No better is the "bread of adversity" (Isa 30:20), which spells times of persecution, or the "bread eaten in secret" (Prov 9:17) with the seductress, for the act of adultery will poison a man's whole life.

There is a better day coming when God will restore the bread and grain to its creation—state. The heavens and the earth will flow with abundance as man enters into that "Rest" of which Canaan with its promised fruitfulness ("a land of wheat and barley, vine and fig trees and pomegranates, a land in which you will eat bread without scarcity, in which you will lack nothing, (Deut 8:7–9) was an earnest or down payment. Nature will erupt in uninterrupted, delicious productivity (Joel 3:18 [H 4:18]; Amos 9:13–14; Isa 55:10–13; Ezk 47:6–12).

1106 לָחָשׁ (lāḥaš)

Bibliography: Heaton, E. W., *Everyday Life in O.T. Times*, Scribner's, 1956, pp. 81-87; 97-115. Richardson, TWB, pp. 37-38. Ross, J. F., IDB, II, pp. 307-308.

W.C.K.

1106 לָחָשׁ (lāḥaš) *squeeze, oppress.*

Derivative

1106a לָחָשׁ (lāḥaš) *oppression, distress.*

No more graphic word picture of the meaning of *lāḥaš* in its nineteen examples can be given than that of Balaam's donkey squeezing up against the wall and thereby crushing Balaam's foot (Num 22:25a, 25b; II Kgs 6:32).

The word finds its most important usage in the realm of ethical theology. Israelites were not to oppress foreigners or strangers (Ex 22:21 [H 20]; 23:9), for they once had been strangers in Egypt, that great oppressor. Oppressive treatment was strictly forbidden to all and to Israel in particular.

Israel experienced a whole wave of oppressors during the period of the judges (Jud 1:34; 2:18; 4:3; 6:9; 10:12; I Sam 10:18). But the Lord sent deliverers in each situation. Later he sent oppressors, (the king of Syria and others; II Kgs 13:4, 22) against Israel on account of sin (Amos 6:14).

Other nations will face their oppressors (Isa 19:20), too. But God always hears the cry for mercy and deliverance, and he will then fight daily against those oppressors (Ps 56:1 [H 2]).

lahaš. Oppression, distress. Almost all of the eleven instances of this word deal with the oppression of Israel by her enemies. One exception is the expression for a prisoner's rations, "the bread of oppression and the water of oppression" (I Kgs 22:27; II Chr 18:26). Isaiah 30:20 says that the Lord sends physical privations (in a siege here?) but there will still be left a Teacher, and ears to hear the exhortation, "This is the way, walk in it" (Isa 30:21). The word is usually translated in the LXX by *thlipsis* "tribulation."

W.C.K.

1107 שָׁשׁ (lāḥaš) *whisper, charm.*

Derivative

1107a שָׁשׁ (lāḥaš) *a whispering, charming.*

lāḥaš is found in Aramaic and rabbinical Hebrew with the sense of "to hiss as a serpent." Thus the word may be a dialectal variant of *nāḥaš*, since nun and lamed are of similar sound (cf. the verb *lāqah* where the *l* acts like an *n*; the verb "to oppress," *lāḥaš* or *nāḥaš*; and the noun "room," *lishkā* and *nishkā*).

God will not listen to the prayers of serpent-

charmners (note Ps 58:5 [H 6]). Their mouths are usually full of reptile-like poison.

Just as bad are those who whisper together (Hithpael) to devise evil (Ps 41:7 [H 8]; see also David's whispering serpents, II Sam 12:19).

lahaš. Whisper, charm. In Isa 3:20, the garishly attired women wear amulets or charms, perhaps as protection against snakes or demons. Professional enchanters (Isa 3:3) attempted to charm serpents (Jer 8:17; Eccl 10:11) as part of Israel's decline into magic and divination. Some have conjectured that these charms may have been serpent-shaped earrings (why not leg-bands?) since the words *ṭabbā'ôt* and *nizmē-hā'ap* in Isa 3:21 are words for finger-rings and nose-rings.

When God's chastening came upon Israel, they cried out to God with whispers of prayer (Isa 26:16); Ugaritic *lhšt* "whispers" (UT 19:no. 1373). This does not appear to be an incantation.

W.C.K.

1108 לוֹט (lōt) *myrrh.*

לוֹט (lōt). See no. 1092a.

1109 לוֹט (lōt). *Assumed root of the following.*

1109a לוֹט (lōt) *a kind of lizard* (Lev 11:30).

1110 שָׁשׁ (lāṭaš) *hammer, sharpen, whet.*

1111 לַיִל (layil) *night.*

Unlike the Egyptian *Hymn to the Aton* in which the night is dreaded because the sun (Aton) has gone home, the OT insists that the darkness and night were created by God (Gen 1:4, 5; Ps 74:16). During the night God is awake, providing for the beasts of the forest (Ps 104:20-22) and protecting men from pestilence (Ps 91:5-6). Indeed the very alteration and regularity of day and night is the result of God's covenant with each (Gen 8:22; Jer 33:20, 25) and thus each succeeding day and night is a reminder of God's faithfulness to his other covenant with Abraham and David (Jer 33:21-26). To God, the night is as bright as the day (Ps 139:11-12).

Of all the 242 occurrences of this word, the most memorable night was the one in which God delivered his people from slavery (Ex 11:4; 12:12, 29). It is annually recalled in the passover. Instructive, in this connection, are the three days and three nights of I Sam 30:12. Verse 13 plainly says, "Today is the third [day]." Therefore it may be concluded that the expression is a stereotyped formula which applies when any part of

three days is involved, not an affirmation that seventy-two hours have expired (cf. our Lord's three days and three nights.)

Elsewhere the night appears as a time of trial, weeping, suffering, and communion with God (Isa 30:29; Job 7:3; Ps 6:6 [H 7]; 77:2 [H 3]; Isa 26:9; Ps 1:2; 42:8 [H 9]; 77:6 [H 7]; 88:1 [H 2]; 92:2 [H 3]; 119:55).

W.C.K.

1112 לִילִית (lilit) *Lilith*.

A female goddess known as a night demon who haunts the desolate places of Edom (Isa 34:14). The ruin of Edom is so complete that only wildcats, satyrs, and Lilith will stay there.

In late rabbinic literature, she is depicted as a creature with wings and long, flowing hair. No doubt she personifies the night or sunset.

In Ugaritic literature she receives sacrifices (UT 23:7) and is invoked in a hymn (UT 104) which calls her "the veiled bride" (*kl̄t.mk[kl̄mt]*) and "our lady" (*bltn*). The former epithet she shares with the Babylonian goddess Ishtar.

Actually, these night spirits are to be correlated with the male *Lilis*. This masculine form covers both male and female genders, as explicitly stated in one of the many references contained in the Aramaic Magical Bowls (see Cyrus H. Gordon, *Archiv Orientalni*, 6:322). She appears as *La-le* in Linear A and as *lly* in a Phoenician incantation from Arslan Tash. Isaiah in his reference does not encourage worship or respect for this demonic deity. The name may be used symbolically to depict a desolation. (Cf. כַּנְב "screech owl.")

Is it not possible also that what was a night demon in the pagan culture was just a night creature (so נִיב), perhaps a bat or owl, in Israel? The pagan with his animism fills realities with spirits. Cf. Hebrew *reshep* "pestilence" with Ugaritic *rshp* the "god of pestilence" and Hebrew *yām* "sea" with Ugaritic the "god who is Prince Sea." So *lilit* might have been a real creature demonized in the surrounding culture.

Bibliography: Leuillet, René and Xavier Léon-Dufour, "Night," in DBT, pp. 346-47. For a picture of Lilith, see Henry Frankfort, *Art and Architecture of the Ancient Orient*, 1958, pl. 56, p. 56.

W.C.K.

1113 לִישׁ (liš) *scorn*.

Derivatives

- 1113a לִצְוִן (*lāṣōn*) *scorning* (Prov 1:22). Occurs in phrase 'anshē lāṣōn "men of scorning," i.e. scorners in Isa 29:8; 28:14.

- 1113b מְלִיצָה (*m'lišā*) *satire, mocking poem* (Hab 2:6), *figure, enigma* (Prov 1:6).

Fools scorn and mock at sin (Prov 14:9) and judgment (Prov 19:28). The scorner (Qal participial form) himself may be described as proud and haughty (Prov 21:24), incorrigible (Prov 9:7), resistant to all reproof (Prov 9:8; 15:12), and hating any rebuke (Prov 13:1). Wisdom and knowledge easily elude him (Prov 14:6).

So despicable is the scorner that he may be labelled as odious to all men (Prov 24:9). Therefore he must be avoided (Ps 1:1) by all who would live godly lives. Further, he should be punished by hitting so that the easily persuaded naive fool may benefit from the lesson (Prov 19:25; 21:11). One good way to remove contention from a group is to eject the scorner, and then "strife and reproach will cease" (Prov 22:10). A prepared judgment awaits all such scorners (Prov 19:29), for their trademark of life has been "to delight" in their scorning (Prov 1:22). They shall be brought to nothing and consumed (Isa 29:20).

That the particular type of wickedness of the scorner is pride is suggested by Prov 3:34. Here the scorner is contrasted with the humble. In this verse the LXX renders "scorner" by "proud" which is followed in the NT Jas 4:6 and I Pet 5:5. Cf. Prov 21:24. Dahood points out a parallel of this word with "evil" in the Karatepe I inscription (*Psalms*, I, in AB, p. 2).

Among the various mockers and scorners are wine (Prov 20:1), the proud (Ps 119:51), the king of Samaria's henchmen (Hos 7:5), and Job's friends (16:20).

As a Hiphil participle, the word means an interpreter, such as Joseph used to fool his brothers (Gen 42:23). The interpreters in Isa 43:27 are the teachers of Israel, God's priests and prophets who have sinned by refusing to give out God's word as he first gave it. In II Chr 32:31, the word represents ambassadors or representatives of Babylon.

The most interesting text is Job 33:23. Elihu speaks of God graciously teaching men through the discipline of suffering the more perfect path of the Lord. Then God sends an angel, i.e. a messenger otherwise known as an interpreter, ambassador, or even a mediator to show man what is right.

W.C.K.

1114 לִישׁ (lysh). *Assumed root of the following.*

- 1114a לָיִשׁ (*layish*) *lion*. See *labi* for other words for "lion."

- 1115 לָקַד (*lākad*) *capture, seize, take*.

Derivatives

- 1115a לָקַד (*leked*) *a taking, capture*. Occurs only in Prov 3:26, in phrase *w^sshāmar ragl^{kā} millaked*.
- 1115b מָלְכֶדֶת (*malkōdet*) *a catching instrument, i.e. a snare, trap*. Occurs only in Job 18:10, in phrase *mal-kūdtō 'ālē nātīb*.

Most of the 121 uses of *lākad* deal with men capturing or seizing towns, men, spoils, and even a kingdom (I Sam 14:47). It is used figuratively of the entrapment of men who are caught in snares of all sorts laid by their enemies (Jer 5:26; 18:22; Ps 35:8). In Prov 5:22 the wicked is captured with the cords of his own sins. Likewise, in Ps 9:15 [H 16] the heathen are seized in the very net which they hid to capture others. They are captured by their pride, haughtiness, and the words of their lips (Ps 59:12 [H 13]; Prov 6:2; 11:6).

This word also serves as a figure of divine judgment. The Stone of Stumbling will cause many to stumble, fall, be broken, be ensnared, and be captured (Isa 8:15). When God shakes the foundations of the earth, just prior to the Millennium ("many days" of Isa 24:22), the ungodly shall be seized in the trap (Isa 24:18) as were those who drunkenly mocked the prophet's message (Isa 28:13). When God moves in judgment, husband and wives (Jer 6:11), scribes and wise men (Jer 8:9) along with Moab (Jer 48:7, 44) will be included.

Others are ensnared by a woman (Eccl 7:26) or are caught in the "cords of affliction" (Job 36:8).

W.C.K.

1116 לָמַד (*lāmad*) *learn* (Qal), *teach* (Piel).

Derivatives

- 1116a לָמוּד (*limmūd*) *taught*.
- 1116b מָלְמַד (*malmād*), מְלַמֵּד (*malmēd*) *oxgoat*.
- 1116c תַּלְמִיד (*talmid*) *scholar*.

As one of the twelve words for teaching in the OT, *lāmad* has the idea of training as well as educating. The training aspect can be seen in the derived term for "oxgoat," *malmēd*. In Hos 10:11 Ephraim is taught like a heifer by a yoke and goad. The Ugaritic *lmd* means "learn/teach" and *lamādu* means "learn" in Akkadian.

The principle use of this verb is illustrated in Ps 119. Here is repeated the refrain, "Teach me thy statutes" or "thy judgments" (vv. 12, 26, 64, 66, 68, 108, 124, 135, 171). At the request of king Jehoshaphat, a group of men went out and taught the book of the Law in the cities of Judah (II Chr 17:7, 9).

While Greek uses two different words for "to learn" (*manthanō*) and "to teach" (*didaskō*), each having its own content, goal, and methods,

Hebrew uses the same root for both words because all learning and teaching is ultimately to be found in the fear of the Lord (Deut 4:10; 14:23; 17:19; 31:12, 13). To learn this is to come to terms with the will and law of God.

In other instances, men are trained in ways of war (I Chr 5:18) sometimes by the use of song (Ps 60: English heading [H 1]; Jud 3:2; Song 3:8). Micah envisions a time when men will no longer learn warfare (4:3; Isa 2:4).

No one, however, has taught the Lord or acted as his counselor (Isa 40:14). Rather, anyone who knows anything has learned it from him, the source of all truth.

limmūd. *Taught.* The taught ones in Isa 8:16 are the Lord's disciples who know his law. The Servant of the Lord, however, has the tongue and ear of the learned (Isa 50:4). Therefore all Israel's children await the messianic era with joy, for all will be taught by the Lord (Isa 54:13).

talmid. *Scholar.* Only one OT passage, I Chr 25:8, uses this word. There "the small and the great, the teacher and the scholar" are included in the selection of the twenty-four divisions of priests. In rabbinical times, the teacher of the law was called the *talmid* Rabbi and his pupils were known as *talmidim*, i.e. apprentices. Yet in another sense, all Israel were *talmidim*, apprenticed to the *torah* of God. The Jewish Talmud gets its name from this root.

malmēd. *Oxgoat.* Judges 3:31 is the only passage which notes that Shamgar slew (or vanquished? cf. *nākā*) six hundred Philistines with this iron-tipped instrument attached to a long shaft used to goad the ox as it plows. Metal weapons were scarce because the Philistines held a corner on the market (I Sam 13:19-22), hence the amazing deliverance which God granted by the hand of this otherwise unknown judge.

W.C.K.

לָמוּ (*l'mō*). See לָ, no. 1063.

לָמוּד (*l'mūd*). See no. 1116a.

לֹא' (*lōa'*). See no. 1098a.

- 1117 לָעַב (*lā'ab*) *jest*. Occurs only in the Hiphil, in II Chr 36:16, "they mocked God's messengers" (NIV).

- 1118 לָעַג (*lā'ag*) *mock, deride*.

Derivatives

- 1118a לָעַג (*lā'ag*) *mocking, derision*.

- 1118b לָעַג (*lā'ēg*) *mocking, adjective*.

Occurs only in Ps 35:16, and possibly Isa 28:11.

Among the seven Hebrew terms for blasphemy (see below) and slander is this one, occurring eighteen times. Various subjects of this verb indicate its range of meaning.

The wicked mock the poor and thereby insult their divine Maker (Prov 17:6). Their wicked eyes mock their fathers (Prov 30:17). They delight in laughing at such servants of God as Job (Job 21:3), Jeremiah (Jer 20:7), Asaph (Ps 80:6 [H 7]), Nehemiah (Neh 2:19), the Jews (Neh 3:33), and Hezekiah's mailmen (II Chr 30:10).

Men who mock God's servants and message will ultimately be mocked in turn: delivered into the captivity of people who speak with what seems to be a stammering or mocking tongue (Isa 33:10).

The source of this kind of judgment is God. The classic text is Ps 2:4. The Lord will mock those rebels who say of God the Father and his Messiah, "Let us break off their bands and cast off their cords." God will laugh at the heathen; he will have all of them in derision (Ps 59:8 [H 9]). Likewise, Wisdom joins God in laughing at the calamities of the coarse and hardened fool; she mocks when their fear comes (Prov 1:26) just as "the virgin, the daughter of Zion" mocked the proud, boastful Sennacherib (II Kgs 19:21; Isa 37:22), when God delivered her.

la'ag. Mocking, derision. The Psalmist complains that God has made Israel a reproach (*herpā*), a scorn (*qeles*), and a derision to everyone around them (Ps 44:13 [H 14]; see also Ps 79:4). The same is said of the two sisters Samaria and Jerusalem: "Thou shalt be laughed to scorn and had in derision" (Ezk 23:32). This derision which is directed at Jerusalem in particular will come from the nations that surround her (Ezk 36:4).

Compare *lāshan* "to speak against," *rāgal* "spy out," "slander" (going about as a busybody), *rāgan* "to murmur," to backbite," *dibbā* "defamation," *šāhaq* "to laugh at," "deride," *qālas* "to scoff at."

The phrase *halla'ag hashsha'ananim* "the scorn of the nonchalant" (Ps 123:4) is not as "impossible" grammatically as Briggs thought it was; as Dahood has reminded us, it needs no emendation. The article is often present on the construct state in Phoenician and Hebrew construct chains. These mockers are either the heathen opposition or Israelite rogues whose air of independence makes them despicable to God and men.

The most controversial passage (at least in its application in the NT, I Cor 14:21) is Isa 28:11. God will speak to Israel with "stammering lips," i.e. in captivity the language of the foreign captors will appear to be unintelligible gibberish. Since Israel had regarded the prophetic word as

so much nonsensical talk, God would pay them back in their own currency in Assyria. Such is the import of Hos 7:16. In return for the "rage," i.e. the defiant speeches of Israel's princes who openly disavowed the Lord, God would let the same Egyptians to whom they appealed for help turn on them in derision. One turncoat deserved another!

W.C.K.

1119 לָעַז (lā'az) *speak indistinctly, unintelligibly.* Occurs only in Ps 114:1, 'am lō'ēz "a people speaking unintelligibly."

1120 *לָעַט (lā'at) *swallow (greedily).* Occurs only in the Hiphil, in Gen 25:30, hal'itēni "let me swallow."

1121 לָעָנָה (la'ānā) *wormwood.*

לָעַט (lā'a'). See no. 1099.

1122 לָפַד (lpd). *Assumed root of the following.*

1122a לָפִיד (lappid) *torch.*

The flaming torch, like the pillar of fire, the lamp in the tabernacle, and the glory of God, signified the holy, awesome presence of the Lord moving among his people. Thus God moved as a flaming torch between the divided pieces to confirm his covenant with Abraham (Gen 15:17) and appeared in flashes of lightning on Sinai (Ex 20:18; cf. Ezk 1:13). When Zion is finally delivered, her salvation will be like a burning lamp (Isa 62:1) and her governors like a torch of fire (Zech 12:6).

W.C.K.

לָפִיד (lappid) See no. 1122a.

לִּפְנֵי (lipnē). See no. 1780b.

1123 לָפַת (lāpat) *twist, turn, grasp with a twisting motion.*

לָצוֹן (lāšōn). See no. 1113a.

1124 לָקַח (lāqah) *take (get, fetch), lay hold of (seize), receive, acquire (buy), bring, marry (take a wife), snatch (take away).*

Derivatives

1124a לָקַח (leqah) *learning.*

1124b מַלְקָוָה (malqōah) *I, booty, prey.*

1124c מַלְקָוָה (malqōah) *II, jaw.* Occurs only in Ps 22:16 in phrase ūl' shōnī mūdabq malqōhāy "my tongue is made to cleave to my jaws (i.e. gums)."

1124d מֶלֶקְחַיִּים (melqāhayim) *tongs, snuffers.*

1124e מִקְחָה (*miqqāh*) *a taking, receiving*. Occurs only in II Chr 19:7, *miqqah-shōhad* "a taking of a bribe."

1124f מַקְחָה (*maqqāhā*) *ware*. Only in Neh 10:32, *hammaqqāhōt* "(their) wares."

This root is used over a thousand times in the OT, often taking its nuance from the words with which it is used. As in English one can take vengeance (Isa 47:3) or receive disgrace (Ezk 36:30), and God receives (accepts) prayer in Ps 6:10 where it is used in parallel with *shāma'* "to hear" (cf. Job 4:12). A similar parallel exists between *lāqah* "snatch" and *gānab* "steal" (cf. Job 4:12; Jer 23:30–31; Jud 7:2). In the passive stems (Pual and Niphal) the usage "be taken, carried away" (I Sam 4:11) or "be brought" (Gen 2:15) suggests that such "taking" is against the will of those taken. These basic meanings are also found in postbiblical Hebrew, Aramaic, Moabite, Phoenician, Arabic, Ugaritic, and Akkadian.

In addition to the common meanings of *lāqah* there are a number of extended uses, some of which have theological significance. The "take" aspect of the word may extend, in some contexts, into the meaning "select" and/or "summon." According to Deut 4:34, God "took" (selected) Israel from among the nations (cf. also 4:30; I Kgs 11:37; Josh 3:12; 4:2). In Job 41:4 [H 40:28] the leviathan is "taken" (selected) as God's permanent vassal who has a binding covenant with him. "Summon" would fit equally well in some of these contexts. BDB (pp. 543, 546) finds "summon" for *lāqah* in Num 23:11, Jud 11:5, and I Sam 16:11. One should be careful with the semantics here because "take or fetch" also makes sense, but this is true of many of the nuances of this word. An interesting but vexing usage of this type occurs in Ps 75:2 [H 3]. The translations differ considerably. The KJV renders it, "When I shall receive the congregation," RV "When I shall find the set time," RSV "I appoint," NASB "I select." M. Dahood's "summon" makes good sense here, "I will summon the assembly, I will judge with equity" (*Psalms*, II, in AB, p. 209).

Twice Jeremiah uses *lāqah* for the "taking up" or "use" of words. In 23:31 he speaks against the false prophets who "use" (RSV, NASB) their tongues as if the Lord had inspired them. In 29:22 the exiles "use" a curse formula based on the demise of certain false prophets.

Fire from God is described with a reflexive use of the root *lāqah* in Ex 9:24 and Ezk 1:4. The explanation that the fire seizes, enfolds upon itself is not entirely satisfactory.

Perhaps the most theologically interesting usage of *lāqah* centers around the two clear con-

texts where the word describes bodily assumption into heaven. We refer to Enoch's disappearance when God "took" him (Gen 5:24) and Elijah's assumption in a whirlwind (II Kgs 2:3, 10–11). In the light of such physical assumption, it is not unreasonable to question whether there may be other similar uses. Elijah, whose body was assumed, used *lāqah* to refer to death at the hands of his enemies "they seek my life, to take it" (I Kgs 19:10, 14; cf. also Prov 24:11). Just the opposite meaning appears in other places where God is the subject and a rescue from dying or distress is in mind. So Ps 18:16 [H 17] says, "He sent from on high, he took me; he drew me out of the deep waters." But there are at least three contexts where more than merely saving a person's life appears to be in the mind of the Psalmist. Psalm 49 presents a stark contrast between the end of the wicked and the end of the righteous. The wicked "die like beasts" (vv. 12 [H 13], 20 [H 21]) without any hope of immortality, "that he should live forever" (v. 9 [H 10]). The Psalmist, however, has a triumphant faith that "God will redeem him from the power of Sheol, for he will receive (*lāqah* take, snatch) me" (v. 15 [H 16]). If the Psalmist is talking about being rescued from death for a few years when he knows he too must die like the beasts, then the Psalm has no point. Psalm 73: 23–25 [H 24–26] also contrasts the wicked with the righteous and once again a faith that reaches beyond this life is centered around the word *lāqah*. "You will guide me with your counsel and afterwards receive (take) me to glory" (v. 24 [H 25]).

leqah. Teaching, learning, persuasiveness. This word occurs nine times, in four of which it is the object of *yāsap* "to add more, increase" (Prov 1:5; 9:9; 16:21, 23). As with the root meaning "take, seize," the "grasping" is with the mind and hence "perceiving" is the nuance prominent in this derivative. Note some of the words with which it is paired: *binā* "understanding" (Isa 29:24), *hākām* "wisdom" (Prov 1:5; 9:9) and *tôrā* "instruction, law" (Prov 4:2). In Prov 7:21 *leqah* means "the persuasiveness" of a harlot. But in Prov 16:21 the word is used in a good sense of a teacher's persuasiveness.

Bibliography: THAT, I, pp. 875–78.

W.C.K.

1125 לָקַט (*lāqat*) *glean, pick, gather up*.

Derivatives

1125a לָקַט (*leqet*) *gleaning*.

1125b יָלְקוּט (*yālqūt*) *wallet, bag*.

The objects of this verb vary as much as the subjects, e.g. they gather stones (Gen 31:46), manna (Ex 16:4–5, 26), money (Gen 47:14), grain (Ruth 2:3, 7; Isa 17:5), fallen grapes (Lev 19:10),

arrows (I Sam 20:38), firewood (Jer 7:18), food off the ground (Jud 1:7), or a bunch of ruffians (Jud 11:3). Not only men, but also occasionally animals gathered (food, Ps 104:28).

A theologically important verse is Lev 19:9 (see also 23:22) in which Israel is warned not to reap the corners of their fields or gather the gleanings of [the] harvest. The gleanings were to be left for the poor and the resident alien, as illustrated in Ruth 2:15–18; cf. Lev 19:10; 23:22*b*.

Israel's final restoration to her land is depicted by Isaiah under the figure of grains picked up after being threshed by the Lord's judgment: "And you shall be gathered one by one, O you sons of Israel" in that day (Isa 27:12).

leqet. *Gleaning.* Only found twice (Lev 19:9; 23:22), as discussed above.

yalqūt. *Wallet, bag.* This hapax legomenon is found in I Sam 17:40. It is the word for David's shepherd's bag into which he had placed five smooth stones. So far the word is unattested elsewhere.

W.C.K.

1126 לָקַח (*lāqaq*) *lap, lick.*

1127 לָקַח (*lqsh*). *Assumed root of the following.*

1127a לָקַח (*leqesh*) *after growth, i.e. spring crop.* Occurs only in Amos 7:1.

1127b מַלְקוֹשׁ (*malqôsh*) *latter rain.*

1127c לָקַח (*lāqash*) *take the aftermath, i.e. take everything* (Job 24:6). Probably denominative from *leqesh*.

malkôsh. *Latter rain, spring rain.* The latter rains occur during March and April, while the former rains (q.v.) begin the season of rain, usually including severe thunderstorms, in the second half of October to November (or even as late as January in a bad year). The latter rains of March and April are desperately needed for the coming harvest, hence Job's description of his miserable comforters in a marvelous simile (Job 29:23). If this rain fails, it is obvious that God is displeased with his people: "I also withheld the rain from you when there were only three months to harvest" (Amos 4:7; Jer 3:3).

But if all is well between God and his people, then "he will give the rain for [their] land in its season, the early rain and the latter rain so that [they] might gather in [their] grain and wine and oil" (Deut 11:14; Jer 5:24). When God returns to his people, it is like the coming of the latter and former rains upon the earth, proclaims Hosea (6:3). God invites men to ask him for rain at the time of the latter rain and he will send it copiously (Zech 10:1). In fact, when men repent, one of

God's signs of immediate blessing is the rain (Joel 2:23).

Proverbs uses the appearance of the spring clouds preceeding the latter rains as a simile of the king's favor (Prov 16:15).

Bibliography: Baly, Dennis, *Geography of the Bible*, Harper, 1957, pp. 51–52, 99.

W.C.K.

1128 לָשָׂה (*lshd*). *Assumed root of the following.*

1128a לָשָׂה (*lāshād*) *juice, juicy or dainty bit* (Num 11:8; Ps 32:4).

לָשׁוֹן (*lāshôn*). See no. 1131a.

1129 לִשְׁכָּה (*lshk*). *Assumed root of the following.*

1129a לִשְׁכָּה (*lishkā*) *room, chamber.*

Most frequently this word designates the three tiers of rooms or cells allocated to priests, singers, and keepers of the temple (Ezk 40:17, 38, 44–46; 41:10; 42:1, 4, 5, 7, 8, 11, 12). During the time of Ezra and Nehemiah, the term was used of storerooms (Ezr 8:29; Neh 10:38–40) and personal chambers (Ezr 10:6; Neh 13:4, 5, 8, 9.) In Jer 36:12, 20, 21 it refers to the scribe's room in the palace.

One of the most theologically important passages is Jer 35:2, 4. Jeremiah was commanded to take the Rechabites to a room connected with Solomon's temple and offer some wine to them. They went but refused the wine out of deference and obedience to an old command given by one of their forefathers. Jeremiah learned that obedience to God was indeed possible if men could steadfastly obey merely human laws.

In Samuel's day there was another room connected with the high place (*bāmā*) where he partook of a sacrificial meal with Saul, king-elect (I Sam 9:22; cf. v. 19).

nishkā. *Chamber.* A late word, doubtless a by-form, with a similar-sounding letter interchange (l and n). It was used also of rooms for individuals (Neh 3:30; 13:7) and storerooms (Neh 12:44).

W.C.K.

1130 לֶשֶׁם (*leshem*) *a precious stone in the high priest's breastplate* (Ex 28:19; 39:12). NIV, RSV, NASB translate "jacinth."

1131 לָשָׁן (*lāshan*) *slander.* Denominative verb.

Parent Noun

1131a לָשׁוֹן (*lāshôn*) *tongue.*

Only two examples of the denominative verb appear. Psalm 101:5 warns that God will silence all who privately slander their neighbors and

Prov 30:10 cautions against disparaging a slave to his master lest the speaker be ill-spoken of in turn.

lāshôn. Tongue. This word occurs 117 times in the OT. The God-given organ of communication with one's fellowman and God, the tongue is shown to be at once the source of much good and evil. A few passages refer to the physical tongue, e.g. of men lapping (Jud 7:5), thirsting (Lam 4:4), and dumb (Job 29:10; Ps 137:6; Ezk 3:26) or of animals such as dogs (Ex 11:7), crocodiles (Job 40:25), and adders (Job 20:16). By extension, it carries geographical meaning such as the "tongue" of land which protrudes into the Dead Sea (Josh 15:2, 5; 18:19; Isa 11:15) or a tongue-shaped wedge of gold (Josh 7:21, 24).

However, most attention is focused on the misuse of the tongue, Ps 52 (especially vv. 2, 4 [H 4, 6]) being the classical teaching passage. Here Doeg, the Edomite, used his tongue deceitfully to lead Saul to destroy the priestly house of Ahimelech (I Sam 22:7ff.). But Ps 51 stands as an example of the proper use of the tongue, singing of God's righteousness after experiencing cleansing from sin (v. 14 [H 16]; see also Ps 126:2).

The tongue is the agent of many evils: subversion (Prov 10:31), slander (Prov 17:4), flattery (Ps 5:9 [H 10]), mischief and trouble (Ps 10:7), arrogance (Ps 12:4 [H 5]), hurt to others (Ps 52:2 [H 4]), and falsehood (Prov 17:4; 6:17; 12:19; 21:6; 26:28; Ps 78:36; 120:2-3; Mic 6:12). It can be like the tongue of a viper (Ps 140:3 [H 4]), a bow or arrow (Jer 9:3 [H 2], 8 [H 7]), a sharp sword (Ps 57:4 [H 5]; 64:3 [H 4]; Hos 7:16), a razor (Ps 52:2 [H 4]). The tongue can be used as a weapon (Jer 18:18) because "life and death are in the power of the tongue" (Prov 18:21). All such use of the tongue is ultimately directed against God, for while it violates mostly the ninth commandment, it is accompanied by an arrogance and boasting that usurps the place of God (Hos 7:16). God will teach all who mock his message and in drunken stupor complain about the prophets' wearisome "watch your *p*'s and watch your *q*'s," with "another tongue": foreign exile

(Isa 28:11; cf. Jer 5:15, "a nation whose language you do not know").

Most presumptuous of all are the false prophets (Jer 23:31). They cry "peace, peace" in a move to seek popularity (23:16ff.). But they fail to distinguish their own dreams from real prophecy (23:28ff.), and they plagiarize and pervert the burden of the Lord (23:36ff.). Contrariwise was the reluctance of Moses who complained that he had a heavy tongue (Ex 4:10) even though Stephen testified that he was mighty in words and deeds (Acts 7:22). Moses' words did not, then, refer to a speech impediment, but rather to a certain type of quickness in debate. God's solution was a promise to be with his tongue and to send him another tongue, Aaron.

The tongue of a righteous man, however, is valued as highly as choice silver (Prov 10:20). When wise men speak they bring health to their listeners (Prov 12:18); they use knowledge in a proper manner (Prov 15:2). Wisdom and kindness characterize the tongue of the virtuous woman (Prov 31:26). Not a thought, answer, or word on the tongue is unknown to the Lord (Ps 139:4; Prov 16:1-2; II Sam 23:2).

In the future day of the Lord, the deceitful tongue will not be found among the remnant (Zeph 3:13); even the tongue of the dumb will shout for joy (Isa 35:6).

W.C.K.

1132 לַתַּח (lth). Assumed root of the following.

1132a מִלְתָּחָה (meltāhâ) wardrobe, wearing apparel. Occurs only in II Kgs 10:22.

1133 לֶתֶךְ (letek). Assumed root of the following.

1133a לֶתֶךְ (letek) barley measure of uncertain size thought to be half an homer—five ephahs. Occurs only in Hos 3:2. (ZPEB V, p. 917.)

ח

מְאֹבֹס (ma'ābūs). See no. 10b.

1134 מְאֹד (m'd). Assumed root of the following.

1134a מְאֹדָּה (m'e'ōd) *exceedingly, much, force, abundance.*

This term is used three hundred times in the OT, mainly as an adverb. Infrequently, it is used as a substantive, e.g. Deut 6:5, "You shall love the Lord your God with your whole heart, with your whole soul, and with your whole strength." Thus it was said of King Josiah, the likes of whom Israel had never seen before, that he turned to the Lord with his whole heart, soul, and strength, according to the whole law of Moses (II Kgs 23:25).

It is found in many combinations, all expressing the idea of exceeding (e.g. Gen 1:31, in which the Creator calls his creation exceeding good) or very greatly (e.g. Ex 1:7, where this term is used twice in describing the prolificacy of the Israelites under the hand of God).

McBride observed: "The three parts of Deut 6:5: *lēbāb* (heart), *nepesh* (soul or life), and *m'e'ōd* (muchness) rather than signifying different spheres of Biblical psychology seem to be semantically concentric. They were chosen to reinforce the absolute singularity of personal devotion to God. Thus *lēbāb* denotes the intention or will of the whole man; *nepesh* means the whole self, a unity of flesh, will, and vitality; and *m'e'ōd* accents the superlative degree of total commitment to Yahweh." (See bibliography.)

The NT struggles to express the depth of the word *m'e'od* at this spot. In the quotation in Mk 12:30 it is rendered "mind and strength," in Lk 10:27 it is "strength and mind," in Mt 22:37 simply "mind."

Bibliography: TDOT, IX, pp. 617–37.

W.C.K.

1135 מֵאָה (mē'ā) *hundred.*

This noun occurs 583 times, usually in statements reporting ages of persons, census results, or the measurements of various objects.

The longevity of the antediluvian and postdiluvian fathers (Gen 5 and 11) has caused much comment. However, it is clear that these hundreds of years (the maximum being 969 years, reached by Methuselah) were real years, for God intended to show to all that mankind was built for immortality. Nevertheless, the effects of sin began to take their toll on man's physical being. Thus his life span grew shorter and, consequently, the period of procreation. By Ab-

raham's time it was thought to be impossible for a one hundred-year-old man to father a child (Gen 17:17). But God miraculously provided Isaac, the child of promise.

A significant prophecy was given in Gen 15:13. Israel was to be in bondage for four hundred years and indeed they were. According to Ex 12:40, the exact time was four hundred and thirty years. If there is a round number here, it is in Gen 15:13.

In one place it appears probable that the word "hundred" (with consonants *m'h*) is a mistake for "cubit" (with consonants *'mh*). The porch of Solomon's temple is said to be 120 (supposedly cubits, so RSV). But this would be 180 feet, an impossible height. Some MSS of the LXX here read 20 cubits, the same height as the holy of holies. It seems probable that there has been a metathesis of the letters, and some LXX witnesses have preserved the original reading. The same metathesis occurs in a Qere/Kethib variation in Ezk 42:16.

An eschatological passage, Isa 65:20, says that in the new heavens and new earth "the child shall die an hundred years old, but the sinner being an hundred years old shall be accursed." Whether verses 20–25 are a part of the description of the new heavens and new earth, or are a subparagraph as Buswell claims (*Systematic Theology*, II, p. 517), is debatable. E. J. Young, however, argues that death will not deprive either the young child or old man of his days (Isa 65:20a). Neither will longevity be unusual, for a person who dies at the age of one hundred years will be considered just a baby or a sinner who has been cut down very early. Cf. NIV: "He who dies at a hundred will be thought a mere youth; he who fails to reach a hundred will be considered accursed."

מֵאוּי (ma'āway). See no. 40c.

מֵאוּם (m'e'ūm). See no. 1137a.

1136 מְאוּמָה (m'e'ūmā) *anything.*

Used thirty-two times, usually in negative sentences. Ecclesiastes 7:14 has God setting prosperity alongside adversity so that men can find nothing apart from himself (cf. 3:11). Balaam protests in Num 22:38 that he has no power to do

1137 מָאֵם (m'm)

anything apart from the word of God. Often *m'ûmâ* is a euphemism for something bad, such as the thing Abraham was about to do to Isaac (Gen 22:12, "Do not do anything to the lad,") or the thing Ammon waited to do to Tamar (II Sam 13:2, "He thought it difficult to do anything to her").

מָאֵמָשָׁה (ma'āmāšā). See no. 117e.

מָאֵמָר (ma'āmār). See no. 118e.

1137 מָאֵם (m'm). Assumed root of the following.

1137a מָאֵם (m'ûm), מִום (mûm) *defect, blemish*.

This word denotes any physical defect, such as was not found in Daniel and his three friends (Dan 1:4ff.) and in the man who would be God's priest (Lev 21:17ff.), or any moral defect (Job 31:7; 11:15; Deut 32:5). The epitome of unblemished men was Absalom (II Sam 14:25); of women the Shulamite maiden (Song 4:7).

Animals offered as sacrifices to God had to be without spot or blemish (Lev 22:20, 21, 25; Num 19:2; Deut 15:21; 17:1). To offer anything less would be to disobey God and disregard the obvious teaching that man's substitute for his sins had itself to be totally blameless.

W.C.K.

1138 *מָאֵן (mā'ēn) *refuse*. Used only in the Piel.

Derivatives

1138a מָאֵן (mā'ēn) *refusing*.

1138b מָאֵן (mē'ēn) *refusing*.

Especially significant are those occasions when Pharaoh (Ex 4:23; 7:14; 10:3) or Israel refused to obey God's commands. They simply "refused to walk in [God's] law" (Ps 78:10). Israel also refused to repent (Hos 11:5; Jer 3:3; 8:5) or to receive instruction (Jer 5:3; 9:6 [H 5]; 11:10; Zech 7:11). Only once is God ever said to have refused: he refused to give Balaam permission to curse Israel (Num 22:13).

mā'ēn. Refusing. This verbal adjective appears four times in the OT, three times in the phrase 'im-mā'ēn 'attā l' shallēah, of Pharaoh's

refusal to release Israel from bondage (Ex 8:2 [H 7:27]; 9:2; 10:4). It is also used of Zedekiah's refusal to surrender to the Babylonians (Jer 38:21).

mē'ēn. Refusing. Only found in Jer 13:10, of rebellious Israel who kept on refusing to listen to God's word and worshipping other gods.

W.C.K.

1139 מָאֵס (mā'as) *I, reject, despise*.

Derivative

1139a מָאֵס (mā'ôs) *refuse*. Occurs only in Lam 3:45, "offscouring and refuse you make us."

Examination of some seventy-three uses of this verb reveals that men despise the Lord who is among them (Num 11:20) and thus merit God's rejecting them (Hos 4:6). When Israel requested Samuel to appoint a king over them, they rejected the Lord (I Sam 8:7; 10:19).

Wicked men do not despise evil (Ps 36:4 [H 5]); they just reject the knowledge of God (Hos 4:6), the law of the Lord (Amos 2:4; Isa 5:24; Jer 6:19) the word of the Lord (I Sam 15:23, 26; Isa 30:12; Jer 8:9), the righteous decisions of God (Ezk 5:6; 20:13, 16), the covenant made with Abraham (II Kgs 17:15), the statutes of God (Lev 26:15; Ezk 20:24), and the disciplinary chastening of the Lord (Prov 3:11). In fact, they have totally rejected the "Stone" which has now become the "capstone of the building" (Ps 118:22).

Especially reprehensible in God's eyes is Israel's externalized religious practice. God hates and despises their feast days and offerings since they come to him without any genuine affection (Amos 5:21).

God rejects men who do not listen to him (Hos 9:17). However, he will never reject them totally, for that would break his covenant (Lev 26:44). God has chosen the seed of Abraham, his servant, and he will never cast them away (Isa 41:9). In fact, as long as God keeps his covenant with day and night (Jer 33:25) so long will he refrain from rejecting his covenant made with David and Levi (Jer 33:24). He will not despise the seed of Abraham, Isaac, Jacob, and David (Jer 31:37; 33:26). True, Ps 89:38 [H 39] does seem to contradict this strong affirmation by saying God has indeed rejected his anointed (cf. II Kgs 17:20; Jer 6:30; Ps 78:59, 67). This statement, however, refers only to individual participation and not to the abiding promise which remains open to all who will believe.

Bibliography: THAT, I, pp. 879-92.

W.C.K.

1140 *מָאֵס (mā'as) *II, flow, run*. Occurs only in the Niphal (Job 5:7; Ps 58:8).

- מִאֲפֶה (*ma'āpeh*). See no. 143a.
 מִאֲפֵל (*ma'āpēl*). See no. 145e.

 מִבּוֹקָה (*m'būkā*). See no. 214a.

1142 מַבּוּל (*mabbûl*) *flood*.

A technical term reserved for the watery catastrophe which God brought on the earth during the days of Noah. That event was so well known that *mabbûl* usually occurs with the definite article (except in Gen 9:11, 15). *mabbûl* is used only once outside Gen 7-11. Psalm 29:10 says that "the LORD sits upon the flood, indeed, the LORD is enthroned king forever." Instead of Baal, the god of storm and thunder who according to the Ugaritic myths defeated *yam* the sea god, the Lord's voice is heard in the thunder, and it is he who reigns over the destructive forces of nature, in this case the storm so beautifully described in Ps 29.

All attempted etymologies for this word have failed because of linguistic difficulties. A few of the suggestions have been: the Akkadian root *nbl* "to destroy," Akkadian *abūbu* from the alleged *wabūbu* "cyclone," Akkadian *bubbulu*, *biblu*, *bibbulu* "inundation," which is the best suggestion yet. But it also fails since the term is not used in any of the Akkadian flood stories. Hebrew *ybl* "to flow, stream" or *nbl* "waterskin" have also been suggested. But these suggestions are not linguistically supported and appear to be parents to the unwarranted thought that *mabbûl* refers to a "heavenly ocean" or a "heavenly store of water in jars."

While God himself brought the waters of the flood on the earth because of man's sin (Gen 6:17; 7:6), afterward he covenanted never again to destroy the earth with water (Gen 9:11, 15). Thus God's own can be certain that the earth will endure until the desired eschaton comes.

1143 מָג (*māg*) *soothsayer, magician*.

This loan word from Akkadian *maḥḥu* "soothsayer" occurs only twice, and that in one chapter, Jer 39:3, 13. One of Nebuchadnezzar's princes was "Nergal-Sharezer the Rab-mag" (RSV). This was Neriglissar, the husband of Amel-Marduk's sister (the one Jeremiah called Evil Merodach, son and successor to Nebuchadnezzar). Neriglissar killed Evil Merodach and became king in his place.

Nergalsharezer's position was one of high military rank. He was chief soothsayer (*rab māg*) in the operations against Zedekiah during the siege of Jerusalem.

1144 מִגְד (*mgd*). *Assumed root of the following*.

- 1144a מִגְדָּד (*meded*) *excellence*.
 1144b מִגְדָּנָה (*migdānā*) *choice or excellent thing*.

meded. Excellence. Only eight passages in three chapters illustrate the usage of *meded*. It is always an evaluation of the gifts of nature as being choice, excellent or beautiful, and precious. Song 4:13, 15, 16 lauds the excellent fruit; only Song 7:13 [H 14] uses the word *meded* by itself. Deuteronomy 33:13, 14, 15, 16 bless the Lord for the choice things from the heavens, moon, hills, and earth. It appears to be a eulogistic word which sees the beauty of all things as God's gifts to lovers (Song) and to the tribes of Joseph (Deut).

- 1146 מָדַד (*mādad*) *measure*.

Derivatives

- 1146a מָדַד (*mad*) *measure*.
 1146b מִדְּדָה (*middā*) *measure, measurement*.
 1146c מִמָּדַד (*mēmādad*) *measurement*. Occurs only in Job 38:5.
 1146d מִדְּוֹן (*mādōn*) *stature*. Occurs only in II Sam 20:21.

Usually *mādad*, which occurs fifty-three times, refers to measuring lengths or distances. It is used heavily in Ezk 40–47, which supplies measurements for the millennial temple which, according to many, is to be built during the messianic era (see also Zech 2:6).

But there are imponderables which are beyond the capacities of man's measurements—like the oceans of the earth. But God can measure these easily (Isa 40:12). He can also count the multitudes of future Israelites, although their number would appear to be as the sand of the sea (Hos 1:10 [H 2:1]). The innumerable stars of heaven and the sands of the sea indeed become models of the increase of Jacob and the security they enjoy under God (Jer 33:22; 31:27).

As God will increase the people, so he has measured out to them certain territories (Ps 60:6 [H 8]; see also 108:7 [H 8]). As he prepares his judgment, he stands and measures the nations with his discerning eye (Hab 3:6).

mad. *Measure*, and then *what is measured, a cloth garment*. The portion of Judah's measure (used figuratively) from the Lord is to be scattered because they have forgotten their Lord (Jer 13:25). This word usually denotes a priest's garment (Lev 6:3), a soldier's fighting garb (I Sam 17:38; 18:4; II Sam 20:8), or just an outer garment (I Sam 4:12; Jud 3:16). It is also used figuratively, as in Ps 109:18, which says that some men use cursing for their outer clothes. The simile is re-

flected in Ugaritic UT 16:Text 75:11:47–48 "like clothing was the abuse of his brothers, like vesture the abuse of his kinsmen" (after M. Dahood).

middā. *Measure, measurement*. The measuringline used to measure God's future dwelling place (Zech 2:5; Ezk 40:3, 5; 42:16–19), it was also used to take the measurement of the walls of Jerusalem (Neh 3:11, 19ff.), a house of size or a man of size (Jer 22:14; I Chr 11:23; 20:6), and the size of the tabernacle curtains (Ex 26:2, 8 etc.). It is of some interest to note that the tabernacle curtains were four cubits (six feet) wide—just the width of a standard Egyptian loom. The word is used of time in Ps 39:4 [H 5]: "Lord make me to know mine end and the measure of my days, what it is; that I might know how frail I am." Note also its use of God's wisdom, the measure of which is longer than the earth and broader than the sea (Job 11:9).

- 1149 מָה (*mā*) *what?*

This frequently-occurring interrogative pronoun is most significant when associated with the word "name." "What is your name?" is not a question which inquires after a person's family or personal name; it endeavors to find what character or quality lies within or behind the person. To ask for simple identification, one would say in Hebrew, "Who (*mi*) are you?"

Thus, the "man" who wrestled with Jacob asked him in Gen 32:27 [H 28], "What is your name?" When he responds, "Jacob" (supplanter), the "man" (called an angel in Hos 12:4 [H 5]) says that it is now "Israel" (Prince of God).

In Prov 30:4, Agur asks who has ascended to heaven and then descended? Who has gathered the wind in his fists? Who has bound the waters in a garment? Who has established the ends of the earth? What is his name? What is his son's name? The speaker is not asking for God's name. Rather, he seeks to know its character and meaning.

Accordingly, the question which Moses anticipates from his enslaved brethren, "What is his name?" (Ex 3:13), corresponds to our discussion above. The Israelites will wish to know Yahweh's character and qualities which will enable him to prevail over the difficulties they face. So Moses reveals just what the name Yahweh (YHWH) means: He is the God who will dynamically and effectively meet their need.

Finally, notice that God brings the animals to Adam to see "what" he will call them (Gen 2:19). As Motyer says, "Verse 20b indicates that qualitative issues are present" (p. 18, fn. 46). Other significant passages in which *mā* is associated with persons include Ex 16:7-8; Num 16:11; II Sam 9:8; II Kgs 8:13; Job 7:17; 15:14; 21:15; Ps 8:4 [H 5]; 144:3; Song 5:9; Isa 45:10; Lam 2:13; Ezk 19:2. It is associated with impersonal items in ten passages: I Kgs 9:13; Zech 1:9, 19 [H 2:4]; 4:4, 11; 5:6; 6:4; Est 9:26.

W.C.K.

1150 *מָהָה (māhah) *linger, delay*.

This word, in the Hithpalpel stem, occurs nine times. But only in two passages does it carry theological significance. In Ps 119:60 the Psalmist affirms that he has not delayed, but rather hastened to observe God's commandments. Habakkuk 2:3 encourages the prophet to wait for the vision, since it has an appointed time. It may seem to delay, nevertheless it will not tarry, it will come.

מָהָה (m'hūmā). See no. 486a

מָהִיר (māhīr). See no. 1152c.

1151 מָהַל (māhal) *circumcise, weaken*.

The Aramaic "cognate," *m'hal*, means to circumcise, but in Hebrew the word appears only once and that in a figurative sense, "to cut

wine" (Isa 1:22). Keil and E. J. Young point out that this semantic development is paralleled in other sources, e.g. Latin, *castrare vinum* and French, *couper du vin*. So much water has been added to the wine that its character has been weakened. The Aramaic word and the Hebrew (if that also means "circumcise") is doubtless a by-form of the root *mūl* "to circumcise" (q.v.).

1152 *מָהָר (māhar) *I, hasten*, used only in the Niphal and Piel.

Derivatives

1152a מָהָר (mahēr) *I, speedy, swift* (adjective).

1152b מָהָר (mahēr) *II, quickly* (adverb).

1152c מָהִיר (māhīr) *quick*.

1152d מָהֵרָה (m'hērā) *haste*.

The feet of wicked men hasten (*māhar*) to shed blood and practice evil (Prov 1:16; 6:18; Isa 59:7). But God will come and bear prompt or swift witness against their sorcery, adultery, false swearing, poor wages to employees, and poor treatment of the widow, orphan, and stranger (Mal 3:5). To emphasize the swiftness of destruction, Isaiah symbolically names his second child "hasten prey, hurry spoil" (*māhēr-shālāhshāshbaz*, Isa 8:1, 3), for God is now prodding on the Assyrians, the ax in his hand, to accomplish his punishment on Israel. In a later day he would bring that bitter and impetuous nation, Babylonia, to do the same thing (Hab 1:6).

Eliphaz lectured Job that God takes the wise in their own craftiness and that the plans of schemers are dissipated (?) (Job 5:13) only to have God have the first part of his words back on him in Job 42:8 (hence the quotation formula in I Cor 3:19).

This verb usually has an adverbial meaning when it is linked with another verb, e.g. "they quickly forgot his works; they did not wait for his counsel" (Ps 196:13). Distress, however, prompts the prayer, "I am in trouble, hear me speedily" (Ps 69:17 [H 18]; 102:2 [H 3]; 143:7; cf. 79:8).

māhēr I. Hastening, swift, speed. One of the two occurrences of the adjective is important theologically. Zephaniah 1:14 warns that the day of the Lord is very near and it comes with great speed especially for those who are unprepared or

who sigh for it as a panacea for all their troubles (cf. Amos 5:18–20).

māhēr II. Quickly, speedily. God expresses surprise at how quickly men have turned away from him to build the golden calf (Ex 32:8; Deut 9:16; cf. Jud 2:17). If Israel continued to do evil, they would quickly perish altogether from the land (Deut 4:26) and God's anger would destroy them suddenly (Deut 7:4). But if Israel would faithfully follow the Lord, they would quickly destroy the Canaanites in a major sweep through the land (Deut 9:3). Some of the nations, however, would be put out by God little by little so that the land would not be overrun with wild beasts (Deut 7:22; cf. Jud 2:23).

One proverb warns, "Do not go hastily to a debate, you may not know what to do in the end" (Prov 25:8).

māhīr. Quick, prompt. "Do you see a man diligent in his business? He shall stand before kings" says Prov 22:29. In its description of the Davidic throne, Isa 16:5 includes prompt justice as one of its characteristics.

m'hērā. Haste, speed. In Ps 147:15 the word *m'hērā* is used to show that the Lord's word runs swiftly on the earth, while Isa 58:8 promises that in return for acts of mercy to others, one's health will spring forth speedily. Meanwhile, do not fret over evildoers, for they shall quickly be cut down like grass (Ps 37:2).

W.C.K.

1153 מָהָר (māhar) II, *acquire by paying a purchase price.* Denominative verb.

1153a מוֹהָר (mōhar) *wedding money.*

The verbal form occurs only twice, in Ps 16:4 and Ex 22:16 [H 15]. The text of Ps 16:4 is difficult. It may mean that "sorrows shall be multiplied [for all] who hasten after another god" or who exchange (by paying a price, BDB).

The fiancé who gives wedding money is not thereby presenting gifts to the family or the girl. These are to be clearly distinguished as in Gen 34:12. The gifts were presents and rewards for accepting the proposal of marriage, but the wedding money was given in addition to these (cf. Rebekah's case in Gen 24:53; also Gen 29:24, 29; Josh 15:18–19; I Kgs 9:16).

mōhar. Wedding money, bride price. There are only three instances of this word in the Scriptures: Gen 34:12; Ex 22:16; I Sam 18:25. The *mōhar* was a sum of money or its equivalent, which the fiancé paid to the girl's father as a compensation to the family. It was not, strictly speaking, the purchase price, but the customary wedding money. Exodus 21:7–11 illustrates the outright purchase of a maidservant to be a con-

cubine. Note also the penalty for violating a girl's virginity (Deut 22:29). (See the contrast between wedding money and marriage, and refusal of marriage and penalty to a seducer in Ex 22:16–17 [H 15–16]).

Jacob paid in services for his marriages to Leah and Rachel (Gen 29:15–30). David performed a valiant deed in battle for Saul's daughter, Michal (I Sam 18:25–27), just as Othniel did for Caleb's daughter (Josh 15:16). Hamor's son, Shechem, was willing to pay any sum to Jacob for his daughter Dinah (Gen 34:11).

Apparently the father was allowed to enjoy the use of the wedding money, but it would revert to the bride at her father's death or if the death of her husband reduced her to poverty. What else could have prompted the complaint of Rachel and Leah that their father Laban had "devoured their money" after having "sold" them (Gen 31:15)?

The Babylonian law called for the fiancé to pay to the girl's father or sometimes to the girl herself the *tirḥatu*, a sum varying from one to fifty shekels of silver. According to Assyrian law, the *tirḥatu* was given to the girl either as a compensation for her loss of virginity or as insurance in the event that her husband died. Even today among Palestinian Arabs the fiancé pays a *mahr* to the girl's parents.

מַהְתָּלָה (mahātallā). See no. 2511a.

1154 מו (mw). A paragogic syllable, attached to ב, ק, ל, so as to form independent words, בָּמוֹ, קָמוֹ, לָמוֹ.

מוֹאֵל (mō'el). See no. 1160.

1155 מוֹאָב (mō'āb) *Moab.*

Derivative

1155a מוֹאָבִי (mō'ābī) *Moabite.*

Lot's son by his elder daughter (Gen 19:37). He became the father of a nation which settled east of the Dead Sea after God dispossessed the previous inhabitants (Emim) because of their unrighteousness (Deut 2:10–11). Moab attempted to hire Baalam to curse Israel (Num 22:3, 4, 7, 8, 10, 14, 21, 36; 23:6, 7, 17; 24:17) and practiced rites of religious prostitution connected with sacrifices to the dead (Num 25:1ff.; cf. Ps 106:28). The prophets directed these messages against Moab: Amos 2:1–3; Isa 15–16; Jer 48; and Ezk 25:8–11. Their god was Chemosh.

mô'abi. Moabite. Although the deuteronomic code prohibited a Moabite from entering the congregation of the Lord even to the tenth generation (Deut 23:3 [H 4]), Ruth, a Moabitess, believed in the Lord and became the wife of Boaz and thus a forebear of King David and the Messiah (Ruth 1:22; 2:6; 4:10). David conquered the Moabites. They rebelled after Ahab's death finally gaining independence (II Sam 8:2; II Kgs 3:4–27).

[The Moabite Stone gives Moab's side of this campaign. It says that Moab served Israel "all the days of Omri and half the days of his son, forty years." This has recently been interpreted to mean "half the days of his grandson," i.e. Joram as given in II Kgs 3. The servitude would then include the reign of Omri (twelve years), Ahab (twenty-two years), Ahaziah (two years) and part of Joram (six years). Overlapping years would make the total forty (see D. Cross and N. Freedman, *Early Hebrew Orthography* (American Oriental Society, 1952, p. 39). R.L.H.]

W.C.K.

1156 מוג (mûg) *melt*.

So great in power is the Lord, that the earth melts when he touches the land (Amos 9:5). The mountains and hills totter, tremble, and shake at the sound of his voice (Nah 1:5; Ps 46:6 [H 7]; Ps 75:3 [H 4]). As all the forces of heaven and earth fought on the Lord's side in the past, so in the day of the Lord's future, final triumph even nature must tremble at his approach.

If Arabic *māga* "surge, be in tumult, totter" is to be connected with our Hebrew root, then "tremble" might be a better meaning especially since it is paralleled by *r'sh* "shake" in Nah 1:5. It serves as a figure of helpless, disorganized terror in the OT. Cathcart points to Jer 4:24 to support this rendering: "I saw the mountains, and lo they were quaking, and all the hills rocked to and fro." But in Mic 1:4 and Ps 97:5 the hills melt like wax. Therefore there must be a combination of ideas: trembling and melting.

God also can soften the earth with showers (Ps 65:10 [H 11]) and cause a man's possessions to dissolve (Job 30:22).

Regularly this melting is a figure for the panic-stricken condition which God's judicial acts cause in the heathen: Canaan (Ex 15:15; Josh 2:9, 24), Philistia (I Sam 14:16; Isa 14:31), the earth and its population (Ps 75:3 [H 4]).

However, there is a final day coming when the mountains shall flow with new wine and the hills

melt, shake, or wave with corn (Amos 9:13, NEB).

See *môt* "totter" for synonyms.

W.C.K.

1157 מור (mwd). Assumed root of the following.

1157a תמיד (tāmid) *continuity*.

Most frequently this word is used in an adjectival genitive construction with 'ôlā for the continual whole burnt offering made to God every morning and evening (Ex 29:42; Num 28:6, 10, 15, 23; Ezr 3:5; Neh 10:34; cf. Ezk 46:15, every morning; and the continual *minhâ*, Num 4:16; Neh 10:34; Lev 6:13. The word is used alone to designate the daily burnt offering in Dan 8:11–13; 11:31; 12:11. Numbers 4:7 refers to the "bread of continuity" meaning the bread that was always there.

The word is also used adverbially in connection with the cult to denote constancy in cultic duties (e.g., Aaron's breastplate, Ex 28:29–30). Some passages, however, stress constancy of personal devotion, e.g., Hos 12:6 [H 7], "Turn to your God; keep mercy and justice and wait on your God continually." The Psalms likewise urge, let his praises continually be in your mouth (34:1 [H 2]; 71:6), hope continually in the Lord (71:14); let God's truth continually preserve you (40:11 [H 12]); let prayer be made to him continually (72:15), and keep his law continually (119:44). Isaiah promises that the Lord will continually guide those who respond to the social needs about them as evidence of true spirituality. Indeed, "Seek the Lord and his strength, seek his face continually" (I Chr 16:11).

W.C.K.

מודע (môda'). See no. 848e.

1158 מוט (môṭ) *totter, shake, slip*.

Derivatives

1158a מוטף (môṭ) *shaking, pole, bar of yoke*.

1158b מוטף (môṭā) *pole, bar of yoke*.

This verb, which occurs as a figure of speech referring to great insecurity, can also denote dependability and certainty when used of God and prefixed with a negative.

When *môt* is used with *regel* "foot," it speaks of the foot slipping or sliding in a time of calamity (Deut 32:35; Ps 38:16 [H 17]; 94:18). In Ps 82:5 this verb depicts general disorder on the earth: "all the foundations of the earth are slipping." It also is used to refer to the instability of dead idols

mounted on platforms that are liable to topple over or be picked up and carted off by a conqueror. Isaiah has much sport urging idolatrous Israel to make sure their gods will not be moved (Isa 40:20; 41:7).

Two millennial psalms affirm that "the LORD reigns," therefore the inhabited world (*tēbēl*) cannot be moved (Ps 93:1, I Chr 16:30; Ps 96:10). Since the Lord also laid the foundations of the earth, it will not totter forever and ever (Ps 104:5).

Not as much can be said for the kingdoms of this world: they were moved when the Lord said so (Ps 46:6; note parallel verb *mûg* "to melt"). In a dramatic passage, Isaiah pictures the earth reeling to and fro like a drunkard or a little vineyard hut, (*m' lûnâ*, see *mālôn*) in a violent storm. It convulses, reels and shakes violently (Isa 24:19–20) as God's hand moves in judgment just prior to the "many days" (millennium?) of Isa 24:22. David spoke poetically of the earth being split and trembling in need of God's healing when it was shaking (Ps 60:2 [H 4]), but this is probably to be classified with Ps 46:2 [H 3] which allows that even if the earth heaves (*mûr*) and the mountains slip into the heart of the seas, God will still be our refuge and strength. As these passages and Ps 82:5 show, the verb refers to the sudden, unexpected and disastrous shaking of the solid earth. Since this inconstancy is against the order of creation, it is associated with God's wrath. The power of his wrath is evident in such cosmic disorder.

Righteous men are unmoveable and secure, for they have the Lord as their Rock and Salvation (Ps 62:2 [H 3], 6 [H 7]; 112: 6; 15:5; 16:8; 21:7 [H 8]; 30:6 [H 7]). God gives them a hand on the pathway of life so that their footing does not slip (Ps 17:5). The enemy of the righteous will have no cause to rejoice in his being moved (Ps 13:4 [H 5]), for he trusts in the salvation of God.

Such assurance is strengthened even more by the everlastingly secure covenant which God made with Abraham and David. The promise is unconditionally maintained in perpetuity for all who will participate by faith. While the mountains may move (*mûsh*) and the hills shake, God's loyal love will never move (*mûsh*) and his covenant of peace (the new covenant, the Abrahamic and Davidic covenant) will never shake (Isa 54:10). See also *mûsh* "depart, remove" and *mûg* "melt, shake."

môt. Pole, bar (of the yoke), **shaking**. The word *môt* is used of shaking and therefore of a carrying pole that shakes as the bearer walks.

In three passages, it is used of a carrying pole such as the one used to carry the tabernacle furnishings (Num 4:10, 12) or the one used by the spies to carry back the grapes, pomegranates,

and figs from Canaan (Num 13:23). Concerning the meaning of *môt* in Ps 55:22 [H 23], M. Dahood suggests that the word connotes stumbling into the netherworld (i.e. into the jaws of death). In Ps 66:9 it may even be a poetic name for the underworld, "Who has kept us among the living and has not put our foot in the quagmire." While the idea of the netherworld may be overdrawn, the idea of stumbling is not. Nahum 1:13 says, "I will break his yoke" (*shābar* and *môtâ*); cf. also Jer 28:10–12; Lev 26:13; Ezk 30:18. Probably the *môt* is strictly speaking the bar across the animals' necks which becomes a name for the whole yoke.

môtâ. Pole, bar. This feminine noun also is used for bars or staves to carry the ark (I Chr 15:15) or figuratively the yoke of oppression (Lev 26:13; Jer 27:2; 28:10, 12, 13; Isa 58:6, 9; Ezk 30:18; 34:27). The most colorful and theologically significant passage is in Jeremiah. The false prophet Hananiah dared to break Jeremiah's real yoke (a symbol of impending Babylonian bondage) only to find himself confronted with another real yoke of iron and a sentence of imminent death which occurred two months later.

It is probable that here belongs Prov 24:11: "Rescue captives from (preposition *lamed*) death, and do not restrain the rods from (preposition *lamed*) killing."

Bibliography: Dahood, M., *Proverbs and Northwest Semitic Philology*, Rome: Pontifical Biblical Institute, 1963, p. 51. *Psalms I*, in AB, pp. 78–79. —, *Psalms II*, in AB, pp. 38–39. W.C.K.

1159 מוֹת (môt) **be low, depressed, grow poor** (e.g. Lev 27:8; 25:47).

1160 מוֹל (mûl) **I, מוֹל (môl), מוֹאֵל (mô'l) front, in front of.**

1161 מוֹל (mûl) **II, circumcise, let oneself be circumcised, be cut off** (a few forms may be taken as from מָלַל).

Derivative

1161a מוֹלָה (mûlâ) **circumcision.**

The use of the verb in the OT begins in Gen 17. Here the Lord confirms his covenant with Abraham recorded in Gen 12:1–3. The practice of cutting off of the prepuce of the penis was a practice used even before the time of Abraham (Old Kingdom Egyptian tomb art and hieroglyphs *Egyptian Grammar*, A. H. Gardiner, p. 448). It was probably used as it is to this day as a puberty rite marking the passage of a son to the privileges of manhood, a rite sometimes accompanied by licentious overtones. The operation was performed on a boy about thirteen years old. God revealed to Abraham that he was to use this

shedding of blood as a sign of the covenant with Abraham. In the OT God ordered the child to be circumcised on the eighth day of his life, removing it from a puberty rite to a sign with strictly religious significance. This infant circumcision seems to have been unique in antiquity. Moderns have proved the practice has hygienic value but there is no place in the OT where this point is made.

Since the practice symbolized God's covenant with Abraham and his descendants, it is from the various aspects of this covenant that circumcision derives its spiritual significance. To those in the OT who took its meaning seriously, it was the mark of submission to the sovereign will of God. As so often happens with religious symbolism, the Hebrews eventually used this sign of a deep spiritual reality as an end in itself and wrongly made of it an automatic entry into the kingdom of God.

The prophets became aware of this perversion and preached against mere circumcision of the flesh, that is, circumcision not accompanied by living faith. Jeremiah spoke of the circumcision of the heart. He said, "Circumcise yourselves to the Lord, and take away the foreskins of your heart, you men of Judah" (Jer 4:4). But long before Jeremiah the people had been warned of this danger. Indeed, Jeremiah was quoting Deut 10:16. The use of the verb in Deut 30:6 proves the statement above, that circumcision symbolized the deepest spiritual reality of the Hebrew religion. The verse says, "The LORD your God will circumcise your heart and the heart of your offspring, so that you will love the LORD your God with all your heart and with all your soul, that you may live." In Mt 22:36-40 our Lord instructed the Pharisees that this was indeed the greatest commandment and the sum and substance of all the law and prophets. The verse in Deut clearly teaches that true circumcision was a work of God in the human heart—the spiritual life God creates in his people. This is precisely the teaching of the apostle Paul in Col 2:11 where speaking of the full deity of Christ he says, "In whom also ye are circumcised with the circumcision made without hands, in putting off the body of the sins of the flesh by the circumcision of Christ." (Cf. also Rom 2:28-29 and 4:9-12.) Because baptism and circumcision both symbolize the regenerative work of God which always included cleansing from sin and love for God, some segments of the church baptize their infants just as God instructed the OT saints to circumcise them. Others in church do not stress this analogy and so baptize only those who profess faith in Christ after reaching the age of discretion.

mûlâ. Circumcision. This noun is used only once, in Ex 4:26, where Zipporah accused Moses

of being a bloody husband because of circumcision. The context makes very clear the importance God placed on circumcision as a sign of God's covenant with his people. Even Moses the lawgiver was not free to neglect circumcising his son. To do so was tantamount to a denial of the covenant.

 מוקש (*môqêsh*). See no. 906c.

1164 מור* (*mûr*) *change, exchange*. Used in the Niphal, Hiphil and Hophal only.

Derivative

1164a תמורה (*t' mûrâ*) *exchange*.

This verb appears in thirteen passages of scripture which deal with various topics. In Mic 2:4, Gog will spoil and change the portion of his people because of their sinfulness. Psalm 46:3 affirms in a hyperbolic phrase, "though the earth be altered," that God is still our refuge and strength. In Ps 15:4, the man who abides by his sworn word and does not change is the kind of man whom God will establish, but as for those who sin against him increasingly, he will change their glory into shame (Hos 4:7). When Israel worshiped the golden calf, they thereby changed their glory (i.e. their glorious God) into a bull that eats grass (Ps 106:20). Israel did what no other

nation ever had done. The nations never changed their gods (which were not, after all, gods at all). But Israel changed their glory for that which did not profit at all (Jer 2:11).

A group of texts deals with vowed offerings. Once they have been dedicated to the Lord, they may not be changed good for bad or vice versa. If there is an exchange however, it and the exchange shall be holy to the Lord (Lev 27:10 [four times]; 27:33 [three times]).

t'murā. Exchange, recompense. Two passages merit attention. Job 28:17 says that wisdom cannot be attained in exchange for jewels of fine gold. Ruth 4:7 records the ceremony of land redemption and exchange when Boaz married Ruth on the quitting of all claims by a closer relative.

W.C.K.

1165 מֹרֶגֶת (môrāg) *thresher*.

A piece of farm equipment made of a plank platform. Holes were bored in the bottom of it, through which protruded sharp stones or metal points. It was drawn by one or two animals and weighted down by stones or by the driver as he drove it over stalks of grain. Araunah gave such a piece of equipment to David to use as the wood for his sacrifice on the future holy site (II Sam 24:22; I Chr 21:23).

According to Isa 41:15, however, God will make Israel his threshing sledge to harvest his judgment in the eschaton.

hārūṣ was another type of thresher or disc harrow made of iron. It occurs in a parable (Isa 28:27). Amos mentions it as an instrument of destruction and uses it as a figure of brutality which incited the wrath of God (Amos 1:3).

מֹרָד (môrād). See no. 909a.

1166 מֹרֶה (môrā) *razor* (Jud 13:5; 16:17; I Sam 1:11).

מֹרָה (môrā). See nos. 907c,d.

מֹרֶה (môreh). See nos. 910b,c.

מֹרָשׁ (môrāsh). See no. 920d.

1167 מֹשׁ (mûsh) *I, depart, remove*.

This term appears twenty times in the OT. It is first used to describe the pillar of cloud and the pillar of fire (the sign of the presence of God in the Israelite camp) which never left its place in front of the people day or night (Ex 13:22). Joshua did not depart from the tabernacle while

Moses went into the camp (Ex 33:11). Later, the Lord instructed Joshua that the book of the law was never to depart from his mouth; he was to meditate on it day and night (Josh 1:8).

When Israel attempted to enter Canaan presumptuously, after having accepted the unbelieving majority report of the spies, the ark of the covenant of the Lord did not depart from the camp (Num 14:44).

Isaiah's use of the term is theologically significant. While the mountains will depart (Isa 54:10a), God's covenant of peace made with Abraham and David, and the new covenant of Jeremiah will not be removed (Isa 54:10b; 59:21). It is permanent! If God's ordinances with the sun, moon, and stars depart, then his promise with Israel will do likewise (Jer 31:36). As of this writing, however, the sun, moon, and stars continue to shine and therefore his covenant promise to Israel continues.

In the final day when the Lord appears a second time, he will remove the iniquity of the land (of Israel) in one day (Zech 3:9). So magnificent will be his appearing that the Mount of Olives will split and one half will remove itself to the north and the other half to the south (Zech 14:4).

Men who trust in the Lord will be like trees planted by a river; they will not cease yielding fruit (Jer 17:8).

W.C.K.

1168 מֹשׁ (mûsh) *II, feel* (e.g. Gen 27:21; Ps 115:7; Jud 16:26).

מֹשֶׁב (môshāb). See no. 922c.

מֹשֶׁאָה (môshā'a). See no. 929d.

1169 מוּת (mût) *die, kill, have one executed*.

Derivatives

1169a מָוֶת (māwet) *death, dying, Death (personified), the realm of the dead*.

1169b קָמוֹת (māmôt) *death*.

1169c תְּמוּתָה (t'mûtā) *death*. Occurs only in phrase *b'ēnē t'mûtā* "children of death," i.e. those worthy of death and appointed to death (Ps 79:11; 102:21).

mût may refer to death by natural causes or to violent death. The latter may be as a penalty or otherwise. The root is not limited to the death of humans although it is used predominantly that way.

This is a universally used Semitic root for dying and death. The Canaanites employed it as the name of the god of death and the netherworld, Mot (cf. ANET, pp. 138–42). In Hebrew it is occasionally used metaphorically as when Job speaks of the death of wisdom (12:2). But the

literal demise of the body in death is usually in view. Ezekiel reminds us that God has no pleasure in the death of men, for his purpose was and is that they live (18:32). The normative OT teaching about death is presented in Gen 3:3, where God warns Adam and Eve that death is the result of rebellion against his commands. Since God's purpose for our first parents was never ending life, the introduction of death was an undesirable but a necessary result of disobedience. The physical corruption of the human body and the consequent suffering and pain brought about by the Fall were only the obvious symptoms of death. Death is the consequence and the punishment of sin. It originated with sin. A grand theme of the OT is God's holiness, which separates him from all that is not in harmony with his character. Death, then, in the OT means ultimate separation from God due to sin. And sin is any rebellion or lack of conformity to his holy will. All men then, in a sense, are what the Hebrews would call *b'ne māwet* "sons of death"; that is, they deserve to die because they are sinners. This and a related term (*'ish māwet* "man of death") are used (Ps 79:11; 102:20 [H 21]) of the people of God in captivity who must look to him for deliverance from impending doom.

In Ugaritic (ANET, above) the god Mot was a well-defined figure who ruled the netherworld, a land of slime and filth. He fought with Baal, the god of fertility for which he suffered the displeasure of El, head of the pantheon. Baal, as the provider of fertility, rain, etc., was a hero god to the Canaanites and as such his cult became a distinct snare to the Israelites. The same is not true of Mot, so he was not mentioned in the OT, although some claim to find occasional references to him. M. Dahood (*Psalms*, in AB, XVI, XVII, XVIIa) attempts to read Mot into the Psalmist's references to the foe, but he is not convincing. Jeremiah in one case personifies death, describing it as one who comes in through the windows (9:20). What may be clearer is the use of *māwet* "death" as referring more broadly to the realm of the dead. In Isa 38:18 we read:

"For Sheol cannot praise you,
death cannot celebrate you;
they that go down into the pit cannot hope
for your truth."

There is certainly room for difference of opinion here, for the place Isaiah has in mind could be either the grave or the realm of the dead. It would appear that Job 38:17 which says, "Have the gates of death been revealed to you?" is a clearer reference to "death" as the realm of the dead. Other passages that may be taken this way are: Isa 28:15, 18; Hos 13:14; Hab 2:5; Ps 6:5; 49:14 [H 15]; and article *lāqah*; Prov 7:27; Job 28:22, etc.

But see *sh'ôl* and R. L. Harris, "The Mean-

ing of Sheol as Shown by Its Parallels," JETS 4:129-35.

This passage in Isa 38:18 leads us to the OT statement that "The earth the Lord hath given to the children of men, but the dead praise not the Lord" (Ps 115:16bf.; Isa 38:11; Ps 6:5; 30:10; 88:11ff.). Bultmann notes "After death, then, the righteous are outside the infinitely important sphere of life in which cultic relationship with God is maintained" (TDNT, II, p. 847). However, he is mistaken when he extends this line of thinking to conclude: "Death and its kingdom are outside the stream of power which has subjected all the kingdoms of life to itself" (ibid.). We have shown elsewhere (see *hayyim*) that God is the Lord of life and death and that he will conquer death.

In the Mosaic ceremonial law corpses were considered unclean—another indication of the OT attitude toward death as an intruder and the result of sin. The Canaanites on the other hand "normalized" death through the myths of the "godly Mot" who like other gods was subject to appeasement. The Canaanites had rituals which included bodily mutilation and sacrifices for the dead. The Israelites were forbidden to practice such rituals (Deut 14:1). The law of Moses was also designed to protect Israel from one of the vilest effects which the "normalization" of death had on the Canaanites, and that was child sacrifice.

For everything that is detestable to the LORD
they have done for their gods,
even to burning their sons and daughters
in fire for their gods" (Deut 12:31).

Because of its view of death OT revelation places a high premium on life. A long life is considered a great blessing (Prov 3:2) and an immortal life the ultimate in blessing (Ps 16:11; 21:4 [H 5]; 73:23-26). The Canaanites felt the latter belonged only to the gods (ANET, p. 151, vi).

Contrary to the opinion of many moderns, the OT teaching that requires capital punishment for premeditated murder arose out of a high view of life, not a low view. The same is true of God's order to destroy those people who were committed to the detestable practices mentioned above. Psalm 106:34-38 explains why this is so: Because Israel did not destroy these peoples they learned their practices and sacrificed their own sons and daughters to demons.

מִזְבֵּחַ (mizbēah). See no. 522b.

1170 מזג (mzg)

1170 מזג (mzg). Assumed root of the following.

1170a מזג (mezeg) *mixture*, i.e. *mixed wine*. Occurs only in Song 7:3, in phrase 'al-yehsar hammazeg "(that) never lacks blended wine."

1171 מזה (mzh). Assumed root of the following.

1171a מזה (māzeh) *sucked out, empty* (Deut 32:24; Isa 5:13).

מזו (māzû). See no. 534b.

מזוזה (m'zûzâ). See no. 535b.

מזון (māzôn). See no. 539a.

מזור (māzôr). See nos. 75a, 543c.

1172 מזהה (mēzah) *girdle*. Probably a loan word.

1172a מזיה (m'ziah) *girdle*. Occurs only in Job 12:21, "loosen the girdle of might," i.e. weaken them, make them defenseless by ungirding.

מזלג (mazlēg). See no. 552a.

1173 מזלות (mazzālôt) *constellations*. (ASV "planets," RSV similar.)

Appears in II Kgs 23:5 and Job 38:32. The Akkadian cognate refers to the phases of the moon, but the usage of the term in Judaic writings indicates that zodiac constellations are being referred to in Hebrew. In Kings the word is used with reference to the pagan worship of the stars with all such worship's astrological significance. In Job it is used with *kimâ k'sil* and 'āyish (the Pleiades, Orion and the Bear, all of which see), to indicate God's creative power and the folly of questioning his wisdom.

מזער (miz'ār). See no. 571b.

1174 מזר (mzr) I. Assumed root of the following.

1174a מזמר (mamzēr) *bastard, child of incest*.

Only found in Deut 23:2 [H 3], it is used of an illegitimate child who is refused entrance to the congregation of the Lord until the tenth generation. Zechariah 9:6 may refer to an individual, but more likely it figuratively depicts the mixed population of Ashdod. It is possible that the Deut reference also refers to a child of mixed parentage—Hebrew and pagan.

W.C.K.

1175 מזר (mzr) II. Assumed root of the following.

1175a מזור (māzôr) *net*. Meaning dubious.

מזרה (mizreh). See no. 579a.

1176 מזרות (mazzārôt). Occurs only in Job 38:32. Meaning dubious. Perhaps it refers to a particular star or constellation. See mazzālôt.

מזרה (mizrah). See no. 580c.

מזרע (mizrā'). See no. 582f.

מזרק (mizraq). See no. 585f.

מה (mēah), מה (mōah). See nos. 1181a,b.

1177 מהא (māhā') *strike* (=clap the hand, e.g. Isa 55:12; Ezk 25:6).

מהבה (mahbē'). See no. 588a.

מהבב (mahbō'). See no. 589a.

מהברה (m'habbērâ). See no. 598k.

מהברת (mahberet). See no. 598j.

מהבת (mahābat). See no. 600b.

מהגרת (mahgōret). See no. 604d.

1178 מהה (māhâ) I, *wipe, wipe out*.

Almost all of the thirty-three occurrences of this verb are theologically significant. It is first found in the flood narrative. Every living thing on the face of the earth that breathed was blotted out (Gen 7:22–23) including all human beings, except eight. *māhâ* figures prominently in the prayer in which Moses begged God to forgive the sin Israel incurred when they worshiped the golden calf. "If not, blot me out of your book," prays Moses (Ex 32:32–33). It had been God's intention to blot out Israel's name from under heaven (Deut 9:14), as repeated in Deut 29:20 [H 19] (see also Ps 69:28 [H 29]). Whether he regards it thus as a stain (as in Ps 51:3, 11) or a debt in a ledger (as in Col 2:14) is not known with certainty. But he was willing, as was the apostle Paul, to be accursed for the sake of his brethren.

Note that erasures in ancient leather scrolls were made by washing or sponging off the ink rather than blotting. "Wipe out" is therefore more accurate for the idea of exunge.

When God did move in judgment, he wiped Jerusalem as one wipes a dish, wiping it and turning it upside down (II Kgs 21:13). During the time of the judges, the entire tribe of Benjamin was almost blotted out (Jud 21:17).

The sinner prays as David did that God will blot out, i.e. erase his transgressions and iniquities (Ps 51:1 [H 3], 9 [H 11]). God does so for his own sake and remembers those sins no longer (Isa 43:25). Thus sins which loomed as a thick

cloud were blotted out (Isa 44:22). While God is omniscient, these sins he deliberately remembers against us no longer. The reverse action can be seen in Ps 109:14, and Neh 4:5 [H 3:37].

māḥâ is also used to describe the lifestyle of an adulterous woman who eats, wipes her mouth, and protestingly claims that she has done no wrong (Prov 30:20).

Then there is the case of the jealous husband who suspected his wife of adultery. As part of the psychological ordeal to which she was subjected in the presence of the Lord, the woman had to drink bitter water into which curses written on a scroll had been wiped in order to determine her innocence or guilt. (Num 5:23).

Finally, Isa 25:8 proclaims that God will wipe away tears from all faces.

W.C.K.

- 1179 מַחָה (māḥâ) *II, strike*. Occurs only in Num 34:11, *umāḥâ 'al-ketep yam-kinneret* "and (the border) will strike upon (i.e. reach to) the shoulder of the Sea of Kinneret."

Derivative

- 1183 מַחַשׁ (māḥaš) *strike, wound severely*.

Derivative

- 1183a מַחַשׁ (maḥaš) *severe wound*.

This word is well attested in Ugaritic poetry. It is found in the OT in parallel pairs with itself (Ps 110:5-6), with *smḥ* "to annihilate" (Ps 18:39-41; note that the two verbs *māḥaš* and *sāmaḥ*, both in the first person singular, form an inclusion as in Ugaritic poetry), and with *kly* "to annihilate" (II Sam 22:39; Ps 18:38-39). The blow denoted by *māḥaš* is generally lethal and decisive, as Jael's was to Sisera (Jud 5:26).

The Lord will smite kings of many countries in the day of his great wrath (Ps 110:5-6). In fact, he does so even now to all who continue to walk in their sins (Deut 33:11; Ps 68:21 [H 22]). Hence, the kingdom of the ungodly can expect increasing hostilities until the final deliverance of God comes in the end (Hab 3:13). God smites and he heals; "neither is there any that can deliver out of his hand" (Deut 32:39). Even Eliphaz recognized this (Job 5:18). No picture of God moving in his vengeful justice is more vivid than Ps 68:23 [H 24], which portrays God smiting his foot in the blood of his enemies (who have come against a revived nation of Israel in the eschaton). There is a possibility that this verse may be explained by Ps 58:10 [H 11] where the verb is wash (*rāḥaš*) the feet in blood. The ancient versions read "wash" also in Ps 68:23 [H 24].

maḥaš. Severe wound. Only Isa 30:26 uses this word. The Lord will heal the blow of the wound that came to his people. This will take place in "that day" when the moon shall be as bright as the sun and the sun shall be seven times more luminous than it is now.

1184 מַחֵק (māḥaq)

- מַחֵב (maḥšēb). See no. 718a.
 מַחֲשָׁה (meḥšā). See no. 719d.
 מַחֲשִׁית (maḥšit). See no. 719e.

1184 מַחֵק (māḥaq) *annihilate*. Occurs only in Jud 5:26.

מַחְקָר (meḥqār). See no. 729b.

1185 מַחַר (mḥr). *Assumed root of the following.*

- 1185a מַחָרָה (māḥār) *tomorrow*.
 1185b מַחֲרָתָה (moḥōrāt) *the morrow*.
 1185c מַחֲרִירָה (m'ḥir) *hire, price*.

māḥār. Tomorrow. Occurring fifty-two times, *māḥār* is seldom used substantively, e.g. "tomorrow is the new moon" (I Sam 20:5). In other passages it is used adverbially: "Let us eat and drink, for tomorrow we die" (Isa 22:13) or "Tomorrow the Lord shall do this thing."

Of theological interest is the use of *māḥār* to mean in future time, e.g. Ex 13:14 and Deut 6:20, "When in time to come your sons ask you" (NEB). In Josh 4:6, 21 memorial stones were set so that in future days when the children asked what they meant, the answer could be given. Similarly, the transjordanian tribes feared that the time would come when they would be cut off from the heritage of Israel, so they also erected a memorial (Josh 22:24, 28). Laban and Jacob looked forward not just to the morrow in the sense of the following day, but to time that would come (Gen 30:33). Significantly enough, none of the prophets used this phrase to designate the eschatological era.

Proverbs warns against boasting about what one will do on the morrow (Prov 27:1). Neither should one promise to give tomorrow to a neighbor when he has it to give right then and there (Prov 3:28). God is in charge of our tomorrows, therefore we must be hesitant to plan as if the future were entirely in our hands.

moḥōrāt. Tomorrow. The most interesting feature about this feminine noun is that "on the morrow of" means after (Lev 23:11, 15, 16; Num 33:3; Josh 5:11). Twice the preposition *l'* is used before *māḥōrāt* to mean "on the morrow" (Jon 4:7; I Sam 30:17).

m'ḥir. Hire, price. Relation to above root unclear. This word is used only fifteen times in the OT. Deuteronomy 23:19 prohibits bringing the price of a "dog" (male prostitute) into the house of God. Isaiah 55:1 describes the free offer of God's salvation as being without money and without price. Wisdom cannot be purchased with gold, not at any price (Job 28:15). In a similar vein, Prov 17:16 asks why put a price (tuition?) into the hand of a fool to get wisdom (an education) when you know he has no heart (motivation) in it?

One of the great tragedies in Israel was that the rulers judged for reward, the priests taught for a price or reward and the prophets divined for money (Mic 3:11). Contrariwise, the pagan Cyrus, whom God raised up, released the captives of Israel for no price or reward (Isa 45:13). This is the opposite of Antichrist who will divide the land for personal gain (Dan 11:39).

1187 מַחֲטָר (māḥṭar) *rain*. Denominative verb.

Parent Noun

1187a מַחֲטָרָה (māḥṭār) *rain*.

Genesis 2:5 states that the Lord "had not caused it to rain on the ground." The garden was watered by a "mist" or, better, a "river" (Harris, R. L., "The Mist, the Canopy and the Rivers of Eden," JETS 11:177-80). These statements explain why there were no "plants of the cultivated land" (perhaps thorns arising from rain action) or "herbs of the cultivated land" (perhaps cereal grains? cf. Gen 3:18).

Destructive rain from God fell on the earth in the flood of Noah's day (Gen 7:4). God rained down hail on the unbelieving Pharaoh (Ex 9:23), and fire and brimstone on Sodom and Gomorrah (Gen 19:24). He will yet rain down great hailstones, fire, and brimstone on Gog and his hordes in that great concluding battle of history

(Ezk 38:22). Such a prospect is in view for all the wicked (Ps 11:6).

The connection between man's spiritual condition and the amount and timing of the rainfall is seen in passages like Amos 4:7. When man's heart is right with God, he graciously gives the command to the clouds and they refresh the earth (Isa 5:6), just as he graciously rained manna on Israel in the wilderness (Ex 16:4; Ps 78:24).

mātār. Rain. The rain (in some thirty-eight references) is never to be taken for granted by mankind; it comes from the hand of God (Ps 147:8; Job 5:10; 28:26; 36:27) in amounts proportionate to the spiritual condition of the inhabitants of that land (Deut 11:11, 15 [H 14]). When men love the Lord their God and serve him with all their heart and soul (Deut 10:12), he sends rain on their land in its regular season (Deut 11:14; 28:12). But when they turn and go after other gods, the rain is shut off in heaven. Men and beasts languish (Deut 11:17) and the land is turned into powder and dust (Deut 28:24). Thus the condition of the promised land was itself a witness to the spiritual life of the people.

It may be noted that the Bible does not support the fanciful cosmology often attributed to it. The "windows of heaven" (Gen 7:11) are more accurately translated "sluice gates" (cf. *ḥallôn* and the reference there to *'ārubbâ*). The Hebrews knew from observation that rain comes from clouds (Isa 5:6; I Kgs 18:44).

The prophets pointed to the rain as a sign for the people of God's anger or favor (Isa 5:6; 30:23; Amos 4:7; Zech 10:1). Rain that fell during the wheat harvest was a sign of God's judgment, for it came out of season and at the worst moment possible (I Sam 12:17-18). Solomon prayed that God would open the heavens, closed by the people's sin, after they had called upon him in prayer (I Kgs 8:36; see also II Chr 6:27). Elijah had just such a prayer ministry (I Kgs 18:1). Indeed at the very juncture in history when Israel chose to worship Baal the storm god (I Kgs 16:31-32), Elijah appeared with the warning, "There will be neither dew nor rain these years except by my words" (I Kgs 17:1).

Waiting for the rain became proverbial: like a man waiting for the rain with his mouth held open wide (Job 29:23). It is also used in similes: the Messiah will come down like rain on the mown grass (Ps 72:6). He will dawn on them as the tender grass shining after the rain (II Sam 23:4). In that day a tabernacle will provide shelter from the storm and rain (Isa 4:6).

Rain accompanied by thunder was sent on the Egyptians as a sign of supernatural power during the plagues (Ex 9:33-34; cf. Deut 11:10). There are three occurrences of the statement, "He causes the vapors to ascend from the ends of the

earth; he makes lightnings with rain, and brings the wind out of his treasures" (Ps 135:7; Jer 10:13; 51:16).

W.C.K.

מַטָּרָה (*maṭṭārā*). See no. 1356a.

1188 מַי (may) **water**, מַיִם (*mayim*) **waters**.

Found only in the plural form, it occurs some 580 times. The theological importance of water may be discussed in terms of its historical, ritual, metaphorical, and eschatological aspects. The scarcity of water in Palestine explains the numerous references in the OT to man's quest for water.

Historical Aspects

The waters of heaven and earth were created by God. In an all-embracing summary, Ps 104 relates that God created the waters in the clouds (v. 3) and on the earth (v. 6). He controls their boundaries (vv. 7-9), appoints springs to break out on the earth (v. 10), and rain to fall at his bidding (v. 13), thereby fructifying the earth and gladdening the heart of man (vv. 11-18).

Many liberal critics draw a crude picture of biblical cosmology in which the "waters on high" are held back by a solid firmament, being permitted to fall to the earth through "windows" (see the drawing after S. H. Hooke in ZPEB, I, p. 395). Actually, this is a strange mixture of mis-translation and misuse of poetic imagery. The biblical account depicts Elohim creating the upper waters, the watery clouds of heaven, and the lower waters by the word of his mouth (Gen 1:7, 9). An "expanse" (rather than the Greek and Latin derivative "firmament") was created between the two bodies (Gen 1:6). No idea of hardness, dome-like effect or solidity is attached here. Rather, as in Ezk 1 and 10, it is merely a separating expanse. Neither are the lower waters, especially the "deep" of Gen 1:2 (*t'hôm*) to be connected with any primeval deep or mythological monster of chaos. *t'hôm* is a good Canaanite word for the sea, cf. Ugaritic (UT 19: no. 2537) just as the "waters under the earth" (Ex 20:4; Deut 4:18; 5:8) are not necessarily infernal, but simply water below the shoreline in which men can fish. Likewise the "windows of heaven" (Gen 7:11; 8:2) are metaphorical representations, for on other occasions these same "windows" pour forth grain (II Kgs 7:2), blessings, perhaps shekels (Mal 3:10), and trouble (Isa 24:18). (See *'ārubbâ* in article on *ḥallôn*.)

God is also the regulator and dispenser of all the waters: he causes the rains to fall "in time" (Lev 26:4; Deut 28:12). He opens the floodgates in judgment (Gen 7:17-20) and closes them (Gen

8:2-3). But even the normal flow of rivers (Num 24:6) and the presence of wells and springs (Gen 16:14; Ex 15:23, 27) continue to be his concern. His ability to provide water was proved by the provision of water in the wilderness.

One of the factors controlling the dispersement and availability of water is the conduct of man. Water is withheld from covenant breakers, lawless and disobedient peoples (Lev 26:19; Deut 28:23; Amos 4:7; 1 Kgs 18:18), but given graciously as a sign of the blessing of God to that nation or city which obeys the voice of God.

This divine mastery and ownership is demonstrated in the flood of Noah's day (Gen 7), the Red Sea deliverance (Ex 15:1-18), the Jordan River crossing (Josh 3:16; 4:18), and Elijah's crossing of the Jordan (II Kgs 2:8). Thus the waters of the Red Sea distinguish between the people of God and hardened idolaters, while the waters of the Jordan recognize the authoritative command of its ruler's messengers. Likewise water sprang from the rock for a thirsty nation at the word of God's servant Moses (Ex 17:1-7; Num 20:1-13; Ps 78:16, 20; Isa 48:21).

Ritual Aspects

Various ritual ablutions were performed to symbolize inner moral purity, preparation for meeting or worshiping God, and innocence. Ritual washing was required in the case of ordination (Ex 29:4; Lev 8:6), the high priest's preparation for the Day of Atonement (Lev 16:4, 24), leprosy (Lev 14:5-7, 50-52), sexual emissions (Lev 15:13), and contact with a corpse. While the rites in these cases were powerless to bring about inner moral purity, they signified one's prior inner state of purity and his sense of God's holiness.

There is one use of water in a kind of psychological ordeal (Num 5:11-31) which has no known parallels in the ancient near east. That is the trial of jealousy. (A true ordeal in the near east involved physical danger from which an innocent person was supposed to be delivered, e.g. being thrown into a river. In the Middle Ages, handling hot iron or walking through fire was supposed to be a test of innocence. The Bible contains no examples of this kind of ordeal.)

If a jealous husband suspected his wife of adultery (there being no witnesses), he could bring her before the priest. He (the priest) then sprinkled dust from the sanctuary floor over a vessel of water, thereby making it "bitter water." The woman was required to repeat a formula of curses which the priest wrote on a scroll and then washed into the bitter water. No doubt the resulting effect on the woman's body, after she drank the water, was psychosomatic, God using the mind and emotions to produce the signs that indicated guilt or innocence. Jeremiah refers to this

ordeal when he announces (8:14; 9:15 [H 14]; 23:15) that all Israel is due to drink "bitter" or "poisoned" water.

Water also plays an important role in the ritual performed in the case of an unsolved murder. Those living closest to the scene of the crime were required to wash their hands over a sacrificed heifer (Deut 21:1-9) in order to cleanse the area, which probably gave rise to the custom of washing one's hands in innocence (Ps 26:6; 73:13; cf. Mt 27:24).

The OT never encouraged "refreshment" (or "pouring out water") for the dead as some would argue from Deut 26:14; 1 Sam 7:6; Jer 16:7. Neither did it connect water with magic, for Deut 18:9-14 is clearly against all such practices. Joseph's cup of divination (Gen 44:5) is a case of deception to fool his brothers based on the idolatrous practice of hydromancy.

Metaphorical Aspects

Water is an element in many metaphors. The desire for God, he who is the source of "living water" (Jer 2:13), is like a deer's thirst for water (Ps 42:1 [H 2]). Consequently, all who drink of him (Isa 55:1-2) are "like a watered garden and like a spring of water, whose waters fail not" (Isa 58:11) or like trees by the river of waters (Ps 1:3; Jer 17:8). Apart from God, man is like a dry, waterless land doomed to die (Ps 143:6).

In the realm of marriage, sexual enjoyment with one's own wife is likened to drinking "living water" from one's own well (Prov 5:15; Song 4:15), while harlotry involves drinking "stolen waters" (Prov 9:17).

Other figures depict a fearful heart as melting and becoming water (Josh 7:5), the knowledge of God as wide and broad as the waters of the seas (Hab 2:14; Isa 11:9), and death as the spilling of water (II Sam 14:14; Ps 22:14 [H 15]). Distress is likened to much water (II Sam 22:17) or deep waters (Ps 69:3, 15).

Great rivers symbolize imperial powers that can swamp other nations; thus the Euphrates (Isa 8:7) and the Nile (Jer 46:7-8). God used these "rivers" to punish his people.

Eschatological Aspects

When Israel is restored to their land in a new exodus, God will again miraculously refresh his people by watering the old desert (Isa 35:6-7; 43:20) and by changing the land into a garden showplace (Isa 41:17-20), although some hold that this passage refers metaphorically to the spiritual refreshment of his people. Paradise will be restored when a river from the temple in Jerusalem will flow down toward the Dead Sea. The trees lining its banks will be a source of life and healing (Ezk 47:1-12; Zech 14:8).

In the coming messianic era, God will grant rain in its season (Ezk 34:26) so that thirst and want are forgotten (Isa 49:10; Jer 31:9). The Lord will "sprinkle clean water" on the restored tribes and they will be purified of all their filthiness (Ezk 36:24-25).

1189 מי (mī) who.

Whereas *mā* "what?" inquires after the character or quality of things and sometimes persons, *mī* "who?" usually refers to persons and seeks only the identity, ancestry, or some external fact.

mī is used with personal association in thirty-six passages, e.g. Gen 24:65 in which Rebekah asks Eliezer, "Who is this man walking toward us?" He answers, "It is my master." Pharaoh asks Moses and Aaron, "Who precisely is to go?" (Ex 10:8). The reply is, "All" (Ex 10:9). David, astounded by the announcement of God's grace to him, cried out, "Who am I, O Lord Yahweh and what (*mī*) is my house (dynasty)?" (II Sam 7:18). Other passages demonstrating the same idea are: Ex 15:11; 32:26; Deut 3:24; 4:7-8; 5:26; 20:5-8; Jud 9:28, 38; 10:18; 21:5, 8; I Sam 18:18; 25:10; II Sam 7:23; 22:32; II Kgs 6:11; 9:5; I Chr 17:21; Job 5:1; 34:7; Ps 24:8, 10; 25:13; 34:12 [H 13]; 89:48 [H 49]; Isa 48:14; 50:1; Ezk 27:32.

Some believe that Ex 3:11; II Chr 2:6 [H 5] and Gen 33:8 are exceptions to the rule just announced. However, Moses asks in Ex 3:11, "Who am I to go to Pharaoh?" Apparently he is just claiming to be a nobody. He is not referring to his character, but rather to his ancestry. Likewise Solomon asks in II Chr 2:6 [H 5], "Who is able to build [God] a house?" and "Who am I then?" His ancestry in light of the greatness of the task is nothing. He assumes a stance of humility, as did his father David (II Sam 7:18). When Esau asks Jacob, "What (*mī*) was all that company of yours that I met?", he refers only to its size, not its potential or character. When Mic 1:5 asks, "What (*mī*) is the transgression of Jacob?" and "What (*mī*) are the high places of Judah?" it is calling only for an identity or list of sins and high places; their character and meaning is transparently evil.

מֵיטָב (mēṭāb). See no. 863a.

1190 מִיָּקָל (mikāl) *brook* (meaning dubious). Occurs only in phrase *mikal hammāyim* (II Sam 17:20).

1191 מין (myn), מון (mwn). Assumed root of the following.

1191a מִין (mīn) *kind*.

1191b תְּמוּנָה (t'mūnā) *likeness, form*.

min. Kind. The word *mīn* occurs in thirty-one passages (chiefly Gen 1, 6, 7; Lev 11; Deut 14), thirty of which belong to Moses' Pentateuch. The other one is Ezk 47:10.

The etymology of *mīn* cannot be established with certainty. Ludwig Koehler would have it come from the noun *t'mūnā* "form" with some such meaning as "to think out" or "to invent." Skinner's *International Critical Commentary* on Genesis rejects this line of reasoning and selects rather an Arabic root meaning "to split (the earth in plowing)," with the resulting idea of dividing.

Three significant grammatical points are noted by Barton Payne: 1. *mīn* is always used with the preposition *l'* "to" or "in respect to, according to" and thereby provides specification or, in Driver's phrase, "technical enumeration." 2. *mīn* always occurs in the singular form even though English translations sometimes render it as plural (Ezk 47:10, כַּנֹּף). But it is in fact a collective noun giving the generic form in each case. 3. *mīn* always is followed by one of five suffixal pronominal endings. Affixation of these endings strongly suggests that each form has his, her, or its own generic group to which it belongs by order of the creator.

Some have argued that when God created *mīn*, he thereby fixed the "species." This is a gratuitous assumption because a link between the word *mīn* with the biologist's descriptive term species cannot be substantiated, and because there are as many definitions of species as there are biologists.

In light of the distinctions made in Gen 1, such as the distinction between herbs and grasses which are, however, members of the same class (Angiosperms), it is possible that in some cases the biblical term *mīn* may indicate a broader group, such as an order. Elsewhere, in Lev 11:14, 15, 16, 19, 22 (four times), 29, *mīn* appears consistently as equivalent to nothing broader than genus. However, Lev 11:4 "the falcon after its kind," and 11:16 "the hawk after its kind," refer to divisions within the order Falconiformes, yet both have subdivisions called *mīn*. Likewise, as Payne points out, the locust, bald locust, cricket, and grasshopper all belong to the order Orthoptera and the locust, bald locust, and grasshopper belong to the family Acrididae, but again each has its subdivisions called *mīn* (genus?).

God created the basic forms of life called *mīn*

which can be classified according to modern biologists and zoologists as sometimes species, sometimes genus, sometimes family or order. This gives no support to the classical evolutionist view which requires developments across kingdom, phyla, and classes.

ṭ'múnâ. Likeness, form. A nocturnal apparition of a spirit with an undiscernible form (Job 4:16). In Num 12:8, Moses witnesses the similitude of the Lord, i.e., his passing-by glory (see Ex 33:22; also Ps 17:15 of the Psalmist's wish to see God when he awakes). Elsewhere men are warned against making images in the likeness of anything which God created (Ex 20:4; Deut 5:8; 4:16, 23, 25).

1194d מִכְרֶה (*m'kērā*) *swords*.

One of the central teachings of the OT is that God, his people, and the real estate which he gave to them belonged together. Since God remained the sole owner of the land, he attached certain conditions to the Israelites' occupation of it. One condition was that the land was not to be sold permanently (Lev 25:23). If someone became so poor that he had to sell his property, his nearest kinsman was to redeem it (Lev 25:25). If he had no kinsman, and never recovered sufficient means to buy it back himself, it remained in the hands of the purchaser until the year of Jubilee. In that year, the seventh seven, every family was to return to its ancestral possession. The law of Jubilee was the first land reform in history.

Selling fellow Israelites into slavery was prohibited (Ex 21:16; Deut 24:7; Joel 3:3 [H 4:3]; Amos 2:6; Neh 5:8; Zech 11:5). They could, however, sell themselves, i.e. their services and work, but their servitude was terminated in the seventh year (Deut 15:12) and in the year of Jubilee, when all servants went free (Lev 25:39, 40, 47, 48, 50; Deut 15:12; Jer 34:14). Also in the sabbatical year debts were cancelled (Deut 15:1-3).

The Lord sold his people into the power of their enemies when he became displeased with them (Deut 32:30; 28:68; Ps 44:12 [H 13]; Isa 50:1; Ezk 30:12). Actually, the Israelites sold themselves: for nothing! But God would yet redeem them without money (Isa 52:3). I Sam 12:9 spells it out, "When they forgot the Lord their God, then he sold them. . .," which happened repeatedly during the time of the judges (Jud 2:14; 3:8; 4:2; 10:7).

Joseph was sold by his brothers to the Ishmaelites who in turn sold him into Egyptian slavery (Gen 37:27, 28, 36; 45:4). But when Joseph revealed his identity to his astonished brothers he said, "Be not grieved, not angry, with yourselves that you sold me here, for God sent me ahead of you to preserve life" (Gen 45:5) and more pointedly in Gen 50:20, "You devised it for evil but God planned it for my good."

Esau sold his birthright (Gen 25:31, 33). Thus he forfeited his right to be the chief heir for a little soup. The Nuzu tablets (c. 1500 B.C.) witness two other cases of men yielding inheritance rights to a younger brother for some immediate temporal consideration.

One passage uses the verb figuratively, "buying the truth and selling it not" (Prov 23:23). Perhaps the Israelite king, Ahab, illustrates that passage, since "he sold himself to work wickedness" under the instigation of his pagan wife,

Jezebel (I Kgs 21:20, 25). Unfortunately, the same could be said for all Israel (II Kgs 17:17): completely committed and sold out to accomplish wickedness!

meker. *Value.* Used in four passages, only one of which is significant here. Proverbs 31:10 mentions the "virtuous woman," who has a value far above rubies. The reason is apparent from the description given of her in the context.

mimkār. *Sale, ware.* Most of the passages using *mimkār* deal with the sale or things sold as collateral and how one goes about redeeming them in the year of Jubilee (Lev 25:14, 27, 29, 33, 50; see also Neh 13:20).

1195e מִלְּאָ (*millū'*), מִלְּאָ (*millū'*) *setting, installation.*

1195f מִלְּאָת (*millē't*) *setting, border, rim.*
Meaning dubious.

Examination of 249 occurrences of this verb (in the Qal and Niphal) reveals that it can have either a spatial signification or by extension the important theological concept of temporal signification.

The spatial signification is found in Ex 10:6, the locusts filling the houses, Joel 3:13 [H 4:13], the winepress full of juice, and II Kgs 4:6, the widow pouring oil into empty vessels until they are full.

The temporal signification is seen in the completion of a fixed time, e.g. the days of Rebekah's pregnancy, which were fulfilled when she gave birth (Gen 25:25), the seven days that had elapsed, i.e., ended, were full after the Lord struck the Nile (Ex 7:25), and the three weeks which were completed while Daniel fasted (Dan 10:3).

Even more significant is the use of this term to represent the omnipresence of God: "Do not I fill heaven and earth? says the Lord" (Jer 23:24). He is not only universally present and fills the whole earth with his glory (Num 14:21; Ps 72:19; Isa 6:3), but he is also locally visible by his glory (*kābōd*) in the cloud which fills the tabernacle (Ex 40:34–35; I Kgs 8:10–11; Isa 6:1; Ezk 10:3; 43:5; 44:4).

This term is also used of God's ability to finish a work begun or accomplish a word promised. The Piel form of *ml'* seems to emphasize the fulfillment of utterances.

Men fulfill their words when they practice idolatry as they said they would (Jer 44:25). When Solomon expelled Abiathar from his priesthood, Eli's words were fulfilled (I Kgs 2:27) just as Jeremiah's words were fulfilled by the seventy-year exile (II Chr 36:21). God acted to fulfill his word spoken to David when he built the temple (I Kgs 8:15, 24; II Chr 6:4, 15). God will also act to fulfill the counsel and petition of his Messiah (Ps 20:4, 5 [H 5, 6]).

Von Rad lists other theological terms that show how the Lord's prophetic word functioned in history: "does not fail" (*lō'-nāpal* Josh 24:45 [H 43]; 23:14; I Kgs 8:56; II Kgs 10:10); "it will be established" (*qūm*, I Sam 1:23; 15:11, 13; II Sam 7:25; I Kgs 2:4; 6:12); "it comes to pass" (*bō*, Josh 23:15); cf. also Ezk 12:25, 28, "Thus has the Lord Yahweh spoken: None of my words will be delayed any longer; the word which I speak is performed, says the Lord, Yahweh" (*Theology of the Old Testament*, II, p. 94).

The Piel form of *mālē'* is also used to denote a period of time, i.e. number of days (Gen 29:27–28), years (II Chr 36:21) or length of gestation (Job 39:2) which must be completed. Consequently, the emphasis is not to be placed solely on the predicted word, but also on the faithful God who will achieve, perfect, and do what was said: The time between the prediction and its fulfillment contains significant happenings which evidence this same powerful and faithful God who continues to fill chronological time (*chronos*) with opportune moments (*kairoi*). This belongs generically to that final achievement of all that the word promised (cf. NT *pleroun*, Heb. *kālā*, Gr. *teleō*, Heb. *tāman*, Gr. *teleō*). Interestingly enough, Moule, citing J. A. Fitzmyer, says that "Qumran literature lacks both the fulfillment formula found in Matthew and also the 'pattern' in the use of the Old Testament . . . [found] in the New Testament . . . [and] scarcely any examples of the use of *ml'* in a phrase referring to the confirmation or completion of God's promises or plan" ("Fulfillment-Words in the New Testament," p. 309).

In figurative expressions, the earth is often portrayed as full of violence (Gen 6:13; Mic 6:12;

Jer 23:10; 51:5; Ezk 7:22) and sometimes as full of the glory, mercy, goodness, and knowledge of the Lord (Ps 33:5; 119:64; Isa 11:9; Hab 3:3). The land can be filled with sin (Jer 16:18; Ezk 8:17). "To fill one's hand" (with sacrifices) is "to consecrate" one's service (I Chr 29:5; Ex 32:29) or a priest (Jud 17:5). Likewise to fulfill the desire of a man is "to satisfy" him (Ex 15:9).

m^olō'. Fullness. It means "what fills up" a large number. Gen 48:19 has Jacob predict that Joseph's son Ephraim would become a multitude of nations or as the NEB has it, "a whole nation in themselves" just as Isa 31:4 speaks of a mass or multitude of shepherds.

Most frequently this word is used with land and speaks of the fullness or the entire contents belonging to the Lord (Deut 33:16; Ps 24:1) or to the threatening invader (Mic 1:2; Amos 6:8 [i.e. of the city]; Jer 8:16; 47:2; Ezk 12:19; 19:7). But when Isaiah witnessed the vision of his call, the whole earth was full of his glory (Isa 6:3).

The Lord claims all the inhabited world (*tēbēl*) as his own along with all of its contents (Ps 50:12; 89:11 [H 12]; 98:7; Isa 42:10; I Chr 16:32). Indeed, even the sea is invited to sing and roar in praise to the Lord with all of its contents (Ps 96:11).

The other significant theological usage occurs in the reference to the homer-full of manna stored in the presence of the Lord, in the ark (Ex 16:33).

- 1196 *מָלַח (*mālāḥ) *I*, *tear away, dissipate*. Occurs only in the Niphal, in Isa 51:6, *shāmayim ke'āshān nimlāhū* "the heavens will vanish like smoke" (NIV).

Derivative

- 1196a מְלָח (*melāḥ) *rag* (Jer 38:11-12).

- 1197 מָלַח (*mālāḥ) *II*, *salt, season*. Denominative verb.

Parent Noun

- 1197a מְלָח (*melāḥ) *salt*.

- 1197b מְלָחָה (*m^olēhā) *saltiness, barrenness*.

- 1197c מְלִיָּה (*mallūah) *mallow, a plant which grows in salt marshes* (Job 30:4).

- 1197d מְלָח (*mallāḥ) *mariner*.

Only three passages use this denominative verb. According to Lev 2:13, the meal offering is to be seasoned with salt. In Ex 30:35 the ingredients used in compounding incense were to be salted (קָיַן, "tempered together").

Nowhere does there occur the aspect of entering into friendly relations by eating bread and salt together. Arab society to this day retains such expressions as "there is salt between us" or "I love you as I love salt."

The third passage is Ezk 16:4, which uses a Hophal perfect and infinitive absolute to describe a newborn baby being rubbed or washed with salt. Probably this is merely to cleanse and heal the child rather than to establish any covenant [of salt] between the newborn and God. We may hope the salt solution was dilute!

melāḥ. Salt. Various uses of salt are mentioned in twenty-eight passages of the OT. It was obtained from large quarries located on the southwest side of the Dead Sea (Gen 19:26; Ezk 47:11; Zeph 2:9). In Job 6:6 it is mentioned as a condiment. Salt and oil were always mixed with the meal offering (Lev 2:13). Ezekiel 43:24 notes that the priest will cast salt on the burnt offerings of the millennial age. The incense offering, the symbol of public worship to God, must also be "seasoned with salt" (Ex 30:35). Some hold that salt in these offerings represents that which prevents putrefaction, while honey and leaven do not prevent it and were excluded for that reason. Others point out that the use of salt as a preservative is not clear in the Bible. The burnt offerings, at least, were not to be kept and incense does not putrefy. Therefore the use of salt in these offerings may be a matter of seasoning or of dedication, for salt was an item of value. Honey, on the other hand, does not easily putrefy.

The term "covenant of salt" is applied to the perpetual statute by which revenue was to be given to the priests (Num 18:19), and to the covenant established with David whereby he was accorded an everlasting reign over Israel (II Chr 13:5). These relationships are thereby designated as irrevocable and binding (see also Lev 2:13).

The preservative qualities of salt are perhaps seen in the prophet Elisha's using it to purify the spring at Jericho (II Kgs 2:20-21), though the ef-

ficacy here was miraculous. On the other hand, salt was scattered over the site of a city devoted to God for destruction (Jud 9:45) which thus became the symbol of barrenness and desolation (see also Deut 29:23 [H 22]; Job 39:6; Zeph 2:9).

מִלְחָמָה (*milḥāmā*). See no. 1104c.

- 1198 *מָלַץ (*mālaṭ*) *be delivered, escape (Niphal); deliver, save (Piel)*. ASV and RSV similar. BDB "slip away."

Derivative

- 1198a מֶלֶט (*meleṭ*) *clay (flooring)*. RSV mortar. Occurs only in Jer 43:9, an object lesson of the coming destruction of Egypt.

mlṭ is one word of the cluster that includes *gā'al*, *yāsha'*, *nāṣal*, *pālaṭ* and *shālôm*. These words are translated in the LXX by several Greek words: *sōzō* (including *diasōzō* and *anasōzō*) about seventy times, *hryomai* eight times, and *exaireō* five times. This distribution suggests that they have similar meanings with somewhat different emphases.

Although *mālaṭ* may denote escape from court services to see one's relatives (I Sam 20:29) or deliverance of the needy from affliction (Job 29:12), the most prominent facet of meaning is of deliverance or escape from the threat of death, either at the hands of a personal enemy (I Sam 19:11; 23:13) or a national enemy (II Sam 19:10), or by sickness (Ps 107:20).

The usual emphasis is on the role of Yahweh in deliverance (particularly paralleling the LXX *hryomai*; Ps 116:4; 107:20; 22:5 [H 6]). His salvation is for the righteous (Prov 28:26; Job 22:30) but his judgment on sin cannot be escaped (I Kgs 19:17; Amos 2:14–15). Deliverance is possible only for those who call on him (Joel 2:32 [H 3:5]). He is the protecting, delivering God. By contrast, escape is not found in the strength of a horse (Ps 33:17), the might of another nation (Isa 21:6), riches (Job 20:20), or in one's own understanding.

מְלִישָׁה (*m'ṣiṣā*). See no. 1113b.

- 1199 מַלַּךְ (*mālak*) *I, be, become king or queen, reign*. Denominative verb.

Parent Noun

- 1199a מֶלֶךְ (*melek*) *king*.
 1199b מַלְכָּה (*malkā*) *queen*.
 1199c מְלֶכֶת (*m'leket*) *queen*.
 1199d מְלֻכָּה (*m'lūkā*) *kingship, royalty*.
 1199e מַלְכוּת (*malkūt*) *sovereign power*.
 1199f מַמְלָכָה (*mamlākā*) *sovereignty*.
 1199g מַמְלָכוּת (*mamlākūt*) *sovereignty*.
 1199h מֹלֶךְ (*mōlek*) *Molech, a pagan god*.
 1199i מֶלֶךְ-שֶׁדֶק (*malki-sedeq*) *Melchizedek*.

Since Semitic nouns are usually derived from verbs, the reverse is always a signal to look to the noun for the essential meaning. *mālak*, though employed over three hundred times, appears only in Qal and Hiphil stems (except for one Hophal, Dan 9:1). The meaning of the Qal (over two hundred times) is always "to reign," i.e. to be and exercise functions of a monarch, whether male (king) or female (queen).

The normal sense of the Hiphil of *mālak* would be to cause to be king (or queen) and such is the case—"make king, cause to reign." This can be the act of inauguration by anointing (II Sam 2:9; 5:17) or anointing and crowning (II Chr 23:11). It can also be the act of God or men in exalting a man to such an office, the ceremony not being considered (I Sam 15:35; I Kgs 12:20). The Hophal, employed only once, at Dan 9:1, seems specifically to indicate that Darius was not regarded by the author, Daniel, as supreme monarch of the Medo-Persian empire but rather was made (passive voice) sub-*melek* at Babylon, an important but secondary, city and area of the realm.

melek. King. Since the Bible was written when sovereignty (seat of authority) in civil government was viewed somewhat differently than it is today, officials and functionaries whom men today would designate by other titles (commandant, governor, chieftain, etc.) are regularly designated *melek*. That thirty-one columns, averaging about eighty-five entries per column, are devoted in *Englishman's Hebrew and Chaldean Concordance* to this word is an indication of its prevalence in the OT.

melek is simply the most common word for chief magistrate and is similar in meaning to several other words usually translated lord, captain, ruler, prince, chief and such like: *nāgid*, *nādīb*, *nāsik*, *nāsi'*, *qāṣin*, *rōzēn* (always pl.), *ṣar* (very frequent). As nearly as can be determined, none of these terms is consistently employed in the Hebrew Scriptures to designate a well-defined office. Conclusions based on the use of one or another of them are precarious, as for example that *nāgid* always designates Gentile rather than Israelite magistrates or the other way around.

The essential theology of the OT with reference

to *melek* (king) is not to be obtained merely by examining the over 2500 occurrences of the word. Rather we must examine the OT idea of magistracy, i.e., of civil authority. Underlying all civil society was *consuetudinary*, i.e. common or customary law. No state then (including the Mosaic) or now could operate by statutory laws alone. Furthermore, civil government was the rule of magistrates. They were rulers (*šarim*) in a greater sense than are rulers in the West today. For though responsible to statutory law and to custom, part of the custom was to rely simply on decisions of the magistrate—for whom there are many designations (see above)—to supply whatever leadership, control, and support people expected from their government. Government, therefore, in a degree much greater than in any Western land, was rule by just (hopefully) men rather than by laws that were just.

Proverbs 8:15–16 supplies a locus of materials for our search for a theology of the king or supreme magistrate: “By me [wisdom] kings reign, And princes decree justice. By me rulers rule, And nobles, even all the judges of the earth.” The least definite is king, the first. Let the four others amplify the idea of kingship. “Princes” (singular *rōzēn*) occurs only six times, always in poetry. By reference to a cognate Arabic word it is understood to mean one who is “weighty, grave, firm of judgment”—incapable of being shaken, of majestic repose, dignified in speech and action as befits one invested with great power. “Rulers” (*šarim*), a common word means head man, one of recognized authority in whatever realm he operates (“powers that be,” Rom 12:1). There is no metaphor when leading merchants are denominated princes (*šarim*, Isa 22:8). Certain angels are called *šarim* (Dan 10:13, 21). “Nobles” (sing. *nādib*) is one inclined toward liberality, of noble character, hence also of position. “Judges” (sing. *šōpēt* < *shāpat* q.v.) is perhaps the most comprehensive term for one who exercises civil authority, whether executive, judicial, or legislative. A sixth word, *nāgid* is a favorite name for Hebrew kings, twice occurring in Prov (8:6; 28:16), means one who stands in front.

These are the main or ideas about kings and other rulers. Though rulers were to be benign, the idea of democracy, that authority moves from people to rulers, is difficult to find in the Bible. Rulers were thought to be constituted by divine authority rather than human. To come before the judge was to come before God (Ex 22:8, 9 [H 7–8]). It is to be observed that in Ex 22:9 [H 8], *’ēlōhim* must be rendered magistrates (pl.) rather than God (sing.), for the verb *yarshi’ūn* is Hiphil third person masculine plural of *rāsha’* “to condemn.”

The term *melek* appears in modified form in almost every Semitic language with approxi-

mately the same meaning (BDB in loc.). The Hebrew idea was shared everywhere in oriental antiquity.

We must guard against assigning consistent technical meaning to *melek*, even when clearly literally intended. It can mean emperor (of an empire) as in the case of Nebuchadrezzar king of Babylon (Jer 46:2), or one of an emperor’s vassals as in the case of Jehoiakim, king of Judah (Jer 46:2) or the chieftain of a tiny city-state such as the Canaanite and Philistine towns (e.g., Gen 14:2–8; 20:2; 26:1, 8; many times in Josh). One of a joint-rulership or, possibly, triumvirate such as we now know Belshazzar to have been (Dan 5:11, Aram. equivalent to Heb. here) or a subordinate governor of a province as Darius ruler over Babylon under Cyrus emperor of Persia (Dan 5:30) might likewise be called *melek*.

Two important related matters must be noted.

1. *The place of kingship in Israel.* There was no magistrate called King in Israel in earliest times. Civil authority was wielded in patriarchal times by tribal elders, in early years of the settlement, by village and tribal elders. During the time of the *shōph’im* (usually, but misleadingly, rendered “judges”) there were temporary charismatic (in the proper sense: by divine gift) heads of tribal alliances. But ancient ideas of monarchy usually (but not invariably) associated dynasty with kingship. The books of Samuel tell the story of the first effort, against the express will of God, to establish a permanent national monarchy. Though dynasty was desired by the house of Saul, Providence prevented it. But kingship had been anticipated in Mosaic Law (Deut 17:14–20; 28:36) and God established David and his dynasty forever over Israel. As Bright says, “The theology of Davidic kingship is best seen in the royal psalms [Royal psalms include: Ps 2; 18 (II Sam, ch. 22); 20; 21; 45; 72; 89; 101; 110; 132; 144:1–11], which, though they cannot be dated precisely, are all preexilic and for the most part relatively early. Its classical expression, however, is in the oracle of Nathan (II Sam 7:4–17), a piece undoubtedly developing an ancient nucleus (cf. also II Sam 6; I Kgs 8). It is also found in the old poem of II Sam 23:1–7, ascribed to David himself. The tradition is by no means incredible: cf. O. Procksh, “Die letzten Worte Davids” (BWANT, 13 [1913], pp. 112–125); A. R. Johnson, *Sacral Kingship in Ancient Israel* (Cardiff, University of Wales Press, 1955, p. 15)—where there is further bibliography. The substance of this theology is that Yahweh’s choice of Zion and the Davidic house is eternal (Ps 89:3 [H 4]; 132:11–14): though kings might for their sins be chastened, the dynasty would never be cut off (II Sam 7:14–16; Ps 89:19–37 [H 20–38]). The king ruled as Yahweh’s “son” (Ps 2:7; II Sam 7:14), his “first-born” (Ps 89:27 [H 28]), his “anointed”

(Ps 2:2; 18:50 [H 51] [H 7]; 20:6). Because he was established by Yahweh in Zion, no foe would prevail against him (Ps 2:1-6; 18:31-45 [H 32-46] [H 8-13]; 21:7-12; 132: 17 f.; 144:10 f.); on the contrary, foreign nations would submit to his rule (Ps 2:7-12; 18:44 [H 45]f.; 72:8-11). The Davidic covenant developed the pattern of the patriarchal covenant, in that it was based in Yahweh's unconditional promises for the future [See G. E. Mendenhall, *Law and Covenant in Israel and the Ancient Near East* (The Biblical Colloquium, 1955)]" (John Bright, *A History of Israel*, Westminster, 1959, p. 204).

2. *The relation of king and the national religion and ritual (cult).* As seen above, the king was a sacred person—he ruled in a divinely appointed estate and by divine authority (see also R. D. Culver, *Toward a Biblical View of Civil Government*, Moody, 1975, pp. 41-55, 74-76, 87, 88, 123, 129, 169, 170, 251). But he had no place in the priesthood. To intrude into that holy office was regarded as grossest sin (cf. the case of Saul's invasion of the priest's office, I Sam 13:1-14).

There is a school of radical biblical-historical thought which asserts that Israel's practice of kingship, being borrowed from the pagan neighbors (II Sam 8, esp. v. 20), involved also a pagan theory and a ritual pattern to express it, supposed to be common in the ancient near east. According to this view the king, being in theory a divine king, became the central figure in an annual new year festival, dramatically enacting the dying and rising again (as the seasons) of the fertility deity. Therein the king ritually (as a sort of *pontifex maximus*, high priest) re-enacted the struggle of creation, subsequent victory over the powers of chaos, and a sacred marriage and then re-assumed his actual throne. All this, it is said, was to ensure the spring revival of nature and the fruitfulness of field and flock for another annual cycle of the seasons, as well as stable government for the year. This theory is stoutly maintained with variations by a large number of scholars (A. Bentzen, *King and Messiah* [Eng. tr., London: Lutterworth Press, 1955]; I. Engnell, *Studies in Divine Kingship in the Ancient Near East* [Uppsala: Almqvist and Wiksells, 1943]; S. H. Hooke, ed., *Myth and Ritual* [London: Oxford Univ. Press, 1933]; *The Labyrinth* [London: S.P.C.K., 1935]; G. Widengren, *Sacrales Koenigtum im Alten Testament und im Judentum* [Stuttgart: W. Kohlhammer, 1955]). But though many of the psalms are alleged by these writers to reflect the annual ritual described above, the theory is really without a shred of biblical evidence and there are scholars who throw much doubt on the whole idea (See bibliography, especially Frankfort who points out that although the king was deified in Egypt he was not in Mesopotamia, with rare exceptions.)

malkā. *Queen*, except for twice in plural at Song 6:8-9 always of foreigners, sometimes apparently head of state (I Kgs 10:1), more frequently a king's consort (Est 1:9; 2:22). In the case of females: Athaliah, (II Kgs 11:3; II Chr 22:12), Esther (Est 2:4), Vashti (Est 1:9), and Nebuchadnezzar's consort (Dan 5:10), the circumstances vary the meaning. In the former the usurping, murderous grandmother employs power illegitimately. The latter exercised no civil power at all, being only the favored consort of the *melek*. As a *malkā*, Esther had no monarchical power but only such as her social position as king's consort supplied. Of the thirty-three (thirty-five with Aramaic of Dan 5:10) appearances of *malkā*, all save two (Song 6:8-9) refer to queens of foreign lands. The "queen" in oriental antiquity was not usually the king's wife and she was not usually a reigning person, so the name for her position was not normally the feminine form of *melek* but rather *g^ebirā*, meaning great lady (I Kgs 11:19; 15:13; II Chr 15:16; Jer 13:18; 29:2). The "queen (*m^eleket*) of heaven" (Jer 7:18; 44:17, 18, 19, 25) was a pagan female deity worshiped at Jerusalem. The word may be a proper name. (Also, rarely, *sārā*, and *shēgāl*, are used of kings' consorts).

m^eleket. Infrequent difficult form indicating a certain pagan queen of heaven (Jer 7:18).

mōlek. *Molech* (מֹלֵךְ, followed by most modern versions) or *molek*. The name found in the Hebrew Bible for the pagan male deity, presumably borrowed from Israel's neighbors, to whom apostate Israelites sacrificed infants in the valley of Hinnom immediately south of Jerusalem. The consonants, *mlk*, are the word *melek* "(divine) king," while the vowels are those which the Masoretes, following immemorial custom, supplied from the Hebrew word *boshet* "shame." Just what the synagogue reader, say in Jesus' time, may have read—*bosheth*, *melek* or *molek*—is hard to say. It is even rendered *moloch* (μολοχ) in the LXX, which also renders it "their king" (I Kgs 11:7 [H 5]) and "the king Moloch" (Jer 32:35 [H 39:25]).

Molech (= *Milcam*) was a favorite of the Ammonites, worshiped by human sacrifice (I Kgs 11:5; II Kgs 23:10; Jer 32:35) but the god and the dreadful practice of infant sacrifice in his honor were carried by northern Canaanite (Phoenician, Punic) people throughout the Mediterranean area. Waltke (ZPEB, V, pp. 269-70) gives an excellent discussion and bibliography as also Helmbold (WBE, II, pp. 705-6). *National Geographic* provides a popular description of the Phoenicians and their worship of Baal-Maloch (August 1974, pp. 166-67).

In biblical thought Moloch is connected forever with the ultimate in apostate worship of a

false *melek* by the people who should have worshipped only Jehovah "their king" [*Milcam*]. The two worst apostates among the kings of Israel and Judah, Ahab and Manasseh, promoted it in the ravine later called *Gehenna* (NT) which became the name thereby of eternal hellfire. See II Kgs 16:3; II Chr 28:3; II Kgs 26:6; II Chr 33:68, *vid.* also Jer 7:31; 32:15). Pious horror of the practice, with lurid—perhaps accurate description—is to be found in Jewish sources. David Kimchi says the image of Moloch was of brass and was hollow. A fire was kindled within the idol. When the extended hands became hot, Moloch's priest taking the babe from its father's hand, placed it in Moloch's hands to the accompaniment of drums to prevent the father from hearing the screams of his dying offspring (comments on II Kgs 23:10).

For further study cf. YGC pp. 234–244. Albright's view is that the *mōlech* sacrifice was not to a god *molech*, but was the royal sacrifice, i.e. the extreme sacrifice of infants. It was common in Carthage. Albright gives credit to Israel's higher standards for the diminishing of the practice in her neighbor Phoenicia.

malki-šedeq. Melchizedek. This name occurs only in Gen 14:18 and Ps 110:4. Formed from *melek* "king" and *šedeq* "righteous," with the transitional hireq yod. Whether it indicates a construct (possessive) relation or the first personal singular pronominal suffix is a matter of dispute. If the former were true, the name would mean "king of righteous [one?]" ; if the latter, "my king is righteous." "Salem" almost certainly refers to Jerusalem. The geography of the campaign in Gen 14 allows it. The similarity of "Adonizedek," king of Jerusalem (Josh 10:1) supports it. Comparison with David, king of Jerusalem (Ps 110:4), cements the connection with Jerusalem. The appearance of Melchizedek in the Bible is important theologically. It lends strong support for the notion that knowledge of the true God possessed by Noah and his sons did not die out. Monotheist Abraham (Gen 18:25) forthrightly acknowledged Melchizedek as priest of the same 'ēl 'elyōn "God Most High," whom Abraham worshipped (Gen 14:18–20). We simply do not know how many Melchizedek-like persons, under more stress than Lot (II Pet 2:6–8), survived the pervasive idolatry of the ancient world. We inevitably think of Job. There were the monotheistic-like views of the fourth century B.C. philosophers of Athens and of Akhenaton, youthful pharaoh of Egypt who lived a millennium earlier. Similar sentiments were expressed in Vedic literature. In the person of Melchizedek we find evidence of an ancient near eastern tradition of true worship at Jerusalem long before Ornan the Jebusite transferred title of the rocky

"Mount Moriah" to the crown (II Sam 24:18–25; I Chr 21:18–30). Perhaps Moses knew already something of "the place which the LORD your God shall choose" for the central sanctuary (Deut 12:5). The book of Hebrews, building on the announcement of Messiah's non-Aaronic priesthood in Psalm 110 elaborates the doctrine of our Lord's completely successful priesthood on this textual basis (Heb 6:20; 7:1–8:13).

R.D.C.

- 1200 מַלְאֵךְ (*mālak*) *II, counsel, advise.* Occurs only in the Niphal, in Neh 5:7, "I consulted with myself."

מַלְכֶּדֶת (*mal'kōdet*). See no. 1115b.

מַלְכִּי-שֶׁדֶק (*malki-šedeq*) See no. 1199i.

מַלְכֶּת (*m'leket*), מַלְכוּת (*malkūt*). See nos. 1199c,e.

- 1201 מַלְלָה (*mālāl*) *I, say, utter, speak.*

Derivative

- 1201a מִלְלָה (*millā*) *word, speech.*

mālāl occurs only on the lips of Sarah, Bildad, Elihu, and a psalmist (Gen 21:7; Job 33:3; 8:2; Ps 106:2) and only in the Piel. Its major synonym is *dābar*(q.v.).

millā. *Word, speaking, speech, talking, by word, what to say, anything to say, answer, matter;* in the Aramaic of Daniel: thing, words, matter, commandment.

millā occurs thirty-four times in Job, once in II Sam, twice in Ps, once in Prov, and twenty-four times in Daniel. There seems to be no discernible difference in usage between *millā* and *dābār* through *millā* might relate more to word as expression and *dābār* as meaning.

In the first three verses of II Sam 23 four words for speech occur including *millā* (v. 2), "his word was in my tongue." In Prov 23:9 "the wisdom of thy words," *millā* is parallel with *dābār* (v. 8). For the revelation of God (Ps 19) among the terms used is *millā* (v. 4), "words to the end of the world." The Psalmist in 139:4 says God's knowledge extends to every word on the Psalmist's tongue.

In Job (KJV) *millā* is "words" nineteen times, "speech" or "speeches" six times, "speaking" twice, while "talking, byword, matter, anything to say, answer, to speak, what to say" each

once—all speaking of the arguments advanced by Job and his friends.

In Daniel *millā* refers to the substance of dreams, the interpretation of dreams, or to various official statements, decrees or verdicts. Of the twenty-four references only seven are translated by "word" or "words," while "thing" or "things" occur eleven times, "matter" five and "commandment" once.

- 1208 מַמְרֵא (*mamrē'*) **Mamre**, LXX Mambrē.

This name first appears in Gen 13:18 as the site where Abraham settled after his separation from Lot. Genesis 14:13, 24, make it evident that at this time the area was not a town, but the personal property of an Amorite named Mamre. He and his two brothers Eshcol and Aner had entered an alliance with Abraham against the con-

federacy that had captured Lot. The relationship seems to have been mutually beneficial—use of the land in exchange for military support (Gen 14:13).

The site is usually identified with Rāmat el-Khalil (Ḥalul) about two miles north of Hebron, just east of the main road, although the traditional location of the Cave of Machpelah "east of Mamre" which became the patriarchal tomb (Gen 23:19–20; 25:9; 35:27; 49:30; 50:13), is in the city of Hebron itself.

Mamre was the place where Abraham received the promise of Isaac's birth (Gen 18:1–15) and the destruction of Sodom and Gomorrah (cf. Heb 13:2). It was not this event, however, that made the site a holy place. Abraham had already built an altar to Yahweh at his campground (Gen 13:18).

- 1209 מָן (*mān*) **I, manna**.

Manna was the basic food of the Israelites during their wilderness wanderings. It occurred along with the miraculous provision of water and quail. The English spelling "manna" is derived from the LXX. In Ex 16:14 the LXX reads "man" but elsewhere "manna."

Although manna played a crucial role in the life of the Israelites, the word appears only fourteen times in the OT, all but four of them occurring in Ex 16, Num 11, and Deut 8. Manna is called the "bread" from God (*lehem*, Ex 16:15), "food" from heaven (*d'gan*, Ps 78:24, ASV), and "angel's food" (*lehem 'abbirim*, Ps 78:25). The translation "angel's food," while picturesque, is not accurate. The ASV "bread of the mighty" is preferable. There is no other instance of "angel" being used to translate *'abbirim*. "Mighty" or "strong" is more usual, and fits the parallel structure of the Psalm better. Possibly it could be "bread of God" using the word *'ābir* (q.v.) as a surrogate for deity (cf. Jn 6:33).

The Israelites ate manna from the middle of the second month after the Exodus (Ex 16) until the day of their arrival in Canaan (Josh 5:12; Ex 16:35). Only the portion preserved by Aaron in the tabernacle remained after that time. According to Deut 8:3, 16, the purpose of the giving of

the manna was to teach God's people to depend upon him and his words for their lives and their needs. If the Word of God is his creative instrument in bringing the cosmos into existence (Gen 1:3ff; Ps 33:6, 9), then here too what God utters from his mouth is concretely realized. Man can only survive by depending on his saving creative Word. (Note the use of Deut 8:3 by Jesus in his response to Satan's temptation to turn stones to bread in Mt 4:4 and Lk 4:4. John 6 develops at length the role of Jesus as the true manna.)

There have been many attempts to identify manna with some natural edible substance found in western Sinai. The most widely held theory identifies the manna with a secretion from the tamarisk tree (*Tamarix gallica*). Certain types of insects puncture the bark and small, sticky, light-colored drops of sap crystallize on the twigs or drop to the ground. In the cool of the morning, before the hot sun melts them, these sweet particles can be gathered and eaten. There are obvious resemblances between this natural phenomenon and the biblical manna: both appear in the morning "with the dew" (Num 11:9); the material looks like small white globules or flakes (Ex 16:14, 31; Num 11:7; the description "appearance of bdellium" was interpreted by the rabbis as "like pearls," LXX *kryystallos*); the taste is sweet, "like wafers made with honey and oil" (Ex 16:31; Num 11:8); and both substances melt in the sun (Ex 16:21).

However, there are also differences between these two substances. Manna could be ground or milled, baked or boiled (Ex 16:23; Num 11:8); the tamarisk secretion cannot be processed this way. Only on the sabbath could the manna be kept for more than a day without becoming wormy. The tamarisk secretion occurs only for a few weeks in the summer, while manna was a daily provision for forty years in the Negev as well as western Sinai, suddenly ceasing when Israel entered Canaan. This suggests that in fact the manna was a miraculous provision for the nation.

G.L.C.

1210 מָן (*mān*) II, *what, who, whomsoever*.

Exodus 16:15 contains the only use in the Hebrew OT of the interrogative pronoun *mān*. The KJV, ASV (marg), and RSV (marg) translate *mān-hi'* as "it is manna," while KJV (marg) and the texts of ASV and RSV translate "what is it?" The comment "they did not know what it was" indicates that the ASV and RSV translation is to be preferred over the KJV. Most contemporary scholars follow BDB in identifying *mān* as a late popular etymology of *mān* "manna" based on the late Aramaic usage. *mān* is not the common OT word for "what," but this usage is not unknown in the second millennium B.C. UT 19: no. 1504 lists sev-

eral occurrences of *mn(m)*, both personal "who" and impersonal "what." It appears that *mān* "what" is a common Semitic word—not a "popular etymology." (See also Huffmon, Herbert B., *Amorite Personal Names in the Mari Texts*, Johns Hopkins, 1965, pp. 103, 231.)

Bibliography: TDNT, IV, pp. 462–65.

G.L.C.

1211 מֵן (*mēn*) *string of harp* (Ps 150:4).

1212 מִן (*min*) *from, out of, more than*.

This ubiquitous preposition has cognates in Aramaic and Arabic, but is not found in Ugaritic. There the meaning "from" is found in the prepositions *b* and *l*. In form, the preposition is often attached to its noun with the nun assimilated and the next letter doubled (if it is not a laryngeal). When used with light pronoun endings it is usually reduplicated (e.g. *mimmenni* "from me").

The many usages may be briefly classified, but various nuances will be adopted in translation.

First "from." With verbs of motion or separation: to go from, or to be away from, i.e. without; or away from in relation to some other spot or direction, therefore: on the east or beside a city.

Second, with other verbs, it means out of, e.g. out of Egypt. It is used for material out of which something is made. Allied with this is the causal force: to shake from the noise, or on account of our transgressions.

Third is the partitive *min*: He took some of, or even, one of. This last becomes anyone, a single hair, etc.

Fourth, used of time it usually means time from when, e.g. from antiquity. From of old can be used to mean in olden time.

Fifth, *min* is often used in comparisons to mean more than, above, beyond, etc., sometimes too much for, too great for.

Sixth, it may be prefixed to an infinitive in which case its causal force or consequential meaning comes out: because he knew, so as not to give. If the verb "to be" is understood: from being king, i.e. not to be king.

Like other Hebrew prepositions it is used in many combinations. *min* plus 'ad means literally from . . . to, or inclusively, both this and that. *min* combines with 'et "with," with *l* "to." Sometimes when the *l* precedes it practically loses its own force and just means "when," i.e. time from when.

b and *l* include the meaning "from" in Hebrew as well as in Ugaritic. An interesting case of the interchange is II Sam 22:14, "He thundered from the heavens," which has *min* but *b* in the parallel in Ps 18:13 [H 14] but two verses later the situation is reversed. N. Sarna has remarked that this

usage of *b* for *min* was held by medieval Jewish grammarians before Ugaritic was discovered ("The Interchangeability of the Prepositions Beth and Min in Biblical Hebrew," JBL 78:310–16). It is not so clear that *min* can mean "in," though Dahood argues that it does (AB, *Psalms* III, pp. 395–96).

R.L.H.

מֵן (*mēn*). See no. 1215a.

מַנְיָנָה (*manjīnā*). See no. 1291.1b.

1213 מָנָה (*mānā*) *count, number, tell, appoint, prepare.*

Derivatives

- 1213a מָנָה (*mānā*) *portion, part.*
 1213b מָנָה (*māneh*) *pound, maneh, mina.*
 1213c מָנָה (*mōneh*) *counted number, time.*
 1213d מִנָּה (*m'nat*) *portion.*
 1213e מִנִּי (*m'ni*) *number.*
 1213f מָנוֹן (*mānōn*) *grief.*

The primary meaning in the Qal and Niphal is "to count or number." The intensive stems place heavier stress on the idea of appointing or assigning. *mānā* occurs in parallel with *sāpar* (q.v.). The root plus its derivatives occurs some fifty-five times, not counting six uses of the Aramaic cognate *m'nā* or *m'nā*.

The normal use of the root in the Qal and Niphal is in the context of arithmetical computations of various sorts. People (II Sam 24:1), money (II Kgs 12:11), animals (Jer 33:13), stars (Ps 147:4), days (Ps 90:12), dust (Gen 13:16), are all reckoned this way. *mānā* can be used negatively also, in the sense of an infinite number that cannot be computed (e.g. Gen 13:16; Eccl 1:15).

Twice the intensive use "reckon" or "assign a place" is apparent in the simple stems. In Isa 53:12, the Servant is assigned a place with sinners. In Isa 65:12 the prophet puns on the name *Meni*, the god of fate (q.v.), "Destiny," with the promise that God will "destine" idolaters to the sword.

The idea appoint or ordain is usual in the intensive stems. Twice in Dan (1:5, 10) and four times in Jon (1:17 [H 2:1]; 4:6–8), inanimate things—Daniel's food, Jonah's fish, the gourd, worm, and hot wind—are under the control of God. In Dan 1:11 and I Chr 9:29, a hierarchy of authority is identified by *mānā* as men or other creatures are given specific responsibilities.

Dahood (in *Psalms*, AB, XVII), following the Ugaritic example, identifies the *mn* of Ps 61:7 [H 8] and *mnw* of Job 7:3 as Qal forms rather than as Piels. However he retains the sense of appoint rather than the more usual Qal idea of computation. Similarly, although in Ps 68:23 [H 24], KJV

translates *minēhū* "in the same" (i.e. "in the blood of thine enemies"), ASV and RSV "their portion" take the word as from this root.

There may be some suggestion in this use of *mānā* that the power to number, count, or ordain is a somewhat mysterious power, particularly where large numbers are concerned, and is of divine origin. The role of God in ordering the universe and its creatures is evident in the reference to the stars (Ps 147:4) and the numbering of the descendants of Abraham (Gen 13:16). The specific idea conveyed by (e.g.) the Jonah passages reflects this divine activity.

This perspective illuminates the statement in I Chr 21:1 that Satan provoked David to "number" Israel. If "numbering" is, in fact, a divine activity, Satan's incursion into this field is another of his attempts to usurp the divine prerogatives.

[On the other hand, according to the superscription of Ps 30, this lament psalm may be associated with the dedication of the temple site, an event that took place in connection with the sin of numbering the people (cf. I Chr 21:1). Here David confesses that he sinned in thinking and acting as though he had no need of the Lord: "I said in my prosperity, I will never be moved" (Ps 30:6 [H 7]). There is also the possibility that David's sin was not merely counting the people, but mustering them (*pāqad*) for war (R. L. Harris, *Man—God's Eternal Creation*, Moody, 1971, p. 150–51). R.L.H.]

All of the derivatives seem to reflect the concept of numbering, i.e. reckoning up the constituent parts.

mānā. Portion, part. This feminine noun identifies the choice parts of the sacrificial animals that were to be given to the priests and Levites. In other instances (e.g. Hannah, Esther, Nehemiah), the distribution of "portions" indicates the unity of the family or community, and emphasizes the high regard the giver had for the recipient.

māneh. Pound. A unit of weight. BDB suggests that the original meaning may have been a "specific part" of another known weight. The Hebrew unit was the equivalent of fifty shekels (cf. Ex 38:25–26) or about one and a quarter pounds. Ezekiel 45:12 defines the value following the old Mesopotamian usage at sixty shekels to the *māneh*, i.e. about one and a half pounds. Except for those in Ezk, all uses of the term are of weights of gold or silver.

[The famous handwriting on the wall was the enigmatic *mene, mene, tekel, uparsin*. It is probable that Belshazzar was puzzled not because he could not read it, but because the writing could be taken various ways. It could be simply denominations of weight (i.e. money). A mina, a

tekel (Aramaic of shekel), and (the conj. "u") smaller pieces (Aramaic pl. for *peres*, half). But what would this mean? It could be taken verbally, one who counts, weighs, and those who divide. The last word could be a play on the Persians then attacking. Belshazzar was mystified and terrified until Daniel told him the full and fateful interpretation. See article Mene, mene, tekel uparsin by D. J. Wiseman in ZPEB with Bibliography, IV, 184–5. R.L.H.]

m^cnāt. Portion. Identified by BDB as a late Aramaism, but *mnḥ* has been identified in the Ugaritic texts in the sense of a "portion" of the sacrifice. rsv in II Chr 31:3 translates the king's *m^cnāt* as his "contribution" to the sacrifice. Psalm 63:10 [H 11] is paraphrased by rsv as "be prey for jackals." The prayer here is not just for a violent death and no burial, but rather for the wicked to be as a sacrifice for the wild beasts.

m^cni. Number. This is a hapax legomenon which occurs only in Isa 65:11. The KJV derives *m^cni* from *mānah*, "count, number," etc., translating the text, "But ye are they that forsake the Lord, that forget my holy mountain, that prepare a table for that troop, that furnish the drink offering unto that number." (marg. "a table for Gad... drink offering to Meni"). The asv and rsv translate the two words as proper names "Fortune" and "Destiny." Jerusalem Bible simply transliterates "Gad" and "Meni."

While the general thrust of the text is clear—that Israel has turned from Yahweh to idolatry and is in table fellowship with idols, there is considerable diversity in the identification of the deities in question. Some relate them to the sun and moon (lxx *Daimoni* and *Tychê*), two of the four Egyptian gods who presided over the birth of men. Others suggest two of the planets, usually Jupiter and Venus, worshiped in Babylon as Marduk, the god of the fate of the city, and Ishtar, the fertility goddess.

Both names appear in the Mari texts where *mn* appears to be related to a root meaning "to love." In Ugaritic the personal name *bn mnyy* from the root "to be weakened" or "to lower," is found.

These themes fit either with Venus or the moon, both inconstant heavenly bodies.

 מִנְחָה (*m^cnōrā*). See no. 1333c.
 מִנְחָה (*minzār*). See no. 1340d.

1214 מנח (mnḥ). Assumed root of the following.

1214a מִנְחָה (*minḥā*) *meat offering, offering, present, gifts, oblation, sacrifice*. (ASV uses "meal-offering." RSV uses "cereal-offering." Both use "tribute.")

Scholarly opinion is divided as to the root of *minḥā*. Some trace this feminine noun to a verbal root *nḥh* "to lead or guide." Most, however, posit a Hebrew root *mnḥ* "to give." Arabic *manaḥa* has the technical meaning "to lend someone something" (e.g. a she-camel, goat, sheep, or a parcel of land) for a limited period of time so that the borrower can have free use of the produce of the loan (e.g. the offspring, milk, crops, etc.), and then return the original property. The fruit then becomes a free gift. Snaith sees no occurrence of the word in Ugaritic, but UT 19: no. 1500 tentatively identifies at least one occurrences of *mnḥ* in a tribute list (Text 137:38, not 137:28, as cited in UT) and another in the Anat/Baal Cycle in a parallel construction with "tribute" (AisWUS no. 1597 "gift," "tribute").

The word is used in secular contexts of gifts to superior persons, particularly kings, to convey the attitude of homage and submission to that person. In I Sam 10:27, the Israelites who despised Saul "brought him no present" (*minḥā*), i.e. did not acknowledge the new king. Then, in I Kgs 4:21 [H 5:1], Solomon received tribute (*minḥā*) from the kings of the nations he ruled. (lxx uses *dōron* about thirty times for *minḥā*.) There are several other instances of this meaning, e.g. II Kgs 10:25; II Kgs 8:8–9; 17:4; 20:12; Isa 39:1.

The religious use of the term derives from the secular. Specifically, a *minḥā* is a gift of grain, although Snaith seems to be correct in saying that since *minḥā* originally meant gift or tribute, it could loosely be used in this sense even when it took on specific cultic meaning. Of particular interest in this connection is the distinction between *zebah* (q.v.) and *minḥā* in I Sam 2:29; 3:14; and Isa 19:21; between *ōlā* (q.v.) and *minḥā* in Jer 14:12 and Ps 20:3 [H 4]; and between *shelem* (q.v.) and *minḥā* in Amos 5:22. Cf. also Gen 4:3–4. [Both Abel and Cain offered a *minḥā* to the Lord (Gen 4:4–5). But whereas it is said of Abel that he offered the choicest portions of the

animals to the Lord, an act reflecting his heartfelt commitment to him, it is merely said of Cain that he offered a *minhâ* from the fruit of the ground. The Lord rejected this formality. Cain's lack of true submission (note also his bloodless sacrifice) issued finally in sinful behavior (Gen 4:7f.). R.L.H.] These uses of *minhâ* indicate that the term does not mean an animal sacrifice in the specific sense.

The cereal offering is defined in Lev 2:1–16 and 6:14–23 [H 7–16]. It could be in the form of raw grain in the sheaves, dry roasted grains coarsely crushed, ground into flour (wheat only; barley flour seems to have been reserved for the "jealousy offering" of Num 5:15, 25), or made into loaves or cakes and baked in an oven or panfried in oil. Frankincense and salt were also part of the prepared *minhâ*, but no leaven or honey was to be added.

The *minhâ*, offered every morning and evening, was a holy offering, eaten only by the priests, not shared with the worshipers. The idea of atonement is not specifically present in *minhâ*, although that of propitiation certainly is. The offering of the new produce of the land along with ordinary leavened bread (Lev 23:16) indicates submission of the totality of the life of God's people to the Great Suzerain.

מְנַחָה (*m^enūhâ*). See no. 1323f.

מְנִי (*m^eni*). See no. 1213.

מְנִלֵּה (*minleh*). See no. 1370a.

1215 מְנִי (*mnn*). Assumed root of the following.

1215a מְנִי (*mēn*) **portion** (Ps 45:9).

1216 מְנַע (*māna'*) **withhold, keep back, refrain, deny, keep restrain, hinder.** (ASV and RSV similar, but RSV adds hold, hold back, refuse.)

Found only in the simple tenses where most references imply that the right or power to withhold something belongs ultimately to God or his representative.

Thus it is said that God withholds the fruit of the womb (Gen 30:2) and the rain (Amos 4:7). Man's sins cause God to withhold these good things from man (Jer 5:25), but he withholds no good thing from those who walk uprightly (Ps 84:11 [H 12]). Thus he does not withhold the request of his righteous king (Ps 21:2 [H 3]).

A wise man withholds neither food nor any good thing from the poor or those to whom it is due (Prov 11:20; 3:27; Job 22:7; 31:16), nor correction from the child (Prov 23:13).

1217 מְנַשֶּׁה (*m^enashsheh*) **Manasseh.**

In Gen 41:51, popularly derived as a Piel from *nāshâ* (q.v.) and equal to "cause to forget." This is the name of four people and a territory. (The fifth person is obviously "Moses" and the scribal emendation of a supralinear "n" in Jud 18:30–31 is an obvious attempt to dissociate such a good name from the idolatrous priesthood at Dan).

Manasseh was the elder son of Joseph, and with his brother Ephraim substituted for Joseph and Levi in the twelve-tribe territorial allocation in the Promised Land. Nothing of Manasseh's personal life is recorded in the OT, except the birth of his son Machir. [Note that in the ritual of Gen 48:5–20, Manasseh and Ephraim, Jacob's grandsons, were adopted so as to be legally his own sons. Therefore their descendants became two tribes in Israel. The adoption is reminiscent of Nuzi Law. R.L.H.]

The large tribe descended from Manasseh occupied two sections of the land, one in the Transjordanian territory of Gilead between the Jabbok and Yarmuk rivers, and the other in the territory north of Shechem to Mount Carmel and Mount Tabor, including the strategic center of Megiddo and much of the fertile Esdraelon Valley.

One of the kings of Judah, son of Hezekiah, and father of Amon, Manasseh reigned fifty-five years (696–642 B.C.). For the first ten years he was co-regent with his father. A loyal vassal of Assyria (he is named as a tributary in "prism B" of Esarhaddon's list [ANET, p. 291]; cf. II Chr 33:11), he introduced pagan worship practices into Judah (II Kgs 21). He became a legend for evil, and the cause of judgment on the land, although II Chr 33:12–13 indicates that he repented after a period of exile in Assyria. To date, there is no extant extrabiblical evidence on this latter point.

The two other men named Manasseh are Israel-

1218 מַס (mas)

ites listed in Ezr 10:30, 33 as having taken foreign wives.

G.L.C.

מָנָה (m^cnāt). See no. 1213d.

1218 מַס (mas) *tribute, tributary, levy, taskmasters, discomfited*. (ASV "taskwork." RSV "forced labor," "vassal.")

The root of this word is unknown, although some attempt has been made to derive it from *māsā* "to melt, grow faint." There is a possible link in Isa 31:8 (כִּינ "discomfited;" marg. "be for melting," or "tribute") or in the general concept that those under tribute are "weak." KB cites Egyptian *ms* "bearer."

Of the twenty-three uses of this term, all but three (Isa 31:8; Lam 1:1; Est 10:1) occur early in the literature.

The institution of tribute or corvée involves involuntary, unpaid labour or other service for a superior power—a feudal lord, a king, or a foreign ruler (Ex 1:11; Est 10:1; Lam 1:1). In Gen 49:15, Jacob's blessing on Issachar identifies him as bowing to "tribute." In Egypt, the Israelites find themselves in that position (Ex 1:11).

The subjugation of the Canaanites by Israel after the Conquest was by means of *mas* (e.g. Deut 20:11; Josh 16:10; 17:13). Under David there was an organized government department charged with keeping the *mas* functioning (II Sam 20:24).

During Solomon's reign, *mas* was extended to include Israelites as well as foreigners and war prisoners (I Kgs 5:13–14 [H 27–28] and the parallels in Chr; but cf. I Kgs 9:22) in the labor force necessary to carry out Solomon's extensive building programs (I Kgs 9:15). This unpopular measure, and Rehoboam's refusal to moderate it, was the immediate cause of the secession of the ten tribes and the establishment of the northern kingdom.

1220 מִסָּה (māsak) *mingle, mix*. (ASV and RSV similar.)

Derivatives

1220a מִסְכָּה (meseke) *mixture*. RSV well-mixed.

1220b מִמְסָה (mimsāk) *drink-offering, mixed wine*.

This verb occurs only five times and its derivatives once and twice respectively. The root has been identified in Ugaritic (UT, 19: no. 1509). As is frequently the case with seldom used words, the general meaning is obvious from the context, but there is considerable diversity in the understanding of the precise inflection intended by the author. Two broad categories have been proposed for this word group.

Four of the five uses of *māsak* are associated with drinking (*yayin* "wine," Prov 9:2, 5; *shēkār* "strong drink" or "beer," Isa 5:22; *shiqquy* "drink," "refreshment," Ps 102:9 [H 10]). According to Isa 19:14, God has mixed within Egypt a "spirit of confusion," and thus it staggers as a drunken man.

meseke. *Mixture*. (Ps 75:8 [H 9], RSV "well-mixed wine.")

mimsāk. *Drink offering, mixed wine, spiced wine* (NEB), *libation* (Prov 13:30; Isa 65:11). Traditionally, these nouns have been understood to mean some kind of mixed drink, usually wine with spices or honey (e.g. "cocktails," William McKane, *Proverbs*, p. 393. This, of course, is an anachronism. Cocktails are mixtures of distilled liquors with other liquids. Before the Arabs discovered distillation in the Middle Ages, there were no highly alcoholic drinks). Dilution with water is mentioned late in II Macc 15:39. (Cf. Mt 27:34; Mk 15:23.) In Isa 65:11, an "oblation" for Meni (q.v.) is paralleled with setting a sacrificial table for Gad. This juxtaposition of sacrificial terms is also found in Prov 9:2, 5 where Wisdom invites participation in her banquet.

Apart from these two uses in Prov, all three of these words are negative—the folly of the drunkard, the unavoidable wrath of God's bitter judgment poured out on evil.

Delitzsch (F. Delitzsch, *Isaiah*, I, p. 361) translated *māsak* as "poured out." Dahood (*Psalms in loc.*) and Scott (R.B.Y. Scott, *Proverbs*, AB, XVIII, p. 24) have followed this concept. To "pour out" or "drain to the bottom" makes excellent sense in all eight uses of these words.

G.L.C.

מָסַךְ (*māsāk*). See no. 1492a.
מַסְכָּה (*massēkā*). See nos. 1375c, 1376a.

1221 מִסְכֵּן (*miskēn*) *poor, poor man*.

This word occurs only in Eccl 4:13; 9:15–16. Some scholars argue that *m^csūkkān* in Isa 40:20 and *miskanūt* in Deut 8:9 are incorrectly pointed in the MT and ought to be considered with *miskēn*. Similarly some argue that *misk^cnōt* (q.v.) is also the same word. Probably a loan word, cf. Akkadian *muškēnu*. The Arabic word *maskin* "peasant" has been borrowed into Italian and French.

The paucity of uses of *miskēn* makes it difficult to draw precise conclusions on the meaning of the word, although the general meaning is obvious in the contrast between the poor man and the king in Eccl 4:13. The LXX helps some. The Greek *penēs* is used of the man who does not have extensive possessions, and must work for his living. The "rich" man (*pleytos*) can live on his income without working. This is the distinction drawn in the Eccl passages. Often the line between these two classes of people is indistinct. On the other hand, however, the *ptōchos* is the destitute mendicant—the man who is so poor he cannot work. There is a clearcut line between this class of people and the Greek *penēs*. In Mt 5:3, the "poor in spirit" are the spiritual beggars—so poor they cannot work for spiritual gain. In Isa 66:2, however, 'ānī is used for "poor in spirit" and refers to one who trembles at God's word. See also 'ebyōn, 'ānī, dal, and rāsh.

מַסְלוֹל (*maslūl*). See no. 1506e.

מַסְמֵר (*masmēr*). See no. 1518b.

1223 מָסַס (*māsas*) *dissolve, melt*.

Derivatives

1223a מָס (*mas*) *despairing* (Job 6:14).

1223b מָסָה (*massā*) *despair*.

1223c תָּמַס (*temes*) *melting (away)*.

The scarcity of uses of *māsa* and *māsā* makes it difficult to distinguish clearly between the two verbal forms, since both are used in similar contexts, combining the concepts of physical and

emotional distress. They are doubtless by-forms. In most cases, there is some outside force that causes the "melting" e.g., fear of a ruler (II Sam 17:10), of a more powerful army (Josh 2:11; 5:1), at bad news (Deut 1:28; Ezk 21:7 [H 12]), at sorrow and fear of death (Ps 22:14 [H 15]).

A couple of times *māsas* is used of garbage: the uncollected manna that "melted" in the heat of the sun, and the "refuse" left after the destruction of Amalek by Saul (I Sam 15:9). these, too, under the power of outside forces.

The predominant feature in several cases is the presence of Yahweh as the God of power. In his presence the mountains themselves dissolve (Ps 97:5; Isa 34:3; Mic 1:4) and the nations are powerless before him (Nah 2:11; cf. Jud 15:14).

Physical sickness causes "melting" of the flesh (Isa 10:18) but some commentators posit a root *nāsas* "to be sick" for this form.

Similarly, *temes* in Ps 58:8 [H 9] seems to fit this interpretation, particularly if the textual variant *shklwl* (*kālāh* "be consumed" for *shabb^clūl*) is correct. (Cf. Isa 10:18 where this combination appears in parallel.)

1224 מָסַר (*māsar*) *deliver up, offer*.

The verb is used only two times in the OT, both of them in the account of the holy war against Midian (Num 31). The first one, v. 5, says "there were 'delivered' (RSV, "provided") out of the thousands of Israel, a thousand of every tribe." The meaning here is obviously, "to assign, apportion, count." Some have suggested an emendation of the Hebrew text from *wayyimmās^c rû* to *wayyisāp^c rû* on the basis of the LXX's *exērithmēsan*. The suggested change is quite unnecessary. The second use is in Numbers 31:16, "Behold, these caused the children of Israel 'to commit' treachery against the Lord."

Of special interest is the possible connection of this root with the "Masorah" which is the apparatus built around the Hebrew text of the OT to fix its traditional divisions, pronunciation, and mode of public recitation. This work was done by the Masoretes, who were Aramaic speaking Jews of Babylonia and Palestine, between A.D. 700 and the end of the tenth century.

If "Masorah," then, is to be derived from *māsar* "to deliver," it is that which is handed

1225 מִסַּת (*missat*)

down from generation to generation: the text of the Bible. Others have suggested that *Masorah* is from the root 'āsar "to bind," i.e. something which is bound and gathered: the detailed instructions for reading affixed to the text. Still a third suggestion is that *Masorah* is built off the verb *māsar* but with the primary meaning of "to count" (Ben-Hayyim).

Bibliography: Ben-Hayyim, Z., "māsōrā ūmāsōret," *Lešonēnū* 21:283–92. Wildeboer, G. *msr*, ZAW 29:73–74 and "Das Verbum *msr*, ZAW 29:219–20 vs. Bacher, W., "A Contribution to the History of the Term 'Massorah'," JQR 3:785–90 and "Das Verbum *msr*" ZAW 29:218–19.

מִסָּר (*mōsār*). See no. 877b.

מִסֹּרֶת (*māsōret*). See no. 141e.

1225 מִסַּת (*missat*) *sufficient, sufficiency.*

This translation is based primarily on the common Aramaic word. It is found but once in the OT, Deut 16:10, "Thou shalt keep the feast of weeks unto the Lord thy God with a 'tribute' of a free will offering of thine hand" (KJV). The worshiper is to bring whatever offering his means allow (cf. v. 17 in the same chapter). The etymology of the word is uncertain.

V.P.H.

מִסְגָּל (*ma'gāl*). See no. 1560.

1226 מָעַר (*mā'ad*) *slip, slide, give away.*

The root is found nine times in the OT if we include in Ezk 29:7 the reading w^a "ha'āmādtā as a metathesis for w^a "him'adtā and thus read "and make all their loins/thighs 'shake'" instead of "stand." Four of the nine uses of this verb are in Psalms (18:36 [H 37] = II Sam 22:37; Ps 26:1; 27:31; 69:23 [H 24]). The first three of these are used in a context suggesting security ("my feet did not give away") as a result of confidence in God. Proverbs 25:19 speaks of a "broken tooth and a 'palsied' foot." I Samuel 15:32 says that Agag came to David "tottering."

מָעֲדָר (*ma'dēr*). See no. 1571a.

1227 מֵעָה (*mē'eh*). *Assumed root of the following.*

1227a מֵעָה (*mē'eh*) *inward parts, bowels.*

1227b מֵעָה (*mā'ā*) *grain (of sand).*

The noun *mē'eh* is used thirty-two times in the OT, always in the plural, *mē'im*. The KJV most often retains the translation "bowels" but the RSV opts for a more euphemistic translation unless the word is used in a passage with the literal sense of the intestines.

With three or four exceptions the noun is associated with persons, both male and female. Twice it is used in connection with the great sea-monster, the "belly" of which was the temporary underground abode of Jonah, and the place from which he prayed (Jonah 2:1–2). Twice the noun is found in phrases connected with God's emotions: Isa 63:15, "Where is your zeal (*qin'ā*), your strength (*g'burā*), your compassion (*hāmōn mē'ēkā*) and your mercies (*rahāmim*) toward me?" (cf. also Jer 31:20 [H 19] with the phrase *hamū mē'ay* parallel to *rehēm 'arahāmennū*).

Most often, as we have indicated, the word is used of persons and crosses genders. It may be used of man: Job 30:27 (Job); II Sam 16:11; 17:12 (David); II Chr 21:19 (Jehoram); II Chr 32:21 (Sennacherib); Gen 15:4 (Abraham). In the following passages it refers to women: Ps 71:6; Isa 49:1 (my mother); Ruth 1:11 (Naomi); Gen 25:23 (Rebekah). Frequently when referring to a woman *mē'eh* is paralleled with *beten* "womb."

There are three major ways in which the word is used. First, the word may be used literally, to refer to one's internal organs, the bowels, the stomach. Thus, Ezekiel (Ezk 3:3) is told to eat and digest the roll which God has shown him (and *mē'eh* is parallel to *beten*), in his "belly" and "bowels." Cf. also Ezk 7:19 (parallel to *nepesh*). In II Chr 21:15 (twice), 18–19 there is a reference to the horrible disease with which the Lord afflicted Jehoram, the Judean king, in his "bowels." This must be some kind of an abdominal disease, perhaps a violent case of dysentery with or without prolapsus of the bowel.

The second way in which *mē'eh* is used is to refer to the reproductive organs, both male and female. Hence, more than simply digestive organs are involved. We are now thinking in terms of the reproductive system, the male and female sexual apparatus (Gen 15:4; 25:23; Ruth 1:11; II Sam 16:11; 17:12; II Chr 32:21; Isa 48:19).

The third way in which *mē'eh* is used is in a figurative, metaphorical sense to denote the seat of emotions. We have already noted this above in connection with God's compassion (Isa 63:15 and Jer 31:20). Thus, Isaiah in his lament over Moab quivers with his whole being (*mē'eh*), and his inmost self (*qirbī*, Isa 16:11). Jeremiah cries out, "My anguish, my anguish" (Jer 4:19). The author of Lam expresses similar emotion (Lam 1:20;

2:11). David hides God's law within his "heart" (Ps 40:9). The term is used to express the affection felt by the bride for her lover (Song 5:4).

Incidentally, this figure of speech extends into the NT. "Put on ... bowels (*splanchna*) of mercy" (Col 3:12). "If there be any consolation in Christ ... if any bowels and mercies" (Phil 2:1).

The metaphorical use of organs of the body was more common in antiquity. Hebrew uses the liver (*kābēd*, sometimes mispointed *kābōd* "glory") in expressions of joy, the kidneys (*k'layōt*) for affections, the heart (*lēb*) for both affections and mind and the abdominal organs (*mē'im*) for compassion (see the various terms). In English the word "heart" is used for most of these expressions, and "heart" is a fair translation of most of these words. There is, of course, no problem in the Hebrew use of an organ to express a feeling. The Bible no more teaches that compassion resides in the abdomen than moderns think it resides in the chest. The Hebrew simply reflects the common linguistic usage (not invented by the Jews) whereby mental and emotional states are designated by organs the emotions affect in some way.

1228 מַעַט (mā'at) *be small, diminished.*

Derivative

1228a מַעַטִּית (m'at) *little.*

The verb is used twenty-two times in the OT, eight times in the Qal, once in the Piel (Eccl 12:3), and thirteen times in the Hiphil ("to bring to nothing, decrease, diminish"). Its meaning is fairly well established by the number of times it is used in juxtaposition to its antonym *rābā* "be-(come) much/many/great" (Ex 16:17-18; 30:15; Num 26:54; 33:54; Jer 29:6).

m'at. *Little, few, small*, appears one hundred and one times in the OT. The basic meaning of *m'at* is seen in the following passages: Gen 30:30, "It was little you (Laban) had before I (Jacob) came"; 47:9, "The days of my pilgrimage have been few and evil"; I Sam 14:6, "There is no restraint to the Lord to save by many (*rab*) or by few"; Deut 7:7, "You were the fewest of all the people"; Ps 8:5 [H 6], "You have made him a little less than God," and so forth.

m'at is joined with the word 'ōd to form the expression 'ōd *m'at* "a little while." It occurs seven times, six of these indicating the cessation

of God's patience with the wicked and the beginning of judgment: Ps 37:10; Isa 10:25; 29:17; Jer 51:33; Hag 2:6. In the seventh passage (Ex 17:4) Moses remonstrates with God that the people "are almost ready" to stone him. We may also note the frequency (nine times) with which the interrogative particle is prefixed to *m'at* to form questions, most of which are rhetorical in nature. For example, "Is it a small matter that you have taken my husband?" (Gen 30:15; cf. Num 13:18; 16:9, 13; Josh 22:17, etc.).

A frequent phrase with this word is *kim'at*, literally, "like a little" (eighteen times). In most cases the translation will be derived from the context. Thus, (1) "a little longer, almost, all but"; Gen 26:10; Ps 73:2; 119:87; Prov 5:14; (2) "soon, shortly, straightway"; Ps 81:14 [H 15]; Job 32:22; II Chr 12:7 ("in a little while"); Ps 2:12 ("quickly"); (3) "very few, a handful"; Ps 105:12; Ezk 16:47; Isa 1:9.

מַעִי (m'i). See no. 1577e.

מַעִיל (m'il). See no. 1230b.

מַעֲיָן (ma'yān). See no. 1613a.

1229 מַעַך (mā'ak) *press, squeeze.*

The verb appears three times in the OT, possibly four (see discussion of Ezk 23:21 below): (1) Lev 22:24, "You shall not offer unto the Lord (an animal whose testicles are "bruised" (*mā'ūk*), crushed (*kārūt*), broken (*nātūq*), or cut (*kārūt*)): probably all referring to methods of castration; (2) I Sam 26:7, "Saul's spear was 'stuck/pressed' in(to) the ground"; (3) Ezk 23:3, "there their nipples were 'handled' (*mō'ākū*), there their virgin breasts were fondled." This is an allegory of Jerusalem and Samaria depicting their intercourse with Egypt, involving idolatry.

Ezekiel 23:21b, the expression "for your young breasts" might better read "to fondle your young breasts" by changing the preposition *l'ma'an* to read *'lim'ōk* (Qal infinitive construct) or *lima'ek* (Piel infinitive construct).

V.P.H.

1230 מַעַל (mā'al) *transgress, commit a trespass, act unfaithfully.*

Derivatives

1230a מַעֲלָה (ma'al) *trespass.*

1230b מַעֲלִיל (m'il) *robe.*

mā'al occurs thirty-five times, always in the Qal stem. It occurs most frequently in II Chr and in Ezk. Among the prophets, only Ezekiel uses this word (excluding Dan 9:7).

In almost all the biblical references *mā'al* is used to designate the breaking or violation of re-

ligious law as a conscious act of treachery. The victim against whom the breach is perpetrated is God. As we shall see, an almost formulaic phrase is *mā'al mā'al b'yhw* "to commit a trespass against the LORD" (Lev 6:2 [H 5:21]; Num 5:6; Josh 22:31; I Chr 10:13; II Chr 12:2; 26:16; 28:19, 22; 30:7). A variant, in the first person, is *mā'al mā'al bi* "to commit a trespass against me" (Lev 26:40; Ezk 14:13; 20:27; 39:23, 26).

There are a few instances where the root is used in contexts in which God is not the object. There are three of these. (1) Prov 16:10: the mouth of a king transgresses (*yim'al*) not in judgment; (2) Job 21:34 (Job to the three comforters): how can you comfort me since in your answers there is falsehood? (Pope, in AB, *Job*, "sheer fraud"; JB, "nonsense"); (3) Num 5:12, 27. It is these last verses from Num that furnish the best clues as to the nuance behind the word *mā'al*. Numbers 5:12 says, "if a man's wife go aside (*sātā*), and commit a trespass (*mā'al*) against him." Verse 13 continues, "and a man lie with her carnally." It is obvious, then, that to "commit a trespass" means to act unfaithfully, to break a contract. The general idea is defection or unfaithfulness. Our English word "perfidy" would come perhaps closest of all.

Occasionally the root is applied to the faithless acts of individuals, private citizens as in the case of Achan (Josh 7:1; 22:20; I Chr 2:7), but mostly royal figures (Saul: I Chr 10:13; Ahaz: II Chr 28:19; 29:19; Uzziah: II Chr 26:16, 18; Manasseh: II Chr 33:19; Zedekiah: Ezk 18:24). Most often it is an indictment against the nation of Israel from wilderness times (Num 31:16; Deut 32:51) down to the postexilic ministries of Ezra and Nehemiah (Ezra 10:2, 10; Neh 1:8). It is the cause of Judah's exile (Ezk 39:23; Dan 9:7). In one instance a foreign ruler (Shishak) enters Jerusalem because of Israel's "transgressions" (II Chr 12:2). This word does not describe the sins of unbelievers but of believers, covenant peoples, those who "break faith" with their suzerain. Thus, Ezk 18:24 pronounces the principle, "When a righteous man turns away from his righteousness and commits iniquity (*'āwel*) . . . in his trespass that he has committed (*mā'al*) and in the sin he has sinned (*hātā'*) he shall die."

Of the many words for sin in the OT, *mā'al* is used most frequently in a parallel phrase with *hātā'* (q.v.) "to sin, miss the mark": Lev 5:15, 21; Num 5:6; II Chr 33:19; Ezk 14:13; 18:24. There are a number of words used in the LXX for *mā'al*. Interestingly, in Ezk the word used most prominently is *parapiptō* "to trespass" while in Ezra and Nehemiah the word is *asunthetō* "to default, deflect." There is no equivalent pattern in translation in Chronicles.

ma'al. Trespass. The noun is used twenty-nine times, of which twenty instances are as a cognate

accusative to the verb *mā'al*. Thus, we meet a phrase, "If a man commit (*mā'al*) a trespass (*ma'al*)."

m'il. Robe, cloke, mantle. This type of clothing may refer to part of the priestly vestments worn by the high priest to cover the ephod. Like a shawl there was a hole in the middle, hence to be pulled over the head. It was also worn by men of repute: Samuel, I Sam 28:14 (in Sheol at that!); Saul, I Sam 24:5; David, I Chr 15:27; Ezra, Ezr 9:3; Job, Job 1:20 (and David's daughters, II Sam 13:18). For figurative usages cf. Isa 59:17; 61:10; Job 29:14; Ps 109:29. The relationship of *m'il* to *mā'al* is uncertain. One suggestion is to relate the ideas of "covering" and "acting unfaithfully" i.e., sinning in secret or under cover, on the analogy of Hebrew *bāḡad* "to act treacherously" and *beḡed* "garment" (Palache: see bibliography).

1231 מָצָא (māšā') *find*.

There are approximately 450 usages of this root in the OT. Most of these are in the Qal stem (Gerleman, 306 times; but according to Koehler Baumgartner, KB, p. 553b, 310 times.) As we shall see, although its basic meaning is "to find" (in the LXX, mostly *euriskein*), *māšā'* also assumes other shades of meaning. The Niphal stem of this verb appears 141 times (Gerleman) or 135 times (KB). Once again, the expected translation would be the passive of the Qal, "to be found." But such translations as "overpowered," "captured," and "apprehended" are also discoverable. Note that in the LXX the translation of *māšā'* is often not *euriskō* but something like *haliskomai* "be caught, held."

The evidence of related languages is helpful. Hebrew *māšā'* is to be related to Aramaic *m'īā'* "to reach, attain" (the word in BA for "find" is *s'kah*); to Ethiopic *maš'a* "to come, arrive"; and to Ugaritic *mṣa/mṣa* "to reach" (UT 19: no. 1524).

There seems to be, then, sufficient grounds to establish for *māšā'* in the Qal stem not only the meaning "to find" but also "to come upon, meet, reach." As a generalization, we may say that whenever *māšā'* is used to describe a result following a time of "seeking" the translation is "to find." Thus, Deut 4:29, "if you seek (*bāqash*) the Lord, you shall find (*māšā'*) him." Cf. Jer 29:13; Song 5:6. "Seek (*dārash*) the Lord, while he may be found (*māšā'*)" (Isa 55:6); cf. I Chr 28:9; II Chr 15:2; "they shall seek (*sāhar*) me early, but shall not find (*māšā'*) me" (Prov 1:28).

We may add to this list the copious references to finding favor (*hēn*) in the eyes of another (God or one's fellow man): Gen 6:8; 18:3; 19:19; 32:5 (H 6); 33:8, 10, 15; 34:11; 39:4; 47:25, 29; 50:4. The idea obviously is to gain acceptance or to win approbation. The phrase occurs approximately forty times in the OT.

There are twelve instances in which the subject of *māšā'* is God: Gen 18:26, 28, 30; 44:16; Deut

32:10; Jer 23:11; Ezk 22:30; Hos 9:10; Ps 17:3; 89:20 [H 21]; Job 33:10; Neh 9:8.

For additional meanings of *māšā'* in the Qal stem we might note the following: (1) "reach," "can you reach the perfections of the Almighty?" (Job 7:11); "they were unable to reach the door" (Gen 19:11); (2) "overtake," "your hand overtook your foes" (Ps 21:8 [H 9]); "the pangs of death overtook me" (Ps 116:3); "trouble and anguish have taken hold on me" (Ps 119:143); (3) "to happen to/to befall," "why has all this happened to us?" (Jud 6:13).

The Niphal stem also produces in certain cases the translations, "overpowered," "caught," "captured." Thus, Jer 50:24: O Babylon . . . you are caught and seized (*tāpās*); "a thief . . . if he be caught" (Prov 6:30-31); "if a thief be caught breaking in" (Ex 22:1). This is also seen in cases where the Niphal participle (*han-nimšā'*) is used. So, Jud 20:48 the phrases "all that they found" and "which they found" mean preferably "until the last 'captive'" and "all the 'captured' cities." In addition to these technical uses, *māšā'* in the Niphal is often simply a synonym for *hāyā* "to be": I Sam 9:8, "I have here at hand," literally, "there is found in my hand" (BDB 594b: 2a-f).

1232 מָצָה (māšā) *drain (out)*.

The verb is used seven times in the OT, four times in the Qal and three times in the Niphal. Sometimes the verb describes the literal draining of blood from a bird offered in sacrifice (Lev 1:15; 5:9) or the draining/squeezing of water from a fleece (Jud 6:38).

Three times the verb is used figuratively to describe the enemies of God who have drunk from the cup of his wrath down "to the last drop": Isa 51:17; Ezk 23:34; Ps 75:8 [H 9], "Oh, how they will drain it to the dregs." Dahood renders this verse, "Oh, how its dregs (i.e. of God's cup) will be drained, the wicked of the earth will drink the last drop." This rendering changes the MT *yimšū* (Qal active) into *yumšū* (Qal passive). The last part of Ezk 23:34, cited above, indicates what consequence befalls the wicked who drain this cup. In remorse and revulsion they smash the cup

as the cause of their downfall and tear off their breasts as the peccant members through which they have sinned. A graphic picture!

The final use of this verb is in Ps 73:10 again to describe the wicked, "waters of abundance are 'drained' by them." The meaning is obvious enough. The wicked are so voracious that they swallow the ocean, leaving nothing for others (an effective hyperbole). It is unnecessary to connect the verb here with Ugaritic *mšš*, "to suck" as Dahood has done (*Psalms*, in AB, in loc.).

1233 מִצַּח (*mšḥ*). Assumed root of the following.

- 1233a מִצָּחַ (*mēšah*) *brow, forehead*.
 1233b מִצְחָה (*mišḥā*) *greaves*.

mēšah. Brow, forehead. The substantive appears thirteen times in the OT, five of which are in Ezk (3:7, 8 [twice], 9:9:4). The etymology of the word is uncertain. One suggestion is to relate it to the verb *šāḥaḥ* "to be bright, dazzling," on the analogy of Arabic *ṣabāḥa* "to shine," *ṣabāḥ* "morning," and *ṣabāḥ* "forehead" (Blau; see bibliography).

The most interesting uses of *mēšah* are in the Ezk passages, plus one from Jeremiah. God says to Ezekiel (3:7) that all Israel is stiff of forehead (*ḥizqē mēšah*) and hardhearted (*q' šē lēb*). The phrase "stiff/strong of forehead" suggests, perhaps, the picture of an animal, an ox or ram, butting its head. But in the next verse (3:8) God says that he has made the prophet's forehead stronger than the foreheads of his foes. That is to say, God will not only give him hardness equal to that of his foes, but that he promises Ezekiel to make him harder for the truth than the people are against it. There may be here an intentional play on the prophet's name which means "may God harden/strengthen" from the verb *ḥāzaq*. Cf. also 3:9.

In Ezk 9:4 God orders a divine agent to go through Jerusalem and put a mark on the forehead of the men who deplored and disapproved of the filth practised in the city. The word for "mark" is *taw*, the last letter of the Hebrew alphabet, which in the old Canaanite script was written X. Cf. also Gen 4:15 ('ōt); I Sam 21:14;

Job 31:35; Rev 7:3, 4; 13:16; 14:1; 22:4. This might shed some light on Jer 3:3 when Jeremiah says of his audience, "You have a whore's forehead," rendered by JB as "you have maintained a prostitute's bold front." Could Jeremiah's accusation, however, be a reference to some trademark on the head of a prostitute, as is used today to mark the castes of India?

mišḥā. Greaves, found only once in the OT, I Sam 17:6, "And Goliath had 'greaves' of brass upon his legs." Greaves are the armor which protected the front of the leg below the knee.

- 1234 מִצֵּז (*māšaš*) *drain out*. Occurs only in Isa 66:11, *tāmoššū w'hit'annagtem* "(that) you may drain out and delight yourselves."

Derivative

- 1234a מִצָּה (*maššā*) *unleavened bread, unleavened cakes*.

A feminine singular noun from the root *māšaš*, which occurs frequently as the plural *maššōt* (forty-four times). In the LXX and NT, it is *azuma*. This quickly prepared bread was offered at ordinary meals to unexpected guests (Gen 19:3; Jud 6:19-21; I Sam 28:24). The Israelites, departing hastily from Egypt, did not have time to wait for bread to rise (Ex 12:39).

Unleavened cakes were offered in sacrifice when Aaron and his sons were consecrated to the priesthood (Ex 29:2), with the cereal offering (Lev 2:4-5), with the peace offering (Lev 7:12), and upon completion of the Nazirite vow (Num 6:15, 17, 19). The bread was carried in a basket (Ex 29:23; Lev 8:2, 26; Num 6:15, 17). The Levites assisted with the offering (I Chr 23:27-29). After the sacrifice, the remainder of the cereal offering was eaten by the priests (Lev 6:16; 10:12). At the time of Josiah's reform, priests of

the high places ate unleavened bread among their brethren (II Kgs 23:9).

Because Israel had eaten unleavened bread on the night when they left Egypt (Ex 12:8) and during the first stages of their travels (Ex 12:39), annually thereafter they ate unleavened bread with bitter herbs at the Passover season whether the first or second Passover (Ex 12:14–20; Num 9:10). Eaten with bitter herbs, it is called the bread of affliction (Deut 16:3). Originally Passover, a one-night celebration, was distinct from the feast of unleavened bread, being the following seven days. But both days may be referred to as Passover or “the days of unleavened bread.” The eating of unleavened bread began on the evening of the fourteenth of the month of Nisan (Ex 12:15, 18; 13:6; 34:18; Lev 23:6; Num 28:17; Deut 16:3; Ezk 45:21) and continued for seven days (Deut 16:8 gives six days with the seventh as a day of solemn assembly). Hence this season was called the feast of unleavened bread (*ḥag hammaṣṣôt*, Ex 23:15; 34:18; Lev 23:6; Deut 16:16; Ezr 6:22; II Chr 8:13; 30:13, 21; 35:17). Israel observed this custom at Gilgal when entering Palestine (Josh 5:11).

J.P.L.

מֶצָר (*mēṣar*). See no. 1973f.

1235 מִצְרַיִם (*miṣrayim*) *Egypt*.

The Hebrew word is of uncertain derivation but is related to the Akkadian name *Miṣr* (*Muṣur*) and the Arabic name *Miṣr* for Egypt. In form, the Hebrew name for Egypt is in the dual, indicating her two basic constituent divisions: Upper Egypt (Southern Egypt) and Lower Egypt (the Delta area). The reason for the equation of upper with south and lower with north is because of the northward flow of the Nile. The Egyptians themselves referred to their land as *ꜥꜣwꜣ* “two lands” or *Kemi* “Black Land,” this latter being a reference to the lush, irrigated soil that ran along the sides of the Nile. The name “Egypt,” from Greek, possibly goes back to the Egyptian phrase *Hi-ku-Ptah*, the “House of the Spirit of (the god) Ptah,” an ancient designation for Memphis (biblical Noph).

Briefly, Egyptian history may be conveniently divided into and highlighted by the following important periods: (1) The Old Kingdom/Pyramid Age/third-sixth Dynasties (2700–2200 B.C.); (2) The Middle Kingdom, especially the twelfth Dynasty (2000–1800 B.C.); (3) The New Kingdom or Empire Age, eighteenth-twentieth Dynasties (1570–1090 B.C.); (4) The Ethiopian period, especially the twenty-fifth Dynasty (715–663 B.C.); (5) Saitic/twenty-sixth Dynasty (633–525 B.C.); (7) Dynasty of the Ptolemies (306–30 B.C.). Generally speaking, ancient Egypt’s history follows an un-

dulating line of development. Times of innovation, greatness, expansion are followed by times of regression, retrenchment, the rise of centrifugal movements and the cycle repeats.

It is difficult, almost impossible, to pinpoint common denominators in Egyptian religion throughout almost three millennia of development. The gamut runs from a rampant polytheism to a solar “monotheism.” Their religion never earmarked to everybody’s satisfaction a supreme God. Was it Atum or Re or Horus or Amon-Re? No one would deny, however, that one characteristic of Egypt’s religion was the emphasis on life after death. And yet this preoccupation with death was not a morbid one. Mortuary texts are inevitably gay and optimistic. The Egyptian concept of the afterlife is also an intensely materialistic one. The next life simply continues this one. This is why, for example, the body was mummified because corporeal existence was the only existence acceptable to the Egyptian.

In the or it is the patriarchs who first have relationships with Egypt (Abraham, Gen 12). This would correspond roughly with the twelfth Dynasty of the Middle Kingdom. The Joseph story is obviously set in an Egyptian background, even to the extent of the cycle itself being in the form of a short story in simple prose (an Egyptian creation). However, from the time of Moses on, the Bible generally casts the land of Egypt in a very negative position. It is the oppressor of God’s people, refusing to give Israel her liberation. It is the prophets particularly who inveigh against Israel leaning upon Egypt. “Leave her alone; she is under judgment and will topple” is their council.

And yet for all this denunciation of Egypt two passages in the or about her are extremely interesting. One, the saintly Judean king Josiah died because he did not listen to the word of God from the Pharaoh Necho (II Chr 35:20ff.). Two, Isa 19:16ff. anticipates the conversion of Egypt (and Assyria) to the Lord, “blessed be my people Egypt” (v. 25). Traditional foes will be reconciled under God’s blessings.

- 1237 מַקָּךְ (*māqqaq*) *decay, rot, fester, pine away*.

Derivative

- 1237a מַקָּךְ (*maq*) *decay, rottenness* (Isa 3:24; 5:24).

māqqaq occurs nine times in the OT, eight times in the Niphal, once in the Hiphil. The verb is used most often to describe those who "perish" or "waste away" because of their sins, which dehumanize them: Lev 26:39, Ezk 4:17; 24:23; 33:10. Sin sows its own seeds of decay. Similar to this is the judgment of God meted out to those who attack Jerusalem in history's great eschatological struggle (Zech 14:12, three times), "Their flesh will 'molder' . . . their eyes will 'rot' in their sockets; their tongues will 'rot' in their mouth." Cf. also Isa 34:4.

The basic meaning of the verb is discoverable in Ps 38:5 (H 6). "My wounds stink and are 'fester' because of my foolishness."

- מִקְרָא (*miqrâ*). See no. 2063d.
מִקְרֶה (*miqreh*), מִקְרֶה (*m"qāreh*). See nos. 2068c,f.
מִקְרֶה (*m"qērâ*). See no. 2077d.
מִקְשֶׁה (*miqsheh*), מִקְשָׁה (*miqshâ*) I, II. See nos. 2086b,a; 2083b.
מֵר (*mar*), מֵר (*môr*). See nos. 1249a, 1248a,b.

- 1238 מַרְא' (*mārâ*) I, *flap* (?). Occurs only in the Hiphil, in Job 39:18. "she (the ostrich) flaps away, she laughs at the horse and his rider."

- 1239 מֵרָא (*mr'*) II. Assumed root of the following.

- 1239a מֵרִיא' (*m"ri'*) *fatling*.
1239b מֵרִיא' (*mūr'â*) *crop or alimentary canal, of bird*. Occurs only in Lev

1:16, "he is to remove the crop with its contents" (NIV).

m"ri'. **Fatling.** *m"ri'* occurs eight times in the OT. BDB (p. 597) lists this word under *mārâ* II, "to be fat, well-fed" but does not document the verb in the OT. Some have suggested that *m"ri'* in Isa 11:6 read *yimr"û*; hence the translation of this verse in JB, "The calf and lion cub feed together."

In all but one of the eight passages, *m"ri'* is used of cattle who were intentionally raised and fed for meat for the purpose of sacrifice to God. The Hebrew word is not concerned with the species but rather with the quality of the animal. The significance is that when one offers a sacrifice to his Lord, he offers his best and most valuable.

Both David (II Sam 6:13) and Adonijah (I Kgs 1:9, 19, 25) on festive occasions offered "fatlings" to the Lord. And yet the Lord rejects the offerings of these same animals whenever sacrifice and external religious performance become a substitute for personal morality and integrity (Isa 1:11; Amos 5:22). Ezekiel says that in addition to human flesh and the meat of other animals, the birds shall feast on fatlings in the day of God's judgment upon Israel's enemies (Ezk 39:18; cf. Rev 19:17–18, 21).

The only passage in which *m"ri'* occurs in a non-sacrificial context is Isa 11:6.

- 1240 מֵרֶד (*mārad*) *be rebellious, rebel, revolt*.

Derivatives

1240a מֵרֶדָּה (*mered*) *rebellion*.

1240b מֵרֶדוּת (*mardût*) *rebellion*.

The verb is used twenty-five times in the OT, all in the Qal stem. It appears in Josh more often than in any other book (five times, 22:16, 18, 19 [twice], 29).

The verb *mārad* may indicate either rebellion against man (twelve times) or rebellion against God (twelve times). The one passage open to question in translation is Josh 22:19 (KJV): "Rebel not against the Lord, nor rebel against us (*tim-rōdū*). The RSV reads this: "Rebel not against the Lord, nor make us rebels" (reading *timridū* for *timrōdū*). This is certainly possible in light of the following verse, v. 20, which is a reminder, from the Achan incident, that the sin of one implicates many more than just the individual who is the immediate culprit. Hence, the translation of 18: "Do not rebel . . . or make us accomplices in rebellion."

In those instances where *mārad* signifies man rebelling against man it is always in reference to a Judean king or the people of Israel trying to resist the heavy yoke or the unwelcomed presence of a royal power. The one exception is Jeroboam I who is condemned by his contemporary monarch in southern Judea, Abijah, for "rebellious" against Solomon (II Chr 13:6). In some instances the Bible describes this rebellion with approbation and sometimes with disapproval. Thus, the Bible warmly endorses Hezekiah's actions against the Assyrians: II Kgs 18:7, 20 (= Isa 36:5). On the other hand, the actions of Jehoiakim against the Babylonians (II Kgs 24:1) and those of Zedekiah against the same foe (II Kgs 24:20 = Jer 52:3; Ezk 17:15; II Chr 36:13) are seen as being in violation of God's will. Whether the rebellion is being spoken of positively or negatively, it is, obvious that what is meant by the term is rebellion in the sense of an attempt to nullify or abrogate a covenant, on the part of the vassal. For similar uses of the term cf. Gen 14:4 and Neh 2:19; 6:6.

If *mārad* in an international political context refers to disloyalty and disunity among nations in covenant then it is only natural to assume that it is in this context, i.e., the context of a broken covenant, that the term refers to man's rebellion against God (the five passages in Josh 22 for example).

For synonyms we may note the use of *mārad* with: (1) *shūb*: Josh 22:16, 18, 29; II Kgs 24:1; (2) *pāsha*: Ezk 2:3; 20:38; (3) *mā'al*: Josh 22:16, 22; (4) *mārā*: Neh 9:26; (5) *qūm*: II Chr 13:6; (6) Dan 9:5, parallel to *hātā*, 'āwā, rāsa' (all of which, see).

mered. Rebellion. Found only once in the OT, Josh 22:22, parallel to *mā'al* "transgression, breach of faith."

mardūt. Rebellion. Used only in I Sam 20:30. Saul, charging his son Jonathan with subversive activity in aiding David, hurls this approbrium at him: "Thou son of perverse rebellion." The phrase has in most cases been emended. As it stands, it is written *ben-na'awat hammardūt*.

The second word, *na'awat*, is a Niphal feminine participle of 'āwā "bend, twist." On the basis of the LXX, which for this word has *korasiōn*, most scholars have emended *na'awat* to *na'arat* "girl." Hence, the translation, "son of a rebellious woman," or "son of a wanton" (18).

V.P.H.

מִרְדָּה (*mirdā*). See no. 2121a.

מִרְדּוּת (*mardūt*). See no. 1240b.

1241 מִרְדָּה (*m^crōdāk*) **Marduk**, the patron deity of the city of Babylon.

Marduk is mentioned in the Bible only in Jer 50:2, "Babylon is captured, Bel (*bēl*) is disgraced, Merodach (Marduk) is shattered." Note that here the name Marduk is paralleled by the word *bēl*, a transliteration of the Akkadian attribute of Marduk, *belum* "lord." Apart from its appearance in Jer 50:2, the name of Marduk appears only in the Bible in personal names such as Merodach-baladan Mardukapal-iddina, Evil-merodach (Awel-Marduk), and Mordecai.

The origin of Marduk's name is unknown, though several etymologies have been offered. The form of his name in Sumerian is "AMAR-UD and in the earliest syllabic renderings (Old Babylonian) it is *marutuk* (*ma-ru-tu-uk*). The translation would be, "The young bull/son of Utu (the sun-god)." Another possibility is that his name means "son of the storm," the picture given of Marduk in texts being more akin to a god of storm, rain, lightning, and thunder, rather than to a solar figure (Jacobsen).

The vocalization of his name in Hebrew, *m^crōdāk* is interesting (in the LXX it is *marodak*). Some have suggested a deliberate likeness to 'ādōnay "my lord." More likely, it could be a euphemistic vocalization, akin to *m^cbōrāk* "accursed."

It is commonly asserted that Marduk was exalted to his position of supremacy in the Babylonian pantheon when Hammurabi made Babylon the political capital of southern Mesopotamia (eighteenth century B.C.), although he was known as a minor god as early as the third millennium B.C. A case can be made, however, for the view that it was not until the reign of Nebuchadnezzar I (c. 1100 B.C.) that Marduk actually became "king of the gods" (Lambert; see bibliography). Marduk was the son of Enki (Ea) of Eridu, the god of wisdom and the patron of the arts of magic. Marduk himself fathered Nabu, who, toward the end of the neo-Babylonian period (sixth century B.C.), supplanted his father in popularity.

Marduk was the city god of Babylon. His temple there was called *Ē-sag-ila* "the house that raises high its head." Adjacent to it was the famous step-tower (ziggurat) *Ē-Temen-an-ki*, "the house of the foundation of heaven and earth," approximately ninety-one metres high. The temple's great eastern portal, the holy door, bricked up the whole year, was opened on Marduk's principal feast, the *Akitu* (New Year's) festival. On this day Marduk's wedding with his bride, Sarpanitu, was celebrated by bringing their two statues together outside the city walls. By means of simulated sexual intercourse between the two, the land's fertility would be ensured for the coming year. Also at this feast the *Enuma Elish* (the Babylonian creation epic) was recited. Marduk, the hero of this story, is appointed by the gods to lead the fight against Tiamat, and after victory fashions the universe from her body.

Though mentioned specifically by name only in Jer 50:2, Marduk's helplessness as god of Babylon under the name of Bel is ridiculed in Isa 46:1; Jer 51:44; and especially Dan 14:1-22.

V.P.H.

מָרָה (*mūrdāp*). See no. 2124a.

1242 מָרָה (*mārâ*) *be rebellious against, disobedient towards.*

Derivative

1242a מָרִי (*meri*) *rebellion.*

The verb occurs forty-five times in the OT most frequently in the (historical) Psalms (ten times) and eight times in Deut. Twenty-two times the verb is used in the Qal stem and twenty-three times in the Hiphil stem. In this latter case the meaning or translation is something like "to provoke (by defiance)."

With but five exceptions all uses of *mārâ/meri* refer to rebellion against God. These five exceptions are: (1, 2) Deut 21:18, 20, dealing with disciplinary procedures to be pursued by parents with a stubborn (*sôrêr*) and "rebellious" son; (3) Job 17:2, "Are there not mockers with me and my eye continues in their 'provocation/spitefulness'?" (4) Job 23:2, "My lament is still rebellious"; (5) Prov 17:11, "The wicked man thinks of nothing but rebellion."

The rebellion to which *mārâ* refers is specifi-

cally the rebellion of Israel/Judah against God. Only on a few occasions is the nation not involved. These would be the five verses noted in the above paragraph plus the reference to the anonymous "man of God" who disobeyed God's orders not to linger or eat at Bethel but to continue immediately on his way, and as a result was mauled and killed by a lion (1 Kgs 13:21, 26); also, in the third "suffering-servant" song (Isa 50:5), "I was not rebellious/made no resistance." In Lam 1:18, 20 the confession of the "I" is personified Jerusalem speaking.

Not only does *mārâ/meri* refer to the rebellion of Israel, but primarily it refers to the rebellion of Israel in the wilderness as God led her toward Canaan. Some concurrent references which document such aberrant behavior are: Num 20:10, 24; 27:14 plus numerous passages in Deut such as 1:26, 43; 9:7, 24 *inter alia*. Elsewhere, there are a number of later books which at points are recapitulations of early Israelite history and this sin is cited: Ps 78:8, 17, 40, 56; 106:7, 33, 43; Isa 63:10; Neh 9:26 (upon entry into the promised land).

This sin of rebellion may be in word: Num 17:10 [H 25]; 27:14, complaining; Ps 78:17ff., challenging and defying God to do the abnormal, to cater to their tastes and delicacies. Or, it may be a rebellion in deed: 1 Sam 12:15, obedience to man over God; 1 Kgs 13:21, 26, actions contrary to God's clearly expressed will by a "clergyman"; Jer 4:17, "your own behavior and actions"; Isa 3:8, "their words and their deeds." What is most often rebelled against is "the commandment/the word of the Lord," (*'et pi* (literally, "the mouth"). This is the most frequent direct object of the verb *mārâ*: 1 Kgs 13:21, 26; Lam 1:18; Ps 105:28; Num 20:24; 27:14, *inter alia*.

mārâ is found in series or parallel with the following Hebrew words: (1) *sôrêr* "stubborn": Deut 21:18, 20; Jer 5:23; Ps 78:8; (2) *'āšab* "to hurt, grieve": Isa 63:10; Ps 78:40; (3) *mā'an* "to refuse": Isa 1:20; Neh 9:17; (4) *pāsha'* "to transgress": Lam 3:42; (5) *nā'aš* "to scorn": Ps 107:11; (6) *hātā'* "to sin": Ps 78:17; (7) *nāsā'* "to test": Ps 78:56; (8) *mārad* "to rebel": Neh 9:26; (9) *mā'as* "to reject" and *hālāl* "to profane": Ezk 20:13; (10) *meri* parallel to *hapšar*, a Hiphil infinitive absolute of *pāsar* "to press," perhaps here "arrogance, presumption": 1 Sam 15:23.

meri. Rebellion. Of the twenty-three usages of this noun in the OT, sixteen are in Ezk, and preponderantly these are in the phrase, "house of rebellion" (in reference to Judah): 2:5, 6, 8; 3:9, 26, 27; 12:2 (twice), 3, 9, 25; 17:12; 24:3; also 2:7 and 44:6 for variations of this phrase.

Bibliography: THAT, I, pp. 928-30.

 מַרְחֶשֶׁת (*marḥeshet*). See no. 2152a.

- 1244 מָרַט (*māraṭ*) *make smooth/bald, polish*.

The verb is used fourteen times in the OT in a variety of contexts. Three times it refers to the tearing out of one's hair, either the hair on the crown of the head or the beard. Once, this action is indicative of the grief which Ezra felt upon his discovery that his fellow Israelites had intermarried with foreigners (Ezr 9:3). Two other times this same action describes not grief but rather an act of violence (Neh 13:25), something Nehemiah did to those who intermarried; and Isa 50:6, "I (i.e., the suffering servant) gave my back to the smiters and my cheeks to them that 'tore' at my beard." In connection with these passages we may note the use of the same verb to describe the condition of baldness (Lev 13, 40–41) in the context of leprosy diagnosis. Ezekiel 29:18 says that the heads of the people of Tyre were "made bald" by Nebuchadnezzar. This does not mean he tore out their hair; rather, the baldness was the result of carrying loads on their heads as *cōrvée* labor gangs.

Besides the passage in Ezk 29:18, the verb is used five times more in that book: 21:9 [H 14]; 21:10 [H 15]; 21:11 [H 16]; 21:28 [H 33]. Each case refers to the Lord's sword which is "furbished/polished," ready to be given into the hands of the slaughterer, the Babylonians, to execute judgment upon God's people.

Finally, this verb is used to describe the vessels of "burnished" brass put into the Jerusalem temple of Solomon (1 Kgs 7:45). It is employed in Isaiah's oracle against Cush, the name of ancient Ethiopia, whose people are pictured (Isa 18:2, 7) as "tall and bronzed," not "scattered and peeled" as in כַּנָּן.

 מַרְפֵּשׁ (*marpēs*). See no. 2199a.

- 1245 מָרַשׁ * (*māraṣ*) *be/make sick*.

The verb occurs four times in the OT. Three of these (1 Kgs 2:8; Mic 2:10; Job 6:25) are in the Niphal, and mean "to make sick," i.e. "sore" or "grievous." So, "a grievous curse" *q' lālā nim-rešet*, in 1 Kgs 2:8 and "grievous pain" *ḥebel nimirās*, in Mic 2:10.

The third passage, Job 6:25, is open to question as to its translation: "how 'forcible' are right words" (כַּנָּן). This rendering gives to *māraṣ* an otherwise unknown meaning. Pope (in AB, *Job*, pp. 49, 55) translates, "how 'pleasant' are honest words," perhaps on the suggested relation of *nimr' šū* to *niml' šū* (Ps 119:103), "smooth, pleasant." A third possibility is to read the phrase as a question, "what is there sick in righteous words?" (Tur-Sinai) or "how are honest words bitter?" (Driver). The advantage of these last two suggestions is that they both retain the basic idea of *māraṣ* as something undesirable.

The fourth use of this root is Job 16:3 (Hiphil): "what 'emboldeneth' thee that you answer?" or better בַּן, "what a plague—you need to have the last word."

- 1248k מִמְרֹר (*mamrôr*) *bitterness.*
- 1248l תִּמְרֹר (*tamrûr*) *bitterness.*

The verb *mārar* is used fifteen times, always with man as subject, never God, unless the verb describes an interpretation given by man to God's actions and will. For example, Job (and this root plus its various derivatives appear more frequently in Job than in any other OT book [ten times]) complains: The Almighty has vexed my soul (27:2), Hiphil of *mārar*. Similarly, Naomi says, "Do not call me Naomi, call me 'Mara' for the Almighty has dealt very bitterly with me" (Ruth 1:20).

It is interesting to note that the Hebrews expressed tragic, unpleasant experiences in terms of the sense of taste, the bitter. Actually, we employ the same figure of speech in our English language: It was a galling experience; his actions were not in very good taste, I thought; your wife is always so tastefully dressed.

For the root *mārar* we suggest not only the traditional translation "to be bitter/embitter" but also the translation "to be strong/strengthen." The reason for this is that in Ugaritic/Arabic/Aramaic the root *mrr* may mean one of "to strengthen, bless, commend." In at least four OT passages this seems the preferable translation. Thus, Ex 1:14 might better read not "they made their lives bitter," but "they strengthened their lives," i.e. the Egyptians, by imposing hard labor, only toughened the Hebrews. The context suggests this. Judges 18:25 refers not to "embittered men" but "tough men." Ecclesiastes 7:26 traditionally reads: "I found more bitter than death the woman whose heart is snares and nets." It will be observed, however, that the author is not stressing a woman's bitterness but her strength; hence, "I found stronger than death" (cf. Song 8:6). Finally, Ezk 3:14 reads, "I went in bitterness, in the heat of my spirit." But why should the prophet be "bitter" especially in light of what he saw and heard in vv. 12–13? We suggest the translation, "I went forth strengthened by the fervor of my spirit."

mar. *Bitter, strong.* Thirty-seven times in the OT. Most frequently the adjective is used in a figurative sense, as is the verb, to describe an emotion, though a few examples of *mar* in a literal sense may be found. The Scriptures speak of bitter grape clusters (Deut 32:32); bitter water (Ex 15:23); food in general (Prov 27:7), which, though bitter, is palatable to the hungry (cf. Isa 5:20).

Of special interest in the literal category is the phrase "water of bitterness" in Num 5:18–19, 23–24, 27. Combined with dust and ink, and hence decidedly unhygienic, it was used in an instance of investigation to determine whether a husband's jealous suspicions of his wife's unfaithfulness were correct or not. The idea is, of course, that often consciousness of guilt will produce somatic symptoms, the principle behind our modern lie detector testing of suspected criminals. This investigation is sometimes called trial by ordeal, but that is not quite accurate. The trial by ordeal, used in antiquity and up to the Middle Ages, required the accused to undergo obvious physical danger like walking through fire or being thrown bound into the river. The person who was unharmed was presumed innocent. Trial by ordeal was common in Assyria, but the OT used rather the more sensible rules of evidence we are accustomed to. The "water of bitterness" is indeed more like a lie detector test as suggested above. Only a woman who was innocent could normally undergo this solemn ceremony without breaking down. The further effect, apart from the unhygienic water, was caused by the providence of God punishing the guilty.

As we have indicated, the more frequent use of *mar* is a figurative one, to express the emotional response to a destructive, heart-crushing situation. Some of these situations are: (1) in the case of a woman, barrenness and sterility, I Sam 1:10; (2) an unfulfilled death-wish, Job 3:20; (3) family turmoil, Gen 27:34; (4) the exploitation and deprivation of minority peoples, Est 4:1; (5) personal suffering and hardship, Job 7:11; 10:1; Isa 38:15; (6) a hostile and precarious situation, Ps 64:3 [H 4]; grief over the apostasy of believers, Jer 2:19; (7) the Lord's judgment on unbelievers, Zeph 1:14; (8) discontentment with lackluster leadership, I Sam 22:2; (9) the thought of death, I Sam 15:32; (10) the crumbling of dreams and aspiration, Ezk 27:30, 31.

morrâ. *Bitterness, grief.* Used only in Prov 14:10. "Only the heart knows its own grief." The form of the word in Hebrew is unusual, with a *dagesh forte* in the *resh*.

môrâ. *Grief* (in the sense of disappointment). Only in Gen 26:35, expressing Isaac's chagrin at Esau's decision to marry Hittite women.

mārôr. Bitterness, bitter herb. According to Ex 12:8 and Num 9:11 the bitter herb was to be eaten on Passover with the passover meal. At first the bitter herbs signified the haste with which the meal was prepared (Ex 12:8) and later Jewish tradition saw in the bitter herb a reminder of the bitter treatment to which the Jews were subjected in Egypt. Cf. Lam 3:15.

m^erôrâ. Bitter thing, herb, poison(ous). In Job 20:14 the word pictorially describes the viper's venom. Cf. also Deut 32:32; Job 13:26; 20:25.

m^eriri. Bitter, bitterness. Deuteronomy 32:24. The reading in Job 3:5 is problematical. Instead of kaph plus the root *mārar* what we most likely have is the root *kāmar* II, "to be dark," and hence the translation, "O 'Eclipse' terrify it (i.e., the day of my birth)."

m^erîrût. Bitterness. Only in Ezk 21:6 [H 11].

memer. Bitterness, grief. Only Prov 17:25, parallel to *ka'as* "sorrow."

mamrôr. Bitterness. Only in Job 9:18.

tamrûr. Bitterness. The best known verse in which this word appears is Jer 31:15 (=Mt 2:18). Cf. also Jer 6:26 and Hos 12:14 [H 15].

מִשָּׁשׁוֹ (*mashshâ'ôn*). See no. 1425a.
מִשָּׁשׁוֹת (*mashshâ'ôt*). See no. 1425b.
מִשְׁלָה (*mish'alâ*). See no. 2303b.

1252 מִשְׁאֶרֶת (*mish'eret*) **kneading trough/bowl.**

Flour would be mixed with water in this household vessel, *mish'eret*, which already contained fermenting dough. They were small enough that they could be wrapped in one's clothing and transported on the shoulders (Ex 12:34) with even the warmth of the body helping the process of fermentation. The frogs filled these vessels in one of the plagues in Egypt, Ex 8:3 [H 7:28]. Cf. also Deut 28:5, 17. The word may be related to *š^e'ôr* "leaven."

1253 מָשָׁה (*māshâ*) **draw.**

This verb appears only three times in the OT. One is in the passage dealing with the giving of the name Moses, Ex 2:10. The other reference is II Sam 22:17 (and its parallel in Ps 18:16 [H 17]): "(the Lord) draws me from deep waters."

1254 מִשָּׁה (*mōsheh*) **Moses.**

The important verse surrounding the naming of Moses is Ex 2:10. It reads: "She called his name Moses (*mōsheh*): and she said, because I drew him (*m^ešitihû*) out of the water." In Hebrew the proper name "Moses" is a Qal active participle (masculine/singular) of the verb *māshâ* "to draw (out)," and hence is to be translated as "drawer out" or "he who draws out." Morphologically, the form of the name is what one would expect from a type of verb such as *māshâ*, variously described by Hebrew grammarians as "final weak," "tertia infirma," "lamed he" and so forth. Thus, one encounters the verb *bānâ* "to build" and *bōneh* "builder" in the same pattern.

It should be clear that the etymology given in Ex 2:10 is not intended to be a precise philological explanation, as is the case with most of the onomastica of the Old Testament. If such were the case, we would expect the name given to the infant by the daughter of Pharaoh to be, not

mosheh "he who draws out," but *māshūy* "He who is drawn out," i.e., a participle that is passive in form.

This does not mean then that the explanation of the name given in Ex is misleading. Nor should we go to the extreme of denying the historicity of the event by suggesting that such a story rose as an etiology of the name, i.e., that the story was fabricated to answer someone's query, "why was our great ancestor called *mosheh*?" The answer is that the name "Moses" is like many others a pun, a word play based on assonance. The name is explained not because Moses is derived from *māshā* but because it resembles it in sound.

For further clues some have looked to the spelling of Moses in the Septuagint. There the Greek form is *mōysēs*. Ancient writers explained this as either "saved (*ysēs*) from the water (*mō*)" or "taken (*sēs*) from the water (*mōy*)."

The consensus today is that "Moses" goes back to an Egyptian root *ms* "child," *mss* "to be born." *ms* appears as a personal name in Egyptian but is better recognized as the second part of theophoric names: Ahmose: Ah is born; Ptahmose: Ptah is born, taking *mose* as the Egyptian old perfective of the verb *mss*. This Egyptian root definitely appears in the Bible in the names "Rameses" (*ra'amsēs*, Ex 1:11) and "Ramses" (*ra'm sēs*, Gen 47:11; Ex 12:37; Num 33:3, 5). In Egyptian the form is *R'-ms-sw*, "Re is he that hath borne him," the active participle *mas* followed by the pronoun *se* "him."

Linguistically, the problem is to account for the relationship between the sibilants *s* in Egyptian and *sh* in Hebrew. The problem is removed by the demonstration that Egyptian writings of Semitic names show mostly *s* for Semitic *sh* (Griffiths, pp. 229–30).

1255 מִשָּׁה (*māshah*) **anoint, spread a liquid.**

Derivatives

1255a מִשְׁחָה (*mishhā*) **anointing oil.**

1255b מִשְׁחָה (*moshhā*) **portion.**

1255c מִשְׁחָה (*māshiah*) **anointed one.**

1255d מִמְשָׁה (*mimshah*) **expansion** (Ezk 28:14). Meaning uncertain.

The verb *māshah* with its derivatives occurs about 140 times. It is most frequent in the Pentateuch and historical books; in the prophets it is found as a verb only twice with its religious connotation of sacred anointing (Isa 61:1; Dan 9:24).

māshah could refer in everyday usage to such acts as rubbing (*māshah*) a shield with oil (Isa 21:5), painting (*māshah*) a house (Jer 22:14), or applying (*māshah*) oil to the body (Amos 6:6).

Used in connection with religious ritual, *māshah* involved a ceremonial application of oil to items such as the tabernacle, altar or laver (Ex 40:9–11), or even the sin offering (Ex 29:36). More frequently *māshah* is used for the ceremonial induction into leadership offices, an action which involved the pouring of oil from a horn upon the head of an individual. Easily the most frequent mention of *māshah* is with kings such as Saul and David of Israel (II Sam 12:7; but note Hazael, an Aramaean, I Kgs 19:15). The high priest was anointed (Ex 29:7; Num 35:25) and so were other priests (Ex 30:30). Twice there is mention of anointing a prophet (I Kgs 19:16; Isa 61:1).

There is a fourfold theological significance of *māshah*. First, to anoint an individual or an object indicated an authorized separation for God's service. Moses anointed Aaron "to sanctify him" (*l'qadd' shō*, Lev 8:12; cf. Ex 29:36 for the altar). Note the expression "anointed to the Lord" (I Chr 29:22). *māshah*, while representing a position of honor, also represents increased responsibility. Both Saul and David are called to account for their sin with the reminder, "I (the Lord) anointed (*māshah*) you king" (I Sam 15:17; II Sam 12:7). Secondly, though the agent might be the priest or prophet, writers speak of anointed ones as those whom the Lord anointed (e.g. I Sam 10:1; II Sam 12:7). Such language underscores that it is God who is the authorizing agent; that the anointed is inviolable (I Sam 24:8ff.); and that the anointed one is to be held in special regard (cf. I Sam 26:9ff.). Thirdly, one may infer that divine enablement was understood as accompanying *māshah*. Of both Saul and David it is said in connection with their anointing that "the Spirit of God came mightily upon him" (I Sam 10:6ff; I Sam 16:13ff.). Finally, in the form *māshiah*, *māshah* was associated with the coming promised deliverer, Jesus. Though this association with the term *māshah* is not as prevalent in the OT as often supposed, the prospect of a righteous, Spirit-filled ruler is increasingly discernible in the OT (cf. Isa 9:1–7; 11:1–5; 61:1).

māshiah. **Anointed, anointed one** (ASV and RSV similar). This word used as adjective and noun

occurs about forty times in the OT, primarily in I-II Sam and Ps. While it may designate an office such as the high priest (Lev 4:3), *māshiah* is almost exclusively reserved as a synonym for "king" (*melek*, q.v.) as in poetry where it is in parallel position with king (I Sam 2:10; II Sam 22:51; cf. Ps 2:2; 18:50 [H 51]; but cf. Ps 28:8 where "people" is a counterpart term). Striking are the phrases "the Lord's anointed" (*māshiah* YHWH) or equivalents such as "his anointed" referring to kings. Certainly a title of honor, the expressions also emphasize the special relationship between God and the anointed.

A much discussed point is the mention of Cyrus, a non-Israelite, as the Lord's anointed (*limshihô*, Isa 45:1). If *māshiah* is envisioned as an ideal king, godly and upright, then the designation of "anointed" causes difficulty, for Cyrus was a worshiper of Marduk and other pagan deities. Yet Cyrus was the Lord's appointee for a definite task. The Isaiah passage suggests that *māshiah* be understood as one singled out or "chosen" (*bāḥar* q.v.) for a task, characteristically one of deliverance—a deliverance of Israel from their Babylonian captors returning them to their homeland.

As for the king, that task centered on a righteous rule in the context of grace included in which was deliverance from oppression. Saul, the first king, in his first major encounter exemplified the qualities of a *māshiah* (I Sam 11).

He was Spirit-endowed, brought victory over the enemy Amalekites, and extended life to a group who, because of their action, deserved death (I Sam 11). Because of Saul's sin and general stance before God, it is David who becomes the archetype of the *māshiah*.

The Psalm literature especially regards *māshiah* as God's agent or vice-regent (as in Ps 2:2). In this much discussed passage the first level of meaning may be that of an immediate Israelite king, as the *māshiah* against whom, since he is aligned with God, enemies strike in vain. Even the promise that the ends of the earth be the possession of the *māshiah* fit the anticipations of Israel for their national king (Ps 72:8ff; Ps 18:44–48). But from the NT we learn that the meaning of *māshiah* in Ps 2 cannot be limited to a king about to be enthroned, but is a reference to the unique vice-regent, Jesus Christ (Acts 13:32ff; cf. Heb 1:5; 5:5). The so-called royal psalms, including Ps 2 therefore, may be regarded legitimately as messianic, even though some may refer initially to Israel's monarch. The Psalm statements underline the just administration, the saving function and the universal rule of Jesus Christ.

[This view of double reference or a typical fulfillment is doubtless applicable in some OT passages. It is widely held, however, that there are

some psalms and other prophetic passages which can not refer to Israel's king or some contemporary situation, but must refer to Christ directly.

Thus the royal psalm 45:6 [H 7] by natural and strict translation speaks of the king as divine and Ps 110:1–5 [H 2–6] refers to David's son as David's Lord—and also says that this king is a priest, a thing not allowed in Israel. (True, II Sam 8:18 seems to call David's sons priests in the Hebrew, but there probably is a textual problem here. The Hebrew strictly seems to call Benaiah and the Cherethites priests. Actually, the LXX of this verse and the Hebrew and LXX of the parallel in I Chr 18:17 do not use the word "priest.") There is warrant, therefore, for a direct messianic reference on Ps 2. Indeed, v. 12 as normally taken would imply that men are exhorted to put their faith in this anointed son—surely not David.

It is true, however, that the coming Son of David is seldom called Messiah in the OT, but see below. Many other designations are used (Branch, Shoot, Son of David, etc.). Even in the DSS the use of the word "Messiah" is ambiguous. There is mention of a Messiah of Aaron and a Messiah of Israel, apparently two figures, a king and a priest, perhaps neither one *the* Messiah. But also in the DSS there is expressed in the Testimonia and the Florilegium the hope of a coming great Figure not identified with their leader, the teacher of righteousness, nor called Messiah (except once in the quotation of Ps 2:2), but called the Scion of David, etc. (T. H. Gaster, *The Dead Sea Scriptures*, rev. ed., Doubleday, 1964, pp. 297, 329, 334–39). The extensive use of the term Messiah (Christ) as a title of the coming great Son of David is primarily a NT phenomenon. R.L.H.]

Not all who agree that the *māshiah* is a reference to Christ in Dan 9:26, also interpret *māshiah* in the same manner in Dan 9:25, where the description is of a prince. It should be stressed, however, that the OT did employ the term *māshiah* to designate the coming Savior, Jesus.

The repeated claim that *māshiah* in the OT never refers to an eschatological figure, the Messiah, hinges also for its validity on the interpretation of Dan 9:26. While some hold that the anointed one (*māshiah*) "who is to be cut off" was Onias III (deposed as high priest 175 B.C.), there is strong warrant on the basis of the context (v. 24) to regard the *māshiah* as none other than Jesus Christ.

mishḥā. Anointing oil; anointment. (ASV and RSV similar.)

Found only in Ex, Lev, and Num, *mishḥā* refers to the oil used in ritual anointing. The oil, prepared according to prescription (Ex 30:22ff.), was sprinkled (*nāzā*) on officials and their gar-

ments (Ex 29:21) but poured, *yāšaq*, on the head of the high priest (Ex 29:7; cf. Lev 8:10–12).

Described as holy, its application to tabernacle and its furnishings sanctified (*qiddēsh*) these. Priests who were anointed were restricted in activity (Lev 21:12; cf. Lev 10:7). The setting apart of men and things to God's service is better understood and appreciated through the tangible symbol in this instance, a fragrant oil.

moshḥâ. Portion. A part of some offerings (i.e. peace offering, Lev 7:28–35) was reserved as a consecrated portion (*moshḥâ*) to the priest. ASV, focusing on the priest renders *l' moshḥâ* "by reason of the anointing" (Num 18:8).

מִשְׁיָה (*māshiah*). See no. 1255c.

1257 מִשְׁשָׁה (*māshak*) **draw, drag, seize.**

Derivatives

1257a מִשְׁשָׁה (*meshek*) **a drawing.**

1257b מִשְׁשָׁה (*mōsheket*) **cord.** Occurs only in Job 38:31, *mōshkôt k'sil* "the cords of Orion."

The verb appears thirty-six times in the OT with a variety of nuances attached to it.

All but six instances of the verb are in the Qal stem. Three times the Niphal is used (Isa 13:22; Ezk 12:25, 28) all with the meaning "prolonged." This is not, however, a distinctive use in the Niphal. Thus, Ps 85:5 [H 6], "Will you prolong your anger to all generations?" and Ps 36:10 [H 11], "Continue your loving kindness unto them that know you" (both in the Qal stem). Cf. Neh 9:30. Also, there are three uses of the Pual (Isa 18:2, 7, "scattered") (KJV) and parallel to *māraṭ*, in KJV "peeled," but better "tall and bronzed"; also, Prov 13:12, "Hope 'deferred' makes the heart sick."

The following meanings are attached to the verb *māshak* in the Qal: (1) To draw in the sense of "to raise" (Gen 37:28, "They drew, and lifted" (*ālā*) up Joseph from the pit." Jeremiah 38:13, "So, they hauled up Jeremiah with ropes," again parallel to *ālā*. (2) To draw in the sense of "to extend," Ps 36:10 [H 11]; 85:5 [H 6] have already been noted. Cf. also Ps 109:12 and Jer 31:3, "For you have I prolonged kindness." (3) To draw in the sense of "to draw in, associate with": Ps 28:3, "Do not rank me with the wicked"; Hos 7:5, "He stretched out his hand (*māshak yādō*) with scorners" possibly means, "He associated with scoffers." (See Gordon, UT 19: no. 1582 for the phrase *yd mkt.*) (4) To draw in the sense of "to entice, allure, woo": Job 24:22, "He lures the mighty with his power"; perhaps also Job 21:33, "After him (the deceased) all men will follow," if the phrase means that the surviving will seek consciously to imitate the deceased's life style, rather than simply a reference to a funeral procession. Into this category we could also place Hos 11:4, "I drew them with cords of a man"; Jud 4:7, and at the level of human love, Song 1:4. (5) To draw in the sense of to draw on a weapon, a bow especially, 1 Kgs 22:34; 11 Chr 18:33; Isa 66:19; or blow extensively on a musical instrument, a trumpet: Ex 19:13; Josh 6:5. (6) To draw in the sense of "seize" or "drag away": Ps 10:9 (possibly); Job 41:1 [H 40:25]. Tur-Sinai in his commentary on Job, in a footnote on p. 335 says that "nowhere in the Bible does *māshak* = 'draw' but always like Arabic *maska* 'to take hold of, to snatch.' The statement is highly debatable. (7) To draw, simply as a synonym for "go/march" Jud 4:6, or "take" (Ex 12:21). (8) Finally we may note the phrase in Eccl 2:3, "I sought in my heart 'to draw' (*limshōk*) my flesh with wine." The usual interpretation of this is seen in the rendering of this by the JB, "I resolved to have my body cheered with wine." Appeal, however, for this translation can only be made to a passage in the Babylonian Talmud, Hagigah 14a, *b'ly 'gdh mwškyn lbw šl 'dm kmym*, "masters of the Aggada (homiletic discourse) refresh the heart of men like water."

meshek. A drawing, bag, pouch, price. This segholate noun occurs only twice. (1) Job 28:18: "The 'price' (or 'acquisition' according to Tur-Sinai) of wisdom surpasses rubies." (2) Ps 126:6: "He that goeth forth and beareth 'precious' seed" (KJV). Though this is a time honored and traditional translation, a more preferable and exact one is, "though he went forth weeping, bearing/carrying a 'bag' of seed (*nōšē' meshek hazzāra*). This Hebrew phrase can be connected with Amos 9:13, "... the treader of grapes shall overtake the strewer of seed (*mōshēk hazzāra*). " *meshek*, then, would be the

seed container carried by the sower. In several related languages the word *mshk* means "skin, leather," perhaps the substance from which such a pouch would be made. Gordis (see Bibliography) translates the phrase in Ps 10:9 *bmschkw*, not "he catches the poor 'when he draws him' into his net" but, "he catches the poor in his bag (*b' mashkō*)" parallel to *reshet* "net, trap."

1258 מִשָּׁל (*māshal*) *I, represent, be like.*

Derivatives

1258a מִשָּׁל (*māshāl*) *proverb.*

1258b מִשָּׁל (*māshal*) *II, speak in a proverb.*

1258c מִשְׁלֵל (*mōshel*) *I, like(ness).*

1258d מִשְׁלֵל (*m'shōl*) *byword.*

The verb occurs seven times, five times in the Niphal (Ps 28:1; 49:12, 20 [H 13, 21]; 143:7; Isa 14:10). Inevitably the meaning is "to become like, to be comparable to." The root appears once in the Hiphil (Isa 46:5 parallel to *dāmā*) again with the meaning "to compare," and once in the Hithpael (Job 30:19) with similar force in the translation.

In all of the above passages the two objects compared assume a contrast that is in its nuance derogatory and belittling. Thus, "I have become like those who go down to the pit" (Ps 28:1). "To whom will you liken me and make me equal?" (Isa 46:5). "I have become like dust and ashes" (Job 30:19).

Exactly what the relationship, if any, of *māshal* "to be like" to *māshal* "to rule" is not clear. As for cognate evidence it is sufficient to note that the translation "to rule" is unique to Hebrew, but the translation "to be like" is common in most Semitic languages. It has been suggested that the Hebrew translation "to rule" evolved from the mentality involved in the idea of sympathetic magic: that is, that symbolic action (here, ruling action) resembles the effects it hopes to reproduce (Godbey). This association has generally been discredited.

māshāl. Proverb, parable, allegory, byword, taunt, discourse. Of great interest is the wide number of translations for this word in most English translations of the Old Testament. The substantive appears thirty-nine times (eight times in Ezk).

To translate *māshāl* simply as "proverb" misses the wide sweep of the word, suggested by the many suggested translations. We are accustomed to think of a proverb as a short, pithy, epigrammatic saying which assumes the status of gnomic truth. In the Old Testament, however, the word *māshāl* may be synonymous with an extended parable (and hence the frequent LXX translation *parabolē*) (Ezk 17:2 and vv. 2–24; 20:49 [H 21:5] and vv. 45–49 [H 21:1–5]; 24:3 and vv. 3–14). It may refer to an extended didactic discourse (Prov 1:8–19 for example). A person (Saul, I Sam 10:12; Job, Job 17:6) or a group of persons (Israel, Ps 44:14 [H 15]), may function as a *māshāl*.

In this last connection notice the verse in I Sam 10:12, "So the saying, 'Is Saul also among the prophets?' became a proverb." What is involved here is the creation of a public example, in this case the example of one, a royal figure, whose public antics were questionable. The "proverb" would then be applicable to anyone charged with unorthodox behavior.

In a similar vein, note passages which translate *māshāl* as "byword": Ps 44:14 [H 15]; 69:11 [H 12]; Jer 24:9; Ezk 14:8; Deut 28:37; I Kgs 9:7; II Chr 7:20; Job 17:6. In each of these verses some kind of doom has, or will, come upon Israel or an individual. The result? God has made Israel a *māshāl* among the nations. Job has become a *māshāl* to his counselors and acquaintances. What can this mean? Much more is involved than simply scorn or derision. The point is that God has made Israel/Job a public example, an object lesson to their respective contemporaries. "Look, observe, and see your own life under my judgment," the Lord says.

Analogous to these are the three times prophets are told to lift a *māshāl*. Isaiah against the king of Babylon (Isa 14:4f.); Micah against his own people (Mic 2:4) and similarly Habakkuk (Hab 2:6). One might also add the passages in the Balaam narratives, "And Balaam took up his *māshāl* (KJV discourse)" (Num 23:7, 18; 24:3, 15, 20, 21, 23). In each of these instances there is an object lesson painted. The haughty are humbled. Those to be cursed are blessed and vice versa. The first are last.

A. S. Herbert has well stated that in the Old Testament the "proverb"/*māshāl* had "a clearly recognizable purpose: that of quickening an apprehension of the real as distinct from the wished for . . . of compelling the hearer or reader to form a judgment on himself, his situation or his con-

1259 מָשַׁל (*māshal*)

duct... This usage... comes to its finest expression in the Parables of Jesus" (Herbert, p. 196).

māshal II. To speak in a proverb, proverbialize. All of the examples of this verb are in the Qal stem (nine times) except for one use of the root in the Piel, Ezk 21:5, "Is he not a maker of parables?" (*m' mashshēl m' shālim*). Or, in modern idiom, "He's always preaching."

mōshel. Like(ness). The noun occurs one time in the Old Testament, Job 41:33 [H 25], "Upon earth there is not his like (the crocodile)."

m' shōl. Byword. This is used only once, Job 17:6 and, in form, is the infinitive construct of the verb *mšhal* II.

V.P.H.

1259 מָשַׁל (*māshal*) III, rule, have dominion, reign.

Derivatives

- 1259a מָשַׁל (*mōshel*) II, dominion.
- 1259b מִמְשָׁל (*mimshāl*) dominion.
- 1259c מִמְשָׁלָה (*memshālā*) rule, realm, dominion.

māshal occurs about eighty times in Qal, three times in Hiphil.

māshal usually receives the translation "to rule," but the precise nature of the rule is as various as the real situations in which the action or state so designated occur. It seems to be the situation in all languages and cultures that words for oversight, rule, government must be defined in relation to the situation out of which the function arises.

This will be illustrated by examining in order the first several appearances of *māshal* in the Bible. The sun and moon are said "to rule over the day and over the night" (Gen 1:18). They are merely the most prominent luminaries over day and night. Eve, standing for all wives, was given to understand that in the home the husband "shall rule over thee" (Gen 3:16). Such leadership as is appropriate—and it varies greatly—for a man to give his family is meant. Cain was told by God that he ought to master sin in his life, "Do thou rule over him" (Gen 4:7). Management over all the material goods of a master, as his steward, and management of all the personnel of the enterprise is indicated in the case of Abraham's "servant" (Eliezer of Damascus? Gen 15:2): "his eldest servant of his house, that ruled over all

that he had" (Gen 24:2). Direction of affairs of a large family as "firstborn-designate" is indicated by Joseph's version of the sheaves—at least so his angry brothers interpreted the vision: "Shalt thou indeed reign over us" (Gen 37:8). *māshal* is used of Joseph's administration of Egypt as Pharaoh's prime minister. So Joseph claimed he had been made "a ruler throughout all the land of Egypt" (Gen 45:8); and his brothers agreed, "he is governor over all the land of Egypt" (Gen 45:26). The word occurs only once in Ex and there of the rule of law [very significant] over citizens of the Mosaic, Israelite civil commonwealth "to sell her he shall have no power" (Ex 21:8). The word is not in Lev or Num, but in Deut 15:6 Moses asserts that the nation Israel shall reign over other nations, under certain conditions—some sort of national subservience to a superior nation—and twice he uses *māshal*, once *Qal* perfect and once *Qal* imperfect. Context seems to mean that the rulership is in being the lending nation rather than the borrowing one.

Other instances, chosen somewhat at random, show that the supremacy of rich people over poor ones (Prov 22:7), of a fierce king over oppressed people (Isa 19:4), oppressive rule of one people over another (Jud 14:4; 15:11), leadership of a league or alliance of nations (I Kgs 4:4–21), the rule of God in providence (Ps 89:10 [H 9]), and even the power of self-control (Prov 16:32) are covered by the meaning of this word.

There is no specific theology to be drawn from the meaning of the word. Yet the passages cited and the seventy or so others not cited demonstrate the importance of the principle of authority, the absolute moral necessity of respect for proper authority, the value of it for orderly society and happy living and the origin of all authority in God, himself. Authority is of many degrees and kinds. It has various theoretical bases. It originates in God. Man has no authority at all as man but simply as God's viceregent.

mōshel. Dominion. Derived from *māshal*, like that word it is not always clear when sphere, geographical area of rule, is indicated and when the bare fact of authority, sovereignty. It appears only twice, viz., Zech 9:10, apparently in the sense of geographical area ("sea to sea... River to the ends of the earth") and Dan 11:4 apparently in the sense of sovereignty ("dominion wherewith he ruled"). Controversies about Messiah's predicted reign, whether referring to bare fact of rule (sovereignty) or geographical area (sphere) will not be settled by the bare meaning of this and cognate nouns and verbs.

memshālā. Rule, realm, dominion. Though used of God's rule (sovereignty, Ps 145:13) and realm of rule (Ps 103:22), also of man's rule (might, II Chr 32:9; sovereignty, government, Isa

22:21; Mic 4:8), there is no case where it is outrightly used of Messiah's *memshālā*. Four of the seventeen occurrences relate to the prevalence of the sun's light by day and of the moon's by night (Gen 1:16; Ps 136:8, 9). A theology of the kingdom of God, so earnestly sought from this word and others like it in form and meaning, apparently cannot be derived from this quarter.

1261 מִשֶּׁק (*mshq*). Assumed root of the following.

- 1261a מִשְׁקָה (*mesheq*) **acquisition**.
 1261b מִמְשָׁקָה (*mimshāq*) **possession**. Occurs only in Zeph 2:9, *mimshaq ḥārūl* "a place possessed by weeds."

mesheq. Acquisition, possession. (Both translations are conjectural.) The word appears only in the difficult verse 15:2, "and the 'heir' is Eliezer of Damascus" (κιν). The translation "heir" is based on the hypothesis that the phrase *ben-mesheq* is "the son of acquisition," i.e. heir together, with the reference in v. 3 to the "son of my house" (likely Eliezer) as his heir. Another possibility is to connect *mesheq* with the verb *shāquq* "to rush," and translate "the attacker of my house" (Snijders). Still a third possibility is to relate *mesheq* to the verb *shāqā* "to drink" and

translate "the possessor of the goblet of my house" (Gordon).

1262 מִשְׁשׁ (*māshash*) **feel**.

The verb is used twelve times in the *or*, three times in the *Qal* (Gen 27:12, 21, 22), Isaac's "feeling" of Jacob for purposes of identification. In the *Piel* it appears six times with either the meaning "to grope" (Deut 28:29 [2 times]; Job 5:14; 12:25) or "to search" (Gen 31:34, 37). Three times the verb is used in the *Hiphil* with the basic meaning of "to feel" (Ex 10:21; Jud 16:26).

- מִשְׁתָּה (*mishteh*). See no. 2477c.

1263 מַת (mat) **man**.

One of the five words in Biblical Hebrew for "man," the other four being *ādām*, *ish*, *ēnōsh*, and *geber*. There seems to be no particular nuance attached to this word as there is to some of its synonyms, for example, *ādām* "earthling"; *geber* "hero." Isaiah 3:25 uses *mat* parallel with *geber*. Deuteronomy 2:34 and 3:6 distinguish *mat* from the *nāshim* "women" and *tap* "children" all of whom were placed under the ban by the Israelites in the latter's conquest of Sihon's and Og's kingdoms.

The substantive appears twenty-three times in the *or*, most often in Deut and Job (six times each). The root is known both from Ugaritic and Phoenician where the root *mt* means "lord, master." The translation "lord, master" is not found in Biblical Hebrew, but may possibly be documented in non-Biblical Hebrew (Yadin). Of the twenty-three occurrences of the root in the Bible it is not impossible that some of them may be, in fact, derived from the verb *mūt* "to die." So Pope (*Job* in AB) reads Job 24:12 "from the city the dying groan" instead of the traditional

“from out of the city men groan.” The emendation is from *m^ctim* to *mētim*. The second half of the verse would seem to support this, “the gasp of wounded cry out.”

In the Bible the most interesting uses of *mat* are those in which it is fossilized in expressions like *m^ctē mispār* “few” and in personal names such as “Methushael” (Gen 4:18) and “Methuselah” (Gen 5:21–22, 25–27).

The use of *m^ctē mispār* “few,” is the most prevalent use of *mat*. It describes the minimal fighting force available to Jacob (Gen 34:30) and to Reuben his firstborn (Deut 33:6). The phrase may also refer to the sparse number of Hebrews in Egypt before the Exodus (Deut 26:5; Ps 105:12=1 Chr 16:19). Or, it describes a remnant of Jews that escape catastrophe (Deut 4:27; 28:62; Jer 44:28). How the phrase *m^ctē mispār* comes to mean “few” is obvious. It means literally, “men of number,” i.e. numerable, as opposed to innumerable, and therefore “few.”

The translation of the name of the Bible’s elder statesman, Methuselah, seems straightforward, “man of the spear/weapon” composed of the two Hebrew words, *mat* “man” and *shelah*, “weapon” (and comparing the second element with the Hebrew name Shelah in Gen 19:24; 11:14; 1 Chr 1:18). It has been suggested (Tsevat) that *shelah* has nothing to do with “spear” or any other weapon but that this represents a divine name *shalah*, the god of the infernal river of the Canaanite population of Palestine and Phoenicia. Thus Methuselah means “man of Shalah.” Nothing, however, militates against the traditional translation.

Finally, we may note that the Hebrew *mat* describes disreputable or disadvantaged men. Thus, Isa 41:14 says, “Fear not you worm Jacob and you men of Israel.” The latter part of this verse is rendered by יב, “Israel, puny mite.” In Ps 26:4 the Psalmist expresses his dissociation from *m^ctē-shāw^c* “vain persons” כנף, (also Job 11:11). Similarly, Job 22:15 refers to *m^ctē-āwen* “wicked men.” On the other hand, Job 19:19 refers to “the men of my secret” who have forsaken Job. The phrase “men of my secret” means something like “bosom friends.” Job (31:31) refers to the “men of my tent” whom he had befriended.

מתבן (matbēn). See no. 2493a.

1264 מתג (mtg). Assumed root of the following.

1264a מתג (meteg) *bridle*.

מתוק (mātōq). See no. 1268c.

1265 מתח (mātaḥ) *spread out*. Occurs only in Isa 40:22, wayyimtāḥēm “and he spread them out.”

Derivative

1265a אמתחת (‘amtahat) *sack* (Gen 42–44).

1266 מתאי (mātay) *when*.

This interrogative particle appears forty-three times in the OT, most frequently in Ps (thirteen times) and Jer (seven times). Twenty-one times it follows the preposition ‘ad to form the expression ‘ad mātay “until when” or “how long?” Such a construction is similar to the Hebrew ‘ad ‘an(ā) also meaning “how long?” In a few instances mātay appears in a simple question asking for an answer with information: Ex 8:5; Neh 2:6; Dan 8:13; 12:6. Preponderantly, however, the word (or phrase) is used in a rhetorical question urging appropriate action by the addressee: (1) by God himself, I Sam 16:1; Ps 82:2; (2) by man addressed to God, Ps 6:3 [H 4]; 42:2 [H 3]; 74:10; 82:2; 90:13; 94:3; 101:2; 119:82, 84; (3) by man to his fellow man, Gen 30:30; 1 Kgs 18:21, inter alia. Comparable in the NT is the phrase *heōs pote* (Mt 17:17; Jn 10:24; Rev 6:10).

מתלעות (m^ctall^cōt). See no. 2516d.

מתם (m^ctōm). See no. 2522e.

1267 מתן (mtn). Assumed root of the following.

1267a מתנאים (motnayim) *loins, hips*.

The word appears forty-seven times in the Bible with perhaps one instance of its use in question (see the discussion below on Prov 30:31). Dahood (in AB, *Psalms* I, p. 267) changes the word division (and the vocalization) of the phrase in Ps 44:19 [H 20], *bim^cqōm tannim* “in the place of the monsters/dragons” to *b^cmōq motnayim*, and translates the verse, “tho’ you crushed us with festering of the loins and covered us with total darkness.” Like other words in Hebrew for parts of the body *motnayim* is dual in form. Compare similarly, *ōznayim* “ears,” *yādayim* “hands,” *raglayim* “feet,” *hālāšayim* “loins” (parallel to *motnayim* in Isa 11:5).

Generally speaking, we may say that *motnayim*, used in a purely physical or anatomical sense, refers to the hips or lower part of the back, i.e. the middle of the body. Some (see Held in Bibliography) have objected to the translation “loins.” Held argues for something like “ten-

dons" or "sinews" and says that Hebrew *motnayim* "refers to the strong musculature linking the upper part of the body with the lower part and not 'Loins' as such." For support of this note that in Job 40:16 *b*motnāw* "in his loins" is parallel to *bishrîrê biṭnō* "in the muscles of his stomach" (not "in the navel of his belly" as in KJV). We also know that Akkadian *matnu* means "bowstring" and in Ugaritic *mtn* was used in making composite bows, and thus a very strong material. So then, the Ugaritic phrase *mtnm b'qbt tr* means "tendons of the hoofs of a bull."

In a very few, if any, places is *motnayim* a symbol of the generative organs of mankind, and hence a description of one's descendants. (But possibly so in Job 40:16.) Thus, in the phrase in Gen 35:11, "And kings shall come out of thy loins" the word used is *hālāš* (also I Kgs 8:10; II Chr 6:9). Another word used to refer to the "loins" as a seat of procreative power is *yārēk*, "Which came out of the loins (*yārēk*) of Jacob" (Gen 46:26; also Ex 1:5; Jud 8:30). But to repeat, *motnayim* is not employed in such a context.

Primarily *motnayim* is used simply to indicate the middle of the body. Ezekiel (47:4) saw the stream flowing from the temple rise, first of all, as high as his knees, then as high as *motnayim* "his waist." (Cf. also Ezk 1:27; 8:2.) Here is where a belt/linen cloth was fastened: I Kgs 2:5 (Joab and David); II Kgs 1:8 (Elijah); Isa 11:5 (used figuratively and messianically); Jer 13:1, 11—Jeremiah is told (in a symbolic vision) to take the linen loincloth he is wearing around his waist and bury it in the hole of a rock by the Euphrates. The intent of this is to show that Israel, whom the Lord had fastened as close to himself as a belt, had now broken away from her Lord and would decay. From this part of the body a soldier's sword was hung: II Sam 20:8; Neh 4:18 [H 12]. When the Lord says (Isa 45:1) that before Cyrus he will subdue nations "and strip the loins of kings" the latter phrase probably means to render the kings powerless by taking away their weapons from their belt. Here is where a scribe hung his ink horn (Ezk 9:2-3, 11; "side" in KJV).

Several times people are told to "gird up their loins" that is, tie up the long lower garments around the middle of the body in preparation for running (I Kgs 18:46 with the verb *shānas*); or quick traveling (Ex 12:11; II Kgs 9:1; 4:29 with the verb *hāgar*); and in a figurative sense (Jer 1:17 with the verb *āzar*. Here "to gird up your loins" means "brace yourself for action." Compare in the New Testament the identical phrase in Lk 12:35; Eph 6:14; I Peter 1:13 (*osphys*).

The loins are the seat of strength (Job 40:16; Nah 2:1 [H 2]), especially of male as connected with virility, but also of the female (Prov 31:17). To damage the loins is to weaken or render helpless (Deut 33:11; Ps 69:23 [H 24]).

Proverbs 30:30-31 mentions in order (according to KJV) the lion, greyhound, he-goat, a king. The second one, greyhound, in Hebrew is *zarzîr motnayim*, literally "girt at the loins." Most modern commentators prefer the identification "cock."

V.P.H.

מֵתָן (mattān). See no. 1443b.

מֵתַיִם (motnayim). See no. 1267a.

1268 מֵתֶק (mātōq) *be sweet*.

Derivatives

1268a מֵתֶק (meteq) *sweetness* (Prov 16:21; 27:9).

1268b מֵתֶק (mōteq) *sweetness* (Jud 9:11).

1268c מֵתֶק (mātōq) *sweet, sweetness*.

1268d מִמֵּתֶקִים (mamtaqqîm) *sweetness* (Neh 8:10; Song 5:16).

A stative verb (on the pattern of *qāṭōn* "be small") appearing eight times in the OT, all in the Qal stem except for Job 20:12, "If evil gives a sweet taste in his mouth" and Ps 55:14 [H 15], "We used to take sweet counsel together." Both are Hiphil.

The precise definition of this root is seen in its frequent juxtaposition, for purposes of contrast, to one of the Hebrew words for honey or honeycomb, something quite palatable. Thus Ps 19:19 [H 11] asserts God's judgments are "sweeter than honey (*d*bash*) and the honey that drips from the comb (*nōpet šūpîm*). A similar idea is expressed in Ps 119:103, although the word there for "sweet" is the verb *mālaš* "be smooth, agreeable." In response to Samson's riddle the people say, "What is sweeter than honey?" Ezekiel (3:3) says God's word was to him "as honey for sweetness" (cf. Rev 10:10). Kindred ideas are found in Prov 16:24; 24:13.

It should be recalled that honey (*d*bash*) in the OT not only refers to bee's honey but also to date syrup. There are at least two references, however, to bee's honey: (1) Samson in Jud 14:8ff.; (2) Jonathan in I Sam 14:24-30. Along with leaven it was banned in the burnt offering (Lev 2:11). Naturally, its quality of sweetness caused it to be used figuratively for gracious and pleasant

1268 מַתֹּק (*mātōq*)

things including God's Word (Ps 19:10 [H 11]), the wisdom of the Torah (Prov 24:13), and the speech of a friend (Prov 16:24).

Waters also might be sweet (Ex 15:25; Prov 9:17); the lack of insomnia (Eccl 5:12 [H 11]); the

fruit of an apple tree (Song 2:3); the light of day (Eccl 7:11).

1269 נָּ (nā') *I (we) pray; now.*

Particle of entreaty or exhortation (e.g. Gen 12:13; Num 20:10). An interesting example of the use of this particle is found in Ps 118:25, *hōshî'â nā'* "O LORD save us" (NIV). This cry was taken up at the time of the triumphal entry when the crowd quoted the context also "blessed is he who comes in the name of the LORD (v. 26; Mt 21:9). The Greek *hōsanna* is a transliteration of the Hebrew phrase "O save us," even including the phonetic doubling of the *n* of the particle *nā'*. In Lk 19:39 it is recorded that some of the Pharisees called on Jesus to rebuke his disciples for this outburst, but he instead declared that if the disciples were quiet the very stones would speak. One reason for the Pharisees' reaction, doubtless, is that in the OT the cry "save us" is addressed to the LORD (YHWH). In the NT it is addressed to Jesus, the Son of David. The Pharisees regarded this ascription of praise to Jesus as high blasphemy, though they ascribed it to the ignorance of the crowds. Jesus accepted it as glorious truth.

R.L.H.

נָּ (nā') II. See no. 1358.

1270 נֶבֶל (nō'd) *skin, bottle, skin* (e.g. Jud 4:19; I Sam 16:20).

1271 *נָּ (nā'ā) *be beautiful, befitting.*

Derivative

1271a נָּ (nā'weh) *beautiful.*

The verb *nā'ā*, which occurs only in the Pael, denotes the state of being beautiful (cf. *nā'weh*), or suitable. It is applied to the hair of a beautiful woman (Song 1:10; 1:5), and to the messengers (the feet being *pars pro toto*) who in the eschaton bear the gospel (so E. J. Young, *The Book of Isaiah*, Eerdmans; Isa 52:7). In Ps 93:5 it would seem better to translate "befitting" since the parallel idea is 'mn "faithful, steady"). See the following synonyms: *yāpā* "to be or become beautiful," and *nā'am* "be pleasant, lovely." The word occurs three times.

nā'weh. *Beautiful, comely, suitable.* Feminine forms are *nā'wā* and *nāwā* (the latter indistinguishable from *nāwā* "pasture"; see no. 1322a). ASV and RSV similar (except Ps 147:1, see below). This adjective denotes beauty or suitability. Synonyms are *tipā'rā* "beauty, glory," *ṭōb* "good, beautiful" (infrequently), *šēbī* "decoration, beauty," and *nā'im* "pleasant, delightful, lovely." Our adjective occurs ten times.

That our adjective can signify beautiful is evident from Song 6:4 where it is parallel to *yāpeh*. This is especially clear since in this same book our adjective describes one's countenance (2:14, parallel to 'ārēb, pleasant, KB; cf. 7:6 [H 7]). The primary female voice retorts that although tanned by the sun and toughened by outside work (Song 1:6), yet she is beautiful (Song 1:5; Jer 6:2).

Our adjective obviously means "suitable, befitting" in several places. In Prov 17:7 it is said that it is unbefitting for a senseless foolish man (KB; opposite to *nāgid*, a well-bred responsible man; see *nāgad*) to make himself "important and weighty in a shameless imprudent manner." Similar clarity arises from the parallelism of Prov 19:10 where luxury is said to be unfitting for a fool (Prov 26:1).

Two passages deserve further consideration. First, Ps 147:1 where it is said that it is good (*ṭōb*) to sing praises to God, that it is pleasant (*nā'im*, not "God is gracious," RSV), and that praise is comely. The parallel with *nā'im* moves us toward "lovely."

The other passage is Ps 33:1 where RSV rightly sharpens ASV "comely" to "befits" (Prov 17:7; 19:10; 26:1). The translations of both versions reveal no parallel in our verse (although the immediately following verses do). The parallelism can be regained if one recognizes the vocative *lamed* before *y'shārim* (UT, 12:6, p. 109) and translates, "O ye upright, praise is appropriate." (See also Dahood AB "Psalms" I p. 201).

L.J.C.

נָּ (nā'weh). See no. 1271a.

נָּ (nā'ā). See no. 1322a.

1272 נָּ (nā'am) *say.* (ASV and RSV similar.)

Derivative

1272a נָּ (n'ūm) *utterance.*

This root is used exclusively of divine speaking. Hence, its appearance calls special attention to the origin and authority of what is said. The verb occurs only in Jer 23:31. It is possibly a denominative verb. Many other words are used similarly ('amar, dābar, etc.).

n'ūm. *Utterance, oracle.* RSV and ASV similar in most instances. However, RSV superior in Num 24:3; II Sam 23:1. This noun is patterned after the Qal passive participle (GKC, 50a). Our noun occurs only as a formula (accompanied by the subject) declaring the divine (or claim therefor, Jer

23:31; Ps 36:1 [H 2], etc.) origin and authority of the message so described. Especially contrast *maššā'* referring to a message of judgment. *nā'ūm* occurs 360 times, all but twice in prophetic contexts (Prov 30:1; Ps 36:1 [H 2]), only twenty times outside the prophetic books, 167 times in Jer, 83 times in Ezk, 23 times in Isa, 21 times in Amos, 20 times in Zech.

The meaning of the noun appears clearly in Jer 23:31 where God declares his opposition to false prophets who add to their statements "nā'ūm," i.e. God said it. This basic meaning is equally clear in Ezk 13:7 where God denounces the false prophets, declaring that they saw no true visions, uttered lying divinations, and claimed divine authority when he had not spoken. In Jer 9:22 [H 21] the prophet is commanded to preface his oracle with "this is a nā'ūm of Jehovah" "as a distinctive word from God to banish all doubt of the truth of the statement" (KD, Jeremiah, I, in loc.). Sometimes this formula is augmented by a divine oath stressing the seriousness, etc., of the utterance (Ezk 20:3, 31; 33:11). In the prophets the last half of this formula usually consists (Isa 56:8) of some divine covenantal appellation, i.e., the Lord and King (Jer 46:18). The latter name is especially significant in view of the arguments of M. Kline, *Treaty of the Great King* (Eerdmans, 1963). Many passages are not correctly rendered by either the RSV or ASV (so, KD). The noun ought to be rendered something like "an utterance of" (Zech 12:1), "a judgment: words against Israel; a revelatory utterance of Jehovah."

The occurrences of our noun outside the prophetic books exhibit many interesting themes. One of the pivotal passages in the OT is Gen 22:16. This is the only recorded conjunction of this term and God's self-oath (cf. Heb 6:13f.) in patriarchal history. The noun also introduces Balaam's "scepter" prophecy (Num 24:15ff). David (II Sam 23:1) clearly recalls both of these prophecies in form and substance (cf. KD, in loc.). The *nā'ūm* was as certain as divine monergism. Of course, "eternal" attached to God's covenant is divinely conditioned as to its application (cf. KD, in loc., I Sam 2:30). The special significance of the divine oath sanctioning a covenant is seen in the NT discussion concerning the difference between the Abrahamic (Gal 3; Heb 6:16ff.) and the Mosaic covenants (Heb 7). The *nā'ūm* of Jehovah addressed to "my Lord ('ādōnī)," in Ps 110:1 contains a covenant sanctioned by an oath (v. 4; cf. Heb 7:21). Interestingly, in Ps 36:1 [H 2] "transgression" is the claim of divine revelation. [But cf. NIV, "An oracle is within my heart/concerning the transgression of the wicked." R.L.H.] Proverbs 30:1 is a problematic passage and is explained by KD as showing that what comes from the heart (i.e. the words of Agur) are solemnly earnest. However,

perhaps the idea of direct revelation from God ought to be included, too.

Bibliography: THAT, II, p. 1.

L.J.C.

1273 נָאָפַ (nā'ap) *commit adultery*.

Derivatives

1273a נָאָפַ (nā'ap) *adultery* (Ezk 23:43; Jer 13:27).

1273b נָאָפַ (nā'āpūp) *adultery* (Hos 2:4, only).

This root represents "sexual intercourse with the wife or betrothed of another man" (KB). Our word should be compared with *zānā*, illicit heterosexual relations but not necessarily in violation of the marriage vow, and the noun *nokriyā*, a foreign woman who was generally in a lowered social position and in Prov 5:20; 6:24, e.g., obviously a practitioner of harlotry (cf. RSV). Our root occurs thirty-four times.

The importance of this root exceeds appearances since its use in the seventh commandment constitutes a basic constituent of social law and its religious theological use unveils a major element in Israel's religion.

The seventh commandment (cf. R. J. Rushdoony, *The Institutes of Biblical Law* (Nutley: Craig Press, 1973) requires sexual purity. This contrasts with the infidelity and promiscuity sanctioned and practiced by the official cultus of the rest of the ancient near east. The religion of Jehovah represents adultery as a heinous crime against God (Job 31:11 where adultery is in view, though the word *nā'ap* is not used), man, and society: a breach of the marriage contract before God, a dishonor done to God by placing man's will above God's (Gen 2:24), a rebellious act done with deliberation, needless (I Cor 7:2), the highest sort of theft, i.e. stealing a neighbor's flesh, a debasing of the adulterer, making him a senseless wild ass (Jer 5:8), a means of destroying one's reputation (Prov 6:32-33), or impairing one's mind (Hos 4:11-14), etc. Consequently, under Moses, adultery (even with an engaged girl, Deut 22:23f.) merited death (Lev 19:20; 20:10) whereas fornication (cf. *zānā*) did not. Even desire for another man's wife was wrong (the tenth commandment). The method of death was in some cases, burning (Gen 38:24), and more generally stoning (Deut 22:23f.; Ezk 16:38-40; cf. Jn 8:5). Divorce except for unfaithfulness (Hos 2:5, 11-12; Ezk 16:37-38; 23:29) was hateful to God (Mal 2:16) and in some circumstances expressly forbidden (Deut 22:19, 29). However, out of concern for Israel's hardness of heart this was mitigated (Deut 24:1; Mt 19:18). A woman suspected of adultery had to face a trial by ordeal (Num

5:11–31; cf. *qānā'* [perhaps not technically an ordeal like the Assyrian practice of throwing an accused person into the river to see if he would survive. There was no current physical danger in the *ot* ritual. There was a solemn oath in the holy place which would be a severe psychological test for a guilty woman, and there was also threatened a visitation of God's providence. R.L.H.]). This is both an act of mercy (she could be vindicated of a false accusation) and an institutionalization of woman's commanded submission to man. Immodesty, seen as a needless inducement to adultery (II Sam 11:2), was forbidden (Ex 20:26; II Sam 10:4–5). Godly men sought to discipline their eyes (Job 31:1; cf. II Pet 2:14), and hence, their minds (Mt 5:28). Prostitution was forbidden (Lev 19:29). Priests were commanded not to marry a prostitute (21:7). If their daughters turned prostitutes (temple?) they were to be executed (v. 9). Sacred prostitution, homosexuality (Lev 18:22; Deut 23:18), bestiality (Ex 32:19), and transvestiture (Deut 22:5) were all forbidden as violations of the sanctity of marriage (PTOT, p. 330f.).

Positively, marriage was to be observed both as an act (I Cor 7:2) and as a structural institution (Eph 5:23). It was honorable (Heb 13:4). Mates were to be chosen from the covenant community (Ex 34:16; cf. II Cor 6:14ff.; Heb 11:31; Mt 1:5). Captive women became members of the covenant community by virtue of marriage (Deut 21:13). Polygamy, implicitly forbidden in the creation covenant, was probably forbidden in Lev 18:18. Marriage was covenantally constituted before God (Prov 2:17), required the husband's evidenced ability to support a family (Prov 24:27), and love for his wife (Prov 5:15–19; cf. Eph 5:25).

The theological uses add an instructive dimension to covenantal theology. Contemporary studies in the covenant demonstrate that biblical covenants parallel ancient law treaties. Our word reminds us of the fact that God relates to his people not only as sovereign king but as husband (cf. *qānā'*, etc.). This religious symbolical use of *nā'ap* is attested in Lev 20:10ff. (cf. 18:20ff.; Jer 23:14) where it is aligned with Molech worship and profaning God's name (cf. Ezk 23:37). The prophets apply this figure in describing Israel's sin. Hosea depicts a connection between Israel's faithlessness to Jehovah and the dissolution of all social and religious ties: "where religious union with Jehovah is not kept sacred, there no human marriage can be secure. Sensuality produces religious whoredom and religious whoredom again issues into physical whoredom (4:11, 14)" (Vos, BT, p. 298). Sin is the want of conformity to the ideal of marriage affection and loyalty. Israel is condemned for disavowing God's claims as the marriage lord. They have served other gods by practicing cultic and spiritual prostitution (4:11–12). Jeremiah, Ezekiel, and Isaiah (limitedly) also

use this figure to depict the sin of God's people (Ezk 16:32ff; Jer 3:8f.; Isa 57:3).

Bibliography: TDNT, IV, pp. 729–32.

L.J.C.

נָאֵשׁ (nā'āpūp). See no. 1273b.

1274 נָאֵשׁ (nā'aš) *despise, abhor.*

Derivatives

1274a נָאֵשׁ (n'āšā) *contempt* (II Kgs 19:3=Isa 37:3).

1274b נָאֵשׁ (ne'āšā) *contempt, blasphemy* (Neh 9:18, 26; Ezk 35:12).

The ASV and RSV translate *nā'aš* variously, with the latter being superior at I Sam 2:17, and inferior at Ps 10:3, 13; 74:10, 18; II Sam 12:14.

Our root signifies the action or attitude whereby the former recipient of favorable disposition and/or service is consciously viewed and/or treated with disdain. Consider the following synonymous parallels: *mārā* "to rebel against authority" (Ps 107:11); *'ābā* "to be unwilling and disinclined toward obedience" (Prov 1:30); *šānē* "to hate" (Prov 5:12), not believing in the Lord (Num 14:1), to forsake God (*'āzah*, Isa 1:4), *mā'as* "to reject," Isa 5:24, *hārap* "to say sharp things, reproach, scorn" (Ps 74:10). For synonyms see *mā'as*. Cf. Akkadian *na'āsu* "be-little, despise" and Ugaritic *n'aš* (AisWUS 1731). Our root occurs twenty-nine times (Eccl 12:5 is from *nāšaš* with a pleonastic aleph).

God prophesies Israel's utter apostasy in the face of overwhelming blessing (Deut 31:20ff.). The rejection of the covenant will result in a reversal of divine favor (Deut 32:19). The root connoting the opposite of covenantal favor was applied to judgment as a warning (Num 16:30) and fulfillment (Isa 1:4; Lam 2:6). God's longsuffering (Rom 2:4) overlooked repeated rejections and scorning of his person (Num 14:11; Ps 10:3), sanctions (Ps 10:13), counsel (Ps 107:11), and word (Isa 5:24). To the "despiser" nothing that is God's is considered holy (Isa 52:5; cf. Isa 1:4; Deut 31:19). Thus, he not only "deprecates God's power and ability to carry out his threats" but his contemptuous view of God leads him to prefer sin to God and to express this contempt in conscious contempt of God (cf. E. J. Young, Isa 1:4). The eschaton will see the divine conquest of oppressor and scoffer (cf. Jer 33:24; Isa 60:14).

n'āšā. Contempt. This noun (II Kgs 19:3; Isa 37:3 only) denotes the effect of divine *nā'aš*. Hence, Hezekiah describes Israel's peril as a day of trouble *šārā*, reproof *tōkahat*, and contumely.

ne'āšā. Contempt. This noun (Ezk 35:12; Neh 9:18, 26 only) denotes the external result of human *nā'aš* against God and/or his elect.

- 1275 נָאִי (nā'āq) *groan* (Ezk 30:24; Job 24:12).

Derivative

- 1275a נָאִיָּה (n'āqā) *groan, groaning* (e.g. Ex 2:24; Jud 2:18).

- 1276 *נָאִר (nā'ar) *abhor, spurn* (Lam 2:7; Ps 89:40). Occurs only in the Piel.

- 1277 *נָבִיא (nābā') *prophecy*. Denominative verb.

Parent Noun

- 1277a נְבִיאָה (nābī') *spokesman, speaker, prophet*.

- 1277b נְבִיאָה (n' bū'ā) *prophecy*.

- 1277c נְבִיאָה (n' bī'ā) *prophetess*.

nābī'. *Spokesman, prophet.* The derivation of *nābī'* is a matter of controversy. The old Gesenius Lexicon (ed. Tregelles), for example, derives this noun from the verb *nāba'*, "the ayin being softened into aleph," and meaning to bubble up," "boil forth," hence, "to pour forth words, like those who speak with fervour of mind or under divine inspiration, as prophets and poets." Ewald, Haevernick and Bleek agree (see Samuel Davidson, *Introduction to the OT*, II, p. 230) as does also Oehler (*OT Theology*, p. 363). For these reasons this group of authors have supposed that to utter revelations from God's spirit (ecstatic speech) is the function of the *nābī'*. The mood is said to be active. Other, older writers, including S. Davidson (*ibid.*, p. 430), have employed the same derivation and said the mood is passive, to receive God's speech and then to proclaim it, emphasizing the reception of divine communication by the *nābī'*. Most recent scholarship turns the relationship of *nābā'* and *nābī'* around doubtless rightly, regarding the verb as denominative (BDB, TDNT, VI, p. 796).

The tendency has been away from regarding the active idea of speaking ecstatically as the essential meaning of prophesying: "Rowley... demonstrates [Harvard Theological Review, 38:1–38] that the word *nābī'*, though of uncertain etymology, cannot be used as an argument for the ecstatic nature of the prophets" (Eissfeldt, "The Prophetic Literature," in *The OT and Modern Study*, ed. H. H. Rowley, Oxford Press, 1951, p. 142).

Actually the views of the derivation are four. 1) From an Arabic root, *naba'a* "to announce," hence "spokesman" (Cornill, Koenig, Eiselen, G. A. Smith). 2) From a Hebrew root, *nābā'* softened from *nāba'* "to bubble up," hence pour

forth words (Gesenius, von Orelli, Kuenen, Girdlestone, Oehler). 3) From an Akkadian root *nabū* "to call," hence one who is called [by God] (Albright, Rowley, Meek, Scott), hence one who felt called of God; 4) From an unknown Semitic root (A. B. Davidson, Koehler and Baumgartner, BDB, E. J. Young, Heinisch.) The latter view is favored by Hobart E. Freeman in his excellent book (*An Introduction to the OT Prophets*, Moody, 1968, pp. 37–39). This paragraph is a very brief summary of Freeman's treatment.

The essential idea in the word is that of authorized spokesman. Interpreters have found the basic thought, not in the etymology, which is lost in the dust of antiquity, but in the general usage of the word and in three Pentateuchal loci.

The first *locus* follows the last of Moses' famous objections to being God's designated spokesman to the children of Israel and to Pharaoh (Ex 6:28–30). "And the LORD said unto Moses. See, I have made thee as God to Pharaoh; and Aaron thy brother shall be thy prophet. Thou shalt speak all that I command thee; and Aaron thy brother shall speak unto Pharaoh" (Ex 7:1, 2). Whatever the origin of the word, therefore, a *nābī'* is a person authorized to speak for another, for Aaron, speaking in Moses' place to Pharaoh, is Moses' *nābī'*.

The second *locus* follows an incident wherein Aaron and Miriam had presumed to supplant Moses as mediator of the divine revelation to themselves (Num 12:1–2). The Lord himself then intervened by declaring that Moses only would hold direct conversation with the Almighty, that he would, however, communicate with prophets by dreams and visions (Num 12:4–8). What is left unstated, but is presumed and stated clearly elsewhere (e.g. Jer 23), is that a genuine *nābī'* could be such a spokesman for God only if God had genuinely given him a message (however obscurely) to speak.

The third occurs just before the great legislator's death. In view of the end of "face-to-face" communications from God through Moses, there was a formal announcement of the office of *nābī'* on a continuing basis. In this passage (Deut 18:9–22) Jehovah formally proscribed any traffic with the bogus pagan mantic practices of Canaan (Deut 18:9–14). Then having stated that a line of prophets should speak (or write) with the same authority that Moses had spoken (and written), he commanded the Israelites to render the prophet the same obedience (Deut 18:15, 18, 19) which he had commanded them to give to Moses. Five certifying signs of a prophet (Ps 74:9; cf. Mt 12:38; Acts 2:22) were announced as follows: 1) the prophet must be Israelite, "of thy brethren" (vv. 15, 18); 2) he speaks in Jehovah's name—"voice of Jehovah" (v. 16) "he shall speak in my name" (v. 19; cf. v. 20), death being

the penalty for false claims to so speak (v. 20, cf. Deut 18:1 ff.; 1 Kgs 18:20-40); 3) supernatural knowledge of the near future was to be a sign of the authenticity of divine appointment (vv. 21-22; cf. 1 Kgs 22; Jer 28, esp. v. 17); 4) the prophet might perform some other miraculous sign (see Deut 13:1 ff.; cf. 1 Kgs 18:24; and esp. v. 36) and 5) the final test is strict conformity to (agreement with) the previously certified revelations, by Moses at first and by the prophets to follow (Deut 13:1-18). The fifth requirement is emphatic, the entire thirteenth chapter being devoted to it.

Hebrews 1:1-2, clearly declares that the entire OT is a deposit of written oracles of the n^ebi'im. The word "prophets" is extremely important in this text, for, "In the LXX *nābî* is always translated *prophetes*; there is not a single instance of any other word" (TDNT, VI, p. 812). Once in a text wherein the ages-long work of the line of authentic prophets is summarized, the OT uses the word *mal'āk* "messenger," "angel." The LXX gives the proper sense by using *aggelos* (II Chr 36:15).

There are several questions of special interest regarding *nebi'im* in the OT. 1) Who are the "schools" or bands of prophets? 2) Were professional prophets attached to "shrines" and the temple in some manner comparable to the *kōhānim* (priests) and if so, what were their functions? 3) Who is the person rarely designated as the king's seer *hōzeh* (II Sam 24:11) or *rō'eh* (II Sam 15:27)? 4) In what sense are musicians (rarely) designated n^ebi'im? 5) Who were the false prophets, usually also called n^ebi'im? 6) How far are we to regard the prophets as enemies of the Israelite priesthood? Finally, how are the so called "former" and "latter" prophets related to the whole office of prophet and function of prophecy?

The reader may consult a truly immense recent and current literature in pursuit of answers. The 81-page article on προφήτης in TDNT is all relevant. The bibliography alone is about two tightly filled pages in size. It can be said that after discounting the somewhat chastened or higher criticism of the four authors (Rendtorff, Kraemer, Meyer, Friedrich) the residue is exceedingly valuable. The extremes of recent authors who have sought to overturn more traditional, conservative answers are generally rejected. The same may be said of the article "The Prophetic Literature" by Otto Eissfeldt in *The OT and Modern Study*, edited by H. H. Rowley and the relevant portions of *Ancient Israel* by Roland de Vaux. The excellent and extensive article on "prophets and prophecy" by A. A. MacRae in ZPEB, IV, pp. 875-903 should be consulted. The limited space of this article allows no room for treating these questions or sifting the extensive materials hinted

at here. See the articles of this dictionary on *ro'eh*, *hōzeh*, *hāzōn*, and *hālam*.

R.D.C.

1278 נָבֵב (nābab) *hollow out* (e.g. Job 11:12; Jer 52:21).

1279 נָבוּ (n^ebô) *I, Nabu.*

This *hapax legomenon* (Isa 46:1) is the Hebrew spelling of the name of the Babylonian god, Nabu. Nabu was the protector of the sciences (which were in the realm of Enki-Ea), the patron of the scribal art, and a god of wisdom (as was Ea and Marduk). His spouse was Tashmetum ("hearing") and he was known to be "wide of hearing" (ready to hear). His symbol, a wedge on a pole, represented either the cuneiform script or a sighting instrument used in astronomy. His popularity grew steadily until *ezidas* (his temples) could be found in every major city of Babylon and Assyria. His major temple, however, was at Borsippa (Birs Nimrod, ten miles south of Babylon) to which the king would come yearly (on the fourth of Nisan) to fetch him (i.e., his statue) and conduct him to Babylon to deliver Marduk from the grip of the netherworld (this ritual was known as the Akitu). The Babylonian chronicles (c. 990 B.C.) report that Nabu "did not come" for nine years. Thus a complete administrative disruption is recorded. The fate of Nabu parallels the fate of Babylon. Note Nebuchadnezzar (Nabu protect the son or the inheritance), Nebushazban (Nabu save me), Nebuzaradan (Nabu gave a son), and Abednego (servant of Nabu?). Cf. n^ebô, II.

Bibliography: Roux, G., *Ancient Iraq*, Cleveland: World Publishing, 1964. Saggs, H. W. F., *The Greatness that was Babylon*, New York: Hawthorne, 1962. Wiseman, D. J., "Nebo," in NBD, p. 872.

L.J.C.

1280 נָבוּ (n^ebô) *II, Nebo.* (ASV and RSV the same.)

Our word is the name of a mountain located in Moab (G. T. Manley, "Nebo," in NBD, p. 872). It might well be named in honor of the Babylonian deity *Nabû* (cf. n^ebô). Our noun occurs eleven times.

There are two problems related to Mount Nebo. First, its relationship to Pisgah and the mountains of Abarim. The first appears to signify "a ridge crowning a hill or mountain" and hence represents more than one such prominence ("Pisgah," G. T. Manley, in NBD, p. 1000)—Mount Nebo in Deut 3:27. The second term represents the mountain range in which Nebo was

1281 נָבַח (nābah)

located (Num 27:12; Deut 32:49). The identification of Mount Nebo is the second problem. Some say this represents three different sites (cf. KD). Others rightly identify it with one place (Manley, "Nebo," op. cit.: W. Ewing, "Nebo, Mt.," in ISBE, p. 2127). It was from Mount Nebo that Moses viewed the promised land just before he died (Deut 34:1). In this area the sons of Reuben built a city (Num 32:3; cf. NBD, p. 834). Later the area was reclaimed by the Moabites and against their treachery Isaiah (15:2) and Jeremiah pronounced judgment (48:1, 22). The descendants of the Israelite refugees from Nebo are listed among those who returned from the exile (Ezr 2:29) and who married non-Israelite women (Ezr 10:43).

L.J.C.

נְבוּאָה (n'bu'ā). See no. 1277b.

1281 נָבַח (nābah) **bark** (of dogs, Isa 56:10, only).

1282 *נָבַט (nābat) **look, regard**. Occurs in the Piel and Hiphil.

Derivative

1282a מַבְבָּט (mabbāt) **expectation** (Zech 9:5; Isa 20:5-6).

The ASV and RSV translate *nābat* somewhat differently, with the latter inferior at Ps 10:14; I Sam 2:32. Our root represents that which one does with the eye (Ps 94:9) embracing everything from a mere glance (I Sam 17:42) to a careful, sustained, and favorable contemplation (Isa 5:12; Ps 74:20; 119:6, 15). It is frequently paralleled to *rā'ā* "to see," and sometimes to *hāzā* "to see," usually of prophetic "seeing," *shūr* "to see, regard," poetic, *pānā* "to turn toward, to see," and *shāqā* "to look down." Our verb occurs sixty-nine times, only in the Piel and Hiphil.

For a fuller treatment of theological themes see *rā'ā*. Our verb is used, both of man's looking to/upon God and God's looking upon man. In Ex 3:6 Moses looks upon what he thought was the divine essence. Later God says that Moses, unlike all other true prophets, shall continue to look upon his form, i.e. he will be able to converse with him in a unique way (KD, Num 12:8; Jn 6:46; 14:7). No mere man, however, has ever seen the divine essence (cf. Ex 33:18ff.). Men are to look, i.e. fix their eyes on and thus guide their lives according to the will of Jehovah as their only help (Isa 51:1; 22:11; Ps 34:5 [H 6]), and on his means, e.g. the covenantal framework (Isa 51:2; Ps 74:20), and his messiah (Zech 12:10). The ungodly do not regard God's working (Isa 5:12), or appointed leader (Ps 22:17 [H 18]) properly.

God who observes all (Job 28:24; Ps 33:13) rewards the pious (Ps 102:19 [H 20]; 13:3 [H 4]) 84:9 [H 10]) and wicked (Ps 10:14; Amos 5:22) according to his divine power (Ps 104:32).

L.J.C.

נָבִיא (nābī). See no. 1277a.

1283 נֶבֶק (nēbek) **spring** (Job 38:16; 28:11).

1284 נָבֵל (nbl) **I. Assumed root of the following.**

1284a נֶבֶלָה (nēbel) **I, skin bottle; jar, pitcher.**

1284b נֶבֶלָה (nēbel) **II, psaltery.**

nēbel I, Skin, skin bottle, jar, pitcher. A container for liquids. *nēbel* is also used to refer figuratively to the clouds (Job 38:37).

nēbel II. Psaltery, viol. Because of its bulging resonance-body at the lower end, it may be related to *nēbel* "skin, skin-bottle."

The *nēbel* is the Greek equivalent of a harp or lyre. It was an instrument of twelve strings which were plucked with the fingers (Josephus, *Antiquities* 7. 12. 3). It was larger than the *kinnôr* "lyre" (q.v.), with a deeper tone. The lyre had two arms with a box-shaped body (a Canaanite version). David played such an instrument. It was the main instrument in the second temple orchestra. The *nēbel* was the number two instrument and probably less costly than the *kinnôr*. In the Mishnah 'ārākīm 2:3, it is stated that there never were less than two harps or more than six in the orchestra. (Some would equate *nēbel* with the Egyptian harp, a zither-type instrument with a wooden sounding box and with ten to twenty strings, standing up to four yards high, and plucked with the fingers.)

According to the Mishnah, the *nēbel*'s strings were made of the large intestines of sheep (Kinim 3:6). There is also mentioned in Scripture the *nēbel 'āsôr*, a slightly smaller *nēbel* of ten strings. Since no representations of a *nēbel* have come down from the biblical period, its shape can only be conjectured.

Three of the twenty-seven usages indicate its use in godless revelry (Isa 5:12), pagan worship (Isa 14:11) and the diluted worship which Amos condemned (Amos 5:23). It was played by the bands of prophets (I Sam 10:5) and David used it for worship (II Sam 6:5). Solomon provided harps for temple worship (I Kgs 10:12). Otherwise, the *nēbel* (and *nēbel 'āsôr*) were always used in worship (Ps 57:8 [H 9]; 81:2 [H 3]; *et al.*).

The important place afforded music in the worship of God shows that God responds favorably to man's communication with him in music and that God communicates to man not only cognitively but also in his emotions.

L.G.

1285 נָבָל (*nābal*) *II, be senseless, foolish.*

Derivatives

- 1285a נָבָל (*nābāl*) *fool.*
 1285b נָבָלָה (*n^cbālā*) *folly.*
 1285c נָבָלוּת (*nablūt*) *immodesty, shamelessness* (Hos 2:12, only).

The verb is used only five times, once to describe one who exalts himself as foolish. Four times, in the Piel stem, it expresses disgust or contempt, by a person who scorns the rock of his salvation (Deut 32:15), or treats his father contemptuously (Mic 7:6). God makes vile the recalcitrant (Nah 3:6). The prophet prays to fend off God's wrath so that he will not disgrace the throne of his glory (Jer 14:21). The derivatives picture the full significance of the word.

nābāl. Fool. The noun *nābāl* is widely used in the wisdom literature. In Prov, the term *nābāl* includes the concepts associated with *k^csil* and *'ēwil* (q.v.), and also emphasizes being ignoble and disgraceful, a downright boor. Insensitivity to God, as well as a moral insensitivity, close the mind to reason.

Moses chided his generation, referring to them as *'am nābāl*, a foolish people (Deut 32:6), who did not appreciate the Lord's benefits. Heathen nations are characterized as foolish, spurning or reviling the very name of the Lord (Ps 74:18). Therefore, Moses answered his generation's unfaithfulness by equating them with pagan peoples. In fact, if they were to persist in their foolishness (*nābāl*), they would be provoked to anger by an idolatrous, foolish (*nābāl*) people (Deut 32:21). The insensitivity of God's people required that they be shamed and hurt by their own foolishness.

The prophets have little use for the *nābāl*. Isaiah pictured the kingdom where many an upside down state of affairs would be rectified. No longer would respect and homage be paid to the fool, who speaks nonsense, his heart inclining toward wickedness (Isa 32:5–6). He is churlish, lacking spirituality. The man who gathers wealth unjustly, will lose it in the midst of his life. Such a person is a fool in the end (Jer 17:11). False

prophets, seeking the message from their own resources, are foolish. Actually they have no message, no vision from God (Ezk 13:3).

The *nābāl* has a closed mind, saying in his heart that there is no God (Ps 14:1; 53:1 [H 2]). He insults God all day long in a continual round of uproar (Ps 74:22). David prayed to be delivered from his transgressions lest the foolish, not discerning his heart, insult the servant of God (Ps 39:8 [H 9]). The sons of a fool, referring to those who learn from him, are ignoble, sons without any name (Job 30:8). Abner's death was lamented as possibly that of a fool (II Sam 3:33). [Or it may be that David asks if Abner died like a wicked man—a *nābāl*, implying that Joab, his attacker had murdered the innocent. R.L.H.]

The *nābāl*, who should keep himself in retirement because of his impiety, is a boor and makes himself heard in public (Prov 17:7). The earth protests when a *nābāl* grows rich: such a one becomes arrogant and overbearing (Prov 30:22). The boorishness, a reflection of refusal to listen to reason or to God (at the moment) is seen in Nabal of whom his wife Abigail said, "he is such a son of Belial that no one can speak to him" (I Sam 25:17). He is a *n^cbālā*, because he rejects the fear of the Lord who could have given him some wisdom.

n^cbālā. Folly, villainy, vile. *n^cbālā* carries the same meaning as *nabal*, i.e. a disregard for moral and spiritual claims. In every way, a *n^cbālā* is senseless, impious and a disgrace, and his actions are sinful folly.

n^cbālā refers to sins of immorality. A request for homosexual relations was regarded as an act of folly (Jud 19:23–24). Premeditated rape was stigmatized as a deed of folly (II Sam 13:12). Amnon would be known as a *nābāl* in Israel (v. 13). In fact, these vile deeds are known as folly (*n^cbālāh*, a disgraceful and sinful thing) in Israel, i.e., violation of moral standard in Israel, e.g. the violation of Dinah (Gen 34:7) or a bridegroom's statement regarding his wife's chastity (Deut 22:21; also Jud 20:6; Jer 29:23).

Achan's theft of things under the ban was considered a *n^cbālā* in Israel (Josh 7:15). Nabal, even according to his name, committed a sinful and disgraceful thing because he was a disgrace (I Sam 25:25). *N^cbālā* can also refer to foolish and impious language: Isaiah assessed his generation as the *nābāl* who speaks *n^cbālā*, a play on words to emphasize the state of being producing the act (Isa 32:6; also 9:17). Job's friend required atonement for their words and conduct with him. Their actions against Job were considered folly (*n^cbālā*) against God himself (Job 42:8).

1286 נָבֵל (*nābēl*)

1964. Richardson, TWB, pp. 84–85. THAT, II, pp. 26–30.

L.G.

1286 נָבֵל (*nābēl*) *wither*.

Derivative

1286a נֶבֶלָה (*n^hbēlā*) *corpse, carcass*.

The ASV and RSV translate this verb variously with the latter being superior at II Sam 22:46 (Ps 18:45 [H 46]; Job 14:18; Isa 1:30; 24:4; Jer 8:13). Neither is satisfactory at Isa 34:4 and 40:7–8.

Our word represents a state or condition of leaves when they are dried but still attached to the tree—parallel to dry grass (Isa 40:7–8) or a dry garden (Isa 1:30). For synonyms see *yābēsh* “to be dry, wither,” and *šānam* “to be hard, barren.” Compare *nbl*, the assumed root of the derivatives *nēbel* “skin-bottle,” “jar” and *nēbel* “lute,” also the root *nābal* “be senseless” the root for the derivatives *nābāl* “foolish” and *n^hbālā* “senselessness.” KB lists all these derivatives under the one root *nābēl* “wither.” According to our analysis, *nābēl* occurs twenty times.

The image of withered leaves about to fall given by this verb or other dried up vegetation often serves as a figure of judgment. Divine omnipotence enervates the mightiest nations of the earth (Isa 34:4; cf. II Sam 22:46; Ps 18:45 [H 46]). The wicked will most certainly face God’s judgment (Ps 37:2). God will remove the vitality of Judah (Isa 1:30; Jer 8:13), and Ephraim (Isa 28:1). The godly will be enlivened by rivers of living waters (Ps 1:3; cf. Ezk 47:12). Our verb also is applied to the transitoriness of human life (Isa 40:7–8) and human strength (Ex 18:18).

n^hbēlā. *Corpse, carcass.* ASV and RSV similar although the latter is inconsistent at points, e.g. Josh 8:29/Jer 26:23/Isa 5:25 (especially in view of Deut 28:26). This noun refers to a human or animal body devoid of life. Its synonyms are: *peger*, usually of human corpses (except Gen 15:11), *g^hwiyā* (cf. *gūpā*, I Chr 10:12/I Sam 31:12), of the body dead or alive (Gen 47:18), *mappēlā* (cf. *nāpal*). Our noun occurs forty-eight times.

Corpses of men and animals are unclean and priests are forbidden to touch any corpse except that of near relatives (Lev 21:1–3). The high priest and Nazirite cannot even do that much (Lev 21:11; Num 6:6–8—the word here is *nepesh*). God prescribes a detailed rite for purification if these restrictions are violated, or if one unwittingly becomes polluted (cf. Num 19). Even the land can be polluted if the body of an executed person is not buried before the day is over (Deut 21:23). Jeremiah notes that idols, being “corpses” guilty of sin (?) pollute the land (16:18).

Not to be properly buried is a sign of great disgrace (II Sam 21:10ff.; I Sam 31:11–13, etc.), and even of divine judgment (Deut 28:26; cf. Jer 26:23; Isa 5:25; Jer 7:23), etc. Restoration is figured in terms of a resurrection (Isa 26:19).

L.J.C.

נָבִלָה (*nablūt*). See no. 1285c.

1287 נָבַע (*nāba^h*) *pour, gush forth*.

Derivative

1287a מַבְבֹּעַ (*mabbū^a*) *spring of water* (Ecc 12:6; Isa 35:7; 49:10).

The ASV and RSV translate *nāba^h* variously, with the latter usually superior. Neither is adequate at Ecc 10:1 (“stink and pour forth”). Our root connotes an uncontrollable or uncontrolled gushing forth as, e.g. the swollen waters of a wadi (Prov 18:4; cf. *nāhal*), the rush of words from a fool’s mouth (Prov 15:2; antonym, *hāgū*, Prov 15:28). There are many Hebrew words representing “flowing” or “pouring” of various kinds and directions: *māzal*—to flow, as of a river; *nāgar*—to run down, as of tears, blood, a sore, etc.; *yāšaq*—to pour or cast, especially of molten metal; *nāsak*—to pour out, especially a libation; *nātōk*—to pour out, of fire, judgment, etc.; *shāpak*—to pour out, perhaps the most general of these words. Cf. old Aramaic *nb^h* (KAI 38), “to gush forth,” and Akkadian *namba^u* (and *nabba^u*) “bubbling spring” (KD). The verb occurs eleven times.

In Ps 19:2 [H 3] *nāba^h* images the “uninterrupted line of transmission” and “inexhaustible spring,” the “day” issuing in declaring God’s glory (KD). The Psalmist prays that he will declare God’s glorious deeds, i.e. parabolical episodes (KD, Ps 78:2; 119:171). Ultimately the “transcendent goodness of God is the object of universal, overflowing acknowledgment” (KD, Ps 145:7). The wicked “pour forth” arrogance, boasting (Ps 94:4), piercing bitterness (Ps 59:7 [H 8]; cf. Prov 15:2, etc.). Of special interest is Prov 1:23 where wisdom (v. 20) promises to pour forth its spirit (make known its words) on all willing students. This is a spirit-enabling understanding and not a spirit-effecting regeneration, although the NT combines the two ideas (I Cor 2:14). A still greater and qualitatively different outpouring of the Spirit awaits the coming of the Messiah (Joel 2:28 [H 3:1], *shāpak*).

L.J.C.

1288 נֶגֶב (*ngb*). Assumed root of the following.

1288a נֶגֶבָה (*negeb*) *Negeb, south*. (ASV and RSV quite different with the latter correctly rendering “Negeb” at the appropriate spots. RSV less de-

sirable at I Sam 20:41; Ezk 40:2 where it emends.)

That our word represents a geographical area is clear from Gen 13:1 and Num 13:23 where the travelers are going north. A secondary meaning of our word is "south" (cf. Gen 13:14). Cf. the following synonyms: *yāmin* (implying the eastern posture in prayer, *KB*), *tēmān* (root *yāmin*), *yam* and *dārôm*. The noun occurs 111 times.

The ancient Negeb was an indefinitely contained region approximately 4,520 square miles in area. Its northern boundary extended south of the Gaza-Beersheba road due east of Beersheba to the Red Sea. Its southern boundary merged into the highlands of the Sinai Peninsula. It consisted (and still does) of quite broken country upon which falls little rain (one to eight inches per year). Its summers are hot and winters cold. Strong winds batter the terrain during both seasons (cf. Isa 21:1). The occurrence of rain rapidly transforms the wadis into overflowing torrents and its loess soil resists absorption (cf. Ps 126:4). A generous and shallow underground water table underlies the area. The terrain is not a desert since it is amenable to limited grazing (cf. Gen 13:1-6), and under controlled conditions (a strong central government to protect farmers from marauding Beduins and assist them during the frequent droughts) can support farming in some areas.

The Negeb was not always settled. The twenty-first to nineteenth centuries B.C. attest many villages whose destruction may well have resulted from the *razzia* of Chedolaomer and his allies (Gen 14). This devastation may also explain how Hagar lost her way when fleeing—known land marks (i.e. cities) were destroyed (Gen 21:14). Also, the patriarchs apparently did not journey into the Negeb after Gen 14, but remained in the area of Gerar, Hebron, and Beersheba which was unscathed by the invasion. To date there is little archaeological evidence of extensive Amalekite occupation at the time of the Exodus (c. 1445 B.C.; however, cf. G. L. Archer, *A Survey of Old Testament Introduction* (Moody, 1964), pp. 214-15, 220-21). Israel was repulsed by these Amalekites (Num 14:44-45; Deut 1:44), but later Judah and Simeon invaded and occupied the area. Archaeology confirms extensive occupation during the monarchical period. Saul destroyed the city of King Agag (I Sam 14-15). David fought the Amalekites (I Sam 30) and others in the various areas of the Negeb. As in the days of the patriarchs, so also during the early monarchy the Negeb was occupied by various ethnic groups (Gen 26:26-33; I Sam 27:10; 30:14). Under Solomon the Negeb produced copper (refined at Ezion-Geber) and had much trade (it was crossed by the "way to Shur," and several les-

ser trade routes. Cf. map in Y. Aharoni, *The Land of the Bible*, Westminster, 1967, p. 40. Later when Ezion-Geber became unusable, an adjacent port, Elath, was re-opened by Uzziah (I Kgs 9:26; II Chr 26:2) to facilitate the copper trade.

The prophets predict a desolation (Jer 13:19; Ezk 20:46-47 [H 21:2-3]), and ultimate renewal (Jer 17:26; 32:44; 33:13) of Judah and the Negeb.

L.J.C.

1289 נָגַד (nāgad) *tell, make known*. Occurs in the Hiphil and Hophal, only.

Derivatives

1289a נָגַד (neged) *before*.

1289b נָגִיד (nāgid) *ruler, leader, captain*.

This root basically denotes "to place a matter high, conspicuous before a person" (*KB*). The arabic *nağada* means "be conspicuous" and the noun *nağdun* means "highland" Usually the "matter" was previously unknown or unknowable to the object. The verb requires varying translations depending on the context. The meaning is further enlightened by considering the following synonymous parallels: 'āmar "to say" and *shāma* "to make known" (*Hiphil*), Jer 4:5 (cf. Ex 19:3; Deut 32:4; Isa 41:22, etc.); *sāpar* "to report," Job 12:7-8; Ps 19:1 [H 2]; *bīn* "to understand," Jer 9:12 [H 11]; *dibbēr* "to speak," Isa 45:19; and *yā'aš* "to advise," Jer 38:15. Also *gālā* and *yāda'*. Cf. Phoenician, *ngd* (*KAI*, p. 16). The verb occurs 363 times.

Especially note Jud 14:12, e.g., where the verb *nāgad* connotes "telling the solution" of a riddle (cf. v. 12), and Ezr 2:59 "prove, give written evidence of."

Theologically, the verb is used of both God's and man's revealings. God brought things to men's attention (i.e. revealed) directly, through dreams (Gen 41:25; cf. Deut 13:1; 18:16; Acts 2:17), prophecies (Gen 49:1), and prophets (especially Moses, Deut 4:13). Such declarations being of divine origin, they carried divine authority (Deut 5:5). A prophet declared the divine purpose (Isa 19:12) and judgment (Isa 21:2), indeed, whatever the mouth of the Lord declared (Jer 9:12 [H 11]). Other spokesmen bore an authority derived from the covenantal revelation (Deut 4:13), i.e. priests and elders (Deut 17:10-11), fathers (Ex 13:8; Deut 32:7), and other leaders (cf. Isa 40:21). It is the responsibility (Ps 42:2 [H 3];

71:17; 145:4), and privilege (Ps 9:11 [H 12]; 51:15 [H 17]) of all men to make God's excellencies prominent before the OT church (Ps 30:9 [H 10]) and before the world (Ps 22:31 [H 32]). Such an act constituted praise (Ps 30:9 [H 10]) and thanksgiving (Ps 92:2 [H 3]) and could be done in song (Ps 9:11 [H 12]). God's greatest work, i.e. the sovereign redemption of his people and the declaration of justification by the instrument of faith alone (e.g. Ps 40:6 [H 7]) is to be declared to all the nations (Ps 22:31 [H 32]; Isa 48:20; 66:19; cf. Mt 28:18ff.).

Divine glory (Ps 19:1 [H 2]; 97:6) and righteousness (Ps 50:6) are made known and brought to prominence by the visible creation (cf. Rom 1:18ff.).

God taunts unbelievers, challenging them to have their "no-gods" reveal the dim past or distant future, i.e. all things (e.g. Isa 41:22ff.). Jehovah is the only eternally existent (Isa 43:10), omniscient (Isa 44:7) God who had declared (Isa 45:19; cf. Deut 4:29), does declare (Isa 42:9) and accomplish (Isa 43:12) his sovereign will (Isa 48:20). He reveals to man what he wants to be known and obeyed (Amos 4:13; Ps 111:6). Therefore, rebellious man is inexcusable.

neged. *Prominently "before."* ASV and RSV often the same with the RSV usually superior at points of difference (cf. Ex 10:10; Ezk 40:13; Num 2:2; Jud 9:17, etc.) and infrequently inferior (Lam 3:35; Ps 38:17). Both are inadequate at Ps 52:9 [H 11]; 78:12; II Kgs 2:7. Our preposition retains the basic thrust of the root. It is this connotation of prominence (being conspicuous) that distinguishes the root from its synonyms, e.g. *mûl*, *nôkah* (straight in front of), *ûmmâ* (corresponding to), *lipnê* (cf. *panâ*). N.b. the phrase "before one's face" is paralleled to "in one's own eyes" (Isa 5:21; cf. Ps 90:8), and is opposite to "secretly" (II Sam 12:12; cf. Ps 38:9 [H 10]).

The unique thrust of this preposition illumines many passages (e.g. I Sam 15:30; cf. II Sam 12:12; Josh 8:11). Our word occurs in covenantal contexts. God's law was to be read before (i.e. so all could hear) Israel (Deut 31:17; cf. Josh 8:35; Ezr 8:3). Man's public covenants were enunciated (I Kgs 8:22) and fulfilled openly in that the entire community could witness the act. So David (Ps 22:25 [H 26]), and later the Messiah, promised the payment of vows. The reference here is probably to the *sh' lāmim* (the peace offering, the perfected Passover, the Lamb of God himself).

Public vowing embraces open declaration of God's word (Ps 119:46), and praise (Ps 138:1), and hoping in his name (Ps 52:9 [H 11]). God's word and attesting miracles were performed openly and prominently before Israel. There was no excuse for unbelief (Ex 34:10; cf. Ps 78:12).

The same holds true for his acts of providence (Ps 31:19 [H 20]; cf. Rom 2:4). The word also occurs in legal (*rib*, q.v.) contexts. Samuel calls the people before God as a witness to his steadfastness (I Sam 12:3; cf. I Kgs 21:13). God the omniscient judge clearly attests man's sin (Hos 7:2; Ps 109:15), his desire (Ps 38:9 [H 10]; cf. Rom 8:27ff.) and all his ways (Ps 39:5 [H 6]; 119:168; Prov 15:11). His Messiah shall always sit before him vindicated and rewarded (Ps 89:36 [H 37]; cf. Isa 24:23; 61:11).

The preposition occurs in the compound *l'neged* (used to emphasize *neged* [Ps 90:8; Jer 16:17, etc.]), i.e. to set before one as that which determines one's conduct (cf. II Sam 22:23; Ps 26:3; 36:1 [H 2]). Also, *l'neged* is used like *minneged* to mean "opposite" (e.g. Josh 5:3; Neh 12:9; cf. *neged* in Ezk 40:13; Neh 3:16, etc.). It connotes "facing, prominently exposed to" but at some distance (near. Gen 21:16, or far, Ps 38:11 [H 12]). Finally, cf. *k'neged*, i.e. "as that which corresponds to" (Gen 2:18, 20; cf. KD).

nāḡid. *Ruler, leader, captain.* [It is perhaps in this derivative that the idea of prominence, which is in the root, comes to fullest expression. The word is used almost fifty times and is applied to leaders in several fields—governmental, military and religious. The word usually is singular and refers to the man at the top, the king, the high priest, etc. But there are references to leaders and captains in the army. The Messiah is called a *nagid* in Dan 9:25. R.L.H.]

Bibliography: THAT, II, pp. 31–36.

L.J.C.

1290 נָגַד (nāḡah) shine.

Derivatives

- 1290a נֹגַהּ (nōḡah) **brightness.**
1290b נִגְהָה (n'gōhā) **brightness** (Isa 59:9, only).

Our verb refers to a steady light given off by a lamp (Ps 18:28 [H 29]), the moon (Isa 13:10), a spark (Job 18:5), and a light shining in darkness (Isa 9:2 [H 1]). For synonyms see *'āhal*, *hālāl*, *zāhar*, *qāran*; and especially, *yāpa'* and *zārah* (cf. Franz Schnutenhaus, "Daz Kommen und Erscheinen in Alten Testament," ZAW 76:10f.). Ugaritic attests *ngh* (AisWUS 1743). Our verb occurs six times.

God's judgment (Joel 2:10; Isa 13:10; cf. Job 18:5) and redemption (Joel 3:15 [H 4:15]) are figured by the darkening of the celestial bodies (Joel 2:31; Acts 2:20). God's blessing is described as "light shining on your path" (Job 22:28). God, David's lamp, will brighten his darkness (Ps 18:28 [H 29]). A good king as an earthly representation of God also shines brightly (II Sam 23:4). Ezekiel uses the root *nāḡah* to represent the glory of God

(Ezk 1:4; 10:4). For Isaiah the regenerate who are in the darkness of temporal suffering (Isa 50:10) will be visited by a king who will be the source of true/eternal light (Isa 9:2 [H 1]; Mal 3:20 [H 4:2]; Jn 1:9; 8:12; Lk 1:78–79). The nations will flock to him as he sits enthroned in the spiritual/eternal Jerusalem—in the church [or in the millennium or in heaven itself or all three! R.L.H.] (Isa 60:3; Heb 12:22; Rev 21:23; 22:5). God pledges himself to make the righteousness of the elect go forth as brightness (Isa 62:1; paralleled to *lappid* “torch”).

nōgah. *Brightness, shining.* ASV and RSV the same except Hab 3:11. This noun refers to the result of *nāgah*. It occurs nineteen times.

L.J.C.

- 1291 נָגַח (nāgah) *push, thrust, gore* (e.g. Ex 21:28, 31–32; Deut 33:17).

Derivative

- 1291a נִגְגָה (naggāh) *addicted to goring* (Ex 21:29, 36).

נָגִיד (nāgîd). See no. 1289b.

נִגְיָה (n'ginā). See no. 1292.1a.

- 1292 נָגַל (ngl). *Assumed root of the following.*

- 1292a מַגְגָּל (maggāl) *sickle* (Jer 50:16; Joel 4:13).

- 1292.1 נָגַן (nāgan) *play a stringed instrument.*

Derivatives

- 1292.1a נִגְיָה (n'ginā) *music (of stringed instruments), song, taunt song.*

- 1292.1b מַנְגִּינָה (manginā) *mocking song* (Lam 3:63 only).

The verb *nāgan* occurs in conjunction with “song” or “singers” in Ps 33:3; 68:25 [H 26] and Isa 23:16. Psalm 68 seems to differentiate between the singers and the musicians (*nōg"nim*) with the tambourine-playing maidens. The harp (*kinnôr*) is the instrument being played in I Sam 16:16, Ps 33:2–3, Isa 23:16. Psalm 33:2 also mentions the ten-stringed lyre. David played the harp before Saul to help soothe the king when an evil spirit came upon him, but his efforts were sometimes unsuccessful (I Sam 16:16, 18, 23; 18:10; 19:9). Elisha asked for a minstrel to play for him, so the hand of the Lord would come upon him (II Kgs 3:15). Hezekiah anticipated that songs would be played at the temple to give thanks for his healing (Isa 38:20). In Ps 33:3 the psalmist wanted to play skillfully and shout for joy as he praised the Lord.

n'ginā. *Music, song, taunt song.* This noun refers to pleasant songs in Ps 77:6 [H 7] and joyful

music in Lam 5:14, but elsewhere it has the same meaning as *manginā* “mocking song” (Lam 3:14; Job 30:9). In Ps 69:12 [H 13] it is the song of the drunkards. In seven psalms *n'ginōt* appears in the title, indicating that stringed instruments were to be used (4:1; 6:1; 54:1; 55:1; 61:1; 67:1; 76:1; cf. Hab 3:19). In the KJV the Hebrew is simply transliterated “on Neginoth.” For other such terms see *selā*.

H.W.

- 1293 נָגַג (nāga') *touch, reach, strike.*

Derivative

- 1293a נִגְגָה (nega') *stroke, plague, disease.*

The root *ng'* denotes that which pertains when one thing (or person) physically contacts another. For synonyms, see *nāgap*. Its many connotations sometimes require different translations: e.g. reach, strike, etc. The verb occurs 150 times.

The essential meaning of *nāga'* is “to touch.” It can refer to a thing touching, i.e. contacting another thing (Isa 6:7; 16:8; Hos 4:2), a man contacting a thing (Ex 19:12), or coming into an area (Est 6:14), and God’s touching a man (Dan 8:18) or a thing (Ps 144:5). Special attention should be given to Ps 88:3 [H 4] where the Psalmist parallels a “soul full of troubles” and “life touching Sheol” (cf. Leonard J. Coppes, “Sheol: What is it?” *Covenantal Witness*, Feb 4, 1976, p. 14ff.). Here the Psalmist, recognizing that God brought about his condition, prays for him to change it (cf. Ps 107:18). The word is used in a ritualistic context, viz. that things holy (belonging to God, Ex 19:13; Lev 12:4; Num 4:15) are not to be touched by the unauthorized. Unholy things are restricted, too (Num 19:16, 22; Isa 52:11). Perhaps this is because to touch something is to extend one’s authority over it. Certainly God’s explicit commandments regarding what may and may not be touched lawfully (Hag 2:12) should obviate any suspicion of magic or animism. This raises a question regarding Eve’s speech in Gen 3:3. Was she exaggerating (KD) or merely reporting?

The root is used hyperbolically in conjunction with the guilty deserving punishment (Qal, Jer 51:9) and unholy rage (Hiphil, II Chr 28:9). Both are said to reach to heaven, i.e. to be exceedingly great (Ps 57:11 [H 12]; 108:5 [H 6]), if not infinite.

Another special use connotes cohabitation. So, Abimelech states he had not touched Rebekah (Gen 20:6). Proverbs says that whoever touches (goes to and has relations with) an adulteress shall be punished (6:29). Boaz instructs his workers not to “touch” (RSV, molest) Ruth (2:9).

The verb frequently means to extend authority over by claiming as one’s own, or inflicting a blow (fatal?) upon (Jer 4:10, 18; Job 1:19; 5:19).

God forbids people so to touch his prophets (I Chr 16:22), his people (Zech 2:8 [H 12]), or his inheritance (Jer 12:14). These are holy and belong to him (cf. ritualistic use). God touches the wicked with righteous judgment (Gen 12:17; 32:25 [H 26]; I Sam 6:9). However, the Psalmist (73:14) and Job (19:21) complain against God's justice. Onlookers will consider the Messiah divinely and justly punished (Isa 53:4). God's touch often is beneficial, empowering one to service (Isa 6:7; Dan 10:16; Jer 1:9). Always, God's touch is authoritative, whether he touches mountains (Ps 104:32; cf. Amos 9:5), a sacrifice (Jud 6:21; cf. II Sam 23:7), or men (I Kgs 19:7; I Sam 10:26).

nega'. *Stroke, plague/disease.* This noun refers to a physical blow, or to the punishment an overlord gives a subject. God is usually the one who metes out punishment and/or disease. The large majority of the usages occur in Lev 13 and 14 and concern the contagious diseases there described, cf. *šāra'at* (KJV leprosy). Our noun has many synonyms, e.g. *negep*, *maggēpā* (from *nāgap* "to strike/smite"), emphasizing a more forceful action and more serious result, *deber*, a general word for plague or pestilence, *makkā*, disease or wounds resulting from punishment (see J. D. Douglas, "Plague, Pestilence," in NBD. The noun occurs seventy-eight times.

As for the meaning "blow," this can be that which is exchanged in a controversy (Deut 17:8; 21:5), or what a father gives his son as proper punishment. Frequently, God is conceived as the Father who inflicts punishment. He states his intention so to "father" David (II Sam 7:14), all his children (Ps 89:32 [H 33]), and all true believers (Acts 15:16ff.; Heb 12:3ff.). Adulterers are especially singled out for divine chastisement (Prov 6:33) as are the kings of Gerar (Gen 12:17) and Egypt (Ex 11:1). One cannot help thinking that to God leprosy (*sāra'at*, q.v.) was not a "neutral" disease, but was a form of punishment (Lev 13:14; cf. Num 12:10). Men will look on the Messiah who vicariously bore divine punishment (Isa 53:8). The people who knew of God's promise to chastise might well avoid those who are so disciplined ostensibly for their unrepented sin (Ps 38:11 [H 12]). The chastened person can and ought to beg God for forgiveness and relief (I Kgs 8:38; Ps 39:10 [H 11]; Jas 5:13ff.). He is both able and willing to comply (Ps 91:10).

Bibliography: THAT, II, pp. 37–38.

L.J.C.

1294 נָגַף (nāgap) *strike.*

Derivatives

1294a נֶגֶפַּ (negep) *blow, plague.*

1294b מַגְגֵּפָּא (maggēpā) *blow, pestilence.*

Our root denotes a blow, usually divinely meted, which is fatal or disastrous. For synonyms see *nāga'*. Also note the parallels to our verb *kātat* "crush fine" (Ps 89:23 [H 24]), and its effects, *nūs* "flee" (Lev 26:17), *mūt* "die" (II Chr 13:20), sickness (II Sam 12:15). Our verb occurs forty-eight times.

The verb is used in Ex 21:22 of a blow delivered with malice and potentially capable of causing death (v. 35). If such a blow accidentally lands on a pregnant woman causing premature birth and not a miscarriage, no death penalty is exacted (RSV). This interpretation is supported by the proximity of "her fetus goes out" and "and there shall be no accident involving death" (cf. KB, used in Gen 42:4 of accidental death), as well as verses 23–25. So NIV: "and she gives birth prematurely," footnote: Or, "she has a miscarriage." This verse figures prominently in the biblical teaching regarding abortion.

In several passages our root is applied to a serious striking of one's foot on rocks. Wisdom guides one in walking sure-footedly (Prov 3:23). Indeed God promises angelic help in so protecting the godly (Ps 91:12). Unfaithful Judah is summoned to repentance by the threat of the exile prophetically depicted as constant "stumbling, across dark mountains" (Jer 13:16). In the eschaton all God's enemies will "stumble" over the Messiah, the stone of stumbling ("negep" is used synonymously parallel to *mikshōl* "stumbling").

negep. *Blow, plague, striking.* ASV and RSV the same. Our noun usually connotes a mortal blow or plague inflicted as divine punishment. Especially note Isa 8:14. *negep* occurs seven times.

maggēpā. *Blow, pestilence, defeat, plague.* ASV and RSV the same except at II Chr 21:14 where the former has a marginal reading which is clearly preferable (cf. Ezk 24:16). Our noun is frequently used of a blow, etc. (the effect of *nāgap*) resulting from divine retribution. However, this is not necessarily the case (Ezk 24:16). For synonyms see *nega'*. Our word occurs twenty-five times.

The plagues of Egypt (termed both *negep* and *maggēpā*, Num 16:46ff., [H 17:11ff.]) intended to pierce Pharaoh's heart (Ex 9:14) ultimately did so in the form of the last plague (Ex 12:23). Memory of that divine judgment on human rebellion was enshrined in the Passover (Ex 12:27), national memory (Josh 24:5), and legal system (cf. Lev 26:17; Deut 28:25). Israel, although constantly warned, went astray repeatedly (e.g. Ex 32:25; Num 14:42) and ultimately was smitten by God. This rebellion required atonement for this ever present sinfulness (Ex 30:12) and sin (Num 16:46ff. [H 17:11ff.]). In the eschaton, however, God's blows/plagues effect repentance on Egypt

(Isa 19:22), indeed, all God's enemies will either repent or perish (Zech 14:12ff.).

L.J.C.

- 1295 נָגַר (*nāgar*) **pour down** (Niphal, Hiphil only). (ASV and RSV similar with the latter inferior at Lam 3:49. Both are inadequate at Ps 77:2 [H 3].)

Our verb describes the spilling of water onto the ground (II Sam 14:14). It is paralleled to *gālā* (q.v. Job 20:28), *yārad* (Lam 3:48–49), and the melting of wax before fire (Mic 1:4). For synonyms, see *nāba'*, etc. Our verb occurs ten times.

Our word is used in figures of mourning and judgment. In II Sam 14:14 it is the people of Israel who are said to be poured out (in mourning) like water upon the ground, i.e. near death. A similar image occurs in Lam 3:49 of Israel's mourning over the exile (*nāgar* and *pūg*, i.e. the weeping does not cease). Could a proper translation of Ps 77:2 [H 3] be "my soul (i.e. *yad* represents power, strength, Ps 89:48 [H 49]) is poured out in the night and it does not cease" (Gen 45:26)? When applied to judgment our root speaks of the "pouring down" of the property of the wicked (Job 20:28, this is their true inheritance, *nahālā*), and the mountains of the earth (Mic 1:4, 6)—as a result of God's wrath (Ps 75:8 [H 9]). Perhaps Ps 63:10 [H 11] connotes "pouring over" the blade (*yad*) of the sword: i.e. the ungodly are to die. Edom receives judgment for mercilessly, relentlessly killing God's elect (Ezk 35:5), while Israel's sin evokes Jeremiah's righteous anger (Jer 18:21).

L.J.C.

- 1296 נָגַשׁ (*nāgaś*) **exact, exert demanding pressure**. (ASV and RSV the same except at I Sam 13:6, Isa 60:17; Dan 11:20.)

Our root connotes the exertion of demanding oppressive pressure for payment or labor. A near synonym is *nāshā'/nāshā* (only the repayment of money). The participle (taskmaster, slavedriver) is somewhat parallel to *śar mas* (Ex 1:11) the head of the corvée. The verb occurs twenty-three times.

The essential meaning of our root is exhibited in Ex 3:7 where it signifies Egyptian "overseers." They were told not to supply straw to Israel but to maintain the work output (vv. 10, 13). They beat the Israelite "foremen" when Pharaoh's demand was not met. Similar "oppression" is seen in the tribute (Isa 14:4; II Kgs 23:35) forcibly exacted (cf. Dan 11:20). A "boss" could be equally demanding (Job 3:18; 39:7). Judah's children would assume such a role (Isa 3:12). The Messiah would do away with all such oppression (Isa 9:4 [H 3]; Zech 9:8) although he would

quietly endure it himself to accomplish salvation (Isa 53:7; cf. Ex 3:7). His suffering would elevate the godly to rulers (oppressors as far as their enemies are concerned, so KD, Zech 9:8; Isa 14:2). They in turn would answer to peace and righteousness (Isa 60:17).

The seventh year law directed creditors not to demand payment during that year (KD, Deut 15:2–3), except from foreigners (cf. Isa 3:5).

L.J.C.

- 1297 נָגַשׁ (*nāgash*) **draw near, approach**. (ASV and RSV similar, the latter being preferable at Isa 49:20; Mal 3:3; Ezk 9:6; and questionable at Jer 46:3 (cf. Joel 3:9 [H 4:9]).)

Our root signifies coming into very near proximity to the object. Unlike its near synonym, *qārab*, it does not usually signify actual contact. For other synonyms cf. *qārab*. For cognates see Ugaritic *ngt* and its by-form *ngsh* (UT 19: no. 1611). Note *nāgaś* "press (burden) upon." The root occurs 125 times.

The simple use of the root signifies proximity, i.e. near enough to touch (Gen 27:21; 29:10), eat (Gen 27:25), kiss (Gen 27:27), embrace (Gen 48:10). When used in a military context (cf. *qārab*) it is often accompanied by "to do battle" (cf. Jud 20:23; I Chr 19:14). This is not always true, however. In Joel 3:9 [H 4:9] *nāgash* by itself signifies being arrayed for battle (paralleled to 'ārak (q.v.), and is in conjunction to *bō'* (q.v.). See I Sam 17:16, 40. The root can also represent the actual engaging in battle and the result. So in Ezk 9:6 the elect being marked with a *taw* are not to be slain (*hārag* parallel to 'al *nāgash*). Israel who proudly boasts that death (the sword) will not overtake or meet them is condemned by God (Amos 9:10). The sovereign covenant God, therefore, guides and controls the sword keeping the elect safe even in the midst of war (Ps 91:7) and punishing the wicked.

The root can be used of approaching a person of exalted position with all the respect due his position (Gen 43:19; 45:4; II Kgs 5:13). God says that a king from his people would so approach him in the eschaton (Jer 30:21). Men approach God through his servants to learn his will (Jer 42:1; cf. the use of the ephod, I Sam 23:9, and the lot, I Sam 14:38). This represents God as king and judge. Sometimes the line between approaching the servant and approaching God himself is difficult to discern (cf. Josh 14:6, 21:1). Yet clear examples of approaching God the judge are evidenced, i.e. coming into a courtroom prepared to argue a case (Gen 18:23). God summons men to come and hear his pronouncement (Josh 3:9). This image of a courtroom is used forcibly by the prophet Isaiah to call Israel and the nations into account (Isa 41:1, 21; 45:20–21). The servant of

the Lord boldly proclaims God as his advocate before his enemies. He has no fear of being proven wrong (Isa 50:8).

God sits as judge over his people (Josh 3:9), and he designates men to represent him in this capacity (Ex 24:14; Deut 25:1). Elijah calls the people into court as witnesses in his controversy with the prophets of Baal (I Kgs 18:30).

Men also are to approach God the great king and judge as the great and holy savior. Hence our word is used cultically. To approach God properly requires purification (Ex 19:22; 20:21; 28:43; 30:20; Lev 21:21) and appointment (e.g. Num 4:19). Our word is used interchangeably with *qārab* I (q.v.), representing both the presentation of an offering to the priests (Lev 8:14) and their presenting it before God (Lev 2:8). Like Jeremiah (12:2, *qārab*), Isaiah (29:13) reports God's displeasure at his people being close to him with their mouths, and far removed in their hearts. Malachi uses our word six times and always in the sense of making an offering (e.g. 1:7-8).

The root, like *qārab* I, is used of sexual relations in Ex 19:15.

L.J.C.

נָדָא (nōd). See no. 1319a.

נָדָא (nēd). See no. 1301a.

- 1298 *נָדָא (nādā') *drive away, thrust aside*.
Occurs only once, in the Hiphil (II Kgs 17:21).

- 1299 נָדַב (nādab) *make willing, incite*.

Derivatives

1299a נָדַבָה (n' dābā) *freewill offering*.

1299b נָדִיב (nādib) *noble*.

1299c נָדִיבָה (n' dībā) *noble deed*.

The root *ndb* connotes an uncompelled and free movement of the will unto divine service or sacrifice. It occurs in other Northwest Semitic dialects and in Amorite as a proper name. Cf. the Arabic *nadaba* "call," "incite" and *nāduba* "be noble, willing." The synonym 'ābā is the willingness (inclination) to do something under obligation or upon request; *rāṣōn*, a willing which is pleasurable to the doer; *hāpaš*, a compliance suiting that which is fitting or a favorable disposition; *yā'al*, an exertion of one's will to do something. See 'āwā, yā'ab, and ṭā'ab. Our verb occurs seventeen times.

The verb *nādab* occurs three times in the Qal and each time describes the inner state of those contributing to the construction of the tabernacle. Such offerings were to be one's own goods and given voluntarily. The rest of the occurrences are in the Hithpael and, hence, are reflexive. The

building (I Chr 29:5) and rebuilding (II Chr 35:8; Ezr 1:6) of the temple elicited abundant voluntary giving and sacrifice (Ezr 3:5) from God's people. Interestingly, Deborah commends the people (Jud 5:2) and leaders (Jud 5:9) of Israel for liberally and voluntarily offering themselves to God in the holy war. David addresses God concerning the freewill contributions toward building the temple, confessing that he owned everything including their stewardship, and he was gracious in accepting them (I Chr 29).

n'dābā. Freewill offering. This noun denotes that which is offered voluntarily. It is used three times adverbially to describe acts. Other words translated "free" are *hinnām*, costing no money; *nāqā*, having no guilt; and *hāpash*, not being enslaved. Our word occurs twenty-six times.

The noun *n'dābā* represents voluntary contributions (the objects of *nādab*) toward the building of the tabernacle and temple. In Ex 36 the people volunteered so much that Moses asked them to stop giving! Furthermore, this noun represents sacrifice made "out of devotion, not out of precept or promise" (AI, p. 417). Such sacrifices are one of the three (the other two are *nēder*, volutive, and *tōdā*, thanksgiving offerings) types of "peace" offerings (*sh'lāmim*). The *sh'lāmim* "symbolizes the reconciliation with God that follows upon the atonement" (PTOT, p. 386). As such it celebrates a state of favor and blessedness arising from a proper relationship with God. He prescribes and supervises the details of the entire proceeding, acting as host of the fellowship dinner. The same beasts are appropriate (although birds are excepted) as in the case of burnt offerings, but both male and female animals (even those with minor blemishes) are also allowed (Lev 22:23). The ritual embraces the same steps as does the burnt offering. In the *n'dābā* part of the animal (all fat around the intestines, kidneys, and liver, as well as the sheep's tail) are to be burnt on the altar. Another part (the breast or right leg) is symbolically presented to God and eaten by the priests. The rest of the sacrifice is consumed within two days (Lev 7:16) by the suppliant, his family, and perhaps some invited guests (underprivileged of the land), all of whom must be ritualistically pure (AI, p. 418).

Several passages use our word in noteworthy ways. In Ps 68:9 [H 10] God is praised for restoring his heritage by sending rain voluntarily. Involved in this confession is the idea that the covenant God, Jehovah, gave prosperity but not because he was in any way bound to do so. The people had broken his covenant, yet he blessed them (Hos 14:4 [H 5]). In Ps 110:3 the people are the willing offering. In Ps 119:108 it is prayer that constitutes such volutative offerings. This unveils the persistent theme that God desires heart-

felt obedience (I Sam 15:22; Hos 6:6) more than a multitude of sacrifices (Amos 4:5).

nādib. *Noble, willing, inclined.* This word patterned after the Qal passive participle is used as a noun and as an adjective. The former denotes one who is either typified by voluntarily and freely sacrificing and/or serving the deity, or who is responsible for such activity. There are many near synonyms and most of them have Akkadian or Persian cognates, e.g. *nāgid* "one who is conspicuous," *nāši* "one who is lifted up or promoted," *nāsik* "one who is anointed" and, hence, consecrated, *šar* "head official, captain." The usage of *nādib* attributes voluntary cultic (I Chr 28:21; Ex 35:5, 22; II Chr 29:31) and/or religious (Ps 51:12 [H 14]) service to its noun. Our word occurs twenty-seven times.

The noun *nādib* can refer both to common people (Ex 35:5) and overlords (I Sam 2:8) as those who do or should voluntarily serve God. The latter are contrasted to the poverty stricken (*dal* and *'ebyôn*, I Sam 2:8). Their responsibility is emphasized when they are described as righteous (Prov 17:26) and contrasted with the fool (Prov 17:7). Their exalted material and social position is dependent on God (Ps 107:40), and, hence, people are adjured not to trust in them but in God (Ps 146:3). Even Gentile overlords can be so described (Ps 47:9 [H 10]).

n'dibâ. *Noble deed, noble bearing.* This noun represents what a *nādib* does (Isa 32:8) or what is typical of such a one (Job 30:15). It occurs three times.

L.J.C.

1300 נָדָה (nādad) *I, depart, flee, move, wander abroad.*

Derivative

1300a נָדָה (n'dūd) *tossing, as during periods of sleeplessness* (Job 7:4, only).

Basic to the meaning of the root is the concept of motion, often with a directional sense, i.e. motion away from a person or object. But that sense does not obtain in every occurrence of the word.

When used in the sense of "motion away from" the word has several modes of expression depending on the form of the verb or the context in which it appears. It means "to flee" in the sense of fleeing from the threat of danger (Isa 10:31; 21:15; 22:3; 33:3; Jer 4:25; 9:9; Ps 68:12 [H 13]). In a metaphorical sense it describes the departing of sleep from the eyes (Gen 31:40; Est 6:1). The meaning "depart" also obtains in the Ugaritic cognate (UT 16: Text 52:93; 'nt I.8).

In the Hiphil the word means "expel" or "chase away" (Job 18:18; 20:8). The same con-

cept is inherent in the Qal participial form "fugitive" (Isa 16:3; 21:14). The word also connotes the idea of wandering, meandering, or straying (Job 15:23; Ps 55:7 [H 8]; Isa 16:2; Hos 7:13; 9:17).

The word is also used of the fluttering of the wings of nestling birds in Isa 10:14 with no clear reference to flight. In view of the use of *nādad* in the sense of flight in Nah 3:17, it may be used in Isa 10:14 in an associative sense. However this usage and the usage inherent in the noun form (n'dūd) indicate that directional movement is not essential to the meaning of the word.

T.E.M.

1301 נָדָה (nād). **II. Assumed root of the following.**

1301a נָדָה (nēd) *heap.*

ASV and RSV the same except at Ps 33:7 where the latter reads "bottle." Both emend the vowels of the text at Isa 17:11 to read the verb *nad* [root *nādad* "to flee"] rather than our noun. If this emendation, which is also followed by the NIV, is valid, then our noun in its other five occurrences always has reference to restrained or dammed up waters.

It should be distinguished from *gal* a pile of stones, "i a heap of stones forming a ruin or waste, 'ārēmā a gathering, a ruin-heap, and *tēl* a hill of ruins.

Gesenius-Buhl, BDB, and KB all posit two Semitic roots for the consonants *nād* because in Arabic the verb *nadda* meaning "to flee" corresponds to Hebrew *nādad* "to flee," and the Arabic noun *naddun* denoting "high hill" is probably related to our noun.

Our noun is applied to the restrained waters at the creation (Ps 33:7), to the waters of the *yām sūp* when they piled up on both sides while the Israelites crossed through it (Ex 15:8; cf. 14:22, 29), and to the Jordan River which stopped flowing because they became dammed up at Adam, a town on the Jordan River upstream from Jericho where the Israelites crossed over at the time of the Conquest (Josh 3:13, 16). The Jordan episode is a miracle of divine control of a possible occurrence, since the region around Adam has geological conditions which could result in a landslide capable of damming the river. Indeed, such a thing reportedly occurred in 1227 A.D. (for sixteen hours), and in 1927 for two and one-half hours (cf. J. M. Houston, "Jordan," in NBD, p. 656).

The word is theologically important because it speaks of the LORD's sovereign control over the creation as he achieves his will on earth.

B.K.W.

1302 נָדָה* (nādâ) *I, put away, cast out.*

Derivatives

1302a נִדְּחָה (*niddā*) *filthiness, menstruous, set apart*.1302b נִידָה (*nidā*) *filthiness*. Occurs only in Lam 1:8.

The verb *nādā* means "to exclude" (Isa 66:5), and "refuse to think of" (Amos 6:3). It occurs only in the Piel. Its synonym *gārash* is more widely used. The Ugaritic *ndy* is parallel to *grsh* (UT 19:no. 1616; cf. Akkadian *nadū* "throw, neglect").

niddā. *Filthiness, menstruous, put apart, separation, set apart, unclean thing.* (RSV translates "pollutions" in Ezra 9:11 and "filthy thing" in Lam 1:17; ASV "filthy thing" in Lam 1:17.)

Derived from *nādad* by BDB but from *nādā* by KB. In the legal literature the word is used primarily to describe the ritual uncleanness incurred by women during menstruation or childbirth, two functions generally associated with impurity incurred from bodily discharges or secretions (Lev 12:2, 5; 15:19–20, 26).

Everything on which a menstruous woman might lie or sit was pronounced ritually unclean (*niddā*). The impurity defined by this word also extended to abnormal menstruation such as prolonged or irregular periods (Lev 15:25, 33).

Ezekiel applies the word to the menstrual period in his description of the righteous man who, among other things, does not have intercourse with a woman during the time of her period (Ezk 18:6; 22:10) (a law dependent on Lev 18:19). See also Ezk 22:10.

Metaphorically, the concept of the ritual impurity of the menstrual period was used by Ezekiel to describe the nature of Israel's sin (36:17). Basic to the metaphorical use of the term is the concept of abhorrence inherent in the physical origin of the term. It is used of useless currency cast into the streets like an abhorred thing (Ezk 7:19–20). It is applied to Israel's most heinous sins (Zech 13:1; Ezr 9:11; II Chr 29:5).

The word is used in the technical expression "water of impurity," a purifying water used in the ceremony of cleansing from the defilement of death (Num 19:9, 13, 20–21).

Bibliography: Harris, R. Laird, *Man—God's Eternal Creation*, Moody, 1971, p. 143.

T.E.M.

1303 נדה (*ndh*) II. Assumed root of the following.1303a נִדְּחָה (*nedeh*) *gift* (Ezk 16:33, only).נִדּוּד (*n^edūd*). See no. 1300a.1304 נָדַח (*nādah*) *impel, drive away, banish*.

Derivative

1304a מְדַדָּה (*maddūah*) *enticement* (Lam 2:14, only).

The root *ndh* refers to the action of forcibly driving or pushing something away. Cf. the synonyms *dāhā* and *dāhah* which seem to be variant (perhaps dialectical) spellings or derived roots. There is an Arabic cognate, however, for both *nādah* and *dāhā*. Other synonyms are: *gārash* "to drive out of one's resting-place or home," hence, to divorce; *nādap* "to push or thrust away," i.e. what the wind does to chaff or smoke; *nāhag* "to drive or guide people or animal(s) to an intended destination"; *pūš* "to scatter, disperse." Some antonyms of our root are: *kinnēs*, *qibbēs*, and *shūb* (all of which see). The root occurs fifty-five times.

The basic meaning of the root emerges in Deut 19:5; 20:19 where it represents the action of swinging an ax, i.e. impelling something away from one. David uses this same forceful figure when he speaks about the disaster Absalom intends to bring upon him (II Sam 15:14), and which the wicked intend to inflict upon the righteous (Ps 62:4 [H 6]; notice the use of *dāhā*, v. 3 [H 4]).

The root also depicts the force of wind blowing away a swarm of locusts (Joel 2:20). However, the image most used with *nādah* is that of a flock of sheep. Sometimes the agent which drives the sheep away is not specified (Deut 22:1); sometimes it is lions (Jer 50:17; men, Isa 13:14; cf. Job 6:13). The agent can also be inept shepherds who are guilty not of negligence (so that the sheep wander away) but of doing the opposite of what they are supposed to do (i.e. they scatter and/or lead the sheep astray, Ezk 34:4; cf. Prov 7:21). So, God warns his people against false prophets who would drive them away from him (Deut 13:5 [H 6]). Such shepherds are to be stoned, indeed, if a whole city goes after such a one that city is to be destroyed (Deut 13:13 [H 14]). If the whole nation is so led astray it will be driven off the land (Deut 30:17) by God. Jeroboam (II Kgs 17:21), Ahab (II Chr 21:11), and eventually all of Israel's leaders (Ezk 34:4) are condemned as poor shepherds. Note the irony of Jer 27:10, 15! Israel is warned that they are not simply sheep, but are responsible before God neither to be driven astray by false religion (Deut 4:19) or false religious leaders.

God is the great shepherd who will disown and expel the flock if they follow false under-shepherds (Deut 30:17). They will be driven away from his presence into the thick darkness (Isa 8:22) of captivity in a foreign land(s) where they will be a taunt, etc. (Jer 24:9), eat unclean bread (Ezk 4:13), prefer death, and many will die (Jer 8:3). God promises, however, that he will only

refine them and not completely destroy them (Jer 46:28). The Great Shepherd will return his purified flock (cf. the forty years of wandering) to these green fields (Palestine, Jer 16:15; cf. Ps 23) once more (Deut 30:4) once they repent (cf. Neh 1:9; Ezk 34:16; Jer 29:14). Micah also employs this image in a clearly messianic context (4:6; cf. Ps 147:2 [H 3]). God the Great Shepherd gathers and tends his flock, but he also punishes their former oppressors (Jer 46:28), establishes his own forever in his grace (Zeph 3:19; cf. Jer 24:9; Isa 11:12), and extends his grace beyond the physical descendants and ritualistically unblemished people of Israel (Isa 56:8). This good shepherd image is well-known from the teachings of Jesus (Jn 10) and prefigures the function and goal of the New Testament elder (Acts 20:17, 28ff.; Titus 1:7, etc.).

L.J.C.

נָדִיב (*nādīb*). See no. 1299b.

1305 נָדָן (*nādān*) *I, gift*. Occurs only in Ezk 16:33. Vocalization uncertain. Probably related to the root *nātan*.

1306 נָדָן (*nādān*) *II, sheath*. Only in I Chr 21:27, a Persian loan word.

1307 נָדַף (*nādap*) *drive away*. (ASV and RSV the same except at Prov 21:6.)

Our verb represents what the wind does to chaff and smoke. It is an action parallel with divine scattering of enemies with the result that they flee (Ps 68:2 [H 3]; cf. Jer 13:24). For synonyms see *nādaḥ*. The word occurs nine times.

The root usually occurs in figures of judgment. Especially noteworthy is its appearance in Lev 26:36 where the law is sanctioned with the threat that Israel's disobedience would result in rout before her enemies (cf. *nūs*). The Psalmist employs a similar image of the fate of the wicked before divine judgment. Here God himself is the "wind" (Ps 1:4). David asks God to drive away his enemies (Ps 68:2 [H 3]; note the parallel with wax melting before fire). Isaiah warns Egypt of impending judgment by depicting the complete destruction of the Nile and the foliage along its banks. Here our word appears between "dry up" (*yābēsh*) and "is no more" (Isa 19:7). Divine aid will render Cyrus a formidable sword/bow in God's hands (Isa 41:2).

L.J.C.

1308 נָדַר (*nādar*) *make a vow*.

Derivative

1308a נָדַר (*neder*), נָדָר (*nēder*) *vow, votive offering*.

Our root connotes the act of verbally consecrating (devoting to the service) of God, i.e. vowing to perform (Gen 28:20ff.), to make an offering (Lev 27), or to abstain from something (Ps 132:2ff.). Cf. especially *'ālā*, the general uttering of oaths and curses as part of that larger category (cf. *qālal*), *'āsar* "be bound or joined to or in" (cf. *'ēsār/issār* "bond," Num 30:2 [H 3], etc.), *ḥrm* "to devote something to destruction," and *shāba'* "make a statement or a promise" (with an oath invoking God and pledging something valuable). Cf. Ugaritic (UT 19: no. 1618; AisWUS 1758), and Phoenician (KAI, p. 16) cognates with the same meaning. The verb occurs thirty-one times.

nēder. *Vow, votive offering.* RSV superior to ASV at Lev 7:16; 22:18, etc., where the noun denotes the thing offered. This noun represents either the result of *nādar*, i.e. a vow, or the thing offered to fulfill a vow. For synonyms see *nādab*. Cognates for the noun occur in Ugaritic and Phoenician, as for the verb (see above). The noun occurs fifty-nine times.

nēder occurs in the lists of sacrifices (e.g. Deut 12:6, 11) as a species of peace offering (Lev 7:16). A closer description occurs in Num 30:3 [H 4] where to *nādar* a *nēder* is to swear to God with an oath (*hishshāba' sh' bū' ā*; cf. Ps 132:2) and to bind one's self with what proceeds from one's mouth. A *nēder* is something promised to God verbally (Num 30:4 [H 5]). If one so promises he is obliged to fulfill/do his promise (Deut 23:22). In most cases, the context shows that the vow implies a promised gift for sacrifice, not merely a course of action as is implied in the English word "vow." The biblical "vow" is always to deity, never a promise between man and man. Rash vows are to be avoided (Prov 20:25; cf. Jud 11:30) as foolish (Eccl 5:4 [H 3]f.) in the fullest sense of that word. One is not bound, however, to make a vow (contract) with God, for not to do so is no sin (Deut 23:23 [H 24]). A *nēder* is a species of thank offering (made even by Gentiles, Nah 1:15 [H 2:1]) vowed (Ps 116:14, 18) in return for God's favor (Num 21:1-3) or as an expression of godly zeal and devotion and in praise for answered prayer (Ps 22:25 [H 26]). Happiness results when a vow is properly fulfilled (Job 22:27).

Almost anything that is not God's already (Lev 27:26; note the development in the concept of tithing, Gen 31:13), or an abomination to him (Deut 23:18 [H 19])—such as the wages of a male or female harlot; cf. Prov 7:14—can be vowed. A person can even vow himself to service, or be vowed to service, and can be redeemed (or redeem himself) thus giving to God a value equal in worth to his actual service, but being free to pursue his own life (Lev 27:2ff.). Clean beasts which fulfilled a vow were presented as votive offerings

unless they did not fulfill the requirements otherwise specified in the law (Lev 27:9ff.; cf. 22:18ff.; *nādab*) in which case the offerer can also present a second acceptable offering. Both animals, however, are holy (Lev 27:9ff.). One is sacrificed, the other becomes the possession of the priesthood. Unclean beasts may be redeemed (Lev 27:11f.). The regulations governing vowing a house or houses, and land also appear in Lev 27. During the wilderness wanderings (KD, Num 15:3) the amount of fine flour and drink offering to accompany the various kinds of animals potentially constituting votive offerings was stipulated.

The *nēder* could be a burnt offering (Lev 22:18) or a peace-offering, in which case it was to be eaten on either the first or second day (Lev 7:16). For more details see *nādab* and *sh'ālāmim*.

Both men and women could make vows. This is tempered by an institutionalization of woman's submission to man (Num 30:4 [H 5]). Yet it is important to note that women could own property and be religiously responsible for themselves (Num 30:9 [H 10]). The submission (Gen 2:21f.) sanctioned the family institution by emphasizing the importance of that union and relationship. After entry into Palestine the *nēder* together with other stipulated sacrifices were to be consummated only at the designated central sanctuary (Deut 12:6, 11).

To make vows was not a religious duty (Deut 23:21–23 [H 22–24]). Such vows were acceptable to God (Ps 50:8). He makes it clear, however, that he is not being fed or tended (Ps 50:9–13) as paganism thought (cf. A. Leo Oppenheim, *Ancient Mesopotamia*, University of Chicago, 1964, p. 183ff.). Vows were supererogatory acts of devotion and love contracted either preceeding (Ps 50:14) or following divine blessing (Ps 116:17–18). They were accompanied by joy (Nah 1:5 [H 2:1]) and/or singing (Ps 61:8 [H 9]), and were acceptable only if iniquity was not cherished in the offerer's heart (Ps 66:18; cf. Prov 7:14).

There are at least two noteworthy special vows: the Nazirite (Num 6:13ff; *nāzar*, q.v.) and the *herem* (Num 21:2; *hrm*, q.v.). Absalom begged leave of David's court to fulfill a vow (II Sam 15:7–8). The depth of his deceit is shown by both his having lied and having lied respecting divine ordinances. Elkanah on the other hand, both conscientiously fulfilled his own vows (I Sam 1:21) and concurred with Hannah's (I Sam 1:11, 22–23; Cf. Num 30). Jephthah's rash promise of a human sacrifice is inexcusable, however low the level of his knowledge of divine law. Thankfully, it was tempered when he dedicated his only daughter to lifelong service in the tabernacle, as seems at least possible (Jud 11:30, 39; cf. KD).

The *nēder* uniquely and concretely represents the love which conforms to divine pleasure show-

ing that even in the Mosaic era love (Deut 6:4), and not pure legalism, best described true godliness. The Messiah is also bound by vow to offer himself a sacrifice for sin (Ps 22:25 [H 26]; cf. Lev. 27:2ff.)—the only human sacrifice truly "acceptable" to God. All men are to come to God with their vows (Ps 65:1 [H 2]; cf. Isa 19:21), and what can they bring as a votive offering other than God's own lamb (Jn 1:29)?

Bibliography: THAT, II, pp. 39–42.

L.J.C.

נָהַ (nōah). See no. 1320a.

1309 נָהַג (*nāhag*) I, lead, drive, guide.

Derivative

1309a מִנְהָג (*minhāg*) **driving, charioteering** (II Kgs 9:20, only).

nāhag denotes an orderly conducting of an animal (or group of animals) or people to an intended destination either by forcible driving or leading. This verb may be applied infrequently to inanimate objects (cf. Ex 10:13 etc.). For synonyms see especially, *nāhā*, "to lead, guide" (Ps 77:20 [H 21]; Job 12:23), *nāhal* "to lead with care" (Isa 49:10), *nādah* "impel, drive away, banish," *āshar* (in Piel) "to lead straight on" (KB), *dārak* (Hiphil) "lead in the path of" (KB), and *rā'ā* "to shepherd" (including leading and guiding a flock). The word occurs thirty times.

The word is used for herding cattle, sheep, etc. This can be the normal activity of a shepherd (Ex 3:1; Gen 31:18) whereby a shepherd "leads" the flock by going before them (cf. Isa 40:11; Jn 10:4). It can also refer to herding (driving) away booty (I Sam 23:5; I Sam 30:22), or an animal as a pledge (Job 24:3).

Not only large groups, but a single animal can be "herded," i.e. led (II Kgs 4:24), as the instruction of the Shunamite woman to her servant makes clear.

People can be "herded." So Laban accuses Jacob of driving off his daughters as booty (Gen 31:26; Isa 20:4)—unwillingly and by force. The verb also can represent the shepherd-like leading as a figure of the king's taking his army out to war (I Chr 20:1; II Chr 25:11). People are also herded in a less unwilling and less martial context (I Sam 30:22).

There are some passages where our verb is applied to driving (i.e. forcible "herding") things. One drives a chariot (Ex 14:25; II Kgs 9:20) or cart (II Sam 6:3). The Lord "drives" the winds (Ex 10:13; Ps 78:26), his messengers (cf. Ps 104:3–4).

This verb is used of God's activity among his people. If they disobey, he will lead (drive, herd) them away to a foreign land (Deut 4:27). This

principle stated in Deut 4:27 envisions all subsequent "dispersions" (KD), as does Deut 28:37. This was especially fulfilled in the great exile under Babylon. In the eschaton God's sovereign power will so establish his kingdom that the strength of the nations, i.e. their kings, shall be "herded" (as booty!) to Jerusalem (Isa 60:11ff.).

God, the true shepherd (cf. *nādaḥ*) herded his people during the wilderness wanderings (Ps 78:52). Under the monarchy the pious address God as he who led Joseph like a flock. The exile elicited the painful cry "God led me and caused me to walk in darkness" (Lam 3:2). In the eschaton the role of "herder" simultaneously would embrace carnivorous animals and their most natural prey and would be filled by a little child (Isa 11:6). Later, Isaiah records that God himself would be this mighty herder (Isa 49:10).

L.J.C.

- 1310 *נָהַג (*nāhag*) **II, moan, lament.** Occurs only once, in the Piel (Nah 2:8).

- 1311 נָהָה (*nāhā*) **wail, lament.**

Derivatives

- 1311a נָהָה (*n'hi*) **wailing.**
 1311b נִהְיָה (*nihyā*) **wailing** (Mic 2:4, only).
 1311c נִי (*ni*) **wailing** (Ezk 27:32, only).
 1311d הִי (*hi*) **wailing** (Ezk 2:10, only).

This verb refers to the wailing that accompanies mourning. Synonyms are 'ānā "to lament, mourn." Also see *qyn*, 'ābal, and *šāpad*, which are used to refer to the various expressions of formal and professional mourning which was common in the ancient Near East. *nāhā* occurs three times. This wailing was done by women or other professionals (Jer 9:18 [H 18]; Ezk 32:18; Amos 5:16).

Divine prescription summons such activity accompanying a funeral dirge in anticipation of the forthcoming judgment on Israel (Jer 9:9–11, 16–21; 31:15). Micah enjoins a similar lamenting over God's condemned but rebellious people (2:4; Amos 5:16). This word is used of the mourning for the divinely condemned multitudes of Egypt (Ezk 32:18).

n'hi. Wailing. ASV and RSV the same except at Jer 31:15 where ASV is superior. Both are inadequate at Mic 2:4 ("wail with a bitter wailing"). Our noun represents the result of *nāhā*. It is difficult to distinguish this result from that of 'ānā "lament". The noun occurs seven times.

Bibliography: AI, p. 60. Gregory, T. M., "Mourning," in ZPEB, IV, pp. 302–306. Kitchen, K. A., "Burial and Mourning," in NBD, p. 170ff.

L.J.C.

נָהִי (*n'hi*). See no. 1311d.

- 1312 *נָהַל (*nāhal*) **lead with care.**

Derivative

- 1312a נָהַלֹּל (*nahālōl*) **pasture** (Isa 7:19, only).

Our root, which occurs in the Piel and Hithpael, denotes a shepherd's loving concerned leading of his flock, especially those with young (Isa 40:11). For synonyms see *nāhag*. The verb occurs ten times.

The basic meaning of *nāhal* clearly emerges in Isa 51:18; Gen 33:14; Isa 40:11. The first passage parallels this root with "leading someone by the hand," i.e. to lead someone who is helpless (cf. Jud 16:26; Isa 42:6) or who needs to be guided aright (cf. Gen 19:16; Isa 45:1). Thus, Jerusalem, made drunk by God's judgment is helpless. The second passage (Gen 33:14) records Jacob's request to Esau that he be allowed to travel slowly and leisurely with his herds and children. Finally, the root is paralleled with *rā'ā* "to shepherd," protectively gathering young lambs in one's arms, and carrying them in one's bosom. The root specifically is connected with what such a shepherd does in leading pregnant ewes.

It is this loving concerned shepherd-like leading that typifies God's conducting his people to Palestine (paralleled by *nāhā*, Ex 15:13). David confesses that God gently leads him beside still waters (parallel to "makes me lie down in green pastures," Ps 23:2), and prays God's continued care (Ps 31:3 [H 4], parallel to *nāhā*). The eschaton will attest God's tender leading of his people (Isa 40:11; 49:10).

The idea of tenderly leading extends to tenderly conducting, e.g. feeble ones on asses (II Chr 28:15), the weak through threatening enemies (II Chr 32:22), and the hungry through a famine (Gen 47:17).

L.J.C.

נָהַלֹּל (*nahālōl*). See no. 1312a.

- 1313 נָהַם (*nāham*) **growl, groan** (e.g. Prov 5:11; Ezk 24:23).

Derivatives

- 1313a נָהַם (*naham*) **growling** (Prov 19:12, only).
 1313b נִהְמָה (*n'hamā*) **growling** (Isa 5:30); **groaning** (Ps 38:9).
 1314 נָהַק (*nāhaq*) **bray, cry** (Job 6:5; 30:7).

- 1315 נָהַר (*nāhar*) **I, flow, stream.**

Derivative

- 1315a נָהָר (*nāhār*) **river.**

1316 נָהַר (*nāhar*)

nāhar is used only four times and in the Qal. In the OT it is only used figuratively of the confluence of nations. The most interesting passages are the duplicates in Isa 2:2 and Mic 4:1 when in the last days all nations will stream to God's temple in Jerusalem.

nāhār. *River, stream.* Used 120 times in the OT. The noun is found also in Ugaritic (Ais WUS no. 1762), Aramaic, Arabic, and Akkadian. The word is used many times to refer to the major rivers of the Bible lands. The Psalms use it more generally for torrents of water in various similes.

The rivers of Eden are named and the two larger ones easily identified. The other two can be inferred fairly well. Speiser points out that Gen 2:10 speaks of four river valleys going up from Eden to their headwaters. The streams obviously flow into Eden and unite to go toward the Persian Gulf (AB, *Genesis*, pp. 19–20; cf. also Harris, R. L., "The Mist, the Canopy and the Rivers of Eden," JETS 11:177–79).

The Nile does not seem to be called a *nāhār* but is named the *y'ôr* which is an Egyptian loan word and is practically the name for the Nile and its branches. The Euphrates is called the *nāhār p'rār* (the word Euphrates is just Greek for "beautiful Parat") or merely *nāhār* "The River." The two upper tributaries of the Euphrates, the Balikh and the Khabur are called the "two rivers" in the expression Aram Naharaim. The Khabur is probably the river of Gozan (II Kgs 17:6). The streams of Damascus, Abana and Pharpar are called rivers. Curiously the word *nāhār* is never applied to the Jordan. It is just "The Jordan."

In the expression for the extent of the promised land it goes from "the River (*nāhār*) of Egypt" to "the great river, the River Euphrates" (Gen 15:18. B. Waltke ("The River of Egypt," in ZPEB, V, p. 121) argues that this means the Nile and its branches, for *nāhār* could not be applied to the small stream now called the Wadi el Arish southwest of the Gaza strip. However, *nāhār* does not seem to be applied to the Nile either. Perhaps the question like other Near East boundary questions in modern times defies attempts at settlement.

R.L.H.

1316 נָהַר (*nāhar*) II, *light, burn* (as a lamp).

Derivatives

1316a נֶהְרָא (*nēhārā*) *light, daylight.*

1316b מִנְהָרָה (*minhārā*). Occurs only in Jud 6:2. Meaning uncertain, perhaps "mountain cleft" (NIV).

This verb signifies "to be light," "to shine" as a lamp. Ugaritic attests *nr* (root, *nyr*, AisWUS no. 1850), and Akkadian *nawāru* /*namāru* "to

light," *nūru* "a light." Arabic *nahārun* "daylight." *nūr* of the same meaning is a by-form. KB suggests that *nāhar* is the Aramaic form. Our verb occurs three times (so, KB).

nēhārā. *Light, daylight* (Job 3:4 only). rsv and asv the same. Our word signifies the first "rays" of the morning sun.

L.J.C.

1317 *נָאָה (*nū')* *forbid, disallow.*

Derivative

1317a נִנְיָא (*nū'ā*) *opposition* (Num 14:34; Job 33:10).

nū' represents a negative reaction to a planned action. It is parallel to *lō' hārash* ("he does not keep silent," Num 30:5 [H 6]), and *hēpēr* (Hiphil of *pārar* "to break, bring to nought"). A male head of a house can "forbid" a woman's vow (Num 30:8 [H 9]), and God "breaks" man's plans (Ps 33:10). The word occurs nine times, always in the Hiphil.

L.J.C.

1318 נָיַב (*nūb*) *bear fruit* (e.g. Ps 62:11; Prov 10:31).

Derivatives

1318a נָוַב (*nōb*) *fruit* (Isa 57:19, only).

1318b נִיב (*nib*) *fruit* (Isa 57:19; Mal 1:12).

1318c נִנְבָּה (*nūbā*) *fruit, produce* (e.g. Isa 27:6; Ezk 36:30).

1319 נָוַד (*nūd*) *wander; have compassion on.*

Derivatives

1319a נָוַד (*nōd*), נָד (*nōd*) *wandering of aimless fugitive* (Ps 59:9).

1319b נָדַד (*nīd*) *quivering motion of lips* (Job 16:5).

2119c מָנַד (*mānōd*) *a shaking, wagging* (Ps 44:15, only).

nūd basically denotes a going back and forth. It is applied to a physical movement or an attitude. Cf. Arabaic *nāda* "move to and fro" (as the head of one falling asleep). The two connotations of our word are evidenced by its parallels and synonyms. First, our word is parallel to *nhm* (Isa 51:19) "to comfort," "be sorry for someone or one's self," and *hml* (Jer 15:5) "to spare," "have compassion on." Secondly, cf. *nūa* "wander unstably," "move unsteadily," "wag one's head mockingly" (Gen 4:12). It is important to note that the root sometimes equals or is similar to *nādad* "to flee in disorderly retreat"; hence, it is paralleled to *nūs* "flee" (Jer 4:30) and con-

trusted to *hāsā* "take refuge" (Ps 11:1), and cf. Prov 27:8. Our verb occurs twenty-seven times.

The basic meaning, to wander aimlessly and/or homelessly, is seen in the curse God placed upon Cain (Gen 4:12, 14). He was not only driven away from his parents, but was condemned to be an unstable person (*nua'*) and a homeless wanderer (*nūd*). That our root connotes aimless to and fro (wandering) movement is clear from I Kgs 14:15 where it represents the action of a reed moved by water. Another example is Isa 24:20 where it represents the unsteady wavering movement of a drunk man. In Prov 26:2 it parallels a bird's "flying" signifying its aimless flitting motion (cf. KD, Jer 4:1).

This to and fro movement is also typical of the nodding of one's head "as a sign of pity that sympathizes with one and recognizes the magnitude of the evil" (KD; Ps 69:20 [H 21]). Whether or not this action was always understood when this root appears is uncertain, but the attitude so symbolized is. The exile brings righteous and deserved judgment on Judah and, hence, none should nor would show them pity (Isa 51:19; Jer 15:5). Other nations judged by God receive similar treatment, i.e. God declares that no one should or would have pity on them (Jer 48:17; Nah 3:7). Jeremiah says that the magnitude of Judah's punishment will be so great that it will be fruitless to mourn *nūd* for the dead king Josiah in view of the calamities that will come upon his successors (Jer 22:10). Individuals in deep trouble are objects of sympathy (Job 2:11; 42:11; Ps 69:20 [H 21]). The nodding of one's head may connote astonishment (Jer 18:16); even more forceful nodding connotes scornful rejection (Jer 48:17; Ps 64:8 [H 9]; cf. 22:8 [H 9]), or deep mourning (Jer 31:17 [H 18]).

Our verb often signifies "flight away from" (cf. *nūs*, *nādad*). In Ps 11:1 David asserts that Jehovah is his refuge and chides his enemies for advising him to seek another refuge. Jeremiah clearly uses our verb interchangeably with *nādad* (cf. 49:30, 5; 50:3, 8). God tells his people (Lev 26:17, 28; cf. Deut 28:7) that victory and safety depend on his presence, and that his presence depends on their obedience (cf. *nūs*). This idea is reflected in II Kgs 21:8. David reminding God of the ancient promise prays that the evildoers will not be allowed to drive him away (into exile, KD; Ps 36:11 [H 12]).

L.J.C.

1320 נָוָה (*nwh*). Assumed root of the following.

1320a נָוָה (*nōah*) *eminency, distinction* (Ezk 7:11, only).

1321 *נָוָה (*nāwā*) *I, beautify*. This verb occurs only once, in the Hiphil (Ex 15:2).

1322 נָוָה (*nāwā*) *II, keep at home*. Denominative verb.

Parent Noun

1322a נָוָה (*nāweh*) *I, pasture, abode of shepherd, habitation*.

1322b נָוָה (*nāweh*) *II, dwelling, abiding* (Ps 68:13, only).

1322c נָוָה (*nāwā*) *pasture, meadow*.

The verb *nāwā* (Hab 2:5) signifies the state of being in a *nāweh*, from which noun it appears to have been derived.

naweh I. Pasture, abode of shepherd, habitation, sheepfold. Neither the ASV nor the RSV adequately renders Zeph 2:6 where *nāwā* must mean "folds" (it is clearly parallel to *k'rot* "caves" (cf. James A. Pator, in ISBE, p. 2757), and *g'dērā* "fenced enclosure"). The noun *nāweh* appears to be a loanword, hence, it exhibits some unusual spelling variations. With the exception of Zeph 2:6 (which is not the expected plural form of *nāweh*; cf. KD, on Ps 68:12 [H 13]), the plural includes the insertion of an aleph as a vowel lengthener. The noun *nāweh* represents the place a flock is kept, hence, either an open field or an enclosure. Synonyms are: 1) *g'dērā* "fenced/hedged-in place" (cf. Zech 2:6); *miqlā/miqlā* "place of restraint"; *rēbeš* "a place to lie down"; 2) *kar* "grazing plot"; *mir'eh* "a place for feeding sheep" (Isa 32:14) or lions (Nah 2:11 [H 12]); *mar'it* "pasturage" (perhaps a variant spelling of *mir'eh*), and *r'e'i* "pasture" (I Kgs 4:23 [H 5:3] only). Cf. *nāwā*, (probably from *nā'ā* "be beautiful") beautiful, comely (Jer 6:2). Our noun occurs forty-five times (perhaps also in Ps 69:12 [H 13]).

The noun *nāweh* represents an enclosure for sheep (Zeph 2:6 which could be from *nāwā*!) This is where the herd lies down (parallel to *rēbeš*, Jer 50:7; Isa 65:10), a place of safety and protection (Prov 24:15). This secure place of protection can represent (poetically) the peaceful tent of the godly (Job 5:24), the resting place of the righteous (Prov 24:15), the safe dwellings (eschatological) of God's people (Isa 32:18, note that *rēbeš* is used here also), and the messianic city of sacrifices and unmovable tent (Isa 33:20).

Our noun also represents the place where a shepherd follows sheep (II Sam 7:8), causes them to lie down (Jer 33:12; Ps 23:2), where they can feed (Jer 50:19; Ezk 34:14). This was usually upon the hilltops (Jer 9:10 [H 9]; Amos 1:2), or in the steppe (Joel 1:19-20). But in the eschaton food will be so abundant that farmland will be used for grazing (Isa 65:10).

God's special/holy "pastureland/fold" for his flock is Canaan (Ex 15:13; Ps 79:7; Jer 10:25). Interestingly, Jerusalem (II Sam 15:25) particularly represents this place of divine provision (cf.

nûah, Deut 12:5). Even Jerusalem, however, is only a figure of the true place of perfect protection and provision, God himself (Jer 50:7). Abandonment of God results in abandonment by God and destruction of the prepared "pasturage/fold" (Isa 27:10; 32:18). Repentance effects restoration to the blessedness of Canaan (Jer 23:3; 31:23, note the parallel to "mountain of holiness"; cf. E. J. Young, *The Book of Isaiah* [Eerdmans, 1965] on Isa 33:20). Ultimately, divine sovereignty will secure eternal provision for God's people.

L.J.C.

1323 נוּחַ (*nûah*) *rest, settle down.*

Derivatives

- 1323a נָחַת (*nahat*) *rest, quietness.*
 1323b נָחָה (*nōah*) *Noah.*
 1323c נִיחָה (*niḥōah*) *quieting, soothing*
 (e.g. Gen 8:21; Lev 26:31).
 1323d הָנִיחָה (*hānāḥā*) *a giving of rest*
 (Est 2:18, only).
 1323e מְנוּחָה (*mānōah*) *resting place.*
 1323f מְנוּחָה (*m'nūhā*), מְנוּחָה (*m'nūhā*)
resting place, rest.

Our root signifies not only absence of movement but being settled in a particular place (whether concrete or abstract) with overtones of finality, or (when speaking abstractly) of victory, salvation, etc. For synonyms cf. *shābat*, connoting the absence of activity (or, of a particular activity), *shāqat* which connotes the absence of disturbance from external causes, *shālam*, connoting wholeness, i.e. the state of well being, and *dōmī* "quiet," *rāga'* "to be in repose." The root should be distinguished from *nāḥā* "to lead, guide" (KB), and *nāḥā*, "to lean upon" (KB) which are often similar in form. Cf. Ugaritic *nh* (AisWUS 1772 *nwh*, UT 19: no 1625); Akk *nāhu*. The verb occurs 138 times.

Basically the root *nûah* relates to absence of spatial activity and presence of security, as seen, e.g. in the ark which "rested" on Mount Ararat (Gen 8:4), and the locusts "resting" on Egypt (Ex 10:14). The "security" has overtones of conquest in Josh 3:13. In the Hiphil the root moves in two directions, the causative and the permissive. First, in the sense of "deposit," i.e. cause something (someone) to *nûah*. So, God "deposits" man in the garden (Gen 2:15). Manna (Ex 16:34), the rods (Num 17:4 [H 19]), and baskets of fruit (Deut 26:4, 10) are "deposited" before God. The second use is "to allow something (someone) to be at rest," i.e. to leave alone. So God left the Canaanites alone (Jud 2:23), and David left Shimei alone (I Sam 10:25). Our root is used in a unique sense of "being confederate with" (Isa 7:2).

The verb has at least four important theological uses: a use pertaining to death; a spiritual, a martial, and a soteriological use.

The first use relates to rest in death as is seen in Job 3:13, 17 where Job bemoans his existence and lauds stillbirth (cf. Prov 21:16). In Dan 12:13 God tells Daniel he is to be dead at the end of days (KD).

The psychological-spiritual significance emerges in Job 3:26 where Job complains that he was disquieted (*rāgaz*) and had no ease (*shāqat*) or peace (*shalwā*). Proverbs 29:17 advises correcting one's son and he will give one psychological rest, or (as the parallel puts it) delight to one's soul. Spiritual rest (the absence of trouble) is seen in Isa 14:3, 7 (cf. Prov 29:9), and most clearly in Isa 28:12 (although this has clear soteriological overtones). The only true place of spiritual rest is God (*mānūah*, Ps 116:7).

The martial use entails God's promise (Deut 12:10) and the fulfillment (Josh 21:44 [H 42]) to defeat Israel's enemies and give them rest (victory and security) in the land. Continued rest (II Sam 7:1) was contingent on their obedience (Num 32:15). David, a man/instrument of war, was not allowed to make a place of rest for God; but Solomon, the king who reigned after God had established peace (i.e. a man of rest), was (I Chr 22:9). God's martial sovereignty extended beyond Palestine (*nōah*, Est 9:16). He was not localized as other "gods" were. This figurative use occurs in Ps 125:3 where the "scepter of wickedness" would "not rest" (i.e. so as to conquer and rule) on the righteous. So, too, cf. Prov 14:33; Eccl 7:9; Zech 6:8; especially Num 11:25; II Kgs 2:15; Isa 11:2.

The soteriological use forms around the theology of the sabbath. In Gen 2:2-3 *shābat* (cessation from labor) describes God's rest, but in Ex 20:11 *nûah* is used. Hence, man is not only to cease from his worldly pursuits (Ex 31:12-17; cf. Isa 58:13-14), but he is to enter into a state of victory/salvation rest (Josh 1:13; cf. Deut 25:19). It is only the presence and favor of God that makes this rest (as well as martial rest) possible (Ex 33:14; cf. Isa 14:3, 7). True rest/salvation is to be declared in the messianic age but there will be an initial and climactic judgment on Israel in the form of preaching this rest in a foreign language(s); cf. Isa 28:12 (cf. rsv, and Deut 28:49, Jer 5:15; I Cor 14:21). However, God ultimately will accomplish true rest for his elect people through his Messiah (Isa 63:14; cf. Heb 3:7-4:13).

nahat. Rest, quietness. ASV and RSV similar with the latter superior at Job 17:16 (where it assumes that the root is *nahat*, Ug *nhī* "to descend" note the different laryngeal of the two roots in Ug), and inferior at Prov 29:9. This noun denotes a state either of motionless (Job 36:16) or

of inner peace, i.e. security, etc. (Eccl 4:6, 6:5). It occurs seven times. The noun *naḥat* "rest" is the same as *naḥat* "descend" which however comes from the root *nāḥat*. Cf. the similar pair *shaḥat* "pit" from *shûaḥ* and *shaḥat* "corruption" from *shāḥat*.

nōaḥ. Noah. The last of the antediluvian patriarchs, he was chosen by God to be an instrument of deliverance. Outside of Gen, the name occurs in the genealogy of I Chr 1:4 and in connection with the flood as an illustration of the guaranteed continuance of eschatological bliss (Isa 54:9); in Ezk 14:14, 20 Noah is an illustration of an ancient and proverbial righteous man. The etymology of the name is uncertain. In Gen 5:29 it is associated probably as a word play with the verb *nāham* (comfort, bring relief), but it appears to be more directly related to *nūaḥ* which as we will see below connotes rest and salvation. For a fuller discussion of the word, the man, and his ministry cf. T. C. Mitchell, "Noah," in NBD.

mānōaḥ. Resting place. ASV and RSV similar with the latter superior at Ruth 3:1; Gen 8:9 (however, cf. Deut 28:65). This noun denotes a place of *nūaḥ* (motionless, security) for animals or people, i.e. a place to settle down, a home. It occurs seven times.

m^cnūḥā. Resting-place, rest. ASV and RSV similar with the latter superior at Mic 2:10, inferior at Ruth 1:9; Isa 11:10; Jud 20:43; Zech 9:1, and both are inadequate at II Sam 14:17. The noun may denote either the place or state of *nūaḥ*. It occurs twenty-one times.

m^cnūḥā describes the temporary place of rest God sought out for the people of Israel (Num 10:33), the more permanent place (Deut 12:9; I Kgs 8:56; Ps 132:14), and the eternal soteriological resting place, i.e. heaven (Ps 95:11; cf. Heb 3-4).

Bibliography: THAT, II, pp. 43-46.

L.J.C.

1324 נָטַח (nūt) *dangle, shake* (Ps 99:1, only).

1325 נָמַם (nūm) *sleep, slumber, be drowsy.* (ASV and RSV similar, except for Nah 3:18 where the RSV translates "your shepherds are asleep" instead of "thy shepherds slumber.")

Derivatives

1325a נִמְמָה (nūmā) *drowsiness* (used only in Prov 23:21).

1325b תִּנְנוּמָה (t^cnūmā) *slumber, slumberings.*

Although the primary meaning of the verb is to slumber or sleep, only the noun derivative

t^cnūmā is used in this literal sense. Slumber is the condition of a man when God speaks to him in a vision of the night (Job 33:15). The root is parallel to *yāshēn* "to sleep" (Ps 121:4), but here, with a negative, it is used figuratively of watchfulness. God does not slumber or sleep. Isaiah 5:27 describes an invading army in the same way—it neither slumbers nor sleeps. On the other hand, the religious leaders of Israel (Isa 56:10) are characterized as those who love to slumber, i.e., they are careless and neglectful of their duties. Their task is to warn the people of coming danger, but this they have failed to do.

Twice the verb is used to denote the sleep of death. In the one instance (Ps 76:5), men have been rebuked by God and have fallen into sleep. In the second instance (Nah 3:18), the rulers of the king of Assyria slumber or are dead. The verb is parallel to *shākan* "to settle down or abide," which is used here of death.

t^cnūmā. Slumber, slumberings. The basic use of the noun in Prov is in a figurative sense of laziness and inactivity (Prov 23:21; 6:10; 24:33), but the literal sense of sleep or slumber is also found (Prov 6:4, there similar to Ps 132:4).

R.L.H.

1326 נָנַח (nūn) *propagate, increase*, only in Ps 72:17.

Derivative

1326a נִנְיָ (nīn) *offspring, posterity.*

1327 נָסַח (nūs) *flee.*

Derivatives

1327a מְנוּסָה (mānōs) *refuge.*

1327b מְנוּסָה (m^cnūsā) *flight* (Isa 52:12; Lev 26:36).

nūs denotes rapid movement away from something or someone. It usually connotes escape from real or imagined danger (except Deut 34:7; Jud 6:11; Song 2:17; 4:6), the basic image being martial (cf. Lev 26:36). A near synonym is *bārah* "to flee, pass through." A second synonym is *nādad* "retreat, wander, flee," connoting disorderly retreat or the result of a rout. *nūs* is paralleled with *mālaṭ* "to escape" (in Niphal, e.g. I Sam 19:10), the manner of flight, *hāpaz* in Niphal, to hurry away in fright (KB, Ps 104:7), and *sābab l' 'āhōr*, turn back (Ps 114:3, 5). The root occurs 162 times.

Interestingly, this verb is used in Jud 6:11 (Niphal) to describe what Gideon did to his grain. The emphasis here is on the idea of "escape," i.e. Gideon beat out grain in hiding to hide it (i.e. cause it to escape) from the Midianites. Also, Elisha is told to flee Ahab's presence as if pursued by the sword (II Kgs 9:3).

When God fights, man and nature flee. The Egyptians seeing that the God of the plagues was fighting for Israel were routed and fled before the closing sea (Ex 14:25, 27). God states the principle clearly in Lev 26:17 (cf. Prov 28:1) noting that victory depended on obedience (cf. *nādaḥ*). Disobedience would turn God against them and they would "flee when there is none to pursue" (cf. v. 36; Deut 28:7). So, when the ark set forth, Moses called on God's help and presence, crying "rise up (*qûm*) O Jehovah, let thine enemies be scattered, and let them that hate thee flee before thee" (Num 10:35). This "war-cry"/prayer also expresses Moses' joyous confidence and encouragement to the people (KD). This principle is exemplified frequently in Israel's victory over her enemies (cf. Jud 7:21–22) and her defeats (cf. Deut 32:36). Joab recognized this principle and fled to the altar of the temple, but was killed because the nature of his crime denied him asylum. Israel trusts in Egypt, not God, and will go into exile (Isa 30:16–17; cf. Lev 26:8). She is reminded of her impending punishment with the implication that now God is her pursuer (Isa 24:18; cf. Lev 26:36). Furthermore, Isaiah prophesied the flight of all nations (the covenant breakers) before Jehovah (Isa 24:18; cf. Isa 31:8; Jer 46:5; 48:6, etc.). The war-cry/prayer of Num 10:35 is greatly expanded in Ps 68:1 [H 2]ff. where Zion is depicted as the permanent locus of divine power and presence (cf. *nūaḥ*). The condition sought in this prayer especially will exist in the return (Isa 35:10) and the eschaton (51:11) when God will put all enemies (esp. "spiritual," cf. *nādaḥ*) to flight.

God's wisdom is lauded in Ps 104:7 as his creating words are recounted, especially his dividing the waters.

mānōs. Refuge. ASV and RSV similar with the latter superior at Job 11:20; Jer 25:35. This noun denotes the place of escape to which one flees. Cf. *māḥseh*, a place of shelter, *mā'ōz*, place of strength, hence, of safety, and *mišgāb*, inaccessible secure place, stronghold. The word occurs six times.

Bibliography: THAT, II, pp. 47–49.

L.J.C.

1328 נוּטַ (nûa') *shake, reel, stagger, wander, move* (RSV, ASV "sway"). Causative stem, *shake, sift, to make move*.

Derivative

1328a מְנוּטָּה (m'na'ānēa') *a kind of rattle* (II Sam 6:5, only).

Primary idea is of a repetitive, to and fro movement. These movements can be on a rela-

tively small scale expressed by ideas such as shaking, reeling, or swaying. Or they can be on a geographic scale calling for meanings such as "to wander about."

Examples referring to relatively small scale movements follow: the visible movement of Hannah's lips as she silently prayed (I Sam 1:13), the staggering walk or the wandering path of the blind man (Lam 4:14), and the swaying of trees in the wind (Isa 7:2). The term also applies to the reeling of the earth under judgment (Isa 24:20) and to the shaking of buildings (Isa 6:4).

It refers to movement on a geographic scale when describing the wandering of people as homeless fugitives or vagabonds (Lam 4:15) or wandering to seek water in drought (Amos 4:8) or to seek God's word (Amos 8:12). It describes Cain's punishment (Gen 4:12, 14; cf. also *nûd*). Included in Cain's punishment, possibly as a part of the total meaning of the term under discussion, is the status of the homeless vagabond as a person outside the protection either of the law or of any fixed social group (v. 14). Sinful rebellion against God is described as wandering (Jer 14:10).

In Joash's parable the meaning is unclear, but the deliberate pun on swaying over the trees and wandering to and fro among the trees as ruler may be intended (Jud 9:9, 11, 13).

nûa' may refer to shaking as a sign of fear. The shaking or trembling of the Jews at Mount Sinai is a clear example (Ex 20:18; "removed" of KJV is probably incorrect). Ahaz's reaction to the enemy coalition may be another example (Isa 7:2; ASV "trembled"; RSV "shook"). However, the allusion could as well be to Ahaz's inconstant "wavering" of heart rather than to trembling.

Niphal usages are passive, referring to being shaken in a sieve (Amos 9:9) and fig trees being moved by the wind (Nah 3:12).

The Hiphil expresses the causative of the ideas discussed above. The causative of small scale movement is seen when God "shakes" or "sifts" Israel in judgment (Amos 9:9). Wagging, i.e. shaking, the head is a sign of derision (II Kgs 19:21; Ps 109:25). Job desires the opportunity to express such derision at his friends (Job 16:4). Shaking the hand is also a sign of contempt (Zeph 2:15). In light of general usage of the root, it is better taken as "set to trembling" (RSV) rather than "set" (KJV, ASV) in Dan 10:10.

The causative of "to wander" expresses both God's making his people "to wander to and fro" (ASV, Num 32:13) and David's "making" Ittai wander about as a fugitive with David (II Sam 15:20). This usage gives some support to the translation "scatter" in Ps 59:11 [H 12] provided it is construed as "scatter as wanderers." On the other hand the RSV translation, "make to totter," is equally good.

Either of the causative ideas discussed above

could yield the translation "move" in II Kgs 23:18.

A.B.

- 1329 נִּיף (*nûp*) *I, to perfume; to send* (Hiphil). *nûp* is used once in the Qal stem for sprinkling perfume (Prov 7:17). Hiphil used once for bringing rain (i.e. causing to sprinkle; Ps 68:9 [H 10]). Cognate evidence indicates the existence of a distinct root with the above range of meanings, but its exact meaning in Hebrew remains unclear for lack of evidence.

A.B.

- 1330 נָחַף (*nûp*) *II, lift, wave, shake, wield.*

Derivatives

- 1330a נָחַף (*nâpâ*) *sieve* (Isa 30:28, only). Meaning uncertain.
1330b תִּנְחַף (t'*nûpâ*) *wave offering.*

The Hiphil stem of this verb is used both as a general verb for such ideas as lifting, waving, etc., and as a cultic term for presenting the "wave offering" (cf. similar usage of *rûm* and t'*rûmâ*). Most of its usages are in poetic, legal, or ritual contexts.

As a general verb, it refers to wielding tools. When it describes lifting a sickle to grain (Deut 23:26) the root idea of waving the tool back and forth is appropriately descriptive. However, applied to a tool for dressing stone (Ex 20:25; Deut 27:5), the appropriateness of "waving" is less clear, and "lift" or "use" is sufficient. It can describe shaking something in a sieve (Isa 30:28). A prophet or holy man might wave his hand to heal (II Kgs 5:11). The hand might be waved in judging (Isa 11:15) or as a signal (Isa 13:2). Job's raising of his hand against the fatherless (Job 31:21) could refer either to raising the hand as a legal act in court or to taking hostile action. (The discussion of the cultic use of this term will be incorporated into the discussion of t'*nûpâ* below.)

The Hophal is used once to express the passive idea, "be waved" (Ex 29:27; RSV "is offered"). The Polel may have intensive meaning: "to shake" for "to wave" (Isa 10:32).

t'*nûpâ*. *Wave offering, offering, shaking.* This noun has two cultic usages: first, as a general term applied to a variety of gifts and offerings and, secondly, as a specific term for those parts of the offerings which are designated for the officiating priest.

As a general term it is applied to such diverse things as gold (Ex 35:22), the "bronze of the wave offering" (Ex 38:29; literal translation), the sheaf of the firstfruits (Lev 23:11-15), the two loaves offered on the Day of Pentecost (Lev

23:17), the male lamb of the trespass offering for cleansing of lepers (Lev 14:12, 21), and, finally, the entire tribe of Levi (Num 8:11). The verb *nûp* alone describes the offering of the cereal offering (ASV "meal offering") of jealousy (Num 5:25). In some cases a ritual act of waving is clearly alluded to as when Moses waved the wave offering in Aaron's hands (Lev 8:27). In other cases the literal waving is impossible, as in the "waving" of the Levites. In such cases the significance of waving is lost and the terms mean "offering" and "to offer" respectively.

If these terms have a characteristic, specific usage, it occurs in repeated references to the "breast of the wave offering" together with the "thigh of the heave offering" as the priest's portion of the peace offering (Lev 7:30; 10:14; Num 6:19-20; Note: The second ram of Aaron's dedication ritual—Ex 29:26-34; Lev 8:22-27, 31-32—with its wave breast and heave thigh is also a peace offering since it, like the peace offering, was eaten by the offerers). These portions are so characteristically the priest's that they serve as the standard to which other priest's portions are compared (Num 18:18).

However, even in this usage, the terminology is not exact since the term "wave offering" once includes both the breast and the thigh (Lev 9:21) and the things burned as the "offering by fire" (cf. Lev 3:3-4) and the right thigh may be included in the term "wave offering" (Ex 29:22-24; Lev 8:25-27).

t'*nûpâ* occurs twice in non-cultic settings: in the "shaking" of God's hand in judgment (Isa 19:16) and in "the battles of shaking" (Isa 30:32) where it probably refers to brandishing some weapon.

A.B.

- 1331 נֹף (*nwp*) *III. Assumed root of the following.*

- 1331a נֹף (*nôp*) *elevation, height* (Ps 48:3, only).
1331b נֹף (*nâpâ*) *height* (Josh 12:23 = I Kgs 4:11; Josh 11:2).
1331c נֹף (*nepet*) *height* (Josh 17:11, only).

נֹשָׂה (*nôšâ*). See no. 1399a.

- 1332 נָחַץ (*nûq*) *suckle, nurse.* This verb occurs only once, in the Hiphil (Ex 2:9). Probably a by-form of *yānaq*.

- 1333 נֹר (*nwr*). *Assumed root of the following.*

- 1333a נֹר (*nēr*) *lamp.*
1333b נִיר (*nîr*) *lamp.*
1333c מְנֹרָה (*m'nôrâ*), מְנֹרָה (*m'nôrâ*) *lampstand.*

The words *nēr* and *nir* refer to the small bowl-like objects which contained oil and a wick to be lit to provide light (H. Porter, "Lamp, Lampstand," in ISBE, p. 1825f.; A. R. Millard, R. E. Nixon, "Lamp, Lampstand" in NBD, p. 708f.). Cf. Ugaritic *nr*, AisWUS 1850. The lamp is of more than usual archaeological interest, for the changing shapes of the lamps through the centuries is often a good index to the stratum being excavated. Our noun in its various spellings occurs forty-nine times.

m^cnôrâ. *Lampstand.* RSV "lampstand" is to be preferred over ASV "candlestick." This mem-preformative noun represents the stand upon which a lamp was placed (special "lamp place"). It usually signifies the lampstand in the tabernacle or temple (exception, 11 Kgs 4:10). It occurs forty-two times.

The Lord directed Moses to put a lampstand holding seven lamps in the Holy Place. These seven lamps represent God's perfect (PTOT, p. 362f.) leadership over his people. These "lights" were to burn always being trimmed morning and evening (Lev 24:2). While they were being trimmed the attendant was to burn incense representing the prayers of God's people (Ex 30:7-8; cf. *qâtar*). In 11 Sam 21:17 (*nēr*; cf. 1 Kgs 11:36), David's death is represented as the quenching of Israel's lamp. Hence, he is viewed as the one who leads Israel into a blessed state (cf. *nûah*). David, in turn, confessed that Jehovah was his lamp (11 Sam 22:29), i.e. the one who enlightened his path through darkness (cf. Jn 3:20-21) and led him into a state of blessedness *nûah*; cf. Prov 13:9; Job 29:3). Psalm 119:105 (cf. Prov 6:23) celebrates the word of God as the lamp to the feet of the godly. Christian readers will recognize this "leadership" of "word" and "light" as a foreshadow of Christ (Jn 1:1-13). As KD shows, Ps 132:17 uses "lamp" as a figure of the Messiah (it is parallel to the well-known figure "branch"). Thus, "lamp" is a symbol of God's personal leading (11 Sam 22:29), through his word, through his chosen king and, ultimately, through his messiah. God's leader was to lead his people as a priestly nation, i.e. a nation which was to lead all nations to God in worship. In Zech 4 the prophet speaks of a lampstand (i.e. the OT church; cf. KD) attached to an uninterrupted and unceasing supply of oil (i.e. the Holy Spirit; cf. KD). The interpretation (v. 6ff.) applies the figure to Zerubbabel (and his followers), but it seems obvious that the figure extends well beyond his day to the messianic era, indeed, cf. Rev 1:20. This symbolism underlies the NT statements that Christians are the light of the world (Mt 5:14) whose lamps are always to burn (Lk 12:35; Phil 2:15) and shine before men (Mt 5:16) leading the ungodly to God and basking in a state of blessed

expectation of and preparation for Christ's return.

[That the lampstand stands for the church also in the NT must be granted (Rev 1:20). However, the symbolism of the lampstand apparently is double. Zechariah 4:6 strongly implies that the lampstand symbolizes also the Spirit of God. Revelation 4:5 seems to build on this when it calls the lamps the "seven spirits of God" (cf. Rev 5:6). That the seven spirits of God are not seven different spirits, but the one Spirit seven-fold in his perfection seems to be proved by the position of the seven spirits of God bracketed between the Father and the Son as a source of benediction in Rev 1:4. R.L.H.]

L.J.C.

1334 נִשָּׁ (*nûsh*) *be sick* (Ps 69:21, only).

נָזַר (*nāzîr*). See no. 1340b.

1335 נָזַח (*nāzâ*) *I, sprinkle*. (ASV and RSV the same except at 11 Kgs 9:33 [RSV superior]) and Isa 52:15 [ASV superior; E. J. Young, *Studies in Isaiah*, II, Eerdmans, 1954, pp. 199-206].

nāzâ signifies a spattering or (Hiphil) sprinkling of blood, oil, or water either with one's finger (Lev 4:6) or a "sprinkler" (Lev 14:7). It is distinguished from *zâraq*, a heavier "sprinkling" executed with the whole hand (Ex 9:8; 29:20-21; Lev 4:6; however, Num 19:20-21). The verb occurs twenty-four times.

"Sprinkling" has reference to cleansing from sin (Isa 52:15; 1 Pet 1:2; Heb 9:13-14) to obtain ritual purity. Its primary significance derives from its reference to "blood" sprinkling. This particular root is used with blood sprinklings which are lighter both as to how much blood is sprinkled and as to what is expiated (e.g. Lev 4:6; 5:9; 14:7, 51; Num 19:4). Expiation for unwitting sin (Lev 4:6) and original sin (Lev 16:14) are thus interrelated and yet differentiated (i.e. by the relationship between the "sprinkling" and the "smearing" cf. *qâran*). The prophesied servant of the Lord although considered "impure" was to "expiate" the sins of the Gentiles (cf. E. J. Young op. cit., Isa 52:15)—this pronouncement is quite important (Acts 8:32-37).

Our root can also be used in contexts of ordination, i.e. purification and consecration to divine service. As such, "sprinkling" can be done with oil (Lev 8:11), oil and blood (Ex 29:21), and water (Num 8:7; Mt 3:15).

1336 *נָזַח (*nāzâ*) *II, spring, leap* (Hiphil, Isa 52:15).

- 1337 נָזַל (*nāzal*) *flow forth/down*. (ASV and RSV similar, with the latter better rendering Prov 5:15; Ps 78:16; Song 4:16; Isa 45:8. Both are inadequate at Jud 5:5 ("the mountains flowed down" [melted]), and Jer 9:18 [H 17].

nāzal represents the flowing of water as in a stream (Song 4:16), or abundant rain (Deut 32:2). As synonyms see *nāgar* "to pour down," i.e. spill water on the ground; *nāba'* "to pour/gush forth," i.e. as a swollen wadi, etc. The verb occurs sixteen times.

The primary meaning of our root "to flow as a stream" is used of weeping in mourning (Jer 9:18 [H 17]; cf. *nāgar*, Lam 3:49). The presence of fresh water is a result of divine blessing sovereignly dispensed (Ps 147:18). The return (or eschaton) will see the land divinely transformed from a desert wasteland to a land of flowing streams. This is clearly a figure of divine blessing (Isa 44:3). A wife (Prov 5:15) or lover (Song 4:15) is described as a flowing stream, i.e. a source of blessing. Sovereign control of water is also seen when Moses' striking the rock produced a stream of water (Ps 78:16), to be duplicated in the eschaton (Isa 48:21, parallel *zûb*).

The verb is used of rain which is sovereignly controlled (cf. Ps 147:18) as an example of God's support of Cyrus (Isa 45:8; cf. Job 36:28). Abundant rain is also a result of divine blessing (Num 24:7).

Interestingly, the presence of divine power in aid of Israel's conquest "melted mountains," i.e. even the strongholds (perhaps, the gods' strongholds?) of Israel's enemies (Jud 5:5; cf. *nāgar*, Mic 1:4, 6).

L.J.C.

- 1338 נָזַם (*nzm*). **Assumed root of the following.**
1338a נָזַם (*nezem*) *ring*. (ASV and RSV the same except at Hos 2:13 [H 15]).

Our word refers to a ring (usually of gold, Ezk 16:12) which was part of one's (man, woman, or idol; Job 42:11; Isa 3:21; T. C. Mitchell, "Ornament," in NBD, p. 913f.) ornamentation worn in nose or ears. These rings were signs of luxury, and as personal possessions were sometimes offered (cf. *qārah*;) to God (Ex 32:2; 35:22; Jud 8:24). The word occurs seventeen times.

L.J.C.

- 1339 נָזַע (*nezeq*) *injury, damage* (Est 7:4, only).

- 1340 נָזַר (*nāzar*) *separate, consecrate* (oneself).

Derivatives

- 1340a נָזַר (*nēzer*) *separation, consecration crown*.

- 1340b נָזִיר (*nāzîr*) *Nazirite, a consecrated person*.

- 1340c נָזַר (*nāzar*) *be a Nazirite*. Denominative verb, used only in the Hiphil (Num 6).

- 1340d מִנְזָר (*minzār*) *consecrated ones, princes* (Num 3:17). Meaning uncertain.

The basic meaning of *nāzar* is "to separate." When the word occurs in the Niphal with the preposition *min* it has the meaning "keep oneself away from." The verb is used in the sense of separation in Lev 22:2 where Aaron and his sons were commanded through Moses to keep away from the holy offerings that were presented to the Lord. These were portions of the sacrifices which were set aside for the use of the priests. But they could not use them as long as they were ritually unclean (v. 3). The word is used in the same construction in the sense of separating from idols (Ezk 14:7). It bears the meaning "abstain from" when used with *min* in the Hiphil in Num 6:3 where it occurs in connection with the Nazirite vow of abstinence. The idea of separation is inherent in the use of the word without *min* in Lev 15:31 where the Israelites were to be separated from uncleanness incurred as a result of certain physical discharges.

When the word occurs with the preposition *l'* in either the Niphal or Hiphil it connotes "separation to." It is used in this way of consecration to Yahweh on the part of the Nazirites (Num 6:2-3, 5-6, 12) and of the consecration of the Israelites to Baal (Hos 9:10).

nēzer. Separation, consecration, crown. The basic meaning of the verbal root, i.e. separation, is evident in the noun *nēzer* in a number of contexts. It is used of the period of separation or abstinence that was part of the Nazirite vow (Num 6:4-5, 7-9, 12-13, 18-19, 21). This negative aspect of votive abstinence may be understood more positively as consecration to God.

In Lev 21:12 the word occurs in the expression *nēzer shemen mishḥat* (consecration of the anointing oil). This context prohibits defilement of the priest, for that would not be compatible with the consecration symbolized by the anointing oil. The priest was to be separated from all which defiled. The same concept obtains in Num 6:7 with reference to the Nazirite in the expression *nēzer 'ēlohāyw 'al rō'shō* ([his] "separation to God on his head"). In this context the Nazirite was not to suffer defilement even for his family, as long as he was separated "to the Lord" (v. 6). The *nēzer* of his head is an evident reference to his uncut hair which was the outward mark of his separation (see also v. 9).

The word *nēzer* is used in the sense of head gear in Ex 29:6; 39:30; Lev 8:9. Comparison with

Ex 28:36–38 shows that it was an engraved plate which the priest wore over his forehead. It designated him a consecrated person.

The word *nēzer* is used of a royal crown in II Sam 1:10; II Kgs 11:12; Zech 9:16; Ps 89:39 [H 40], 132:18; Prov 27:24; II Chr 23:11.

In view of the fact that the long hair of a Nazirite was a *nēzer* denoting his consecration, and the head plate of a priest was a *nēzer* denoting his consecration, the word *nēzer* appears not to connote "crown" in the primary sense, but crown in the sense of the sign of one's consecration. This could be one's hair as well as a headpiece. The *nēzer* was a sign of the king's consecration to his office just as it was a sign of the Nazirite's consecration to God.

nāzîr. *Nazirite, a consecrated person, separate* (RSV "prince" in Deut 33:16).

The noun *nāzîr* occurs most frequently in the OT in a technical sense referring to the Nazirites. The exact meaning of the word in its non-technical uses is somewhat clouded by the paucity of significant contexts. The word occurs in Gen 49:26 and Deut 33:16 in parallel passages dealing with the blessing of Joseph. In the former passage, the word *nāzîr* is translated "separate" in KJV, ASV, RSV, but "prince" in NEB and NIV. In the latter passage while AV and ASV translate "separate," RSV and NEB and NIV translate the word "prince." A similar disparity occurs in the translation of the word *nāzîr* in Lam 4:7 where it is translated "Nazirites" (AV), "nobles" (ASV), "princes" (RSV and NIV), "devoted ones" (NASB) and "crowned princes" (NEB). The concept of "prince" is often derived from the related word *nēzer* which has the clear connotation of "crown" in a number of contexts. But this word may have undergone a separate development, deriving the meaning "crown" secondarily (see *nēzer*). It is best to trace the meaning of *nāzîr* from its verbal root *nāzar* from which the primary sense is derived.

In Gen 49:26 and Deut 33:16 the concept "separate" fits well with the experience of Joseph whose uniqueness was evidenced in his early relationship with his brothers and his ultimate promotion to the illustrious position he enjoyed in Egypt. The context then permits some measure of privilege in the word *nāzîr*. Thus the word may be similar to the English word "distinction" which not only bears the connotation of "difference" but also "eminence." This understanding of the word allows for the connotation "princes" or "members of the privileged classes," as the context of Lam 4:7 seems to require (however, the translation "Nazirites" is not completely out of the question in that context).

The word is applied to a vine in Lev 25:5, 11.

The context indicates that the vine was to be unpruned during the sabbatical year and left to grow of itself. This need not be seen as a metaphorical extension of the Nazirite practice of letting the hair grow as an act of special devotion but may be understood in the light of the basic connotation of separation inherent in the verbal root, i.e. the vine was singled out in the sense that it was not pruned. KB translates the word "singled out," "withhold from cultivation."

The specialized sense of the word, "Nazirites," refers to those who took a special vow of abstinence as an act of devotion to God. The specific aspects of the vow of separation are recorded in Num 6:1–21, where the Nazirite is described as abstaining from grapes and various products of the grape, refraining from cutting the hair, and avoiding the ceremonial defilement incurred when one touched a dead body.

Samson was a Nazirite to God (Jud 13:5, 7; 16:17), i.e. one who was separated to God because of the votive restrictions placed on him. When he violated his vow of separation, God left him in his enemies' hands.

The Nazirites formed a group of dedicated individuals, both men and women (cf. Num 6:2), who were spiritual leaders in their times. Amos cites the Nazirites in parallelism with prophets in 2:11–12, showing how the benign influence of the Nazirites was diminished in the context of the disobedience of eighth-century Israel.

Bibliography: THAT, II, pp. 50–52.

T.E.M.

נָהַג (nōah). See no. 1323b.

- 1341 נָהַג (nāhā) **lead, guide.** (ASV and RSV similar with the latter superior at I Sam 22:4, I Kgs 10:26 [both of which evidence a confusion of *nāhā* and *nūah*; cf. ASV II Kgs 18:11], and inferior at Ps 67:4 [H 5].

Our root represents the conducting of one along the right path. For synonyms see *nāhag*. Our root occurs thirty-nine times.

The root is sometimes synonymous with *nāhag* "to herd" to a predetermined destination; e.g. lead away captive (Job 12:23), herd/lead a flock (Ps 78:53, 72). Elsewhere it is equal to *nāhal* "to lead/guide tenderly;" e.g. Ps 31:3 [H 4], to lead (*nāhā*), and tenderly lead/guide (*nāhal*) out of trouble (cf. Job 31:18).

God is often the one who "leads." So, Abraham's servant reported God as his "guider" (Gen 24:27). In the Exodus this guidance was manifested by the pillars of cloud and fire which preceded (led) Israel (Ex 13:21). The Psalms frequently recall how God led his people along the right path and beseech him to do so again. This request is for far more than guidance. It is

that God be before them showing the way of righteousness (Ps 5:8 [H 9]: 23:3). Moreover, the pious are to be led by God's commandments (Prov 6:22) in conjunction with the integrity of his heart (Prov 11:3). The nations are obligated to worship God because he will judge and govern (i.e. graciously guide, Ps 67:4 [H 5]: cf. 31:3 [H 4]) in the messianic kingdom.

L.J.C.

- נָחִים (*niḥim*). See no. 1344b.
נָחֻשׁ (*nāḥush*). See no. 1349b.
נָחִיר (*nāḥir*). See no. 1346c.

1342 נָחַל (*nāḥal*) *I, inherit, possess.* Denominative verb.

Parent Noun

- 1342a נַחְלָה (*naḥlā*) *inheritance, heritage, possession.*
1342b נַחֲלִיל (*n'ḥilā*) a musical term. Occurs only in the heading of Ps 5. Perhaps it is connected with *ḥālil* "flute." May be the name of a melody.

The verb *nāḥal* basically signifies giving or receiving property which is part of a permanent possession and as a result of succession. Sometimes the idea of succession is absent but the "possessing" carries with it a connotation of permanence (e.g. Ex 34:9; Prov 14:18). A close synonym, *yārash*, connotes the idea of possession apart from succession (KB), but sometimes may embrace the latter idea. Cf. Ugaritic *nḥl* (UT 10: no. 1633), and Phoenician *nḥl* (KA1, p. 16); the Arabic *naḥala* means "give as property." Our verb occurs sixty times (including Ezk 7:24, which consists of parallel stichs and synonymously parallels our root with *yārash*; cf. Isa 57:13, etc.).

naḥlā. *Inheritance, heritage, possession.* ASV and RSV similar with the RSV superior at e.g. Deut 4:20; 32:9; Mic 2:2; and those many passages where the idea of possession was conceived of as permanent and not entailing the idea of succession (I Sam 26:19), and inferior at I Sam 10:1; Ps 78:55; Ezk 45:1; both are inadequate at Ex 15:17. Our noun basically connotes that which is or may be passed on as an inheritance (e.g. Gen 31:14), that which is one's by virtue of ancient right, and that which is one's permanently. A near synonym is *môrāshā*, a possession, an inheritance. Cf. *y'rūshshā*, sometimes occupied, patrimony, possession; *ḥēleq*, a portion, that which is an allotted part; *miqneh*, purchased possession; and *'ahuzzā*, landed property, that which is held in possession. Cf. Ugaritic *nḥl* "inheritance," UT 19: no. 1633. The noun occurs 223 times.

Involved in a study of this root is the extensive

biblical teaching on "inheritance." Our summary will be grouped around the inheritance God gives the godly, the social and legal regulations governing the land. Jehovah's possession, and God as the inheritance/heritage of the godly.

The whole earth belongs to its Creator (Ps 47:4 [H 5]) and he so governs all things that Israel received his special possession (Deut 32:8f.; Ex 15:17) the land fit for kings flowing with milk and honey (Deut 31:20), the place representing true salvation (Deut 12:9; Cf. Heb 3:17—4:13, and *nūaḥ*). Thus, the Bible represents God as the great King (Jud 8:23; I Sam 12:12), the feudal Lord (Deut 32:8) who sovereignly partitions his land to man (cf. KD; Isa 49:8; 57:13), and obligates his subjects to render personal services. As deVaux says, the widely spread ancient near eastern feudal idea was in Israel transferred to the theological plane (AI, p. 164). Hence, he promised (Gen 12:7; Ex 32:13), and gave Palestine (Josh 21:43ff., etc.) to Israel as a perpetual inheritance (Ex 32:13) contingent upon obedience to his law (e.g. Num 33:50—54). Little by little God would drive out the inhabitants of Canaan (Ex 23:30). This gift, however, was to be conquered (Josh) by stages. Once inhabited, the land was to be recognized as God's, and was to be preserved as holy by cleansing it (Deut 20:16), keeping it cleansed (e.g. Deut 21:23), and dedicating it to God (Deut 26:1ff.). Disobedience was sovereignly punished (Jer 16:9; 17:4). The eschaton will see reoccupation of the land which is conceived either literally or in its spiritual reality according to one's viewpoint about the millennium (KD; Ezk 47:14; Isa 57:13; cf. Heb 12:25—29).

The division of the land by lot prior to its conquest expressed divine sovereignty (Num 26:56) as was well known in the ancient near east (AI, p. 165). For a brief summary of the laws governing the partition and inheritance of the land, cf. R. E. Nixon, "Inheritance," in NBD, pp. 562—63. For a treatment of the theological significance, see R. J. Rushdoony, *The Institutes of Biblical Law*, Nutley, Craig Press, 1973. He treats of family economics (p. 174ff.), responsibility of firstborn including family responsibility to care for single women (p. 179f.; also D. Leggett, *The Levirate and Goel Institutions*, Cherry Hill: Mack 1974, limited primogeniture (p. 180f.), landmarks as representative of social, moral, and spiritual inheritance (p. 328ff.; Hos 5:10), indeed, representative of life itself (pp. 166, 169; cf. KD; Deut 19:14; 20:19—20).

God's special created, chosen heritage is the people of Israel (Deut 4:20; Ex 34:9; cf. Acts 15:16ff.; Eph 1:3—4). This blessed position (Ps 33:12) was the basis for special petitions (Deut 9:26, 29; Ps 28:9) and confidence (Mic 7:14, 18; Ps 94:14; cf. Ps 37:18). Because God is their Lord

they should not own/possess one another as property (Lev 25:47ff.; cf. KD; Isa 14:2; Zeph 2:9). God also has special permanent rights over all the nations (Ps 82:8; 2:8-9; cf. KD).

The true spiritual heritage of the godly (Ps 114:6f.; 37:18; KD; Jer 12:14-17) was especially and figuratively represented by Aaron, the priests, and the Levites who had no property to pass on to their sons (however, note KD on Num 18:20f.), but who really had the greatest heritage of all—the Lord himself (Josh 18:7; KD; Ezk 47:22).

L.J.C.

1343 נַחַל (nahal) II. Assumed root of the following.

1343a נַחַל (nahal) I, wadi, torrent.

1343b נַחַל (nahal) II, palm tree (Num 24:6, only). Meaning uncertain.

nahal I. *Wadi, torrent, torrent valley, torrent, river, shaft.* This noun usually refers to a dry river bed or ravine which in the rainy season becomes a raging torrent, and/or the resulting torrent (J.B.S.S. Thompson, "River," in NBD, p. 1098). The Ugaritic *nhl* (UT 19: no. 1636) and Akkadian *nahlu* have the same meaning. It can also represent a permanent stream or river (Lev 11:9; I Kgs 18:40). The occurrence in Job 28:4 is apparently *hapax* in meaning (cf. KB). Synonyms of "torrent, river" are: *nāhār* "permanent watercourse" (KB); *y'ôr* (Egyptian *jrw*) "stream or channel," usually only of Egyptian waterways; *peleg*, "irrigating canal"; *āpiq* "innermost deepest part of a valley flowing with water" (KB). See also *yūbāl*, *ūbāl*. Synonyms of "torrent-valley" are *gay* "valley"; *ēmeq* "vale," "(low-situated) plain"; *biq'ā* "valley-plain." Our word appears also as *nahlā* (Ps 124:4, torrent; Ezk 47:19; 48:28, brook). It occurs 139 times.

That our root designates torrents of running water is clear from Deut 21:4; Amos 5:24; Ps 104:10; 110:7. All the streams mentioned (e.g. in the Elijah accounts) are these quickly appearing and disappearing torrents. Among the better known wadis is the Brook of Egypt, or Wadi el-'Arish (M. G. Kyle, "Egypt, the Brook of," in ISBE, p. 523). This "brook" perhaps was the dividing line between Egypt and Canaan (Num 34:5). A second possible identification is the Shihor/Pelusaic Nile arm. For a survey of the arguments see K. A. Kitchen, "River of Egypt," in NBD, p. 354. For a list of all *n'hālim*, see KB.

Interestingly, the Pentateuch displays a consistent application of *nahal* (thirteen times) and *nāhār* (thirteen times) to extra-Egyptian waterways whereas inter-Egyptian waterways are consistently termed *y'ôr* (thirty times). This displays "not art but experience in the use of a language which gives such skill as to attend to so small a thing in so extensive use without a single mistake." Items such as this invalidate the well known JEDP and variations (M. G. Kyle, *ibid.*).

Because the *nahal* suddenly emerges and/or disappears as raging torrents it symbolizes many things, e.g. the pride of nations (Isa 66:12), the strength of the invader (Jer 47:2), and the power of the foe (Ps 18:4 [H 5]; 124:4). Even torrents of oil do not please God if unaccompanied by justice, kindness, and humility (Mic 6:7). The godly, however, will be sated by the overflowing torrents of God's pleasure (Ps 36:8 [H 9]). Thus, the *sh' lāmim* (q.v.) truly have a spiritual significance symbolical of the paradisiacal rivers of delight (KD; cf. Gen 2:10) whose source is God (Jer 2:13). The returning exiles will find torrents in the desert (cf. Ex 17:3ff.; Num 20:11). Of course, this is not fully realized until the messianic age *The Book of Isaiah* (Eerdmans, 1965) (Isa 35:6; cf. KD; Jer 31:9). The Kidron Valley (G. W. Grogan, "Kidron," in NBD, p. 691; E. W. G. Masterman, "Kidron, the Brook," in ISBE, p. 1798) long associated with graves (II Kgs 23:6, 12; Jer 26:23), and unholy defiled ground (e.g. I Kgs 15:13; II Chr 29:16; II Kgs 23:6) will be holy to God in the eschaton (Jer 31:40). There the life-giving waters will flow (Ezk 47:5-19; in v. 9 the "dual" either represents "strong current" (KD) or the Ugaritic enclitic mem). Then neither the Nile nor the Euphrates will separate God's people from salvation (Isa 11:15; cf. *nuah*).

L.J.C.

1344 *נָחַם (nāham) *be sorry, repent, regret, be comforted, comfort.* Not used in the Qal, *nāham* occurs chiefly in the Niphal and Piel.

Derivatives

1344a נָחַם (nōham) *sorrow, repentance* (Hos 13:14, only).

1344b נָחַם (niḥūm) *comfort* (Isa 57:18), *compassion* (Hos 11:8).

1344c נִחְמָה (neḥāmā) *comfort* (Ps 119:50; Job 6:10).

1344d תִּנְחֹם (tanḥūm) *consolation* (e.g. Jer 16:7; Isa 66:11).

The origin of the root seems to reflect the idea of "breathing deeply," hence the physical display of one's feelings, usually sorrow, compassion, or comfort. The root occurs in Ugaritic (see "to console" in UT 19: no. 1230) and is found in

OT proper names such as Nehemiah, Nahum, and Menehem. The LXX renders *nḥm* by both *metanoëō* and *metamelomai*.

The KJV translates the Niphal of *nḥm* "repent" thirty-eight times. The majority of these instances refer to God's repentance, not man's. The word most frequently employed to indicate man's repentance is *shûb* (q.v.), meaning "to turn" (from sin to God). Unlike man, who under the conviction of sin feels genuine remorse and sorrow, God is free from sin. Yet the Scriptures inform us that God repents (Gen 6:6-7; Ex 32:14; Jud 2:18; I Sam 15:11 et al.), i.e. he relents or changes his dealings with men according to his sovereign purposes. On the surface, such language seems inconsistent, if not contradictory, with certain passages which affirm God's immutability: "God is not a man . . . that he should repent" (I Sam 15:29 contra v. 11); "The LORD has sworn and will not change his mind" (Ps 110:4). When *nāham* is used of God, however, the expression is anthropopathic and there is not ultimate tension. From man's limited, earthly, finite perspective it only appears that God's purposes have changed. Thus the OT states that God "repented" of the judgments or "evil" which he had planned to carry out (I Chr 21:15; Jer 18:8; 26:3, 19; Amos 7:3, 6; Jon 3:10). Certainly Jer 18:7-10 is a striking reminder that from God's perspective, most prophecy (excluding messianic predictions) is conditional upon the response of men. In this regard, A. J. Heschel (*The Prophets*, p. 194) has said, "No word is God's final word. Judgment, far from being absolute, is conditional. A change in man's conduct brings about a change in God's judgment."

The second primary meaning of *nāham* is "to comfort" (Piel) or "to be comforted" (Niphal, Pual, and Hithpael). This Hebrew word was well known to every pious Jew living in exile as he recalled the opening words of Isaiah's "Book of Consolation," *nahāmū nahāmū 'ammī* "Comfort ye, comfort ye my people" (Isa 40:1). The same word occurs in Ps 23:4, where David says of his heavenly Shepherd, "Thy rod and thy staff, they comfort me." Many passages, however, deal with being comforted for the dead (II Sam 10:2; I Chr 19:2; Isa 61:2; Jer 16:7; 31:15). People were consoled for a death of an infant child (II Sam 12:24), teenage son (Gen 37:35), mother (Gen 24:67), wife (Gen 38:12) et al. A mother might comfort her child (Isa 66:13) but it is God who comforts his people (Ps 71:21; 86:17; 119:82; Isa 12:1; 49:13; 52:9). God's "compassion (*nihām*, a derivative of *nḥm*) grows warm and tender" for Israel (Hos 11:8).

M.R.W.

1345 נָחַץ (*nāḥaṣ*) **urge** (I Sam 21:9, only).

1346 נָחַר (*nḥr*). **Assumed root of the following.**

1346a נָחַר (*naḥar*) **a snorting** (of horse, Job 39:20, only).

1346b נָחַרָה (*nahārā*) **a snorting** (Jer 8:16, only).

1346c נָחִיר (*nāḥîr*) **nostril** (Job 41:12, only).

1347 נָחַשׁ (*nḥsh*) **I. Assumed root of the following.**

1347a נָחַשׁ (*nāḥāsh*) **serpent, snake.**

1347b נְחֻשְׁתָּן (*nḥūštān*) **Nehushtan.**

nāḥāsh. Serpent, snake. This is the most common word for "snake." It is found thirty times in the OT, distributed from Genesis through the minor prophets. It is also known from the Ugaritic *nḥš*.

The first five occurrences of *nāḥāsh* are in Gen 3 (vv. 1, 2, 4, 13, 14) and of course refer to the creature that tempted Eve to disobey God. Paul alludes to this incident in II Cor 11:3 and John in Rev 12:9ff. In all instances, including the LXX translation, the Greek word is *ophis*.

Opinions differ as to whether this was a satan-inspired snake or a name for satan himself (J. O. Buswell, *Systematic Theology of the Christian Religion*, I, Zondervan, 1962, pp. 264-65). Only naturalistic theology could hold that it was a mere snake referred to in myth or legend.

nāḥāsh occurs in Ex 4:3; 7:15, in connection with Moses' rod turning to a "serpent." During the wilderness wanderings of the Israelites the Lord sent "fiery serpents." Numbers 21:6, 7, 9; Deut 8:15, and II Kgs 18:4 refer both to the plague and the bronze "serpent" *nḥūštān* which Moses made. Normally the "serpent" is something evil. But anyone poisoned with venom could, by looking at the bronze "serpent," be healed. Jesus alluded to this episode in John 3:14. As the object of faith resembled the curse in the case of the "snakes," so Jesus resembled the cursed in that he took the form of a servant and was made in the likeness of man (Phil 2:7). There are at least two more noteworthy features of this account of Moses' bronze "snake." First, the word *nāḥāsh* is almost identical to the word for "bronze" or "copper," Hebrew *nḥōshet* (q.v.). Some scholars think the words are related because of a common color of snakes (cf. our "copperhead"), but others think that they are only coincidentally similar. From II Kgs 18:4 we can

assume that the bronze "serpent" became a relic, a religious fetish, and that the people of God, acting like ordinary men, wanted to worship it. The name given it was "Nehushtan," which may refer to the words *nāḥāsh* (snake) and/or *nʿhōshet* (brass).

Both Jeremiah and Amos may be alluding to this desert incident when they threaten punishment in the form of "serpents" (Jer 8:17; Amos 5:19; 9:3). Isaiah and Micah may have Gen 3:14 in mind when they speak of licking the dust like a "serpent" (Isa 65:25; Mic 7:17).

Both Job and Isaiah mention the leviathan (q.v.) or dragon or crooked "serpent" in connection with God's power (Job 26:13; Isa 27:1).

Other characteristics of "snakes" receive mention. Genesis 49:17 seems to refer to a serpent's stealth; Ps 58:4, 140:3 [H 4]; Prov 23:32, Eccl 10:8, 11, Jer 8:17, Amos 5:19, and 9:3 to the poisonous bite; Prov 30:19 to their climbing ability on a smooth surface; and Jer 46:22 to the hissing sound they make.

Three passages (Ps 54:4–5; Eccl 10:11; Jer 8:17) may refer to "snake" charming. Again, the word *nāḥāsh* is similar to the word *lahash* (enchantment or divination) in those passages (cf. *nāḥash*).

Three or four people and one city have names derived from this root: *Nahash*, the king of Ammon (I Sam 11:1, et al.); *Nahash*, the father of Abigail and Zeruah (II Sam 17:25); *Nahshon*, the son of Aminadab and brother-in-law of Aaron (Ex 6:23 et al.); *Nehushta*, the mother of king Jehoiakin (II Kgs 24:8); and the city of *Nahash* (Ir-nahash in most translations, I Chr 4:12). Since there are several identical roots, these names may not necessarily mean "snake" but perhaps "diviner" (*nahash*) or "copper" (*nʿhōshet*).

Bibliography: TDNT, V, pp. 571–79.

R.L.A.

1348 נָחַשׁ (*nāḥash*) II, *learn by experience, diligently observe, divine, practice divination or fortunetelling, take as an omen.*

Derivative

1348a נָחַשׁ (*nāḥash*) *divination.*

The verb *nāḥash* is found only in the intensive stem (Piel) and is definitely related to the noun *nāḥash* meaning "divination" or "enchantment."

The first occurrence of *nāḥash* is in Gen 30:27, where Laban "learned from the omens" (JB) that Jacob's presence meant his blessing.

Both in Gen 44:5 and 15 the doubly intensive form (infinitive absolute plus finite verb) occurs. There we learn that Joseph claimed for his brothers' benefit that he could "divine" with a special cup and so knew secret things such as that

his brothers, still unaware of who he was, had his cup in their possession. According to I Kgs 20:33, the servants of Benhadad "took as an omen" Ahab's use of the word "brother" in reference to their king.

But divination is outlawed in Lev 19:26 and is spoken of with condemnation in II Kgs 17:17 and 21:6 (cf. II Chr 33:6). It is in the list of forbidden occult practices of Deut 18:10.

nāḥash. *Divination, enchantment, omen, sorcery* (Berkeley Version) *augury* (JPS). The noun *nāḥash* is obviously related to the cognate verb *nāḥash* II. Numbers 23:23 has the word in the singular, parallel to *qesem* (q.v.), indicating some variety of the occult. Numbers 24:1, also part of the Balaam passages, has the only other occurrence of *nāḥash*. Because of the similarity of *nāḥash* to *nāḥāsh* (q.v.) meaning "snake," some make a connection to snake charming. More contend that there is a similarity of hissing sounds between enchanter and serpents and hence the similarity of words.

R.L.A.

1349 נָחֹשׁ (*nāḥash*) III. *Assumed root of the following.*

1349a נָחֹשֶׁת (*nʿhōshet*) *copper.*

1349b נָחֹשׁ (*nāḥāsh*) *bronze* (Job 6:12, only).

1349c נָחֹשֶׁת (*nʿhōshet*) *copper, bronze* (e.g. Job 28:2; II Sam 22:35; Ps 18:35).

nʿhōshet. *Copper, bronze, brass, brasen, brazen* (steel, KJV Jer 15:12), *fetters, chains*. This, the common word for copper and its alloy, bronze, occurs about 140 times in the OT. "Copper" is an element rarely found in pure form. "Bronze" is an alloy of copper made with tin. Although "copper" characterized the Bronze Age in Palestine, it by no means disappeared from use during the Iron Age (beginning in the 12th century B.C.). Brass (copper alloyed with zinc) did not come into extensive use until the intertestamental period so far as our archaeological evidence goes, but possibly the "fine copper" of Ezk 8:27 was genuine brass (R. J. Forbes, *Studies in Ancient Technology*, VIII, p. 276).

More than half the references to *nʿhōshet* are in the sections describing the construction of the tabernacle and the temple with the accompanying furniture and utensils. Made of *nʿhōshet* were the sockets (Ex 26:37), the vessels (27:3), the grate and rings of the altar (27:4) and other pieces of hardware and decoration, as well as the overlay of the altar (27:2). Perhaps most notable was

Solomon's "brazen" sea (I Kgs 7:23–27; cf. II Kgs 25:13).

"Chains" or "fetters" made of *n'hōshet* bound Samson (Jud 16:21), Manasseh (II Chr 33:11), Jehoiakim (II Chr 36:6), and Zedekiah (Jer 52:11). Goliath had a helmet, greaves, and shield of *n'hōshet*.

"Copper" in the natural state is mentioned in Deut 8:9 and Zech 6:1.

Several times the word is used poetically. The "brass" heaven of Deut 28:23 represents heat and rainlessness. According to Isa 60:17 its value is between that of gold and wood. Lamentations 3:7 describes grief as a heavy "copper chain." Various translations have "filthiness" (AV, ASV); "shame" (RSV); "lust" (NAB); or other paraphrases for the strange use of *n'hōshet* in Ezk 16:36.

Bibliography: Bowes, D. R., "Metals and Metallurgy," in ZPEB, IV, pp. 207–12.

R.L.A.

1350 נָחַשׁ (*nḥsh*) IV. Assumed root of the following.

1350a נָחַשׁ (*n'hōshet*) *lust, harlotry* (Ezk 16:36, only). Meaning dubious.

נָחַשׁת (*n'hōshet*). See nos. 1349a, 1350a.

נָחַשְׁתָּן (*n'hushṭān*). See no. 1347b.

1351 נָחַת (*nahēt*) *go down, descend*.

Derivatives

1351a נָחַת (*nahat*) *descent* (Isa 30:30, only).

1351b נָחַת (*nahēt*) *descending* (II Kgs 6:9, only).

Because it is used in several verbal stems, *nāhēt* is rendered several different ways. Ug *nht* likewise means "go down" (UT 19:170, 1635). Several passages clearly illustrate the basic meaning of *nāhat* or *nāhēt* the stative form. As a military term it means "to march down" (Qal) to attack a city (Jer 21:13), or "to lead/bring down" (Hiphil) warriors for battle (Joel 3:11 [H 4:11]). It is the wicked who "go down to Sheol" (Job 21:13). The Psalmist says that God's hand descended upon him (Ps 38:2 [H 3]). Cf. the "descending (*nahat*) blow of his arm" (Isa 30:30).

The verb *nāhēt* is also rendered "to penetrate, sink into." David exclaims in Ps 38:2 [H 3], "thy arrows have sunk into me" (cf. the Ugaritic epithet "the archer," for Resheph, the Canaanite god of plagues. See Dahood, "Psalms," I AB, p. 235). "A rebuke penetrates more deeply into (i.e. makes an impression on) a wise man than a hundred blows into a fool" (Prov 17:10). *nāhēt* is

also used of "pressing down," i.e. levelling off, furrows of ground (Ps 65:10 [H 11]).

In two parallel passages (II Sam 22:35; Ps 18:34 [H 35]), we find a rare occurrence of *nāhēt*. It has been rendered "so that my arms can bend (i.e. press down, stretch, or string?) a bow of bronze" (RSV). Ugaritic evidence, however, suggests a more literal rendering of "lowering" a bow of bronze into the arms (cf. Kothar, the Canaanite god of crafts, who "brings down" (*ynht*) two clubs to Baal, the earthly warrior below, so he can fight Yamm; see UT 16: no. 68:11).

Biblical Aramaic uses *n'hēt* in the sense of "to come down" (Dan 4:13 [H 10]; 4:23 [H 20]), "deposit, store" (something, Ezr 5:15; 6:1, 5), and "depose" (from the throne, Dan 5:20).

It is of interest to note that while the noun *nahat* II is derived from *nāhat*, there is another noun *nahat* derived from *nūah* "rest." In the same way there are two nouns *shahat* I "pit" and *shahat* II "corruption" from *shūah* "dig" and *shāhat* "corrupt" (q.v.) respectively. This latter noun is not recognized in the lexicons, though usually so translated in the LXX.

M.R.W.

נָחַת (*nahat*). See no. 1323a, 1351a.

1352 נָטָה (*nāṭā*) *extend, stretch out, spread out, pitch, turn, pervert, incline, bend, bow*.

Derivatives

1352a נָטָה (*maṭṭā*) *below*.

1352b נָטָה (*maṭṭeh*) *staff*.

1352c נָטָה (*miṭṭā*) *bed*.

1352d נָטָה (*mūṭṭā*) *spreading, outspreading*.

1352e נָטָה (*mūṭṭeh*) *that which is warped*.

The 215 occurrences of this verb, excluding derivatives, are translated some thirty-five different ways in the KJV alone. The ASV and RSV add other renderings to this wide range of English expressions.

The root meaning of "extend," "stretch out," is especially common in the Qal stem. Exodus records that Moses "stretched out" his hand (usually his rod is also mentioned) over the waters of Egypt (Ex 7:19), over the land of Egypt (Ex 10:13), toward heaven (Ex 9:23; 10:21–22) and over the Red Sea (Ex 14:16, 21, 26–27). A javelin (Josh 8:18, 26) or a sword (Ezk 30:25) is "stretched out" in the hand. A woman displays her haughtiness with an "outstretched neck" (Isa 3:16). A measuring line is "stretched over" a city (II Kgs 21:13; Zech 1:16; cf. Isa 44:13).

Although a man may defiantly "stretch forth" his hand against God (Job 15:25), anthropomorphically, it is ultimately God's hand which "stretches out" in judgment against man (Isa

5:25; 23:11; 31:3; Jer 6:12; 15:6; 51:25 et al.). Likewise, it is by an "outstretched" arm that God redeems and delivers man (Ex 6:6; Deut 4:34; 5:15; 11:2 et al.).

nāṭā is often used for both "spreading out" (i.e. "pitching") one's own tent (Gen 12:8; 26:25; 35:21; Jud 4:11; II Sam 16:22) and the tabernacle of the religious community (Ex 33:7; II Sam 6:17; I Chr 16:1). "To spread" a tent, figuratively, is to be established as a people (Jer 10:20). "To stretch out" the curtains of a tent, is symbolic of growth (Isa 54:2). *nāṭā* is also figuratively used of Yahweh, the Creator, whose hands "stretched out" the heavens as a tent (Isa 40:22; 42:5; 44:24; 45:12 et al.). In addition, the root is used of the "extending" (i.e. growing long) of shadows (II Kgs 20:10; Ps 109:23; 102:11 [H 12]; Jer 6:4) and the "stretching out" of a valley (Num 24:6).

The root also occurs with the basic meaning of "to bend." A wadi "bends" (i.e. slopes, Num 21:15), the shoulder of an ass "bends down" with a load (Gen 49:15), and one "bends down" (i.e. tilts) a pitcher of water to pour a drink (Gen 24:14). The term is also used figuratively of the "perverting" or "warping" of justice, the condemnation of which lies at the heart of Israel's law code (see Ex 23:6; Deut 16:19; 24:17; 27:19; I Sam 8:3; Isa 10:2; 29:21; Lam 3:35; Amos 2:7; 5:12; Mal 3:5).

A large number of other references employing *nāṭā* carry the nuance of "turn," "incline," or "decline." It is used in the literal sense of "turning aside" or "away," or "diverting" from the path (Num 20:17; 21:22; 22:23, 26, 33; II Sam 6:10) or "turning toward" something (Gen 38:1, 16).

But most usages are figurative. One's heart may "turn away" (i.e. shift its loyalty, apostatize; cf. I Kgs 11:2-4, 9) or "be swayed" (II Sam 19:14 [H 15]). On the other hand, one's heart may be "inclined" to God and his commands (Josh 24:23; I Kgs 8:58; Ps 119:36). Also common is the expression "to incline the ear" (i.e. listen obediently) in reference to men paying heed to God (Jer 7:24, 26; 11:8; 17:23 et al.), God toward men (II Kgs 19:16; Isa 37:17; Dan 9:18), and men to the words of a sage (Prov 4:20; 5:1, 13; 22:17). The word *nāṭā* is used with the meaning "decline" in reference to a shadow (II Kgs 20:10), day (Jud 19:8-9), and figuratively, of one's rapid physical decline in life (Ps 102:11 [H 12]; 109:23).

mattā. *Below, beneath, downwards.* This term used adverbially, often indicates that which is "below," "beneath," or "under" something, as opposed to that which is above (cf. Ex 26:24; 36:29; 27:5; 38:4; 28:27; 39:20). Something planted takes root "downward" but "bears fruit upward" (II Kgs 19:30; Isa 37:31). The heavens are pictured "above," and the foundations of the

earth "below" (Jer 31:37). Sheol is located "beneath" (Prov 15:24). *mattā* is also used of one's age, as in I Chr 27:23: "David did not number those below twenty years of age." Its connection with the verb *nāṭā* becomes apparent when one observes that the Hiphil of this verb is sometimes rendered "bow down" (cf. II Kgs 19:16; Ps 86:1; Prov 22:17).

maṭṭeh. *Staff, stick, shaft, branch, tribe.* This derivative is found about 250 times. Although the term properly means "staff" or "rod," it is usually rendered (some 180 times) "tribe." The reference is usually to one of the twelve tribes by name. At first, apparently, each tribal ruler led his group with a staff. This suggests that the ruler's staff may have originally been a symbol of the tribe (cf. Num 17:2-10 [H 17-25]) and eventually betokened leadership and authority (cf. Ps 110:2; Jer 48:17). It should be noted that *mt yd* "staff of the hand," is well attested in Ugaritic literature (cf. UT 19: no. 1237). In the LXX, *phylē* is most frequently employed to translate the Hebrew *maṭṭeh*.

A *maṭṭeh* was used as a support when traveling (cf. Gen 38:18, 25). The young warrior, Jonathan, carried a staff (I Sam 14:27, 43). The staffs of Moses (Ex 4:2, 4, 17; 7:15, 17, 20 et al.) and Aaron (Ex 7:9-10, 12, 19; Num 17:8 [H 23], et al.) are best known because of the supernatural wonders associated with them. An interesting example, often misused, is the case of Moses holding up the rod of God in the Amalekite war (Ex 17:9, 11-12). It is often supposed that Moses was holding up his hands in prayer, but the context says nothing of this. The power to prevail was in the rod of God, the symbol of his power.

Additional uses of *maṭṭeh* include the "shaft" of an arrow (Hab 3:9, 14). Another expression, *maṭṭeh lehem* "staff of bread" (cf. Ezk 4:16; 5:16; 14:13; Lev 26:26; Ps 105:16) may not refer to the "bread-pole," as is commonly supposed. Since *lehem* may mean "grain" or "wheat," *maṭṭeh lehem* may simply be taken as "stem" or "stalk of grain" (see M. Dahood, *Psalms*, in AB, XVIIa, p. 56). Ezekiel uses *maṭṭeh* for the branch of a vine (19:11-12, 14). Especially in Isaiah, the term is used as a symbol of oppression and judgment (Isa 9:4 [H 3]; 10:5, 24; 14:5; 30:32).

mittā. *Bed, couch, litter.* This word occurs twenty-eight times. It is attested in Ugaritic. King Krt lay weeping on his bed after losing his entire family (cf. UT 16: Krt, I 30, p. 184). Usually the *mittā* was a place for "stretching out" or "reclining" upon the floor where a mat or cloths were spread out. The beds of the rich, however, might be pieces of furniture made of ivory (Amos 6:4) or gold and silver (Est 1:6), possibly located in bed chambers (II Kgs 11:2). The *mittā* was used for sleeping (II Kgs 4:10), for the sick or injured

(Gen 47:31; 48:2; II Kgs 1:4, 6), as a portable litter (I Sam 19:15), and as a bier for the dead (II Sam 3:31).

[There is debate about Gen 47:31 whether Jacob leaned upon the top of his staff *maṭṭeh* as in LXX and Heb 11:21 or upon the head of his bed *miṭṭā* as the MT says. The general picture seems to favor the former. R.L.H.]

mūṭṭā. *Stretching, spreading out* (of wings). Used only in Isa 8:8 for the invading Assyrian army "stretching out" its wings over the entire land of Judah.

mūṭṭeh. *That which is warped, bent, perverted.* Used only in Ezk 9:9 of the perverseness (i.e. injustice) of the city of Jerusalem.

1353 נָטַל (*nāṭal*) *lift, bear* (e.g. Lam 3:18; Isa 40:15).

Derivatives

1353a נָטַל (*nēṭel*) *burden, weight* (of sand, Prov 27:3).

1353b נָטִיל (*nāṭil*) *laden* (Zeph 1:11, only).

1354 נָטַע (*nāṭa'*) *plant, fasten, fix, establish.* ASV and RSV similar except RSV also uses "stretch out" (Isa 51:16); "replant" (Ezk 36:36); and "pitch" (tents) (Dan 11:45).

Derivatives

1354a נָטַע (*neṭa'*) *plant, planting* (e.g. Job 14:6; Isa 5:7).

1354b נָטִיא' (*nāṭia'*) *plant* (Ps 144:12, only).

1354c נָטַע (*maṭṭā'*) *planting, plantation* (e.g. Ezk 34:29; Isa 60:21).

The root *nāṭa'* is used some seventy times. Most of the references occur in the prophets, Isaiah and Jeremiah accounting for about thirty of them. The root is also found in Ugaritic literature. In ancient Israel where farming was widely practiced, it is not surprising that the Bible mentions about one hundred different varieties of plants, most of which were economically vital to that agrarian society. Because the act of planting was such a familiar scene, about thirty times the OT authors use the root *nāṭa'* figuratively.

Vines and vineyards are most frequently mentioned as being planted (Gen 9:20; Deut 20:6; 28:30, 39; Ps 107:37; Prov 31:16; Eccl 2:4; Isa 37:30; 65:21; Jer 31:5; Ezk 28:26; Amos 5:11; 9:14; Mic 1:6; Zeph 1:13). Many of these passages also emphasize the result of planting, that of eating, enjoying the fruit, or drinking the wine. Other objects of *nāṭa'* include trees (Lev 19:23; Deut 16:21), fruit trees (Eccl 2:5), olive trees (Deut 6:11; Josh 24:13), the tamarisk tree (Gen 21:33) the cedar (Isa 44:14; cf. Ezk 31:4), and gardens (Jer 29:5, 28). Many of these references, and others below, are included in contexts which also mention the construction of houses or cities, thus tying agriculture to Israel's domestic life.

The verb *nāṭa'* and its derivatives are often used metaphorically of Yahweh, the one great Planter (cf. the participle *nōṭēa'* in Jer 11:17) in Israel. One of the first anthropomorphic expressions in the OT is in Gen 2:8; "And the LORD God planted a garden in Eden." He is also pictured planting aloes (Num 24:6) and cedars of Lebanon (Ps 104:16).

God brought a vine, his people, out of Egypt (cf. Ex 15:17) and planted it (Ps 80:8 [H 9]) with his own hand (Ps 80:15 [H 16]); cf. Ps 44:2 [H 3] among choice vines (Isa 5:2). Indeed, they were "his pleasant planting" (Isa 5:7). Yet with all this care, God's vine became a wild vine (Jer 2:21). He longed once again to call them "the shoot of my planting" (Isa 60:21) for they were meant to be the "planting of the LORD" (Isa 61:3). Before this could be, however, God told Israel that they must first be uprooted and exiled from their land: "Thus says the LORD: 'What I have planted I am plucking up, that is, the whole land'" (Jer 45:4; cf. 24:6). But this would not be a permanent transplant, for God specified in his covenant with David, "I will appoint a place for my people Israel, and will plant them, that they may dwell in their own place, and be disturbed no more" (II Sam 7:10; I Chr 17:9). Later, God's last word through Amos reiterated the promise: "I will plant them upon their land, and they shall never again be plucked up out of the land which I have given them" (Amos 9:15; cf. Jer 31:28; 32:41).

God not only "plants" (*nāṭa'*) Israel but he also "plants" or establishes the nations (Jer 1:10; 18:9), the wicked (Jer 12:2), the heavens (Isa 51:16), the ear (Ps 94:9), and reestablishes the wasteland (Ezk 36:36).

Other figurative uses of *nāṭa'* include "pitching" tents (Dan 11:45) and "driving" nails (Eccl 12:11). The Psalmist prays God's blessing upon his people by saying, "May our sons in their youth be like plants full grown" (Ps 144:12).

Koheleth uses the figure of planting to illustrate the fact there is a time for everything, "a time to be born, and a time to die; a time to plant, and a time to pluck up what is planted" (Eccl

1355 נָטַף (*nāṭap*)

3:2). This Scripture was read at the funeral of President John F. Kennedy.

M.R.W.

1355 נָטַף (*nāṭap*) *drop, drip, distil, prophesy, preach.*

Derivatives

1355a נָטַף (*nāṭap*) *I, drop* (Job 36:27, only).

1355b נָטַף (*nāṭap*) *II, drops of stacte, a gum resin of a shrub used in incense* (Ex 30:34, only).

1355c נָטַף (*nēṭipā*) *drop, i.e. pendant.*

The verbal root *nāṭap* occurs eighteen times. It is found almost exclusively in the poetical sections of the OT. In two early pieces of Hebrew poetry (Jud 5; Ps 68), *nāṭap* is used three times of the clouds or heavens dropping water. In the Song of Deborah, rain pours down and the earth quakes as Yahweh, in a mighty theophany, appears marching across the land, "LORD, when thou didst go forth from Seir, when thou didst march from the region of Edom, the earth trembled, and the heavens dropped, yea the clouds dropped water" (Jud 5:4). Yahweh, not Baal, is the real "Rider of the Clouds" (cf. Ps 68:4 [H 5]). It is he who causes rain to drop on the parched desert (cf. Ps 68:8 [H 9]) and who alone is worthy of Israel's song of praise.

The prophets describe future earthly blessings to be bestowed upon the people of God, restored to their land. It will be a time when "the mountains shall drip sweet wine" (Joel 3:18 [H 4:18]; Amos 9:13).

The Wisdom Literature of the OT uses *nāṭap* five times. Job pictures men who waited for his words of counsel which "dropped" upon them as rain (Job 29:21-23). In Song of Solomon, the bride's lips "drop sweetness like the honeycomb" (NEB, Song 4:11), while her lover's lips "are lilies, distilling liquid myrrh" (5:13). Her hands are also said to have "dripped with myrrh" (5:5). According to Prov 5:3, "the lips of a strange (i.e. loose or adulterous) woman drip honey," an apparent reference to either kisses or seductive speech.

In prophetic literature *nāṭap* is sometimes used of the one who speaks God's word to the people. The idea of "prophesy" (RSV "preach") is conveyed by the Hiphil stem meaning literally to "cause (words) to drop, drip, flow." Hence, in Mic 2:11, the participle *maṭṭip* (AV "prophet," RSV "preacher") stands as a synonym for *nābi*, the general term for prophet. *nāṭap* is found four other times in Micah 2 in the sense of "prophesy" or "preach" (vv. 6, 11). In this context, however, the verb seems to carry a nuance of

contempt for Micah and his fellow prophets, implying the idea of "rant" (cf. NEB) or "prate." In Amos 7:16 *nāṭap* is placed parallel with the verb *nābā'*, and, as in the passages from Micah above, appears to connote the idea that a prophet is merely one who "goes drivelling on" (cf. NEB) against God's people. On two occasions Ezekiel is addressed by the Lord and told to "drop" (RSV, "preach") his message against the south (20:46 [H 21:2]) and against the sanctuaries (21:2 [H 7]).

In what seems to be a derivative of *nāṭap*, Job 36:27 uses the root for a drop of water.

nēṭipā. Pendant. This noun is used of drop-shaped earrings (cf. *naṭṭafat*, an Arabic word for earring) in Jud 8:26 and Isa 3:19. In modern Hebrew, the word *nāṭēp* is used of grapes hanging down from a cluster.

M.R.W.

1356 נָטַר (*nāṭar*) *keep, keep guard, reserve, maintain.* (RSV has "be angry" in Jer 3:5, 12 and "keep his anger" in Ps 103:9; ASV uses "retain" in Jer 3:5.)

Derivative

1356a מַטָּרָה (*maṭṭārā*) מַטָּרָה (*maṭṭārā*) *target.*

The root *nāṭar* is often used in farming contexts of those who keep or guard vineyards (Song 1:6; 8:11-12; cf. Isa 5:1-7 for a description of caring for a vineyard). It is also used in the sense of keeping one's anger or wrath. The Lord "keeps wrath for his enemies" (Nah 1:2), yet he promises not to keep anger forever (Ps 103:9; Jer 3:5, 12; cf. Amos 1:11). In Lev 19:18, a verse which Jesus considered to be at the heart of the OT law (cf. Mt 19:19; Mk 12:31), Israel is commanded, "You shall not... bear any grudge (*nāṭar*) toward the children of your people, but you shall love your neighbor as yourself."

maṭṭārā, maṭṭārā'. Target, mark, prison guard. This derivative sometimes means "target" or "mark." Job, in his suffering, alleges figuratively that God set him up as his "target" (Job 16:12). The writer of Lamentations complains in a similar vein by saying that God "bent his bow and set me as a mark (*maṭṭārā*) for his bow" (Lam 3:12). In I Sam 20:20 Jonathan says, "I will shoot three arrows to the side of it, as though I shot at a mark" (*maṭṭārā*).

In Jeremiah's prophecy, *maṭṭārā* is frequently used in the expression "court of the prison/guard." Located inside the palace grounds of

Zedekiah (Jer 32:2), the guard's courtyard was apparently an open area which served as a temporary stockade for confining prisoners during the Babylonian attack of Jerusalem (Jer 38:28; 39:14). Shut up in the court of the guard, Jeremiah was given the freedom to receive visitors (32:8) and settle a legal matter of family business (32:12). In the courtyard he received prophetic messages (33:1; 39:15), was given a daily food allotment (37:21), and was placed in a miry cistern (38:6). *maṭṭārā* also occurs in Neh 3:25 and 12:39. Interestingly, imprisonment is not a penalty used in the Pentateuchal legislation. They had no prisons in the wilderness.

M.R.W.

- 1357 נָטַשׁ (nāṭash) *forsake, cast off, cast away, reject, leave, permit, spread out, spread abroad.* (Other renderings: ASV *suffer, join, be loosed*; RSV *cease, abandon, quit, hang loose, cast down, make a raid*; ASV and RSV *lie fallow, let fall, forgo, draw.*)

Derivative

- 1357a נְטִישָׁה (nēṭishā) *tendrils of a vine (as spread out).*

There are forty occurrences of *nāṭash* in the OT. About half of these uses carry the idea of forsake or reject; elsewhere, *nāṭash* frequently means leave, let alone or spread, extend. Only in Gen 31:28 does it mean permit (allow).

Often *nāṭash* is used of God forsaking or casting off his people (Jud 6:13; I Sam 12:22; I Kgs 8:57; II Kgs 21:14; Ps 94:14; Isa 2:6; Jer 7:29; 12:7; 23:33, 39). On the other hand, God (Deut 32:15; Jer 15:6), David (Ps 27:9) or Egypt (Ezk 29:5) may be the object of *nāṭash*. The term is also used of forsaking the tabernacle at Shiloh (Ps 78:60) and of rejecting the teaching of one's mother (Prov 1:8, 6:20).

A person may leave (*nāṭash*) land by letting it lie fallow (Ex 23:11) or forgo the harvesting of crops (Neh 10:31(32)). Animals (asses or sheep) may be left alone in the sense of ceasing to care for them (I Sam 10:2; 17:20, 28). Food may be left, i.e., "dropped off" (I Sam 17:22) or a tree cut down and left behind (Ezk 31:12). This nuance of dropping, falling, or casting down is used of the nations Egypt and Israel (Ezk 32:4; Amos 5:2), of quails (Num 11:31) and in the sense of dropping a dispute (Prov 17:14).

The meaning of extend, spread out is used in the context of warriors in battle (Jud 15:9; I Sam 4:2; 30:16; II Sam 5:18, 22); also of an extended, i.e. drawn sword (Isa 21:15) and of the spreading of the shoots of a vine (Isa 16:8).

- נִי (nī). See no. 1311c.

- 1358 נִיא (ny'). Assumed root of the following.
1358a נָא (nā') *raw* (of flesh, Ex 12:9, only).

- נִיב (nīb). See no. 1318b.
נִיד (nīd). See no. 1319b.
נִידָה (nīdā). See no. 1302b.
נִיחָה (nīḥōah). See no. 1323c.
נִיו (nīn). See no. 1326a.

- 1359 נִסָּן (nīsān) *Nisan, first month* (Neh 2:1; Est 3:7). For other months, see *ḥōdesh*, no. 613b.

- נִישׁוֹס (nīṣōs). See no. 1405a.

- 1360 נִיר (nir) *I, break up, freshly plow* (Hos 10:12; Jer 4:3).

Derivative

- 1360a נִיר (nir) *the tillable, untilled or fallow ground* (Hos 10:12; Jer 4:3; Prov 13:23).

- 1361 נִיר (nir) II. Assumed root of the following.

- 1361a מְנִיר (mānōr) *beam carrying the heddles in a loom* (e.g. II Sam 21:19=I Chr 20:5). Used in simile of a heavy spear.

- נִיר (nir). See no. 1333b.

- 1362 נָכָה* (nākā') *strike, scourge.* Occurs only once, in the Niphal (Job 30:8).

Derivatives

- 1362a נָכָה (nākā') *stricken* (Isa 16:7, only).
1362b נָכָה (nākē') *stricken* (Prov 15:13; 17:22; 18:14).
1362c נִכְאָת (nēkō't) *a spice* (Gen 37:25; 43:11).

- נִכְאָת (nēkō't). See no. 1362c.

- 1363 נָכַד (nkd). Assumed root of the following.

- 1363a נָכַד (nekēd) *progeny, posterity* (Gen 21:23; Isa 14:22).

- 1364 נָכָה* (nākā) *smite, strike, hit, beat, slay, kill.* Not used in the Qal stem; chiefly used in the Hiphil.

Derivatives

- 1364a נָכָה (nākēh) *stricken* (II Sam 4:4; 9:3; Isa 66:2).
1364b נָכָה (nēkeh) *stricken* (Ps 35:15).
1364c נִכּוֹן (nākōn) *blow* (Job 12:5, only).

1364d נָקָה (*makkā*) *blow, sound, slaughter.*

The root is used about five hundred times. But one must not hastily infer that since *nākā* is such a common OT root, society as a whole was saturated with war and violence. That warfare and bloodshed did occur, sometimes with great frequency, must not be denied. Yet, the wide variety of ways in which the verb "to smite" is used throughout the OT is fitting evidence to warrant a somewhat different conclusion.

The verb *nākā* is often used for "hitting" or "smiting" an object with one, non-fatal strike. A man may "smite" an animal such as an ass (Num 22:23, 25, 27). He may "hit" a person on the cheek (Ps 3:7 [H 8]; Lam 3:30) or in the eye (Ex 21:26). Exodus records that Moses' rod "struck" the river (Ex 7:17), the dust (Ex 8:16 [H 12], 17 [H 13]), and a rock (Ex 17:6). One may be the target of a flying object such as a stone from a sling (I Sam 17:49), an arrow (I Kgs 22:34), or a spear (I Sam 19:10; cf. 26:8). The root *nākā* may also refer to being "smitten in conscience" (cf. David, when he cut off Saul's skirt, I Sam 24:5 [H 6]), and to the "clapping" of hands before a king (II Kgs 11:12).

nākā is also found in passages which describe the beating of some object. A man may receive a "beating" by another in a fight (Ex 2:11, 13; Deut 25:11). Nehemiah "beat" some of the Jews for marrying foreign women (Neh 13:25). In Song of Solomon, the bride, searching for her lover through the streets of the city, is beaten by the watchmen (Song 5:7). The OT law apparently allowed scourging for certain offenses (Deut 25:2-3; cf. II Cor 11:24). Jeremiah the prophet, however, was beaten by authorities although he was innocent (Jer 20:2; 37:15). So also was the Suffering Servant who gave his "back to the smiters" (Isa 50:6; cf. Mt. 26:67). Proverbs notes the importance of beating for the sake of acquiring wisdom and discipline (Prov 19:25; 23:13-14). The idea of "beating repetitiously" is likewise seen in the plague of hail in Egypt which "struck down" everything in the open (Ex 9:25).

In a large number of passages *nākā* means to "slay," "kill," "strike dead" (cf. AV "slay," some ninety times). It is used of murdering another man (Ex 21:12; Josh 10:26 et al.) whether intentionally (II Sam 2:23) or unintentionally (Deut 19:4); of a man killing a lion (I Sam 17:35); of a lion killing a man (I Kgs 20:36); and of a worm attacking a plant so as to kill it (Jon 4:7).

Another large group of passages uses the root in the sense of "attack" and/or "destroy," the object being a group of people (Gen 32:8 [H 9], 11 [H 12]; Josh 8:21), a house (Amos 3:15), and a city (Josh 10:28 et al.).

This usage bears on the large numbers said to

be "smitten" (*nākā*) or fallen (*nāpal*) or wounded (*hālal*) in battle. Thus when in Gideon's battle 120,000 men "fell" (Jud 7:10), it may only mean that they were killed, wounded, or missing in action; 15,000 only were left as a fighting force. So also in the war of Abijah against Jeroboam, "They smote (*nākā*) them with a great smiting (*makkā*) and there fell (*nāpal*) wounded (*hālal*) 500,000." (Cf. R. L. Harris, *Man—God's Eternal Creation*, Moody, 1971, pp. 155-56).

Of particular theological importance is the fact that God is often the subject of *nākā*. It is God who "smites" people with blindness (II Kgs 6:18) and plagues (Deut 28:22, 27-28, 35). He brings judgment upon man for his sin (I Kgs 14:15; Lev 26:24), even death (II Sam 6:7). Likewise, nature is under God's control for he, not Baal, "smote" Israel's vines and fig trees (Ps 105:33).

makkā. *Blow, wound, plague, slaughter, defeat* (RSV also has affliction (Deut 28:59, 61; 29:22 [H 21]), sickness (Deut 28:59), and disaster (Jer 19:8; 49:17). Of the forty-eight occurrences of *makkā* in the OT, two-thirds of them are translated in the LXX by the term *plēgē* (πληγή), from which the English term "plague" is derived.

The word is used with four main nuances of meaning. First, it is used literally of a "blow" or "stroke" received in a beating or whipping (Deut 25:3; Prov 20:30). According to OT law, the number of strokes received in formal punishment was limited to forty (Deut 25:3). The synagogue, however, eventually reduced this to thirty-nine strokes (cf. II Cor 11:24), thirteen across the breast and twenty-six across the back (cf. TDNT, IV, p. 516). The same idea of "scourging" is used figuratively of the Lord of hosts who "smote Midian" (cf. Isa 10:26).

Secondly, *makkā*, in certain contexts, is translated "wound." It is so used of King Ahab's death. When the king was fatally struck by an arrow, the Hebrew historian graphically states, "the blood ran out of the wound into the midst of the chariot" (I Kgs 22:35; cf. the wounds from God's arrows in Ps 64:7 [H 8]). Another king, Joram, received battle "wounds" from the Syrians (II Kgs 8:29; 9:15; II Chr 22:6). The prophets often use "wound" symbolically, describing that condition of God's people usually brought about by the "blow" of an enemy due to her sin (Jer 30:14; cf. Isa 1:5-6). Although her wound is "grievous" (Jer 10:19; 14:17; 30:12; cf. Assyria in Nah 3:19), even "incurable" (Jer 15:18; Mic 1:9), God will bring healing in his time (Isa 30:26; Jer 30:17).

makkā may also be rendered "plague" or "affliction." In OT times, plagues seem to have been a kind of epidemic disease often sent as punishment for sin. Once the Hebrew people left Egypt, God demanded obedience of them.

Should they disobey, God solemnly warned, "I will bring more plagues upon you, sevenfold as many as your sins" (Lev 26:21). A "very great plague" (*makkā*) occurred in the wilderness as the people were gluttonously eating the quails (Num 11:33). This plague may have been a severe stomach disorder. On the plains of Moab, just prior to the Conquest, God's people are again threatened with afflictions, "severe and lasting," if they fail to observe the law and revere God's name (Deut 28:59, 61). Several generations after the Exodus, the Philistines were yet impressed with the reputation of the God of the Hebrews who "smote the Egyptians with every sort of plague in the wilderness" (I Sam 4:8).

Lastly, *makkā* is used in the sense of "defeat," as when an army or people is smitten by "slaughter" (I Sam 4:10; 14:30). Frequently the verb *nākā* "to smite" is combined in a cognate construction with *makkā*, resulting in the expression, "to make/smite with a very great" or "great slaughter" (cf. Josh 10:10, 20; Jud 11:33; 15:8; I Sam 6:19; 19:8; 23:5; I Kgs 20:21 et al.).

Bibliography: IDB, III, pp. 821–22. Harris, R. L., *Man—God's Eternal Creation*, Moody, 1971, pp. 155–56. TDNT, IV, pp. 515–19.

M.R.W.

נָכוֹן (*nākōn*). See no. 1364c.

1365 נָכַח (*nkḥ*). Assumed root of the following.

1365a נָכוֹחַ (*nākōaḥ*) נָכַח (*nōkaḥ*) both appear to be derivatives of the root *nkḥ* meaning "be in front of" (so BDB).

The word *nākōaḥ* occurs eight times. It is used mainly as an adjective (straight, right, plain) and as a noun (what is straight, right, upright). Most of the examples cited below illustrate that *nākōaḥ* primarily stresses the ethical quality of life in actions involving both personal and national morality.

nākōaḥ is used adverbially in one instance (Isa 57:2) meaning "straight forwardly." In this context, the righteous man dies in peace (*shālôm*), for he has walked a straight path through life. Several passages employ *nākōaḥ* adjectivally. In II Sam 15:3 it stands beside the word "good" in reference to a legal case. Another occurrence (Prov 8:9) states that words of wisdom "are all straight to him who understands"; they are not "twisted or crooked" (cf. v. 8). To give a "right" answer in a legal matter is to give an honest or straightforward reply (Prov 24:26).

Other verses treat *nākōaḥ* as a noun. In Isa 30:10, the word is used of the "true" things revealed by God to his prophets in contrast to the illusions of other so-called prophets. The term "land of uprightness" (*'ereṣ nēkōhôt*) charac-

terizes a place where the wicked man "deals perversely" (Isa 26:10). The term is used in Isa 59:14 as a synonym for "justice," "righteousness," and "truth." Amos, the prophet of social justice, lashes out at the unethical practices of those in Samaria by saying, "They do not know how to do right" (3:10). *nōkaḥ* is used about twenty times, normally in prepositional or adverbial phrases. It means "in front of, opposite," and is variously rendered "over against," "before," "facing," et al.

1366 נָכַל (*nākal*) *be crafty, deceitful, knavish* (e.g. Mal 1:14; Num 25:18).

Derivatives

1366a נָכַל (*nēkel*) *wiliness, craft* (Num 25:18, only).

1366b כָּלַי (*kēlay*), כָּלִי (*kēlay*) *knave* (Isa 32:5, only), with *nun* elided.

1367 נֶכֶס (*nekes*) *riches* (e.g. Josh 22:8; Eccl 6:2).

1368 *נָכַר (*nākar*) *recognize, acknowledge, know, respect, discern* (not in the Qal).

Derivatives

1368a נָכַר (*neker*) *misfortune, calamity* (Job 31:3).

1368b נֶכָרָה (*nēkārah*) *that which is foreign.*

1368c נֶכְרִי (*nokri*) *foreign, strange.*

1368d נֶכָרָה (*nākar*) *treat as foreign.* Demonstrative verb.

1368e הִנְכַּרָה (*hakkārā*) *look* (or expression?). Occurs only in Isa 3:9.

1368f מַכָּר (*makkār*) *acquaintance, friend* (II Kgs 12:6, 8).

The root *nkr* carries several different meanings. (BDB divides it into two verbs. KB treats as one, as we do here.) First, it conveys the idea to "inspect" or "look over" something with the intention of recognizing it. Jacob invited Laban to "point out" (i.e. visually distinguish) his own possessions from those of Jacob (Gen 31:32). Likewise, personal items such as Joseph's robe (Gen 37:32) and Judah's signet, cord, and staff (Gen 38:25) are inspected with a view to identifying the owner of each.

The verb also means to "pay attention to" or "take notice of" (someone). Ruth is surprised that Boaz "took notice" (*nkr*) of her when she was a foreigner (*nokriyā*; Ruth 2:10, 19; cf. II Sam 3:36). In a number of passages *nkr* carries the nuance of regarding someone with favor or for good. Such is God's regard for the exiles of Judah (Jer 24:5). The potential danger in "showing attention" to someone is that partiality may

result. Proverbs 28:21 states, "To show partiality is not good." Hence judges are solemnly warned not to be partial (*nkr*) in their judging (Deut 1:17; 16:19; Prov 24:23).

A third use of *nkr* is in the sense of "to recognize" an object (which one formerly knew). A man might observe another person and "recognize" him (cf. I Kgs 18:7; 20:41), sometimes only by the tone of voice (I Sam 26:17). Jacob "recognized" the blood-dipped robe as belonging to his son Joseph (Gen 37:33). Judah "recognized" (i.e. acknowledged) his own signet, cord and staff which resulted in his incrimination (Gen 38:26). On the other hand, a person may fail to "recognize" someone because of darkness (Ruth 3:14). Job's comforters at first failed to "recognize" him because of his personal dishevelment (Job 2:12). The aged Isaac did not "recognize" Jacob because of the hairy animal skins on his hands (Gen 27:23). It should especially be noted that in Gen 42:7, *nkr* occurs with two opposite meanings: Joseph "knew" (*nkr*), i.e. "recognized" his brothers, but "he treated them like strangers" (Hithpael of *nkr*), i.e. "he kept his identity from them" (see *nkr* II).

The root *nkr* is further used in the sense of "to acknowledge" (with honor or recognition). A father must "acknowledge" the firstborn son by giving him a double portion (Deut 21:17). Levi failed to "acknowledge," i.e. "he disowned" his brothers (Deut 33:9). Prophetically, Daniel says of Antiochus, "Those who acknowledge him he shall magnify with honor" (Dan 11:39). Concerning Israel, Isaiah writes, "all who see them shall acknowledge them, that they are a people whom the LORD has blessed" (Isa 61:9).

In several passages *nkr* carries the idea of "to distinguish" or "to understand." When the people saw the foundation of the postexilic temple being laid, they could not "distinguish" the sound of joyful shouting from the sound of weeping (Ezra 3:13). An apparition appeared to Eliphaz in a vision but he could not "distinguish," i.e. "discern" its appearance (Job 4:16).

It is significant that *nkr* is not used in the OT as a euphemism for the act of sexual intercourse as the root, *yāda'* (q.v.) is often used. In Ugaritic, however, *nkr* is used in the sense of "to know sexually." One text reads, "The newlywed burned to lie again with his wife, to know (his) beloved" (Keret IV. 28; I ii 49; cf. G. R. Driver, *Canaanite Myths and Legends*, pp. 31, 33, 156).

nēkār. *That which is foreign.* This derivative is usually rendered "strange" or "stranger" in the KJV, but "foreign" or "foreigner" in the RSV. It is used of a "foreign god" (Deut 32:12; Ps 81:9 [H 10]; Mal 2:11 et al.), of "foreign altars" (II Chr 14:3 [H 2]), a "foreign country" (Ps 137:4), and "everything foreign" (Neh 13:30). Of fre-

quent occurrence is the nominal *ben* (*han-*) *nēkār* "foreigner" (Gen 17:12, 27; Ex 12:43 et al.), and *bēnē* (*han-*) *nēkār* "foreigners" (II Sam 22:45-46; Isa 56:6; 60:10).

nokri. *Foreign, strange, alien;* often as a noun, "foreigner," "stranger." This term occurs over forty times and has a variety of uses. The LXX mainly employs ἀλλότριος for *nokri*. Like *nēkār* above, *nokri* is normally translated "strange" or "stranger" in the AV, but "foreign" or "foreigner" in the RSV. A non-Israelite is a "foreigner" (Jud 19:12; I Kgs 8:41 et al.). The term applies to a "foreign land" (Ex 2:22; 18:3) and "foreign (non-Israelite) women" (I Kgs 11:1, 8 et al.). In the book of Proverbs, "foreign (or strange) woman" (*nokriyā*) becomes a technical expression for a prostitute or adulteress (Prov 2:16; 5:20; 6:24 et al.). Sometimes *nokri* carries the idea of "unknown," "unfamiliar" (Job 19:15; Ps 69:8 [H 9]), or even "odd" or "surprising" (Isa 28:21). In modern Hebrew, *nokri* may stand for "gentile."

nākar. *Act or treat as strange, foreign, new; misconstrue, disguise, make unrecognizable.* Although BDB (pp. 648-49) lists this as a denominative verb under *nkr* II, this root is probably not to be distinguished from *nkr* I, "recognize, know." It is likely, as KB (p. 617) posits, that the original meaning of "be strange, new, conspicuous" developed to "be remarked, known."

In several passages *nkr* carries the idea of shielding one's true identity from another. In Egypt, Joseph "acted as a stranger" to his brothers, pretending not to know them (Gen 42:7). Jeroboam's wife disguised herself, concealing her identity to Ahijah the prophet, thus "she pretended to be another woman" (I Kgs 14:5-6, RSV). Proverbs 26:24 says, "A man filled with hate disguises it in his words" (cf. Scott, *Proverbs*, in AB, p. 158). Here is a different kind of disguise. It comes from the lips as a man speaks things "foreign" to his mind.

The root *nkr* may also be translated "misconstrue, misrepresent, judge amiss" as in Deut 32:27 (RSV), "Had I not feared provocation by the enemy, lest their adversaries should judge amiss."

This verb also may carry the idea of "disfiguring, making unrecognizable, treating (a place) as foreign or profane," a charge which Jeremiah makes of the valley of the son of Hinnom in Jerusalem (Jer 19:4).

נִכְרִי (*nokri*). See no. 1368c.

1369 נֶכֶת (*nēkōt*) *treasure* (II Kgs 20:13; Isa 39:2). Meaning and derivation uncertain.

1370 נָלָה (*nlh*). Assumed root of the following.
1370a נִקְלָה (*minleh*) *gain, acquisition* (Job 15:29, only).

1371 נָמַל (*nml*). Assumed root of the following.
1371a נִקְלָה (*nē mālā*) *ant* (Prov 6:6; 30:35 only).

1372 נָמַר (*nmr*). Assumed root of the following.
1372a נִמְרָה (*nāmēr*) *leopard* (e.g. Hos 13:7; Hab 1:8).

נָם (*nēs*). See no. 1379a.

1373 נָסָה (*nāsā*) *test, try, prove, tempt, assay, put to the proof, put to the test*. (Other renderings infrequently found: ASV *adventure, proveth*; RSV *make a test, attempt, venture, be used to*; ASV and RSV *make trial*.)

Derivative

1373a מַסָּה (*massāh*) *trial, test, proving*. Used also as a place name (Massah) where the "trial" over water happened in the wilderness (cf. Ex 17:1-7).

In most contexts *nāsā* has the idea of testing or proving the quality of someone or something, often through adversity or hardship. The rendering *tempt*, used frequently by the AV and ASV, generally means *prove, test, put to the test*, rather than the current English idea of "entice to do wrong." The verb *nāsā* occurs 36 times in the OT.

In a number of passages *nāsā* means to attempt to do something. It is used of attempting or venturing a word which might offend the hearer (Job 4:2), of venturing to touch one's foot to the ground (Deut 28:56), and of trying to take a nation (Israel) from another nation (Egypt) (Deut 4:34). In other contexts, *nāsā* is used of testing various things such as armor and weapons (I Sam 17:39) and pleasure (Eccl 2:1; cf. 7:23).

The largest number of references, however, deal with situations where a person or a nation is undergoing a trial or difficult time brought about by another. Though man is forbidden to put God to the test (Deut 6:16), the OT records that he did so. The wilderness place of Massah ("trial") becomes a byword in this regard, often combined in a play on words with *nāsā*, "to try" (Ex 17:2, 7; Deut 6:16; 33:8; Ps 95:8, 9; cf. Deut 9:22). Those who put God to the proof in the wilderness would not see Canaan (Num 14:22-23). The hymns of Israel reflect this defiant attitude (see Ps 78:18, 41, 56; 106:14).

On occasion, one man would try or put another man to the test. Thus, the Queen of Sheba tested

Solomon with hard questions (I Kgs 10:1; II Chr 9:1); the chief of the eunuchs tested the appearance of Daniel and his friends after they ate vegetables for ten days (Dan 1:12, 14); false prophets sometimes were the instrument for testing a man's faith (Deut 13:3 [H 4]). Often, however, God is the One responsible for bringing testings and trials upon man. God delivered Israel by sending "great trials" upon the Egyptians (Deut 7:19; 29:3 [H 2]); but he later tested Israel by the Canaanite nations (Jud 2:22; 3:1, 4). Likewise, *nāsā* is used when God tested both Abraham (Gen 22:1) and Hezekiah (II Chr 32:31). Such testing by God, however, was not without intent. It was to refine the character of man that he might walk more closely in God's ways (Ex 16:4; Deut 8:2; Jud 2:22; II Chr 32:31; Ps 26:1-3).

M.R.W.

1374 נָסַח (*nāsah*) *pull or tear away* (e.g. Prov 15:25; Deut 28:63).

Derivative

1374a מִסָּח (*massāh*) *by turns, alternately*. Meaning uncertain.

נָסִיק (*nāsik*). See nos. 1375b, 1377a.

1375 נָסַק (*nāsak*) *I, pour out, pour, offer, cast*.

Derivatives

1375a נִסֶּק (*nēsek*) *drink offering, libation, molten image*.

1375b נָסִיק (*nāsik*) *libation* (Deut 32:38), *molten image* (Dan 11:8).

1375c מַסְקָה (*massēkā*) *libation, drink offering, molten metal, cast image*.

The root *nsk* is mainly used for the "pouring out" of a drink offering or libation, and for the "casting" of metal images. It would appear (cf. BDB) that this root should probably be distinguished from *nāsak* "to weave," and *nāsak* "to set, install." *nāsak* "to pour out" occurs about twenty times.

nāsak is primarily used in connection with the OT drink offering or libation. (Correspondingly the word "libation" comes from the Latin term *libare* "pour out a drink offering.") The drink offering was originally established in the covenant community as an appropriate form of worship, although it might also be perverted through the influence of heathen cultic ritual.

Before Israel settled in her land, the Canaanites were accustomed to pour out drink offerings to their gods. Pagan fertility religion thought of deities as resembling men in their need of both food and drink. The Ugaritic root *nsk* is well attested in Canaanite literature (see G. R. Driver, *Canaanite Myths and Legends*, p. 157). Thus on

one occasion, Baal, the Canaanite god of fertility and nature, commands, "Pour a peace-offering in the heart of the earth, honey from a pot in the heart of the fields" (Baal v. iii. 31-32; in Driver, p. 87). The influence of these pagan libations upon the purity of Israelite worship was met head on by the prophets. They sternly rebuked Israel's corrupt practice of pouring out drink offerings to idols (Isa 57:6; cf. 65:11; Ezk 20:28). Just before the fall of the Southern Kingdom, God warned through Jeremiah, "drink offerings (*nēsek*) have been poured out to other gods, to provoke me to anger" (Jer 32:29; cf. 7:18 and 19:13). Even after captivity, the Jewish refugees in Egypt continued to follow their old heathen practices, countering Jeremiah's rebuke by insisting, "But we will do everything that we have vowed, burning incense to the queen of heaven and pouring out libations to her as we did . . . in the cities of Judah and in the streets of Jerusalem" (Jer 44:17; cf. 44:18-19, 25).

Jacob was the first to be referred to as presenting a drink offering (cf. Gen 35:14). But it was not until after the Exodus from Egypt that the laws governing the *nēsek* were established. As a rule, a drink offering was to be presented along with burnt offerings and cereal offerings (Ex 29:40; Lev 23:13; Num 15:1-10). The amount of wine was specified at one-fourth hin for each lamb (Num 15:5), one-third hin for each ram (15:6-7) and one-half hin for each bull (15:8-10). Although King Ahaz built a new altar according to a pagan design, he seems to have conformed to pentateuchal legislation by pouring out his drink offering at the time he offered his burnt offering and cereal offering (II Kgs 16:10-16).

Daily, at the time of the morning and evening burnt offering, a drink offering was to be poured out to the Lord (Num 28:7-8). A similar practice was to be observed at each of the following feasts: Sabbath (Num 28:9), New Moon (Num 28:14), Unleavened Bread (Num 28:24), First Fruits (Lev 23:13; Num 28:31), Trumpets (Num 29:6), Day of Atonement (Num 29:11), and Tabernacles (Num 29:12-39). In addition, the *nēsek* was a part of the religious ceremony which ended the vow of the Nazirite (Num 6:15, 17). The intertestamental work, *Ecclesiasticus*, has left us a description of the conclusion of the daily temple ritual of the high priest: "He held out his hand for the libation cup and poured out the blood of the grape, poured its fragrance at the foot (*themelias*—base) of the altar to the Most High, the King of all" (Sir 50:15, NEB). But some verses suggest that the libation was poured out on the altar, presumably over the sacrifice (cf. Gen 35:14—on the pillar; Ex 30:9 not on the altar of incense).

The liquid normally used for a "drink offering" was wine (*yayin*, Ex 29:40; Num 15:5, 7, 10 et

al.), or other fermented drink (*shēkar* Num 28:7). On at least one occasion water was "poured out to the Lord" (II Sam 23:16; I Chr 11:18). The phrase "ten thousands of rivers of oil" (Mic 6:7), coming in a context of priestly ritualism and burnt offerings, may also suggest the occasional use of oil for the *nēsek*. "Libations of blood" (Ps 16:4) were a heathen practice, nowhere condoned in the OT.

During the time of Jesus, in accord with OT law, the weeklong Feast of Tabernacles included a daily drink offering (cf. Num 29:12 ff.). A priest would fill a golden pitcher at the pool of Siloam, walk in solemn priestly procession to the temple, and there pour out the water at the altar (cf. W. Hendriksen, *NT Commentary: Gospel According to John*, II, pp. 21-26). It was in this context that Jesus proclaimed on the last day of the feast, "If any one thirst, let him come to me and drink" (Jn 7:37).

In the NT, Paul employs the OT imagery of the "drink offering" in using the term *spendomai* (Phil 2:17; II Tim 4:6). In both passages, Paul, writing while imprisoned, literally states, "I am being poured out (as a drink offering)" for the sake of Christ. Just as the drink offering was "poured out" at the altar, so the apostle is prepared joyfully to "pour out" sacrificially his own blood in martyrdom.

The second (and far less frequent) use of the root *nāsak* is to "pour out" or "cast" molten images. Whereas the derivative *nēsek* is translated "drink offering" almost exclusively (c. 60 times), the derivative *massēkâ* normally carries the meaning "molten image" (c. 25 times). Such images were cast by pouring molten metal into a mold or over a frame (Isa 40:18-20). Images were cast of gold (Isa 30:22), the most noteworthy examples being Aaron's molten calf (Ex 32:4, 8) and Jeroboam's molten calves set up at Dan and Bethel (I Kgs 14:9). Other images were of silver (cf. Ugaritic *nsk ksp*, "silversmiths" UT 19:1253), bronze, and iron. The worship of images cast of metal is roundly denounced in both the law (Ex 34:17; Lev 19:4; Deut 27:15) and the prophets (Isa 41:29; 42:17; 44:10; Jer 10:14; 51:17; Hos 13:2; Hab 2:18).

1376 נָסַק (nāsak) II, weave (Isa 25:7; 30:1).

Derivative

1376a מְסֻקָּה (*massēkâ*) woven stuff, web (Isa 25:7; 28:20; 30:1).

1376b מַסְכֶּת (*masseket*) *web of unfinished stuff, on loom* (Jud 16:13–14).

1377 נָסָא (*nāsak*) *III, set, install* (Ps 2:6; Prov 8:23).

Derivative

1377a נָסִיק (*nāsik*) *prince* (e.g. Josh 13:21; Ezk 32:30).

1378 נָסָא (*nāsas*) *I, be sick* (Isa 10:18, only).

1379 *נָסָא (*nāsas*) *II*. Occurs only in the Hithpoel, in Ps 60:6, "that it may be displayed," and in Zech 9:16, "raised," "prominent." Meaning dubious in each occurrence.

Derivative

1379a נִסָּא (*nēs*) *signal pole, standard, ensign, banner, sign, sail*. (ASV and rsv similar except rsv uses warning in Num 26:10.)

In the OT, *nēs* generally means a rallying point or standard which drew people together for some common action or for the communication of important information. This usually happened on a high or conspicuous place within the camp or community. There, a signal pole, sometimes with an ensign attached, could be raised as a point of focus or object of hope. The term occurs twenty-one times. In Ex 17:15, however, in the AV and ASV, *nēs* remains untranslated, occurring in the title, "Jehovah-nissi."

People would rally together around a *nēs* for various purposes, one of the most important being the gathering of troops for war. The prophetic materials particularly emphasize this use of the standard. Isaiah 5:26 pictures God raising a standard among the nations, signaling Assyrian warriors for muster against sinful Israel. The trumpet was often used as a war alarm to summon soldiers around the *nēs*. Jeremiah says, "Set up a standard on the earth, blow the trumpet among the nations for war against her" (51:27; see also 4:21; Isa 18:3). The standard was usually raised on a mountain or other high place (Isa 13:2; 18:3; 30:17). There, public proclamations could be made (Jer 50:2). Soldiers deserting the standard in panic (Isa 31:9) signaled defeat. When a standard was raised toward a city, it was a sign for its residents to "flee for safety" before the attack (cf. Jer 4:6).

On two occasions *nēs* is used in the sense of "sail." In Isa 33:23 (cf. Mishna, *Baba Bathra* 5a) the prophet addressed Zion as a ship, "Your tackle hangs loose; it cannot hold the mast firm in its place, or keep the sail (*nēs*) spread out." In Ezk 27:7, Tyre is pictured as a sturdy ship whose

sail (made of "fine embroidered linen from Egypt") served as its ensign (*nēs*). Possibly the heraldic symbol of the city was actually embroidered on the sail. The *Encyclopedia Judaica* (VI, p. 1335) points out that murals on tombs indicate Jewish ships bore emblems. In addition, the Targum speaks of colorful flags made of silk.

The word *nēs* is also used in the prophets in connection with the return to Zion. An ensign is to be raised over the nations (Isa 62:10) and they will bring the sons and daughters of Zion back to her (Isa 49:22).

It is not surprising that Isaiah, the Christological prophet *par excellence*, personifies *nēs*. He says "in that day the root of Jesse shall stand as an ensign to the peoples; him shall the nations seek" (11:10; cf. 11:12). So Israel's messianic king will be lifted up (cf. Jn 3:14; Phil 2:9) that all men might rally around him.

The Pentateuch employs *nēs* four times. When the Amalekites were defeated (Ex 17:15), Moses built an altar to commemorate the victory. Realizing that the Lord was the Banner around which Israel had rallied, he called the altar "Jehovah nissi" (the LORD is my banner). Later on in the wilderness, Moses lifted up among the people a bronze serpent set upon a pole (*nēs*) (Num 21:8–9). This rallying point of healing and life became a fitting object-lesson of something greater to some (cf. Jn 3:14–15). *nēs* is also employed in Numbers in the sense of "sign" or "warning" (26:10).

M.R.W.

1380 נָסָא' (*nāsa'*) *I*, chiefly used in the Qal stem, translated *pull out, remove, set out, set forward, depart, journey*. (ASV often prefers journey; rsv also uses pluck up, move, migrate.)

Derivatives

1380a מַסָּא (*massa'*) *pulling up, breaking camp*.

1380b מַסָּא (*massā'*) *breaking out, quarrying* (of stones).

The root meaning "to pull out tent-pegs," i.e. to break camp (cf. Isa 33:20; also note Jud 16:3 where Samson "pulls up" two gateposts from the ground), gave rise to the derived meaning of "to set out," or "journey"—the usual meaning of this frequent verb. Ugaritic literature also attests this root (cf. UT 19: no. 1254; AisWUS no. 1803 *herausreisen* "journey forth").

The verb *nāsa'* with its derivatives occurs

about 160 times. More than 80 percent of these occurrences, however, are found in the Pentateuch, with nearly a hundred references in the book of Numbers alone. Considering the nature of the verbal idea, *nāsa'* fits well into the historical life setting of the Hebrews of this early period. Before the conquest, they were a primarily semi-nomadic, itinerant, tentdwelling people. As desert travellers, each morning they pulled up their tent-pegs, folded their tents, and set out with flocks and herds on the next stage of their journey. Thus for the wandering Hebrews, the idea of "pulling up" or "breaking camp" (cf. *massa* in Num 10:2) led to the more common meaning of "setting out" (Num 10:6). In this regard it is of note that Numbers 33 (RSV) renders *nāsa'* "to set out" forty-two times in its list of the various stages of Israel's journey from Egypt to the border of Canaan.

In OT times, "to set out" was normally to journey and go travel somewhere. This then gave rise to such expressions of hendiadys as "take your journey, and go" (Deut 1:7; 2:24). The patriarch Jacob "journeyed" about Canaan (cf. Gen 35:16; 46:1). The Israelites "set out" from Elim, journeying to the wilderness of Sin (Ex 16:1). From Rephidim they "set out" for Sinai (Ex 19:2). Forty years later, "the people set out from their tents, to pass over the Jordan" (Josh 3:14). Occasionally *nāsa'* carries the nuance of "setting out" in the sense of to "go forward" or to "go onward." When Israel fled Egypt and was suddenly halted by the Red Sea, the Lord said to Moses, "Tell the people of Israel to go forward (*nāsa'*)" (Ex 14:15). Later, Israel was instructed to "go onward" (*nāsa'*) only when the cloud was taken up from over the tabernacle (Ex 40:36-37). People are not the only subject of *nāsa'*; other things also are said to "set out" such as the standard of a tribe (Num 10:18, 22, 25), the ark (Num 10:35), the tabernacle (Num 1:51), and the tent of meeting (Num 2:17).

In a number of passages, *nāsa'* means to "depart," "leave," or "go back." It is used of those who have "gone away" to a nearby town (Gen 37:17) and of a king who had "left" one city to fight at another (II Kgs 19:8). Sennacherib "departed," i.e. retreated, from Jerusalem to Nineveh when he saw that his army was miraculously decimated (II Kgs 19:36). Likewise, King Jehoram and his forces "withdrew," i.e. retreated, from attacking Moab and returned to their own land (II Kgs 3:27). The rendering "struck camp" (NEB) for *nāsa'* in this verse seems open to question.

nāsa' is also used in the sense of to "journey by stages." Headed for Sinai, the Israelites "moved on from the wilderness of Sin by stages" (pl. of *massa'*; Ex 17:1). Later they "set out by stages from the wilderness of Sinai" (Num

10:12). Moses recorded the itinerary of Israel's journeys "stage by stage... according to their starting places" (Num 33:1-2). The same nuance of journeying gradually, stopping from place to place, is conveyed by *nāsa'* in Gen 12:9 where Abram, having left Haran, "journeyed on, still going toward the Negeb" (cf. Gen 11:2 where the term "migrate" seems to be an appropriate rendering of *nāsa'*). *nāsa'* is likewise used of shepherds who "wander" from place to place with their flocks (Jer 31:24).

The Hiphil stem of *nāsa'* sometimes means to "cause to set out" or "make start out." It was Moses who "brought Israel from the Red sea" (Ex 15:22; cf. LXX); but it was the Lord who "caused the east wind to blow" (Ps 78:26; cf. Ex 14:21) and who "led forth his people like sheep, and guided them in the wilderness" (Ps 78:52). The Hiphil is also employed with the nuance of to "remove" or "take (something) from its place." A jug is "set aside" when it has been filled (II Kgs 4:4). Hope may be "pulled up," i.e. removed, like a tree (Job 19:10). When stones are quarried, they are "removed from their place" (cf. I Kgs 5:17 [H 31]; Eccl 10:9). Hence the derivative *massā'*, the "breaking (of stones)" or "quarrying" (I Kgs 6:7).

M.R.W.

1381 נָסַע (*ns'*) II. Assumed root of the following.

1381a מַסָּע (*massā'*) missile, dart (Job 41:18, only).

נָסַק (*nāsaq*). A form of *sālaq*, no. 1511.

1382 נִסְרוֹךְ (*nisrōk*) *Nisroch*. The Assyrian god worshiped by Sennacherib.

Nisroch is mentioned twice in Scripture, II Kgs 19:37 and Isa 37:38. These parallel accounts indicate that after Sennacherib withdrew to his own land from Jerusalem he was slain by his sons as he worshiped in the temple of Nisroch his god (also cf. ANET, p. 288).

The precise identity of the name *nisrōk* has long been a problem. It is unknown in ancient Assyro-Babylonian literature. The LXX readings are varied (*Esdrach*, *Esthrach*, *Asrach*) providing little clarification of the matter.

It would appear that *nisrōk* resulted from a scribal corruption of the name of some other deity. The exact location where Sennacherib was slain is not clearly stated, but one possibility is that it may have been the city of Assur, the spelling *nisrōk* being derived from the Assyrian god, Ashur.

More likely, however, Nisroch is a corruption of either the name Marduk or Nusku. Although Marduk was a deity of Babylon, the Nabonidus

inscription says that Sennacherib led "Marduk away and brought (him) into Ashur" (ANET, p. 309). Thus Sennacherib may have been assassinated in a temple of Marduk in his own land.

Nisroch may also be understood as a misspelling of Nusku, the name of the fire god of Babylon found in Assyrian inscriptions (see John Gray, *I & II Kings*, pp. 694, 95); and IDB, III, p. 554.

M.R.W.

נְעֻרוֹת (n'e'ûrôt). See no. 1389e.

נְעֻרִים (n'e'ûrim). See no. 1389d.

נָעִים (nā'im). See nos. 1384b, 1385a.

- 1383 נָעַל (nā'al) *bar, bolt, lock* (e.g. II Sam 13:18; Jud 3:23).

Derivatives

1383a נָעַל (nā'al) *sandal, shoe* (e.g. Gen 14:23; Deut 25:10).

1383b נָעַל (nā'al) *furnish with sandals*. Denominative verb (Ezk 16:10; II Chr 28:15).

1383c מְנַעֵל (man'ûl) *bolt* (Song 5:5; Neh 3:8).

1383d מְנַעֵל (min'āl) *bolt* (Deut 33:25).

- 1384 נָעַם (nā'em) *I, be pleasant, sweet, delightful, beautiful*.

Derivatives

1384a נָעַם (nō'am) *pleasantness, beauty, kindness, favor*.

1384b נָעִים (nā'im) *pleasant, sweet, lovely, agreeable*.

1384c נְעָמָן (nā'āmān) *pleasantness* (Isa 17:10).

1384d מְנַעֲמִים (man'ammim) *delicacies, dainties* (Ps 141:4).

The root with its derivatives is found twenty-eight times in the OT. In Ugaritic literature the root is also well attested, being the normal word for "good." As a noun it is rendered "goodness, charm, loveliness" (see UT 19: no. 1256).

The root is used to describe people such as Saul and Jonathan (II Sam 1:23), David (the "sweet" psalmist of Israel, II Sam 23:1), and his friendship with Jonathan (II Sam 1:26). It is used of the physical beauty of two lovers (Song 1:16; 7:6 [H 7]), of the nation of Egypt (Ezk 32:19), and of Issachar's portion in the land of Canaan (Gen 49:15).

The OT also uses *nā'em* and its derivatives to characterize various concrete terms as, for example, the taste of bread (Prov 9:17), location of ground (Ps 16:6), and music of the lyre (Ps 81:2 [H 3]). In Zech (11:7, 10), *nō'am* (AV "Beauty"; RSV "Grace") is the name given to one of the staffs.

In other contexts the root is used to describe words (Ps 141:6; Prov 15:26; 16:24; 23:8), knowledge (Prov 2:10; 22:18), good fortune or wealth (Job 36:11; Ps 16:11; Prov 24:4), the ways of people (Ps 133:1), and wisdom (Prov 3:17).

Of special note are those passages where the root is used to describe God or his name. Psalm 135:3 (AV) declares, "Sing praises unto his name; for it is pleasant (*nā'im*; cf. RSV "sing to his name, for he is gracious!"). See also Ps 147:1 [H 2]. Note that the Arabic cognate, *na'ima* means "be pleasant," and its derived noun *ni'matun* means "grace, favor." The Psalms (27:4; 90:17) also speak of the "beauty" (*nō'am*) of the Lord (cf. ASV and RSV "favor"). It is significant that this root is found as an epithet of Israel's God, in the light of Canaanite mythological texts. Literature from Ugarit likewise uses the root *n'm* to describe the loveliness of two of its leading deities, Anath and Baal (cf. Dahood, in AB, *Psalms*, vol. I, p. 167; vol. II, p. 327).

M.R.W.

- 1385 נָעַם (n'm) II. Assumed root of the following.

1385a נָעִים (nā'im) *singing, sweetly sounding, musical* (Ps 81:3).

נְעָמָן (nā'āmān). See no. 1384c.

- 1386 נָעַץ (n's). Assumed root of the following.

1386a נְעָצוּץ (nā'āšûš) *thorn bush* (Isa 7:19; 55:13).

נְעָצוּץ (nā'āšûš). See no. 1386a.

- 1387 נָעַר (nā'ar) *I, growl* (Isa 51:38, only).

- 1388 נָעַר (nā'ar) II, *shake, shake out or off* (e.g. Neh 5:13; Isa 33:9, 15).

Derivatives

1388a נָעַר (nā'ar) *a shaking, scattering* (Zech 11:16).

1388b נְעָרֶת (n'e'ōret) *tow* (as shaken from the flax when beaten, Jud 16:9; Isa 1:31).

- 1389 נָעַר (n'r) III. Assumed root of the following.

1389a נָעָר (nā'ar) *boy, youth, servant*.

1389b נָעַר (nō'ar) *youth, early life* (e.g. Job 33:25; Prov 29:21).

1389c נְעָרָה (nā'ārā) *girl*.

1389d נְעֻרִים (n'e'ûrim) *youth, early life*.

1389e נְעֻרוֹת (n'e'ûrôt) *youth, early life* (Jer 32:30, only).

na'ar. *Boy, lad, youth, servant, attendant.* (KJV also young man, child, babe [once]; ASV and RSV

same ranges, with servant more widely employed in latter.)

While not all lexicographers agree, *nā'ar* likely derives from *nā'ar* I, "growl." An Arabic cognate covers the range, "grunt, cry, scream, roar, bellow," plus more active connotations, "gush forth, agitate." South Arabic derivative Tigré language of Ethiopia yields a verb: "instigate rebellion," noun: "mischief, revolt," which sheds helpful light on the incident of Elisha's tormentors who were attacked by bears (II Kgs 2:23–24). Assuming it likely that this large band of boys (42 were gashed by the bears, while still others must have escaped!) were teenage rowdies, the ASV translation, "young lads," would be more appropriate than either KJV "little children" or RSV "small boys."

That *na'ar* affords a wide range of usage is evident from a sampling of its over two hundred occurrences. Whereas in Ex 2:6 it refers to the infant of few months, Moses (כִּנּוּן "the babe wept"), and in II Sam 12:16 to Bathsheba's baby, the mature Absalom is called *na'ar* by his father in II Sam 14:21 and 18:5. For the more technical or titular use, "servant, retainer," see II Sam 16:1, where Zibah is called the "servant of Mephibosheth." Thus, while reference to a youngster of ages between weaning and (especially) marriageable young manhood is primary (puberty is implied in Gen 34:19, etc and early childhood in I Sam 1:24 *hanna'ar na'ar* "the boy was a child"), the titular use of II Kgs 19:6, "the servants of the king of Assyria" (=officials), and "soldier" (I Kgs 20:15ff.) must also be recognized. For Ugaritic meanings: guild members, servitors, and soldiers, see UT 19: no. 445.

na'ārā. Girl, maiden, young woman. This noun usually refers to a marriageable but unmarried girl, emphasizing the youthfulness of the girl (II Kgs 5:2). Yet the young widow Ruth is so designated (Ruth 2:6; 4:12) as is the Levite's concubine (Jud 19:3ff.) and a prostitute (Amos 2:7). Marriageableness is implied in Gen 24:14ff.; 34:3, 12; Deut 22:15ff, etc., virginity in Jud 21:12; Deut 22:23, 28, and elsewhere, and betrothal in Deut 22:25, 27. Parallel to the masculine "servant" we find "maid" (female attendant) in Gen 24:61; Ex 2:5, etc., and "gleaners" in Ruth 2:5, etc.

nē'ūrim. Youth ("childhood" once in KJV only). This abstract (pluralized) noun lays stress on the early, immature but vigorous, trainable stage of life, most often in the phrase "from one's youth up." (See Gen 8:21; I Sam 17:33; I Kgs 18:12; Job 31:18, the last instance denoting extreme youth, in parallel with "from my mother's womb.") Also used figuratively of Babylon (Isa 47:12, 15) and Judah and Moab (Jer 22:21; 48:11).

M.C.F.

נִעְרָה (*nē'ōret*). See no. 1388b.

נָפַח (*nāpā*). See nos. 1330a, 1331b.

1390 נָפַח (*nāpah*) **blow, breathe, sniff at; give up or lose (life); seethe.**

Derivatives

1390a מַפְפָּא (*mappāh*) **breathing out, expiring** (Job 11:20).

1390b מַפְפָּא (*mappūah*) **bellows** (Jer 6:29).

1390c תַּפְּוּא (*tappūah*) **apple.**

The concept of blowing forcefully is the most natural sense of this root, commonly used of force ventilation for a fire, hence indicative of a seething or boiling hot caldron in Job 41:20 [H 12] and Jer 1:13.

Perhaps the most significant use (of fifteen occurrences) is the giving of life—creation of man (Gen 2:7) and revitalization of dry bones (Ezk 37:9). By contrast, however, loss of life is indicated in Job 31:39 and Jer 15:9. A more dramatic sense is found in Mal 1:13, where "sniffing" at the name of God signifies a profaning of the name by offering invalid, unacceptable sacrifices.

mappūah. Bellows. The noun occurs once, denoting an instrumental derivative, "bellows." In Jer 6:29 a strong figure for the smelting and refining of metal is employed, wherein bellows are used to fan the fire to an intense heat. ("The bellows blow fiercely to burn away the lead with fire," NIV.)

tappūah. Apple. Relationship seems at first semantically strained, but the ideas of "breathe" and "exhale an odor" are related. The by-form *puah* means both "blow" (of wind) and "exhale a pleasant odor, be fragrant." As for the "apple," while admittedly the word "apricot" would be more suitable in Prov 25:11, "like apples of gold in a network of silver," the true apple (*Pyrus malus*) may be reasonably accepted in Song of Solomon and elsewhere (see *New Bible Dictionary*, p. 50).

M.C.F.

נִפְלִים (*nē'pīlim*). See no. 1393a.

1391 נֶפֶךְ (*nōpek*) **a precious stone in priest's breastplate** (Ex 22:18) and in Tyre's merchandise (Ezk 27:16). RSV "emerald," NIV "turquoise."

1392 נָפַל (*nāpal*) **I, fall, lie, be cast down, fail.**

Derivatives

1392a נֶפֶל (*nēpel*) **untimely birth, abortion** (Job 3:16; Eccl 6:3).

1392b מַפְפָּא (*mappāl*) **refuse.**

- 1392c מַפְלֵה (mappālā) **a ruin** (Isa 17:1).
 1392d מַפְלֵה (mappēlā) **a ruin** (Isa 23:13; 25:2).
 1392e מַפְלֵת (mappelet) **a carcass** (Jud 14:8), **ruin** (Ezk 31:13), **overthrow** (Ezk 32:10).

Besides the common physical action or occurrence, a violent or accidental circumstance is often indicated, as well as expanded range of meanings by combination with prepositional specifiers.

Occurring in verbal usage 365 times in the OT, this word displays rich variety of connotation. Though something as simple as a falling wall may be described (Isa 30:13) or as literal as reporting that "Ahaziah fell down through the lattice," more often a much more specific or idiomatic use is involved. One may fall in battle (Jud 20:44), fall into the hands of another (Lam 1:7), or fall by the hand of an opponent (1 Chr 20:8). Damage, death, or destruction are often designated by *nāpal*, but far from exclusively so. A listing of some facets of meaning with examples of occurrence would serve to demonstrate the range of usage. (Transitive force is expressed by the Hiphil stem.)

Observation of denotations of the verb root makes the rationale of the noun derivatives self evident. Twice occurring *mappāl* speaks of droppings or refuse of wheat (Amos 8:6) and the hanging, fleshy paunch of the crocodile (Job 41:15). *mappālā* or *mappēlā* (Isa 17:1; 23:13; 25:2 only) means ruin of a devastated or decayed city, while *mappelet*, besides "ruin, overthrow" (Ezk 26:15, 18 and elsewhere), designates a cut down tree trunk (Ezk 31:13) and animal carcass (Jud 14:8).

M.C.F.

1393 נָפִיל (npl) II. **Assumed root of the following.**

- 1393a נְפִילִים (n^e pilim) **giants, the Nephilim** (Gen 6:4; Num 13:33, only).

While some scholars attempt to relate this term etymologically to *nāpal* I via the noun *nēpel* "untimely birth" or "miscarriage" (as productive of superhuman monstrosities), a more likely reconstruction is the proposal of a root *nāpal* II, akin to other weak verbs, *pāl* II "be wonderful, strong, mighty," *pālā* "be wonderful," and even *pālā* "separate, distinguish," *pālāl* "discriminate." This pattern of semantically related groups of weak verbs with two strong consonants in common is a notably recurrent phenomenon in Hebrew lexicography. Actually, the translation "giants" is supported mainly by the LXX and may be quite misleading. The word may be of unknown origin and mean "heroes" or "fierce warriors" etc. The RSV and NIV transliteration

"Nephilim" is safer and may be correct in referring the noun to a race or nation.

M.C.F.

- 1394 נָפַץ (nāpaš) **break, dash, beat in pieces; overspread, scatter, disperse.**

Derivatives

- 1394a נִפְּץ (nepeš) **driving storm** (Isa 30:30, only).
 1394b נִפְּץ (mappāš) **shattering** (Ezk 9:2, only).
 1394c נִפְּץ (mappēš) **war club** (Jer 51:20, only).

Both etymologically and interpretively it is better to maintain that only one root is involved here (so KB). (The semantic overlap becomes obvious to the English speaker when he realizes that in his own language the words "scatter" and "shatter" both derive from a common etymology.) For example, where, in Dan 12:7, כִּנַּן says, "to scatter the power of the holy people," ASV has "breaking in pieces" and RSV, "shattering of." A similar translation variance occurs in I Kgs 5:9 [H 23], with כִּנַּן's "cause them (rafts of logs in shipment) to be discharged" being rendered in both ASV and RSV, "have them broken up."

One may thus be satisfied to see these as transitive and intransitive senses, respectively, of the one verb root, but at the same time it is evident that in the latter case a semantic relationship may exist with the middle-weak root *pāš* 'be dispersed, overflow; disperse'.

nepes. Tempest, driving storm (Isa 30:30, כִּנַּן "scattering," ASV "blast," RSV "cloudburst"). This noun fails to afford a ready solution since, again, the storm described can picture either a bursting of clouds or a scattering (and dashing to pieces!) of things on earth.

M.C.F.

- 1395 *נָפַשׁ (nāpash) **take breath, refresh oneself.** This denominative verb occurs only in the Niphal (Ex 23:12; II Sam 16:14; Ex 31:17).

Parent Noun

- 1395a נֶפֶשׁ (nepesh) **life, soul, creature, person, appetite, and mind** are the more common of the twenty-some varieties of meaning utilized in KJV.

(ASV conforms with these uses in a majority of cases, while RSV deviates freely, sometimes reverting to "soul" where KJV has another expression but more often replacing "soul" with words like "being," "person," any "one," "he" who, "self," "I/me," etc., and "appetite." Both revisions, in fact, make substitutions by using

terms found in other passages in KJV.) The Ugaritic and Akkadian have cognates with somewhat similar breadth of meaning but both include the meaning "throat." Arabic *nafs* includes "soul, mind, life, person, inclination, self (as a reflexive pronoun)" but does not mean "throat." For Phoenician-Punic and Old Aramaic *npsh/nbsh* see Jean, C. F. and Hoftijzer, F. *Dictionnaire des Inscriptions Sémitiques de l'ouest* (Leiden 1965). It is common in language for a bodily part or organ to take on emotional or spiritual meanings, cf. "heart" in both Hebrew and English.

Most of the KJV variants referred to above are a matter of closely related concepts, as synonyms for creature, "living thing, beast, fish," for appetite, "heart, pleasure, desire, lust, discontent," and "will." While "any(one), man," and "self (myself, etc.," occur in KJV, the rendering of *nepesh* by the simple personal pronoun (often reflexive) is common only in RSV and other recent translations. The seemingly contradictory meaning, "the dead, dead body," found a few times in all three versions, will be analyzed in what follows.

The treatment of *nepesh* by C. Westermann (THAT, I: 71–95) is valuable and should be compared.

The original, concrete meaning of the word was probably "to breathe." The verb occurs three times in the medio-passive Niphal stem with the meaning "to refresh oneself" (Ex 23:12; 31:17; II Sam 16:14). The verb may be a denominative from the substantive, but both ancient and modern Semitic cognates do have a verbal form signifying "to breathe" (cf. Akkadian *napāshu* "to blow, to breathe out"; (see D. W. Thomas, "A Study in Hebrew Synonyms: Verbs Signifying 'To Breathe'" *Zeitschrift für Semitistik* 10:311–14). The noun appears to denote "breath" in Gen 1:30: "in which [i.e. the land creatures] is the breath of life." The connection between *nepesh* and breath is also suggested by such statements as: "and [the Lord] breathed [*nph*] into his [man's] nostrils the breath of life; and man became a living soul" (Gen 2:7); and "the *nepesh* [life/breath/soul] of the child returned and he revived" (I Kgs 21:22).

The case for an original, concrete meaning of "breath" is also suggested by the use of *nepesh* to denote "throat" in Akkadian, Ugaritic, and Hebrew; e.g., "therefore Sheol had enlarged its throat [NASB; "appetite" in NIV] and opened its mouth without measure" (Isa 5:14; cf. Hab 2:5); "the waters have come up to my neck [NIV]" (Ps 69:2; cf. Jon 2:6).

As in the cognate languages (cf. especially Arabic) *nepesh* can refer to the appetite. Thus it may denote hunger for food: "You may eat grapes according to your appetite, until you are satisfied" (Deut 23:24; [H 25]; cf. Ps 78:18); "this

bread will be for their hunger" (Hos 9:4); "a righteous man cares for the needs of his animals" (Prov 12:10; cf. 10:3; 16:26). So also it can refer to one's spiritual/volitional appetite, that is, "desire" or "will"; e.g. "the enemy said, . . . 'my desire shall be gratified against them'" (Ex 15:9; cf. Ezk 16:27; Ps 27:12; 41:3); "then you shall let her go according to her desire" (Deut 21:14; cf. I Sam 2:35 [of God's will] 105:22). Abraham says to Ephron: "if it is your wish . . ." (Gen 23:8). The desire of the wicked is condemned (Prov 13:2; 19:2).

About twenty times, however, *nepesh* is the subject of *āwā* "to desire," "to crave." Here it is not the hunger/appetite/desire itself but that which possesses the appetite, "the soul." A person, a soul, may crave physical food: "and you say, 'I will eat meat,' because you desire [*t'awweh*] to eat meat, then you may eat meat, according to the desire of your soul [*b'kol-'awwat napsh'kā*]" (Deut 12:20; cf. 14:26; I Sam 2:16). The compound can also speak of the sexual drive: "a wild donkey accustomed to the wilderness, that sniffs the wind has passion [*b'awwat napshāh*] [Qere and LXX], in the time of her heat who can turn her away" (Jer 2:24). So also it may denote one's spiritual/volitional desire for something. Abner said to David: "that you may be king over all that your soul desires" (II Sam 3:21; I Kgs 11:37). "The desire of the wicked soul is evil" (Prov 21:10). "[what] his soul desires [*w'napshō 'iww'tā*] that he does" (Job 23:13).

The people of Judah desire God's justice: "Yes, LORD, walking in the way of your laws, we wait for you; your name and renown are the desire of our hearts [*ta'āwat nāpesh*]. My soul yearns for you [*napshī 'iwwitkā*] for you in the night; in the morning my spirit longs for you. When your judgments came upon the earth, the people of the world learn righteousness" (Isa 26:8–9; cf. Ps 119:20 and below for numerous passages where *nepesh* is used to express personal yearning for someone and its inclination and disinclination for someone).

One can also speak of the hungry or thirsty soul: "For he has satisfied the thirsty soul, and the hungry soul he has filled with good things (Ps 107:9; cf. Prov 19:15; 25:25; 27:7).

Accordingly verb *śāba* "to satisfy" occurs often with *nepesh*: "The dogs are greedy [*'azzē-nepesh* = "strong of appetite"], they are not satisfied" (Isa 56:11; cf. 58:10; Jer 50:19). Especially in Ecclesiastes, the soul "craves, lacks," or is "filled with good things" (Eccl 2:24; 4:8; 6:2, 3, 7, 9, and 7:28).

As Isa 26:8–9 suggests, the object of that which the soul craves may be a person. The soul's thirst or language may be directed toward God. The psalmist brings the two notions together thus: "As the deer pants for the water-courses, so my

soul pants for you, O God. My soul thirsts for God, for the living God. When can I go and appear before God" (Ps 42:1, 2 [H 2, 3]; cf. Ps 63:2). In addition to God's presence the soul may long for the law (Ps 119:20), salvation (Ps 119:81); his courts (Ps 84:3); etc.

Thus *nepesh* occurs with many verbs denoting "yearning"; cf. the idiom he set his soul "to long after, yearn" for someone, something (Deut 24:15; Hos 4:8; Prov 19:18; Jer 22:27; 44:14; etc.). The soul waits for [*qwh*] the LORD (Ps 130:5), seeks [*drsh*] him (Lam 3:25); etc.

Thus in numerous passages reference is made to the inclination or disinclination of the soul. It is frequently used in connection with "love." The maiden says to her lover: "Tell me, O you whom my soul loves" (Song 1:7; and repeatedly in Song 3:1-4; cf. Jer 12:7; Gen 34:3). It is used not only of the man-woman relationship, but also of the closest human friendships; e.g. of David and Jonathan: "The soul of Jonathan was bound [*qāshar*] with the soul of David, and he loved him as his own soul." So also it speaks of man's love for God. The psalmist says: "My soul clings [*dābaq*] to you" (Ps 63:9).

Here too belongs the important exhortation "to love" and "to serve" God with the whole heart and soul (Deut 6:5; 30:6; cf. 4:29; 10:12; 11:13; 13:4; 26:16; 30:2, 6, 10; Josh 22:5; 23:14; I Kgs 2:4; 8:48=II Chr 6:38; etc.). Commenting on Deut 6:5, J. McBride noted: "The three parts of Deuteronomy 6:5: *lēbāb* (heart), *nepesh* (soul or life), and *me'ōd* (muchness) rather than signifying different spheres of biblical psychology seem to be semantically concentric. They were chosen to reinforce the absolute singularity of personal devotion to God. Thus, *lēbāb* denotes the intention or will of the whole man; *nepesh* means the whole self, a unity of flesh, will and vitality; and *me'ōd* accents the superlative degree of total commitment to Yahweh." While agreeing that these terms were chosen to denote the singularity of devotion, we would now underscore *nepesh* as pertaining to the personal desire or inclination.

For the turning away of the soul from someone/something, *nepesh* occurs with such words as *sānē* "to hate" (II Sam 5:8; Isa 1:14 [of God's hatred]; Ps 11:5); *gā'al* "abhor" (Lev 26:11, 15, 30, 43=of a fractured God-man relationship); *qūš* "loathe" (Num 21:5); etc.

Thus *nepesh* is frequently used in connection with the emotional states of joy and bliss. The Psalmist suggests the relationship between these ideas when he prays: "Bring joy to the soul of your servant, for I long (I lift up my soul, *napshi 'ēssā'*) for you, O Lord (Ps 86:4). Not only can the soul be joyful because its desires are met but also because of its appreciation for the inherent worth of something which delights its tastes:

"Pleasant words are . . . sweet to the soul" (Prov 16:23). When filled with the sayings of the wise, the son will find that "Knowledge will be pleasant to [his] soul" (Prov 2:10). A disciplined son "will delight your soul" (Prov 29:17). Fully satisfied in the LORD the soul praises him (Ps 103:1, 2, 22; 104:1, 35; etc.). But the wicked, having depended upon themselves, praise themselves (Ps 49:19).

It also follows that the soul can be bitter. Fifteen times it occurs with the root *mārar*. With his health and well-being broken, Job complained: "The Almighty has embittered my soul" (Job 27:2). Provoked by her rival on account of her barrenness, Hannah was one "bitter of soul" (*mārat nepesh*) (I Sam 1:10; cf. Jud 18:25; etc.). Related to *mārar* are many different expressions of sorrow with the soul. Jeremiah says to his people: "But if you will not listen to it [the word of God], my soul will sob in secret . . ." (Jer 13:17; cf. *passim*).

In Isa 10:18 *nepesh* is employed alongside of *bāsār*, "flesh"=physical body as a merism to denote the whole person. It is also used in parallel with *bāsār*. NIV interprets this as a figure for totality: "completely," "flesh" in Ps 63:1 [H 2] for the same reason.

Since personal existence by its very nature involves drives, appetites, desires, will, *nepesh* denotes the "life" of an individual. As the object of the verb *shūb* "to revive" "to restore" *nepesh* moves between the notion of "soul" and "life." Jerusalem laments: "Because far from me is a comforter, One who restores my soul/life" (Lam 1:16). The women of Bethlehem pray for Naomi: "May he [Obed] be to you a restorer of life [*nepesh*], and a sustainer of your old age (Ruth 4:15; Ps 23:3; Lam 1:11; Ps 18:8; Prov 25:13). What is meant in these passages is life which consists of emotions, passions, drives, appetites.

It also moves between these two notions with the word *hāyā* "to live." Abraham instructs Sarah to say she is his sister "so that it may go well with me on account of you and my soul may continue in life" (Gen 12:13; cf. Gen 19:20; 20:32; Isa 55:3; etc.). But here it is also equivalent to "self." *nepesh* with the notion of "life" refers to the "I" that hungers and is filled, loves and hates, is joyful and sorrowful, etc. It adds an intensely personal element to the notion of self. Indeed *nepesh* could be substituted with the personal pronoun in these passages, but the intensity of feeling would be lost.

Accordingly, in some passages *nepesh* is best translated by "life," but "life" here denotes the living self with all its drives, not the abstract notion "life" which is conveyed by *hayyim*, nor the other meaning of *hayyim* which refers to a quality of existence as well as the temporal notion of

being (cf. the use of *hayyim* in Deut and Prov). Westermann noted that when *nepesh* occurs as the subject of the verb it is usually rendered "soul"—desires, inclinations, etc.; as the object of the verb it is frequently rendered by "life"—the state of personal existence as over against death.

Many passages refer to the "saving" of a man's *nepesh* "life". In fact, almost all the verbs within this semantic notion take *nepesh* as their object: with *nāṣal* "and deliver our lives from death" (Josh 2:13; Isa 44:20; *passim*), with *mālat*: "if you do not save your life tonight, tomorrow you will be put to death" (I Sam 19:11); cf. II Sam 19:6; *passim*); with *hālaṣ*, "rescue my life" (Ps 6:5); with *yāsha*, "he will save the lives of the needy" (Ps 72:13); etc. The psalmist is confident that God will even "redeem" (*pādā*) his life out of the grave (Ps 49:15 [H 16]). In all these passages "life" is equivalent to the person.

It has also this notion of saving the "life"="individual" in certain prepositional phrases. Thus Elijah "ran for his life" [*el napshō*] (I Kgs 19:3); "take heed for your lives" (Jer 17:21); etc. When one risks his life it is said that he takes his *nepesh* into his hands (Judg 12:3; *passim*).

Then too, it is usually rendered "life" after verbs denoting "keeping" "preserving" "sustaining" etc. Thus it occurs: with *shāmar* "to keep" (Deut 4:9); with *sāmak* "to sustain" (Ps 54:6); with *hāsaq* "to hold back [from the grave]" (Ps 78:50); etc.

The *nepesh* "life" is most precious. Thus the captain prays to Elijah: "O man of God, please let my life and the lives of these fifty servants of yours be precious in your sight" (II Kgs 1:13; cf. I Sam 26:21); etc. In some situations a monetary payment can be given for the life (cf. Ex 21:30; 30:12).

In the *lex talionis* formula "life for life" *nepesh* denotes the precious individual, the living self (Ex 21:23; Lev 24:18; Deut 19:21; cf. I Kgs 20:39, 42; II Kgs 10:24; etc.).

Here too belongs Lev 17:11, one of the most decidedly theological and distinctively meaningful passages where the word *nepesh* is of major significance, and one which certainly defines the term as meaning life "for the life (*nepesh*) of the flesh (*bāṣār*) is in the blood." Here it is the vitality, the passionate existence of an individual which is denoted.

Then too it is frequently said that the enemy threatens the individual's life. Thus it occurs as the objects of: *bāqash* "to seek" (Ex 4:19; *passim*); *ārab* "to lie in ambush for" (Ps 59:3 [H 4]) etc. Sometimes God's destruction of the life, the individual is in view: "Do not take away my life with sinners" (Ps 26:9).

It comes as no surprise, then, that in some contexts *nepesh* is best rendered by "person,"

"self," or more simply by the personal pronoun. Westermann says that it is best rendered by such English equivalents in casuistic law, in the enumeration of people, in the general designation of people and as a substitute for a pronoun. An example of its use in legal contexts with such particles as *āsher* or *kī* is: "Now when anyone [*nepesh kī*] presents a grain offering" (Lev 2:1; cf. 4:2; 5:1, 2; *passim*). Again, "But the person who [*w^ehannepesh āsher*] eats the flesh..." (Lev 7:20; *passim*). Similarly it has this notion in enumerations: "These are the people whom Nebuchadnezzar carried away captive... in the eighteenth year of Nebuchadnezzar 832 persons [*nepesh*]..." (Jer 52:28, 29; Ex 12:4, *passim*). So also with reference to "people" "he [shall be valued] according to the valuation of persons belonging to the LORD" (Lev 27:2; *passim*). As a substitute for a pronoun it frequently occurs with the pronominal suffix. Thus Lot said to the LORD: "That I [*napshi* = "my soul"] may live" (Gen 19:19; *passim*). Although it appears to be an equivalent of the personal pronoun, its intensive, passionate sense peculiar to the word is always present. A. R. Johnson speaks of it as "a pathetic (i.e. in the sense of deeply emotional) periphrasis for a pronoun" (*The Vitality of the Individual in the Thought of Ancient Israel*, 1964, p. 22).

A total of 755 occurrences of the noun *nepesh* have been counted in the OT, and of these it is rendered in the Greek translation (LXX) some 600 times by the psyche (ψυχή). Of the 144 times it is used in the Psalms, over 100 of them have the first person suffix, "my soul." Thus in its most synthetic use *nepesh* stands for the entire person. In Gen 2:7 "man became a living creature" [*nepesh*]*—*the substantive must not be taken in the metaphysical, theological sense in which we tend to use the term "soul" today. Precisely the same Hebrew expression (*nepesh hayyā*)—traditionally rendered "living soul" occurs also in Gen 1:20, 21, and 24. In other words, man is here being associated with the other creatures as sharing in the passionate experience of life and is not being defined as distinct from them. It is true, however, as Oehler points out that the source of the *nepesh* of animals is the ground, whereas the source of the *nepesh* of Adam is God.

Particular note should be taken of the anonymous translation, "the dead, dead body" found in Lev 19:28; 21:1, 11; Num 5:2; 6:6, 11; 9:6, 7, 10; etc. In these citations, "the dead" stands for *nepesh* by itself, while "dead body" renders *nepesh/napshōt mēt*. The latter indicates "a person (persons) who has died," the emphasis being on the personal identity of an 'individual,' so that in context the term *nepesh* by itself refers to a dead individual, "one who has died," and the word itself does not really mean physical 'body.'

The use of *nepesh* with reference to God is rare since God does not have the cravings and appetites common to man nor is his life limited by death. In addition to the passages already noted, we cite several more where the word is used to express forcefully his passionate disinclination or inclination toward someone. The former is more frequent. Thus he threatens: "Be warned, O Jerusalem, lest I/My soul be alienated from you" (Jer 6:8); cf. Jer 5:9, 29; 9:8; 15:1; *passim*). On the other hand his passionate love, delight and inclination toward his servant is spoken of thus: "My chosen one in whom my soul delights" (Isa 42:1).

It must not be concluded from this study of *nepesh* that the OT presents man as physical only. There are other OT ideas to be considered in this connection: (1) the OT teaching concerning the "spirit" of man; (2) the OT teaching concerning the heart (*lēb*) of man; (3) the subject of the image of God (see *šelem*) in man; and (4) the picture as given of man's relation to God.

- 1397 נָצָא (nāṣā') *fly* (Jer 48:9, only). Probably a by-form of nāṣā I.

- 1398 *נָצַב (nāṣab) *stand (upright), be set (over), establish*.

Derivatives

- 1398a נָצַב (niṣṣāb) *hilt of sword* (Jud 3:22, only). An identical form, occurring in I Kgs 4:5, 7; 22:47 [H 48] is considered to be a Niphal participle used as a substantive, meaning "officer," "deputy."

- 1398b נָצִיב (nāṣīb) *pillar*.
 1398c מָצַב (maṣṣāb) *station*.
 1398d מִצָּב (mūṣṣāb) *post*.
 1398e מִצָּבָה (maṣṣābā) *garrison*.
 1398f מִצָּבָה (miṣṣābā) *army*.
 1398g מִצָּבָה (maṣṣēbā), מִצָּבֶת (maṣṣebet) *pillar*.

Since this root never occurs in the Qal, it has transitive force only in the Hiphil, "to set, station, erect, fix, establish." The passive is expressed by the Hophal, "be fixed, determined." The broadest senses occur in the Niphal, "take one's stand, stand firm" (the latter by appointment to a station).

The basic sense of the Niphal stem of *nāṣab* is well illustrated in God's order to Moses to "stand (i.e. station himself) by the river's brink" to meet Pharaoh (Ex 7:15). Moses was also to "present himself" before God on Mount Sinai (Ex 34:2). In Ps 82:1 God is described as "standing in the congregation" for administration of judgment. The Niphal ptc. with the article occurs in Ruth 2:5, designating a certain servant "that was set over" the reapers. The Niphal is also used for stand where the emphasis on straight up and firm (statuesque) is intended, whether of men (Gen 18:2), sheaves (Gen 37:7), or backed-up water (Ex 15:8). A firmness which implies health and strength is expressed by this ptc. in describing sheep that are normal, in contrast to those "cut off" from the flock or injured (Zech 11:16). Similarly, in Ps 39:5 [H 6] "every man at his best state is altogether vanity" implies physical fitness, wholeness, soundness.

The passive sense of the Niphal is more evident in those cases where stand is equivalent to "be stationed" by appointment or in fulfillment of duty. Hence we find Samuel "standing as appointed over" ('ōmēd niṣṣāb) the company of prophets, in I Sam 19:20. The participle is used as substantive, "deputy, prefect," in I Kgs 4:5, 7, and 27 [H 5:7]; 5:16 [H 30]; 9:23; II Chr 8:10. The usage in I Sam 19 indicates that the verb *nāṣab* has a more specific, technical connotation than its synonym 'amad.

The Hiphil yields a transitive force, as in Ps 78:13, "he made the waters to stand as an heap," Gen 33:20, "he erected there an altar"; I Chr 18:3, "to establish his dominion by the river Euphrates." Setting or fixing a boundary, gate, or even trap is also within the range of the Hiphil as well as is an extended specialization—to set or sharpen a goad (I Sam 13:21), apparently in the sense of making it right. Correspondingly, the Hophal participle is used of the ladder of Jacob, "set up on the earth," and in Nah 2:7 [H 8] the mistress (queen) of Nineveh is given the title or epithet *hūṣṣab*.

In considering this root, one must also take

into account the closely allied *yāšab* 'station oneself, present oneself before' (used only in the Hithpael).

n^ʿšib. Pillar (once), garrison (nine times), officer (twice) in all three versions, with rsv giving in margin: "Prefect" at II Sam 8:6.

The one place where the noun *n^ʿšib* is translated "pillar" is in reference to Lot's wife (Gen 19:26). The obvious intent here is to depict her as stopped, trapped, transformed as and where she was, in a still upright posture, whether we assume the transformation into salt as instantaneous or subsequent. (See Robert Boyd's interesting analysis in his *Tells, Tombs and Treasure*, Baker, 1969, pp. 85–86). Elsewhere this expression is rendered "garrison" (rsv using "prefect" in one instance), as mentioned above, or "officer" (I Kgs 4:19; II Chr 8:10).

maššāb. Station, garrison (ASV and rsv replace "station" with "office," in Isa 22:19). Note that in this and several other derivatives from the root *nšb*, the doubling of *š* indicates the loss of the first radical, *n*, by way of assimilation to the second consonant.

mūššāb. Post. This term occurs in Isa 29:3 (KJV mount, ASV posted troops, rsv tower) and also in Jud 9:6 (pillar, ASV mg: garrison), but the latter instance is taken as a Hophal participle form by most lexicons.

maššābā. Garrison. Occurs once only, in I Sam 14:12. (Koehler conjectures that this should be read in Zech 9:8 also, but see *miššābā*, below.)

miššābā. Occurs only in Zech 9:8. KJV and ASV follow Masoretic note (*hē* has replaced original *aleph*), and so translate "army" (host), though ASV has "garrison" as alternative. rsv gives "guard" as translation, from the suggestion of BDB, "watch."

maššēbā. Pillar. The lexicons distinguish between the meanings "pillar," or "column," and (standing) "image," but both ASV and rsv translate the word as "pillar" almost exclusively. (The KJV rendering "garrison" in Ezk 26:11 is "pillar" in the other two versions, for example.)

Some light has been shed, not yet clearly enough, on the interesting term *maššēbā* "pillar," by archaeological discoveries. It has an apparent primary reference to cultic objects, though Absalom's memorial monument (*maššebet*) to himself (II Sam 18:18) may not have been for a specifically religious purpose, as also that set up for Rachel's grave (Gen 35:20). Many *maššēbôt* have been found in Palestinian excavations. While the famous ones at Hazor (BA 19, 22) and at Byblos are clearly monumental and cultic,

other standing stones were for a time wrongly identified. It is now known that many rough stone columns, initially interpreted as cultic objects, were actually a normal feature of Middle Iron Age Israelite house construction. A suggested relationship or possible development of cultic pillars into actual imagery and idols is also inconclusive.

While the two biblical occurrences cited above do refer to simple memorials, more often the *maššēbā* has religious significance. In Gen 28:18 Jacob's pillow becomes a "pillar," which he anoints with oil, naming the place Beth-el, "the House of God." On his return to that place (Gen 35:14) he set up another pillar, pouring out both a drink offering and oil, because God talked with him there and changed his name to "Israel." Previous to that, at the time of his agreement with Laban (Gen 31:45), Jacob set up a stone pillar in addition to the "heap of witness" directly associated with their agreement. In Ex 24:4 Moses, besides the altar he built, erected twelve stones (pillars) representing the twelve tribes of Israel.

The above were legitimate uses of this object. It must be recognized that quite often the *maššēbôt* mentioned in the Bible were of pagan cultic significance and as such were not only forbidden to Israel but called for destruction when found. In Ex 23:24 the expansion upon the Decalogue—near the conclusion of the so-called Book of the Covenant—calls for action: Israel must "not bow down to their gods, . . . but . . . break down their images" (ASV and rsv, "pillars," with a margin "obelisks" in the former). So too, in Deut 16:21–22, they are told, "Thou shalt not plant thee a grove ('*āšhērā*) . . . neither shalt thou set thee up any image." Nevertheless, later on in Israel's history we read of Judah's sin, described in such terms as, "they also built them high places, and images, and groves" (I Kgs 14:23).

The LXX uses *stēlē* to translate *maššēbā* in all the cited instances, with the exception of Ex 24:4, where *lithos* is employed. Other Hebrew nouns rendered "pillar" in KJV, such as *miš'ād*, *māšūq*, and '*amūd*, are completely free of the religious or cultic associations described above.

Two instances where the Hebrew text noticeably avoids use of *maššēbā* are Joshua's "great stone" placed as a witness to reaffirmation of the covenant between Israel and her God (Josh 24:26–27) and Samuel's '*eben hā'ēzer*, "Stone of Help," which he erected in commemoration of deliverance from the Philistines.

Derivative

- 1399a נִזְחָה (*nôṣā*) *plumage* (e.g. Ezk 17:3; Job 39:13).

- 1400 *נָצַח (*nāṣā*) *II, struggle*. This verb occurs only in the Niphal (e.g. Ex 21:22) and Hiphil (e.g. Num 26:9).

Derivatives

- 1400a מִצָּחָה (*maṣṣā*) *strife, contention* (Isa 58:4; Prov 13:10; 17:19).
 1400b מִצָּחֻת (*maṣṣût*) *strife, contention* (Isa 41:12).

- 1401 נָצַח (*nāṣā*) *III, fall in ruins* (e.g. Jer 4:7; II Kgs 19:25=Isa 37:26).

- 1402 *נָצַח (*nāṣah*) *I, be perpetual, excel; be overseer*. Occurs in the Niphal and Piel stems.

Derivative

- 1402a נִצְחָה (*nēṣah*) *I, strength, victory, perpetuity*.

In contemplating a rationale for the wide range in meaning for this verbal root, and consequently for its nominal derivative, it is perhaps suggestive to observe how the sun, source of earth's energy, embraces and conveys the dual notions, light and durability. For these would seem to be the same two qualities involved in our word, especially since its Arabic cognate means both "pure" (as also in Ethiopic) and "reliable."

Hence, *nāṣah* denotes both "brilliance" (yielding the connotations "preeminence, surpassing, glory, victory, leadership") and "endurance" (supplying "longlasting, perpetual"). BDB basically defines the verb as "be pre-eminent, enduring" and details distinctive usages from there.

Returning to the noun form for the moment, then, one can grasp the difficulty of choice between "strength" or "glory" (the problem being in the English distinctives, since the Hebrew obviously embraces both at once) in references to divine attribute or Person, as in I Sam 15:29, "and also the *nēṣah* of Israel will not lie nor repent," or Lam 3:18 (where the referent is human, however), "my *nēṣah* and my hope is perished from the LORD." The significance of the musicians' title will be treated below. The various renderings of the adverbial concepts, perpetual, forever, constantly, etc., are simple and obvious derivatives of the "endurance" concept, rendered adverbial by the prefixing of the Hebrew preposition, *l-* "to (the)."

Verbally, the one occurrence of the Niphal stem, in Jer 8:5, speaks of "a perpetual backsliding," an enduring apostasy. It is the Piel stem

which fixes upon the sense of "outshine" or "excel greatly," leading to the usage "take a lead, preside," and thence on to "act as overseer, superintendent, director." Such activity is expressed by Piel inf. five times in Chr and Ezr (e.g. I Chr 15:21), and the agent by the participle as in Hab 3:19 and fifty-five times in titles to psalms. With reference to the I Chr verse just cited, while the ASV and RSV use of "to lead" seems preferable to KJV's "excel," it is not difficult to recognize the logic of the older translators, as the very next verse specifies another individual as being the chief (*śār*) of the Levites and as the one who leads (*yāsôr*) in the music "because he is the one who understands (or is skillful-*av*)."

The interpretation "chief musician" or "choirmaster" for the expression *m^cnāṣṣēah* in the psalm superscriptions cannot be far from correct, especially since its translation in LXX (*telos* "end") has a use in classical Greek of "the last, highest station" in civil life: a magistracy, high office. Some scholars have proposed an earlier psalter called the "Director's Collection," from which thirty-nine Davidic, nine Korahite, five Asaphic, and two anonymous selections were made for the full Psalter (plus that found as Habakkuk 3), but this is only one of several theories proposed as explanation for the terminology. For other such terms see *selâ*.

nēṣah. A noun derivative, but often adverbial in force, translated in the KJV by "strength," "victory," "perpetual," "forever" (also "always," "constantly," "never," "to the end." ASV follows much the same pattern, with marginal alternates "victory, glory" for "strength" (RSV settles for "glory"). For "perpetual," "everlasting" is sometimes substituted by ASV, "unceasing" by RSV. The verb "endure" is an ASV and RSV variant for "constantly."

This double nuance of the root may help explain the relation of Isa 25:8 with I Cor 16:9. The OT is sometimes rendered, "He will swallow up death forever" (RSV, NIV). The LXX is "death has prevailed and will swallow men up." If *nēṣah* can mean "eminence" as well as "forever," then the meaning "victory" can be defended. Indeed the new Hebrew meaning of the root is "conquer, prevail."

1404 *נָצַל (nāṣal)

1404 *נָצַל (nāṣal) *deliver, rescue, save*. Does not occur in the Qal.

Derivative

1404a הַצָּלָה (haṣṣālâ) *deliverance* (Est 4:14, only).

The Qal stem of this verb does not occur in biblical Hebrew, but an Arabic cognate confirms the judgment that its basic physical sense is one of drawing out or pulling out. While the Niphal is invariably used with the force of "be delivered, saved" or "to escape" (i.e. "deliver oneself"; literally, "tear oneself away"), the Piel may express "strip off" (a garment), as in II Chr 20:25 (where the context indicates this sense) and in Ex 3:22, where the Hebrew women are ordered to spoil the Egyptians by "borrowing" really "asking for" jewelry and raiment. The Piel also signals "deliver" in Ezk 14:14, "Noah, Daniel, and Job... should deliver but their own souls."

The predominant occurrence of this verb is in the various aspects and moods of the Hiphil (causative: "make separate") and that generally with the sense of deliver or rescue. Nevertheless, here too a physical snatching away or separating can be involved, as in the obvious instance of two sons fighting with "none to part them" (II Sam 14:6). An interesting idiom occurs in II Sam 20:6, where "escape us" is, literally, "cause to remove our eye (from him)." And stripping or snatching away overlaps the meaning "recover" or "deliver" in I Sam 30:22, since the reference is to spoil taken from the enemy, some of which was likely their own property originally.

Quite often, however, a literal personal salvation or deliverance (often physical but not without spiritual overtones or application) is involved. The Hiphil imperative, not surprisingly, yields numerous prayer petitions such as, "Deliver me, I pray thee, from the hand of my brother." (Cf. Jud 10:15; I Sam 12:10; I Chr 16:35.) In Ps 7:1 [H 2] haṣṣilēnî "deliver me," is in direct parallel with hōshî'ēnî "save me." Spiritual salvation through forgiveness of sins is certainly intended in Ps 39:8 [H 9], "Deliver me from all my transgressions" (cf. "... from bloodguiltiness," Ps 51:14 [H 16], "... and purge away our sins," Ps 79:9) and figuratively implied by "deliver me out of the mire" in Ps 69:14 [H 15].

A comparison of the distinctives of other Hebrew synonyms of the concepts "deliver, save, preserve, escape" will better delineate the semantic range of our root nāṣl. (The one Ugaritic occurrence cited in UT 19: no. 1688, means "to get gifts from [someone].") Very close in basic concept are the three verbs (q.v.): gā'al "redeem, release, set free," hālaṣ "break away, withdraw; deliver, set free," and pādâ "redeem,

deliver, rescue, ransom." Two closely related roots are mālaṭ "be smooth, slip away," and pālaṭ "slip out, drop, escape, set free." Also used with the sense of "rescue" are yāsha', Hiphil, "save"; shūb "return"; hāyâ Piel and Hiphil: "make alive, revive," and yātar, Hiphil, "cause to surpass, survive."

M.C.F.

נִצָּן (niṣṣān). See no. 1405d.

1405 נָצַץ (nāṣaṣ) *I, shine, sparkle* (Ezk 1:7, only).

Derivatives

1405a נִצּוֹץ (niṣṣōṣ) *spark* (Isa 1:31, only).

1405b נֵץ (nēṣ) *blossom* (Gen 40:10, only).

1405c נִצְחָה (niṣṣâ) *blossom* Isa 18:5; Job 15:33; Gen 40:10).

1405d נִצָּן (niṣṣān) *blossom* (Song 2:12, only).

1405e *נִצָּץ (nāṣaṣ) *bloom, blossom*. This denominative verb occurs only in the Hiphil (Song 6:11; 7:13; Eccl 12:5).

1406 נָצַח (nāṣaḥ) **II. Assumed root of the following.**

1406a נֵץ (nēṣ) *bird of prey* (hawk or falcon; Lev 11:16; Deut 14:15; Job 39:26).

1407 נָצַר (nāṣar) *I, watch, guard, keep*. The etymology of this root is illustrated in the Akkadian naṣāru "watch over, protect." The Arabic cognate naẓara means "keep in view," "look at."

Derivative

1407a נָצִיר (nāṣir) *preserved* (Isa 49:6, Kethib only).

This verb appears approximately sixty times.

Examination of the objects protected assists in assigning to it a proper semantical range. First material things such as agricultural or military installations (e.g. a vineyard, Job 27:18; a fig tree, Prov 27:18; fortifications, Nah 2:2) are guarded. Those who are employed in these functions are called watchmen (Qal active plural participle nōṣ'rim, Jer 31:6; II Kgs 17:9; 18:8). The Lord himself is regarded as a keeper or watchman over his vineyard Israel and over all men in general (Isa 27:3; Job 7:20).

Secondly in an ethical sense, the mouth (Prov 13:3; Ps 141:3), one's path in life (Prov 16:17), the

heart (Prov 4:23), and the tongue (Ps 34:14) are guarded.

Thirdly, there is the concept of "guarding with fidelity." It usually centers around observing the covenant or the law of the Lord. The Lord himself is the one keeping loyal love (*hesed*) to thousands of generations (Ex 34:7). But mortal men are also responsible for observing the covenant (Deut 33:9; Ps 25:10) and the precepts or law of God (Ps 78:7; 105:45; 119:2, 22, 33, 34, 56, 69, 100, 115, 129, 145). Even the commands of parents (Prov 6:20; 28:7) and the discipline of wisdom (Prov 3:1, 21; 4:13; 5:2) require the same kind of faithful observance.

God is spoken of as guarding from danger or preserving a man's life (Ps 25:20; 40:12; Prov 24:12), the king (Ps 61:8), peace (Isa 26:3), Israel (Deut 32:10; Isa 42:6; 49:8), the faithful and their lives (Ps 31:24; Prov 2:8), and knowledge (Prov 22:12). The Lord also protects the righteous from this generation (Ps 12:8), trouble (Ps 32:7), the secret plots of the wicked (Ps 64:2), and violent men (Ps 140:2, 5).

Wisdom keeps those who do not forsake her (Prov 4:6). So discretion watches over her children (Prov 2:11) and righteousness watches over her (Prov 13:6).

In three instances, *nāṣar* is used of guarding in the sense of "keeping secret." In Isa 48:6 it refers to hidden things previously not revealed by God. In two other passages the meaning is negative. The "secret places" of sin where rebellious Israel spends her nights incubating (i.e. sleeping with the idols in order to receive dreams about the future, Isa 65:4) and the secret or crafty mindedness of a seductress (Prov 7:10).

Another meaning is of keeping closed or blockaded cities under attack. In Jer 4:16, the Qal plural active participle seems to refer to the blockaders themselves, while in Ezk 6:12(?) and Isa 1:8 it points to the besieged or blockaded city.

Taken altogether, it is no wonder that Isaiah calls the revived tribes of Israel in that eschatological era the preserved of Israel (49:6), for they surely have experienced the constant protection and preservation of the Lord.

Bibliography: THAT, II, pp. 99–100.

W.C.K.

1408 נָצַר (*nāṣar*) II. Assumed root of the following.

1408a נָצַרָה (*nēṣer*) *branch, shoot, sprout*.

This noun, coming from an Arabic root meaning "to be fresh, bright, grown green," appears only four times.

In Isa 11:1, *nēṣer* is used in parallelism with another technical term (in the messianic promise doctrine), *hōṭer* "shoot." Since both are said to go forth from the *shōresh* "root" or line of Jesse,

obviously the prophet intends to refer to a key descendant of David who epitomizes all that the Lord has promised to David (II Sam 7:1ff.). The messianic character of this title is recognized in the Targum, rabbinical literature, and the Qumran material (cited in *The Nezer and the Submission in Suffering Hymn from the Dead Sea Scrolls* edited by M. Wallenstein [Istanbul, 1957]). The use made of this title by Matthew in 2:23 to indicate why Jesus was called a Nazarene is similar. Gundry sees for Matthew's use a double reason: the phonetic correspondence of this title in Isa 11:1 with the town of Nazareth as a play on words and the lowliness motif of Isa 11:1.

In keeping with the concept of corporate solidarity evidenced in other technical terms in this same messianic promise doctrine such as "servant," "seed," *ṣemah* "branch," etc., it is not unusual to see a use of *nēṣer* which includes the believing remnant of Israel in Isa 60:21. The fulfillment of the Abrahamic-Davidic-New Covenant finds all the people righteous, the land possessed forever and the "shoot" of God's planting, the work of his hands, glorified (cf. Isa 61:3). Thus the many can be called by the name of the One who epitomizes that group.

The other two references (Isa 14:19 and Dan 11:7) are unrelated to the previous passages. In Isa 14:19, Babylon is called a "discarded branch" (rsv guesses poorly with "untimely birth" but includes in the margin "a loathed branch"). The Daniel passage uses our word to refer to a royal power, here one of the Ptolemies, not of the messianic royal person to come from the line of David. The idiom is also connected with the word "root" as in Isa 11:1, "from a branch of her roots shall one stand up."

W.C.K.

1409 נָקַב (*nāqab*) *pierce, bore; blaspheme; appoint*.

Derivatives

1409a נָקַבָּה (*neqeb*) *technical term relating to jeweller's work*.

1409b נְקֵבָה (*n'qēbā*) *female*.

1409c מַקְקֵבֶת (*maqkebet*) I, *hammer*.

1409d מַקְקֵבֶת (*maqkebet*) II, *hole*.

The basic physical sense of the verb *nāqab* is demonstrated in the context of Joash's temple repair project. The priest Jehoida bored a hole in the lid of a chest for contributions. Elsewhere, Haggai (1:6) speaks figuratively of the futility of work which fails to honor the Lord, saying that

1410 נָקַד (nqd)

the wages earned have been placed into a bag with holes.

The other senses attributed to this verb in passages which themselves indicate different usage constitute a striking demonstration of the semantic flexibility of Semitic languages. The ingenuity of modern lexicographers is indeed taxed. Does the verb "pierce" mean, secondarily, appoint, designate, name by way of the physical notion of ticking or marking an individual as distinctive (a cognate Arabic noun means 'leader, chief'), or is the select individual the one who 'scrutinizes' and thereby distinguishes himself? The former explanation seems the more satisfactory. But this verb also translates curse, blasphemy. Is this so because one is thereby distinguishing another as bad (so Koehler), or is there not a closer tie with piercing, striking through? Some lexicographers (BDB) consider this last sense of *nāqab* to be a different root *naqab* II, a by-form of the root *qābab* "curse," found only in Num 22 and 23, but the reverse relationship could as likely be the case.

Interestingly, this word is used in the Siloam inscription for "piercing through," i.e. digging the tunnel.

neqeb. The meaning of this noun, which occurs in Ezk 28:13, is uncertain. Suggestions include "pipes" (KJV), "engravings" (RSV), and "mines" (Holliday's lexicon, following W. F. Albright in BASOR, No. 110).

n^eqēbā. *Female, female child, woman.* Both the human (Gen 1:27 and elsewhere) and the animal (Gen 6:19 and elsewhere) female is denoted by *n^eqēbā* for descriptive reasons. (A different suggestion was offered, however, in ZAW 11, by Schwally.) While in one case (Jer 31:22 [H 21]) the term *n^eqēbā* is used in contrast to *geber* "man, hero," it chiefly stands, whether with human or animal referent, in contrast to *zākār* "male."

maqqebet I. Hammer. The meaning "hammer" is uncontested: Jud 4:21 (Jael), I Kgs 6:7 (noise being absent from temple's construction), Isa 44:12 and Jer 10:4. For plural forms some lexicons suggest a noun variant, *maqqābā*. Opinions vary as to derivation of the name Maccabee.

maqqebet II. Hole, excavation, quarry. Occurs only in Isaiah's call to Israel to consider their humble origins (Isa 51:1).

M.C.F.

1410 נָקַד (nqd) I. Assumed root of the following.

1410a נָקַד (nāqōd) *speckled* (Gen 30:32; 31:8).

1410b נִקְּדָה (niqqūd) *what is crumbled or easily crumbles, crumbs* (Josh 9:5); hard biscuit or cake (I Kgs 14:3).

1410c נִקְּדָה (n^eqūddā) *point or drop* (Song 1:11, only).

1411 נָקַד (nqd) II. Assumed root of the following.

1411a נִקְּדָה (nōqēd) *sheep raiser,—dealer, or —tender* (II Kgs 3:4; Amos 1:1).

1412 נָקָה (nāqā) *be clear, free, innocent, desolate, cut off.*

Derivatives

1412a נָקִי (nāki) *clear, innocent.*

1412b נָקִיָּה (nāqī) *innocent* (Joel 4:19; Jon 1:14).

1412c נִקְּיָיוֹן (niqqāyōn) *innocency.*

1412d מִנְּקִיָּה (m^enaqqiyā) *sacrificial cups, bowls.*

The derivative *m^enaqqiyā* may provide the key to the basic sense of the verb *nāqā*. GB and KB tie it to Akkadian *naqū* "offer a libation" (plus Syriac noun "libation") and BDB cites the Syriac verb "pour out, make a libation" and suggests that while the Arabic cognate means "cleanse," the original sense was probably "empty out," hence the uses "pour" and "be empty, clean."

The root *nāqā* with the meaning "to be clean, pure, spotless" is found in Akkadian, Arabic and Aramaic. In Dan 7:9 [Aramaic] the Ancient of Days is described as having hair "like pure (*n^eqē*) wool." The derived juridical notion "to be acquitted," "to go unpunished" is found only in Hebrew.

From the basic notion "to be poured out" the word may derive notions with either favorable or unfavorable connotations. It has an unfavorable connotation in Isa 3:26 "deserted she [the daughter of Zion] will sit on the ground." The RSV change of the poetic figure from "deserted" / "desolate" to "ravaged" is an overtranslation and destroys the imagery. The reference is to a city having been emptied of its inhabitants. (See also Amos 4:6 where the substantive *niqyōn* is used for "cleanness of teeth," a figure for lacking food.) Here too we should discuss Joel 3:21 [H 4:21]. Surprisingly the NASB, which otherwise slavishly follows MT, emends this passage against G.R. Driver and C. van Leeuwen. Driver renders the verse: "And I will pour out its blood, which until now I have not poured out" (JThSt 39:402). NIV: "Blood which I have not pardoned I will pardon." After considering other options

C. van Leeuwen concluded: "In any case the text ought not to be emended to *niqqamti* [I will be avenged] (against BHS and KBL 632b), a reading, not presupposed by the LXX" (THAT, II, p. 102).

Otherwise the word evokes favorable connotations. It may be used to denote freedom from an oath. Thus Abraham says to Eliezer: "But if the woman is not willing to follow you, then *you will be free* from this my oath" (Gen 24:8; cf. Josh 2:17, 20 where the adjective is used with the same notion).

Of the forty occurrences of this verb the vast majority have an ethical, moral, or forensic connotation. The fact that in the Piel (transitivizing) stem it is synonymous with *šadaq* Piel or Hiphil (which see) should bear adequate testimony to its significance. *nāqâ* is found only once in the Qal stem (an infinitive absolute modifying a Niphal), otherwise it is exclusively in the Niphal or Piel. This tends to reinforce the analysis: "poured out, emptied" yields "be freed, cleared, cleansed, innocent."

A political use of this word, namely, freedom or exemption from some obligation such as military service (Deut 24:5), serves to sharpen its forensic sense of being freed from punishment. A husband is declared free from iniquity if, in declaring his wife unfaithful, he follows the legal procedures before the priest (Num 5:31).

This passage is instructive for it shows that *nqh* is the opposite of 'āwōn (q.v. "guilty"). The passage reads: "He shall be free from guilt (*w^eniqqâ . . . mē'āwōn*) but that woman will bear her guilt." In other passages, however, 'āwōn is omitted. Thus Samson says after his father-in-law has given his wife away to another man: "This time I will be blameless [*niqqēti*]" (Judg 15:3).

Just as 'āwōn may refer to the act of sin, the punishment for the sin, or the state between the act and the punishment "guilt," so also *nāqâ* can refer to the release from the state between the implied wrong and punishment="guiltless, innocent" or to the release from punishment="go unpunished." As an example of the first, in addition to Num 5:31 and Judg 15:3, we may cite II Sam 14:9: "And the woman of Tekoa said, 'O Lord, the king, the iniquity [*he'āwōn*] is on me and my father's house, but the king and his throne are *guiltless* [adj. *nāqî*]. As an example of the latter note: "whoever touches her [a neighbor's wife] will not go *unpunished* [*yin-nāqeh*]" (Prov 6:29; cf. 19:5, 9; 28:20). Likewise Ex 21:19 legislates—"that when two men fight and the one struck is still able to walk, then he who struck him shall go *unpunished* [*w^eniqqâ*]." (The adjective may have this same force; cf. "the owner of the ox shall go *unpunished* [*nāqî*]" (Ex 21:28). The word is sometimes negatized, of course, yielding a strong reprimand: "the wicked

shall not be unpunished" (Prov 11:21), or used in interrogation: "should ye be utterly unpunished?" (Jer 25:29).

The release from obligation or from guilt/punishment [adjective or Niphal of *nāqâ*] is often presented as determined by [*min*] the LORD. Thus, the release of the Transjordanian tribes from military service after the Conquest is said to be "free of obligation before the LORD" (*wih^eyitem n^eqiyyim mēYHWH*)" (Num 32:22). So also the LORD alone is able to free one from an oath made in His name (Josh 2:17–19). With respect to the blood of Abner, David declares: "I and my kingdom are innocent before the LORD [*nāqî . . . mē'im YHWH*]" (II Sam 3:28; cf. I Sam 26:9). In many passages the *min* is omitted but the thought remains the same. In Prov 16:5 "he [the proud] will *not go unpunished*" is parallel to "an abomination to the LORD" (cf. Prov 11:21; 17:5). The point is underscored in Jer 2:35 where Judah claimed innocence [*niqqēti*], but since this was not God's verdict he will enter into judgment with her. In all these passages the verdict belongs to the LORD and he works out the course of judgment in the destiny of those under his jurisdiction.

In the case of the Piel *nqh* it is always (with the exception of I Kgs 2:9) the LORD who is the subject. Thus he is the one addressed in petitions for *acquittal* (e.g. "Acquit me of hidden faults" (Ps 19:12 [H 13], or the One who does not leave the sinner unpunished (Ex 20:7; 34:7; Jer 30:11; 46:28; Job 9:28).

Likewise, in the case of the adjective when it means "innocent" it is God who assumes responsibility for the guiltless. Thus he holds himself responsible for innocent blood (Deut 19:10, 13; II Kgs 24:4; Jer 2:34f; 19:3f; 22:3ff; *passim*). Job, however, in a trough of pessimism, observes that God destroys the innocent with the guilty (Job 9:23).

Not only may the sinner himself be cleansed, freed of guilt, acquitted or held innocent, but a place may be purged of the evil found in it. The "cutting off" of liars and perjurers from the land spoken of in the vision of the flying roll (Zech 5:3) would amount to a purging or cleansing of the land from evil.

Perhaps the most highly technical of all uses of this expression is in regard to freedom or exemption from the obligations of an oath (Gen 24:8, 41) or from the effects of the curse inherent in the trial of an accused woman, in which she is required to drink the bitter water offered by the priest (Num 5:19).

nāqî, nāqî'. *Blameless, innocent, guiltless, free, exempted, clean (of hands).* (Both ASV and RSV use "guiltless" three times in Josh 2 for KJV sequence "blameless, guiltless, quit." RSV also em-

plays "free" for "clear" and "free of obligation" for "guiltless before" in Num 32:22.

The adjective *nāqī* and its variant *nāqī'* refer to persons declared innocent, free, or exempt from charges or obligations, or to innocent blood (that is, shed blood of an unoffending or innocent party), as well as "clean hands," a figure for innocent behavior. (See the familiar Ps 24:4.)

It has the notion of freedom/exemption from an obligation in the legislation for the newly married man: "He will be *free* from military service" (Deut 24:5). Regarding Asa's proclamation that Ramah must be dismantled none was exempt from the labor (I Kgs 15:22). It denotes freedom from slavery in Gen 44:10 where Joseph warned: "With whom [the stolen cup] is found shall be my slave, and the rest of you shall be *free* or innocent. (The technical term for freedom from slavery is *ḥopshī*.)

Otherwise the adjective has the juridical notion of "guiltless, blameless, innocent" (Job 4:7; 27:14; *passim*). Its use alongside of the "righteous" is especially effective in Ex 23:7: "... the innocent and righteous slay thou not: for I will not justify the wicked." Cf. the great declaration of God's character in similar terms in Ex 34:7. One speaks of "the blood of the innocent" [*dam hannāqī*] or (mostly) of "innocent blood" [*dam nāqī*] where a guiltless people are threatened with intentional homicide or murder (Deut 27:25; I Sam 19:5) or in cases where their life is actually taken (Deut 19:13; II Kgs 21:16; 24:4; *passim*). Sometimes it is not clear whether the innocent are being threatened or have been killed (Deut 19:10). (For bloodguilt see *dām*).

nāqī in contrast to *tāhar* "to be pure" is not a cultic term; e.g. it is never found in the book of Leviticus. The "clean hands" in Ps 24:4 speak of ethical purity and hence juridical acquittal. The nominal form *niqqāyôn* may have a cultic sense in Ps 26:6 because of the parallel line "I will go about Thine altar, O LORD." But the same expression in Ps 73:13 denotes ethical purity.

niqqāyôn. Innocency, cleanness (of teeth). Strongest of the five occurrences is Hos 8:5. God taunts the rulers of idolatrous Israel ("Samaria"), asking when and how they will ever manage innocency. The figurative "cleanness of teeth" (Amos 4:6) implies a want of food to eat. Remaining instances speak of "innocency of hands" or of "washing hands in innocency"—ceremonial purification representative of a pure heart and honest conduct.

m^cnaqqiyā. The *m^cnaqqiyā* was apparently a golden bowl (some say "dipper" or "tube") placed on the table of showbread and used for the drink offering. It was important enough to be listed in Jer 52:19 as being taken to Babylon. For this last item, see James L. Kelso, *The Ceramic*

1413 נָקַם (*nāqam*) *take vengeance, revenge, avenge oneself, be avenged, be punished* (cf. *gō'ēl* as the "avenger of blood").

Derivatives

1413a נִקְמָה (*nāqām*) *vengeance*.

1413b נִקְמָה (*n^cqāmā*) *vengeance*.

Although this root, including its derivatives, is only used about seventy times in the OT, it expresses a truth that is theologically important, but greatly misunderstood. Vengeance and revenge are ideas that would appear to have no good ethical validity whether coming from God or man. But such is not the case when the use of this root is properly understood in its OT setting and NT application.

The concept of divine vengeance must be understood in the light of OT teaching about the holiness and justice of God and its effect on man as a sinner. In terms of the presuppositions of some modern "Christian" theologies, such a God of vengeance will be labeled unchristian and unethical. Understood in the full orb of biblical revelation, balanced as it is by the mercy of God, divine vengeance is seen to be a necessary aspect of the history of redemption.

Study of the use of this root reveals that there are comparatively few cases where man is considered a proper source of vengeance. Often man is a secondary cause while God is the source (Ezk 25:14). This is normally the case where the Israelites avenge themselves on their enemies (Josh 10:13). In Num 31:2–3, the Israelites' wreaking vengeance on the Midianites (v. 2) is equivalent to the Lord's doing so (v. 3). In some instances God instructs his people when such vengeance is called for in his behalf (e.g. Num 31). Other passages warn men not to take vengeance in their own hands (Lev 19:18; Deut 32:35). Even though *nāqam* is not used in Gen 9:6, capital punishment is required for murder because man is made in the image of God, and to take his life without divine permission is considered to be an offense against God as well as man.

Most of the uses of *nāqam* involve God as the source of vengeance. The classical passage is

Deut 32:35, 41, "Vengeance is mine . . . I will recompense them who hate me." God cannot be true to his character of holiness and justice if he allows sin and rebellion to go unpunished. The prophets stressed "the day of the Lord's vengeance" (Isa 38:8; 61:2; 63:4) as times in history when the Lord sets the record straight. This was Jeremiah's view of the fall of Jerusalem. Since in the course of history the record can never be totally straight the prophetic *eschaton* or final day of the Lord's vengeance is called for. Such a day is in mind in Isa 63:1-6. Here God treads out the winepress alone and tramples his enemies in his wrath (Rev 19:75). Likewise in the NT retribution, a notion essential to its message, belongs essentially to the future world rather than the present.

The Bible balances the fury of God's vengeance against the sinner with greatness of his mercy on those whom he redeems from sin. God's vengeance must never be viewed apart from his purpose to show mercy. He is not *only* the God of wrath, but must be the God of wrath in order for his mercy to have meaning. Apart from God himself the focus of the OT is not on the objects of his vengeance but on the objects of his mercy, his special possession (*s'gûlâ*), his very own people with whom he has an eternal covenant.

There are two ways in which God takes vengeance with regard to his people. First he avenges his people in the sense that he becomes their champion against the common enemy (Ps 94). Secondly, as the covenant God, he punishes those who break covenant with him. "I will smite you seven times, even I for your sins. And I will bring a sword upon you, that shall execute the vengeance of the covenant" (Lev 26:24-25).

The OT people are reminded that it is only God who can champion his own cause without error (Deut 32:35). This verse is echoed by Paul in Rom 12:19 as he warns against a vindictive spirit on the part of God's people. It is also used by the author of Hebrews to warn of the horror of coming under the avenging wrath of God (10:28-31).

Because of the OT expressions of just hatred against God's enemies who also sought to destroy his people (Ps 54) we tend to feel that the OT teaches one must always hate his enemies. That this is not true may be seen from Paul's quotation of Prov 25:21-22 in Rom 12:20. "But if thine enemy hunger feed him," etc. The ancient Hebrews, like many modern Christians, misapplied the doctrine of divine vengeance and used it as an excuse for harboring vengeful feelings against each other. In Mt 5:43ff. Jesus was rebuking this misapplication and in such places as Mt 19:19 (cf. Mk 12:31) he is really quoting Lev 19:18. "You shall not avenge or bear a grudge against the children of your people but love your neighbor as yourself, I am the LORD."

The OT institution of blood revenge was strictly a legal matter to meet the need for justice in a tribal community where no central government existed to create a society where people could live together without confusion. Governments have always avowed that their purpose is to render justice and punish wrongdoers (cf. The Prologue to Hammurabi's Code in ANET). Blood revenge is still a pattern which exists in the minds of bedouin-oriented people in the Near East. The government of Jordan makes allowances for this frame of mind in its judicial processes. Under such a system justice is to be meted out by the closest relative of a murder victim. The cities of refuge were a refinement of this common law practice, to provide justice in cases of manslaughter (Num 35:9-28, etc.). These legal institutions are based on that principle of absolute and equal justice summarized in "the law of the tooth" (*lex talionis*). But the eye for an eye and tooth for a tooth principle (Ex 21:23-25; Lev 24:19-20; Deut 19:21) was not meant to be applied privately. It was a judicial process under divine sanction. Jesus is not rejecting the OT doctrine of just punishment when he teaches that this law was not meant as a rule for interpersonal relationships. The latter was a misapplication of it by the Jews of his day.

nāqām, n'qāmā. Vengeance. These nouns have no difference in meaning and are both used with a variety of verbs. God is said "to take vengeance" (Isa 47:3), "to return vengeance" (Deut 32:41, 43), "to do (execute) vengeance" (Mic 5:14), "to come with vengeance" (Isa 35:4), and "to give out (execute) this vengeance" (Ezk 25:14). This action often involves the shedding of blood because blood has been shed (Ps 79:10).

Bibliography: THAT, II, pp. 106-108.

E.B.S.

1414 נָקַף (*nāqa'*) *be alienated, estranged* (Ezk 23:18, only).

1415 *נָקַף (*nāqap*) *I, strike off.* Occurs in the Niphal (Isa 10:34) and Piel (Job 19:26).

Derivative

1415a נָקַף (*nōqep*) *striking off* (Isa 17:6: 24:13).

1416 נָקַף (*nāqap*) *II, go around, compass, to round.*

Derivative

1416a נִקְפָּה (*niqpā*) *encircling rope* (of captive, Isa 3:24).

nāqap is used primarily in the Hiphil, "make or let go around." Days "run their course" (Job 1:5), with men "taking turns" at hosting ban-

1417 נָקַק (nqk)

quets. In the sense of surround, encircle, our verb is often paralleled with the more common *sābab* (see, for example, Ps 22:16 [17]). Hunting nets are cast, drawn around (Job 19:6) and Israelites are forbidden to shave or trim around the head (leaving a tuft of hair on top, emulating pagan cultists—Lev 19:27), in some of the more specific or technical uses of *nāqap*.

At the other extreme, a broad connotation results from the occurrence of this verb in Isa 15:8, where a cry going around the borders of Moab would imply “everywhere.”

M.C.F.

1417 נָקַק (nqk). Assumed root of the following.

1417a נָקִיק (nāqīq) *cleft of a rock*. Only used with *sela'* “rock” (Isa 7:19 and Jer 13:4; 16:16).

1418 נָקַר (nāqar) *bore, pick, dig* (e.g. Prov 30:17; Num 16:14).

Derivative

1418a נִקְרָה (nēqārā) *hole, crevice* (Ex 33:22; Isa 2:21).

1419 נָקַשׁ (nāqash) *knock, strike* (e.g. Ps 9:17; Deut 12:30).

נֵר (ner). See no. 1333a.

1420 נֶרְדַּ (nērd) *spikenard*.

This noun, occurring only three times in the Old Testament (all in Song, verses 1:12, 4:13–14) denotes the fragrant oily essence of the North Indian *Nardostachys jatamansi*, a perennial related to valerian. The name derives from a Sanskrit verb, *naladā* ‘exhaling a scent’, and likely came into both Hebrew and Greek usage via Persian *nārdin*.

In Solomon’s Song descriptions of both the king and the bride are embellished by reference to this highly regarded scent, still used in India as a perfume for the hair. Imported into the Holy Land in biblical times in sealed alabaster boxes, it was reserved for very special occasions. Such an occasion was Mary’s anointing of Jesus’ feet at the dinner given to celebrate the resurrection and restoration to the family circle of her brother Lazarus. Its worth is evidenced in the same account (see John 12:3–5) by Judas’ complaint that a pound of the ointment when sold could have added some seventy-five dollars to his fund for the poor.

Bibliography: W.E.S. Cooper, “Spikenard,” in ZPEB.

M.C.F.

1421 נָשָׂא (nāšā') *lift, carry, take*.

Derivatives

1421a נָשָׂא (nēšū'ā) *what is carried about* (Isa 46:1, only).

1421b נָשִׂיא (nāšī') *I, prince, captain, leader*.

1421c נָשִׂיָּא (nāšī') *II, rising mist, vapor* (e.g. Jer 10:13; 51:16).

1421d מַשָּׂא (maššā') *I, load, burden, lifting*.

1421e מַשָּׂא (maššā') *II, burden, oracle*.

1421f מַשָּׂא (maššā') *lifting up* (partiality, II Chr 19:7).

1421g מַשָּׂאָה (maššā'ā) *the uplifted* (cloud, Isa 30:27).

1421h מַשָּׂעֵת (maš'ēt) *uprising, uplifting, burden, portion*.

1421i שִׂיָּא (šī') *loftiness* (figurative of pride, Job 20:6).

1421j שָׂעֵת (šē'ēt) *exaltation, dignity* (Gen 49:3), *swelling* (Lev 13:2), *uprising* (Job 41:17).

The Qal form of this root is used almost six hundred times with basically three separate meanings: “to lift up”; “to bear, carry, support”; and “to take, take away.” The root appears in Ugaritic as *nš'* “lift, rise” and in Akkadian as *našū*. An additional sixty occurrences use the Niphal, Piel, and Hithpael stems. There are only two instances of the Hiphil stem, Lev 22:16 and II Sam 17:13, the latter being textually dubious. The total for all stems of this verb is 655.

The meaning “to lift up” is used both literally and figuratively in many phrases. “To lift up the hand” in taking an oath (Deut 32:40; Ezk 20:5, 6, 15 etc.), in doing violence (II Sam 18:28), as a signal (Isa 49:22) and in punishment (Ps 10:12). “To lift up one’s head” in restoration to honor (Gen 40:13, 20), in showing cheerfulness and independence (Job 10:15; Zech 2:4; Ps 83:3), and as a figurative expression for the lintels of the gates of the city (Ps 24:7, 9). “To lift up one’s face or countenance” as an indication of a good conscience, confidence, favor, or acceptance (II Sam 2:22). “To lift up the eyes” often pleonastically before verbs of looking or seeing (Gen 13:10, 14), in love or desire to men (Gen 39:7), towards God (Ps 123:1), and to an idol (Ezk 18:6, 12, 15). “To lift up the voice,” also used pleonastically before verbs of weeping and crying (Gen 27:38; I Sam 30:4), and to indicate rejoicing (Isa 24:14). “To lift (anything) with the voice” such as the name of the Lord, (Ex 20:7), prayer (II 19:4; Jer 7:16; 11:14), a song (Num 23:7), and reproaches (Ps 15:3). The heart “lifts one up” thus inciting action (Ex 35:21, 26; 36:2), or presumption and pride (II Kgs 14:10). It is also in this category of lifting up or taking up that the first of three important meanings appears connecting this word with sin. Men can take up, in-

cur, or contract iniquity and sin by profaning the Tabernacle (Ex 28:43; Num 18:22), by hating their neighbors (Lev 19:17), by touching animal carcasses (Lev 22:9), or by profaning the offerings of the Lord (Num 18:32).

The second semantical category, of bearing or carrying, is used especially of bearing the guilt or punishment of sin. Thus Cain complains in Gen 4:13, "My punishment is greater than I can bear." The expression "he shall bear his iniquity" occurs frequently (Lev 5:1, 17; 7:18; Num 5:31; 14:34, etc.). This leads easily into the idea of bearing the guilt of another by representation or substitution (Lev 10:17) or of the scapegoat (Lev 16:22). The root *sābal*, "to bear a burden" in Isa 53:11 is paralleled in the next verse by *nāšā* "the Servant bore the sins of many," as in Isa 53:4. Such debits could also be passed from father to son on a temporal basis affecting one's earthly existence (Num 14:31, 33). But Israel was wrong in fatalistically applying it to a continuing and necessary state of affairs, especially on into eternity, as they had argued (Ezk 18:19–20), for the opposite is clearly stated in Deut 24:16.

The third category stressed the taking away, forgiveness, or pardon of sin, iniquity, and transgression. So characteristic is this action of taking away sin, that it is listed as one of God's attributes (Ex 34:7; Num 14:18; Mic 7:18). Often this form of *nāšā* is used in prayers of intercession, e.g. by the messenger of Joseph's brothers (Gen 50:17), by Pharaoh (Ex 10:17), by Moses for Israel (Ex 32:32; Num 14:19), by Abigail for Naboth (I Sam 25:28), and by Saul to Samuel (I Sam 15:25). It is used by Joshua in his farewell address (Josh 24:19). No doubt the classical expression of this meaning is to be found in Ps 32:1, 5. Sin can be forgiven and forgotten, because it is taken up and carried away.

The passive, intensive, reflexive, and causative ideas of the three basic categories are often seen in the other stems listed but without application to the doctrine of sin except perhaps for such unusual instances as the Hiphil in Lev 22:16, cause one to bear iniquity.

nāšī' 1. *Prince, captain, leader, chief, ruler.* It is used 128 times, 60 times to denote various leaders of Israel (Num 1:16, 44; chapters 2, 7, 34).

The same word denotes the non-Israelite chieftains of Ishmael (Gen 17:20; 25:16), the Midianite leaders (Num 25:18; Josh 13:21), the Canaanite prince of Shechem (Gen 34:2), the prince of Egypt (Ezk 30:13), Meshech and Tubal (Ezk 38:2–3; 39:1), and the princes of the earth (Ezk 39:18).

Some, including Ephraim Speiser, (AB *Genesis*, p. 170) argue that *nāšī'* designates an official who has been "elevated" or "lifted up"

in or by the local assembly. Hence it means "lifted up," and thus "elected." Usually the phrase "these are the ones chosen (or called)" (Num 1:16) is cited in support of this etymology.

The term applies to any ruler of God's people (Ex 22:28 [H 27]), to the leaders of the congregation (Ex 16:22; Josh 9:15, 18; 22:30 etc.), and to Solomon (I Kgs 11:34).

But the most significant use of the term is found in the writings of the prophet Ezekiel. Of its thirty-six usages, no less than twenty refer to the future Davidic prince, the Messiah. While Ezk 34:24 and 37:25 are clear, the remaining references to the eschatological prince in Ezk 44, 45, 46, 48 are debated because he is portrayed as having no priestly rights, offering a sin offering for himself (45:22), and having sons (46:16). Charles Feinberg believes that he is a "future scion of David's dynasty who will represent the Messiah governmentally in the affairs of the earth."

maššā' 1. *Load, burden, lifting, bearing, tribute.* The word occurs thirty-nine times and in its most natural setting refers to the load or burden upon the backs of such animals as the ass (Ex 23:5), mule (II Kgs 5:17), and camels (II Kgs 8:9). Isaiah identifies one such load as the dumb and ineffective idols of the Babylonians, which were carted away as part of the captivity (Isa 46:1–2). Perhaps II Chr 17:11 belongs in this category, "silver by the load," i.e. in great quantities, or "carried or brought silver as tribute."

One of the most common usages of this noun is found in Num 4:15, 19, 24, 27, 31, 32, 47, 49 where the Kohathites, Gershonites, and the sons of Merari are assigned to carry various parts of the Tabernacle.

A debated passage is I Chr 15:22, 27. The translation of *šar hammaššā'* as the leader of the music is indefensible. The root meaning is "to lift," not "to utter." Keil notes that the LXX, Vulgate, and Luther (and we might add the RSV, NEB, NAB, NASB, NIV and partially the JB) were wrong in connecting the word for "burden" with singing; rather the context deals with bearing the ark and *maššā'* is the normal word in that context. This passage is to be equated with Num 4; II Chr 20:25; 35:3.

In the class of figurative usages is the interesting Ezk 24:25 which uses a nominal verb, "the uplifting of their soul," to mean "their heart's desire," i.e. that to which they are lifting up their soul. Isa 22:25 contains a debated Messianic reference to the "peg" or "nail," *yātēd*. The burden placed upon this "peg" will be cut down and will fall. Whether that burden is Shebna (David Baron) or Eliakim (E. J. Young) is at issue, but certainly it is a figurative reference to some crooked Israelite official. This is similar to the

people being a burden (Num 11:11, 17; Deut 1:12; II Sam 15:33; Job 7:20). The Psalmist even refers to his iniquities as a weighty burden (Ps 38:4 [H 5]).

maśšā' II. A *burden*, i.e. a prophetic speech of a threatening or minatory character (rsv oracle). The word appears twenty-seven times, only in prophetic contexts, with the exceptions of Prov 30:1; 31:1.

Two different translations have been given to this word from pre-Christian days. The earliest to be commonly received was "burden." This was the view of the Targum of Jonathan, Aquila, the Syriac version, Jerome (on Nah 1:1), Luther, Calvin Hengstenberg, and J. A. Alexander. However, others took it to mean "oracle," "utterance," or "prophecy," positing a hypothetical root *nāšā'* "to utter" or "to receive." In this camp can be listed the LXX, Cocceius, J. D. Michaelis, Lowth, and E. J. Young.

The most definitive argument supporting the former translation is found in E. W. Hengstenberg's *Christology of the OT* on Zech 9:1 (III, pp. 339-43). The argument correctly notes that: 1. The contents of these prophecies consist exclusively of threatenings; 2. The word *maśšā'* is never followed by the genitive of the speaker, such as *n'ām* of YHWH, but is always connected with the genitive of the object, e.g. the *maśšā'* of Babylon, of Moab, etc. Unless there intervenes an additional item such as in Zech 9:1; 12:1; Mal 3:1 ("the *maśšā'* of the Word of the Lord"); 3. The word *maśšā'* exhibits no examples of a noun derived from *nāšā'* in the sense of "to utter"; and 4. even the so-called exceptions of I Chr 15:22, 27 (see *maśšā'* I); Lam 2:14; Zech 12:1; and Jer 23:33ff. are proofs of this view rather than evidences to the contrary.

The proper rendering of Lam 2:14 is that the false prophets "have seen vain burdens and captivities for thee"; not "vain and misleading prophecies." The predicted burdens and threats of dispersion directed against the imperial powers never materialized. The word *maddūhim*, can only mean "dispersions" or "captivities," so therefore *maś'ōt* must relate to the enemy.

Neither is Zech 12:1 a passage of cheer. A similar point can be made in the Jer 23:33, 34, 36, 38 passage. The offense of the scoffers was not that they imputed the negative meaning of burden to *maśšā'* by which Jeremiah meant a cheerful prophecy, but rather that they poked fun at these severe announcements of judgment from the Lord. They asked, in a mocking tone, what new burdensome word he had for the fine folks of Jerusalem. But this all proves that they caught the point: it was a burden, not just a prophecy or utterance!

Isaiah uses this burden form for his messages against the foreign nations. It occurs ot 13:1

(Babylon), 14:28 (Philistia), 15:1 (Moab), 17:1 (Damascus); 19:1 (Egypt), 21:1 (Babylon), 21:11 (Dumah), 21:13 (Arabia), 22:1 (Valley of Vision), and 23:1 (Tyre). He also uses it in the midst of his six woes in 30:6 (the beasts of the Negeb). These messages are all minatory in nature, although occasionally there is subjoined a rose-tinted promise such as the one in Isa 19:16-25.

Additional burdens deal with Nineveh (Nah 1:1), Judah (Hab 1:1), Damascus (Zech 9:1), Jerusalem (Zech 12:1), Israel (Mal 1:1), Zabad who murdered King Joash (II Chr 24:27), and King Joram (II Kgs 9:25).

Even the two passages in Proverbs are not exceptions. Agur's words in Prov 30:1 are a heavy burden laid upon reason, which quickly turns to exalting itself. This speech is mainly a rebuke, hence it is described as a "burden." Lemuel's word in Prov 31:1 likewise is a "burden in which his mother corrected him."

maś'ēt. *Uprising, uplifting, burden, portion.* There are seventeen occurrences of this word.

Basically it refers to smoke which rises (Jud 20:38, 40) or a signal which is lifted up (Jer 6:1). (Cf. the Lachish letter no. 4 line 10). The same basic motion is found in the lifting up of hands in prayer (Ps 141:2).

In line with the argument of *maśšā'* (prophetic speech, see above), it refers to the burden of reproach in Zeph 3:18. The same thought is found in Lam 2:14. The predicted burden or calamity aimed at the imperial powers by the false prophets never materialized.

The most interesting meaning is a portion, gift, present, or contribution which is carried to someone else. In Gen 43:34 it refers to the portions given to Joseph's brothers from his table, but in II Sam 11:8 it is David's present given to a loyal and unsuspecting Uriah. The ten tribes of Israel claim ten shares in King David as opposed to the two shares of Judah and Benjamin (II Sam 19:43 (the relative word *niśšē't*). Jeremiah is also released and given a present or largess (Jer 40:5).

Amos 5:11 uses it for a forced gift or an unjust exaction or taxation. This is exactly what the late Phoenician use of the word means, payment or tax. Therefore, it was also applied to sacred payments or contributions (II Chr 24:6, 9; Ezk 20:40).

W.C.K.

1422 *נָשָׂא (nāśag) *overtake, reach, take hold upon.* Occurs only in the Hiphil.

In all the translations, "overtake" is the most common rendering for *nāšaq*, which is found only in the Hiphil stem, often occurring as a complement to *rādap* "pursue." The lexicons suggest an etymological association with the concepts "attach, affix, entangle, seize." Its semantic range in Hebrew, however, lays stress on attainment, achievement, procurement. The acquiring of wealth or possessions is in view, for example, in several legal stipulations in Lev (see 14:21; 25:47), and possession of joy is in view in Isa 35:10.

Reaching a place is indicated in Gen 31:25, where Laban catches up with the fleeing Jacob, but attainment of a good age is the point of Gen 47:9. Physical threat is implied by David's warning concerning Absalom (II Sam 15:14), while a somewhat figurative adaptation occurs in reference to blessings and curses, Deut 28:2 and 15.

M.C.F.

נָשָׂא (n'šū'ā). See no. 1421a.

נָשִׂי' (nāšī'). See nos. 1421b, 1421c.

*נָשָׂק (nāšaq). See *šalūq* no. 2266.

1423 נָשָׂר (nšr). Assumed root of the following.

1423a מַשְׂסֹר (maššōr) saw (Isa 10:15, only).

1424 נָשָׂא (nāshā) I, lend on interest or usury, be a creditor.

Derivatives

1424a מַשְׂשָׂה' (mashshā') lending on interest (Neh 5:7, only).

1424b מַשְׂשָׂה' (mashshā') loan.

According to the context in which the verb form occurs, a man either has a creditor or he acts as a creditor against another. He "makes exactions" of the person indebted to him, often in the heartless manner implied in the old term "usury," the modern "loan shark." So serious a matter was this reckoned to be that in a psalm celebrating God's choice and care of David the latter is characterized as one having divine protection against this abuse (Ps 89:22 [H 23]). See also the verb *nāshak* "bite" which has a usage nearly synonymous to *nāshā*.

Psalm 55:15 [H 16] presents a problem as to whether to take the sense from this root, rendering it "let death exact upon them" (i.e. their "debt to nature") or from *nāshā* "deceive," "let death come upon them suddenly, or unawares." That these two roots are distinguished from one another in biblical Hebrew is clear, and *nāshā* I relates to an Arabic verb "postpone, sell on credit" while *nāshā* II relates to Arabic "remove." The second root is also apparently kindred with *shāw* "wickedness, falsehood, vanity." Nevertheless a sort of morpho-semantic

conflation may be involved in the case of this homonymic pair.

An interesting parallel to this latter suggestion is afforded by the common Semitic root *bādul*, which in biblical Hebrew means "separate." Whatever its connection with biblical Hebrew, the relationship of Ugaritic *bdl* "merchant" to Ethiopic (Tigre branch) *badla* "change, exchange, barter" can easily be seen. Yet in Ethiopic Tigrinya and Amharic *baddala* means to "wrong someone, commit a sin," an apparent semantic tie being found in the Tigre expression *kanfar badla* "change the lip" (= to break a promise), with an interesting Iranian Arabic cognate meaning to lie or deceive. Some such relationship between the two *nāshā* roots in Hebrew may have existed historically though now hidden from our eye by lack of inscriptional evidence.

(For still other approaches to the perplexities of this root, reference should be made to the Collected Writings of E. A. Speiser, *Oriental and Biblical Studies*, p. 140, as well as KB, where a relationship is seen to Akkadian *rāshū* "creditor" and Aramaic dialects where *rshy* and *rsh* have such meanings as "lay claim, take a loan." Speiser elucidates the ancient practice of usury by showing that loans were discounted with a normal interest, the "usury" consisted of a second interest exacted after a defaulting debtor was taken into servitude. (Cf. *neshek*.)

In the Qal, the sense of the participial form can be either debtor or creditor by context, the former also by use of a prepositional object, as *bī* "on, against me." In the Hiphil, the meaning is regularly "to exact, act as creditor."

māshshā'. Usury, debt (RSV interest).

mashshā'ā. Loan, debt. Both noun derivatives can refer to either the loan, the debt incurred, or the interest (usury) charged. Nehemiah 10:31 [H 32] adds an interesting procedural note, referring to the loan as "pledged by the hand."

M.C.F.

1425 *נָשָׂא (nāshā') II, beguile, deceive. Occurs in the Niphal and Hiphil only.

Derivatives

1425a מַשְׂשָׂה' (mashshā'ôn) guile, dissimulation (Prov 26:26, only).

1425b מַשְׂשָׂה' (mashshū'ôt) deceptions (Ps 73:18; 74:3).

Occurring just once in the Niphal stem, this verb is used mainly in the Hiphil in the sense of "lead astray, seduce, mislead, deceive," even for self-deception, as indicated in Jer 37:9 by addition of "your souls."

The debate as to how to translate Ps 55:15 [H 16] and the possible historic relationship in usage

1426 נָשַׁב (*nāshab*)

between this and the preceding verb (which see) has already been discussed.

The best known occurrence of this verb, of course, is in the famous passage in Gen 3 (at v. 13), where Eve makes her defense by shunting the blame for her offense off to the deceptive serpent. In all, this verb is employed little more than a dozen times in the OT, the concept of misleading or deception being conveyed also by several other verbs or special idioms. An example of the latter is the use of *gānab* "steal" in the sense of stealing away hearts or persons. *pātā* "flatter, entice, deceive," *rāmā* "beguile, deceive," and *shāqar* "lie, deal falsely," given in decreasing order of occurrences, are the other most frequently found synonyms.

M.C.F.

1426 נָשַׁב (*nāshab*) *blow* (Isa 40:7; Ps 147:18; Gen 15:11).

1427 נָשָׂה (*nāshā*) *I, lend, be a creditor.*

Derivatives

1427a נִשְׁי (*n^cshī*) *debt* (II Kgs 4:7, only).

1427b מַשְׁשֶׁה (*mashsheh*) *loan* (Deut 15:2, only).

1428 נָשָׂה (*nāshā*) *II, forget, deprive.*

Derivative

1428a נִשְׁיָא (*n^cshiyā*) *forgetfulness, oblivion* (Ps 88:13).

Because of the phenomenon of homonyms we have a translation problem in Job 11:6. ASV translates it, "God exacteth of thee," with marginal note, "or, remitteth (Hebrew 'causeth to be forgotten')." There is a probable Ugaritic cognate, given in *UT* 19: no. 1661 *nsy* (?) and a sure Ethiopic (Tigre branch) one, *nasā* "vanish from memory," *tanāsā* "forsake, forget."

Interestingly also, in Jer 23:39 there is the employing of an absolute infinitive of a root *nāshā* as modifier of our final-*he* root. Here the RSV reads, rather, *nāsā* "surely lift you up," perhaps on the strength of finding *sin* as the middle radical in several of the cognate languages. But since this is a normal variant between Hebrew and Arabic (plus Ugaritic and Ethiopic), only some Aramaic dialect occurrences would lend support to such an emendation.

A rendering of the verb as "deprive" occurs in Job 39:17, where in reference to strange behavior by the ostrich the idea "deprived of her wisdom" is expressed under the figure, "caused her to forget wisdom," as though she really ought to know better.

n^cshiyā. Forgetfulness. Occurs in a description of Sheol or Destruction (*Abaddon*), "the land of forgetfulness," i.e. oblivion (Ps 88:12 [H 13]).

M.C.F.

1429 נָשֶׁה (*nāsheh*) *a vein or nerve in the thigh* (Gen 32:33). Relation to above roots uncertain.

נָשִׁי (*n^cshī*). See no. 1427a.

נִשְׁיָא (*n^cshiyā*). See no. 1428a.

נִשְׁיָא (*n^cshiqā*). See no. 1435a.

1430 נָשַׁח (*nāshak*) *bite.*

Derivatives

1430a נִשְׁחָ (*neshek*) *interest, usury.*

1430b נִשְׁחָ (*nāshak*) *lend for interest, usury.* Denominative verb.

Wherever the verb "to bite" occurs in its literal physical sense in biblical Heb, it has a snake or serpent as its subject. In the one case where men (false prophets) are the "biters," the RSV translates paraphrastically, "when they have something to eat," as mentioned above (in Mic 3:5). The Hab 2:7 reference is a similar case in point. It is in the context of the famous statement, "the just shall live by his faith" that the unjust in Israel are asked, "shall they not rise up suddenly that shall bite thee," paralleled by "and awake that shall vex thee." But the ASV gives an alternate in the margin which suggests "exact usury of thee" for "bite," with RSV settling, quite simply, for "will not your debtors suddenly arise?"

Interestingly, the modern Amharic cognate is used not only of snakes but of dogs and other mammals, and even of the bee. (While classical Ethiopic has *nasaka*, the Amharic verb has a consonantal metathesis to *nakkassa*.) One is led to suspect that the broader usage of this verb is the more primitive, since the noun "interest" preserves a sense of "biting off" a portion, whereas this is not the impression given by a snake's bite.

Synonyms for "bite" in Hebrew are such verbs as *qāraṣ* "pinch, snip, tear" (the Ethiopic cognate of which has a noun derivative "tariff, customs"), *bāla* "swallow, eat greedily, devour" (with a beast as subject in Ex 7:12), and the common term for "eat," *ākal*, also "consume." Samson calls the lion "the eater" (Jud 14:14). Arabic writers employ the same epithet for lion.

For other means of expressing the concepts associated with payment or collection of "interest" ("usury" in KJV) see verbs *nāshā* and *nāshā*

with related derivatives. [With regard to the usage of the noun usury or interest, new study has clarified the situation as expressed in Lev 25:35–54. It is often supposed that this passage and the one in Deut 23:19–20 forbids one Israelite loaning on interest to another. Indeed, Israel was constantly reminded to give to the poor, but, as pointed out by Speiser, Lev 25 cannot oppose the charging of interest for the passage speaks of enslavement of the debtor (Lev 25:39; *Oriental and Biblical Studies, Collected Writings of E. A. Speiser*, ed. by Finkelstein and Greenberg, pp. 131–135, 140–141). He shows the terms *neshek* “usury” and *marbit* “increase,” find excellent parallels in tablets from Alalakh and Nuzi. There the arrangement is more fully known. Loans were made with the interest discounted at the start. A debtor might get only 80 shekels on a 100 shekel loan. This is the old use of the word *neshek*. When the loan came due, the man, if he could not pay, was seized (Lev 25:35 *w’heh’zaqtā bō* “and you shall seize him”). However, according to the surrounding practice and also according to Lev, no further interest or increase (*neshek* or *marbit*) could be charged. If a second interest as well as slavery were exacted, the debtor could likely never work off the loan. The Levitical code further enjoins humane treatment of the brother thus enslaved. This was not a feature of the legislation of the surrounding countries. In short, interest was allowed, but unreasonable interest (usury) was not. R.L.H.]

In the prohibitory statement in Deut 23:19–20 is the stipulation, not only “usury of money” but of food or “anything that is lent upon usury” as well. In the simplest of terms, what is denoted by either the verb or nominal form is any excessive increase made in the repayment of a debt, whether the thing borrowed was money or otherwise. Remembering that the coinage of cash money as we know it was unknown until the seventh century B.C., this imprecision in meaning is readily understandable.

neshek. *Usury* (ASV, RSV “interest”). Relationship of this noun to the basic verb “bite” is sustained by evident Ugaritic usage: *ntk* verb “bite” (of serpent), noun “interest.”

nāshak. Denominative verb, favored as correct sense by ASV (margin) and RSV in some cases (e.g. Hab 2:7) where KJV has “bite.” Translations are: KJV “lend upon usury,” ASV and RSV “lend upon/for interest.”

M.C.F.

1431 נִשְׁכָּה (nīshkā) *chamber, room, a rare by-form of lishkā* (q.v.).

1432 נָשַׁל (nāshal) *slip or drop off* (Deut 19:5), *draw off* (Ex 3:5), *clear away* (Deut 7:1, 22).

1433 נָשַׁם (nāsham) *pant* (Isa 42:14, only).

Derivatives

1433a נְשָׁמָה (n’shāmā) *breath*.

1433b תִּנְשֵׁמֶת (tinshemet) *an animal*.

n’shāmā. *Breath* (ASV, RSV both employ “breath” for “blast” and “inspiration,” while the former one replaces “breath” with “life.”)

This noun, when used in reference to man, generally signifies the breath of life. It is frequently found in combination with *rūah* “spirit” and seems synonymous with *nepesh* (q.v.). In KJV it is twice translated “spirit” (Job 26:4; Prov 20:27). For Prov 20:27 some feel the mind or intellect is denoted. In Isa 2:22 the reference to man, whose “breath is in his nostrils,” is a figure of man’s frailty. Life itself is a fragile existence. The “breath of God” may refer to his creative activity (as in Gen 2:7), but it can also be a hot wind which kindles flame (Isa 30:33), a destructive wind (II Sam 22:16=Ps 18:15 [H 16]; Job 4:9), or even a wind cold enough to produce ice (Job 37:10).

The fact that precise translation of this noun must fluctuate in accordance with its contextual usage is aptly demonstrated by the following instances. In the poetic expression of II Sam 22:16 (paralleled by Ps. 18:15 [H 16]) *nishmat rūah* signifies “blast of his breath,” while in Gen 7:22 *nishmat-rūah hayim* means “the breath of life,” breath here expressed by the combination “breathing of breath.” The concrete concept “breathing (that is, living) beings” is expressed by *n’shāmā* in either the singular form (as in Josh 10:40) or the plural (Isa 57:16).

tinshemet. *An animal.* Swan and mole in KJV; ASV “horned owl” and “chameleon”; RSV has latter, but “water hen” elsewhere.

Used only three times, and that in connection with dietary prohibitions, *tinshemet* denotes probably two members of the animal kingdom, apparently so named for breathing or hissing characteristics. Bible dictionaries should be consulted under the English names given above, as well as *Flora and Fauna of the Bible* (United Bible Societies).

1434 נָשַׁף (nāshap) *blow* (Isa 40:24; Ex 15:10).

Derivatives

1434a נֶשֶׁף (neshep) *twilight* (e.g. Gen 3:8; Jer 13:16).

1435 נָשַׁק (*nāshaq*)

- 1434b יָנְשֹׁף (*yanshúp*) *a bird* (Isa 34:11; Lev 11:17; Deut 14:16). A kind of owl?

1435 נָשַׁק (*nāshaq*) *I, kiss*.

Derivative

- 1435a נִשְׁקָה (*n"shiqā*) *kiss* (Song 1:2; Prov 27:6).

The three places where a denominative (it is assumed) homonym of this verb is used, it is rendered "armed" (RSV once "be bowmen") and must be distinguished as a separate verb altogether (*nāshaq*). Nevertheless, one can detect some association of the Arabic cognate *nasaga* "fasten together, be in array" with either or both the Hebrew verbs. It may, in fact, be a clue to a common origin.

The expression "on your mouth all my people will kiss" in Pharaoh's elevation of Joseph to a position of high authority has occasioned various translations and explanations. KJV renders the phrase, "according unto thy word shall all my people be ruled," with ASV suggesting "order themselves" in the margin and RSV adopting the latter in the text. Citing I Sam 10:1 (mentioned above) and Ps 2:12 as examples of the kiss of homage, S. R. Driver rejects "be ruled," but he prefers "order themselves," since not all the people could literally kiss Joseph. When we take into account, however, that orientals would kiss any object received from a superior as a sign of respect and submission, it seems preferable that we see this as an indication of the respect and obedience to be accorded the commands of Joseph. "Mouth" does often indicate the actual commands or orders in biblical Hebrew. We can also view Ps 2:12 in this light and thereby reject the conjectural emendation involved in the RSV translation, "with trembling kiss his feet." Also the command to "kiss the son" may be understood to mean to "kiss the feet of the son" being derived from the custom of kissing a king's feet as an act of homage, "a custom which is well known to us from Babylonian and Egyptian documents" (Artur Weiser, *The Psalms*, Westminster, 1962, p. 115).

Stahlin notes: "The OT has nothing comparable to the cultic kissing of paganism" TDNT, IX; p. 127. (See discussion under *ben*.)

We find in its two occurrences portrayal of one genuine and one superficial sign of affection. The former is in the context of romantic love (Song 1:2), while the latter speaks of the abuse of a convention by one who has evil intent. "Faithful are the wounds of a friend; but the kisses of an enemy are deceitful (ASV "profuse")," says Prov 27:6.

As for the verb, it is best to deal with the most

restricted use first. The concept of "touch" occurs where, in Ezk 3:13, the prophet describes the touching ('kissing') of the wings of living creatures in his vision, quite evidently the cherubim whose wings touched as they stood under the platform on which rested the throne of God.

The kiss was a very common convention in the ancient near east, yet always of special significance. Kisses are given, for example, to the father, the mother, the son, the brother, the wife, the father or mother-in-law, wives of one's sons (Ruth 1:9), and fellow countrymen (II Sam 15:5), as well as a lover (Song 8:1, Prov 7:13). The importance of a kiss in expressing love is seen in the Proverb "an honest answer is like a kiss on the lips" (Prov 24:26). But the kiss of a prostitute should be rejected (Prov 7:13; cf. Lk 7:38).

Along with a kiss of affection there was a kiss of respect: Worthy of particular note are Samuel's kissing of Saul upon anointing him (I Sam 10:1) and David's farewell to a loyal subject as he returned from his brief exile across Jordan (II Sam 19:39 [H 40]). A use of the kiss in false worship is indicated in I Kgs 19:18; Hos 13:2; Job 31:27. The latter case (moon-worship) is unique in its reference to a kiss on the worshipper's hand: literally, "If I have kissed my hand to my mouth."

M.C.F.

- 1436 נָשַׁק (*nāshaq*) *II, handle, be equipped with* (e.g. I Chr 12:2; II Chr 17:17). Exact meaning uncertain.

Derivative

- 1436a נֶשֶׁק (*nesheq*), נִשְׁק (*nēsheq*) *equipment, weapons* (e.g. Ezk 39:9; Job 20:24).

- 1437 נֶשֶׁר (*nesher*) *eagle*.

The KJV rendering of this noun in all twenty-six occurrences (plus the two times in Aramaic [*n"shar*] in Daniel). While ASV adds the margin "great vulture" in Lev 11:13 and "vulture" in Prov 30:17 and Mic 1:16, RSV "vulture" in the text once only, for the Heb expression "sons of the eagle" (Prov 30:17).

The translators have been satisfied that the term "eagle" is acceptable in the majority of references, wherein the finer traits of strength, swiftness, and care of the young are cited, but where the eating of carrion or "baldness" (see Mic 1:16) is involved, a lesser breed of bird seems to be in order.

Actually, not only did the Semitic languages tend to lump the large soaring birds into one family but the *Encyclopedia Britannica* defines

"eagle" as inclusive of several day-flying birds of prey comprising, along with hawks, harriers and old world vultures, the family *Acciptridae*.

The references to a renewing of youth by the eagle (Ps 103:5; Isa 40:31) may stem simply from the fact of its longevity, but it is seen by some in relation to its fresh appearance in new plumage following moulting. It is also said that the old eagle breaks off an overgrown beak and grows a new one, moulting also during this process, and the ancients held a popular belief that an eagle could fly up to the sun, singe its feathers, then plunge into the sea to revive itself.

See "Birds of the Bible" in NBD and *Flora and Fauna of the Bible* (United Bible Societies).

The superb protection and care of the Lord for Israel is appropriately likened to that of a *nesher* (Ex 19:4-6; Deut 32:11-13). Their nests are built on inaccessible ledges with great skill, and the parent bird guards it with great ferocity sometimes by using its talons and beak. It also takes care of its young by shielding the nestlings from too much sun and warming them when a cold wind blows, and feeding them until they are large enough to fly. Then the parent stirs up the nest and lures the fledglings out of it for their first flight. Sometimes the adult birds hover over them and flutter encouragingly around them. When the poet, however, speaks of the *nesher* bearing the young, he is speaking phenomenologically, for the fledglings only appear to be carried at times on a parent's wings but there is no reliable report of any bird actually flying with a smaller bird on its back.

David likened the speed of Saul and Jonathan to the *nesher* and may have had in mind the golden eagle which pressing its wings against its sides, power dives from great heights upon its victim usually taking it by surprise and striking it dead in an instant with its powerful, sharp talons (II Sam 1:23). Jeremiah warned of a foe that would approach with the speed of an eagle (Jer 4:13; cf. Hab 1:8) and Job lamented that his days go by like an eagle swooping on its prey (Job 9:25-26). Timed by a stop watch a golden eagle chased by peregrine falcons achieved a speed of 120 miles per hour (A. Parmelee, *All the Birds of the Bible*, 1969, p. 200).

M.C.F.

1438 נָשַׁת (nāshat) *be dry, parched* (e.g. Isa 41:17; 19:5; Jer 18:14).

1439 נִשְׁתָּן (nisht'wān) *letter* (Ezra 4:7; 7:11, only). Probably a loan word from Persian.

1440 נָתַב (ntb). Assumed root of the following.

1440a נָתִיבָה (nātib) *path*.

1440b נִתְיָבָה (n'tibā) *path, pathway, traveller*.

nātib. Path, way. Some lexicographers have taken *nātib* as an adjective, perhaps meaning "trodden" (though a possibly cognate Arabic verb means "swell, be prominent or protrude"), used also substantively for a beaten path. In taking such an approach, said lexicons then consider the feminine form which occurs in Prov 12:28 to modify "way" (*derek*), i.e., "a well-trodden way." Highly noteworthy is the fact that these two terms occur only in poetic (including the prophetic writings) passages. All five (or six—see above) occurrences of the shorter word are limited to Job and Ps, and the more widespread *n'tibā* is found only in the Song of Deborah (Jud 5), Job, Ps, Prov, and the writings of three prophets.

The path or track referred to by *nātib* in Job 28:7 and 41:32 [H 24] is a physical one, though in the latter case it is produced on the surface of water. A more figurative usage is found in Job 18:10, where a trap is set in the path of the wicked, and in Ps 78:50, which describes God as smoothing a way for his anger to strike the Egyptians. Psalm 119:35 affords an excellent example of the use of this term, with a patently self-evident sense, "Make me to go in the path of thy commandments; for therein do I delight."

Similarly, a *n'tibā* is a (foot-) path or way which one travels physically or morally. This noun is often used in parallel with the more common and prosaic *derek* (q.v.) in the sense of a course of life, especially one which is of God's appointment, as in Isa 42:16. It speaks of moral character or action, either good (of wisdom, Prov 3:17; justice, Prov 8:20; light, Job 24:13) or wicked (Prov 1:15; Isa 59:8, such as that of the adulteress, in (Prov 7:25). "Bypath" definitely captures the sense of Jer 18:15.

The closest synonym to these two terms would be 'ōrah, also poetic for path or way, while much more distinctive would be *ma'gāl* "track, rut" and *m'sillā* "highway, embankment."

M.C.F.

1441 נָתַח (nātah) *cut, cut in pieces, divide*.

Derivative

1441a נָתַחַה (nētah) *piece*.

Found only nine times in the OT, always in the Piel (intensive) stem, this verb occurs with its cognate noun (see derivative, immediately below) in each of the cases where it is rendered, simply, cut or divide. Conversely, wherever the noun does not occur in the Heb text the transla-

tion of the verb is expanded to "cut into pieces" as being its full intent.

nētah. *Piece.* ASV and RSV have "piece" in every instance, and they employ for the over-specific "his pieces" (*passim*), "its pieces, piece by piece," or simply drop the possessive. These two versions also express piece by piece (Ezk 24:6) more vividly, "piece after piece."

Mainly used of animal (in only one case of human) carcasses, the notion of these words is clearly that of dismemberment. Thus the account of the Levite's dividing the corpse of his abused concubine into twelve parts for notification of the tribes is rendered by the ASV, RSV "he divided her, limb by limb" for the expression "he divided her according to her bones" in the original (Jud 19:29). Sacrificial procedure is involved in the more common use of the term, as in Elijah's preparations on Mount Carmel (I Kgs 18:33) and in a few references in Ex and Lev, but Saul also sent a message throughout the tribes, accompanied by the pieces of a slaughtered pair of oxen, while Ezekiel presents a vivid picture of the doom of Jerusalem by describing meat in a caldron (Ezk 24:4, 6).

M.C.F.

נָתַיִב (nātib). See no. 1440a.

נָתַנִּים (nētinim). See no. 1443a.

1442 נָתַח (nātak) *be poured, drop (of rain), be melted or molten.*

Derivative

1442a הִתְחַךְ (hittūk) *a melting* (Ezk 22:22, only).

The passage mentioning rain (II Sam 21:10), ASV renders "be poured" and RSV "fall upon," with both of them changing "gather" to "empty out" (money from a cash box, in II Kgs 22:9).

Etymologically, the most revealing cognates are the Akkadian verb *natāku* "flow, drip" and the Ugaritic *ntk* "pour" (UT 19: no. 1716). The Hebrew usage is basically "pour forth, be poured out," with a specialized sense found in the sensitizing force of the Hiphil stem, where context calls for it, of "melt." (Twice, also due to demand of context, the passive Niphal is so rendered, in Ezk 22:21 and 24:11.)

Such things as water (above), groans (Job 3:24), divine wrath (II Chr 12:7; 34:25, etc.), and curses (Dan 9:11) are poured forth, and in an interesting figure for death Job asks God if he has not indeed "poured me out as milk?" (Job 10:10).

hittūk. Occurring only once (Ezk 22:22), this noun "a melting" is translated "(As silver) is melted" in all three versions.

Ezekiel's choice of words in the verse just

cited affords a marvelous play on sounds and meanings. The repetitive, "As... melted in the midst... so... melted in the midst" has an added impressiveness because of the similarity of the Hebrew terms for "melted" and "midst," though they are etymologically unrelated. Yet when he goes on to say, "I the LORD have poured out my fury upon you," he apparently intends to strike the attention of the listener by not employing the cognate verb *nātak* (elsewhere used many times for the pouring out of fury, wrath, or a curse), but rather the synonym *shāpak*.

M.C.F.

1443 נָתַן (nātan) *give.*

Derivatives

1443a נְתִינִים (nētinim) *Nethinim.*

1443b מַתָּן (mattān) *gift.*

1443c מַתָּנָה (mattānā) *gift.*

1443d מַתָּת (mattat) *gift, reward.*

Considering the extensive use of this verb, some 2,000 times (mostly in the Qal stem), it is not surprising to find a great variety of meanings given in translation. In addition to its basic and most frequent sense of give, we find in the KJV such renderings as set, commit, put, lay, fasten, hang, make (to be something), appoint, suffer (=allow), bestow, deliver, send, pay, turn, thrust, strike, cast (lots); passive uses adding be taken/gotten. ASV largely concurs with KJV but with a tendency to simplify, replacing terms like "commit, strike, fasten" with "put" and "deliver" with "give." RSV, besides following the last example cited under ASV, adds further variety by using "permit" for "suffer," "place" for "deliver," "store" for "lay up," "attach" for "fasten," and "spend" for "bestow (money)," etc.

Phonetically speaking, this verb is unstable or weak, in the sense of its frequent loss by outright elimination or by assimilation to an adjacent consonant of either one or both *n*'s. An infinitive form is *tēt*, for example, while the Ugaritic cognate is *ytn*. This means that only the *t* is constant, and even that is replaced by its voiced counterpart in the Akkadian cognate, *nadānu*. This *d* (cf. Egyptian [r]di "give"?) suggests a possible link between this verb and the noun *yād* "hand," to which can be compared Ethiopic *id*, Arabic *yad* and perhaps Egyptian *djrt* (in which language the familiar hieroglyphic symbol of a mitt-like hand represents the letter *d*). Every meaning given this verb can in fact be seen as a literal or figurative action of the hand.

The three broad areas of meaning of the verb *nātan* are 1) give, 2) put or set, and 3) make or constitute. The other terms used in translation are extensions or variations of these. For example, give may be anything from physically handing a present, reward, person, or document to

another to the less tangible granting or bestowal of blessing, compassion, permission, and the like. Inanimate objects may also “give”—as tree or land yielding fruit; birds, lions, and clouds “utter” their appropriate sounds; even the wine “sparkles” in the cup (lit., “gives its eye”). God himself is often the giver: of rain (Lev 26:4, Deut 11:14), of grass for cattle (Deut 11:15), as well as granting preservation of life (as a “prize of war” Jer 45:5, rsv) or sending the plague of hail on Egypt (Ex 9:23). The infrequent synonym *yāhab* means “give,” but it too connotes “place,” “put” when used of David’s orders concerning Uriah (II Sam 11:15). In Hebrew this verb *yāhab* is only used in the Qal impv., more broadly in Aram.

In its sense of put, place, set, appoint, *nātan* is in close parallel to the more specific terms *šim* and *šit*. This putting may be literal, as placing a ring on the hand, a helmet on the head, or a prisoner into the stocks. It is so used in Deut 15:17, for putting the awl into (i.e. through) the ear into the door, thus pinning the ear temporarily to the door. More figurative uses include God’s putting his spirit “upon” the Servant (Isa 42:1), reproach upon sinful people (Jer 23:40), curses on enemies (Deut 30:7), or his majesty above the heavens (Ps 8:1 [H 2]). Imposition of the temple tax is treated in Neh 10:32 [H 33], laying a siege against a (model) city in Ezk 4:2.

As for the third usage of this versatile verb, Isa 3:4 speaks of installing boys as their princes, Ex 23:27 of making enemies “backs,” and Jer 9:10 [H 10] of Jerusalem’s being made ruinheaps.

n^ṯtinim. *Nethinims* (corrected to “Nethinim” in asv, but uniformly translated “temple servants” by rsv, with occasional footnote: Hebrew *nethinim*). Meaning, properly, “those given” (to service of the sanctuary), either the asv or rsv rendering is acceptable.

In the LXX *n^ṯtinim* is translated literally, “the given (ones),” but Josephus employed a Greek term meaning “sacred slaves.” That they were rather numerous is indicated by the fact that they helped comprise a group of 392 servants who accompanied Zerubbabel to Jerusalem in 538 B.C. (Ezr 2:58), and then later, at the request of Ezra, 220 Nethinim accompanied 38 Levites from the Jewish colony at Casiphia (Ezr 8:16–20). Though, as mentioned above, Nethinim are carefully distinguished from the Levites (being quite likely aliens who became incorporated into the congregation of Israel), Ezra 7:24 shows they shared in the tax exemption enjoyed by all priests and Levites.

The fact of their living in a special quarter on Ophel near the water gate, which led to the Gihon spring, may indicate that they carried water up to the temple mount (Neh 3:26). Not all Nethinim of Jerusalem lived in that quarter, however (cf. Neh

3:31), and still others lived in other cities, probably Levitical ones (Neh 7:72).

The term *n^ṯtinim* is a variant of *n^ṯtūnim*, the latter used of the Levites as “given over” (both by God and by the Israelites) to the service of the tabernacle (Num 3:9; 8:16, 19). But not only is the vocalization of the word modified (apparently a simple matter of vowel harmony in common utterance), the class designated by *n^ṯtinim* is often specified as distinct from priests, Levites, and porters (see Neh 10:28 [H 29]).

Ezra 8:20 tells of the appointment of the Nethinim by David and the princes of Israel for service of the Levites. They were assigned menial tasks about the temple precincts, with only the “descendants of Solomon’s servants” coming lower on the social scale among returnees from exile, according to Ezra’s listing (see 2:58). The precedent, at least, for such perpetual consignment to religious servitude dates very early. Moses gave orders concerning the captive Midianites, that of the half designated for the people in general, one in fifty was to be given “unto the Levites, that keep the charge of the tabernacle of Yahweh” (Num 31:30). And soon after, Joshua punished the wily Gibeonites by making them “hewers of wood and drawers of water for the congregation, and for the altar of Jehovah” (Josh 9:27).

mattān. *Gift*, in its five occurrences.

mattānā. This word also is nearly invariably gift, with both asv and rsv substituting bribe in Prov 15:27 and Eccl 7:7 for contextual reasons.

mattat. *Gift, reward*, with idiom “gift of his hand” being rendered “able to give,” similarly in all the versions.

An interesting passage using *mattat* is Prov 25:14, in the rsv, “(boasts of) a gift he does not give.” This could imply that either he has failed to keep a promise or has made a false claim to generosity. (Somewhat similarly, the apocryphal Ecclesiasticus contains a reference to *mattān* as “[life of] a beggar,” a parasite, in 40:28.) Several names including Matthew, are derived from this root.

Bibliography: THAT, II, pp. 117–41.

1444 נָתַס (*nātas*) *tear or break down* (Job 30:13, only).

1445 *נָתַע (*nātaʿ*) *break, break down or out* (Job 4:10, Niphal, only).

1446 נָתַץ (*nātaṣ*) *break / cast / throw / pull / beat down; destroy, overthrow; break out (teeth)*. Since these equivalents are actually so close in significance, there is a rather free fluctuation of variants when it comes to comparing the other English ver-

sions. Typical is the substitution of "break down" by ASV and "tear down" by RSV for the "overthrow" of Deut 12:3.

Since this root is found mostly in the Qal stem and only rarely in the Piel (intensive), it can be assumed that the force is a strong one even in the former. The verb is generally employed quite literally, for pulling down of a structure such as an altar, a house, a city wall, or a tower, but it lends itself well to figurative use also—for the breaking of the power of a nation or destruction of the life of an individual (Job 19:10).

Ideally suited to demonstrate contextually the use of this verb is the familiar statement in the commissioning of Jeremiah (in 1:10) that he was to "root out, and to pull down, and to destroy, and to throw down."

Derivative

1447a נֶתֶק (*neteq*) **scall (of leprosy).**

This forceful word paints the action in quite a few narratives and also furnishes some vivid figures. Its Arabic cognate, in addition to the equivalent meanings "pull off, draw out," has an added sense, "shake." The noun derivative of this verb (below) is both limited and unpleasant in use.

A vividly literal usage of the verb *nātaq* occurs in the account of the attack of the Israelites on the Benjaminites at Gibeah. The troops of the former decided to pretend to flee in order to draw them out from the city into the highways, where they would be vulnerable (Jud 20:32). A simple withdrawal of the soles of the feet onto dry land is described in Josh 4:18, while the motion of drawing a ring off the finger is involved in Jer 22:24, a figure of God's rejection of the King of Judah. A favorite figurative expression among the prophets, portraying the uprooting of the people for captivity, is the snapping of the tent cords (Isa 33:20; Jer 10:20), and the picture of a relentless army is enhanced by the mention of sandal thongs which hold fast (unbroken) in Isa 5:27. Similarly, Eccl 4:12 reminds us that a threefold cord is not easily broken. Other figurative references to broken bonds occur in Nah 1:13; Jer 2:20 and 5:5, as well as in the very famous context, Ps 2:3.

There are still other places where this term affords an extremely vivid figure. "Pull them out like sheep for the slaughter," cries Jeremiah (12:3) of the wicked in Israel, while Ezekiel describes Jerusalem as a drunken harlot tearing at her breasts (23:34). The concept of separation enters into Jeremiah's use of the smelting process

as an attempt to purify God's people (6:29), while Bildad the Shuhite speaks of the confidence of the wicked man being "rooted out" from his tent, in Job 18:14.

neteq. *Scall (of leprosy)* of the KJV and ASV is replaced by "itch" or "itching disease" in the RSV. Its occurrences in the Bible are limited to Lev 13:30–37 and 14:54. Designated as the major symptom of "leprosy," its use here derives from the idea of something which a sufferer desires to scratch or tear away. Needless to say, this is highly indicative of the likelihood that or "leprosy" was a condition distinct from the Hansen's Disease that generally goes by that name today (see *šara'at*). It refers to any infectious disease with symptoms of rash or itching such as measles, smallpox, etc., some of which were serious, some not. For all, isolation was prescribed.

M.C.F.

1448 נָתַר (*nātar*) **I, spring or start up** (e.g. Job 37:1; Lev 11:21; Hab 3:6).

1449 *נָתַר (*nātar*) **II, loose, let loose (hand), undo.**

While BDB and other lexicons in the Gesenius tradition distinguish this verb root from a *nātar* "spring / start up," KB treats the two senses under one listing. Since the root II isolated for treatment here occurs only in the Hiphil (causative or transitivizing) stem, however, a once common term may have with time become divided into two senses. A possible Arabic cognate *natarā* "rend" (garment), "break" (bowstring) could relate to either a loosing or springing (snapping?).

Setting free a captive (compare the semantic development in the American colloquial "springing a prisoner") is involved in Ps 105:20 and 146:7, while Isa 58:6 speaks of unfastening thongs of a yoke, in parallel with *pātaḥ* "open, loosen, free" wicked bonds. The parallelism is farther extended and reinforced in the latter verse by the use of a couplet—"send" the oppressed free and "break" (see *nātaq*, above) every yoke. A dramatically figurative force is found in Job 6:9, where he prays thus for death, "that he would let loose his hand and cut me off."

M.C.F.

1450 נֶתֶר (*netēr*) **soda.**

This word is a loan word from Egyptian and not related to a root *nātar*. It was the name for the material collected from the alkaline lakes of Egypt. This valuable ancient chemical was widely used and its name borrowed into Akk. as *nitiru*, into Gk. as *natron*, into Latin as *nitrum*. From this word comes the chemical symbol Na for sodium. Egypt was the source of soda for the world

until Napoleon saw its value and offered a prize which resulted in modern methods of synthesis. In Old English two kinds of "niter" were distinguished, soda niter and gun powder niter (potassium nitrate, a totally different chemical). Modern English has changed the soda niter to plain soda. The AV "niter" was doubtless intended to mean the soda niter used widely as a cleanser (washing soda, sodium carbonate).

Natron was used in ancient times in the embalming process, as a cleansing agent and as an ingredient in ceramic pastes, where powdered quartz paste of the faience combined with the soda solution to make an attractive glazed surface (sodium silicate with other silicates makes glass). It is as a cleansing agent that Jeremiah mentions it (2:22), in parallel with *bōrit*, a vegetable alkali. Although the RSV prefers the LXX translation "wound" in Prov 25:22 (possibly reading *neteḳ*, q.v. above), the reference to vinegar on soda with its violent effervescence and release of carbon dioxide is a perfectly reasonable figure of incompatibility. Some suggest lye in this verse, but vinegar on lye would have no visible result unless the lye were more pure than would be expected in ancient times. Vinegar would have no more visible effect on lye than ordinary water would have.

R.L.H.

1451 נָתַשׁ (*nātash*) **root out, pluck up** (by the roots), **destroy**. (The last expression, found only once in KJV, with cities as object, is rendered "overthrow," in ASV, "root out" in RSV.)

Not included in the above catalog are the renderings of *nātash* in Jer 18:14, where the verb appears in the Niphal (passive) stem. The ASV says, "shall the cold flowing waters that come from another place be forsaken." (So translated due to parallel verb 'āzab, q.v. at the beginning of the verse.) ASV has "dried up," and RSV "run dry." Such a translation assumes a textual corruption by metathesis from *nāshat* "fail" (i.e. be dry, parched), a verb used in Isa 19:5 in parallel with *hārab* and *yābash*, both "dry up." The "plucking up" of a river is a possible figure, though a very strong one.

It is the idolatrous Asherim (KJV "groves") that are to be plucked up in Mic 5:14 [H 13], but the term is mainly used with God as subject and nations or peoples as object: Deut 29:28 [H 27]; I Kgs 14:15; II Chr 7:20; Jer 12:14. The twelfth chapter of Jeremiah provides the key passage (vv. 14–17) for the study of this verb, occurring here five of the thirteen times it is used by this prophet. (Jeremiah employs *nātash* more than all its other occurrences combined.) In Jer 1:10 the usage is in parallel with *nātaṣ* "break / throw down" (q.v.).

The verb is used frequently with reference to the Lord's work of destroying evil nations: of Israel (Deut 29:28 [H 27]; II Chr 7:20) and of her neighbors (Jer 12:14–15, 17). In the case of Israel, however, he promises that after judgment he will pluck them up no more (Jer 31:28; Amos 9:15); and in the case of the nations, he promises not to carry out his threat if they repent (Jer 18:7).

M.C.F.

- 1452 סֵאָה (sē'ā) *a measure of flour, grain*, probably one-third ephah (q.v.; II Kgs 7:1, 18). For the evidence see AI, p. 200. See also Huey, F. B., "Weights and Measures" in ZPEB, V, p. 917.

- 1453 סָאָן (sā'an) *tread, tramp*. This denominative verb occurs only in Isa 9:4.

Parent Noun

- 1453a סָאָן (sē'ōn) *sandal, boot of soldier* (Isa 9:4, only).

סָאָן (sē'ōn). See no. 1453a.

- 1454 *סָעָה (sē'sē') *drive away*. This verb occurs only once, in the Pilpel (Isa 27:8).

- 1455 סָבָא' (sābā') *imbibe*. Denominative verb.

Parent Noun

- 1455a סָבָא' (sōbe') *wine, drink*.

- 1455b סָבָא' (sābā') *drunkard*.

This denominative verb connotes the act of heavy drinking, even of drunkenness. It occurs in only four contexts. Deuteronomy 21:20 involves the case of an incorrigibly disobedient son who is brought to the town elders at the city gates for stoning. The charges against the man are that he is stubborn, rebellious, debased, and drunken. The parallel with *zōlēl* (q.v.) implies that he is one who is contemptibly vile in his riotous behavior.

Isaiah (56:12) laments that the supposed shepherds of the sheep, the leaders of Israel, are given over to open debauchery, thereby exposing their flocks to grave danger from the enemy.

Nahum (1:10) reports that the Assyrians of his day were so satiated with their successes that they gave themselves to being like drunkards (note that *sōbe'* also occurs in this passage). The warning against riotous living (*zōlēl*) and drunkenness (*sōbē'*) as leading to sloth and poverty seems well taken (Prov 23:20-21).

sōbe'. *Wine, drink*. (So ASV; RSV in Hos 4:18, "drunkards.")

The noun, *sōbe'* meaning "fermented drink," is probably cognate with Akkadian *sabū*, *sibu* "wheat beer" (cf. Arabic *siba'* "wine").

sōbe' describes the spiritual adultery of Jerusalem (Isa 1:21ff.). Isaiah's earlier contemporary, Hosea (4:18), likewise reports that the northern kingdom is characterized by total

spiritual bankruptcy and harlotry, involving both priests and people.

sābā'. *Drunkard*. The much debated crux (Ezk 23:42) involving the nominal derivative *sābā'* seems best understood as "drunkards" (so ASV, RSV: i.e. foreign idolators and revellers who taught Israel further spiritual whoredom, rather than the כְּנַעַנִים "Sabeans").

R.D.P.

- 1456 סָבַב (sābab) *turn (around, aside, back, towards), go (about, around), encircle, surround, change direction*.

Derivatives

- 1456a סִבְבָּה (sibbā), נִסְבְּבָה (nē'sibbā) *turn (of affairs)*.

- 1456b סָבִיב (sābib), מִסְבֵּב *surrounding, round about*.

- 1456c מְסַבֵּב (mēsab) *round about*.

The basic meaning of the root seems to involve the idea of turning or going around; as such, it is found also in Ugaritic and Aramaic (cf. Arabic *sababun* "rope"). A perhaps kindred root seems to have been productive in Southeast Semitic (cf. Tigre *šābābā* "plait") and Akkadian (*šabābu* "encircle").

The root occurs over 150 times, usually as a simple verb of motion, whether of an individual (I Sam 7:16), a people (Josh 6:3), a door turning on its hinges (Prov 26:14), or the cycle of the wind (Eccl 1:6).

Several figurative expressions occur, especially in ethical or judicio-legal contexts. Thus, it is employed of the transferral of the kingdom to another (I Kgs 2:15; I Chr 10:14) or of the non-transferability of inherited property between tribes in ancient Israel (Num 36:7, 9).

It depicts God's judgment against sin, whether sins of the heathen (Hab 2:16) or of his own people. Hosea (7:2) laments that Israel had gone so far as to surround herself with wickedness in the very presence of the God who keeps accounts. Jeremiah (6:12) foresees the severity of God's judgment on an equally wicked and unrepentant Judah.

sābab also characterizes the turning of one's mind so as to give attention to thorough investigation (Eccl 7:25). It describes a changed mind or attitude, occasionally in great sorrow (I Kgs 21:4; II Kgs 20:2). This changed mind can involve a changed condition before God, whether for evil (II Chr 29:6) or good (Ezr 6:22). From this, it

becomes associated with repentance and restoration to favor after apostasy (I Kgs 18:37).

Closely following, is the idea of a change of conditions or circumstances (II Sam 3:12; 14:20, 24; Jer 31:22), often indicated by changing the name of a person (II Kgs 23:34; 24:17) or place (Num 32:38).

Whatever the conditions, even in the direst of circumstances, the most desperate "turn of affairs," there can be seen the guiding control of a sovereign God. No one but the believer can understand this. Although he may be completely surrounded by enemies (Ps 17:11; 109:3; 118:10–12) or encompassed by sorrow or trials (II Sam 22:6), yet the believer who is pure of heart can be confident that God will turn to comfort him (Ps 71:20–21) so that God's lovingkindness surrounds him with songs of deliverance (Ps 32:7, 10).

All of the foregoing finds its fullest expression and climax in the work of Messiah. Though his enemies would surround him like strong bulls and snarling dogs (Ps 22:12, 16 [H 13, 17]), yet he would triumph over all the enemies of God and man, redeeming his own and ruling over a changed and revitalized earth (Zech 14:9–11).

sibbā, n^osibbā. Turn of affairs. These synonyms (*n^osibbā*, II Chr 10:15), *sibbā* I Kgs 12:15) designate a turn of affairs arranged by God's sovereign disposition.

sābib, mūsāb. Surrounding. *sābib* occurs in several interesting contexts. The ritual of priestly consecration involved sprinkling blood round about the altar (Ex 29:16, 20) as did the sacrifice of the Levitical offerings (Lev 1:5, 11 etc.). It figures in Israel's future when she will look around at her God-given glory (Isa 60:1–4). Until then, she is to live as in the land of promise, resting in her deliverance (Deut 12:10).

mūsāb. Perhaps refers to the side building surrounding the temple (Ezk 41:7).

mēsab. Round about. *mēsab* refers to the carved walls of the temple (I Kgs 6:29) and a round table (Song 1:12). Its most interesting occurrence is in Ps 140:9 [H 10] which Dahood (AB, *Psalms III*, pp. 303–304) translates, "The mischief maker who surrounds me, may the poison of their lips drown them!"

R.D.P.

סָבַק (sibbā). See no. 1456a.

סָבִיב (sābib). See no. 1456b.

1457 סָבַק (sābak) *interweave* (Nah 1:10; Job 8:17).

Derivatives

1457a סָבַק (s^obak) *thicket* (Gen 22:13; Isa 9:17; 10:34).

1457b סָבַק (s^obök) *thicket* (Ps 74:5; Jer 4:7).

1458 סָבַל (sābal) *bear (Qal), drag oneself along (Hühpaet)*.

Derivatives

1458a סָבַל (sēbel), סָבַל (sōbel) *load, burden*.

1458b סָבַל (sabbāl) *burden bearer*.

1458c סָבַלָה (siblā) *compulsory service, burden bearing*.

1458d סָבַלֶת (sibbōlet) *ear of grain*.

The primary meaning of this root is to "bear," "transport" (i.e. a heavy load). The root is also particularly productive in Aramaic/Syriac. Since the Akkadian *zabālu* is semantically equivalent with *sābālu* and since the phonetic change sb>zb is known in the Semitic languages, it may be that the two roots are derived from the same proto-Semitic root.

In contrast to the synonymous *nāsā'* "lift up," "bear/carry (away)," *sābal* lays stress on the process of bearing or transporting a load (Isa 46:7), hence, becomes a figure of servitude (Gen 49:15).

The root is also utilized in contexts which deal with the bearing of punishments or penalties. Jeremiah laments that the Jerusalemites have sinned as had their fathers, hence must bear the penalty for violating God's covenant with them (Lam 5:7). The most important context in which this root occurs is Isa 53:4–11. Here the coming servant, Messiah, lifts up and takes upon himself man's sicknesses and bears the weight of his worrisome sorrows. Nothing could more graphically portray the vicarious sacrificial work of Christ who bore the penalty for man's sin so that man may receive God's righteousness and stand justified before him.

sēbel. Load, burden, compulsory service. Maybe denoting a laborer's basket, *sēbel* is always used of corvée labor (e.g. I Kgs 11:28). *sēbel* details those things which rested upon Israel's shoulders like a heavy burden: her sin (Isa 9:3) and her oppressor, Assyria (Isa 10:27; 14:25).

sabbāl. Burden bearer (a name of a function). Denotes either a basket carrier (Neh 4:10 [H 4:4]) or corvée master (II Chr 34:13).

siblā. Compulsory service, burden bearing. Used of compulsory burdensome toil, such as was laid upon the Hebrews in Egypt (Ex 1:11, etc.).

sibbōlet. An Ephraimite pronunciation of the common Semitic *šibbōlet* "ear of grain" (Job 24:24), or "flowing stream" (Ps 69:2 [H 3]).

The test given by Jephthah's soldiers (Jud 12:6)

probably hinges on the pronunciation of sh (*shin*) vs. ś, (*sin*) here written s (*samekh*) the next nearest phoneme. Speiser suggested also that in the days of Judges, the phoneme sh was pronounced as a soft t (ṭ) so the difference then would have been the lisping pronunciation of s as th (E. A. Speiser, "The Shibboleth Incident (Judges 12:6)," in *Oriental and Biblical Studies*, Univ of Pennsylvania, 1967, pp. 143–50).

R.D.P.

סִבְּלֶת (*sibbōlet*). See no. 1458d.

- 1459 סָגַד (*sāgad*) *prostrate oneself in worship* (Used only in Isa 44:15, 17, 19; 46:6).

A common verb in Aramaic and possibly a loan word in Hebrew. It seems to indicate a position of prostration in prayer. The Arabic *masgid* means "mosque." For other words on bowing down see *kāra*'.

סָגַר (*s'gôr*). See no. 1462a.

- 1460 סָגַל (*sgl*). **Assumed root of the following.**
1460a סָגְלָה (*s'gūllā*) *property, possession.* (KJV "special/peculiar [treasure].")

The basic meaning of this noun is "personal property." Well attested in Hebrew, Ugaritic, and Aramaic, the Akkadian *sakālu*, "to acquire property" and *sikiltum* "(personal) property" are also doubtless related. While the word occurs only eight times, it is filled with theological and spiritual treasures. Qoheleth reports that the accumulation of the finest of personal possessions is sheer vanity. Those who fear the Lord become his peculiar possessions whom he will never forget, even in that time of great judgment (Mal 3:16–18).

Israel was God's personal possession (Ps 135:4). Moses reminded Israel that God chose her and redeemed her from bondage not because of her goodness, but solely because he loved her and was faithful to the promises given to the patriarchs. Israel should reflect God's holiness and live out his commandments (Deut 14:2ff.), reflecting his standards in a life of wholehearted compliance with the terms of the covenant made at Sinai (Ex 19:5–6) and renewed at their entrance into Canaan. Then would they have good success (Deut 26:16–19). So it should be with all believers. These verses from Deut are doubtless alluded to in Tit 2:14 and I Pet 2:9.

Bibliography: THAT, II, pp. 142–43.

R.D.P.

- 1461 סָגָן (*sāgān*) סָגֵן (*segen*) *prefect, a subordinate ruler* (e.g. Ezk 23:6; Jer 51:23). Probably a loan word from Akkadian.

- 1462 סָגַר (*sāgar*) *I, shut, close.*

Derivatives

- 1462a סָגוֹר (*s'gôr*) *enclosure.*
1462b סוֹגַר (*sūgar*) *cage with hooks.*
1462c מַסְגֵּר (*masger*) *enclosure, dungeon, builder of bulwarks.*
1462d מִסְגֵּרֶת (*misgeret*) *border, rim.*

The primary meaning of the root, found in the basic stem, is also known in Ugaritic, Biblical Aramaic, and Ethiopic. The ideas "deliver up," "hand over," "abandon," found in the derived stems, are known in other West Semitic dialects (e.g. Syriac, Phoenician). The root has been related to Akkadian *sekēru* "stop," "dam up," "shut up/off," a word found with similar meanings also in Hebrew. While J. V. K. Wilson ("Hebrew and Akkadian Philological Notes," *Journal of Semitic Studies* 7:179–80) may be right in insisting that the East Semitic *skr* "dam up" is to be separated from West Semitic *sgr* "close up," it is interesting to note that in ancient Aramaic *skr* carries a similar range of meanings to Hebrew *sgr* and that Arabic *sakara* can be used both of shutting doors and damming streams. This root is to be distinguished from another *sgr* known in Arabic and lying behind the Hebrew *sagrir* "steady rain."

The root *sgr* is often employed for the act of shutting doors or gates (e.g. Gen 19:6, 10; Josh 6:1) or closing up a breach in a wall (I Kgs 11:27). It also has many specialized uses. Thus, the shutting of the womb pictures non-conception (I Sam 1:5–6; cf. Job 3:10). At times, it can portray a hostile, arrogant, greedy, or indifferent attitude. The Psalmist (Ps 17:10) prays for deliverance from his enemies whose insensitivity has shut them up to an arrogance that is bent on the destruction of others.

An individual or group of people can be shut up to unfortunate circumstances. For example, Saul believes that David has shut himself up within the easily besieged Judean town of Keilah (I Sam 23:7). The root then depicts the conditions or result of a siege (Isa 24:10; Jer 13:19).

The derived stems carry the idea of shutting someone or something into the hand of someone/thing else (I Sam 23:20; Ps 78:48, 50). Even God's own can, because of sin, be delivered over to the enemy (Ps 78:62; Lam 2:7; Amos 6:8).

The word is utilized in contexts which make it clear that God himself is in sovereign control of the circumstances of life (Job 11:10; 12:14), guiding the events of history (Isa 45:1) to their proper end, when his enemies will be judged (Isa 24:22) and a glorified and prosperous Zion will stand serenely secure with unclosed gates.

Accordingly, men ought to shut themselves up to God's will and plan for their lives (Isa 26:20; Ezk 3:24).

s^gôr. Enclosure. Occurs validly only in Hos 13:8, where it is used of Israel's heart enclosure (כַּף caul in the Old English sense of "cap," "cover," or "surrounding membrane") torn open and devoured by the divine displeasure. The other proposed occurrence, Job 28:15, should be related to the Akkadian *sag/kru*, Hebrew *sāgûr* (*q.v.*) the shortened form of Akk. *ḫurāšu sakru* "pure gold."

sūgar. Cage with hooks. (Cf. Akkadian *šigaru* "cage.") Depicts a "cage with hooks" with which Jehoiachin like a caged lion was brought to Nebuchadnezzar (Ezk 19:9).

masgēr. Enclosure, dungeon, builder of bulwarks. This noun hides two roots: (1) From Akkadian *šigāru*, a loan word from Sumerian *šigar* "door with a bar" (cf. Egyptian *ṭikar* "fortified gateway"; (2) From Akkadian *sekēru* (see above); the former is (*masgēr*) is used figuratively to depict the imprisonment of God's enemies (Isa 24:22) and the release of his people from spiritual bondage (Isa 42:7 cf. Ps 142:7 [H 8]). The latter denotes the artisans or engineers, who were carried off into exile, who could have provided defense bulwarks against the captors (II Kgs 24:14, 16; Jer 24:1; 29:2).

misgeret. Border, rim, fortress. *misgeret* is also employed with two meanings: (1) "fortress," "bulwark" (II Sam 22:46; Mic 7:17) and (2) "border," "rim," forming some part of the table of showbread (Ex 25:25, 27; 37:12, 14) and of the wheeled vessels of Solomon's temple (I Kgs 7:28ff.; II Kgs 16:17).

R.D.P.

1463 סגר (*sgr*) II. Assumed root of the following.

1463a סַגְרִיר (*sagrîr*) *steady, persistent rain* (Prov 27:15).

סַגְרִיר (*sagrîr*). See no. 1463a.

1464 סַד (*sad*) *stocks, for confining feet of culprits* (Job 13:27; 33:11). Probably these were not wooden blocks in the form of stocks of colonial days, but more generally shackles around the ankles.

1465 סְדֹם (*s^edôm*). *Sodom*.

A city on the southern end of the Dead Sea, it marked the southeastern geographical limits of the Canaanites on a boundary which started from Gaza on the southwest.

Sodom was apparently located in a fertile area, as evidenced by Lot's choice of it as his dwelling place (Gen 13:10ff.). It no doubt became an important commercial center and therefore the coveted object of powerful kings, a factor which may lie behind the famous battle described in Gen 14. Its precise location is quite uncertain. Some have held that it is covered by the shallow waters in the southern embayment of the Dead Sea (J. P. Harland, "Sodom and Gomorrah," BA VI, 1943, pp. 41–52). The view that the hill site Bâb ed Dhrrâ' was a shrine of the cities of the plain is defended by Paul Lapp ("Bâb ed Dhrrâ' Tomb A 76," BASOR 189: p. 14). See Smick, *Archaeology of the Jordan Valley*, pp. 48–51. For Sodom in the Ebla Tablets, see Freedman, D. N., BA 41:149–159.

Sodom is best remembered, however (together with Gomorrah), as a standing example of God's judgment against unbridled sin (Gen 18–19; cf. II Pet 2:6; Jude 7). Accordingly, Moses warned Israel that apostasy can bring on destructions of a like intensity (Deut 29:22; cf. 32:32). The prophets repeatedly compared Israel's wanton sin and apostasy to the sin of Sodom (Isa 1:19ff.; 3:9; Jer 23:14; Lam 4:6; Ezk 16:46ff.; Amos 4:11). Had not the Lord left a remnant in Israel, they would have utterly perished as Sodom and Gomorrah (Isa 1:9). But only in two places is the destruction of Admah and Zeboim the smaller cities of the plain mentioned—Deut 29:23 [H 22] and Hosea 11:8. It would seem that Hosea was referring to the book of Deuteronomy!

Jesus similarly characterized his hearers (Lk 10:12) and predicted that at his return the world would be as in the days of Sodom and Gomorrah (Lk 17:29f.).

Sodom and Gomorrah are mentioned in the recently found Ebla tablets according to preliminary reports. Apparently they were at various times in alliance with the great kingdom to the north. This may give a logical reason for the raid of the eastern kings against the southern cities in the somewhat later times of Abraham.

R.D.P.

1466 סָדִין (*sādin*) *linen wrapper, cloak* (Prov 31:24; Jud 14:12–13; Isa 3:23).

1467 סֶדֶר (*sdr*). Assumed root of the following.

1467a סֶדֶר (*sēder*) *arrangement, order* (Job 10:22).

1467b שְׂדֵרָה (*s^edērā*) *tow, rank of soldiers* (II Kgs 11:15=II Chr 23:14), architectural term (I Kgs 6:9).

1467c מִסְדֵּרֹן (*misd^erôn*) *porch, colonnade* (Jud 3:23), meaning uncertain.

1468 סָהַר (*shr*). **Assumed root of the following.**

1468a סָהַר (*sahar*) **roundness** (Song 7:3).

1468b סֹהַר (*sôhar*) **roundness**. Occurs only in phrase *bêt-hassôhar* "the roundhouse," name of a prison.

1469 סוּג (*sûg*) **I, move, go, turn back.**

Derivative

1469a סוּגַת (*sûg*), סִיג (*sig*) **dross**. (Note by-form שִׁיג (*sig*) "movement.")

The primary meaning of the root is "turn back." It may be cognate with Arabic *sāja* "go and come." A second root (cf. the by-form *sûg* (Isa 17:11) is probably to be distinguished in Song 7:3, meaning "to fence," a root known also in Syriac, Arabic, and Ethiopic.

The root is usually employed in hostile contexts. Thus, Jeremiah predicts that Zedekiah's friends will ultimately turn back from him (38:22) and that Egypt, far from being a help to him, will itself fall back before the forces of Nebuchadnezzar (46:5). Isaiah (42:17) and Zephaniah (1:6) prophesy that the apostate idolators will be turned back and thoroughly shamed.

The Psalmist (Ps 53:3 [H 4]) avows that the natural heart condition of the unregenerate man is one of turning aside from God. Like an apostate Israel, it is in need of divine intervention, if it is to be saved (Ps 80:14-19).

sûg, sig. Dross. Usually refer to that which is turned away or skimmed off in the refining process (i.e. "dross" or "oxide"; e.g. Isa 1:22, 25). *kesep sigim* (Prov 26:23) "silver dross," can be read *k'sapsigi* with enclitic *mem*, "as glaze," as in Ugaritic (UT 19: no. 1792). The by-form *sig* is used euphemistically in I Kgs 18:27.

R.D.P.

1470 סוּג (*sûg*) **II, fence about** (Song 7:3; Isa 17:11).

סוּגָר (*sûgar*). See no. 1462b.

1471 סוּד (*swd*). **Assumed root of the following.**

1471a סוּדָּה (*sôd*) **counsel, council, assembly**. (RSV occasionally reads "gatherings," "company.")

The primary meaning of the word is "confidential speech" (cf. Arabic *sā'wada* "speak secretly"), hence, "counsel." The emphasis on confidentiality marks a distinction between this word and the more general 'ēṣā (q.v.) "advice," "counsel."

The word stresses that intelligent counsel can be a key to good success (Prov 15:22). It is extended to indicate a circle of trusted intimates

who give their advice (Ps 55:14 [H 15]; 83:3 [H 4]). Hopefully, such friends will never stand against a man (Job 19:19) or reveal confidences (Prov 11:13; 20:19; 25:9).

The wise and upright man who walks in the fear of the Lord will have God's secret counsel (Ps 25:14; Prov 3:32; Amos 3:7; cf. Job 15:8; 29:4). He will associate himself with others who likewise fear God (Ps 89:7 [H 8]) and sing his praises (Ps 111:1). He will disassociate himself from evildoers (Gen 49:6; Jer 15:17) and pray for deliverance from their evil machinations (Ps 64:2 [H 3]). God himself will oppose wicked councils (Jer 23:18-22) and pour out his wrath upon their members (Jer 6:11) so that they have no place among the assembly of the righteous (Ezk 13:9).

Bibliography: Thomas, D. W., "The Interpretation of *b'sôd* in Job 29:4," JBL 65:63-66. THAT, II, pp. 144-47.

1472 סוּה (*swh*). **Assumed root of the following.**

1472a סוּת (*sût*) **vesture** (Gen 49:11, only).

1472b מַסְוֵה (*masweh*) **veil** (Ex 34:33, only).

1473 סוּה (*swh*). **Assumed root of the following.**

1473a סוּחָה (*sûhâ*) **offal** (Isa 5:25, only).

1474 סוּךְ (*sûk*) **I, anoint.**

Derivative

1474a אֲסוּךְ (*'āsûk*) **small oil jug**.

The root means primarily "anoint," "pour, in anointing," a meaning found also in Akkadian *sāk*. As a pouring, it differs from its most common synonym *māšah* which includes the idea of "smearing" or "spreading."

This root is to be distinguished from the homonymic *sûk* II, "hedge in," (q.v.) and probably from still a third root (only Pilpel) meaning "instigate," "incite" (cf. Tigrinya *sāsākā*, "move unceasingly," "stir"), found in Isa 9: 11 [H 10]; 19:2.

sûk may be used of the ordinary physical process of anointing the body with olive oil, particularly after bathing (II Sam 12:20), for especially fragrant effect (Ruth 3:3). It was often used for medicinal needs (Ezk 16:9; cf. Lk 10:34). A symbol of gladness, it could be mark of hospitality and consideration (II Chr 28:15; cf. Lk 7:46).

sûk also designates the pouring of the purest and most fragrant anointing oils, specially mixed for holy use. This holy oil was reserved for Aaron and his sons and for the sacred precincts where they ministered. The entire set of regulations is replete with spiritual lessons for the New Testament priesthood of believers (see II Cor 2:14-16; I Pet 2:5-9).

1475 סוּךְ (*sūk*)

'āsuk. *Small oil jug*. The derivative 'āsūk is found only with regard to the cruse which the widow gave to Elisha (II Kgs 4:2).

R.D.P.

1475 סוּךְ (*sūk*) II, *hedge, fence about*.

Derivative

1475a מְסוּכָה (*m^esūkā*) *hedge*.

The primary meaning of the word conveys the idea of putting up a hedge or a fence. It is to be differentiated from two homonyms, one meaning "incite," "instigate," found only in Isa 9:10; 19:2 and the more common word "anoint" (see *sūk* I). *sūk* II is probably a by-form of *sūk* I "hedge in" (cf. *m^esūkā*, hedge).

The twin roots *sūk* and *sūk* are found but four times in the OT (Job 1:10; 3:23; 38:8; Hos 2:6 [H 8]). They describe Job's being hedged about with good and God's control of the bounds of life and history.

m^esūkā. Hedge. The derivative occurs only once, as does *m^esūkā*. The writer of Proverbs (15:19) distinguishes between the way of the righteous (hence industrious) man (which is like a good highway where progress can be made) and that of the lazy man, which is as a thorn hedge (*m^esūkā*). Micah (7:4) laments the sinful corruption of God's people, noting that the best of them is no better than a thorn hedge (*m^esūkā*).

R.D.P.

1476 סוּס (*sūs*) I, *swallow or swift* (Isa 38:14; Jer 8:7).

1477 סוּס (*sūs*) II, *horse*. (When feminine, סוּסָה RSV = "mare"; ASV = "steed.")

This word for horse, which appears throughout the Semitic family, is commonly taken to be of Indo-European origin (cf. *pārāsh* "horse(man)," "(war)-horse" and Egyptian *ssmt* "horse").

Though attested in the Fertile Crescent about the beginning of the second millennium B.C., the horse's frequency increased with its employment in the war chariots of the Indo-Aryan Mitanni during the Middle Bronze Period. From Syria-Palestine in this period the horse and chariot were introduced into Egypt by the Hyksos.

The horse was commonly utilized for military purposes (Ex 15:19). Trade also flourished with horses (Gen 47:17; Ezk 27:14), Solomon, in particular, being a middleman in the horse and chariot business (I Kgs 10:28-29).

Theologically, horses figure in the prophecies of eschatological times when the Davidic king will ride on horse and chariot before an obedient and righteous people (Jer 17:25; 22:4). The eschatological battles are depicted in terms of the

war horse (Ezk 38:4, 15; 39:20); yet Israel will no longer trust in horses (Hos 14:3 [H 4]), but in God himself, for in the Day of the Lord all weaponry will be useless (Zech 12:4).

The horse's characteristics become examples to the believer to put away stubbornness (Jer 8:6), lust (Jer 5:8), and insubmissiveness (Prov 26:3) and to put their trust in the Lord (Ps 20:7 [H 8]).

R.D.P.

1478 סוּף (*sûp*) *come to an end, cease*.

Derivatives

1478a סוּף (*sôp*) *end* (synonymous with *qēš*, Eccl 3:11; Joel 2:20).

1478b סוּפָה (*sûpā*) *storm wind* (e.g. Isa 5:28; Hos 8:7).

The basic meaning of this verb is reflected in ASV, RSV, whereas KJV has "be consumed." It is used of God's judgment (Ps 73:19; Jer 8:13; Amos 3:15), especially in the end of things (Isa 66:17; Zeph 1:2f.), and of the unending annual observation of Purim (Est 9:28).

R.D.P.

1479 סוּף (*sûp*) *reed, water plant*. (KJV "flags," "weeds"; ASV, RSV "reeds," "weeds.")

This noun is primarily a general term for marsh plants. It can also designate rushes (Isa 19:6), seaweed (Jon 2:5 [H 6]) or marsh reeds (Ex 2:3, 5). Etymologically, it is related to Egyptian *wfī* "marsh plant," "papyrus."

The word enters prominently into the problem of the route of the Exodus in the territory of *yam sūp* "sea of reeds." In a narrow sense, this term refers to the area of the Exodus crossing, possibly either the Bitter Lakes (southern crossing) or Lake Timsah (central crossing). More broadly, it refers to the area including the modern Gulf of Suez (Num 33:10-11) and the Gulf of Aqaba (I Kgs 9:26). The KJV "Red Sea" stems from the LXX which included a still wider area. There is no warrant for the idea that because Israel crossed the Sea of Reeds that the water was shallow and no miracle was involved. Any deep sea may have reeds on its edge and both the Bitter Lakes and Lake Timsah are large and deep bodies of water.

Theologically, *yam sūp* reminds the believer of the goodness of God (Neh 9:9) who has loosed his people from bondage (Josh 24:6), leads his people in triumph over their enemies (Ex 15:4, 22), guides them through the wilderness experiences of life (Deut 2:1) and has placed them in the land of promised inheritance (Josh 4:23ff.).

R.D.P.

1480 סוּר (*sûr*) *turn aside, depart*.

Derivative

1480a סָרָה (*sārâ*) *turning aside, defection*.

The primary meaning of the root is "to turn aside." It appears to be a distinctively Northwest Semitic word, being attested particularly in Hebrew and Phoenician. Intransitive in the basic stem, it is accordingly frequently found with many prepositions, yielding such ideas as "turn aside from/into," and "withdraw from."

The verbal root occurs 191 times. In many cases it is a simple verb of motion, the act of turning aside (Ex 3:3-4; Jud 4:18; Ruth 4:1) or departing (Num 12:10).

The idea of departing could also involve spiritual issues. Thus, Samson "knew not that the Lord had departed from him" (Jud 16:20). The Lord departed from Saul" (I Sam 16:14; 28:16). Tragically, it was said repeatedly of Israel and its leaders that they did not depart "from the sins of Jeroboam" (II Kgs 10:31; 13:2, 6, 11; 14:24; 15:9, 18, 24, 28; 17:22; cf. 3:3). God complained against Jerusalem that the heart of his people had departed from him (Ezk 6:9). Unfortunately, those who had "departed not from following the Lord" (II Kgs 18:6) were all too few.

The root is often used of Israel's apostasy. In many cases it is translated "turn aside/away" (e.g. Ex 32:8; Deut 9:12; 11:16). Conversely, "not to turn aside" was a way of affirming a man's steadfastness before the Lord (I Kgs 22:43). Such a course of following strictly the will of God is frequently depicted by wedding the root to the familiar right hand—left hand motif. Thus, it was said of Josiah that he "did not turn aside to the right hand, nor to the left" (II Kgs 22:2; cf. Deut 2:27; 5:32 [H 29]; Josh 1:7).

In the Hiphil stem, the meaning "remove" is most common. Asa removes Maacah for her continued idolatry (II Chr 15:16). Hezekiah removes the places and cult objects of idolatry (II Kgs 18:4; II Chr 30:14). God's people are urged to remove or "put away" those things that will do spiritual harm to them: strange gods (Gen 35:2), all evil (Isa 1:16), wine (I Sam 1:14), false ways (Ps 119:29), and false worship (Amos 5:21-23).

The root is also found frequently in the wisdom literature, being used of the most basic spiritual issues. Job (15:30) is reminded that the wicked will ultimately perish at God's command. Godly wisdom and the fear of the Lord, however, turn one aside from the snares of death (Prov 13:14; 14:27). This is to be learned thoroughly in one's youth so that it will become a pattern throughout life (Prov 22:6).

Rather than turning aside from God's commands and will for the life, the wise course of action is ever to "fear the Lord and turn away from evil" (Prov 3:7, cf. 16:6, 17; Job 28:28; Ps 34:14 [H 15]; 37:27).

sārâ. Turning aside, defection, rebellion. The derivative *sārâ* also deals with man's relation to God and is used in two ways: (1) of any moral or legal defection (Deut 19:16) and (2) of distinct defection from God (Deut 13:5 [H 6]; Isa 31:6; 59:13; Jer 28:16; 29:32).

Bibliography: THAT, II, pp. 148-49.

R.D.P.

1481 סֹוֹת (*sût*) *entice, allure, instigate, incite*. (ASV, RSV similarly.)

Etymological identifications with other Semitic roots are doubtful. As opposed to *pātâ* "be simple," "deceive," there is also the underlying idea of cunningness in this root.

Most commonly the verb has an evil connotation. David, who desired self-glorification, was easily enticed to number the people (I Chr 21:1). The Assyrian officer besieging Jerusalem warns the people that Hezekiah's instruction to depend solely on God is a false allurements (II Kgs 18:32). Baruch, Jeremiah's scribe, was labeled an inciter and a political agitator, whose ulterior aim was the enslavement and death of all the refugees of Jerusalem (Jer 43:3).

Jezebel so "incites" Ahab to evil that his closing epitaph is that he surpassed everyone in doing sin (I Kgs 21:25). Ahab learned well from Jezebel, for he enticed Jehoshaphat, to whom he was related by marriage, to go to war with him against Ramoth-Gilead (II Chr 18:2). Jehoshaphat should have heeded the scriptural warning against being misdirected by family ties (Deut 13:6 [H 7]) or close friends (Jer 38:22). Despite Jehoshaphat's folly, God had arranged to "lure away" the enemy chariot captains who were on the point of taking his life. He had learned what the believer is ever to bear in mind. Although God may allow him to be enticed, whenever the righteous truly cries to God (II Chr 18:31), God diverts him "from the mouth of distress" (Job 36:16).

R.D.P.

סֹוֹת (*sût*). See no. 1472a.

1482 סָהַב (*sāhab*) *drag* (e.g. II Sam 17:13; Jer 49:20).

Derivative

1482a סָהַבָּה (*s'habā*) *rag* (Jer 38:11-12).

1483 סָהָה (*sāhâ*) *scrape* (Ezk 26:4, only).

Derivative

1483a סָחִי (*s'hi*) *offscouring* (Lam 3:45).

סָחִי (*s'hi*). See no. 1483a.

1484 שָׁחִישׁ (*sāḥîsh*)

1484 שָׁחִישׁ (*sāḥîsh*) *grain that shoots up of itself in the second year* (II Kgs 19:29). Derivation uncertain.

1485 שָׁחַף (*sāḥap*) *prostrate* (Prov 28:3; Jer 46:15).

1486 שָׁחַר (*sāḥar*) *to about in trade*.

Derivatives

1486a שָׁחַר (*sāḥar*), שָׁחָר (*sāḥār*) *gain from merchandise*.

1486b שָׁחָרָה (*s^eḥōrā*) *merchandise* (cf. Akkadian *sahāru*).

1486c שָׁחָרָה (*sōḥērā*) *buckler*.

1486d מִשְׁחָר (*mishār*) *merchandise*.

1486e שֹׁהֶרֶת (*sōheret*) *stone used (with marble) in paving* (Est 1:6).

The root in its primary meaning "go around," "turn about/away" (cf. Akkadian *sahāru* and Old Akkadian *siḥrum* "rim") occurs infrequently in the OT; more common is the participle *sōḥēr* "trader."

Etymological considerations comprise the major problem with this root, as Speiser (see bibliography) has shown. Although the meanings of the participial form and the verbal root are thoroughly established, controversy exists as to whether the primary meaning "to go around" is to be understood in the five verbal occurrences (Gen 34:10, 21; 42:34; Ps 38:10 [H 11]; Jer 14:18) or whether the specialized meaning of the participle "to trade" is to be felt. Speiser decides for the former, Albright (see bibliography) and most modern translations, for the latter.

A look at the contexts involved shows the complexity of the problem. In the case of the Jeremianic reference, it can be noted that although one could argue the case for a debased and exiled priesthood and prophetic class which would "peddle their wares," the primary meaning makes as good or better sense. In either understanding, the physical drought of Jeremiah's day was an outward sign of Judah's spiritual condition, a condition whose only end could be the judgment of going off into captivity and exile.

The Psalmist's penitential plea can scarcely be reconciled with any economic concept. The Pelal stem used here must mean "my heart palpitates (throbs)," as almost all versions agree (note especially, Italian "Il mio cuore palpita"). GKC, p. 151 holds that the Pelal stem characteristically refers to quick succession in time, thus "to go quickly."

While the fact that the root meaning was not lost sight of as late as the tenth and seventh centuries B.C. does not prove the necessity of adopting it for the three earlier occurrences in Genesis,

neither does the fact that the ancient Greek (second century B.C.), Syriac (second century A.D.) and Latin (fourth century A.D.) versions translating *sāḥar* by the meaning "to trade" argue for their understanding, since by their time the root meaning had fallen into disuse. Indeed, Speiser's conclusion that the primary meaning is to be understood seems etymologically, syntactically, and contextually more adequate. He is probably right in suggesting that the infrequency of the verbal root is due to the productiveness of *sābab* (q.v.) with similar basic meaning.

sāḥar, sāḥār. Gain from merchandise. s^eḥōrā. Merchandise. These three derivatives accord with the later specialized nominal idea, usages well established by comparison with the other Semitic languages.

sōḥērā. Buckler. sōheret. Colored stones. These two derivatives are rare. *sōḥērā* "buckler" (only in Ps 91:4), is usually understood as the small shield used in closest combat or some type of armor (cf. Akkadian *siḥirtu*, *tashīrātu* "surroundings"), and is clearly related to the verbal root. The origin of *sōheret* (only in Est 1:6) "precious/colored stones" of the "pavement" of the palace like its Akkadian cognate *siḥru*, is obscure. Both may derive from the idea of roundness. Perhaps the best evidence on the meaning of *sōheret* in Est 1:6 would come from the excavation of the Persian palaces of Susa. The "pavement" if that is the precise meaning included colored stones and *sōheret* according to Esther. Excavations show much multicolored glazed bricks used in the pavement and walls of the palace of Darius (A. T. Olmstead, *History of the Persian Empire*, Univ. of Chicago, 1948, pp. 169-71).

Bibliography: Speiser, E. A., "The Verb SHR in Genesis and Early Hebrew Movements," BASOR 163:36-54. Albright, W. F., "Some Remarks on the Meaning of the Verb Shr in Genesis," BASOR 164:28.

R.D.P.

שֹׁהֶרֶת (*sōheret*). See no. 1486e.

סִינַי (*sig*). See no. 1469a.

1487 סִינָן (*siwān*) *Siwan, the third month*. For the names of other months, see 613b.

1488 סִינַי (*sinai*) *Sinai*.

The name of the mountain before which Israel encamped as God through Moses entered into covenant with them (Ex 19-24). Sinai is traditionally located at Jebel Musa in the rugged mountains in the southern part of the Sinai Peninsula. Jebel Musa rises to 7500 feet, its neighbor Jebel Katherina to 8500 feet. "In winter, the high-

lands have relatively abundant rainfall and are frequently snowclad, seeding the northward flowing wadis and underground channels" (E. M. Blaiklock, *Zondervan Pictorial Bible Atlas*, Zondervan, 1969, p. 28).

At Sinai the people were given instructions concerning the tabernacle and priesthood (Ex 25-31, 34-40) and the Levitical regulations. Here, too, Israel's first great spiritual failure took place (Ex 32-33; Lev 10).

Theologically, Sinai has been of great significance to Judaism as the place where both the oral and written law were given. More important still, is what Sinai teaches about the person of God. The One of Sinai (Jud 5:5; Ps 68:8 [H 9]), is seen to be the omnipotent and holy God who leads forth his redeemed people (Deut 33:2) from Sinai, his holy abode (Ps 68:17 [H 18]) in great splendor and triumph to the land of promise (Hab 3:2-9).

The New Testament enlarges upon the place of Sinai by stressing that it symbolized the bondage of the old covenant, a bondage taken away by the work of Christ who has effected the new covenant of liberty and promise through his blood (Gal 4:25ff.; Heb 12:18ff.).

R.D.P.

1489 סִיר (*sir*) *I, pot* (e.g. Ex 16:3; 1 Kgs 7:45).

1490 סִיר (*sir*) *II, thorn* (Isa 34:13), hook (Amos 4:2).

סָךְ (*sak*), סֹךְ (*sök*). See nos. 1492c,d.

1491 סִכְכֹּת (*sikkût*) *Tabernacle*. (ASV similar, RSV *sakkuth*.)

This word occurs once in the Old Testament, in Amos 5:26, along with *kiyyûn* (q.v.). Although the consonants *skt* may be those of "tabernacle," as both KJV and ASV render it, the presence of this word with *kyn* in certain Mesopotamian texts, both referring to the star god, Saturn, makes it seem likely that *sikkût* here is a proper name referring to such a deity.

Both *sikkût* and *kiyûn* have apparently been revocalized with the vowels from *shiqquš* abomination. Whether the words were actually pronounced as revocalized, or were simply read as *shiqquš* is a moot question. The fact that YHWH vocalized with the vowels from 'adonai is pronounced as 'adonai gives some weight to the latter view. (See a similar treatment of the vowels of *bōshet*.)

It is clear from Mesopotamian myths that the stars represented the pantheon of gods [the cuneiform sign for Ishtar, the queen of heaven (Jer 7:18, etc.) was a star]. Thus to become a vassal of Assyria and later, of Babylon, meant to

serve the "host of heaven" as gods. This is made clear in the accounts of Manasseh (II Kgs 21:3, 5) who worshiped these deities as a part of his subservience, and Josiah, who repudiated them as a part of his revolt against such subservience (II Kgs 23:4-5).

Amos is saying that the result of the Israelites' forsaking their trust in God for a political and religious deal with their oppressors will result not in deliverance, but destruction.

[The NT refers to this difficult verse (Acts 7:43) taking it a bit differently from the Hebrew of Amos 5:26. It parallels the "sikkût of your king" (or Molech) and "the star of your god," interpreting the latter deity as Remphan which is apparently a title of the star god Saturn. Then it refers to both the *sikkût* and *kiyûn* as "figures" or "images" which the Jews had worshiped. In this formulation, the "sikkût of Molech" may indeed be a "tabernacle" or "shrine" a "*sukkat* of Molech," but the word for "shrine," *sukkat*, may have been chosen as a word play on a Babylonian name of the star god Saturn, *sikkût*. R.L.H.]

J.N.O.

סִכְכֹּת (*sukkôt*). See no. 1492e.

1492 סָכַךְ (*sākak*) *block, stop the approach, shut off, cover*.

Derivatives

1492a סָכַךְ (*māsāk*), מִסְכָּה (*m'sūkā*) *covering*.

1492b מִסְכָּה (*mūsāk*) *covered structure*.

1492c סָךְ (*sak*) *multitude*.

1492d סֹךְ (*sök*), סִכְכָּה (*sükkā*) *covert, thicket, booth*. See also no. 1491.

1492e סִכְכֹּת (*sükkôt*) *Succoth* (place name).

1492f סִכְכֶּךְ (*sökēk*) *covered structure*, only used in Nah 2:6.

The basic meaning of the root is that of blocking, or stopping up something. Cognates exist in Akkadian (*sakāku* "(be) choke(d) up") and Arabic (*sakka* "choke up"). A by-form, *sākak* "cover," occurs in Ex 33:22. A homophonic root, "weave," "shape," may possibly underlie Job 10:11 and Psalm 139:13. (But cf. Dahood, AB, *Psalms III* who derives it from *sākak* "cover" with *b* meaning "from" "protected from birth.")

This important root is productive in both a physical and figurative sense, particularly with the idea of "covering." In the former sense, it was frequently used in the building activities relative to the sacred places of worship. The cherubim's wings were to cover the mercy seat in the tabernacle (Ex 37:9) and the temple (I Chr

28:18). A veil screened off the ark and the mercy seat which were located within the holy of holies (Ex 40:3, 21). The participial form yields the denominative *sōkēk*, a covering erected to protect besiegers from the defenders' missiles (Nah 2:5 [H 6]).

In a figurative sense, it pictures God's protection for the one who comes to him for refuge (Ps 5:11 [H 12]; cf. 91:4; 140:7 [H 8]).

māsāk. *Covering.* Used most notably in connection with the several entrance screens in the tabernacle complex (Ex 39:34–40).

m^ssūkā. *Covering.* Refers to the prince of Tyre's jeweled surroundings, a description that finds ultimate understanding in the events of Eden and the person and work of Satan (Ezk 28:13ff.).

mūsāk. *Covered way (or place).* Found in II Kgs 16:18 where it designates "the covered way for the sabbath" which was removed in the remodeling that followed Ahaz's apostasy. Another view is that *shabbat* is to be vocalized *shebet* (from *yāshab*) and read as "throne," "the covered place of the throne."

sak. *Multitude* (Ps 42:4 [H 5]). This word is difficult. The renderings of the various English versions (KJV "multitude," ASV, RSV "throng") are by no means certain. Dahood's "barrier" (i.e. separating the temple enclosure from the court of the gentiles) is not without merit (see AB, *Psalms I*, p. 257).

sōk. *Covert.* Occurs four times with the idea of a protective covering, whether in the natural world (Ps 10:9; Jer 25:38) or figuratively, of the person and work of God (Ps 27:5; 76:2 [H 3]).

sūkā. *Covert.* Designates a temporary abode (II Sam 11:11; Job 36:20; 38:40). In a context of judgment Isaiah (1:8) employs the word to picture the devastation and depopulation of Israel, because he foresees God's people reduced to living in temporary shelters. Figuratively, God provides shelter for the believer's temporary afflictions (Ps 31:20 [H 21]).

Most commonly, it is used in connection with the Feast of Tabernacles. Once a year the Israelite left his home to tabernacle in a "booth," made from tree branches (Lev 23:34ff.). The feast marked not only the joy and thankfulness of a grateful people for God's provision at the end of the agricultural season (Lev 23:39–41), but was to be a perpetual reminder (Deut 16:13ff.) to the people of God's care for his own whom he had rescued from Egypt during those long years in the wilderness (Lev 23:42–43). The feast was closed by a day of rest, featured by a holy convocation, marking not only the climax of the religious year but symbolizing the rest of the believer in his God

(Lev 23:39). Prophetically, the feast finds final fulfillment in that grand day when God will raise up the fallen booth of David (Amos 9:11) and give shelter to his repentant, redeemed, and re-gathered people (Isa 4:6).

sūkkōt. *Succoth.* Marks the name of two important biblical sites. The first was located in Gad (Josh 13:27) near the Jordan Valley, usually identified with Tell Deir 'Alla, two miles north of the Jabbok River. Succoth also names the site where the Hebrews first stopped in their Exodus from Egypt after leaving Ramses (Ex 12:37–13:20), usually equated with Tell el-Maskhuta in the Wadi Tumilat.

R.D.P.

1493 סָכַל (sākal) *be foolish.* Does not occur in the Qal.

Derivatives

1493a סָכַל (sākāl) *fool.*

1493b סֶכֶל (sekel) *folly* (only in Eccl 10:6).

1493c סִכְלוּת (siklūt) *folly, foolishness.*

1493d שִׁכְלוּת (siklūt) *folly* (only in Eccl 1:17).

The verb is used in the Niphal, Piel, and Hiphil. It must be distinguished from the root *sākal* "to be wise" (q.v.). Robert Gordis has noted a considerable number of words possessing mutually contradictory meanings ("Studies in Hebrew Roots of Contrasted Meanings," JQR 27:33–58).

The verb usually expresses lack in a moral or spiritual sense. Thus Saul acted as a fool when he usurped the Levitical prerogative in offering sacrifices. There is more involved than simply being an intellectual fool—Saul displayed his utter lack of spiritual comprehension (I Sam 13:13).

[The verb is mostly used in contexts where a man acts out of fear and thus behaves rashly, rather than acting wisely out of a confidence based in God. Thus David recognizes that he acted foolishly in taking the census of Israel in order to determine his military strength. It was a foolish act because he sought his security apart from God (II Sam 24:10; I Chr 21:8). This practical atheism the Babylonians used to call "living in a *ramanishu*," i.e. living by oneself, on one's own resources, without dependence on God. But this is the essence of sin. Saul recognizes his own foolish behavior toward David, which was caused by his unfounded fear of him (I Sam 26:21). Laban accuses Jacob of acting foolish by slipping off at night rather than giving Laban opportunity to give them a proper send-off. Of course Jacob acted out of fear (Gen 31:28). Ha-

nani, the seer, accuses Asa of playing the fool because out of fear he bribed the Syrians to attack Israel instead of relying on the Lord (I Chr 16:9–10).

David prays that Ahithophel's counsel will lead to the dire consequences that come from hasty, rash behavior. His prayer was answered when Ahithophel committed suicide (II Sam 15:31ff). God likewise turned the knowledge of pagan diviners into the calamity that stems from such behavior when he sent Cyrus to destroy Babylon (Isa 44:25). B.K.W.]

sākāl. Fool, foolish. Jeremiah's generation was foolish and without understanding, and yet it was more than a mere lack of understanding (5:21). Spiritual apostasy is foolishness. This is apparent when people are wise to evil but devoid of the knowledge to do good (Jer 4:22). Eccl underscores the spiritual and particularly moral misfit who demonstrates to all that he is a fool (10:3, et al.).

sekel. Folly. It is a moral perversion when folly is dignified and those of no account are elevated to leadership while those to whom honor is due are demeaned (Eccl 10:6).

siklūt. Folly, foolishness. Consideration of the way of wisdom and the way of folly raises philosophic questions (Eccl 2:3, 12–13). In vv. 1–11 folly appears as an unrestricted accumulation of pleasures and things. But, as *qôhelet* gained maturity, he found the answer, "Wisdom excels folly as light excels darkness." Wisdom is the way of the moral and spiritual man while folly is the way of a man with twisted values. One other association of *siklūt* (foolishness) with madness (Eccl 7:25f.) is pictured by the sinner who allows himself to be entrapped by an immoral woman. The one who would be wise and pleasing to God escapes from her clutches.

L.G.

סִכְלוּת (*siklūt*). See no. 1493c.

1494 סָכַן (*sākan*) *I, be of use, service, profit.*

Derivative

1494a מִסְכְּנוֹת (*misk'nôt*) *storage house.*

The root means basically "be of use." The participial form *sōkēn* "steward," marking the name of an important governmental office (Isa 22:15), is known predominantly in Northwest Semitic.

The root meaning can be well seen in the discourses of Job. Eliphaz (15:3) accuses him of

speaking words that are of no use. He reminds Job (22:2) that the wisest of men can not ultimately benefit God, so that God really has no ulterior motive in testing Job; nevertheless, the wise course of action for a good and peaceful life is to place oneself at God's service (22:21). Elihu (34:9ff.) corrects Job's attitude that it is of no use to attempt to be pleasing to God (cf. 35:3).

The root also allows various shades of meaning, such as : God's superintending care of the believer (Ps 139:3), the woodsman's endangering of himself in the hewing of trees (Eccl 10:9), or Balaam's donkey's protest that he has never been accustomed to mocking his master (Num 22:30).

misk'nôt. Storage house, magazine. Designates a place of service, particularly storage cities, whether for Pharaoh (Ex 1:11) or Solomon (I Kgs 9:19), whether in Naphtali (II Chr 16:4) or Judah (II Chr 17:12).

R.D.P.

1495 *סָכַן (*sākan*) *II, incur, danger.* This verb occurs only once, in the Niphal (Eccl 10:9).

1496 *סָכַן (*sākan*) *III, be poor.* Occurs only in Isa 40:20, in the Pual stem. Perhaps artificially derived from *miskēn* (q.v.).

1497 *סָכַר (*sākar*) *I, shut up, stop up.* This verb occurs in the Niphal (Ps 63:12; Gen 8:2) and the Piel (Isa 19:4). Apparently related to *sāgar* (q.v.).

1498 סָכַר (*sākar*) *II, hire* (Ezra 4:5, only). The much more common form is *šākar* (q.v.).

1499 *סָכַת (*sākat*) *be silent.* Occurs only in the Hiphil (Deut 27:9, only).

סָל (*sal*). See no. 1507a.

1500 *סָלָא (*sālā'*) *weigh.* This verb occurs only once, in the Pual (Lam 4:2).

1501 *סָלַד (*sālād*) *spring, leap for joy.* This verb occurs only once, in the Piel stem (Job 6:10).

1502 סָלָה (*sālā*) *I, make light of, toss aside* (Ps 119:118; Lam 1:15).

סָלָה (*selā*). See no. 1506a.

1503 *סָלָה (*sālā*) *II, weigh, balance.* This verb occurs only once, in the Pual (Job 28:16).

1504 סָלוֹן (*sallôn*)

1504 סָלוֹן (*sallôn*) *brier*. Root uncertain.

1505 סָלַח (*sālah*) *forgive, pardon*.

Derivatives

1505a סָלַח (*sallāh*) *ready to forgive, forgiving*.

1505b סְלִיחָה (*s'liḥā*) *forgiveness*.

This verb, together with a few others, such as *bāra'* "to create," is used in Scripture solely of God. *sālah* is used of God's offer of pardon and forgiveness to the sinner. Never does this word in any of its forms refer to people forgiving each other.

The same root appears in Ugaritic (UT 19: no. 1757) and Akkadian, but without any apparent connection to the form under consideration. The Akkadian *salāhu* means "sprinkle" in cultic and medical contexts.

One of the greatest evangelical notes in the OT is struck by this word: forgiveness and pardon from the very God of forgiveness. It also raises the greatest problem as well: What was the nature of this forgiveness? Hebrews *seems* to state just as categorically that *or* forgiveness was ineffective and impossible (Heb 9:9; 10:4).

The resolution is clear. In the first place, Jehovah himself announces, in response to Moses' prayers for Israel, that he has forgiven Israel at two of their darkest moments, the golden calf incident and the murmuring at Kadesh Barnea (Ex 34:9; Num 14:19–20).

In the second place, on the basis of Mosaic legislation, real atonement and forgiveness were available for all sins except those of the defiant and unrepentant sinner (Num 15:30–31) who "despised the word of the Lord." The claim is made repeatedly (Lev 4:20, 26, 31, 35; 5:10, 13, 16, 18, 26; 19:22) that when atonement was made, the sinner's sins were forgiven. For all such sins as lying, theft, perjury, fraud (Lev 6:1–7 [H 5:20–26]), or those "against any of the Commandments of the Lord" (Lev 4:2), it was possible to obtain divine pardon. Rather than being excluded, these sins were specifically included in God's provision for the *or* believer along with "sins of ignorance" (Num 15:25, 26, 28). As if to emphasize the point, it is stated repeatedly that on the Day of Atonement, "all the iniquities" and sins of Israel were atoned (Lev 16:21, 30, 32, 34). But the individual Israelites had to properly "humble themselves" in true confession (Lev 16:29, 31). This is the kind of forgiveness which Solomon prayed would be available to all as he led a prayer of dedication for the temple (I Kgs 8:30, 34, 39, 50, and its parallel in II Chr 6). Amos requested it for Judah (7:2) as did Daniel (9:19). However, at times Israel was not pardoned (Deut 29:19; Lam 3:42).

So exciting was the openness of this offer of forgiveness that Isaiah (55:7) featured it as the heart of his invitation to salvation. So ready was their Lord to forgive, that Isaiah's listeners must forget all notions based on the reluctance of men to forgive each other.

The experience of forgiveness in the OT was personally efficacious, although objectively the basis and grounds of that forgiveness awaited the death of Christ. Other terms used for forgiveness stressed the ideas of wiping out or blotting out the memory of the sin (*māḥā*), covering or concealing the record of the sin (*kāsā*), lifting up and removal of sin (*nāsā'*), passing by of sin (*'ābar*), and pardoning on the basis of a substitute (*kāpar* in the Piel q.v.).

Three texts in Jeremiah, 31:34; 33:8; 50:20, celebrate a future forgiveness of our Lord in connection with the New Covenant and ultimately his second coming.

sallāh. *Ready to forgive, forgiving.* The only biblical example of this adjectival form occurs in Ps 86:5, which describes the Lord as kind and forgiving.

s'liḥā. *Forgiveness.* There are three occurrences of this noun form. In Neh 9:17 it is used in the plural as a description of God: "Thou art a God ready to forgive" (RSV), while in Ps 130:4 and Dan 9:9 it is used as the subject, forgiveness, which is available from the God to whom forgiveness alone belongs.

W.C.K.

1506 סָלַל (*sālal*) *I, cast up, lift up, exalt*.

Derivatives

1506a סָלַל (*selā*) *lift up, exalt*.

1506b סֹלֶלָה (*sōl' lā*) *mound*.

1506c סֻלָּם (*süllām*) *ladder*.

1506d מַסְלֵל (*m' sillā*), מַסְלִיל (*maslül*) *highway*.

The primary meaning of the words seems to be "cast up." Since the meaning of the Hebrew verb is unparalleled in other occurrences of the root in Semitic, it is probably a denominative from Akkadian *sulū* "highway" (from *salū* "to throw up/off/out").

The Hebrew verb is used chiefly for figurative expressions, especially in hostile contexts. Pharaoh lifts himself up against God's people (Ex 9:17). Job decries his treatment by God (19:12) and people alike (30:12).

The theme of casting up a highway is utilized by the prophets. The figure, derived from build-

ing a road higher than the adjacent terrain, is natural. Cf. our English word *highway* which shows a similar semantic development. While Jeremiah (18:15) lamented that Israel had left "God's highway" to follow false bypaths, Isaiah (57:14; 62:10) foresaw the time when all obstacles would be removed from the path of a repentant Israel, returning on the highway to Zion.

sōl'ā. *Mound, siege rampart.* (Cf. Egyptian *trr.f* "siege mound.") This term is often employed by the prophets in contexts of judgment (Jer 6:6; 32:24; 33:4; Ezk 17:17; Dan 11:15).

sūllām. *Ladder.* Used of Jacob's ladder, raised from earth to heaven (Gen 28:12). Some would suggest the translation "stairway" and liken the structure to a ziggurat, which is possible. However, there are other words for stairway, and ladders were used at a very early time (cf. J. Mellaart, *Catal Huyuk*, McGraw-Hill, 1967, p. 56).

m'sillā, maslūl. *Highway, raised way.* Whether of a simple road (Num 20:19) or the steps of Solomon's temple and palace (II Chr 9:11) or prophetically, the highway of the returning remnant (Isa 11:16). Metaphorically, it describes the way of the upright (Prov 16:17) or the courses of the stars (Jud 5:20).

selah. [A term of unknown meaning, probably of musical significance, occurring 71 times in the Pss and also in Hab 3:3, 9, 13. Many are the conjectures as to its meaning, but nothing certain is known. Other terms also probably musical but of uncertain meaning are, 'ālāmōt, *sh'minit*, *gittit*, *maḥālat* l'annōt, *n'ginōt*, *n'hilōt*, *hig-gāyōn*, *shiggāyōn*, *lamm'našṣēah maskil*, *mik-tām*. Other enigmatic terms perhaps refer to tunes. See ZEPB IV, p. 945, also commentaries and introductions, R.L.H.]

R.D.P.

סְלִיחָה (*s'liḥā*). See no. 1505b.

1507 סֵלַל (*sll*) **II. Assumed root of the following.**

1507a סָל (*sal*) *basket* (e.g. Gen 40:18; Jud 6:19).

1507b סָלְסֵלָה (*salsillā*) *basket, perhaps shoot, branch* (Jer 6:9).

סָלַם (*sūllām*). See no. 1506c.

סָלְסֵלָה (*salsillā*). See no. 1507b.

1508 סָלַע (*sl'*) **Assumed root of the following.**

1508a סֵלַעַת (*sela'*) *rock, cliff*. (ASV, RSV similarly.)

This noun is related to an Arabic root *sala'a* "split" (hence *sil'un* "fissure"). As opposed to *šūr* "rock," (with which it is often used interchangeably, which lays emphasis on a more mas-

sive rock; cf. Aramaic *tūr* "mountain"), it refers basically to a cleft in a rock, thence a rock or cliff.

Though the word is used of purely natural rocks (Jud 6:20) or cliffs (Jer 13:4), the physical object often becomes a symbol of spiritual truths. Perhaps the best known case is found in Num 20:8ff., when Moses in disbelief and rebellion against God's instruction took it upon himself, in reprimanding the people to strike the rock twice (cf. Num 27:14).

Like *šūr*, *sela'* symbolizes God himself as a place of security and refuge (see Ps 71:3) for the one who fears him and lives righteously before him (Ps 31:3 [H 4]). The figure of God as a rock becomes typical for the New Testament teachings relative to Christ's person and walk (cf. I Pet 2:6ff.; I Cor 10:4).

The word can at times also carry a bad sense, its natural features easily symbolizing spiritual obstinacy (Jer 5:3) or even open sin (Ezk 24:7-8; Amos 6:12).

R.D.P.

1509 סֵלַעַת (*sol'ām*) *locust* (edible, Lev 11:22).

1510 סָלַפַּ (*sālap*) *distort, twist, pervert, ruin.*

Derivative

1510a סֵלַפַּת (*selep*) *crookedness.*

The basic meaning of the root is "to twist"; the related ideas of distorting or perverting a man's rights or ways make it synonymous with other such Hebrew verbs as: *hāpak* "overturn," *'āwā* "do wrong," "pervert," and *'āqash* "do that which is crooked."

The verb (only Piel) is employed primarily for contexts dealing with moral or social behavior. The Torah warns strenuously against taking a bribe (כֶּנֶס "gift") lest it becloud one's clear thinking and so distort the course of justice (Ex 23:8; Deut 16:19). The dangers of bribery, particularly in matters of litigation, were well known in the ancient world (see, for example *The Code of Hammurabi*, paragraph 5).

The verb occurs frequently in pointing out that evil so twists the sinful and foolish man that his way becomes perverted and he rages against the Lord (Prov 13:6; 19:3). While the evil man may think he prospers, God will overthrow him in his treacherousness (Prov 22:12) and turn his way to ruin (Prov 21:12).

selep. *Crookedness, falsehood.* Enlarges upon this picture. Whereas the righteous is guarded by his integrity, the falseness of the treacherous man will turn his way upside down (Prov 11:3). The man who speaks with a twisted tongue will find his praises self-destructing (Prov 15:4).

R.D.P.

1511 סָלַק (*sālēq*)

1511 סָלַק (*sālēq*) *ascend*. (So also, ASV, RSV.)

The Hebrew root is probably a loan word from Aramaic *sālēq*. It is found only in Ps 139:8 (note backward assimilated "l") where the Psalmist underscores the omnipresence of God. Whether he were to climb to highest heaven or lie in Sheol, he would find God. Possibly *sālaq* (q.v.) is a by-form meaning "go up in flames." It also exhibits the backward assimilation of the *lamed* (unless the derivation from *nāsaq* is held).

R.D.P.

1512 סֹלֶת (*sōlet*) (*fine*) *flour* (So ASV, RSV.)

The word (from Akkadian *salātu* "crush"), denoting a finely ground flour, is known throughout the ancient Mediterranean world (e.g. Akkadian *siltu*, Arabic *sultun*, Aramaic *sūltā*, Egyptian *tr.t*). As opposed to *qemah* "meal" which came from whole kernels and bran, this finest of flour was ground exclusively from the inner kernels of the wheat (hence, LXX *semidalis*, Vulgate *simila*). Though available to all, it was expensive and considered a luxury item (Ezk 16:13; cf. Rev 18:13), to be used especially in entertaining important guests (Gen 18:6).

Fine flour figured prominently in the Levitical sacrifices (Lev 2 etc.), the offerings of the twelve tribal leaders at the inauguration of the tabernacle worship (Num 7), the regulations relative to the fulfillment of the Nazirite's vow (Num 6:15), the consecration ceremony of the priests (Ex 29:2ff.), and the ordination of the Levites, whom God graciously allowed to take the place of the firstborn in a life of dedicated service to him (Num 8:8). The fine flour reminded the priests and Levites of their high calling and the fine quality of their service and dedication to God of all the fruits of their labor (cf. 1 Pet 2:5).

R.D.P.

סָם (*sam*). See no. 1516a.

1513 סִמְרָה (*s'mādēr*) *blossom of grape* (Song 2:13, 15; 7:13). Derivation uncertain.

1514 סָמַךְ (*sāmak*) *lean upon, lay, put, uphold, support*. (ASV, RSV similarly.)

The primary meaning of the root is "to lean upon," in distinction to its synonyms *tāmak* (q.v.), which basically means "grasp," "lay hold of" and *sā'ad* "sustain."

The best known use of this root is in the laying on of hands. In the Levitical regulations regarding the sacrificial offerings, the offerer brought his proper sacrificial animal in person and laid his hand upon its head, thus expressing identification with the offering, its surrender to God and in the case of guilt, its transfer to the animal (cf. specifically Lev 16:21).

The laying on of hands on the sacrificial animal figured prominently in the regulations for the service of consecration and dedication to the priesthood (Lev 8; cf. Ex 29), a ceremony replete with spiritual application to the ministry of Christ (cf. Heb 10:19-23) and of those called to be his ministers (I Tim 4:14; II Tim 1:6).

The root can also involve the idea of support (Amos 5:19). The Israelites were to learn not to trust in man or nation (II Kgs 18:21; Ezk 30:6), but in God who by his power (Ps 37:24) and word (Ps 119:116) upholds the righteous (Ps 37:17). So will the believer dwell in safety and surety (Ps 3:5 [H 6]) all his life (Ps 71:6) despite those times when he may fall (Ps 145:14).

Bibliography: THAT, II, pp. 160-61.

R.D.P.

1515 סִמֵּל (*semel*) *idol, image*. (ASV, RSV similarly.)

The word denotes basically an image or statue, a meaning found frequently in the Phoenician inscriptions. It is one of several words for idols or images, such as *gillūlim*, *maskit*, 'āṣāb, and *pesel*—terms which generally refer to graven images, *massēkā* and *neseq*—molten images, *t'rāpīm*—household images and *šelem*—a general term for image or idol. Several other circumlocutions or terms refer to idolatry, for example: 'ēlil "nothingness," *sheqer* "falsity," 'ēmā "an object of terror," 'āwen "wicked power," *mip-lešet* "a cause of trembling," *shiqquš*, *sheqes* "detestable thing." (cf. also discussion under *gillūlim*).

Idolatry was prohibited and condemned as apostasy and deviation from God's basic standard. While an idol was nothing in itself, idolatry did bring men into contact with evil spiritual forces; hence, idol worship was both spiritually damaging and dangerous.

The contexts in which *semel* occurs reinforce this picture. Thus, idol making was expressly forbidden to Israel as a violation of God's person, work, and covenant with them (Deut 4:15-20). Setting up an image in the temple or its precincts was an act of gross sin (II Chr 33:7-9; Ezk 8:1-6).

semel is not used theologically of the "Image of God."

The prohibition of idols in Israel was apparently unique in ancient times as was Israel's religion. The obvious thing about every idol image is that it represents a created thing which is naturally less and less worthy than the creator. Cf. Rom 1:23.

Bibliography: Girdlestone, SOT, pp. 303-11.

R.D.P.

1516 סָמַם (*samm*). Assumed root of the following.

1516a סָם (sam) *a spice used in incense* (e.g. Ex 30:34; Lev 4:7; 16:12).

1517 סָמָן (sāman). Occurs only as the Niphal participle, *nismān* "in an appointed place," or "a determined portion" (Isa 28:25).

1518 סָמַר (sāmar) *bristle up* (Ps 119:20; Job 4:15).

Derivatives

1518a סָמָר (sāmār) *bristling, rough* (Jer 51:27, only).

1518b מַסְמֵר (masmēr) *nail* (e.g. Isa 41:7; Eccl 12:11).

1519 סְנָאָה (s'ēnā'ā) *sons of the hated woman, i.e. the poorer classes of Jerusalem* (Ezra 2:35=Neh 7:38). An alternate form from *sānē'* (q.v.).

1520 סְנֶה (s'neh) *bush, the burning bush of Ex 3:3-4*.

The botanical identification is uncertain as is the derivation. This bush is referred to again in Deut 33:16 which is rather clearly a back reference to Ex 3. The Moldenkes mention the view that the "flame of fire" was an illusion caused by bright blossoms. Aside from this naturalistic explanation they suggest the very common shittim tree, *Acacia nilotica* or *A. seyal* (Moldenke, Harold N. and Alma L., *Plants of the Bible*, Ronald Press, 1952, pp. 23-24). More important than the botanical identification is the great miracle used by God to call his chosen servant to his great prophetic work. To judge from Deut 33:16, Moses never forgot the revelation of "him who dwelt in the burning bush" (NIV).

R.L.H.

1521 סְנַוְרִים (sanwērīm) *sudden blindness* (Gen 19:11; II Kgs 6:18).

1522 סְנַסְנִים (sansinīm) *fruit stalk of date tree* (Song 7:9).

1523 סְנַפִּיר (s'nappīr) *fin* (Lev 11:9, 10, 12=Deut 14:9, 10).

1524 סָם (sās) *moth* (Isa 51:8).

1525 סָעַר (sā'ad) *sustain, support, establish, strengthen, comfort*.

Derivative

1525a מִסְעָר (mis'ād) *support*.

The basic meaning of this root is "support," or "sustain" (so also Aramaic, Ezra 5:2). In Southwest and Southeast Semitic the ideas of "aiding" or "assisting" come forward. The emphasis of the word involves the idea of sustenance, whereas other words for support lay stress on "leaning upon" (*sāmak*) or "holding up" (*tāmak*, q.v.).

The root is utilized for taking food for physical nourishment or sustenance (Gen 18:5). It is also employed abstractly. As a good king sustains his throne by righteousness (Prov 20:28), so Messiah will establish and maintain his everlasting kingdom with justice and righteousness (Isa 9:7 [H 6]).

The believer who has enthroned God in his heart may claim the promise that God will support him (Ps 18:35 [H 36]) in time of trouble (Ps 20:1-2 [H 2-3]) and sickness (Ps 41:3 [H 4]). Yea, when cares multiply so that his foot would totter and give way, God is there to support him (Ps 94:18). But God's sufficiency is not restricted to the crisis experiences of life; God himself is the great Provider for man's everyday needs (Ps 104:15).

mis'ād. *Support.* Occurs only in connection with the steps for Solomon's temple and the royal palace (I Kgs 10:12; cf. *m' sillôt*, II Chr 9:11).

R.D.P.

1526 סָעָה (sā'ā) *rush* (of storm wind, Ps 55:9).

סָעִיף (sā'ip). See no. 1527a.

1527 סָעַף (s'p). *Assumed root of the following.*

1527a סָעִיף (sā'ip) *cleft* (Jud 15:8, 11), *branch* (Isa 17:6; 27:10).

1527b סָעִיפָה (s'āppā) *bough, branch* (Ezk 31:6, 8).

1527c סָעִיף (sā'ap) *lop off boughs* (Piel, Isa 10:33).

1527d סָרְעִיפָה (sar'āppā) *bough* (Ezk 31:5).

1527e סָעַף (sē'ēp) *divided, half-hearted* (Ps 119:113).

1527f סָעִיפָה (s'āppā) *division, divided opinion* (I Kgs 18:21).

1528 סָעַר (sā'ar) *storm, whirlwind, tempest*. By-form of *šā'ar* (q.v.).

Derivatives

1528a סָעִירָה (s'ārā) *windstorm*.

1528b סָעַר (sā'ar) *denominative verb, to storm*.

sa'ar means "storm." It may reflect an original nominal root which underlies the Akkadian *šārum* "windstorm" and of which *sa'ar* is a by-

form. If so, *s'ārā* is a feminine derivative and *sā'ar*, a denominative verb. The root must be differentiated from the homonyms *šā'ar* "be acquainted with," and *šā'ar* "bristle."

sa'ar denotes a literal storm (Jon 1:4, 12) or describes the Lord's wrath against the lying prophet (Jer 23:19) or enemy nation (Amos 1:14), especially in the end times (Jer 25:32; 30:23). The Psalmist prays for deliverance from the storms of life (Ps 55:8 [H 9]).

s'ārā. *Windstorm.* Used of a literal storm (Ps 107:25ff.; 148:8) sometimes as a symbol of God's judgment (Isa 29:6). Its use as a theophany (Job 38:1; 40:6), renders more understandable Elijah's translation into heaven in a whirlwind (II Kgs 2:1, 11).

sā'ar. *To storm.* The root idea is found only in connection with the storm which occurred during Jonah's sea flight (Jon 1:11ff.).

Taking its meaning from a physical storm, *sā'ar* usually appears in contexts of upheaval and distress. The Assyrian king is "enraged" at having his secret plans for ambushing the Israelites thwarted (II Kgs 6:11). Habakkuk (3:14) cites part of an ancient epic poem in describing God's triumph over his enemies who come like a "storm" against his people. While Hosea (13:2–3) warns the Israelites of his day that because of their idolatry, God would send them away into exile as chaff driven by a "tempest" (cf. Zech 2:8–14), Isaiah (54:11–14) prophesies that the God of all grace and compassion will yet restore his "storm" tossed and troubled people and establish them in righteousness in a land of unsurpassing beauty and safety.

R.D.P.

ספ (sap) I, II. See nos. 1538a,b.

1529 ספא (*sp'*). **Assumed root of the following.**

1529a מִסְפּוֹא (*mispō')* *fodder* (Gen 24:25; 43:24; Jud 19:19).

1530 סָפַד (*sāpad*) *mourn, lament, wail.*

Derivative

1530a מִסְפֵּד (*mispēd*) *wailing* (cf. Ugaritic *mišspdt* "wailing women" I Aqht 172, 183, UT 19: no. 1790).

Occurring twenty-nine times, *sāpad* is one of more than a dozen words with similar meanings. The basic meaning of the root is attested also in Akkadian and was no doubt known at Ugarit. The Syriac concept "beat the breast as a sign of wailing," as G. Rinaldi ("Alcuni termini ebraici relativi alla letteratura," *Biblica* 40: 278) has pointed out, is not certain, nor is the supposed connection with Amharic *Sādāfe* "dirge," according to Leslau (*Ethiopic and South Arabic*

Contributions to the Hebrew Lexicon, Berkeley: University of California, 1958, p. 37) notes.

By far most of the references in which this root and its derivative are found deal with the mourning rites at someone's death (e.g. Gen 23:2; 50:10; I Sam 25:1; 28:3; II Sam 1:12; 3:31; 11:26; I Kgs 13:29f.; cf. Eccl 12:5). At such times, all who sensed the loss of the departed would come to share their grief with the members of the family. Their grief could be demonstrated in many ways: going barefoot, stripping off one's clothes, cutting one's beard or body, fasting (or banqueting), scattering ashes, or beating some part of the body. Some of these rituals were proscribed for the Israelite, doubtless because of pagan association (Lev 19:28). Shril cries or loud wailing often accompanied the mourning, which in time became stereotyped and structured into formal laments. Of course, weeping, especially by the women, was greatly in evidence as the combination of *sāpad* with its set parallel *bākā* ("weep") attests. The growth of funerary ritual led to the employment of professional mourners, again, usually women.

Mourning for the dead began immediately at death, went on as the body was carried to the tomb, was observed at the tomb and lasted at least seven days after the burial.

The practice of mourning for the departed was seized upon by the prophets to warn of a coming national death in accordance with the just judgment of God. Isaiah (32:11ff.) summons the women of Judah to mourn in the light of the coming judgment. Jeremiah (4:8) calls Jerusalem to repentance and mourning in the face of the Assyrian invasion. Joel (1:8, 13ff.) calls on the mourning priests to lead the people in a time of heartfelt national repentance and sorrow for their sins, since the locust plague was but a harbinger of a worse judgment to come. Micah (1:8) goes wailing and mourning for Judah.

A whole genre of prophetic lamentation grew up which not only stressed the need of national repentance for sin and the certainty of coming judgment but promised ultimate deliverance at the coming of Messiah (e.g. Zech 12:10–11), when in a far deeper sense the believer will echo the Psalmist's cry (Ps 30:10–11 [H 11–12]), "O Lord... thou hast turned my mourning into dancing!"

Bibliography: Jacob, E., "Mourning," in IDB, III. Gregory, T. M., "Mourning," in ZPEB, IV, pp. 302–307.

R.D.P.

1531 סָפַד (*sāpā*) *sweep(away), destroy, consume.* (ASV, RSV similarly.)

The basic image of the root seems to be that of sweeping—both the process of heaping things to-

gether and of sweeping them away (cf. Arabic *safā* "to raise and carry away dust"). The root may sometimes be confused with *'āsap* or *yāsap*.

The root is usually used in a hostile sense, particularly in contexts of judgment. David spent much of his life being swept away before his enemies; later, facing God's judgment for sin, he avoids the choice of being swept away before his enemies (I Chr 21:12–13).

The judgment of God against sin is the subject of several contexts. Lot and his family were warned so that they would not be consumed with Sodom (Gen 19:15ff.). The prophets repeatedly warned apostate Israel that God would heap misfortunes upon them (e.g. Isa 7:20). Jeremiah (12:4) stated that man's sin was so serious that even the natural world was affected by it.

God's judgment should occasion prayer and intercession. Abraham pleaded with his heavenly visitors for the life of the righteous in Sodom (Gen 18:23f.). The Psalmist, concerned that God's will and reputation be evidenced in his life, prayed for his enemies to be swept away (Ps 40:14 [H 15]).

R.D.P.

- 1532 ספה (*sāpah*) *I, attach to, join (together)*. (ASV, RSV similarly.)

While seldom used and of imprecise understanding, the basic meaning is usually discernible (I Sam 2:36; 26:19; Job 30:7; Isa 14:1).

A homophonic root, found in South Semitic, "pour out," may underlie the difficult crux in Hab 2:15.

R.D.P.

- 1533 ספה (*sph*) *II. Assumed root of the following.*

1533a ספיה (*sāpiah*) *I, outpouring* (Job 14:19; Prov 28:3).

1533b ספיה (*sāpiah*) *II, growth from spilled kernels* (II Kgs 19:29=Isa 37:30; Lev 25:5).

- 1534 *שפה (*šāpah*) *III, denominative verb, cause a scab upon* (Piel only, Isa 3:17).

Parent Noun

1534a ספחה (*sappahat*) *eruption, scab* (Lev 13:2).

1534b מִסְפַּחַת (*mispahat*) *eruption, scab* (Lev 13:6–8).

1534c מִסְפַּחָה (*mispāhā*) *long veil* (Ezk 13:18, 21).

1534d מִשְׁפָּח (*mispāh*) *outpouring (of blood), bloodshed* (Isa 5:7).

ספחה (*sappahat*). See no. 1534a.

ספיה (*sāpiah*). I, II. See nos. 1533a,b.

ספיה (*sēpinā*). See no. 1537b.

- 1535 ספיר (*sappir*) *lapis lazuli, sapphire*. (KJV, ASV "sapphire"; RSV often reads "lapis lazuli" in the margin.)

The stone owes its name to the Sanskrit *çanipriya*. That the people of biblical times probably did not understand the word to be the very hard modern sapphire, but lapis lazuli, the rich, azure gem so common to the ancient world, seems probable on the basis of a comparison between the Ugaritic parallels *thr* (gem)/*iqnim* (lapis lazuli) and the biblical pair *tāhōr*, *tōhar/sappir*.

This beautiful gem was costly (Job 28:16) and desirable (Ezk 28:13) though less precious than true wisdom (Job 28:16). It adorned the breastplate of the high priest (Ex 28:18; 39:11). Its great value can be seen in that it is used in the throne of God (Ezk 1:26; 10:1) and becomes the pavement under his feet (Ex 24:10). It is little wonder, then, that it will be found in the very foundation of the New Jerusalem (Isa 54:11; cf. Rev 21:19).

Its beauty and preciousness made it useful to poetic language, such as in Shulamith's description of her beloved (Song 5:14) and Jeremiah's lamentation concerning the Nazirites' changed appearance (Lam 4:7–8). The modern name for the stone is lazurite—a sodium aluminum silicate and sulfide. Its ancient source was the Afghanistan-Iran area north and east of Babylonia. Evidently the Indo-European name was imported with the gem.

Bibliography: D. R. Bowes, "Lapis Lazuli," in ZPEB.

R.D.P.

- 1536 ספל (*sēpel*) *bowl* (Jud 5:25; 6:38). Derivation uncertain.

- 1537 ספן (*sāpan*) *cover, cover in, panel* (e.g. I Kgs 6:9; Hag 1:14).

Derivatives

1537a ספון (*sippūn*) *ceiling* (I Kgs 6:15).

1537b ספינה (*sēpinā*) *vessel, ship* (Jon 1:5).

- 1538 ספה (*spp*). *Assumed root of the following.*

1538a סף (*sap*) *I, bowl, basin*.

1538b סף (*sap*) *II, threshold, sill*.

1538c ספף (*sāpaf*) *stand at the threshold*.

Denominative verb, occurring only once (Hithpoel, Ps 84:11).

sap I. Bowl, basin, goblet, jar. (ASV, RSV similarly.) Well attested in Northwest Semitic (cf. Akkadian *šappu*), it is used of ordinary utensils (II Sam 17:28), sacred vessels (Ex 12:22; I Kgs 7:50; II Kgs 12:13; Jer 52:19), and metaphorically, the "cup of reeling" of God's future wrath against the nations (Zech 12:2).

sap II. Threshold, sill, door. (ASV, RSV similarly.) *sap* II designates the threshold (cf. Akkadian *sippu* "doorpost," Aramaic *sippā* "porch"), whether of a house (Jud 19:27), palace (I Kgs 14:17), or the temple (II Chr 3:7). The keeper of the threshold (I Chr 9:19, 22) held an important office. Theologically, it becomes a symbol of God's presence in holy power (Isa 6:4) or judgment (Amos 9:1; Zeph 2:14).

The denominative *sāpap* "stand at the threshold," occurs only in Ps 84:10 [H 11]. The KJV, ASV, RSV "doorkeeper," understands the office: newer translations which use the definition given here intend either the Psalmist's practice (cf. LXX) or attitude.

R.D.P.

1539 סָפַק (*sāpaq*), שָׁפַק (*šāpaq*) *slap, clap* (e.g., Job 34:26).

Derivative

1539a שָׁפַק (*šepeq*) *handclapping, i.e. mockery* (Job 36:18). Meaning doubtful.

1540 סָפַר (*sāpar*) *count, recount*. Denominative verb.

Parent Noun

- 1540a סֵפֶר (*sēper*) *writing, book*.
- 1540b סִפְרָה (*siprā*) *book*.
- 1540c סֹפֵר (*sōpēr*) *scribe*.
- 1540d סְפָר (*s'pār*) *census, enumeration*.
- 1540e סִפְרָה (*s'pōrā*) *number*.
- 1540f מִסְפָּר (*mispar*) *same*.

sāpar is used of general mathematical activity. One can count objects (Ezr 1:8; Isa 22:10), people (II Sam 24:10), periods of time (Lev 23:15ff.; Deut 16:9; Job 39:2), actions (Job 14:16; 31:4; Ps 56:8 [H 9]) or thoughts (Ps 139:17–18). As well, it is employed with a negative to indicate innumerable things (Gen 41:49). Most importantly, God promised an innumerable posterity to the patriarchs (Gen 15:5; 32:12 [H 13]) and to Israel (Hos 1:10 [H 2:1]), promises which look beyond the mere physical fulfillment to the spiritual seed of the greater David in whom they find culmination (Jer 33:22; cf. Rom 4:11–13; 9:7–8; Gal 4:28; Hos 1:10 [H 2:1]; cf. Rom 9:26).

In the Piel stem, the iterative concept, "recount," takes on the added idea of "tell," "declare," "show forth." Fathers are to instruct their children of the need of the primacy of God in the life and of his mighty wonders so that their children may, in turn, transmit this information to their offspring (Ps 78:1ff.). Every believer is to declare the miracles and mighty deeds of the delivering God (I Chr 16:24; cf. Ps 9:1, 14 [H 2, 15]; 26:7; 73:28; 75:1 [H 2]; 107:22; Jer 51:10). He is to

declare his name (Ps 102:21 [H 22]; cf. 22:22 [H 23] and Josh 1:8 etc.). The Lord himself is said to keep accounts in his book(s) (Ps 69:28 [H 29]; 139:16; cf. Ex 32:32; Ps 87:6; Isa 4:3; 34:16; Dan 7:10; 12:1; Mal 3:16).

The Old Testament plainly attests to its inspiration (Ex 24:7; Deut 31:24; Josh 24:26) and was understood as such (e.g. Josh 8:31–35; Dan 9:2; Nah 1:1, etc.). Accordingly, the believer is to appropriate The Book as his own, since in it is the divine preinterpretation of what is best for man regarding basic issues of life (see Deut 17:18–20; Josh 1:8; 23:6, etc.).

sēper. Writing, book. sōpēr. Scribe. (ASV, RSV translate similarly.) Both words are usually considered to be East Semitic loan words, *sēper* from Akkadian *šipru*, "writing," "message" (itself from *šapāru*, "to send," "write") and *sōpēr*, from Akkadian *šāpiru* "scribe," the *š>s* shift probably taking place in North Akkadian. Once the shift has occurred, the word with *samekh* becomes common throughout Semitic (cf. Egyptian *tūpir* "scribe").

The Semitic verb *spr* occurs with many semantic developments: in Southwest Semitic it means "set out on a journey," in Southeast Semitic, "measure," and in Northwest Semitic, "count." The Hebrew verb is either a denominative from *sēper* or has become associated with it. In favor of the former suggestion is the fact that while its synonym *mānā* "number," "count," emphasizes the numbering process, *sāpar* everywhere seems to retain an underlying remembrance of the result of the process, the final scribal recording. *sāpar*, in turn, has spawned several derivatives.

The position and work of the *sōpēr* were of great significance in the ancient near east. The oldest scribal traditions go back to the ancient poles of culture at either end of the Fertile Crescent, Mesopotamia, and Egypt. In Babylon, the scribal art began very early and was regulated and enhanced by the establishment of scribal schools in which a rigorous formal education in all phases of literate culture was given. Indeed, the scribe was in many ways an indispensable figure, his activities being integral to every phase of Mesopotamian society. Likewise, in Egypt the scribal art became basic to pharaonic society, so much so that in the famous "Satire on the Trades" the superiority of the scribal profession is loquaciously set forth as "the greatest of all callings."

In pre-exilic Israel, the position and work of the scribes were not clearly delineated. It is known that the scribal art was in existence (e.g. Jeremiah's scribe, Baruch, Jer 36) and the scribe seems to have enjoyed a favorable and responsible position in government (II Sam 8:17; 20:25;

I Kgs 4:3; II Kgs 12:10–11; 22:3–7; Isa 36:3; Jer 32:12–15), even being quartered in special chambers in the palace (II Kgs 18:18; Jer 36:12). It is small wonder, then, that the names of many scribes have been retained, the most famous of whom are: Baruch, Shebna (Hezekiah's scribe), Shaphan (the head of the Josianic scribal family), and Ezra.

It seems that scribes also had other functions in the government besides the literary one, just as today the Secretary of Defense does more than type letters. Shebna, Hezekiah's scribe, was one of three emissaries to the invading Assyrian commander (Isa 36:3). He is also said to be "in-charge of the palace," but his place was to be taken by Eliakim (Isa 22:15–21). The position was one of authority, not merely literary production. Likewise there was a "scribe" in Zedekiah's government who was "chief officer in charge of conscripting the people" (II Kgs 25:19, NIV). In Jud 5:14 also the scribe is said to wield a staff of authority (parallel to "commander") (RSV, NASB, NIV) not the pen (KJV). BDB and GB may be correct that the word is often used in the earlier period to refer to a high office in the palace or army and after the fall of the kingdom was reserved for literary and religious activity (e.g. Ezra the scribe). Our word "secretary" has this same semantic division. W. F. Albright told of F. Petrie's desire to excavate Kirjath Sepher thinking it was called city of the book and might contain tablets. But perhaps the name was derived from a military office, "city of the commander" (class notes). R.L.H.]

It was with the ministry of Ezra that the scribal art first became identified with the priests (see Ezr 7; Neh 8; 12:26, 36), although such activity must have gone on constantly beforehand (cf. possibly, Ps 45:1 [H 2]). With the conditions of the exile and return, a distinct class of wise specialists arose among the priests who were not only the custodians and teachers of the law but those who interpreted it. In time, the group developed into a powerful socio-political and religious force, as documented by the many references to these scribes in the intertestamental literature and the New Testament.

The noun *sēper* "writing," "book" came to be used also of important legal documents (Deut 24:1, 3; Isa 50:1; Jer 3:8) or official letters (I Kgs 21:8ff.; II Kgs 19:14; Est 1:22; Jer 29:1ff.). No doubt these were chiefly in the form of scrolls (e.g. Num 5:23; Ps 40:7 [H 8]; cf. Heb 10:7; Isa 34:4; Ezk 2:9), written in columns (Jer 36:23) and occasionally on both sides (Ezk 2:9–10; cf. Rev 5:1).

Several source books are cited in the Old Testament such as: The Book of the Wars of the Lord (Num 21:14), The Book of Jasher (Josh 10:13; II Sam 1:18), The Book of the Chronicles

of the Kings of Israel (eighteen occurrences), The Book of the Chronicles of the Kings of Judah (fifteen occurrences and the books of various prophetic histories, I Chr 29:29; II Chr 9:20, etc.).

Several source books are mentioned as being woven into the scriptures: The Book of the Generations of Adam (Gen 5:1), The Book (concerning Amalek, Ex 17:14), The Book of the Covenant (Ex 24:7; II Kgs 23:2), and The Book of the Law of the Lord/Moses (Deut 31:24). Man is to sing his praise (Ps 79:13) in no lesser way than nature itself (Ps 19:1 [H 2]), and to show forth his glory, (Ps 96:3). Above all he is to tell others of God's righteousness and saving power (Ps 66:16; 71:15) and of the joy of living in accordance with his ordinances (Ps 119:13).

In all of this there is a very real hint of the scribal activity, the believer recording in his every thought, word, and action the sufficiency of the God of his salvation. His whole life is to be God's living letter to a needy mankind (Ps 118:15–17; cf. II Cor 3:3).

s'pār. Census, enumeration. This noun is found in II Chr 2:17 [H 16] in connection with David's numbering the native Canaanite descendants for work on the temple.

s'pōrā, mispār. Number. The latter word, though often used in purely mathematical contexts, has some other interesting uses. Thus, it is often employed to point out God's greatness: his wonders are without number (Job 5:9; 9:10), as is his host (Job 25:3); he alone (cf. Gen 15:5) knows the number and names of the stars (Ps 147:4; Isa 40:26); in the ultimate sense, his eternity (Job 36:26) and understanding (Ps 147:5) are beyond man's power to fathom.

mispār is also utilized in some unhappy contexts. David is rebuked and his kingdom is plagued by pestilence for his desire to know the number of his realm solely for the sake of self-glorification (II Sam 24:2). [Perhaps there was an additional motive. The word *pāqad* used here (II Sam 24:2, 4) is used elsewhere for numbering troops in preparation for battle (Num 1:3; Josh 8:10; I Sam 11:8—see KB p. 773), in short, for mustering troops. Perhaps David was considering an ill-advised military venture, some war of aggrandizement beyond the limits of the promised land (see *pāqad*). R.L.H.] Unfaithful Israel is reminded that she had forgotten God innumerable days (Jer 2:32). For her apostasy, Israel would be scattered among the gentiles where she would be few in number (Deut 4:27) so that all may learn to put God first in their lives (Ezk 12:14–16).

This word also teaches that few numbers can be quite enough. Indeed, when those men who are numbered in the army of the Lord have met his test for their lives and are surrendered to his

1541 סָקַל (*sāqal*)

power, God honors even the few in number with victory (Jud 7:6ff.). Man should not be surrendered to God only for the crisis struggles of life; rather, dedicated service ever brings God's abundant blessings and fullness of life (Ex 23:25-26).

Bibliography: Black, M., "Scribe," in IDB, IV. Kopf, L., "Arabische Etymologien und Parallelen," VT 9:267-69. AI, pp. 131-32. TDNT, III, pp. 836-44. THAT, II, pp. 162-72. R.D.P.

1541 סָקַל (*sāqal*) *stone (to death)*. (ASV, RSV similarly.)

The primary meaning of the root is difficult to establish. It may reside in the Piel stem, where not only the idea of "pelting with stones" is found, but more commonly that of "freeing/cleansing of stones," is attested. This latter meaning is closely related to Akkadian *saqālu* "take away," "remove." Thus, the meaning of the Qal may be a back formation from the idea of "taking away" (i.e. the life, by stoning). At any rate, *sāqal* becomes the special word in Hebrew for putting one to death by the casting of stones.

The use of *sāqal* for removing or clearing away stones is found only twice, both in Isa. In Isa 5:2 it is employed in the picturesque parable of the Lord's careful preparation of his vineyard, Israel. In Isa 62:10, it is utilized in describing the painstaking preparations for the Lord's regathered remnant for their return to Zion.

Elsewhere, the customary significance of stoning is intended. In II Sam 16:6, 13, Shimei keeps throwing stones at David as a mark of hostility and contempt.

The other occasions usually involve execution by stoning. Ahab has Naboth stoned to death so as to get his vineyard (I Kgs 21:10ff.). The verb is particularly utilized in the various legal pronouncements. Thus, an ox which killed a person was to be put to death by stoning (Ex 21:28f.). Moses prescribed death by stoning for the worship of other gods (Deut 13:10 [H 11]; 17:5). Not only spiritual harlotry, but physical immorality condemned one to death by stoning (Deut 22:21ff.). In Josh 7:25, Achan and his family were stoned to death for misappropriating that which stood under the divine ban.

Together with *rāgam*, the more common Semitic word, *sāqal* underlies the biblical teaching on execution by stoning. Stoning to death was the responsibility of the whole community. It took place outside the city (Lev 24:14; Deut 22:24; I Kgs 21:13). The witnesses against the accused were to place their hands on him (Lev 24:14) and cast the first stone (cf. Jn 8:7), followed by the rest of the populace (Deut 17:5-7). Death by stoning was chiefly prescribed for overt spiritual and

sexual offences. Other ancient laws such as the Code of Hammurabi prescribed death for many offences but do not prescribe stoning. However, an incorrigibly disobedient son was to be stoned by the community, since such conduct was contrary to the divine prescription for the family as responsible members of the covenant community (Deut 21:18-21).

סָר (*sar*). See no. 1549a.

1542 סָרַב (*sārāb*) *rebel* (Ezk 2:6, only). Meaning dubious.

סָרָה (*sārā*). See nos. 1480a, 1549b.

1543 סָרַח (*sārah*) *go free, overhang, grow luxuriously*.

Derivative

1543a סָרַח (*serah*) *overhanging*.

The primary meaning of this root, "go free," becomes a picture of anything that flows freely or is excessive.

The root is used of physical objects to describe the outer tent cloth overhanging the tabernacle (Ex 26:12-13) which was made larger than the inner cloth so as to provide full protection and a front gable to the tent. It is also used to describe an overflowing turban (Ezk 23:15) or overspreading vine (Ezk 17:6).

The concept of overflowing excess makes Amos's condemnation of the citizens of the Northern Kingdom as sprawling over their beds of ivory at banquets most picturesque (Amos 6:4, 7). The portrayal of a society which had forgotten God in its reckless pursuit of luxury, idleness, and debauchery and is therefore overripe for judgment is one which is all too contemporary.

In Jer 49:7, KB suggest a second root of *sārah* with the same radicals meaning "putrify," "corrupt." Early support for such a possibility comes from the Phoenician Yahamilik Inscription, where the meaning "destroy," "corrupt," is attested (see H. Donner and W. Röllig, KAI I, text, p. 2, 10:15).

R.D.P.

1544 סָרְיוֹן (*siryōn*) *armor* (Jer 51:3; 46:4).

1545 סָרִיס (*sāris*) *official, eunuch*. (ASV, RSV similarly.)

The noun, meaning "(court) official," has its origin in the Akkadian title *ša rēši* (*šarri*) "the

one of the (king's) head." The meaning "eunuch" arose with the practice of utilizing castrated men in key positions in the various nations of the ancient near east (e.g. in Persia, Est 2:3ff.; 4:4f.).

The Hebrew word is clearly related to the name of the Akkadian royal official (II Kgs 18:17). Accordingly, *sārīs* is not to be translated "eunuch" unless context or other evidence demands it. Thus, since thorough study fails to uncover conclusive evidence for the employment of eunuchs as officials in ancient Egypt, the reason why the Egyptian officers in the Joseph narrative were called by this term is probably that in all three cases (Gen 37:36; 39:1; 40:2, 7) these men were special officials of Pharaoh.

It can be doubted that Israel would have inaugurated the employment of eunuchs. Such men would have been excluded from the congregation by Mosaic Law (Lev 22:24; Deut 23:2). It has been argued that they may have been introduced by Jezebel (cf. I Kgs 22:9) and maintained by subsequent kings (II Kgs 8:6; 9:32) in positions in close contact with women. If so, the Lord's promise through Isaiah (56:3-5) is most apropos.

No certain evidence exists that Daniel and his three friends were made eunuchs (II Kgs 20:17-18; Dan 1).

Bibliography: TDNT, II, pp. 766-67.

R.D.P.

- 1546 סָרֵן (*seren*) *I, lord, tyrant.* (ASV, RSV similarly.)

A Philistine loan word, *seren* always appears in the plural and designates the five lords of the Philistine pentapolis (Ashdod, Ashkelon, Ekron, Gath, and Gaza, which together with the territories around them made up the Philistine amphictyony, Josh 13:3; Jud 3:3). Despite attempts to connect the work with Greek *tyrannos* "tyrant," its exact etymological origin is still debated, and doubtless will be until the Philistine language can be recovered. Current scholarship postulates a relationship with Indo-Aryan *ser*. In I Sam 21:10ff., the *seren* of Gath is called a king. It is to be distinguished from the *seren* ("axle") of I Kgs 7:30.

Although the Philistine states were totally independent, they could and did cooperate when common cause or design necessitated. They conspired with Delilah to subdue Samson, an action which God eventually turned to their death (Jud 16:5ff.).

According to I Sam 5-6, the lords acted in concert in the crisis revolving around the Hebrew Ark of the Covenant both at Ashdod (where their god Dagon lay powerless before the Lord) and at Ekron. They repeatedly banded together in battle against the Israelites, both in the days of Samuel

(I Sam 7:7) and Saul (I Sam 29:2ff.; cf. I Chr 12:19).

R.D.P.

- 1547 סָרֵן (*seren*) *II, axle* (I Kgs 7:30).

סָרְטָקָה (*sar'appā*). See no. 1527d.

- 1548 סָרְפָד (*sirpad*) *an unidentified desert plant.* Apparently a worthless thornbush, contrasted with a valuable tree (Isa 55:13).

- 1549 סָרָר (*sārar*) *be stubborn, rebellious.*

Derivatives

1549a סָרָר (*sar*) *stubborn, rebellious.*

1549b סָרָה (*sārā*) *rebellion.*

The root means basically "to be stubborn." While Akkadian *sarāru* "be unstable," "obstinate," "be a liar/felon" is probably related, Arabic *ṭā'ara* "be contumacious" is unlikely. The root lays stress on attitude, whereas the synonymous *mārad* emphasizes rebellious actions.

The root is clearly displayed in the case of the wayward and rebellious son who is publicly denounced and executed (Deut 21:18ff., see under *sābā*). Most often it portrays Israel's total rebellion against God (Isa 1:23; Jer 6:28). Indeed, the "stubborn and rebellious son" may be one who is not merely disobedient to parents, but who has rebelled likewise against their God. In that case, the verses teach that even the parent should condemn the apostate son. Cf. for a similar thought Deut 13:6-11. It is a rebellious generation (Ps 78:8) or heifer (Hos 4:16) which walks in its own way (Isa 65:2). It has a stubborn shoulder (Neh 9:29), a deaf ear (Zech 7:11), and a stubborn and rebellious heart (Jer 5:23).

The Akkadian force of the root is probably to be understood in the description of the restless woman of the streets who lacks stable roots in the community (Prov 7:11).

sar. *Stubborn, rebellious.* This adjectival derivative occurs in two contexts, both of which describe Ahab's psychological condition as being sullen and aggravated when being rebuked or rebuffed (I Kgs 20:43; 21:4-5).

sārā. *Rebellion.* This noun may be taken from either *sār* (q.v.) or *sārar*. In three contexts (Isa 1:5; Jer 28:16; 29:32), spiritual rebellion is in view; hence, the word involved seems clearly related to *sārar*.

R.D.P.

- 1549.1 סָתָו (*s'tāw*) *winter,* Song 2:11.

- 1550 סָתָם (*sātam*) *stop up, shut up, keep close* (e.g. II Kgs 3:19, 25; Dan 8:26).

1551 *סָתַר (*sātar*)

1551 *סָתַר (*sātar*) *hide, conceal*. Not used in the Qal.

Derivatives

- 1551a סֵתֶר (*sēter*) *hiding place*.
- 1551b סִתְרָה (*sitrâ*) *hiding place*.
- 1551c מִסְתֹר (*mistôr*) *place of shelter*.
- 1551d מִסְתָר (*mistâr*) *hiding place*.
- 1551e מַסְתֵר (*mastēr*) *hiding, one who causes people to hide*.

The root in its basic meaning "hide" is common to West, Southwest, and Southeast Semitic. The subordinate thought of protection involved in the root, which helps to distinguish it from its synonyms 'ālam "conceal" and ḥābā "withdraw," "hide," is reflected in such Amorite names as Sitrê-Bahlum, "Baal is my protection."

The verbal root occurs eighty-three times, usually in the Hiphil (forty-five) or Niphal (thirty) stems. The latter is frequently used reflexively, "hide oneself." David hides himself from Saul (I Sam 20:5ff.); Elijah hides by the Brook Cherith (I Kgs 17:3).

An interesting problem arises in Prov 22:3 (cf. 27:12). Here it is said that a prudent man sees evil and hides himself, but a simple man passes on and pays the penalty. M. Dahood (*Proverbs and Northwest Semitic Philology*, Rome: Pontificium Institutum Biblicum, 1963, pp. 45-46), taking the form *w'yistār* (וַיִּסְתָר) as an example of an infixed "t" with the verb *sūr* (q.v.) "turn aside," translates the line, "The prudent man sees danger and turns aside." Dahood's comparison of these verses with Prov 14:16 ("A wise man is cautious and turns away from danger, but a fool passes on and is unsuspecting"), where *sūr* is definitely read, strengthens his point. Otherwise, the (Kethib) Qal form of the verb in 22:3 would almost have to be a scribal error for a Niphal as in 27:12 "hide oneself." The Qal of *sātar* is not used elsewhere.

The Niphal is also used passively. Job laments that his way is hidden from God (Job 3:23). Israel falsely believed that God did not take notice of her, let alone adjudicate her cause justly (Isa 40:27).

In the Hithpael, the reflexive takes on the added idea of "hiding oneself carefully." The difficult Isa 45:15 probably means no more than that the Lord reserves the right to veil some of his purposes.

In the more frequently attested Hiphil, the basic idea of "hiding" comes forth. Perhaps its most significant use is in the idiom to "hide the face," symbolizing broken communion, such as between God and sinful Israel (Isa 59:2). The most tragic example of broken fellowship is man's rejection of Messiah (Isa 53:3, where the derivative *mastēr* occurs). Conversely, not to hide the face beautifully pictures open and full communion (Job 13:20). Perhaps the most crucial instance of this is in Psalms 22:24 [H 25]. Wedded to the call-answer motif (which speaks of fellowship, cf. Ps 102:1-2 [H 2-3]), the connotations in the idiom and an exegesis of the whole of Psalm 22 bear greatly on a full understanding of Messiah's relation with the Father in those climactic hours when he effected the propitiation on the cross (cf. Heb 5:7).

Experientially, God himself will be a shelter for the believer, not only on that day of the Lord's wrath (Zeph 2:3), but from the storms of everyday living (Ps 17:8; 27:5; 31:20 [H 21]; 64:2 [H 3]).

sēter. Hiding place. Occurs thirty-five times. Most notably, God is seen in the approaching storm, making darkness his hiding place (Ps 18:11 [H 12]; cf. II Sam 12:12, where, however, *sēter* does not occur). But God is available in less spectacular ways. He himself is ever a place of refuge and protection from all dangers for the believer (Ps 32:7; 91:1; 119:114).

- עֶבֶד ('*ab*). See nos. 1552a, 1574a.
 1552 עֶבֶד ('*bb*). Assumed root of the following.
 1552a עֶבֶד ('*ab*). Architectural term, meaning unknown (I Kgs 7:6; Ezr 41:25).
 1553 עָבַד ('*abad*) work, serve.

Derivatives

- 1553a עָבַד ('*ebed*) slave, servant.
 1553b עָבַד ('*abad*) work (Eccl 12:1).
 1553c עֲבֹדָה ('*abôdâ*) labor, service.
 1553d עֲבָדָה ('*abûddâ*) service (household servants) (Gen 26:14; Job 1:3).
 1553e עֲבָדוּת ('*abdût*) servitude, bondage (Ezr 9:8, 9; Neh 9:17).
 1553f מַעְבָּד ('*ma'bād*) work (Job 34:25).

'*abad* appears 290 times in the OT.

The etymology of this word seems to share the ideas of several Semitic roots, e.g. the old Aramaic root which means "to do or make," an Arabic root meaning "to worship, obey" (God) and its intensive stem meaning "to enslave, reduce to servitude."

This service may be directed toward things, people, or God.

When used in reference to things it is usually followed by an accusative of the thing upon which the labor is expended, e.g. "to till" a field (Gen 2:5 and often elsewhere); "to dress" vineyards; workers or artisans in flax (Isa 19:9) or in city construction (Ezk 48:18). Occasionally it is without the accusative as in Deut 15:19, "to till" [the ground]. The second category is followed by an accusative of person, e.g. Jacob's serving Laban (Gen 29:15; 30:26, 29). Sometimes this usage includes the preposition *b* with a person, thus one "works by means of another" or uses another as a slave (Ex 1:14; Jer 22:13; or in the Pual stem with captives, Isa 14:3). Servitude also includes "to serve as subjects" to a king or ruler (Jud 9:28; I Sam 11:1). In the Hiphil stem, it means "to compel one to labor" as a slave (Ex 1:13). When the service is offered to God, however, it is not bondage, but rather a joyous and liberating experience (Ex 3:12; 4:23; 7:16, 26; 10:26; Ps 22:31; Job 21:15; Jer 2:20; Mal 3:14). All too frequently, the text records that this service was given to other gods who were not gods at all (Deut 7:16; II Kgs 10:18–19, 21–23, etc.).

The same concept is used of serving Yahweh with the Levitical service (Num 3:7–8; 4:23, 30, 47; 8:11, 19ff., etc.). Interestingly enough, the LXX reserved the Greek word *latreuō* for the offi-

cial service of the priests only. The NT however, steadfastly resisted using this group of words for the NT ministry or its functions except in Rom 15:16, where it refers to Paul's labors for Jesus Christ. Instead, it reserved it for other religious contexts, especially those dealing with the OT ritual (Heb 9:21; 10:11; Lk 1:23).

'*ebed*. Slave, servant. The form appears 799 times in the OT.

While the most basic idea of '*ebed* is that of a slave, in Israel slavery was not so irksome, since this status involved rights and often positions of trust. A fellow Israelite could not be held indefinitely against his will, but his period of bondage was limited to six years (Ex 21:2). Even the much protested description of a slave as his master's money (Ex 21:20–21) was not an "unsentimental thought," but served to control physical abuse by the master. Whenever evil intent could be proved (Ex 21:14), or the slave died (21:20), the master was liable to punishment. If the master's intent was debatable, an injured slave at least won his freedom (Ex 21:26–27), and the master lost his loaned money (21:21). Note also the servant's position of honor in Gen 24:ff; 41:12 (cf. 15:2).

A king's subjects are his servants (Gen 21:25; Ex 7:28), as are all his vassal kings (II Sam 10:19) and tributary nations (I Chr 18:2, 6, 13). Those in the service of the king are also his servants (Gen 40:20), including officers (I Sam 19:1), officials (II Kgs 22:12), and ambassadors (Num 22:18).

Often the term "servant" was used as a polite and humble reference to oneself (Gen 33:5). This could reach extreme proportions as in the expression "your servant, the dog" and the like (II Kgs 8:13; II Sam 9:8). Cf. also the Tell el Amarna tablets and Lachish letters nos. 2, 5, 6. The expression "your servant" was frequently used when addressing God in prayer (Ex 4:10; Ps 19:12, 14; 109:28).

The most significant use of the term "servant" is as a messianic designation, the most prominent personal, technical term to represent the OT teaching on the Messiah. The central teaching passages on this theme are found in the last twenty-seven chapters of Isaiah. There the term occurs twenty times in the singular (chaps. 39–53) and eleven times in the plural (chaps. 54–66).

In twelve of the twenty examples of the singular and in all eleven of the plural, the servant is the nation Israel. Passages in which the singular occurs include 41:8–10; 42:18–19; 43:9–10; 44:1–3, 21; 45:4; 48:20; and perhaps 49:3. The plural occurs in 54:17; 56:6; 63:17; 65:8–9, 13–15; 66:14.

As Willis Beecher reminds us, this is not just Israel the servant as an ethnical group. It is that, plus something more. It is also Israel as the people of the promise or covenant made with Abraham and David. There is both national Israel and spiritual Israel, regardless of whether it is native or adopted, which shares the promise.

There are also passages in which the servant is differentiated from actual Israel and has a mission to Israel (Isa 49:1–9; 42:1–7; 50:4–10; 52:13–53:12). This servant must be identified with the Israel-servant, but he must also be distinguished from them, having a mission to them (as explicitly stated in 49:5–6; cf. 49:3). Obviously this is the reverse of eponymous heroes who bequeath their names to their countries and nations so that the same term refers to both. Here, the focal member of the group arrives last rather than first. There is a corporate solidarity between three groups which in Franz Delitzsch's illustration are arranged like a pyramid with the base representing all national Israel (Isa 42:19), the middle representing spiritual Israel, i.e. native believers and adopted believers (Isa 41:8–10), and the apex representing the Messiah, Jesus Christ.

An alternative view finds two servants in these passages—the blind failing servant Israel of 42:19; 49:3 etc. and the healing and restoring Messiah servant of 42:1 and 49:5; 50:10, 52:13 and 53:11.

Isaiah is not the only prophet who applies this term to the covenant people; see also Jer 30:10; 46:27–28; Ezk 28:25; 37:25. It is applied to David, the Messiah of promise, in Jer 33:21–22, 26; Ezk 34:23–24; 37:24–25, and to David's descendant, Zerubbabel, in Hag 2:23. Of special interest is its connection with the messianic title "Branch" (Zech 3:8).

Other religious usages include all "worshippers" of God (a phrase commonly used by all Semitic peoples in referring to their false gods, e.g. "the servant of Baal," Marduk, etc.), any servants in the temple or its service, and those who served their Lord in unique roles as his servants such as Abraham, Isaac, Jacob, Moses, Joshua, Caleb, David, Hezekiah, Eliakim, and Zerubbabel. Also the title of God's prophets, "my servants," or "his servants" or "your servants," occurs twenty-four times.

‘ābōdā. Labor, service. It appears 145 times in the OT.

Man's work and labor is not the result of sin and the fall. Already in God's great creation man was placed in the garden "to work it" ('*abad*, Gen 2:15). The curse (Gen 3:16–17) was only the pain and hardship which were to accompany labor, not the labor itself (cf. '*ešeb* "sorrow"). This point is made when Lamech says at the birth

of Noah that he "shall comfort us concerning our work and toil of our hands, because of the ground which the Lord has cursed" (Gen 5:29).

The fruits of labor are reaped in the occupations of Cain and Abel and the development of the arts in Cain's family (Gen 4:21–22). Nowhere is the subject of leisure time discussed, for man works as long as there is daylight (Ps 104:23; cf. Jn 11:9). But a definite cycle of rest is provided also as a duty and a blessing on the seventh day (Ex 20:9–10). By working six days Israel imitated God who worked six days in creating the cosmos. In this way she doubtless bore witness to her pagan neighbors, who worshiped the elements of the creation personified as deities, that she worshiped the transcendent creator. Man is to rest in imitation of God, who rests from his work after the creation (Ex 20:11; Deut 5:14–15). There were also to be special feast days on which there was to be "no laborious work" (Lev 23:7–8, 21, 25, 35, 36; Num 28:25–26; 29:1, 12, 35).

The type of work included under this term ranges from agricultural work in the fields (Ex 1:14) to constructing the tabernacle (Ex 35:24, repairing the temple (II Chr 34:13), and working in fine linen (I Chr 4:21). Even God's work of judgment is so termed (Isa 28:21).

When the service is offered to God, it will consist of obedience. The performance of this service is found in the OT ritual and worship, e.g. the people's bringing sacrifices (Josh 22:27) and the service of the Levites and priests (Num 4:19; II Chr 8:14).

Finally there is the "bondage" of captives or subjects. Overwhelmingly this refers to the bondage of Israel in Egypt (Ex 1:14; Neh 5:18; II Chr 10:4; Isa 14:3). Sometimes it refers also to military service (Ezk 29:18).

Note that the word does not appear in any of the ethical teaching about work in the wisdom literature. Perhaps the word had become so strongly associated with servitude and bondage on the one side and worship on the other that the mere secular concept of work was shifted to other terms, like *m'läkâ* or *pā'al* or *ma'āšeh*, although the original agricultural reference could have provided such a stimulus. Cf. our word "culture" and "to cultivate."

W.C.K.

עֲבֹדוֹת ('abdūt). See no. 1553c.

1554 עָבָה ('ābā) *be thick, fat, gross* (e.g. I Kgs 12:10; II Chr 10:10).

Derivatives

1554a עָבִי ('ābī) *thickness* (e.g. I Kgs 7:26=II Chr 4:5).

1554b מַעְבָּה (ma'ābeh) *thickness, compactness* (I Kgs 7:46; II Chr 4:17).

עֲבֹדָה ('ābôdā). See no. 1553c.

עֲבֹת ('ābôt). See no. 1555a.

עָבֹר ('ābūr). I, II. See nos. 1556f,g.

עָבוֹת ('ābūt). See no. 1558a.

1555 עָבַט ('ābat) *take or give a pledge for a debt*. (e.g. Deut 24:10; 15:6). Denominative verb.

Parent Noun

1555a עֲבוֹת ('ābôt) *pledge, article pledged as security for debt* (Deut 24:11, 13).

Derivative

1555b עֲבָטִית ('abṭit) *weight of pledges, heavy debts* (Hab 2:6).

It is probable that the cloak or other item used as a pledge was not of sufficient value to serve as security. It was not to be kept by the creditor. Apparently it was a symbol of the transaction taken to the local court and witnessed, (cf. Speiser, E. A., "Of Shoes and Shekels," in *Oriental and Biblical Studies*, University of Pennsylvania, 1967, p. 154). After the transaction was witnessed the pledge should be returned promptly. For discussion on loans, see *neshek*.

R.L.H.

עֲבָטִית ('abṭit). See no. 1555b.

עָבִי ('ābī). See no. 1554a.

1556 עָבַר ('ābar) *pass over, by, through, alienate, bring, carry, do away, take, take away, transgress*.

Derivatives

1556b עִבְרִי ('ibri) *Hebrew*.

1556c עֲבָרָה ('ābārā) *ford*.

1556d עֲבָרָה ('ēbrā) *overflow, arrogance, fury*.

1556e *עָבַר ('ābar) *be arrogant, infuriate oneself*. Occurs only in the Hith-pael.

1556f עָבֹר ('ābūr) *I, produce* (Josh 5:11–12).

1556g עָבֹר ('ābūr) *II, on account of*.

1556h מַעְבָּר (ma'ābār) *ford, pass*.

1556i מַעְבָּרָה (ma'bārā) *ford, pass*.

The main idea of this verb is that of movement; as a rule it is the movement of one thing in relation to some other object which is stationary, moving, or motivating. Some have said that the simplest translation of 'ābar is "to pass," but this does not really cover the various nuances that 'ābar may carry with it. It is used about 550 times.

It is impossible to discuss all the shades of meaning, but there are four general usages.

1. The concept of movement may be used in a simple sense: 'ābar is go beyond or further; thus Abraham says to his heavenly visitors that they could go on (rsv pass on) after they had eaten (Gen 18:5).

'ābar means "go" when the emphasis is specifically on movement without specific reference to another object (Ex 38:26; Deut 2:14; Job 13:13).

2. 'ābar may be used to express the fact that there is some movement between two specific places. In this category one finds numerous references to Israel's passing over the Jordan to enter (or pass into) the promised land (Deut 27:3). Moses used this phrase often to indicate how the hindrance or barrier was to be overcome by Israel, in realizing the fulfillment of the covenant promise concerning the land. This same emphasis is found in Josh 1:2. The idea of passing over appears also in Gen 31:21, where Jacob crosses the river Euphrates as he begins his flight from Laban.

'ābar is used also to indicate the thought of passing through or traversing a land. Moses asked the Amorite king Sihon to permit Israel to march through his land (Num 21:22). Micah speaks of the remnant of Israel passing through foreign lands as a lion goes through a forest (Mic 5:8).

The Hiphil form of the verb very often appears to express the thought that one person causes or motivates another to move (Gen 8:1; 32:24; Num 32:5, etc.).

The term is used in Deut 18:10 and elsewhere to indicate the idea of compelling an infant to pass through sacrificial fire to his death.

3. The concept of movement may be used in a metaphorical sense. Solomon's wealth exceeded

(passed beyond) that of all others. The wickedness of Judah and Israel knew no bounds (rsv) in that it: passed beyond that of others (Jer 5:28).

Other metaphorical uses can be mentioned. When men die they pass away from this life (Job 30:15; Prov 22:3). Something comes between husband and wife and they are alienated (Jer 6:8). The money passed around is the current, the standard shekel (Gen 13:16). Men do business, exchange wares (Ezk 27:9). The bulls' gender (Piel of 'ābar "breed," rsv), i.e. are fruitful (Job 21:10).

4. Finally, the term indicates a specific spiritual concept. Men transgress the covenant or the law, i.e. move outside or beyond the requirements of the covenant or law by committing adultery and practicing idolatry (Deut 17:2) or other sin. But on a more positive level Moses also spoke of Israel as entering or passing into a covenant that God was making with them (Deut 29:12 [H 11]). Balaam gave expression to another spiritual meaning of 'ābar when he said, "I cannot pass beyond the Word of the Lord" (Num 22:18).

'ēber. *Against, beyond, by, over, passage, quarter, side other/this side, straight* (BDB adds "region, across." rsv has "space in front," KJV and ASV read "over against" (Ex 25:37).

'ēber, a derivative of 'ābar, is used as a noun, preposition or adverb to indicate the relationship of persons or things in regard to their location, distance, or direction. In various instances 'ēber is used with prefixed prepositions such as *bē* or *min*.

The term is used as a noun to indicate a specific place (Isa 47:15; rsv reads "direction"). In I Sam 26:13, the other side is a mountaintop a long distance away.

As a preposition it indicates the relationship of two things to each other, e.g. the commandments of the Lord are not too hard to keep or too far away; they are not in heaven or beyond ('ēber) the sea. Thus used, the term emphasizes the presence and availability of God's Word for his covenant people. In I Kgs 7:20 we read of how various parts of the temple were placed in relation to others, e.g. the tops of the pillars were beside ('ēber) the network.

'ēber also appears as an adverb. Ezekiel, seeking to describe the flight pattern of the living creatures, said that they went straight forward ('el 'ēber pānāyw, in the direction their face pointed). Nehemiah came to the governors *beyond* ('ēber) the river (2:11). From his location in Susa he speaks of passing through the land to Jerusalem. This area was called the Trans-Euphrates satrapy (Aber-nahara) according to J. Bright (*History of Israel*, Westminster, 1959, p. 354). This reference to the use of the term 'ēber can serve as an intro-

duction to the problem the term 'ēber gives in interpreting some passages in Deut and Josh. The interpretation of the term has some bearing on one's view concerning the authorship of Deuteronomy (cf. e.g. Hirsch in ISBE, 459^a).

The author of Josh (22:7), writing while on the west side of the Jordan, says that Reuben, Gad, and one-half of Manasseh received their inheritance *mē 'ēber hayyardēn* (beyond, i.e. on the other side of the Jordan). Yet the term 'ēber may also be used to speak of the area west of the river (Deut 3:20, 25; 11:30; Josh 9:1). Joshua gave to the other (non-Transjordanian) half tribe of Manasseh a possession in the land among their brethren (i.e. the nine tribes) *mē 'ēber hayyardēn yāmmā*, beyond the Jordan westward, meaning on the west side (Josh 22:7).

Summing up we can say: 1) that 'ēber may be used variously to refer to regions located on one side or the other of a specific river. 2) The standpoint of the writer has to be clearly understood as being either local or mental (i.e. writing as if one is speaking from a place he is not in at the time); or else a geographical name may be involved, as in Ezr 4:10, where the Aramaic 'ābar-nahārā refers to the Persian provinces west of the Euphrates.

In Deut the mental standpoint has to be assumed in some passages and not in others. In Deut 1:1 there is the phrase *bē 'ēber hayyardēn*. The phrase is adverbial, indicating the place where Israel was when Moses spoke the words of Deut to them. The additional phrase, in the wilderness, makes it clear that the region referred to is on the east side of the Jordan. The phrase then can be used to refer to the region west of the Jordan as well as to the region east of it (cf. Deut 3:8 east, and Deut 3:20 west). The solution to the problem of how to translate 'ēber in each instance is to keep in mind the various possibilities: 1) the term can be used as a noun (naming a place), as an adverb (indicating a place), as a preposition (indicating a relationship); 2) the standpoint of the writer must be determined as either local or mental; 3) the entire context must be carefully studied because definite clues are to be derived from it in each instance.

A final remark is in order: there is nothing in the use of the term 'ēber which militates against Mosaic authorship of Deuteronomy. [Another possibility is to take 'ēber in the sense of "shore, edge, area" (cf. Isa 9:1 [H 8:23] "along the Jordan" NIV) which requires further specification. The passages exhibiting this use are usually qualified as east or west of the Jordan—in Isa 9:1 as the region of Galilee. Of interest is Num 32:19 which uses the expression twice, once specified as "beyond" and the other specified as eastward. Joshua 9 also has the two meanings in close proximity, with verse 1 specified as the territory to the

west and vs 10 specified as the territory of Og and Sihon. All but one of the verses in Deut except 1:1 have this additional specification. Cf. Deut 4:41, 46, 47 and 49 *versus* Deut 11:30. R.L.H.]

'ibri. *Hebrew* (ASV and RSV same).

Used as an adjective (Gen 39:14) and as a noun (Ex 1:19), *'ibri* is used in the OT to refer to a specific ethnic group of people. In the OT the term is used mostly by non-Israelites and then could carry the connotation of a non-native, a person who is not "a free person on free soil" (Ex 2:11, etc.). BDB's suggestion that the term is derived from *'ābar* and means "one from beyond," "from the other side," "from beyond the Euphrates," "from beyond the Jordan" seems to give support to the "non-native" concept applied to the Israelites. But this etymological explanation is not followed by KB.

There have also been various attempts to identify *'ibri* with *habiru*, a term used in documents of the second millennium B.C. (See BDB, *'ibri*, and Haldar in IBD, *habiru*. Kline has argued however, that this is highly improbable; (cf. Bibliography). E. A. Speiser agrees after citing the monograph by M. Greenberg (begun as a dissertation under Speiser's direction). Speiser says, "The evidence remains ambiguous" (*Genesis* AB, p. 103).

The biblical record quite definitely indicates that *'ibri* is derived from Eber, the name of one of Shem's sons (Gen 10:21; 11:14, 16). Abraham is identified as a descendant of Shem, of Eber's line (Gen 11:26). The name Ebrum now turns up also as a king of Ebla! *'ibri* is first used to designate Abraham in Gen 14:13. Whether or not all descendants of Eber were designated as *'ibrim* is not known. The OT definitely does link Abraham, via Eber, to Shem and thus Abraham is designated as the one through whom Noah's prophecy concerning Shem was to be fulfilled. "Hebrew" (*'ibri*) became the name by which the covenant people were designated in contradistinction to the Egyptians and Philistines (Gen 39—Ex 10; I Sam 4—29). But the fact remains that when non-Israelite people used the word, their intent was not necessarily to recognize Israel as God's chosen people through whom he was fulfilling his promises; rather it could have been used in a more or less derogatory sense, i.e. the immigrants, the strangers, those from beyond. [The Israelites themselves seldom used the word among themselves. They used it to describe themselves to outsiders. Thus it seems to have covered a larger class of people. R.L.H.]

AJSL 58:237–53. Lewy, J., "Origin and Signification of the Biblical Term Hebrew," *Hebrew Union College Annual*, 27:1–13. —, "A New Parallel between Habiru and Hebrews," HUCA 15:47–58. Noth, M., *The History of Israel*, London: Black, 1960, 33–36, 110–121. TDNT, III, pp. 365–69.

'ebrā. *Anger, rage, wrath* (ASV and RSV translate arrogant pride, arrogance of pride, fury).

The verbal root of the noun is *'ābar* "to pass, to pass over, to overflow." (Michaelis and Driver relate the term to the Arabic *ḡabira*: bear rancor.) The ideas expressed by the noun are a surpassing measure and/or excess. In the OT it is used in relation to the pride of men and in association with anger. Pride, combined with anger is arrogance and insolence.

The term *'ebrā*, when used in relation to God, is used as a synonym of such terms as *qāṣap*, *ḥēmā*, etc. However, it adds the nuance of the fierceness of God's wrath (Ps 78:49) expressed in an overwhelming and complete demonstration (Isa 13:9). God's wrath burns, overflows, sweeps away everything before it (Ezk 22:21, 31). Thus on the day of the Lord's *'ebrā*, nothing stands before it. When the day of judgment is spoken of, the reference is to God's wrath overflowing, burning, consuming all that has displeased or opposed him. When man's *'ebrā* is spoken of, it is described as cruel and merciless (Amos 1:11), having wounded pride as its basic motivation.

'ābar. *Meddle, to provoke to anger, to rage, to be wroth.* BDB lists *'ābar* separately as a denominative verb related to *'ebrā* used only in the Hithpael, to be arrogant, infuriate one's self.

This verb is used to express a number of specific emphases. We read of the fool, whose attitude and conduct is described as one who "beareth himself insolently and is confident" (Prov 14:16, ASV; "throws off restraint, is careless" RSV). The fool also is quick to meddle in or be agitated to become a third party in a quarrel. The prudent man looks where he is going, he fears and departs from evil. In this context the verb *hit'abber* definitely conveys the idea of human pride motivating a man to a rash demonstration of overconfidence, folly, excessive anger and evil. Proverbs 20:2 teaches that one who provokes a king to this frame of mind and conduct brings his own life into great danger (ASV "sinneth against," RSV "forfeits his life"). This passage suggests the uncontrollable devastating character of aroused and human overflowing pride and anger.

The verb is used also to describe God's reactions to Moses' and Israel's disobedience. Deuteronomy 3:26 suggests that God gave a strong, full expression of his impatience and anger with Moses. The psalmist, when recount-

ing Israel's history (Ps 78:21) reminds God's people that Israel's sins in the wilderness really tried the patience of God. In fact, God became full of fury and he caused it to flow forth as a flood. This term certainly gives us an insight into the spontaneous complete, and evident abhorrence of God towards repeated sins by his chosen delivered people.

'ābūr I. Old corn (ASV and RSV have "produce") UT 19: no. 1807 suggests "harvest."

In Josh 5:11-12 one reads that Israel ate the 'ābūr of the land of Canaan, and then manna ceased. Thus Israel actually realized they had arrived in the promised land, the land "passed up food" for sustenance to them.

'ābūr II. Because of, for, intent that, for —'s, sake, that, to.

'ābūr is a preposition and conjunction always used with the prefix *b* to express causal, purposive, and resultative relationships in agreement with the meanings of the root term 'ābar "movement from one to another," as from purpose (or cause) to accomplishment (or result).

G.V.G.

עִבְרִי ('ibri). See no. 1556b.

1557 עָבַשׁ ('ābāsh) *shrivel* (Joel 1:17, only).

1558 *עָבַת ('ābat) *weave, wind*. Occurs only in the Piel (Mic 7:3).

Derivatives

1558a עָבֹת ('ābôt) *having interwoven foliage, leafy* (e.g. Ezk 20:28; Neh 8:15).

1558b עָבַת ('ābôt) (twisted) *cord, rope; interwoven foliage* (e.g. Ex 28:14; Isa 5:18).

1559 עָגַב ('āgab) *have inordinate affection, lust* (e.g. Ezk 23:7, 9, 12; Jer 4:30).

Derivatives

1559a עָגַב ('āgāb) *love (sensuous)*. Occurs only in Ezk 33:32.

1559b עָגָבָה ('āgābā) *lustfulness*. Occurs only in Ezk 23:11.

1559c עֹגֶב ('ūgāb) *flute, reed-pipe* (e.g. Gen 4:21; Job 30:31).

עָגָה ('ūgā). See no. 1575a.

עָגֹל ('āgōl). See no. 1560c.

עָגוּר ('āgūr). See no. 1563a.

1560 עָגַל ('gl). **Assumed root of the following.**

1560a עָגֵל ('ēgel) (*bull-*) *calf*.

1560b עֲגֵלָה ('eglā) *heifer*.

1560c עָגֹל ('āgōl), עָגֹל ('āgōl) *round*.

1560d עֲגָלָה ('āgālā) *cart*.

1560e עָגִיל ('āgil) *hoop, ring*.

1560f מַעְגָּל (ma'gāl) *entrenchment, track*.

'ēgel. Calf. The calf is one of the animals used for sacrifice. A year-old bull calf was acceptable as a burnt offering (Lev 9:3; Mic 6:6) and one of an unspecified age was used as a sin offering for Aaron (Lev 9:2, 8).

The fattened calf was used for food (I Sam 28:24; cf. Luke 15:23, 27, 30) but it was generally a delicacy for the rich (Amos 6:4).

The gamboling of the calf is mentioned in Ps 29:6 and in Mal 4:2 [H 3:20]. The calf was used in the covenant rite, the participants passing between the parts of the slaughtered calf (Jer 34:18; cf. Gen 15:9-10).

The calf is also used as a type. It typifies the Gentile peoples (Ps 68:30 [H 31]), and Egypt's mercenary soldiers (Jer 46:21). In Jer 31:18 the untrained calf represents the wayward Ephraim and in Isa 27:10 the grazing calf reflects the desolation of Judah. The calf's peaceful co-existence with other animals bespeaks the peace of the future age (Isa 11:6).

The calf as an image, made of gold, is by far the most interesting use of this word. Aaron yielded to the wishes of the people in the wilderness and made them the molten calf (Ex 32:4, 8, 19, 20, 24, 35) which he identified as the gods who delivered them from Egypt. However, this calf is involved in the subsequent feast proclaimed for YHWH (Ex 32:5) and therefore may have been a symbol of God's presence or, more likely, since "gods" is pl. in verses 1 and 4, the name LORD was used in a pagan polytheistic way.

The golden calves of Bethel and Dan, erected by Jeroboam, seem also to be pedestals upon which YHWH was enthroned (I Kgs 12:28, 32), even as he was enthroned between the cherubim above the ark of the covenant (Ex 25:22; Num 7:89). However, since the calf was a symbol of fertility, the pedestal concept faded into the background and in the popular religion the calves, due to Canaanite influence, became identified with YHWH (II Kgs 17:16; Hos 8:5) and led to apostasy.

'eglā. Heifer, young cow (ASV and RSV similar). A synonym is *pārā* which is the word used in Num 19 where the rite of the red heifer is described.

The heifer was used for agricultural purposes, such as plowing and treading out the grain on the threshing floor (Hos 10:11). She would also be used for milk. In Isa 7:21 ('eglat bāqār "young

cow") reference is made to the nomad who, surviving the Assyrian crisis, would own one cow and two sheep. Normally, this would indicate a poor peasant (cf. II Sam 12:1-3) yet the promise here is for abundance of milk. The word "curds" in this passage is perhaps used figuratively for material abundance.

A three-year-old heifer was used in the Lord's covenant with Abraham (Gen 15:9). A three-year-old heifer would still be in its freshness and the fullness of its strength. (The "heifer of three years old," the KJV rendering of Isa 15:5 and Jer 48:34, is correctly understood by the ASV, RSV and NIV to indicate a place, Eglath-shelishiyah.)

A heifer which had never been worked, was used in a rite of expiation, when the body of a murdered man was found in the open country and the murderer was unknown. The elders of the closest city were to break the neck of this heifer in a valley with running water, washing their hands over it, thereby indicating their and the city's innocence (Deut 21:3, 4, 6). This rite shows that crime is not simply a private matter but involves the whole community. Further, in a real sense, the heifer was put to death in the place of the murderer, hence suffering his punishment. It was also a heifer which Samuel offered at the time of his anointing David (I Sam 16:2).

Ephraim is also likened to a heifer, a trained heifer that loved to thresh (Hos 10:11). This suggests that she had chosen pleasant, productive and profitable labor (*KD loc. cit.*). In threshing, the animal was allowed to eat at will (Deut 25:4). But now Ephraim will be put under the yoke to plow, i.e. she will be put to heavy labor and wearying toil.

C.S.

1561 עָגַם ('āgam) *be grieved*. Occurs only in Job 30:25.

1562 עָגַן ('āgan) *shut oneself in or off*. Occurs only in the Niphal, in Ruth 1:13.

1563 עָגַר ('gr). **Assumed root of the following.**

1563a עָגוּר ('āgūr) *name of a bird, perhaps a thrush*.

עָד ('ad) I, II, III. See nos. 1565a,b,c.

עָד ('ēd). See no. 1576b.

1564 עָדָד ('dd). **Assumed root of the following.**

1564a עָדָה ('iddâ) *menstruation* (Isa 64:5).

1565 עָדָה ('ādâ) I, *go on, pass by; Hiphil, remove*. Probably root of the following.

1565a עָדָה ('ad) I, *perpetuity, continuing future*.

1565b עָד ('ad) II, *booty, prey*, used only in Gen 49:27; Isa 33:23; Zeph 3:8.

1565c עָד ('ad) III, עָדֵי ('ādê) *as far as, even to, until, while*.

'ad I. Perpetuity. ASV, RSV translate similarly, except in Isa 45:17. Here the former has "world without end" while the latter has "to all eternity."

It should be noted that there is no general word for time in Hebrew, neither are there special terms for the past, present, future, and eternity. The word 'ōlām should be compared, with special attention given to the nineteen times when these words are used together.

'ad, like 'ōlām, is used only in connection with prepositions, as an adverbial accusative or as a genitive in a construct chain. Ugaritic *b'd 'lm* could correspond to Hebrew 'ōd as well as to 'ad (UT 19: no. 1813).

This word is used only twice relative to the past. The knowledge that the success of the wicked is short, has been known from of old (Job 20:4). In Hab 3:6 reference is made to the antiquity of the mountains.

Otherwise it always denotes the unforeseeable future; that is, it means in the following compounds: 'ādê-'ad "forever" (Isa 26:4; 65:18; Ps 83:17 [H 18]; 92:7 [H 8]; 132:12, 14, la'ad "forever," (Isa 64:9 [H 8]; Amos 1:11; Mic 7:18; Ps 9:18 [H 19]; 19:9 [H 10]; 21:6 [H 7]; 22:26 [H 27]; 37:29; 61:8 [H 9]; 89:29 [H 30]; 111:3, 8, 10; 112:3, 9; 148:6; Job 19:24; Prov 12:19; 29:14; I Chr 28:9); l'ōlām wa'ad and 'ōlām wa'ad "forever and ever" (Ex 15:18; Mic 4:5; Ps 9:5 [H 6]; 10:16; 21:4 [H 5]; 45:6 [H 7], 17 [H 18]; 48:14 [H 15]; 52:8 [H 10]; 104:5; 119:44; 145:1, 2, 21; Dan 12:3); and as well as in a construct chain in which it serves as the modifier (Isa 9:6 [H 5]) 'ābi-'ad "father forever"; 57:15; shōkēn 'ad "the eternal throne"; Hab 3:6; har'rê-'ad "the everlasting hills."

Frequently the word 'ad is applied to God. His existence is eternal (Isa 57:15). While his righteousness endures forever (Ps 111:3; 112:3, 9), his anger does not (Mic 7:18). God is worthy of praise and will be praised forever (Ps 45:17 [H 18]; 52:9 [H 10]; 111:10; 145:1, 2, 21). The throne of God (Ps 10:16; 45:6 [H 7]; Ex 15:18) and the law of God (Ps 19:9 [H 10]) will endure forever.

This word is also applied to Israel. The Davidic dynasty will continue forever, depending upon their response to the covenant (Pss 89:29 [H 30]; 132:12). Zion is God's dwelling place forever (Ps 48:14 [H 15]; 132:14; I Chr 28:9).

A sharp contrast is seen in the use of this word

relative to the righteous and wicked. The righteous will not always be forgotten (Ps 9:18 [H 19]) and they will inherit the land forever (Ps 37:29). By contrast the wicked are doomed to destruction forever (Ps 9:6 [H 7]; 92:7 [H 8]).

'ad II, as far as, even to, until, while. The special poetic form, 'ādē is used twelve times. 'ad functions as both preposition and conjunction. It indicates the gamut, beginning with the distance from, the advance toward, and the movement up to. It is used spatially, temporally, and comparatively.

Spatially it can indicate arrival at a geographical location ("as far as Bethel," Gen 12:6), at a particular object ("up to the horns of the altar," Ps 118:27) and at a person ("approach to God," Ex 22:8). When used in combination with *min* it gives the idea of extent ("from Sidon . . . as far as Gaza," Gen 10:19). Idiomatically it designates range (from the young to the old, Gen 19:4).

This word is used temporally to indicate a continuation of an event from a point in the past to the present (Gen 19:37, 38). It can be used of an event clearly in the past (Gen 8:7) and also of an event in the future (Gen 3:19; Deut 7:20, 23). As a conjunction it can refer to action which has already happened (Deut 2:14) or one which has not yet been completed at the time of the writing (II Sam 17:13). A continuing event can be designated under such translations as "while" and "during" ("the exalting of the wicked is but for a moment," Job 20:5; cf. Jon 4:2; II Kgs 9:22).

It can be used comparatively in the sense of measure or degree to suggest a higher or the highest. Esther is promised her request by the king up to half the kingdom (Est 5:6). Paying the tithe will result in an overwhelming blessing (Mal 3:10). God's words are said to run even to haste, i.e. swiftly (Ps 147:15). When used with the negative it expresses the concept of "not even as much as." The family of Shimei did not have as many children as Judah (I Chr 4:27). Abishai was chief of the thirty but he did not attain to the three (II Sam 23:19). The army of Sisera was totally destroyed, not a man was left (Jud 4:16). As a conjunctive it can indicate a degree of achievement which becomes perpetual (Isa 47:7).

עָדִין ('ādīn). See no. 1567c.

1567 *עָדָן ('ādan) *luxuriate*. Occurs only in Neh 9:25, in the Hithpael. A denominative verb.

Parent Noun

1567a עָדָן ('ēden) I, finery, luxury.

1567b עֵדְנָה ('ednā) *pleasure* (Gen 18:12).1567c עָדִין ('ādīn) *voluptuous*.1567d מַעְדָּן (ma'ādān) *dainty (food), delight*.

'ēden I. Finery, dainty, delight. Used only three times. Twice it refers to the rich booty of war. In his elegy for Saul, David urged the women to weep over his death, for he had provided them with luxurious clothes (II Sam 1:24). The inhabitants of Judah indict Nebuchadnezzar as a beast of prey which has devoured their delicacies (Jer 51:34). In Ps 36:8 [H 9] the Psalmist refers to the river of pleasure found in God who is the fountain of life. This is perhaps an allusion to the joining of the four rivers in the Garden of Eden (Gen 2:10).

1568 עֵדֶן ('ēden) II, Eden. (Always so translated by the rsv and the asv).

This word was possibly derived from the Akkadian word *edinu* based on the Sumerian word *eden*, meaning "plain, steppe." Akkadian Bit Adini refers to the region on both sides of the Euphrates. It was then secondarily associated with the homonymous but unrelated Hebrew root 'ādan meaning enjoyment. However the LXX seems to derive this word directly from the Hebrew root 'ādan by translating it "garden of delight." This has led to the traditional identification of the Garden of Eden with Paradise which was apt enough (Rev 2:7).

This word appears fourteen times in the OT. In Gen 2:8, 10; 4:16 reference is made to the geographical area in which the garden is placed. The precise location of Eden is difficult. While the Tigris and Euphrates Rivers can be located, there is general uncertainty as to the other two rivers, the Pishon and the Gihon. However, an area near the head of the Persian Gulf seems a likely possibility. Speiser maintains that the physical background as given here in Genesis 2 is authentic (AB, loc. cit. and cf. Harris, R. L. "The Mist, the Canopy and the Rivers of Eden," JETS 11 (1968) 177-180).

Eden is a symbol of great fertility in Isa 51:3; Ezk 36:35 and Joel 2:3. Both Isaiah and Ezekiel promise that the waste places of Judah will blos-

som, becoming as Eden. Joel, referring to the locust invasion, indicates that prior to their arrival the land was as Eden but as a desolate place after their departure.

In Ezk 31 Egypt is likened to a giant cedar tree which the trees of Eden (in apposition with "the choice and best of Lebanon," hence indicating the nobles and princes of the nations) envied, but this giant cedar tree will fall, bringing comfort to the trees of Eden (princes already fallen, now joined by the nobility of Egypt, Ezk 31:8, 9, 16, 18).

The expression "garden of Eden" in Gen 2:15; 3:23, 24 (cf. Ezk 36:35; Joel 2:3) apparently gave rise to a particular use of Eden by the prophets. In Isa 51:3 Eden is parallel to the phrase "garden of the LORD" (cf. Gen 13:10) and in Ezk 28:13 Eden is in apposition with the phrase "garden of God." (Note the change in the divine name: the Isaiah passage uses Yahweh because it is directed primarily to Israel and her restoration; the Ezekiel passage uses Elohîm because it depicts Eden as the most glorious land in all earthy creation [KD loc. cit.].) Clearly such a usage is now more interested in the theological rather than the geographical.

In Ezk 28 Eden, the garden of God, is located on the holy mountain of God (Ezk 28:14, 16) and in this garden there is a king, identified as the King of Tyre. He is a primordial person who is beautiful and perfect. Because of pride, however, he was driven out of the garden. The king of Tyre here may well represent Satan (q.v.) and his fall. If this is the case then Eden seems to refer here to a paradisiacal situation.

Even in the Genesis passages the writer is interested in more than geography. There Eden symbolized a state of unbroken fellowship between God and man. The expulsion from the garden was more than a physical move. It indicated that man had sinned, disobeying God's command. It is also significant that Eden was not only a luxurious place to be enjoyed, it was a place where man had work to do.

During the intertestamental period further development among the Jews of the belief in the resurrection led to the identification of Eden as the place of the righteous dead both before and after the resurrection. (It should be noted, however, that they continued to maintain belief in the original garden of Eden.) This emphasis clearly influenced the NT writers who refer to paradise three times—Luke 23:43; II Cor 12:1–4; Rev 2:7. C.S.

1569 עָרָה (*'ādap) *remain over, be in excess* (e.g. Ex 26:12; 16:23).

1570 עָדַר (*'ādar) *I, help* (I Chr 12:34).

1571 עָדַר (*'ādar) *II, hoe*. This verb occurs only in the Niphal (Isa 5:6; 7:25).

Derivative

1471a מַעְדֵּר (ma'dēr) *a hoe*.

1572 עָדַר (*'ādar) *III, be lacking, fail*. Occurs in the Niphal and Piel only.

Derivative

1572a עֵדֶר (*'ēder) *flock, herd*. (ASV, RSV similar.)

This word is generally used of sheep, goats, and cattle but it is also used to indicate the nation of Israel in her relationship to God.

Relative to animals, this word is primarily used of sheep (Gen 29:2, 3, 8; I Sam 17:34; Jer 51:23; Joel 1:18; Mal 1:14). The shepherd is challenged to watch the condition of his flock (Prov 27:23). In describing his beloved, the bridegroom describes her teeth as a flock of ewes (Song 4:2=6:6). In addition to sheep, this word is applied to goats (Song 4:1; 6:5), to oxen (Joel 1:18) and to cattle—domesticated bovine but often including other animals (Gen 32:17, 20).

The most significant use of this word is its designation of Israel as the flock of God. The very nature of the animals (sheep, in particular) and the devotion and care of the shepherd plus the common knowledge of this fact made this an ideal symbol of God's relationship to Israel. While kings (Jer 13:20) and other rulers (called shepherds, Ezk 34:12; Zech 10:3) have mistreated God's flock, he will care for them. The prophet condemned the shepherds of Israel who had not been caring for the flock, but rather caring for themselves (Ezk 34:2). By contrast, the prophet promises that God will take good care of Israel and set up his "servant, David" over them (Isa 40:11; Ezk 34:13–16, 24). Even as he guided them in the past in the wilderness after the Exodus (Ps 78:52), so he will bring them back from their exile (Jer 13:17), seeking them out and leading them like a shepherd (Mic 2:12). This allegory is the basis of the New Testament image of Jesus as the Good Shepherd (Jn 10; Heb 13:20). C.S.

1573 עֲדָשָׁה (*'ādāshā) *lentil* (e.g. Gen 25:34; Ezk 4:9).

1574 עֹבֵב (*'ûb) *becloud*. Denominative verb, used in the Hiphil.

Parent Noun

1574a עָבָה (*'āb) *II, cloud*.

'ûb "becloud" is used only in Lam 2:1, of Zion being placed under a cloud because of the Lord's anger.

'āb. Cloud. This word should be distinguished from the synonym *'ānān* "mass of clouds" (used in the expression "pillar of cloud," Ex 13:21). By contrast *'āb* seems to designate a particular cloud, generally a dark cloud in the sense of a rain cloud (Jud 4:5; I Kgs 18:44, 45; Job 37:11; Eccl 11:3; Job 37:11).

'āb is used metaphorically to show the swift movement of the remnant (arriving on white-masted ships) when God calls them back from exile (Isa 60:8), the facility, rapidity, and totality with which God removes sin (Isa 44:22) and the transience of prosperity (Job 30:51). Even as God can subdue the heat of the sun by clouds so he can still the noise of the enemies of his people (Isa 25:5).

This word is also used to suggest height, particularly as it pertains to the ambition of the wicked and their aspirations against God. Though the wicked seem to prosper, reaching the heights of success, they will soon perish and disappear (Job 20:6). It is used in the same way of Egypt, which is likened to a cedar whose top is in the clouds but which will be felled (Ezk 31:3, 10, 14). The king of Babylon expresses his ambition by the determination to ascend the summit of the northern mountain or sacred mountain (NIV) which is lost in the clouds (Isa 14:14). However, he will die as all other men and go to Sheol where he will enjoy no special place.

The mobility of God is depicted by this word (Ps 18:11, 12 [H 12, 13]=II Sam 22:12, 13; Ps 104:3). God rides upon the clouds when he is about to bring judgment upon Egypt, striking fear into the very idols of the nation (Isa 19:1). It is perhaps in this sense of judgment that Jesus, alluding to Dan 7:13, referred to his return "on the clouds of heaven with power and great glory" (Mt 24:29-31).

C.S.

1575 עֹג ('ûg) *bake a cake* (Ezk 4:12). Denominative verb.

Parent Noun

1575a עֹגָה ('ûgā) *disc or cake of bread* (e.g. Hos 7:8; Ezk 4:12).

1575b מַעֲוֶגֶת (mā'ôg) *cake* (I Kgs 17:12; Ps 35:16).

עֹגָב ('ûgāb). See no. 1559c.

1576 עוּד ('ûd) *return, repeat*.

Derivatives

1576a עוּדָה ('ôd) *a going round, continuance*.

1576b עֵד ('êd) *witness*.

1576c עֵדוּת ('êdâ) *testimony, witness*.

1576d עוּדָה ('ûd) *bear witness*. Denominative noun.

1576e עֵדוּת ('êdâ) *testimonies*.

1576f עֵדוּת ('êdût) *testimony*.

1576g תְּעוּדָה (t'êdâ) *testimony* (Isa 8:16, 20), *attestation* (Ruth 4:7).

'ôd. Continuance, besides, still, again. Functions as a substantive and an adverb. This word, derived from *'ûd* "to repeat," "to do again," has the sense of repetition and permanence. C. van Leeuwen notes that the root *'ûd* is widespread in the Semitic languages: e.g. Arabic *'âda* "to return" and *'âdat* "habit," Ethiopic *'ôda* "to turn about," Phoenician/Aramaic/Hebrew *'ôd* "still, yet." But the meaning "witness" (*'êd*) occurs only in Hebrew (THAT, II, p. 210).

Most frequently this word has a temporal sense. It is used to indicate the continuance of a past or present event ("Abraham still stood before the Lord," Gen 18:22), of a custom ("people still sacrificed and burned incense on the high places," I Kgs 22:44), and of an attribute ("I am still as strong," Josh 14:11). Constancy can be expressed by this term. The psalmist affirms that he will sing to the Lord as long as he lives (Ps 84:4 [H 5]; 104:33; 146:2). Jacob declared that God was with him all his life (Gen 48:15). When limited by its nature to a single occurrence, this word assumes the meaning "again" (Gen 18:29; 29:33).

Addition or repetition can be indicated by this term. After "yet" seven days, Noah sent out another bird (Gen 8:10, 12). Jacob served Laban for "another" seven years to gain Rachel (Gen 29:30). Joseph warned his brothers that the famine would continue five "more" years (Gen 45:6).

This word also has a numerical emphasis, meaning "moreover," "besides" (Gen 19:22; I Sam 10:22; Amos 6:10). When used with the negative, the meaning is there is none besides (Isa 47:8, 10). God emphatically asserts that there is no other besides him (Isa 45:5, 6, 14, 18, 22).

'êd. Witness. (ASV and RSV similar.) This word, appearing some sixty-seven times in the OT, is also derived from the root *'ûd* meaning "return" or "repeat, do again." The semantic development apparently is that a witness is one, who by reiteration, emphatically affirms his testimony. The word is at home in the language of the court.

A witness is a person who has firsthand knowledge of an event or one who can testify on the basis of a report which he has heard (Lev 5:1). Such a person is under obligation to testify (Prov 29:24). The law demanded the testimony of at least two witnesses to establish guilt (Num 35:30; Deut 17:6; 19:15). In the case of a stoning, the witness hurled the first stone (Deut 17:7; cf. Acts 7:58).

The OT recognizes that a witness could be dependable or false. In the former instance the word is qualified by '*emet*' "truth" (Prov 14:25; Jer 42:5), by '*ēmūnā*' "firmness" (Prov 14:5), and by '*ne'ēmān*' "confirmed" (Isa 8:2). To designate the unreliable witness the word is qualified by '*sheqer*' "false" (Ex 20:16), by '*kāzāb*' "lie" (Prov 21:28), by '*h'liya'al*' "worthlessness" (Prov 19:28), by '*shāw'*' "emptiness" (Deut 5:20 [H 17]), and by '*hāmās*' "violence" (Ex 23:1; Deut 19:16; Ps 35:11).

Bearing false witness is prohibited in the Decalogue (Ex 20:16) and is condemned in the wisdom literature (Prov 6:19; 14:5; 19:5, 9, 28; 21:28; 25:18). The psalmist complains that false witnesses have risen against him (Ps 27:12; 35:11). According to the law, a false witness is subject to the same penalty he hoped to have inflicted upon the accused (Deut 19:16–21).

A witness was needed for various transactions such as the sale of property (Jer 32:10, 12, 25, 44) and the act of redemption (Ruth 4:9, 10, 11).

Inanimate objects could be witnesses: stones (Gen 31:48), altar (Josh 22:27, 28), moon (Ps 89:37 [H 38]), and a poem (Deut 31:19, 21, 26). The nation of Israel was viewed as God's witness (Isa 43:9, 10; 44:8, 9). In Gen 21:30 animals were symbolic witnesses in the making of a treaty.

The ultimate witness is God himself, who is shown to be keenly aware of man's integrity (I Sam 12:5; Job 16:19) and equally cognizant of man's sin (Jer 29:23; Mal 3:5).

'ūd. Bear witness, admonish, warn. (ASV and RSV similar except for minor variations in synonyms.) This word is a denominative verb, coming from the noun '*ēd*' meaning "witness."

This word is used not too frequently and usually in the area of human affairs. It is used relative to a business transaction in Jer 32:10, 25, 44 where Jeremiah obtained witnesses for the deed to his newly acquired property in Anathoth. Jezebel secured two men to denounce (witness against) Naboth so that Ahab could have his vineyard (I Kings 21:10, 13). Isaiah secured reliable witnesses to verify his sign to Ahaz (Isa 8:2). Job recalled the wide approval he enjoyed before his adversity (Job 29:11).

God appeals to and invokes heaven and earth as his witness against Israel that he has given her a choice between life and death (Deut 4:26; 30:19). This is a common motif in the OT (cf. Isa 1:2). Moses also invokes heaven and earth against the anticipated rebellion of Israel (Deut 31:28).

Most frequently this word is used in the sense of a strong warning. Man can be the one who issues the warning as well as the one who receives it. Joseph warned his brothers to return with Benjamin (Gen 43:3). The merchants are

strongly admonished by Nehemiah not to desecrate the Sabbath (Neh 13:15). Moses cautioned Israel against curiosity at Sinai (Ex 19:21). Samuel warned the nation against instituting the monarch (I Sam 8:9). The owner of an ox, who had been advised that his animal was dangerous, would be put to death if the ox should kill a person (Ex 21:29).

God is also frequently the subject of this verb, extending a warning to Israel (II Kings 17:15; Ps 50:7; 81:8 [H 9]; Jer 11:7). The prophets were often the channel through which God extended his solemn exhortation (II Chr 24:19; Neh 9:26; Jer 42:19; Amos 3:13).

'ēdā I. Testimony, witness. Used only of things posited to establish permanence and unequivocal facts such as ownership (Gen 21:30), an agreement (Gen 31:52), and a covenant with God (Josh 24:27).

'ēdā II. Testimonies. This noun is used only in the plural. It refers to the laws as given with divine warrant, especially in Ps 119 (thirteen times). Possibly '*ēdā*' is a variant pointing of '*ēdūt*'.

'ēdūt. Testimony, reminder, warning sign. (ASV and RSV are similar but the latter will occasionally use the rendering "warning," cf. II Kgs 17:15; Neh 9:34, which is justified since the meaning of this word is not simply a corroborative testimony but also a warning testimony.) This substantive is from the root '*ūd*' meaning "to bear witness." Synonymous and derived from the same root are '*ēdā*' III, found less frequently and only in the plural, meaning "testimonies" of God and '*ūdā*', also meaning "testimony" but somewhat more restricted since it seems to designate the particular prophetic testimony of Isaiah (8:16, 20) rather than the law in general. (For this latter word cf. UT 19: no. 1832, '*ūd*', which has the dual meaning of message and messenger—UT, 16: T nos. 137:22, 26, 30, 41, 44.)

This word is always used in reference to the testimony of God. It is most frequently connected with the tabernacle (Ex 38:21; Num 1:50, 53), resulting in the expression "tabernacle of the testimony," and with the ark (Ex 25:22; 26:33, 34; 30:6, 26), resulting in the phrase "ark of the testimony." In fact in several instances this word stands alone to indicate the ark (Ex 16:34; 27:21; 30:36; Lev 16:13). Moses was instructed to put the testimony in ("before," Ex 16:34; 27:21) the ark (Ex 25:21) and he did so (Ex 40:20; cf. Heb 9:4). Here the meaning is made quite clear. It designates the two tables of stone upon which the Ten Words (commandments) were written (Ex 24:12; 31:18; 32:15; 34:29). These two tables represented God's covenant with Israel (Ex 34:27, 28) and as such are called the "tables of the covenant" (Deut 9:9; 11:15).

The law of God is his testimony because it is his own affirmation relative to his very person and purpose. While in the or the written words constitute the testimony, it is the proclamation of the gospel which is the essence of the testimony in the NT.

The identification of this word with the law is seen even more clearly in Ps 19 and 119 where it is used as a synonym of the law. In Ps 19:7 [H 8] the testimony is said to be trustworthy. This word is used nine times in Ps 119 (14, 31, 36, 88, 99, 111, 129, 144, 157) where the psalmist reflects his great delight in and his great respect for the law of the Lord.

This word is also used in conjunction with the coronation ceremony of Joash. At the time of receiving the crown from the priest Jehoiada, the king also received the "testimony" (II Kgs 11:12 = II Chr 23:11). This action based on Deut 17:18, 19, 20 was to remind the king that the law was to determine both his personal life and his rule as king (cf. I Kgs 2:3; I Chr 29:19, of Solomon and II Chr 34:31, of Josiah).

As noted above this word has an emphasis of warning. The fall of the Northern Kingdom is attributed to the fact that Samaria despised the warning of the Lord (II Kgs 17:15). Ezra makes a confession for the Southern Kingdom, acknowledging that Judah had not heeded God's warning (Neh 9:34; cf. Jer 44:23). The law of the Lord has been given as a warning sign to man.

C.S.

1577 עָוָה ('āwā) *bend, twist, distort.*

Derivatives

- 1577a עָוֹן ('āwōn) *iniquity, guilt, punishment.*
- 1577b עֲוָה ('awwā) *ruin.*
- 1577c עִוְיָם ('iw'im) *distorting, warping* (Isa 19:14).
- 1577d עִי ('i) *ruin, heap of ruins.*
- 1577e קָעַי (m'ī) *ruin* (Isa 17:1).

Cognates to Hebrew 'āwā include Arabic 'awayā "to bend," "to twist" and/or gawayā "to deviate from the way" (cf. S. R. Driver, *Notes on the Hebrew Text... of the Books of Samuel* (1913), pp. 170f; GB 569b; KB 686f.; Zorrell, 578a), and Biblical Aramaic 'awayā "offense, iniquity" (Dan 4:24).

Its main derivative is the masculine noun 'āwōn (occurring 231 times against the verb found 17 times), an abstract nominal pattern with the ān>ōn ending (BL, p. 498 and Moscati,

p. 82). BDB conjecture two roots: 'āwā I "bend" twist" related to Arabic 'awayā and 'āwā II "to commit iniquity" a denominative from 'āwōn which in turn is related to Arabic gawayā. But KB and GB with more probability see only one Hebrew root related either to 'awayā "alone" (so KB) or to both roots (so GB). For convenience we shall follow this procedure.

The basic meaning of the verb, "to bend, twist, distort," can be seen in its concrete, non-theological uses: "I am bent over" (Niphal) (Ps 38:7); "the LORD lays the earth waste, devastates it; and he ruins (Piel) it" (Isa 24:1). From this primary notion it derives the sense "to distort, to make crooked, to pervert": "He has made my paths crooked (Piel)" (Lam 3:9); "I have... perverted (Hiphil) what is right" (Job 33:27); "a man of perverse (Niphal) heart will be despised" (Prov 12:8). When the distortion pertains to law it means "to sin, to infract, to commit a perversion/iniquity."

'āwōn. Iniquity, guilt or punishment for guilt. [The derivative noun 'āwōn occurs with only the derived, abstract theological notion of the root: "infracture, crooked behavior, perversion, iniquity, etc."]

We note in the first place that the noun is a collective. Thus God says of the misdeeds/perversions of the Amorite: "The perversion (singular) of the Amorite is not complete" (Gen 15:16). The widow of Zarephath complains to Elijah that he came to "bring my perversion/iniquity (singular) to remembrance" (I Kgs 17:18). Thus it occurs in such formulas as "to bear (nāṣā') 'āwōn (Gen 4:13; Ex 34:7; Hos 14:3; Ps 85:3); "to take away ('ābar) (Hiphil) 'āwōn (Zech 3:4), "to visit (pāqad) 'āwōn (Ex 20:5); etc. This notion of totality is also seen in the association of individual misdemeanor with that of the group: "and the goat shall bear on itself all their perversions/iniquities (plural)" (Lev 16:22); "... and the LORD struck him with the perversion/iniquity (singular) of all of us" (Isa 53:6).

Moreover, as the above references indicate, it denotes both the deed and its consequences, the misdeed and its punishment. Both notions are present, but sometimes the focus is on the deed ("sin"), and at other times on the outcome of the misdeed ("punishment"), and sometimes on the situation between the deed and its consequence ("guilt"). As an example of the focus on the misdeed demanding punishment: "this sin will become for you like a high wall, cracked and bulging, that collapses suddenly, in an instant (Isa 30:13; cf. Ezk 18:30; 44:12; Hos 5:5; Job 31:11, 28). With the emphasis on the punishment: "Arise... or you will be swept away in the

punishment of the city (cf. Jer 51:7; Ps 39:12; 106:43; Job 13:26; 19:29; Ezr 9:7). With the emphasis on "guilt": "upon me be the *blame*" (I Sam 25:25; see below for numerous examples).

The remarkable ambivalence between the meanings "sin as an act" and "penalty" shows that in the thought of the OT sin and its penalty are not radically separate notions as we tend to think of them. Rather in the OT the action of man and what happens to him are presupposed to be directly related as one process within the basic divine order. This connection has been called a "synthetic view of life" (von Rad, G., *Theology of the Old Testament* I, p. 205). The root *ḥāṭā'* "sin" displays the same basic "synthetic" concept; e.g. Num 32:23: "but if you fail to do this, you will have sinned (*ḥāṭā'tem*) against the LORD, and you may be sure that your sin (*ḥāṭā'r'kem*) will find you out." The second occurrence, the nominal form of the root, denotes "the penalty" for the act (cf. Num. 12:11). Thus sin had the inevitable effect of destroying the individual and/or the community and must be rooted out. B.K.W.]

'āwōn definitely is not a trait of God's character nor of his dealing with man (Ex 20:5; 6:34:7), but is an overwhelming trait of man's character and actions, including consequences of those actions.

'āwōn designates kinds of civil or social violations in I Sam 20:1, 8; II Sam 3:8; Neh 4:5; Ps 51:2, and cultic violations in Josh 22:17; and I Sam 3:13-14. In instances too numerous to list, this term is a collective, or a quasi-abstract, noun denoting the sum of past misdeeds against God and man. Samples are Num 14:34; I Sam 25:24; II Sam 22:24; I Kgs 17:18; Ezr 9:6; Job 13-26; Isa 1:4; Jer 11:10).

In other passages the emphasis is on the quality and the inner source of 'āwōn. In Job 15:4-5 it is related to doing away with the fear of God, etc., whereas in Ps 78:37-38 it is tied to being not steadfast toward him (God), and in Jer 14:10 with the statement, they have loved to wander thus. The term is related to both adultery (Num 5:31) and to idolatry (Hos 5:5; Jer 16:10-11). In this metaphor, both the act of violation and the consequent defilement is depicted. Other results of 'āwōn are found to be separation from God, an alienation (Lev 26:40; Isa 59:2; 1:4), and uncleanness (Ps 51:2 [H 4]).

Guilt is the major consequence of 'āwōn on the inner man. This element is not easily distinguished from the function of the term as a sum for past misdeeds, but BDB lists over thirty instances in which the element of guilt is prominent (p. 731).

Along with the inner impact of 'āwōn, there are consequences which affect the family, the tribe, the nation, the nations and nature. In re-

gard to the family, the familiar statement is found in Ex 20:5; Deut 5:9. God's visitation may be centered as a punishment more immediately on individuals of the family or tribe (Lev 5:17; 18:25; Num 5:31; I Sam 25:24; II Sam 14:9; Ps 106:43; Jer 36:31). 'āwōn makes the nation liable for punishment (Lev 26:39; Ezr 9:7, 13, Ps 107:17 and a number of times in Isaiah, Jeremiah and Ezekiel). In a sense, the high priest and the priests took upon themselves the danger of punishment, in the stead of the nation, due to the holiness of their duties and of the sanctuary (Ex 28:38, 43; Lev 22:16; Num 18:1, 23). After the fall of Jerusalem, that disaster was recognised as the result of the nation's 'āwōn (Lam 4:6, 13, 22; Ezk 39:23; Dan 9:13, 16).

It was not inevitable that punishment follow 'āwōn; there was a way to escape it. Man's prayers of supplication and God's announcements of salvation indicate the way to be rid of 'āwōn. Man must be aware of and confess 'āwōn (Gen 44:16; Lev 16:21; Neh 9:2; Ps 32:5; 38:18 [H 19]) and it must be a request directed to God (Ex 34:9; Num 14:19; Job 7:21; Ps 25:11). Man must also change his way of life (Ezk 18:30; 36:31). There is provision for a substitute in punishment (Lev 16:22; Isa 53:5-6, 11; Ezk 4:4-6).

Of supreme importance is God's acts of taking away, forgiving 'āwōn; this is both promised and declared as an actuality (Num 14:18; Ps 65:3 [H 4]; 78:38; 103:3; Prov 16:6; Isa 6:7; Jer 32:18; Dan 9:24; Mic 7:18-19; Zech 3:4, 9; cf. David's act of forgiveness by kissing, II Sam 14:32). In three places the divine act of cleansing is stressed (Ps 51:4; Jer 33:8; Ezk 36:33).

'awwā. Ruin, rubble. This noun occurs only in Ezk 21:27 [32], where it is used three times to express a superlative degree. The ASV translates this word "overturn," associating it with the root 'āwā, "bend." Its meaning is sharpened by the reference to an inversion of power and status in vs. 26. The high priesthood (turban) and the monarchy (crown) will be reduced to ruin until the coming of the legitimate one. While some look for an historical person, it seems to have Messianic overtones. The Messianic interpretation is strengthened by comparing these verses with Gen 49:10. The difficult "until Shiloh comes" can better be translated, "until he comes to whom it belongs," taking the *shin* as an old relative pronoun. The phrase then is remarkably like Ezk 21:27 [H 21:32] which uses the more usual relative pronoun "until he comes whose right it is."

Derivative

1578a מָוֶז (mā'ōz) *place or means of safety.*

The root 'wz is found elsewhere only in Arabic. *āda* "to seek refuge." Gerstenberger, however, suggests that possibly our verb is a denominative, because its alleged derivatives have a striking phonetic and semantic similarity to *āzaz* "to be strong" (THAT, II, p. 222).

This verb carries the concept of taking shelter quickly. Such urgency is seen in the contexts in which it appears: Ex 9:19, quick securing of that which is in the field because of the hail: Jer 4:6; 6:1, associated with the advance of the Chaldean army, necessitating a quick alarm; Isa 10:31, occasioned by an advancing army, either the Assyrian or the Syrian-Ephraimite army. The futility of taking shelter in Egypt is emphasized in Isa 30:2, where the verb occurs with the derived noun as a cognate accusative.

mā'ōz. *Place or means of safety, protection, stronghold, fortress.* As is sometimes the case, the *mem* prefix adds the meaning "place" to the verbal root.

Natural and manmade places of safety can be designated by this word such as a mountain (Jud 6:26), harbor (Isa 23:4), cities (Isa 17:9), and temple (Ezk 24:25). These strongholds, in sharp contrast to God, are not invincible but are rather subject to destruction (Isa 23:11, 14; Ezk 30:15). The noun also possibly appears in Ps 52:7 [H 9] (however that may be from *āzaz* "be strong") showing the futility of riches as a shelter.

This word can also be used figuratively of human protection. A foreign power, such as Egypt, can be viewed as a means of protection (Isa 30:2, 3; here the protection of Pharaoh is parallel to the shadow of Egypt). This reliance upon Egypt is a common problem of Israel, bringing down on her the condemnation of the prophets (Jer 42:7–17). Judah was also inclined to view falsely the temple as a symbol of security (Ezk 24:25; cf. Amos 6:8; Jer 7:4; 26:4, 5, 6).

By far the most common use of this word is the figurative one, designating God as the refuge of his people. Careful distinctions are made here. While the wicked rich refuse his shelter (Ps 52:7 [H 9]) taking refuge in their wealth, he is the protection of the poor (Isa 25:4), of the upright (Prov 10:29), and of his people in general (Ps 28:8; Joel 3:16 [H 16]). The psalmist refers to God

as his refuge (Ps 31:2, 4 [H 3, 5]; 43:2). Man is confronted with a decision relative to making God his refuge (Isa 27:5) and it is possible, as Israel did, to forget him (Isa 17:10). While he is a place of shelter in time of trouble (Ps 37:39; Jer 16:19; Nah 1:7), he is also a *constant* refuge (Ps 27:1). In the midst of sorrow, the joy of the Lord can be our strength (Neh 8:10), sustaining us.

Bibliography: THAT, II, pp. 221–23.

C.S.

עויל ('āwil). See nos. 1579b, 1580d.

1579 עול ('āl) *I, give suck.* This root, cognate to Arabic *āla* "nurse," and *ayyil* "infant," designates the feeding activity of the young of domestic animals and man. The verb occurs four times, always as a Qal active participle.

Derivatives

1579a עול ('āl) *sucking child, suckling* (Isa 49:15; 65:20). The more common synonym is the Qal active participle of *yānaq*.

1579b עויל ('āwil) *young man.* Occurs once clearly, in Job 21:11, and once problematically, in Job 19:18.

1579c עולל ('ōlēl) *child.*

1579d עולל ('ōlāl) *child.* 'ōlēl and 'ōlāl are indistinguishable in meaning. They probably refer to an older child than the infant (*yōnēq*). However, in the pair, 'ōlēl and *yōnēq*, 'ōlēl comes first. These last two nouns may also be derived from 'ālal a by-form of עול.

1580 *עול ('āl) *II, deviate from, act unjustly.*
Used only in the Piel 'iwwēl.

Derivatives

1580a עולל ('āwel) *injustice, unrighteousness.*

1580b עולל ('awlā) *injustice, unrighteousness.*

1580c עולל ('awwāl) *unjust, unrighteous one.*

1580d עויל ('āwil) *unjust one.*

The Arabic cognate 'wl means "to deviate." Likewise in Hebrew the basic meaning of this root means to deviate from a right standard, to act contrary to what is right. The root occurs sixty times, with forty of these found in Job (sixteen times); Psalms (thirteen times) and Ezekiel (eleven times). The rest are distributed throughout the prophetic and legal literature.

The verb is a denominative from *'āwel*/*awlā* and occurs only twice in the Old Testament, both times in the Piel stem. In Isa 26:10 it describes the activity of the people of Judah who act unjustly (קִוּ; "perversely," rsv) in contrast to upright behavior. In Ps 71:4, a prayer of supplication, the verb contrasts the behavior of the unrighteous with that of God and his servant.

'āwel, 'awlā. Injustice, unrighteousness. Like the antonyms *šedeq/š' dāqā* there is little difference between the masculine segholate *'āwel* found twenty times, and its feminine equivalent *'awlā* occurring thirty-three times. Both denote an act or deed that is against what is right. That they express a deed or act is clear in the first place from their frequent use as direct objects of verbs of doing: after *'āsā* (Lev 19:15, 35; Deut 25:16; Ezk 3:20; 18:24; 33:13, 15, 18; Zeph 3:13; Ps 7:4; 37:1); after *pā'al* (Ps 58:3; 119:3; Job 34:32; 36:23); with *tā'ab* (Ps 53:2). Secondly, *'āwel* is sometimes said to be in one's hand (Ezk 18:8; Ps 7:4; 125:3). By metonymy it stands specifically for speech (cf. Isa 59:3; Mal 2:6; Job 5:16; 6:30; 13:7; 27:4).

That they denote behavior contrary to what is right is shown by their frequent employment as opposites of: *šedeq/š' dāqā* "righteousness" (Lev 19:15, 35f.; Isa 26:10; 59:3f.; Ezk 3:20; 18:8f.; 24; 33:12f., 15f.; Job 6:29), *šaddiq*, "one who does righteousness" (Deut 32:4; Ezk 3:20; 18:24, 26; 33:13; Zeph 3:5; Ps 125:3; Prov 29:27), *'emīnā* "faithfulness, truth" (Deut 32:4; Isa 59:3f), *yāšār* "upright" (Deut 32:4; Ps 107:42), *mishpāt* "justice" (Deut 32:4; Ezk 33:14f.; Zeph 3:5), *šāpāt* "to do justice" (Mic 3:11; Ps 43:1; 82:2); *nākōah* "upright, right" (Isa 26:10).

This notion is further confirmed by the parallel use with: *'ānā* (Piel) "to afflict" (II Sam 7:10), *rāšā' /resha'* "wickedness" (Isa 26:10; Ezk 18:24; 33:12f., 15, 18f.; Ps 125:3; Job 27:7; 34:10), *pesha'* "transgression" (Ezk 33:12f.), *hāmās* "act of violence" (Ezk 28:15f.; Ps 58:3), *dām* "bloodguilt" (Mic 3:10; Hab 2:12), *hāmās* "ruthlessness" (Ps 7:17 [H 18]), *mirmā* "treachery" (Ps 43:1), *kāzāb* "lie" (Zeph 3:13), *r' miyyā* "deceitful" (Job 13:7), *'āwōn* "iniquity" (Ezk 28:18).

These unrighteous deeds include: partiality in judgment (Lev 19:15; 82:2); dishonest trade dealings (Deut 25:16; Ezk 18:8)—more specifically robbing (Ezk 33:15), murder (II Sam 3:34), oppression (II Sam 7:10; I Chr 17:9; Ps 37:1; 39:22; 125:3; Prov 22:8; Hos 10:9; Mic 3:10; Hab 2:12);—more specifically vicious words (Job 6:30; 11:14; 13:7; 15:16; 27:4 Isa 59:3; Hos 10:13).

Thus the words have an important theological significance for they refer to behavior contrary to God's character and against which he must respond. Some texts explicitly state that *'āwel*

'awlā is not found with him. Moses sings, "The Rock! His work is perfect, for all his ways are just; a God of faithfulness and without injustice [*'āwel*], righteous and upright is he (Deut 32:4). Elihu expostulates, "Therefore, listen to me, you men of understanding. Far be it from God to do wickedness, and from the Almighty to do wrong (*'āwel*)" (Job 34:10). Jehoshaphat instructs his judges: "For there is no injustice [*'awlā*] with our God" (II Chr 19:7). In Jer 2:5 the Lord asks the fathers to search their history and see "what injustice [*'āwel*] they have found in him." Accordingly he will save the oppressed (Job 5:16). Men who practice injustices are abomination to him (Deut 25:16; Prov 29:27), and even if a righteous man turns away from his righteousness and commits injustice he must die (Ezk 3:20).

Though man may choose injustice (Ezk 18:26; 33:13, 18) and thus become culpable (Ezk 3:20; 28:18; 33:13, 18 etc.) he need not become fixed in that condition for he may renounce it (Job 34:32), confess his condition (Ps 7:3; Ezk 33:15), and put it far from him (Job 11:14; 22:23). God, on his part, will respond with salvation.

'awwāl. Unjust, unrighteous one. This masculine noun is a close synonym to *'āwel*, but is used more specifically as a label of persons. Its five occurrences mostly refer to oppressive rulers. Bildad declared that such a person's dwellings were headed for disaster (Job 18:21), and Job claimed that this kind of man was his enemy (Job 27:7) and he was not one of them (Job 29:17). In a statement of personal commitment, Job agreed that an *'awwāl* had punishment coming to him from God (Job 31:3) and then challenged anyone to prove he was such a person. The prophet Zephaniah affirmed that God was righteous and not an *'awwāl*, in sharp contrast to man.

'awlā. Injustice, unrighteousness, wrong. This feminine noun carries a more abstract meaning. It often refers to violent deeds, such as murder (II Sam 3:34), oppression (II Sam 7:10; I Chr 17:9; Ps 37:1; 89:22 [H 23]; 125:3; Hos 10:9; Mic 3:10; Hab 2:12) and also vicious words (Job 6:30; 13:7; 27:4; Isa 59:3). This quality was the opposite to God's character (II Chr 19:7; Job 36:33; Ps 92:15 [H 16]; 107:42; Isa 61:8). Likewise, this quality must not be in the character of God's followers (II Chr 19:7; Job 6:29–30; Ps 119:3; Zeph 3:13; Mal 2:6). In fact, God had made man free of this quality, but he became this way later (Ezk 28:15).

As with *'āwel*, there is a way to be rid of *'awlā*. Man may put it away (Job 11:14; 22:23), not be envious of those who do *'awlā* (Ps 37:1), but seek God and walk in his ways (Ps 119:2–4). And God must act in deliverance, for the Psalmist knew he could not be rid of it in his own power (Ps 43:1).

'āwîl. *Unjust one*. Clearly used once, in Job 16:11, as a label for Job's enemies from whom God had delivered him.

It is highly probable that four occurrences of 'ôlâ come from this same root. In three instances the term designates the character of God's enemies (Job 5:16; Ps 58:2 [H 3]; 64:6 [H 7]). Once in Ps 92:15 [H 16], the term is the contrast to God's character, for he is upright.

עוֹלֵל ('ôlêl), עוֹלָל ('ôlâl). See nos. 1579c,d.

עוֹלְלוֹת ('ôlêlôr). See no. 1627a.

עוֹלָם ('ôlâm). See no. 1631a.

1581 עון ('ûn) *dwel.*

Derivatives

1581a מְעוֹנָה (mā'ôn) *dwelling, habitation*.

1581b מְעוֹנָה (m'ē'ônâ) *dwelling, habitation*. Most frequently refers to the dens of animals.

The verbal root 'wn is unattested in Hebrew. The Arabic verb *gâna* means "to cover, conceal."

mā'ôn. Dwelling. (ASV, RSV similar except I Sam 2:29, 32 and Zeph 3:17 where RSV emends to read "eye".) It is used eighteen times. This word is used to depict the ruins of desolate cities now the dwelling place of wild animals. Most frequently it designates the Lord's dwelling place, i.e. heaven (always qualified with the word "holy") and the temple (Ps 26:8). Finally it portrays the Lord as a refuge for his people (Ps 71:3; 90:1; 91:9).

C.S.

עוֹן ('āwôn). See no. 1577a.

עוֹנִים ('iw'im). See no. 1577c.

1582 עוף ('ûp) *I, fly, fly about, fly away.* (ASV, RSV similar.)

Derivatives

1582a עוֹפִים ('ôp) *flying creatures, i.e. birds or insects*.

1582b עֵפָה ('ap'ap) *eyelid*.

'ûp, used primarily in the Qal and seldom in the intensives, means to fly about, and also to fly away, i.e. vanish. The Ugaritic 'p and Arabic 'āfa have similar meanings.

The action of this verb, not surprisingly, is attributed to birds (Prov 23:5; 26:2; Isa 31:5; Hab 1:8; Gen 1:20; Deut 4:17). Actually, only in the last two references, is flying referred to without the development of a simile.

This word is also used of angelic beings. The seraphim of Isaiah 6 are six-winged. With two wings they cover their face, with two wings they cover their nakedness (a euphemism) and with two wings they fly (Isa 6:2, 6). Mounted on a cherub Yahweh flies through the heavens (Ps 18:10 [H 11]=II Sam 22:11). Ezekiel describes the cherubim as four-winged and four-faced creatures accompanied by whirling wheels. The wings of the golden cherubim overshadow the mercy seat (Ex 37:9). The cherub of Ps 18:10 [H 11] is perhaps to be considered as a personification of the wind. Yahweh is pictured as riding upon the clouds and wind (Ps 104:3; Isa 19:1).

The passage in Dan 9:21, which in both the RSV and the ASV has the angel Gabriel flying, is much debated. In the OT angels seem to assume human form and generally do not fly. It might even be argued that Gen 28:12 assumes that angels do not have wings. The problem in Dan 9:21 is whether the word in question is from the root 'ûp or the root yā'ēp, meaning "to be weary." By using this latter word, flying would then not be attributed to angels. However, it would seem equally strange for angels to grow weary but the action of this verb could perhaps be assigned to Daniel who may be wearied because of his praying and fasting (cf. KD loc. cit). Since seraphim and cherubim have wings and since angels appear with wings in Enoch 61, perhaps it would be best to accept the traditional translations—"fly swiftly." Angels can presumably appear in various forms.

In Zechariah 5:1-2 an immense scroll (30 by 15 feet, the same size as the holy place of the tabernacle or the porch of Solomon's temple) on which is inscribed a curse, is seen flying over the land. It is a symbol of Yahweh's wrath and will find its target, the thieves and perjurers.

The upward flight of sparks (literally "sons of flame") is seen in Job 5:7 to indicate the certainty that sorrow has been allotted to man. The movement of the clouds in Isa 60:8 suggests the white-masted ships bringing the exiles back to the land. The success of the eschatological army of Israel against Philistia is likened to the "swooping down of a bird" (Isa 11:14).

The meaning "to fly away" or "vanish" is used of several matters. The Psalmist, oppressed by the wicked, is anxious to escape (the city?) and to fly away to the wilderness where he can find rest (Ps 55:6 [H 7]). Zophar affirms that the wicked enjoy success which is as fleeting as a dream (Job 20:8). The sage cautions against the eyes "flying" (glancing) upon wealth because it

is transitory, flying away as an eagle (Prov 23:5). The brevity and swiftness of life is depicted by this word in Ps 90:10. Finally, the army attacking Assyria plunders her and then flies away with the booty (Nah 3:16).

‘ôp. *Bird, fowl, insect.* Collective noun from root ‘ûp meaning to fly. Used seventy-one times. Birds were created (Gen 1:20, 21), named (Gen 2:20), taken aboard the ark (Gen 7:8), eaten (Ps 78:27), and sacrificed (Gen 8:20; Lev 1:14). Classified as clean and unclean. Used with *sheres* it designates clean and unclean winged insects (ASV “winged creeping things”). Lev 11:20–23 obviously refers to insects with four legs, perhaps counted in addition to the hind legs used in leaping.

1583 עֹר ('ûp) *II, be dark.*

Derivatives

- 1583a מוֹעָה (*mû'âp*) *gloom* (Isa 8:23).
 1583b מָעוּה (*mâ'ûp*) *gloom* (Isa 8:22).
 1583c תַּעֲקָה (*t'ûpâ*) *gloom* (Job 11:17).
 1583d עֵיפָה (*'êpâ*) *darkness*.

1584 עוֹץ ('ûṣ) *counsel, plan* (Jud 19:30; Isa 8:10).1585 עוֹקֵץ ('ûq) *crush*. Occurs only in the Hiphil, in Amos 2:13.

Derivatives

- 1585a עֲקָה ('âqâ) *pressure*. Occurs only in Ps 55:4.
 1585b מוֹעֲקָה (*mû'âqâ*) *compression, distress*. Occurs only in Ps 66:11.

1586 עָוַר ('āwar) *make blind*. Occurs only in the Piel.

Derivatives

- 1586a עָוַר ('iwwēr) *blind*.
 1586b עֲוָרוֹן ('iwwārôn) *blindness* (Deut 28:28; Zech 12:4).
 1586c עֲוָרֶת ('awweret) *blindness* (Lev 22:22).

'āwar is used infrequently and only in the Piel. It may be denominative from 'iwwēr “blind,” which in turn may be derived from 'ûr “skin” by referring to a cataract, i.e. a skin over the eye (BDB). 'āwar is used of both literal blinding (II Kgs 25:7; Jer 39:7; 52:11) and figurative blinding (Ex 23:8; Deut 16:13).

'iwwēr. *Blind.* (ASV, RSV similar.) While this word is an adjective it is generally used as a

substantive—the blind. Blindness was common and serious in the ancient near east and even until recent times (cf. Jesus' frequent confrontation by the blind).

This word is used both literally and metaphorically. The former is clearly indicated in the case of blind animals which could not be accepted as sacrifices (Deut 15:21; Mal 1:8). A blind person was disqualified from the Aaronic priesthood (Lev 21:18). The blind and the lame were sufficiently strong, claimed the Jebusites, to ward off David's effort to take Jerusalem, because of its strategic location (II Sam 5:6, 8). The law had provisions for the protection of the blind (Lev 19:14; Deut 27:18).

While blindness is traceable in some instances to the Lord (Ex 4:11; Zeph 1:17), it is also he who heals the blind and restores sight (Ps 146:8). Blindness is one of the curses that Israel could expect if she broke the covenant (Deut 28:29).

Metaphorically this word can designate a helpless and morally insensitive person. False prophets (Isa 56:10; Lam 4:4) and the nation of Israel (Isa 42:19; 43:8) are characterized as blind. Israel laments its blind condition (Isa 59:10). The promise of the restoration of the remnant includes God's leading the blind in their return to Zion and restoring their sight (Isa 29:18; 35:5; 42:16; Jer 31:8).

A significant use of this word is found in the promise that the Suffering Servant will give sight to the blind (Isa 42:7), gloriously fulfilled in Jesus Christ, who gives both physical and spiritual sight.

Bibliography: TDNT, VIII, pp. 279–85.

C.S.

1587 עִיר ('îr) *I, rouse oneself, awake, incite.*

Derivative

- 1587a עִיר ('îr) *excitement*.

This verb appears in the active, passive, intensive, and the causative with minimal differences. The latter frequently has God as its subject, showing his involvement in the flow of history.

Ugaritic 'r in its causative stem means “to arouse” and Akkadian êru “awake.”

Inanimate objects can be addressed and be told to awake: idol (Hab 2:19), sword (Zech 13:7), spear (II Sam 23:18), wind (Song 4:16), fire (Hos 7:4), storm (Jer 25:32), scourge (Isa 10:26), dawn (Ps 57:8 [H 9]), and harp and lyre (Ps 57:8 [H 9]).

Qualities can be awakened and incited: love (Song 2:7; 3:5; 8:4), strife (Prov 10:12), wrath (78:38), might (Ps 80:2 [H 3]), and a cry of anguish (Isa 15:5).

Sheol is pictured figuratively as arousing the shades when the fallen king of Babylon joins them (Isa 14:9).

This word is also predicated of man. He can be awakened from sleep (Zech 4:1), but he cannot be aroused from the sleep of death (Job 14:12 cf. *qîš* "awake"). Man can arouse himself to praise (Ps 57:8 [H 9]) and incite himself to action (Job 17:8).

Military endeavors are described by this word. Babylon is seen by Jeremiah as stirring, preparing to move against Judah (Jer 6:22; 50:41). The king of the north stirs up his power and courage against the king of the south (Dan 11:2, 25). Deborah is urged to awake, to awake and sing a song in the struggle against Sisera (Jud 5:12).

With the negative this word is used to show spiritual inertia. Isaiah has the exiles confessing that they had failed to pray, that they had not awakened themselves, remaining in spiritual lethargy. Hence God had hidden his face (Isa 64:7). Man needs to arouse himself in areas of prayer and praise (Ps 57:8 [H 57:9]).

By far the most significant use of this word is in the causative with God as its subject. Here one sees the active involvement of God in history. He is not aloof or passive. He is not simply a spectator. He is in complete charge, manipulating his plan. All his actions are purposeful. Events do not happen by chance. This emphasis is clearly discernible in the OT passages which use this verb in the causative with God as subject. Tilgath-pilneser, king of Assyria, was stirred up by the Lord against the tribes in the Transjordan area (I Chr 5:26). He aroused the Babylonians against Jerusalem (Ezk 23:22). Then he stirred up the Medes against Babylon (Isa 13:17; Jer 50:9, 11; 51:11).

Again it was the Lord who incited Cyrus to allow the Jewish exiles to return to Judah (II Chr 36:22; Ezr 1:1) and who in turn urged the exiles to return (Joel 3:7 [H 4:7]). When apathy had overtaken the returned exiles, the Lord agitated Zerubbabel and Joshua through the prophets Haggai and Zechariah to carry the construction of the second temple to its completion (Hag 1:14).

There is also a personal appeal to God to arouse himself, particularly in the Psalms. At times, God appears to man to be inactive, apathetic, at least slow. Hence he urges him to action. In Ps 7:6 [H 7] the psalmist wants God to arise to justice. God appears to be sleeping, and is urged to awake and bring deliverance (Pss 44:23 [H 24]; 59:4 [H 5]). He is requested to stir up his might (Ps 80:2 [H 3]) and to use his arm (power) on behalf of the nation (Isa 51:9).

C.S.

1588 עור ('ûr) II, *be exposed, laid bare*.

Derivatives

1588a קָעַר (mā'ôr) *nakedness* (Hab 2:15).1588b פָּרָם ('êrôm), עָרָם ('êrôm) *naked* (adjective), *nakedness* (noun).1588c פָּרוֹם ('ârôm), עָרָם ('ârôm) *naked*.1588d מַעֲרָם (ma'ârôm) *naked thing* (II Chr 28:15).

The verb 'ûr II occurs only in Hab 3:9. It is probably the root of the above nouns, and possibly it is a by-form of 'ârâ "be naked," cf. 'ârar.

'êrôm. *Naked, nakedness*. (ASV and RSV similar.) 'êrôm is used ten times to designate spiritual and physical nakedness. As used of Adam and Eve (Gen 3:7, 10, 11), it indicates more than sex consciousness. It depicts an awareness of the openness of their guilt to God. Their relationship with God was impaired, upsetting their relationship to each other. In Ezk 16:7, 22, 29; 23:29 and Deut 12:29 this word is used of the personified Jerusalem, indicating both her material and spiritual poverty. Used in Ezk 18:7, 16 to indicate proper social concern of righteous in providing clothes for needy.

'ârôm. *Naked*. (ASV and RSV similar.) This word is either derived from 'ûr II, "be exposed" and thus would be a secondary form of 'êrôm "naked" or it is from the root 'ârâ "be naked" (q.v.), probably a by-form. While this word frequently indicates nudity (Gen 2:25; I Sam 19:24; Isa 20:2; Mic 1:8) it also indicates exposure, i.e. lack of concealment and disguise (Job 26:6) and lack of resources (Amos 2:16).

Frequently the nudity indicated by this term has a symbolic meaning. Adam and Eve's lack of embarrassment at their nakedness suggests innocence (Gen 2:25). Isaiah walked (a verb frequently used with 'ârôm) naked (probably not complete nudity but simply the laying aside of the upper garment; see KD on Isa 20) as a portent of Egyptian prisoners being led away by the victorious Assyrians (Isa 20:2, 3, 4). In I Sam 19:24 Saul likewise was probably not naked, but divested of his royal robes and especially of his sword by the power of the Spirit of God so that David could get away in safety. The nakedness of the poor is an indication of oppression (Job 24:7, 10; Isa 58:7). His outer garment had been taken as collateral (Job 24:9) and not returned at night (Ex 22:25, 26, 27 [H 26, 27, 28]). Hosea 2:3 may allude to a custom mentioned in the Nuzi tablets in which children are called upon to strip their mother when she is dismissed for adultery. So the Lord would do to his adulterous wife, Israel.

This word also indicates a lack of resources. Job, following his affliction by Satan, now reduced to nothing, observes that it was thus when he left his mother's womb and would be the same when he returned to the womb of the earth (Job 1:21=Ecl 5:15 [H 14]). Amos 2:6 depicts a man stripped of his resources of courage when he faces the divine visitation.

A most interesting use of this word is the affir-

mation that Sheol is naked before God, i.e., within range of God's jurisdiction and interest (Job 26:6; cf. Ps 139:7, 8; Prov 15:11; Amos 9:2). God's knowledge and concern extend even to the realm of the dead.

C.S.

1589 עֹר ('wr) III. Assumed root of the following.

1589a עֹרָה ('ôr) *skin, hide*. (ASV, RSV similar.) This word is used both of men's and animals' skins.

It indicates the skin of man fifty-five times. While it can designate the outer covering of the body (Job 10:11; Lam 3:4; Ezk 37:6, 8), it also at times is used metonymically to indicate the whole body (Ex 22:27 [H 26]; Job 19:26). Various characteristics of the skin are mentioned. Men cannot change its color (Jer 13:23). After talking with God on Mount Sinai, the skin of Moses' face shone (Ex 34:29, 30, 35). The skin can be darkened and hardened by disease (Job 7:5; 30:30; Lam 4:8; 5:10). An abnormal skin disease, called leprosy, but probably including various contagious diseases characterized by skin rash, is discussed at great length in Lev 13:1-46 (see *šā-ra'at*). To flay or tear the skin of man is used metaphorically in Mic 3:2, 3 to indicate mistreatment of the people of Israel by their rulers. Two interesting uses of skin are found in Job. The expression "skin for skin" (Job 2:4) seems to be a barter term, while "by the skin of my teeth" (gums? Job 19:20) may indicate a very narrow escape.

This word is used forty-four times to indicate the skin of an animal. With the exception of the harpooning of the skin of leviathan (Job 41:7 [H 40:31]) this word always designates the hide of animals after skinning. These hides were used for garments (Gen 3:21; II Kgs 1:8). Such garments could be "diseased" probably mildewed (Lev 13:51), and therefore were to be burned. Hides were also used as coverings; for the tabernacle (Ex 25:5), and also for the ark and the sacred utensils (Num 4:6).

The hides of sacrificed animals were disposed of variously depending upon the kind of sacrifice. The hides of the sin offering for the priest or the whole community were to be destroyed (Ex 29:14; Lev 4:11, 21; 8:17; 9:11; 16:27). The hides of other sin offerings and the burnt offering were assigned to the priests (Lev 5:13; 7:8).

C.S.

עִוְרֹן ('iwwārôn). See no. 1586b.

עֹוֶרֶת ('awweret). See no. 1586c.

1590 עֹשׂ ('ūsh) *lend aid, come to help* (Joel 4:11).

1591 *עָוָה ('āwat) *bend, make crooked, pervert*. (ASV, RSV similar with the former using such synonyms as "subvert" and "overthrow.") Used only in the intensive conjugations.

Derivative

1591a עֲוָתָה ('awwātā) *subversion*, used only in Lam 3:59 where it designates a "wrong" produced by the deprivation of justice.

The basic meaning of this verb is seen in Eccl 12 where characteristics of the elderly are listed. The legs (strong men) of the old "bend themselves," i.e. are shaky and unreliable (Eccl 12:3).

The remaining references are figurative and have a moral dimension. In Amos 8:5 this word pertains to dishonest business transactions, where scales are falsified so as to secure more money while giving less grain.

In Job this word is involved in the basic contention of the dialogues. Bildad (Job 8:3) and Elihu (Job 34:12) contend that Job has sinned and hence he deserves his sufferings. They argue, to contend, as does Job, that he is innocent, is to accuse God of perverting justice. Job concurs that his suffering is from God (he is unaware of Satan's involvement) but since he is convinced of his innocence, he concludes that God has perverted his rights (Job 19:6). There simply is no justice (Job 19:7), he contends.

The pessimism of Ecclesiastes stands out in its use of this word. What is crooked and what God has made crooked (Eccl 1:15; 7:13) cannot be straightened. What is crooked can no more be straightened than what is lacking can be counted. Man cannot change the divine order of the world.

Recognizing that God is opposed to the perversion of justice (Lam 3:36), the psalmist appeals to God because his rights were subverted by the godless (Ps 119:78). While the Lord cares for the oppressed, he makes crooked the way of the wicked, so that it leads to ruin.

C.S.

1592 עֹוֹת ('ūt). Occurs only in Isa 50:4, in phrase *lāda'at lā'ūt*, perhaps meaning "to help."

עֲוָתָה ('awwātā). See no. 1591a.

עָז ('āz). See nos. 1596a, b.

עָז ('ēz). See no. 1654a.

1593 עָזָזֵל ('āzā'zēl) *Azazel*. (ASV and RSV use "Azazel," but the former allows for the translation "removal" in the margin.)

This word appears four times in the OT, all in Lev 16 (8, 10, 26) where the ritual for the Day of

Atonement is described. After the priest has made atonement for himself and his house, he is to take two goats on behalf of Israel. One is to be a sacrifice to the Lord, the other is to be the "scape goat," i.e. the goat for Azazel. In all four appearances of this word, it has the preposition "to" attached to it.

This word has been variously understood and translated. The versions (LXX, Symmachus, Theodotian and the Vulgate) have understood it to stand for the "goat that departs," considering it to be derived from two Hebrew words: 'ēz "goat" and 'āzal "turn off."

By associating it with the Arabic word 'azāla "banish," "remove," it has been rendered "for entire removal" (IDB loc. cit.).

The rabbinic interpretation has generally considered this word to designate the place to which the goat was sent: a desert, a solitary place, or the height from which the goat was thrown (cf. Lev 16:22).

The final possibility is to regard this word as designating a personal being so as to balance the word "Lord." In this way Azazel could be an evil spirit (Enoch 8:1; 10:4; cf. II Chr 11:15; Isa 34:14; Rev 18:2) or even the devil himself (KD loc. cit.), standing logically in antithesis to Lord. However the Enoch references to Azazel as a demon are doubtless dependent on the author's own interpretation of Lev 16 and Gen 6:4. Some who adopt this demon reference of Lev 16 also consider the passage to be of late authorship (P document).

The actual use and meaning of this word in Lev 16 is at best uncertain. However, regardless of its precise meaning, the significant dimension is the removal of the sins of the nation by the imposition of them on the goat. In this passage sin seems to be hypostatized and therefore readily transferrable to the goat. Indeed vss 21 and 22 state that this goat is to bear away the sin of the people. Such a ritual would illustrate vividly the physical removal of defilement from the camp to a solitary place where it would no longer infest the nation.

A parallel to the scapegoat can be seen in the ritual for a recovered leper. Two birds were selected. One was to be killed and both the leper and the living bird were to be touched with its blood. Then the living bird was released. This bird carried away the evil, the leprosy itself, into the open field and then the leper was pronounced clean (Lev 14:1-9).

There is also a parallel for this scapegoat in Babylonian ritual. In the New Year's Day Festival a slain sheep was removed and cast into the river. The person who carried out this assignment was considered unclean as was the person who released the goat in the wilderness (Lev 16:26).

This concept of the removal of guilt can be

seen in Ps 103:12 where God "removes" our transgressions from us.

In the NT John the Baptist identified Jesus as the Lamb of God which takes away the sins of the world (Jn 1:29, 36). This language is sacrificial, yet nowhere in the Law is a lamb spoken of as a bearer of the people's sins. The paschal lamb is not a sin offering. The description of the Savior as a lamb is unknown to late Judaism. Furthermore, the phrase "the lamb of God" is an unparalleled genitive combination. John may have had in mind that Christ as the paschal lamb bespeaks our great deliverance from the bondage of sin. However, what seems more likely is that he had a complex of ideas in mind. Some words of Isa 53 are discernible here: "as a sheep led to the slaughter, and a lamb dumb before his shearers . . . whose soul was made a guilt offering . . . and who bore the sin of many." But also discernible here is an allusion to the scapegoat. This fact is clearly seen in the words "taketh away" (cf. I Jn 3:5). In Christ are consummated all the atonement concepts of the OT.

C.S.

1594 עֲזַב ('āzab) *I, leave, forsake, loose.* (ASV, rsv translate similarly.)

Derivatives

1594a עֲזָבָה ('āzūbā) *forsakenness, desolation* (Isa 6:12; 17:9: a desolate place).

1594b עֲזָבוֹ ('izzābôn) *wares.*

The verb 'āzab appears primarily in the Qal (active) and only limitedly in the Niphal and Pual (passive). The word also occurs in Akkadian (*ezēbu*). Arabic has 'zb "to be distant" and 'azab "single," "unmarried." 'zb in Ex 23:5; I Chr 16:37; Neh 3:8 may be a second root, 'zb II, attested in Old South Arabic 'db "to restore, repair," and in Ugaritic 'db "to make, prepare, set," (UT 19: no. 1818). See U. Cassuto, *A Commentary on the Book of Exodus*, 1967, p. 297; cf. M. Dahood, JBL 78: 303-309 for Job 9:27; 10:1; 18:4; 20:19; 39:14.

The basic meaning of 'āzab is clearly seen in its literal use where it has three distinct emphases: to depart, to abandon, and to loose. Persons (Gen 44:22; Num 10:30; Ruth 1:16; II Kgs 4:30), places (II Kgs 8:6; Jer 18:14; 25:38) and objects (Gen 39:12-13; 50:8; Ex 9:21) can be left behind. To leave can mean to entrust (Gen 39:6; Job 39:11), to expose (Job 39:14), to permit (Ruth 2:16), to allow to continue as is (Josh 8:17; II Chr 24:25; Ezk 23:29), to neglect (Deut 12:9; 14:27; Job 20:19), to put aside (Job 9:27), and to release (Job 10:1) but see Dahood above for the meaning "arrange my complaint."

This word is also used figuratively with man as

the subject. He can forsake, i.e. apostatize. Israel is indicted for this on numerous occasions (Deut 28:20; 31:16; Jud 10:10; Jer 1:16). In forsaking the Lord and following after idols she was guilty of breaking the covenant (Jon 2:8 [H 9]; Deut 29:24; I Kgs 19:10, 14) and of adultery (Hos 4:10). Further this backsliding was evidenced by her forsaking the temple (II Chr 24:18; cf. Neh 10:39 [H 40]).

With man still the subject, this verb is also used to indicate the abandonment of virtuous qualities. Rehoboam forsook the good counsel of the old men for the poor advice of the young men (I Kgs 12:8, 13=II Chr 10:8, 13). But this use is best illustrated in Proverbs. The way of righteousness (2:13; 15:10), wisdom (4:2, 6), reproof (10:17), loyalty and faithfulness (3:3) can be forsaken. The psalmist complains that his strength (Ps 38:10 [H 11]) and his courage (Ps 40:12 [H 13]) have failed.

It is also possible for man to forsake undesirable qualities. To confess and forsake sin is to obtain mercy (Prov 28:13). The wicked are urged to forsake their style of life (Isa 55:7). The righteous are instructed to forsake wrath and anger (Ps 37:8).

God can also be the subject of this verb with man as the object. The promise is that God will never forsake the righteous by allowing him to fall into the hands of the wicked (Ps 37:25, 33). The poor and the oppressed, in spite of their plight, have not been forsaken by the Lord (Ps 9:10 [H 11]; Isa 41:17). In Ps 22 the psalmist is convinced that God has forsaken him because of his dire circumstances but then concludes the psalm with a triumphant note, proclaiming God's faithfulness (Ps 22:1 [H 2]; cf. Mt 27:46). It may be suggested that God had indeed not forsaken his son in his personal relation, but as the parallel line in Ps 22:1 shows, had forsaken him from the suffering. The cry from the cross quotes 'āzab in the Aramaic translation *shābaq*.

Of particular interest here is the promise of God to David. Even if his children forsake the divine law, God will not violate his covenant with the Davidic dynasty (Ps 89:30-37 [H 31-38]). However, the Chronicler reminds the nation that if they forsake God, he will forsake them (II Chr 12:1, 5; 15:2). An excellent illustration of this as it pertains to the individual is Hezekiah whom God forsook "in the matter of the envoys of the princes of Babylon" so as "to try him and know all that was in his heart" (II Chr 32:31).

C.S.

- 1595 אָבַד ('āzab) *II, restore, repair* (Neh 3:8, only).

עֲזָבוֹ ('izzābôn). See no. 1594b.

עֲזָבָה ('āzābā). See no. 1594a.

עָזַז ('ēzūz). See no. 1596c.

עִזְזָה ('izzūz). See no. 1596d.

- 1596 אָזַז ('āzaz) *be strong*. (ASV, RSV similar, except in Ps 52:7 [H 9] where RSV reads 'ūz "take refuge.")

Derivatives

1596a אָזַז ('az) *strong*.

1596b אָזַז ('ōz) *strength*.

1596c עָזַז ('ēzūz) *strength, might, fierceness*.

1596d עִזְזָה ('izzūz) *mighty, powerful*.

1596e עֲזָבָה ('ōzniyā) *osprey*.

The verb 'āzaz can be predicated of both God and man. When used of God, it generally occurs in a petition for him to show his strength since he is already inherently strong. In the Hiphil (causative) it is used only of man in a negative sense.

When used of man, this word carries the idea of prevailing as in a war or struggle (Jud 3:10; 6:2; Dan 11:12; cf. UT 19: no. 1835) or as being belligerent, particularly to God. The psalmist prays that man (parallel to *goyim*, the pagans) might not prevail, but that God will arise against him in defense of his own (Ps 9:19 [H 20]). This act of defiance is seen in the strong man who chooses to trust in his riches and to strengthen himself in his [evil] desire rather than to strengthen himself in God.

That which strengthens man is wisdom—even more than the multiplication of human strength (Eccl 7:19).

The psalmist recognizes that God is inherently powerful (Ps 89:13 [H 14]) and therefore prays that he will show that strength against the enemies of his people (Ps 68:28 [H 28]). God demonstrated his strength at creation when he made firm (established) the fountains of the deep in the sense that he restrained them (Prov 8:28) (see 'ayin).

'az. *Strong, mighty, fierce*. (ASV, RSV similar except in Num 21:24 when RSV reads this word as a location, Jazer.) Used twenty-three times but never applied to God. Used of animals: ants (Prov 30:25 "not strong"), lion (Jud 14:14, 18) and dog (Isa 56:11). Applied to forces of nature: wind (Ex 14:21) and water (Neh 9:11; Isa 43:16). It is used of qualities: love (Song 8:6); wrath (Gen 49:7; Prov 21:4); and impudence ("strong countenance," Deut 28:50; Dan 8:23). When applied to people it seems invariably to denote enemies.

'ōz. *Strength, power*. (ASV, RSV are similar.) This word is used primarily of deity, particularly in the Psalms. Synonyms are: *hayil* meaning (physical) strength, efficiency, army; *kōaḥ* meaning strength, power; and *g'burā*, meaning strength, might, particularly of warriors.

Since Hebrew does not lend itself to the abstract, the concept of strength is expressed in picturesque ways.

Material and physical strength can be indicated by this word. In Jud 5:1, it is descriptive of a tower; in Isa 26:1, of a city. Used with face (Eccl 8:1) it clearly means "stern." It can be descriptive of actions: dancing (II Sam 6:14), rejoicing (I Chr 13:8), and singing (II Chr 30:21). To "gird the loins with strength" is to work industriously (Prov 31:17). Used with rain it indicates torrents of drenching rain (Job 37:6). This word is also used with "scepter" to depict political power (Jer 48:17, of Moab; Ezk 19:11, 12, 14, of Zedekiah; Ps 110:2, messianic; cf. Ps 2:9; 99:4).

Primarily this word is related to God. Strength is an essential attribute of God (Pss 62:11 [H 12]; 63:2 [H 3]), his voice (Ps 68:33 [H 34]) and his arm (Isa 62:8; cf. Isa 51:9; Ps 89:10 [H 11]) are mighty. While the ark is a symbol of his power (II Chr 6:41; Ps 78:61; 132:8; cf. Num 10:35, 36), it is also observable in the skies (Ps 150:1).

God bestows strength on man: the king (I Sam 2:10), his people (Ps 29:11; 68:35 [H 36]), and on Zion (Isa 52:1). But not only is strength a quality given by God, he himself is that strength. Frequently the personal possessive pronouns are attached to strength in the Psalms to show this (Ps 28:7; 81:1 [H 2]; 118:14). In seeking his presence, strength is found (Ps 105:4=I Chr 16:11).

God exercises this strength on behalf of his people against their foes. This is particularly well illustrated in the Exodus (Ex 15:13).

This word is used figuratively to describe the security enjoyed by the righteous. The Lord is a strong tower against the enemy (Ps 61:3 [H 4]) and a mighty rock (Ps 62:7 [H 8]). His name (i.e. person) is the strong tower in which the righteous are safe (Prov 18:10). The impartation of his strength, made the psalmist secure as a strong mountain (Ps 30:7 [H 8]). Zion is a strong city because it is surrounded not only by material walls but also by his salvation (Isa 26:1).

The strength of the Lord is to be a common theme of our praise. We are to ascribe strength to him. We are to recognize his glorious might and to praise him for it (Ps 29:1; 96:7; I Chr 16:28).

Thus in hymns of praise God's strength shows itself as his overwhelming majesty, and in the laments it appears as his helping protection.

Dahood translates this word three times as "praise" (Ps 29:1; 68:34 [H 35] and 96:7). Note the LXX and NT use of "praise" in Ps 8:2 [H 3] and Mt 21:16.

Bibliography: THAT, II, pp. 252–55.

C.S.

1598 עָזַר ('āzar) *I, help, support.* (ASV, RSV translate similarly.)

Derivatives

1598a עָזַר ('ēzer) *help.*

1598b עֲזָרָה ('ezrâ) *help.*

Apart from Akkadian and Ethiopic, this root ('*dr*') occurs in all the Semitic languages. Thus, for example, in Ugaritic '*dr*' means "to rescue/save" (UT 19: no. 1831). In Old South Arabic it means "to excuse." (Akkadian *izirtu* "help" in the Tel Amarna correspondence is a Canaanism.) As in the Bible, it is especially well attested in numerous personal names: Hadididri, Asarya, Isra, etc.

Used approximately eighty times in the OT, '*āzar*' generally indicates military assistance. Illustrative of this is the use of this word with Egypt. Egypt will fall in spite of her supporters. In fact, these allies will fall with her (Ezk 30:8; 32:21). Further, Egypt's military assistance for Judah is worthless and the prophet condemns reliance on it (Isa 30:7; 31:3).

'*āzar* used in compound with the divine name (either El or Yah) forms several proper names: Azarel ("God has helped"), Azriel ("My help is God"), Azariah ("The Lord has helped") and Ezra ("help," but possibly from a form meaning "the Lord helps"), and cf. Ebenezer ("stone of help").

Divine assistance is frequently of a military nature. Ahaz, after his defeat by Damascus, turned to their gods, convinced that they had helped Damascus defeat him (II Chr 28:23). David's army received additional recruits from Benjamin and Judah because they were aware of the divine assistance which David experienced in his struggle with Saul (II Chr 12:18). Asa is divinely assisted against Egypt (II Chr 14:10; Uziah, against Philistia and other nations (II Chr 26:7, 13); and Amaziah, against Edom (II Chr 25:8). The Chronicler is particularly conscious of God's military assistance.

While the historical setting is not always certain, the Psalms also reflect God's military assistance. Jerusalem, perhaps in the 8th century, is delivered from Sennacherib by God's help (Ps 46:5 [H 6]). This psalm also possibly has some eschatological emphasis. Following an unidentified assault upon Judah, the psalmist prays for God's help (Ps 79:9).

The matter of military assistance is seen in the familiar eschatological passage of Isa 63:5. God in his wrath and vindication against the nations has no human assistance. He looked about for human aid but finding none, he consummated the day of vengeance himself. There was no human instrument as God had used on other occasions. While some have seen the redemptive work of

1597 *עָזַק ('āzaq) *dig about.* Occurs only in the Piel, in Isa 5:2.

Christ in this passage, it is not likely. A more likely counterpart in the NT is the defeat of the beast in Rev 19:11 where again the military character is clearly seen in Christ's work of judgment.

Assistance to the nation of Israel is a common theme in Isaiah (41:10, 13, 14; 44:2; 49:8; 59:7, 9). Again the picture here has a military nature. Because of God's aid, Israel will be successful in overcoming her foes.

Personal assistance, non-military in character, is found particularly in Psalms. The Lord is seen as the helper of the underprivileged: the poor (Ps 72:12) and the fatherless (Ps 10:14; cf. Job 29:12). The psalmist confesses that he has no help but God (Pss 22:11 [H 12]; 107:12). He is conscious of divine assistance at a time of illness (Ps 28:7), at a time of oppression by enemies (Ps 54:4 [H 6]), and at a time of great personal distress (Ps 86:17). God's hand (Ps 119:173) and his laws (Ps 119:175) were sources of assistance to the psalmist. It is the righteous who can anticipate God's aid (Ps 37:40).

'ēzer I. Help, support, helper. (ASV, RSV similar except in Ps 89:19 [H 20] where the RSV reads *nēzer* and hence translates "crown.") While this word designates assistance, it is more frequently used in a concrete sense to designate the assistant. (Cf. Gen 2:18, 20 where Eve is created to be Adam's help[er].) As to the source of the help, this word is generally used to designate divine aid, particularly in Psalms (Cf. Ps 121:1, 2) where it includes both material and spiritual assistance.

'ezrā I. Help, support, assistance. (ASV, RSV similar.). The assistance specified by this word is either human or divine. The meaning is quite like the masc. form. Eight times (Jud 5:23; II Chr 28:21; Isa 20:6; 31:1-2; Jer 37:7; Lam 4:17; Nah 3:9), it denotes military aid which proves ineffective. When used of divine aid, it is found in an affirmation (Pss 22:19 [H 20]; 27:9; 40:17 [H 18]) or in a plea (Ps 35:2; 44:26 [H 27]) with the gravity of the request shown by a cry for haste (Pss 22:19 [H 20]; Ps 38:22 [H 23]; 40:13 [H 14]; 70:1 [H 2]; 71:12). In such conditions, man's help is futile (Ps 60:11 [H 13]; 108:12 [H 13]).

Bibliography: THAT, II, pp. 256-58.

C.S.

1599 עֶזֶר ('ēzr) II. Assumed root of the following.

1599a עֲזָרָה ('āzārā) *enclosure* (e.g. Ezk 43:14; II Chr 4:9).

1600 עֶט ('ēṭ) *stylus* (e.g. Jer 17:1; Job 19:24).

Derivation uncertain.

1601 אָטַח ('āṭā) I, *enwrap, cover*. (ASV, RSV similar.)

Derivative

1601a אָטַח (ma'āṭeh) *wrap, mantle*. Occurs only in Isa 61:3, a "mantle of praise."

The ASV and RSV differ in two instances. In Jer 43:12, the RSV reads "delouse," following the LXX. In Song 1:7, the RSV understands the root to be *ṭā'ā* and hence reads it "wander." A synonym (frequently in parallel relationship with *'āṭā*) that should be noted is *lābash* meaning "to clothe."

The basic meaning of *'āṭā* is seen in I Sam 28:14 where the elderly Samuel is wrapped in a robe. This concept is also seen in its figurative use. God wraps himself in fury so as to prepare himself as a warrior to protect his community (Isa 59:17) and he also covers himself with light as with a garment (Ps 104:2).

This word is also used in the causative. Ps 84:7 states that the rain "covers" the land with pools. The psalmist laments that God has covered his anointed with shame (Ps 89:46) because of sin. Jerusalem (cf. Isa 49:18; 52:1) or the Servant rejoices even as a bridegroom and bride on their wedding day because God has covered her (him) with the robe of righteousness, which phrase is further defined by the parallel "clothed me with garments of salvation" (Isa 61:10). Of significance here is the fact that it is God who provides this covering of righteousness. Man cannot so clothe himself. However, he can be aware of it, rejoice in it, and sing over it.

C.S.

1602 אָטַח ('āṭā) II, *grasp*. Occurs only in Isa 22:17, possibly in Ezk 21:15 [H 20].

אָטִין ('āṭin). See no. 1604a.

אָטִישָׁה ('āṭishā). See no. 1609a.

1603 אָטַלְלָה ('āṭallēp) *bat* (Lev 11:19=Deut 14:18; Isa 2:20).

1604 אָטִין ('āṭin). Assumed root of the following.

1604a אָטִין ('āṭin) *pail, bucket* (Job 21:24).

1605 אָטַח ('āṭap) I, *turn aside*. Occurs only in Job 23:9.

1606 אָטַח ('āṭap) II, *envelop oneself*.

Derivative

1606a אָטַחְסָה (ma'āṭāpā) *overtunic* (Isa 3:22).

1607 אָטַח ('āṭap) III, *be feeble, faint, grow weak*. (ASV, RSV similar except the former prefers the word "overwhelm" while the latter uses "faint." A difference is also

seen in Isa 57:16 where the rsv follows the LXX and renders this word as "proceed." Arabic *ʿatāba* means "to flag, be feeble." This word can pertain to physical exhaustion or the languishing of man's innermost being.

It is descriptive of cattle, i.e. feeble cattle, which Jacob ignored when he developed his own flock (Gen 30:42). This word is also used to describe the children of Jerusalem who fainted due to weakness from lack of food during the Babylonian siege (Lam 2:11, 12, 19).

Used as subjects of this verb are soul (Ps 107:5; Jon 2:7 [H 8]), heart (Ps 61:2 [H 3]), and spirit (Ps 77:3 [H 4]; 142:3 [H 4]; 143:4; Isa 57:16). Not only can man be overwhelmed with physical exhaustion, his innermost being can also languish.

This term is descriptive of the individual when he observes his circumstances and then becomes aware of his separation from God. As a result he is overwhelmed. This was true of Jonah in the belly of the fish (Jon 2:7 [H 8]), of a lonely imprisoned man (Ps 142) and of a man totally crushed by his enemy (Ps 143). This recognition of weakness is invariably in a prayer when there is also a petition for divine assistance. The human resources of strength being exhausted, the psalmist petitions God for his help.

C.S.

1608 עָטַר ('āṭar) *surround* (I Sam 23:26; Ps 5:13, only).

Derivatives

1608a עֲטָרָה ('āṭārā) *crown, wreath*.

1608b *עָטַר ('āṭar) *to crown, to give a crown*. Used in the Piel and Hiphil.

'āṭārā. Crown. This word, a general term for crown, should be distinguished from *nēzer*, the royal and priestly crown.

'āṭārā can designate the crown of the queen (Jer 13:18), the nobility (Est 8:15) or the bridegroom (Song 3:11). While the crown could be made of gold and silver (Ps 21:3 [H 4]; Zech 6:11), it could also be a garland of flowers (Ezk 23:42).

By far the most significant use of this word is the figurative. It is used metaphorically to show honor and authority. This is seen particularly in Proverbs where grey hair (16:31), grandchildren (17:6), good wife (12:4), and wisdom (4:9; 14:24) are considered a crown. The ultimate metaphor is found in Isa 28:5 where it is the Lord who will be the crown of the remnant! He will bless them and be their pride (cf. Ezk 16:12).

This same metaphor is used when the emphasis is negative, the crown is removed.

In Zech 6:11, the prophet is commanded to take the gold and silver brought by the remnant

from exile and make a crown (Hebrew is plural, perhaps to indicate the superlative, the ultimate crown), and to place it upon the head of Joshua, the priest. This crown is then to be kept in the temple (6:14). This crowning is symbolic of the Messiah (see *šemah*). By receiving the royal crown, Joshua indicates that in Jesus Christ both the priestly and the royal offices are combined. He alone can wear that crown!

C.S.

1609 עָטַשׁ ('īsh). **Assumed root of the following.**

1609a עָטִישָׁה ('āṭishā) *sneezing* (Job 41:10).

עִי ('i). See no. 1577d.

1610 עִי ('it) *scream, shriek*. Occurs only in I Sam 25:14.

Derivatives

1610a עֵיט ('ayit) *bird of prey* (e.g. Gen 15:11; Job 28:7).

1610b עִיט ('it) *dart greedily* (like a bird of prey. Denominative verb (I Sam 14:32; 15:19).

1611 עָיַם ('āyām) *glow* (Isa 11:15). Meaning and derivation dubious.

1612 עֵינַי ('in) *to eye*. Denominative verb (I Sam 18:9).

Parent Noun

1612a עֵינַי ('ayin) *I, eye*. This is a general Semitic term and may also mean "source" (see 'ayin II). In Ugaritic 'yn means "to behold" (UT 19: no. 1846).

More than the eye itself is implied by this word. Occasionally it represents the whole process of seeing and by extension, of understanding and obedience (Jer 5:21). However, in the OT it is the ear which is generally used in this figurative way. The eye is used to express knowledge, character, attitude, inclination, opinion, passion, and response. The eye is a good barometer of the inner thoughts of man.

Of all the physical organs of the body, the eye was considered one of the more important. If a master should destroy the eye of a slave, that slave was automatically released (Ex 21:26). Not only are eyes assigned to men (Lev 21:20; II Kgs 4:34), to beasts (Gen 39:41), to birds (Job 28:7; 39:29) but also to wheels (Ezk 1:18; 10:12, where they symbolize the all-seeing God), to a stone (Zech 3:9, where they represent facets; cf. Ex 10:15 "eye [surface] of the whole land") and to

idols which are unable to use them (Ps 115:5; 135:6).

Anthropomorphically eyes are attributed to God. His eyes are in every place, observing the good and evil (Prov 15:3). They focus throughout the whole earth to defend the righteous (II Chr 16:9) while they are upon the sinful to destroy them (Amos 9:8). Man can find favor in the eyes of the Lord (Gen 6:8). He can do right in his eyes (I Kgs 15:11) or evil (I Kgs 16:25). Man prays for God to open His eyes (II Kgs 19:16=Isa 37:17; Dan 9:18). When God hides his eyes, he ignores the prayers and needs of man (Isa 1:15). When he directs his eyes to man, he sustains and delivers him (Ps 33:18; 34:15 [H 16]).

The eyes are depicted as spiritual faculties. After eating the forbidden fruit, the eyes of Adam and Eve were opened. They had lost their innocence, now being aware of their nakedness both physical and spiritual (Gen 3:5, 7). The eyes can be blinded to God (Jer 5:21), can be blinded by God (Isa 6:10; 44:18) and can be opened by God (Num 22:31; II Kgs 6:17). The eyes looking to the Lord represent expectancy and confidence (Ps 133:2). The law of the Lord enlightens the eye (Ps 19:8 [H 9]; cf. I Sam 14:28 to enlighten is to invigorate and revive, Ezr 9:8; Ps 13:3 [H 4]).

Isaiah confessed that he had seen the Lord with his eyes (6:5). However, this privilege is generally restricted to an eschatological dimension (Isa 33:17; Ezk 38:23; cf. Rev 1:7).

The eyes are a mirror of man's inner being. The eyes reflect generosity (Prov 22:9, "good eye"), stinginess (Prov 23:6, "evil eye"), design (Ps 17:11), arrogance (Prov 6:17; Isa 2:11), humility (Job 22:29), mockery (Prov 30:17), pity (Ezk 16:5), and avarice (Eccl 4:8).

The phrase "in your eyes" is equivalent to opinion or judgment. In Judg each man did what was right in his own eyes (21:25). The fool is right in his own eyes (Prov 12:15). The temple had become a den of robbers in the eyes of the inhabitants of Jerusalem (Jer 7:11). Sarah had contempt for Hagar (Gen 16:4, 5) while Abraham had sorrow for Ishmael (Gen 21:11, 12).

The promise to preserve with special care is expressed by the phrase "apple of his eye" (Deut 32:10; Zech 2:8) which literally means pupil, but has now become an English idiom for what is precious.

C.S.

the RSV uses the word "spring." Both words, however, are similar in meaning.) Connection with 'ayin I uncertain.

Derivative

1613a עֵינָה (ma'yān) *spring*.

This word designates a flow of water from an opening in a hillside or valley. It should be distinguished from "well" or "cistern." Synonyms are *māqôr* also meaning fountain but used frequently in a figurative way and *ma'yān* meaning substantially the same as 'ayin.

The land of Canaan was described as "a good land, a land of brooks of water, of fountains ('ayin) and springs, flowing forth in valleys and hills." Jacob in blessing his sons, reserved one of his greatest blessings for Joseph (tribes of Ephraim and Manasseh), likening him to a fruitful bough by a spring (Gen 49:22). This perhaps refers to the "planting" of Manasseh and Ephraim in Canaan, suggesting their securing of fertile and significant territories. The association of springs with the deep is seen in Prov 8:28 where the phrase "fountains of the deep" also seems to suggest that the deep was the source of the fountains. The exact meaning of this verse is difficult. Following the LXX, it appears that it is the Lord who strengthened, i.e., established the fountains of the deep, fixing the boundaries of the sea. But in this passage, the bounds of the deep favor the interpretation "ocean" and the 'ayin *l' hōm* could merely mean surface of the deep. In Gen 7:11, presumably the reference is to suboceanic sources. In any event, Wisdom was already in existence at the time of this creative act of God.

Of significance is that which happened at these fountains. The nation of Israel found refreshment at the twelve springs of Elim (Ex 15:27; Num 33:9).

It was at the spring on the way to Shur (probably Beer-lahai-roi where both Abraham, Gen 20:1, and Isaac, Gen 25:11, dwelt) that Hagar witnessed a theophany (Gen 16:7-14). In later times the fountain was used figuratively of the Lord and as a symbol of His power to refresh.

The only figurative use of this word is found in Deut 33:28 where the phrase "fountain of Jacob" is parallel to Israel. Israel sprang from the patriarch Jacob, the father of the twelve tribes (cf. Ps 68:26 [H 27] where the word *māqôr* is used). The constant succession of Jacob's descendants would be as a stream ever welling forth fresh from its source.

C.S.

1613 עֵינָה ('ayin) II, *spring, fountain*. (The ASV generally translates "fountain," while

1614 עֵינָה ('ip) *be faint*. Probably a by-form of *yā'ēp*.

Derivative

1614a עָיֵפָה ('āyēp) *faint, exhausted, weary*. (ASV and RSV similar.)

Most frequently this word describes a physical exhaustion. It can be occasioned by hunger and great exertion such as was the case with Esau (Gen 25:29, 30), with Gideon's men (Jud 8:4, 5), with the nation of Israel (Deut 25:18), and with David and his men (II Sam 16:14; 17:29). It can also be used to represent a condition of extreme thirst whether actual (Job 22:7; Prov 25:25) or imaginary (Isa 29:8).

This word also is used figuratively. The psalmist, wandering in the desert land of Judah, realizes that his soul is in much the same parched condition as the land in which he wanders. Even as the dry land is thirsty for water, so the psalmist thirsts for God, the Fountain of Life (Ps 63:1 [H 2]). This metaphor of God as satisfying water is common to both the Old and New Testament, as is also the figure of man thirsting for God (Ps 143:6; Jer 31:25) even though he often substitutes something else (Jer 2:13).

C.S.

עִפָּה ('ēpā). See no. 1583d.

1615 עִיר ('ir) *city*. The root is found in numerous semitic languages (cf. Ugaritic 'r (from 'yr I) meaning "city" (UT 19: no. 1847). Derivation unknown.

'ir refers to a permanent settlement without reference to size or claims. None of our modern terms such as city, town, or village adequately convey the meaning or the mental picture contained in this word. Not only is there a difference between the modern and ancient city, there were differences between the ancient cities themselves, making definition even more difficult. The primary distinction between a city and a village (*hāšēr* and *bānōt*—the latter literally "daughters") is that the former 'ir generally had a wall. Frequent reference to the "gate" of the city where governmental functions were held, underscores the walled nature of cities. Elders of the cities are often mentioned who had some governmental functions. As early as Gilgamesh, cities in Mesopotamia had a council of elders whom the king had to consult before beginning a war. The villages were in an adjacent agricultural area of a city and were in turn dependent on the city for protection.

A. R. Hulst says that nothing certain can be said about its basic meaning; still one ought to think of some form of fortification in connection with 'ir (THAT, II, p. 267). Along side of cities fortified with high walls, gates and bars, Deut 3:5 mentions "unwalled towns" ('ārē happ'rāzī).

Here the protection must have been very limited. Strathmann notes that although the LXX usually translates 'ir by *pólis*, yet the Greek idea of "city" differs radically from that of Israel. In its developed use *pólis* has as its core meaning a political institution, whereas 'ir (cf. Greek *asty*) focused on a protected place. He wrote: "There is in the OT no trace whatever of the world of ideas which the Gks. associated with *πόλις*. . . ." The importance of cities [in Israel] lay in the resistance they could offer to aggressors because of their fortifications, in the protection they could give to their inhabitants" (TWOT, VII, p. 23).

Synonyms of this word are *qeret* and *qiryā*, both meaning city with little or no distinction in meaning from 'ir. However these two terms are chiefly used in poetic sections, with the former appearing exclusively in poetry. Further they are limited in use in contrast to 'ir which is used c. 1090 times.

The Bible represents urban civilization as having begun with Cain who built a city and named it after his son, Enoch. In the tables of the descendants of Noah (Gen 10) several cities are mentioned, cities which were built after the dispersion from the tower of Babel (Gen 11). Some scholars think on the basis of these two passages that there is an antipathy toward the city in Genesis (cf. G. Wallis, "Die Stadt in den Überlieferungen des Genesis," ZAW 78 (1966): 133–148). But Hulst argues that such a judgment is not true to the witness of the OT. Thus cities are a good gift of the LORD to Israel (Deut 6:10) and the sin in Genesis 11 is not the building of the city (THAT, II, p. 271). Cities continued to be prevalent in the scripture up to the very end of Revelation where the new Jerusalem is described (Rev 21 and 22).

Of significance for this article is the fact that cities have qualities of character. This is in part because the word "city" many times actually means "inhabitants." A city can cry (I Sam 4:13; 5:12) and it can be stirred (Ruth 1:19; cf. Mt 21:10). It can be characterized as righteous (Isa 1:26), faithful (Zech 8:3) and holy (Isa 48:2; 52:1; Neh 11:1, 18). All the above qualities are descriptive of Jerusalem. A city can experience joy (Jer 49:25), stimulate trust (Jer 5:17), and be renowned (Ezk 26:17). She can also have undesirable qualities. She can be proud (Zeph 2:15), oppressive (Zeph 3:1), and bloody (Ezk 22:2; 24:6, 9, of Jerusalem; Nah 3:1, of Nineveh). Cities as corporate societies are hence subject to the divine blessings and curses. They are established and destroyed depending upon their relationship to God. The security of the city is contingent upon God (Ps 127:1).

A familiar concept in the OT is the city of refuge. Six Levitical cities were appointed to receive and give asylum to the accidental man-

slayers. These cities represent an effort to prevent the shedding of innocent blood in the land (Deut 19:10). Their aim was to control blood revenge, allowing justice to intervene between the slayer and the avenger (cf. IDB loc. cit.) These cities are promised in Ex 21:13 and are projected as six in number in Num 35:6. In Deut 5:41–43 after the conquest of Transjordan the three eastern cities are named; in Deut 19:2 three more are projected for Canaan. Finally in Jos 20:7–8 after the conquest, all six cities are named. The progression of the narrative is most satisfactory if the Pentateuch be kept in its unity.

Bibliography: Feinberg, C. L., "The Cities of Refuge," BS 103:411–17; 104:35–48. TDNT, VI, pp. 522–29. THAT, II, pp. 268–71.

C.S.

1616 עֵיר ('yr) **Assumed root of the following.**

1616a עֵירָא ('ayir) **male ass.** (ASV, RSV similar.) 'r (from root 'yr II) in Ugaritic is an "ass," but in Egyptian it denotes "goat" (UT 19: no. 1848). C. H. Gordon notes that one word in Arabic may include "donkey" or "gazelle."

The ass had been domesticated centuries before the times of the Genesis patriarchs. Its varied uses in western Asia are clearly seen in the Bible: a riding animal (Jud 10:4; 12:14); a work animal (Gen 49:11; Isa 30:6, 24); a gift (Gen 32:15 [H 16]). Job 11:12 alludes to two well-known qualities of the ass: stupidity and obstinacy. The most interesting reference is Zech 9:9 where the Messiah is pictured as riding upon a mule (cf. Mt 21:1–7 and John 12:14), entering Jerusalem as a victorious king. That such a ceremony was part of a coronation is suggested by David's directions to Solomon to assure him of the crown: he was to ride on the king's mule down to Gihon then up into Jerusalem (I Kgs 1:33, 38, 44–45).

C.S.

עֵיר ('ir). See no. 1587a.

עֵירוֹם ('ērōm). See no. 1588b.

1617 עֵישׁ ('ayish) **Arcturus** (ASV and RSV the Bear).

Heavenly constellation of which the brilliant star Arcturus is the most easily identified. Occurs only in Job 9:9 and 38:32 in connection with *k"sil* "Orion," *kimā* the "Pleiades," *mazzal(r)ot* the "constellations," (all of which see).

In both occurrences the stars are referred to as evidence of the creative power of God. In 9:9 Job points to the heavens as evidence of God's overwhelming power and wisdom, and therefore, of the folly of questioning his ways. However, as with many humans, Job knows better than he

does, for in the succeeding chapters he proceeds to do, under the lash of his comforters' words, precisely what he had said was folly: to question the wisdom of God's ways. The result is that, in the vision of God in chapters 38–41, Job must be faced with the gulf between himself and God and brought to realize that his words in the first part of chapter 9 were more true than his later ones. God is the creator and sustainer and, as such, sees things in ways of which we know nothing.

The particular contexts of both chapters 9 and 38 suggest overtones of both the Mesopotamian and the biblical creation accounts. In both of these the deity fixes the times and seasons. Furthermore, in the Enuma Elish, Marduk fixes the places of the gods in the heavens—rather patent references to the sun, moon and stars. In the biblical account God also fixes these, but not as gods, simply as created objects, the work of his hands. Job also treats them as such, but perhaps the overtone that God has defeated the gods is also found here.

Beyond this, the reference to Rahab in 9:13 and Leviathan in chapter 41 seem to be an appropriation of certain ancient literary motifs to indicate that creation was not only a triumph of creative might and wisdom, but also a triumph of good over evil. All in all, the use of these various themes serves to point up the truth that the gulf between creature and Creator is a vast one, one which can only be crossed from the Godward side.

Bibliography: Driver, G. R., "Two Astronomical Passages in the Old Testament," JTS 7:1–11.

J.N.O.

1618 עֲקָבָר ('akkār) **mouse.** (ASV and RSV similar.)

Denotes any one of a large number of rodents of the family Muridae. In Lev 11:29 the mouse is declared unclean. Reference is made to a pagan practice of eating mice (collective singular) in Isa 66:17. They are also edible for Moslems (KB, 702). The Philistines suffered a plague of mice because of their seizure of the ark (I Sam 6: see 'ōpel). The mice seem to have carried an epidemic, as rats and other rodents often do carry the bubonic plague, and perhaps also caused agricultural problems. As a propitiatory offering, five golden mice were returned with the ark.

C.S.

1619 עֲקָבִישׁ ('akkābīsh) **spider.** (ASV and RSV similar.)

There are only two references to the spider in the Old Testament and in both instances the emphasis is on the web which is pictured as transitory or flimsy. The wicked will assuredly be

1620 *עָקַם ('ākas)

punished in spite of his confidence which is compared to trust in a spider's web (Job 8:14). In Isa 59:5 the spider's web symbolizes something evil. Isaiah asserts that the nation's effort to hide its iniquity (59:6) with the web it has woven, simply will not work. Any covering that man makes for his sin is as transparent as the spider's web. The spider of Prov 30:28 (AV) is the word *š"māmīt* and probably refers to a kind of lizard.

C.S.

עָקוֹר ('ākôr). See no. 1621a.

1620 *עָקַם ('ākas) *shake bangles, rattle, tinkle*. This denominative verb occurs only in the Piel, in Isa 3:16.

Parent Noun

1620a עֶקֶם ('ekes) *anklet, bangle* (Isa 3:18).

1621 עָקַר ('ākar) *stir up, disturb, trouble, make (someone) taboo*. (ASV, RSV translate similarly.)

Derivative

1621a עָקוֹר ('ākôr) *trouble*.

'ākar reflects the social dimension of an individual's action. A person's negative action (this word always has a negative concept) has a harmful influence not only on himself, but also upon others. A person can "trouble" another person or the entire nation, bringing either man's or God's judgment upon others. KB (p. 703) followed by Holladay (p. 273) define the word to mean "taboo; cast out from (social) intercourse" (see Schwally, *Sem. Kriegs—altertümer* I (1901: 41).

The murderous actions of Simeon and Levi made Jacob odious to the Canaanites (Gen 34:30). Ahab and Elijah exchange charges, each claiming that the other had brought the present trouble (drought) on Israel (I Kgs 1:17, 18). Achan, ignoring the injunction against taking booty from Jericho (Josh 6:18), did so and brought defeat upon the whole nation (Josh 7:25; I Chr 2:7).

A person can bring trouble on his own household (Prov 11:29; 15:27) or a man can trouble himself. A cruel man hurts himself (Prov 11:17).

Not only is man the subject of this verb, but also God. Joshua declared that the Lord would bring trouble ('ākôr) on Achan (note the word-play) because of his sin (Josh 7:25). God cut off Achan from the nation.

'ākôr. *Disturbance, trouble*. (ASV and RSV similar.) This word is derived from the root which means "to disturb, to trouble." It is always used with the word 'ēmeq "valley," indicating a geo-

graphic location. It was the site of Achan's execution and grave for his transgressing the command to take no booty from Jericho (Josh 7:24, 26). By this act he had brought "trouble" on Israel. This site figures eschatologically in Isa 65:10 and Hos 2:15 [H 17]. It will be a fruitful valley, providing pasture for the flock when Israel is restored. An idyllic picture of peace is associated with it. It will be a place of "hope" rather than "trouble."

C.S.

1622 עָקְשׁוּב ('akshūb) *asp, viper*.

עַל ('al). See no. 1624p.

עָל ('ōl). See no. 1628a.

1623 עָלַג ('lg). *Assumed root of the following*.

1623a עָלַג ('illēg) *speaking inarticulately* (Isa 32:4).

1624 עָלָה ('ālā) *go up, climb, ascend*.

Derivatives

1624a עָלָה ('āleh) *leaf, leafage*.

1624b עָלִי ('ēli) *pestle* (Prov 27:22).

1624c עָלָה ('ōlā) *I, whole burnt offering*.

1624d עָלָה ('ōlā) *II, ascent, stairway*.

1624e עָלִי ('illi) *upper* (Jud 1:15; Josh 15:14).

1624f עָלִיָּה ('āliyā) *roof chamber*.

1624g עָלִיּוֹן ('elyōn) *I, high*.

1624h עָלִיּוֹן ('elyōn) *II, most high*.

1624i מַעֲלָה (mō'al) *lifting*.

1624j מַעֲלָה (ma'āleh) *ascent*.

1624k מַעֲלָה (ma'ālā) *above, upward*.

1624l מַעֲלָה (ma'ālā) *I, what comes up, i.e. thoughts* (Ezk 11:5).

1624m מַעֲלָה (ma'ālā) *II, step, stair*.

1624n מַעֲלָה (t'ālā) *I, conduit, water course*.

1624o מַעֲלָה (t'ālā) *II, healing*.

1624p עַל ('al) *above*.

There are nearly 900 occurrences of the verb 'ālā in the OT. The most common meanings in the simple tenses are "go up" (over 300 times), "come up" (over 160 times) and "ascend" (17 times). In the causative stems the two predominant meanings are "to bring up" (over 100 times) and "to offer" (77 times). The other 230 uses of the word are translated about 85 different ways in the AV.

'ōlā *I. Burnt offering, burnt sacrifice*. ASV and RSV similar.

This noun occurs 286 times in the OT. The usual explanation for the common rendering "burnt offering" is that the smoke from the offering goes up or ascends to God. However, since there are other sacrifices which were burned, it seems

probable that there is some further concept involved in the use of '*ālā* to describe this sacrifice. The key appears to be that alone among the Israelite sacrifices the '*ālā* is wholly burned, rather than partially burned and eaten by the worshipers and/or the priest. Thus, the whole animal is brought up to the altar and the whole is offered as a gift (*minhā*, q.v.) in homage to Yahweh. Whole offering would be a better rendering in English to convey the theology of the '*ālā*. It is indeed burned, but the burning is essentially secondary to the giving of the whole creature to Yahweh. (See N. Snaith, VT 7: 309.)

According to Lev 1, the '*ālā* could be a bull, a ram, a goat, pigeons, or turtledoves. The animals had to be perfect male specimens, but no sex qualifications are indicated for the birds. The mode of sacrifice is given in some detail, but for the most part, no interpretation of the meaning of the various steps is given.

The '*ālā* is first presented since it is a gift (*qor-bān*, q.v.) to Yahweh (Lev 1:2, 10, 14). If the offering was a bull (and presumably also either a sheep or a goat, although this is not specifically stated in vv. 10 and 14), the worshiper then identified himself with the animal by placing his hand on the animal's head. This may symbolize the substitution of the victim for the worshiper and indicate the transference of the guilt of sin to the animal, but, as de Vaux points out (Roland de Vaux, *Studies in OT Sacrifice*, p. 28), the only other instance where this symbolic gesture is made is in Lev 16:21 where the sin of the nation is transferred to the scapegoat and then carried into the wilderness. Because the goat is "impure," he is driven away, rather than sacrificed on the altar. The altar is reserved for holy things. But the same gesture is used again in the important matter of the priests' sin offering and burnt offering and the ram of consecration (Lev 8:14, 18, 22) and in the other offerings. It would seem to be a valid inference that the gesture implied substitution, that in some cases it showed the penalty was expiated, in other cases there was the symbolism of removal. This act certainly implies the close identification of the worshiper with the '*ālā*. The animal is his indeed, and he is offering it as a gift to the Lord.

The third step in the process is the actual killing of the offering. Normally the act of sacrifice was performed by the priest, but for the '*ālā*, only the birds were slaughtered by the priest—probably because of the small size of the creature and the small quantity of blood in them. It was essential that the blood be put on the altar. A bull, sheep, or goat was killed by the worshiper himself beside the altar (Lev 1:5, 11, 15), after which the priest poured the blood against or upon the altar. Only after the worshiper had skinned and cut up the animal and washed the parts in

water was the whole animal conveyed to the priest. He then took it to the altar and arranged it there where it was wholly burned up.

A special case occurs in II Chr 29:20–24 when, under king Hezekiah, a reform movement began. In this instance, the priests performed the actual slaughter of the animals. However, the situation may reflect a rededication to Yahweh and his true service on the part of these individuals, and in fact indicate that these '*ōlōt* were the offerings of these men. This event probably lies behind Ezekiel's shifting the right of sacrificing the '*ōlōt* to the Levites (Ezk 44:11).

Usually the '*ālā* was offered in conjunction with another offering (e.g. a *minhā*), although the '*ālā* itself has atoning efficacy (Lev 1:4; cf. 16:24).

The '*ālā* was offered for specific reasons. In times of joy and celebration, an '*ālā* is a gift to express that joy and to reverence Yahweh (Gen 8:20f.; I Sam 6:14). This sacrifice is not linked with the horrors of death. (Note especially on this the material in Dennis J. McCarthy, "The Symbolism of Blood and Sacrifice," JBL 88:166–76; see also his later notes 92:205–10). McCarthy concludes that the OT attitude to the sacrificial use of blood is without real parallel.

An '*ālā* can also accompany petitions for God's intervention in time of need (Jud 21:4; Jer 14:12). Common to both these classes of '*ōlōt* is the overriding awareness of the need to give honor and homage to the God who is holy.

Two particularly troublesome incidents involving '*ōlōt* are the episode of Saul in I Sam 13, and that of Jephthah in Jud 11. Saul's sin is identified as having offered an '*ālā* in preparation for holy war against the Philistines. Since the worshiper himself killed the animal, this was not the sin of Saul. Apparently the problem was in the absence of a priest to take the blood and the victim to the altar. The worshiper slaughtered, but the way to the altar was reserved to the priest. [Moreover, he disobeyed the Lord by failing to follow Samuel's order to wait seven days at Gilgal until he would come to offer the sacrifices and show Saul what he should do (I Samuel 10:8) R.L.H.]

Jephthah's '*ālā* was a different story. A vow taken under the pressure of imminent defeat was nonetheless a vow to be kept—he thought. The sacrifice of his only child as an '*ālā* to Yahweh was the result. Some interpret this controversial passage to mean that he offered up his daughter to perpetual virginity for divine service and thus insured the extinction of his line (see G. L. Archer SOTI, pp. 278ff.). Others hold that she was offered in human sacrifice. In that case the horror with which this action was received both by Jephthah and the nation (Jud 11:29–40) is evidence enough that human sacrifice was not the norm in Israel. Cf. also the reference to the offer-

ing of Mesha's son as a sacrifice, II Kgs 3:27. De Vaux argues that the event terrified the Israelites and they fled (*Studies in OT Sacrifice*, p. 62, n. 49). Micah (6:6–8), reflecting the later prophetic tradition, is perfectly in line with this view—that the fruit of the body is not acceptable as an 'ōlā. What is required is the gift of the self in justice, love, and submission. Albright concludes that "it is very hard not to give Israel credit for having helped by its example to encourage the opponents of human sacrifice in Phoenicia" (YGC, p. 244).

Whole burnt offerings, unknown in the Mesopotamian cults, were common among the Canaanites, although human sacrifice was not prevalent even there (see Roland de Vaux, *Sacrifice*, pp. 42ff., 66). Evidence from Ugarit antedating the OT and from the Phoenician texts postdating the OT gives evidence of rites that parallel the Hebrew 'ōlā. But, missing from all of these is the one essential element in the Hebrew structure—the offering of the blood and the contact of the blood with the altar. The offering of the life (cf. Lev 17:11, the blood is life) to the God of life makes the difference between a simple slaughter and an acceptable sacrificial gift.

Vaux, Roland de, *Studies in Old Testament Sacrifice*, Cardiff: University of Wales, 1964, pp. 27–51, 52–90. See also 'āshām, kālil, ḥaṭṭā't, minḥā, qorbān, shelem, sh' lāmim, zebah.

'ōlā II. *Ascent, stairway*. This noun occurs only in Ezk 40:26. Possibly it is a feminine participle of 'ālā.

'illi. *Upper*. This adjective is used only twice (Josh 15:19; Jud 1:15), both times to describe part of the territory given by Caleb to his daughter as part of her dowry—the upper and lower springs of Debir. (Albright identified Tell Beit Mirsim with Debir, but this geographic detail tips the evidence in favor of Rainey's identification of Rabud as Debir.)

'āliyā. *Roof chamber*. It was an upper story room, sometimes built on the roof of a house (I Kgs 17:19, 23; II Kgs 4:10–11). Apparently it was strategically located on the city walls (I Sam 18:33 [H 19:1]) over the gate, or as a watch tower (Neh 3:31–32). It also indicated status and honor—a kind of penthouse apartment. King Ahab built an 'āliyā as a high place for an altar (II Kgs 23:12), perhaps following the design of the

temple which had elaborate upper rooms (II Chr 3:9). In the heat of the Palestinian summers, an open room on the roof would catch the cool breezes and provide a comfortable place for the king to work (cf. Jud 3:20–25). In Ps 104:13, the 'āliyā is the abode of Yahweh from which he sends rain upon the mountains.

t'ālā I. *Conduit, watercourse*. The apparent anomaly of deriving conduit or watercourse from the root "to go up" disappears in the light of the fact that the dry river beds (wadis) of Palestine frequently are the routes of easiest access "up to" the towns and cities.

t'ālā II. Identified by both *The Englishman's Hebrew Concordance* and *Young's Analytical Concordance* with t'ālā I, above, it is translated "cure" or "healing" in Jer 30:13; 46:11. rsv "no medicine for your wound" seems to be valid, as the t'ālā is considered in relation to a (trench-like) incision or as a "conduit" for blood.

Schneider notes that the verb 'ālā is frequently used as a standing formula for going to Jerusalem and to the temple, because Jerusalem, like most cultic centers of the ancient near east, is located on a hill (but "up" naturally refers to eminence too. In Japan people go "up" to Tokyo at sea level). Schneider cites Steinleitner approvingly who argued that this expression became a technical term for cultic activity in the sense of going to the temple (TDNT, I, 520f.)

Moreover the OT always speaks of going up to heaven (Deut 30:12; Amos 9:2; II Kgs 2:11).

Yet another religious use of the word is found in the reference to God ascending his throne when as king he subdues all Israel's enemies (Ps 47:5 [H 6]).

'elyōn I. *High, higher, highest, upper, uppermost*. ASV and RSV similar. Adjective from 'ālā "to go up." Cf. 'āl. The word may be taken as one word with two meanings or as two separate nouns.

This adjective, derived from ālā, occurs some twenty-two or twenty-three times. It is used of Israel (Deut 26:19; 28:1), the Davidic kings (Ps 89:27 [H 28]), things (e.g. baskets, Gen 40:17; rooms, Ezk 41:7; gates, II Chr 23:20, etc.), and places (the upper pool, Gihon, Isa 7:3; II Kgs 18:17; upper Bethhoron, Josh 16:5, etc.), to describe location in space or eminence of position.

'elyōn II. *Most high*. One of the names of God, the KJV uses it as a descriptive title. The ASV and RSV capitalize it as a proper name, "Most High." The use of 'elyōn as a divine name has been a much debated topic in OT study. (See the specific material below under 'āl. In about one-third of the times it is so used, it appears either adjectivally or in apposition with one of the other divine names. In about two-thirds of the occurrences,

'elyōn stands alone as a proper name in its own right. One of the basic ideas in Semitic religion generally and the OT particularly is of the exaltedness and overwhelming majesty of God. 'elyōn, as a divine name signifying the supremacy of the deity, is known from both Ugaritic ('ly, UT 19: 1855 and Ais WUS), and Phoenician texts, appearing there as epithets of the highest gods of the pantheons.

In the OT, 'elyōn appears only in poetry, and reflects the ideas of omnipotence (Ps 18:13 [H 14]; Lam 3:38), universality (Ps 83:18 [H 19]), and/or constancy (Ps 21:7 [H 8]). Thus the sin of the king of Babylon in Isa 14:14 is not that he wanted to become godlike or even a god, but that he aspired to be like the Highest God.

'elyōn is the place of protection and shelter for Israel (Ps 9:2 [H 3]; 91:1, 9), and for her king (Ps 21:7 [H 8]). In keeping with the Gen 14 passages, 'elyōn seems to have a special concern for Zion (Ps 46:4 [H 5]; 87:5) even though he is Lord of all heaven and earth. Psalm 73:11 satirically emphasizes the futility of trying to hide from the all-knowing 'elyōn. The pathos of Ps 77:10 [H 11] is that it expresses the unthinkable—the omnipotent has become impotent.

'elyōn occurs in several compounds.

1. 'ēl 'elyōn. The earliest appearance of 'elyōn in the OT is in conjunction with the old Semitic appellation 'ēl (q.v.) in the Abraham/Melchizedek story (Gen 14:18–22). Alt points out that the primary fact about the names compounded with 'ēl is that they seem to be associated with particular holy places (e.g. El Bethel, Gen 31:13, although this is his only clear example; Albrecht Alt, *The God of the Fathers*, see Bibliog. p. 11). With El Elyon, however, this is not the case. Genesis 14:19, 22 identifies him as "possessor" (*qōnēh*, q.v.) of all the earth. The RSV follows the LXX *ektisen* "who created." This perspective clearly precludes El from being considered a nature deity (e.g. Baal), and stresses his total supremacy. Psalm 78:35 (cf. Num 24:16) follows this with El Elyon as the most exalted one.

2. YHWH 'elyōn. This combination occurs in Ps 47:2 [H 3] and Ps 97:9 where the common version treats 'elyōn adjectivally, and in Ps 7:17 [H 15] in parallel with *Yahweh*. His exalted position and his total righteousness leave the Psalmist in awe (*nōra*) of the Great King.

3. 'ēlōhim 'elyōn. This combination occurs only twice. In Ps 57:2 [H 3], it is in parallel with 'ēl *gōmēr* which Dahood treats as a proper name, "Avenger God." (Mitchell Dahood, *Theological Studies*, 14:595–97.) Ps 78:56 (MT) links the two words, but Dahood (*Psalms II*, AB, in loc.) divides the cola between the two, making 'elyōn objective to the second verb.

Bibliography: Alt, Albrecht, *The God of the Fathers*, 1929, reprinted in *Essays in Old Testa-*

ment History and Religion, Doubleday-Anchor, 1968, pp. 3–100. Bertram, Georg, "υψιστος" in TDNT, 8:614–20. mō'al. *Lifting.* This noun occurs only in Neh 8:6 where the lifting up of the hands is associated with worship of the Lord.

ma'āleh. *Ascent.* It is found some nineteen times, mostly in geographical references to the high territories associated with specific cities.

ma'al. *Above, upward.* Found about 140 times, always in adverbial or prepositional phrases. Most frequently it refers to spatial relationships or locations described as "above" or "upward," although often it is used of temporal sequences describing the age-span of a group of people.

ma'ālā I. Ezekiel (11:5) uses *ma'ālā* figuratively for the ideas that "come up" in the mind of the wayward Israelites.

ma'ālā II. Used variously of steps or stairs, the "way up" to the throne, the city walls, etc. The use in II Kgs 20:9–11 and Isa 38:8 of degrees of the sundial is obviously just counting the "steps" or divisions marked off on the dial, or, better, stairway ("the stairway of Ahaz" NIV).

A specialized use of *ma'ālā* II is found in the titles to Ps 120–134 (AV "Song of Degrees," ASV and RSV "Song of Ascent"). Traditionally this has been interpreted as a series of psalms to be sung as the Israelites "went up" to Jerusalem (e.g. Ps 122), or as the Levites ascended the fifteen steps between the court of women and the court of the Israelites. Dahood ("Psalms"; AB, XVIIa, pp. 194f.) suggests "Songs of extolment" on the basis of 11QPs^a Zion 14. Another alternative is to interpret the "steps" in terms of the ascending literary structure within the individual psalms.

'al or 'āl or 'āli. Is used usually as a preposition or conjunction. *'al* which usually functions as a preposition, is translated over thirty different ways in the OT, the most common being above, against, beside, concerning, on, over, upon. It also occurs frequently as a conjunction, translated because, although. Compounded with *k* or *min* it provides more precise inflections of the basic meanings.

Theologically, *'al* is important for the substantives associated with it and from which the preposition is derived. BDB and *Englishman's Hebrew Concordance* list only six uses of *'al* as a substantive: Gen 27:39; 49:25; II Sam 23:1; Ps 50:4; Hos 7:16; 11:7. Mandelkern adds Job 36:33.

In the passages from Gen and Ps 50, the construction is (*ha*)*shāmayim mē'āl* "the heavens above" and 'al is used adjectivally, almost as "the high heavens."

In II Sam 23:1, 'al stands alone in an adverbial relationship to the verb so that the colon reads "the oracle of the young man who was raised up highly." Similarly, Job 36:33 (a text which Pope (Job, AB, p. 238) declares is "notoriously difficult," as witness the variety of translations) is included with the substantive use of 'al. Pope understands 'ālāyw in the first colon as reflecting the ancient name of the storm god 'Aliy (which could as easily be the God who rules the storm), but emends the second colon in a way that damages the parallelism. Delitzsch (*Job*, in loc.) saw this as a divine name also, but followed it up with the observation that 'al-'ōleh also refers to God. Hosea 7:16 and 11:7 both use 'al as the proper name translated in AV as "Most High" (= 'elyōn see above). The rsv's emendations to Baal (7:16) and yoke ('ōl, 11:7), are interesting speculations, but add nothing to the understanding of the text, and are unnecessary.

It is now evident that the Ugaritic texts use 'ly "Most High" as an epithet for Baal (*Legend of Keret* 3.6-9) specifically in a storm god context (UT 19: no. 1855). The related concepts of power, strength, exaltedness, etc., are paralleled by the attributes of 'elyōn. What we have here is another of the so-called standard semitic epithets or surrogates for the deity—common among the ancient near eastern peoples, but, purified of all their pagan overtones of the fertility cults, incorporated into Hebrew religious vocabulary.

The discovery of 'al or 'āli in these contexts has not only justified the translation "Most High" in the Hos and Job texts, and given additional evidence for the use of 'elyōn as a divine name, but has also opened up the possibility of identifying other cases of the use of 'al as the proper name of the deity. Some representative examples suggested by Dahood are Gen 14:19; 21:33; Deut 33:12; I Sam 2:10; Ps 7:6, 8, 10 [H 7, 9, 11]; 16:6; 18:41 [H 42]; 55:22 [H 23]; 57:2 [H 3]; 62:7 [H 8]; 68:29, 34 [H 30, 35]; 75:8 [H 9]; 106:7; 119:104, 127, 129, 136; 139:14, 15; 141:3; 144:5; 146:5; Isa 63:7; Hos 10:5.

עָלִימִים ('ālūmim). See no. 1630c.

עָלֻקָּה ('ālūqā). See no. 1636a.

1625 עָלַז ('ālāz) *exult, rejoice*.

Derivatives

1625a עָלִיז ('ālēz) *exultant* (Isa 5:14).

1625b עָלִיז ('alliz) *exultant, jubilant*.

These words describe an emotion of joy which finds expression in singing and shouting. It is inappropriate for one in anguish (Jer 15:17) and for one who has sinned (Jer 11:15). By contrast it is a natural response of the faithful (Ps 149:5), even being ascribed to God himself (Ps 60:6 [H 8]=Ps 108:7 [H 8]). When applied to the wicked (Ps 94:3) and Israel's foes (II Sam 1:20; Isa 23:12; Jer 50:11), it depicts a kind of gloating.

C.S.

1626 עָלָתָה ('ālātā) *thick darkness*. Derivation uncertain.

עָלִי ('ēli). See no. 1624b.

עָלִי ('illi). See no. 1624e.

עָלִיל ('ālil). See no. 1628b.

עָלִילָה ('ālilā). See no. 1627c.

עָלִילִיָּה ('ālīlīyā). See no. 1627d.

עָלִישׁוּת ('ālīšūt). See no. 1635a.

1627 *עָלַל ('ālal) I, *deal with severely, abuse, make a fool of someone*.

Derivatives

1627a עֹלְלוֹת ('ōlēlōt) *gleaning*.

1627b *עָלַל ('ālal) *glean*. Denominative verb, occurring only in the Poel.

1627c עָלִילָה ('ālilā) *wantonness, deed*.

1627d עָלִילִיָּה ('ālīlīyā) *deed* (Jer 32:19).

1627e מַעַלְלָה (ma'ālāl) *deed, practice*.

1627f מַעַלְלִים (ta'ālūlim) *wantonness* (Isa 3:4; 66:4).

The verb 'ālal appears thirteen times, always in the intensives. It is difficult because it cannot be consistently translated with any one word. The context must determine the nuance of meaning. Further homonyms meaning "to play the child" ('ll in Isa 3:12) and "to thrust" ('ll in Job 16:15) are easily confused with this root. (ASV and RSV are reasonably similar with the former preferring the words "do" and "mock" while the latter prefers "deal" and "make sport of" re-

spectively. An interesting difference in Ex 10:2 and I Sam 6:6 will be noted below.)

This word speaks of relationships. It is used to indicate the exercise of power over another person, generally in a bad sense, hence meaning "to maltreat." It signifies some great achievement, generally malevolent.

The negative and strong thrust of this verb can be seen in Lamentations. In 3:51 the speaker (a man, 3:1, not the personified city) complains that his eyes have caused him grief, i.e. that which he has seen—destruction, disease, famine—has brought intense pain to him. The personified city implores God to consider his severe treatment of her, necessitating cannibalism (2:20). She questions passers-by whether they have ever witnessed such malevolent treatment (1:12) and intreats God to treat her enemies even as he has dealt with her (1:22). In this appeal for retribution there is a recognition that God is just and that vengeance belongs to him.

This word is used to depict the exploitation of one person by another. The concubine of the Levite was sexually abused by the men of Gibeah (Jud 19:25). Saul requested that he be slain rather than to be taken by the Philistines who would make sport of him (I Sam 31:4=I Chr 10:4). Zedekiah was fearful that the Jews who had defected to the Chaldeans would abuse him (Jer 38:19). In Num 22:29 Balaam accuses his ass of mocking him.

The crucial passages in this area are Ex 10:2 and I Sam 6:6 where the Lord is the subject of this verb and the Egyptians are the object. Is it proper to suggest that the Lord makes sport of anyone? Did he deal ruthlessly with Egypt? The ASV has chosen in these two instances to give a neutral rendering "wrought" and "wrought wonderfully" while allowing in the margin for the translation "mocked." While the thought of mocking is startling, both the contextual and the etymological situation demand a negative type of treatment. God treated the Egyptians severely because, as the Philistines noted, they hardened their hearts. It is clearly within God's power and prerogative to punish and discipline but he never acts in jest; hence the RSV translation "made sport of" can be misleading.

Finally the use of this word in Ps 141:4 is set in a prayer for an upright heart. There is a recognition here that wicked external practices originate in the heart and issue forth from the mouth and lips (cf. Mk 7:15–23).

ʿōlēlōt. Gleaning. (ASV and RSV similar.) Refers to grapes and olives left after first picking. Used six times, always figuratively of a remnant, derived from *ʿālāl* I by BDB and KB, but connection not clear. Refers to Israel's remnant after God's exhaustive judgment (Isa 17:6). Same figure

is applied to the nations after universal judgment (Isa 24:13). Micah (7:1) confesses his inability to find a godly remnant in Judah. The destroyers of Edom will not even leave a remnant (Jer 49:9; Ob 5). Used figuratively by Gideon of Ephraim's military achievements (Jud 8:2).

ʿālilā. Deed, action. (ASV and RSV frequently use "doings.") Used twenty-four times of which all are plural, except two (Ps 14:1; 66:5), hence "doings." Applied to both man and God with a sharp apparent contrast. The deeds of God are righteous and renowned (Ps 9:12; 66:5; 105:1). The actions of men are wicked (Ps 14:1). This wicked quality of men's deeds is primarily seen in Ezekiel where six times this word is parallel to *derek* "way, practice" (14:22, 23; 20:43; 24:4; 36:17, 19).

maʿālāl. Deed, practice. Used somewhat more often with a similar range of meaning. Again the deeds of men are wicked deeds. The word is used three times of the action of God.

C.S.

1628 *עָלַל ('ālāl) II, *insert, thrust in*. Used only once, figuratively of humiliation (Job 16:15).

Derivatives

1628a עָלַל ('ōl) *yoke*.

1628b עָלִיל ('ālil) *furnace*.

ʿōl. Yoke. (So translated in RSV and ASV.) Used of a yoke either of wood or iron (cf. Jer 28:2, 4, 11, 14). Limited use as a literal yoke for animals (Num 19:2; Deut 21:3; I Sam 6:7). Derived from *ʿālāl* II from insertion of the neck into the yoke. Most frequently used figuratively: oppressive policies of monarchy (I Kgs 12 and II Chr 10); bondage and servitude (Lev 26:13, of Egypt; Isa 14:25, of Assyria; Jer 27:8, 11, 12, of Babylon); domination of sin (Lam 1:14); benevolent control of God (Jer 2:20; 5:5). In Isa 9:4 [H 3] a reference is made to messianic deliverance from the burdensome yoke. Cf. the figure in Gal 5:1.

C.S.

1629 עָלַם ('ālam) I, *be hidden, concealed, secret*.

Derivative

1629a תַּעֲלֻמָּה (taʿālūmmā) *hidden thing, secret*.

The meaning of the verb *ʿālam* is quite obvious. Only the passive participle occurs in the Qal (Ps 90:8). Its commonest uses are Hiphil to express causative (hide, conceal) or Niphal as passive. It occurs a few times in the Hithpael, probably as reflexive. The verb is not used in Ugaritic or Arabic so it cannot be determined whether the

1630 עֵלָם ('lm)

initial consonant is *ayin* or *ghayin*. If it is *ayin*, the verb may be the parent of 'ōlām; if it is *ghayin*, the verb may be the parent of 'elem and 'almā.

R.L.H.

1630 עֵלָם ('lm) II. Assumed root of the following.

1630a עֵלָם ('elem) *young man* (I Sam 20:22; 17:56).

1630b עֵלְמָה ('almā) *young woman*.

1630c עֲלֻמִּים ('ālūmīm) *youth* (abstract).

There is no certain root for these words. They are not clearly related to 'ālam I. The suggestion in KB that they may be derived from an Arabic root meaning "to be vehemently affected with lust" is without foundation, particularly since Arabic literature comes from a time several centuries after the Biblical record, and the relationship, if any, is apt to be the reverse. According to KB 'almā means "marriageable girl, young woman (until the birth of her first child)." The latter statement is purely conjectural, for there is no evidence on which to base it.

Since *b"tūlā* is used many times in the OT as a specific word for "virgin," it seems reasonable to consider that the feminine form of this word is not a technical word for a virgin but represents a young woman, one of whose characteristics is virginity. This is borne out by the fact that the LXX translates it as *parthenos* in two of its seven occurrences, and that its use in Isa 7:14 was quoted to Joseph by the angel as a prediction of the virgin birth.

Some translators interpret Mt 1:22–23 as being simply a comment by Matthew, but it is more reasonable to consider that the argument that convinced Joseph was the fact, pointed out to him by the angel, that such an event had already been predicted by Isaiah. There is no instance where it can be proved that 'almā designates a young woman who is not a virgin. The fact of virginity is obvious in Gen 24:43 where 'almā is used of one who was being sought as a bride for Isaac. Also obvious is Ex 3:8. Song 6:8 refers to three types of women, two of whom are called queens and concubines. It could be only reasonable to understand the name of the third group, for which the plural of 'almā is used, as meaning "virgins." In Ugaritic the word is used in poetic parallel with the cognate of *b"tūlā*. See refs. in UT 19: no. 1969.

A.A.M.

1631 עֵלָם ('lm) III. Assumed root of the following.

1631a עֲלָם ('ōlām) *forever, ever, everlasting, evermore, perpetual, old, ancient, world*, etc. (RSV similar in general, but substitutes "always" for "in the world" in Ps 73:12 and "eternity" for "world" in Ecc 3:11.) Probably derived from 'ālam I, "to hide," thus pointing to what is hidden in the distant future or in the distant past. The Ugaritic cognate is 'lm, "eternity."

Though 'ōlām is used more than three hundred times to indicate indefinite continuance into the very distant future, the meaning of the word is not confined to the future. There are at least twenty instances where it clearly refers to the past. Such usages generally point to something that seems long ago, but rarely if ever refer to a limitless past. Thus in Deut 32:7 and Job 22:15 it may refer to the time of one's elders. In Prov 22:28; 23:10; Jer 6:16; 18:15; 28:8 it points back somewhat farther. In Isa 58:12, 61:4; Mic 7:14; Mal 3:4, and in the Aramaic of Ezr 4:15, 19 it clearly refers to the time just before the exile. In I Sam 27:8, in Isa 51:9 and 63:9, 11 and perhaps Ezk 36:2, it refers to the events of the exodus from Egypt. In Gen 6:4 it points to the time shortly before the flood. None of these past references has in it the idea of endlessness or limitlessness, but each points to a time long before the immediate knowledge of those living. In Isa 64:3 the KJV translates the word "beginning of the world." In Ps 73:12 and Eccl 3:11 it is translated "world," suggesting the beginning of a usage that developed greatly in postbiblical times.

Jenni holds that its basic meaning "most distant times" can refer to either the remote past or to the future or to both as due to the fact that it does not occur independently (as a subject or as an object) but only in connection with prepositions indicating direction (*min* "since," *ad* "until," *le* "up to") or as an adverbial accusative of direction or finally as the modifying genitive in the construct relationship. In the latter instance 'ōlām can express by itself the whole range of meanings denoted by all the prepositions "since, until, to the most distant time"; i.e. it assumes the meaning "(unlimited, incalculable) con-

tinuance, eternity." (THAT II, p. 230) J. Barr (Biblical Words for Time (1969), p. 73) says, "We might therefore best state the "basic meaning" as a kind of range between 'remotest time' and 'perpetuity'". But as shown above it is sometimes used of a not-so-remote past. For the meaning of the word in its attributive use we should note the designation of the LORD as 'el 'ōlām, "The Eternal God" (Gen 21:33).

The LXX generally translates 'ōlām by *aion* which has essentially the same range of meaning. That neither the Hebrew nor the Greek word in itself contains the idea of endlessness is shown both by the fact that they sometimes refer to events or conditions that occurred at a definite point in the past, and also by the fact that sometimes it is thought desirable to repeat the word, not merely saying "forever," but "forever and ever."

Both words came to be used to refer to a long age or period—an idea that is sometimes expressed in English by "world." Postbiblical Jewish writings refer to the present world of toil as *hā'ōlām hazzeḥ* and to the world to come as *hā'ōlām habbā'*.

'ad (q.v.) has substantially the same range of meaning as 'ōlām (usually long continuance into the future, but cf. Job 20:4).

A.A.M.

1632 עָלַם ('ālas) *rejoice* (e.g. Job 20:18; 39:13).

1633 *עָלַע ('āla'). *Meaning uncertain.* Occurs only in the Piel, in Job 39:30, y"al'ā-dām "they drink (?) blood."

1634 *עָלַפ ('ālap) *cover.* Occurs only in the Pual and Hithpael (e.g. Song 5:14; Isa 51:20). Ezk 31:15 'ūlpeḥ is best vocalized as a Pual form.

1635 עָלַץ ('ālaš) *exult, rejoice.* (ASV and RSV similar, both using "triumph" in Prov 28:12.)

Derivative

1635a עָלִישׁוּת ('ālīšūt) *exultation*, used only in Hab 3:14, "their exultation was as it were to devour the poor."

This verb describes an emotional response basically of the righteous (Ps 5:11 [H 12]; 68:3 [H 4]; Prov 28:12), which is occasioned by the

Lord (I Sam 2:1; Ps 9:2 [H 3]). The psalmist prays that his enemies will *not* be able to exult; i.e. gloat, over him. This is also a possible response from nature (I Chr 16:32) and from a community (Prov 11:10).

C.S.

1636 עָלָה ('lq). *Assumed root of the following.*

1636a עֲלֻקָּה ('ālūqā) *leech* (Prov 30:15).

עָם ('am), עָם ('ām), עָם ('im). See nos. 1640a,b,e.

1637 עָמַד ('āmad) *stand, remain, endure*, etc.

Derivatives

1637a עָמַד ('ōmed) *standing place.*

1637b עֲמָדָה ('emdā) *standing ground* (Mic 1:11).

1637c עֲמֻדָּה ('ammūd), עָמֻד ('ammūd) *pillar, column.*

1637d מַעֲמָד ('ma'āmād) *attendance.*

1637e מַעֲמָד ('mo'ōmād) *standing ground, foothold* (Ps 69:3).

This basic term for "stand," cognate to Akkadian *emēdu* "to lean against, stand, place," and Arabic *amada* "to prop up, support," is very common in the Hebrew OT (used over five hundred times). Synonyms include: *yāṣab*, Hithpael, "to take one's stand"; *kūn*, Niphal, "to stand firm, fast"; *nāṣab*, Niphal "to stand, stand firm;" and *qūm*, "to stand up, get up."

The verb *āmad* is used so extensively in the OT of the physical act of standing as to preclude a complete analysis in this work, but the reader is referred to the full categorizations in BDB and KB. Attention should be given to certain key passages, particularly those with significant theological import. One such expression is "to stand before Yahweh," used, for example, of Abraham in Gen 18:22 (cf. 19:27) and Moses in Deut 4:10 (cf. Jer 15:1, of Moses and Samuel). "To stand before Yahweh" (construed with *lipnē* [q.v.]) in these instances is a posture of prayer and intercession. That men have felt a need for Yahweh's help is not surprising. But the fact that men may "stand" before the Creator of eternity and make intercession is utterly remarkable. It is important to add, however, the observation of E. Jacob that such intercession is not at all magical, nor is there an automatic answer from God to the petitioner. He writes, "Whether intercession is useless because of the greatness of the sin or pardon is impossible because of the absence of intercession (Ezk 22:30; Isa 59:16), it is important to notice that it depends on the divine liberty and that no human device can bring about God's pardon" (JTOT, p. 296).

Another nuance to the expression, "to stand before Yahweh," is afforded by a passage such as Deut 19:17. In this context litigants "shall stand before Yahweh, before the priests and the judges who will be in office in those days" (cf. Jer 7:10). Such presentation was for judgment. Standing before Yahweh and his ministers in the sanctuary portends the ascertaining of truth and justice. At times the nation as a whole was called to come to the central sanctuary and "stand before Yahweh" in solemn assemblies for sacrificial acts (e.g. Lev 9:5). Servants of Yahweh "stand before him" as an expression of dedication, allegiance, and servitude. This terminology is used of priests (e.g. Ezk 44:15), and particularly of genuine believers during the period of Israel's decline and apostasy (Elijah, I Kgs 17:1; 18:15; Elisha, II Kgs 3:14; and Gehazi [with reluctance], II Kgs 5:16).

As Joseph stood before Pharaoh (Gen 41:46), David before Saul (I Sam 16:21), Abishag and Bathsheba before David (I Kgs 1:2, 28), and Nebuzaradan before Nebuchadnezzar (Jer 52:12); so the believer stands before Yahweh in a position of obedience, respect, and readiness to serve. Such a position is noble in proportion to the majesty of the one served. When a person stands before Yahweh for service, there is no higher honor to which he may aspire.

A crucial use of the verb '*amad*', the subject of perennial debate, is in the controverted "long day" of Josh 10:12-13; a day unlike any other, "when Yahweh listened to the voice of a man, for Yahweh fought for Israel" (Josh 10:14). R. D. Wilson explained long ago that the use of '*amad*' (coupled to *dôm*) in vv. 12-13 refers not to a prolongation of the day, but to a cessation from the heat and light of the sun; that is, an eclipse coupled to a storm. The defeat of the enemy was completed not in the midst of a very long, hot day, but in the darkness of a storm. On this point, see H. J. Blair in NBC, rev. ed., p. 244, and J. Rae in WBC, p. 218. D. Patten, following a lead from I. Velikovsky, associates the phenomenon with a close fly-by of a heavenly body.

'ômed. Place, standing place, stood upright. (ASV, RSV similar.) A masculine noun found with a governing proposition and pronominal suffix in late OT writings (nine times in Dan, Neh, and II Chr.).

'emdá. Standing. (ASV "stay," RSV "standing place," NASB "support.") A feminine noun found only in Mic 1:11.

'ammûd, 'ammûd. Pillar (ASV, RSV, "pillar, column, post"). A very common noun (110 times in the OT), used of pillars supporting buildings (e.g. Jud 16:25), the bronze pillars of the temple (I Kgs 7:15), and the pillar of cloud and fire in Yahweh's theophany (e.g. Ex 14:24).

The masculine noun '*ammûd*' "pillar, column," is used of structural, supporting pillars; bronze (monumental) upright columns; vaporous columns of smoke, fire, and cloud; and in figurative expressions of the "supports" of earth and heaven (see Ps 75:3 [H 4]; Job 9:6). Pillars for the structural support of the roofs of great buildings were used from an early period in the ancient near east. The familiar story of Samson's final victory over the Philistines in the palace at Gaza describes how he destroyed the building, killing thousands and himself, by knocking out of place the supporting pillars (Jud 16:26-30). J. B. Job notes that the archeological evidence from Philistine sites suggests these pillars were of wood, set on stone bases (see "pillar," NBD, p. 998). Solomon's palace was noted for the four rows of cedar pillars with corresponding cedar beams (I Kgs 7:2-36). Earlier, the tabernacle had pillars made of acacia (כִּינֹר, "shittim"; Ex 26:32, 37; cf. 27:10ff.). Pillars are mentioned in the description of Ezekiel's temple (Ezk 42:6) and the palace of Ahasuerus (made of marble, Est 1:6).

The temple of Solomon is remarkable in the description of two free-standing pillars made of bronze, named "Jachin" ("he shall establish") and "Boaz" ("in it is strength," I Kgs 7:13-22). These products of Hiram of Tyre (Hiram-abi in II Chr 2:13) must have been majestic in strength (27 feet high, plus the capitals which were 7.5 feet high), and lovely in beauty (see the description of the capitals in I Kgs 7:17). In II Chr 3:15 the word for the height of the pillars differs from that in I Kgs 7:17 and may refer to the combined length of the two pillars (see '*ûlam*' "porch"). It may be noted that the text does not specifically say that these pillars were free standing. It may be that they stood at the front corners of the porch. Or, if the porch had closed sides somewhat like a vestibule, they could have ornamented the entryway, dividing it into three openings. This is the way such pillars were used in the government buildings of Megiddo (David Ussishkin, "King Solomon's Palaces," BA 36:78-105, especially 85, 87, and 98).

Some scholars have suggested that these twin pillars may have contained the sacred fire of the temple with the smoke symbolizing the presence of the Lord (see J. Gray, *I-II Kings*, p. 175). In any event, the pillars with their strength, beauty, and symbolic names likely represented the presence of the Lord and the permanence of the Davidic house.

The word '*ammûd*' is also noteworthy in the phrases '*ammûd 'ânân*' and '*ammûd 'êsh*', "the pillar of smoke" and "the pillar of fire" (Ex 13:21; cf. 14:24 '*ammûd 'êsh w' 'ânân*', "pillar of fire and smoke"; see the articles on '*êsh*' and '*ânân*'). These visual tokens of the presence of Yahweh in leading, directing, and protecting his

people were designed for the comfort of Israel and the consternation of her enemies (see Num 14:13–14). It was in the mysterious pillar of cloud that Yahweh would manifest himself before Moses (Num 12:5; Deut 31:15), and this mysterious manifestation in cloud, smoke, and fire was never forgotten by Israel (e.g. Neh 9:12).

ma'āmād. *Attendance, office, place, state.* (ASV, RSV similar; for RSV add "duty, seating.") A masculine noun which prefixed *mem* of location; hence, the term speaks of a "place of standing" in the sense of "office" (Isa 22:19) and "service, attendance" (I Kgs 10:5).

mo'ōmād. *Standing.* (So ASV; RSV, NASB, "foothold.") Only in Ps 69:2 [H 3], in a figure of distress.

R.B.A.

1638 עָמָה ('mh). Assumed root of the following.

1638a עָמִית ('āmīt) *associate, fellow, relation* (e.g. Zech 13:7; Lev 5:21).

עָמָה ('ūmmā). See no. 1640b.

עָמָד ('ammūd). See no. 1637c.

עָמוּנִי ('ammōnī). See no. 1642a.

עָמִיר ('āmīr). See no. 1645c.

עָמִית ('āmīt). See no. 1638a.

1639 עָמַל ('āmal) *to labor.*

Derivatives

1639a עָמַל ('āmāl) *labor, toil, trouble.*

1639b עָמֵל ('āmēl) *I, laborer, sufferer.*

1639c עָמֵל ('āmēl) *II, toiling.*

The verb 'āmal is one of several Hebrew verbs for "labor, work, toil." Other major terms include 'ābad "to work, serve," and 'āśā "to make, do, work" (both of which see). 'āmal is used less often than those two verbs, and is employed often with the nuance of the drudgery of toil rather than the nobility of labor. Hebrew 'āmal is cognate to Arabic 'amila "to labor," and to the Akkadian noun nīmēlu, that produced by work, "gain, possessions."

The root 'āmal relates to the dark side of labor, the grievous and unfulfilling aspect of work. A

biblical view of labor based on this word alone would be defective, but this aspect of work should be included in a full induction. Thus Moses uses this term to describe the frustration and struggle of the worker in this ephemeral, transitory world (Ps 90:10). No wonder he cries out to the eternal God "and let thy beauty (eternal, lovely work) be upon us" (v. 17). The root in its several forms is used especially by Solomon in Eccl as he details the frustration, profitlessness, and transitory (*hebel*) benefits of day-by-day labor; such is noted when that labor is not seen as service (even worship!) to God, but simply as work done "under the sun." For the man whose relationship to God is tenuous, there is no profit (*yitrôn*) from all his work (Eccl 1:3). Yet even in Ecclesiastes there are glimpses of a higher view of labor: "every one who eats and drinks and sees good in all his labor—it is the gift of God" (Eccl 3:13; cf. 5:18–19 [H 17–18]).

'āmāl. *Labor, toil, trouble, mischief, sorrow, travail, pain, grievance, grievousness, iniquity, miserable, misery, painful, perverseness, wearisome, wickedness.* (ASV, RSV similar.) As in the case of the verb, so in that of the noun: 'āmāl relates to the unpleasant factors of work and toil. A perusal of the varied synonyms used in the KJV to render this word suggests its negative overtones. Such are the categories of grievance expressed by this noun. Moreover, these negative elements are amplified by words used in hendiadys and parallelism with 'āmāl: yāgôn "torment, sorrow" (Jer 20:18); ka'as "provocation" (Ps 10:14); 'ōnī "misery" (Deut 26:7); 'āwen "trouble" (Ps 90:10); shāw "worthlessness" (Job 7:3); shōd "destruction" (Prov 24:2); rā "evil" (Hab 1:13), and the like.

'āmēl I. *Laborer, misery, wicked, workmen.* This noun is used of workmen (e.g. Prov 16:26) and of misery (e.g. Job 3:20). "Misery" is preferable to "wicked" (so KJV) in Job 20:22.

'āmēl II. BDB, but not KB or Lisowsky, distinguishes the use of 'āmēl II in Eccl from the above, 'āmēl I, terming it a verbal adjective, rendered "toiling" (Eccl 2:18, 22; 3:9; 4:8; 9:9).

R.B.A.

1640 עָמַם ('mm). Assumed root of the following.

1640a עָמָם ('am), עָם ('ām) *people.*

1640b עָמָם ('im) *with.*

1640c מֵעָמָם (mē'im) *from, with.*

1640d עִמָּנוּאֵל ('immanū'ēl) *Immanuel, the messianic name of Isa 7:14 and of Judah's king in Isa 8:10.*

1640e עַם ('*am*) *kinsman* (on father's side).1640f עִמָּא ('*ūmmā*) *against, beside*.

'am. *People, nation.* (ASV, RSV similar, except in some instances, e.g. RSV translates "kindred," ASV "people," Gen 25:17.)

The term seems to be derived from the common Semitic root *'āmam* (cf. e.g., UT 19: no. 1864) meaning "to comprehend or include." Although there is some overlapping in meaning with its two main synonyms *gōy* and *l'ōm*, (see synonyms under *gōy*), the unique emphasis of *'am* lies in its reference to a group of "people as viewed by one of themselves," or to "people in general."

The noun *'am* appears in some important phrases: *'ammi*, *lo-'ammi* and *'am hā'āreš* ("my people," "not my people" Hos 2:23 [H 25], and "the people of the land").

The term *'am* is often used in a general sense in the OT to refer to a group of people, larger than a tribe or clan, but less numerous than a race (*l'ōm*). When the reference is to a large group, without reference to any specific characteristic or relationship, translators have, in instances, correctly rendered *'am* as "folk" or "men." In the Aramaic portions of Ezr and Dan the term is used with this general sense in all but two instances (Ezr 7:13; 7:16).

However, *'am* is predominantly used to express two basic characteristics of men considered as a grouping: 1) relationships sustained within or to the group and 2) the unity of the group.

Various types of relationship are expressed, implicitly or explicitly. Some examples are: religious fellowship (Gen 17:14, the uncircumcised is to be cut off from his people), maternal (Gen 17:16, Sarah a mother of kings of people), ancestral (Gen 25:8, Abraham died and was gathered to his kindred, also 25:17; Gen 49:33), king-subject relationship (Gen 26:11; Ex 1:9, etc.), family ties (Gen 36:6, family included wives, children, slaves, servants), judicial (Gen 49:16, Dan is to judge his people), deliverer and ruler (Ex 5:16, etc., refer to the relationship of Moses and the delivered Israelites), social (Num 5:27, an adulteress was a curse to her people), a military leader of his troops (Josh 3:3, etc.) adoption (Ruth 1:16), and prophetic (prophets from Elijah to Malachi address their people).

Intimately related to the concept of relatedness among people, is the concept of unity. Religious, maternal, ancestral ties united people. Explicit expression is given to the concept of unity. It could be achieved by intermarriage (Gen 34:16). It was achieved by God gathering men (Ezr 38:12). The idea of people as a flock expresses unity also (Zech 9:16). There are also a number of passages (cf. I Sam 11:11) where the word means "troops."

'ammi is also used extensively in the OT. Occasionally a king or leader is quoted when he is speaking of the people for whom he is responsible. The phrase is used basically to express the relationship between God and his people. That *'am* is the term used should not be surprising since, as we have seen, it emphasizes the relational and unity aspects of a group of people.

The Lord first uses the term *'ammi* when he speaks of the descendants of Abraham whom he has chosen and with whom he is identified by means of the covenant (Ex 3:7ff). God seals this relationship more firmly by redeeming them from Egypt (Ex 5:1ff.). His constant protection over them and all-sufficient provision for them testify to the continued love and concern he has for those he calls "my people" (cf., e.g., Ps 78:52-66; 95:7). God formed these people for himself (Isa 43:21; 51:16), gave them their dwelling place (Zion, Isa 10:24), and bestowed his blessings and virtues upon them (Isa 63:18).

The Covenant people, through religious adultery, became *lo-'ammi* "not my people" (Hos 1:9-10, [H 2:1]; 2:23 [H 25]). They are destroyed as God's people "because of lack of knowledge" (Hos 4:6), which implies basically a rejection of the Lord, his covenant, his love and law. Although many of the people backslide and are punished (Jer 15:17), God will maintain a remnant who will be *'am* (Isa 11:11, 16; 46:3; Ex 8:9, 11). He will yet save them (Zech 8:6, 11) and the Lord will say "it is my people" (Zech 13:9).

The Covenant people of the Lord will be one united people. That does not mean only biological descendants of Abraham are the *'am*. From Egypt, as from Assyria (Isa 19:25) and from Israel's surrounding nations, there are those who are to be included and written up as God's people (Ps 87).

The phrase, *'am hā'āreš* "people of the land," is used frequently, but its usage varies from one time to the other. R. de Vaux (AI, pp. 70-72) points out that in earliest history, "people of the land" referred to the body of free men of various nationalities (Gen 23:13). The term is also used to distinguish homeborn from immigrant (Gen 42:6). The whole body of Israel is referred to (Lev 20:4), or the people in distinction from the royal members (II Kgs 16:15). BDB also lists a word *'am* II meaning "kinsman" and this element is indeed used in theophoric names. The usages, however, may be subsumed under *'am* "people."

'im. *With, beside, by, among, accompanying, from among, between* (variations of meaning occur in ASV and RSV).

'im, the preposition, as *'am* the noun, expresses the concept of inclusiveness, togetherness, company (cf. UT 19: no. 1863). Men can be

together; fighting with (against) each other (Gen 26:20); they could inherit together or share (Gen 21:10; Josh 22:9); and they could speak with, be pleased with, show kindness to each other.

The points to be emphasized are: 1) the basic conception conveyed is that of fellowship, companionship, common experiences of suffering, prosperity etc.; 2) the term can emphasize a common lot regardless of social status, location etc.; 3) the term, as all other prepositions, may have definite theological implications. All prepositions indicate relationships, and 'im in particular stresses a close relationship. This type of relationship should be maintained between God and man, man and man since it is essential for any person's salvation, eternal life and the worship and service of God.

'et also means "with," but 'im expresses more the concept of relationship and is the more common of the two words.

mē'im. *From, with, beside.* This compound preposition combines two seemingly contradictory terms: together (with) separation (from). The specific thrust is coming apart from being together. The preposition occurs after words such as depart, remove, turn, ask. E.g., a heart is spoken of as possibly turning "from with" God if it turns to the detestable things of Canaan (Deut 29:18).

There are two other distinct usages of *mē'im*. 1) When a person seeks counsel, advice, truth, he asks, enquires, requests from someone. Thus *mē'im* indicates available sources from which help is available. This is particularly true when men turn to God making enquiries and requests. 2) Closely related to the preceding is the idea of origination. Signs and wonders come from God (Isa 8:18). He also sends his word forth pronouncing sentence (Gen 41:32) and producing judgments (II Chr 10:15) and giving peace (I Kgs 2:33).

'immānu'el. *With us is God.* This proper name occurs twice. It is the name to be given to the child to be born of the virgin (Isa 7:14). Isaiah addresses Judah's king, of Davidic lineage, as Immanuel (8:8). The prophet also gives the meaning and application of the name by stressing that, in spite of what a disobedient king does, God will be with his covenant people (Isa 8:10).

The name Immanuel gives expression to the truth God had expressed in various ways to his covenant people in times previous to Isaiah. He had specifically said that he would be God to Abraham and his seed (Gen 17:7). He would go with Jacob (Gen 28:15) and Moses (Ex 3:12). God identified with his people saying he had taken them to be his possession (Ex 19:5-6). The angel of his name would go with and guard his people (Ex 23:20, 24). To Joshua the word came, "As I

was with Moses, so I will be with you" (Josh 1:5). To David God said, "I have been with you" (II Sam 7:9).

Solomon earnestly prayed that the Lord would be with him and Israel as he had been with David (I Kgs 8:57). By various visible means, i.e. cloud, pillar of fire, and the ark of the covenant the Lord confirmed his word. He was with his people. He led, upheld, and blessed them.

Isaiah, speaking to Ahaz, assured him that the faithful covenant God was present as he had been and as he would be in the incarnate Son to be born of the virgin. Thus the past, present, and future intimate relationship of God's presence with his people is summed up in the name Immanuel.

For a fuller statement from the biblical point of view cf. E. J. Young "Immanuel," NBD p. 556-57; for a modern critical statement, C. North in IBD.

'ūmmā. *Against, over against, at, beside, hard by; exactly as.* (ASV and RSV have variations.) This preposition indicates relationship of close proximity, or opposite to, e.g. certain parts of the tabernacle (Ex 25). Shimei stood 'ūmmā "opposite" David and threw stones 'ūmmā "close to" him (II Sam 16:13).

G.V.G.

1641 עָמַם ('āmam) II, *darken, dim* (e.g. Ezk 31:8).

1642 עַמּוֹן ('ammōn), עַמּוֹנִי ('ammōnī) *Ammon.*

Derivative

1642a עַמּוֹנִי ('ammōnī) *Ammonite*

'ammōn. *Ammon.* This proper noun may be related to the root 'āmam. In Ugaritic the three radicals 'mn indicate either an emphatic use of "with" or of "with me" (UT 19: no. 1868-69). But Gordon suggests (no. 1861) that the final "n" is an emphatic element on the prep. 'im.

The name states more than a kin relationship (cf. "kinsman"). Lot's younger daughter, in naming her son Ammon, gives expression to the incestuous relationship by which she conceived; i.e. "a son by my father" (Gen 29:30-38). The OT tells us nothing about Ammon's youth, or that of his brother-cousin Moab (who was born also by an incestuous relationship). This is known: Israel in the Conquest was not permitted to and did not molest or attack Ammon's descendants or take property from them because of God's promise to Abraham's nephew Lot (Num 21:24; Deut 2:19). Israel had to consider Ammon as their kinsman also. They had to respect him as one who had a specific relationship to their father Abraham.

God had given himself as a blessed possession to him and his seed. Thus Ammon's religious privileges and responsibilities towards Israel (and Moab) cannot be gainsaid.

'ammōni. Ammonites. The Ammonites, descendants of Ammon, lived on the east side of Jordan, north of Moab. The Lord destroyed the Rephaim, called Zamzumim who lived there. Later, part of the area was taken from the Ammonites by the Amorites who came from the west side of the Jordan (Num 21:25–25). When the children of Israel sought to enter the promised land from the east bank of the Jordan, the Ammonites had every opportunity to "be blessed" through a friendly cooperative relationship with Abraham's descendants (Gen 12:1–3). Israel did not attack their distant kinfolk, the Ammonites (Deut 2:37), as they did the Amorites and others dwelling in the Gilead and Bashan regions. But the Ammonites joined Moab on various occasions seeking Israel's ruin. They were therefore denied the right to have one Ammonite identify with covenant Israel for at least ten generations (Deut 23:3–6). However, Solomon brought Ammonitish women into his harem (I Kgs 11:1). One of these was Na'amah the mother of Rehoboam (I Kgs 14:31).

The Ammonites were defeated by the Israelites at various times, by Jephthah (Jud 11), Saul (I Sam 11), David (II Sam 10, 12). The Ammonites had their own deity named Milcom (I Kgs 11:5). They also worshiped Chemosh, the god of Moab (Jud 11:29, mentioned also on the Moabite stone). Both were also worshiped by the Israelites at times.

The Ammonites afflicted the descendants of Abraham continuously (Amos 1:12–15; Jer 40:13; Neh 2:10, 19). Various prophets pronounced God's curse upon them (Zeph 2:8, 9; Jer 49:1–6; Ezk 25:1–7). Instead of enjoying covenant blessings, their attitude toward the covenant people brought them God's curse.

G.V.G.

עֲמָנוּאֵל ('immānū'ēl). See no. 1640d.

1643 עָמַס ('āmas), עָמַשׁ ('āmaš) *to load, carry a load* (e.g. Gen 44:13; Neh 13:15).

Derivative

1643a מַעֲסָה (ma'āmāšā) *load, burden* (Zech 12:3).

1644 עָמַק ('āmōq) *be deep, make deep, be profound*. (ASV, RSV translate similarly.)

Derivatives

1644a עֵמֶק ('ēmeq) *valley*.

1644b עֵמֶק ('ōmeq) *depth* (Prov 9:18; 25:3).

1644c עֵמֶק ('āmēq) *deep*.

1644d עֵמֶק ('āmōq) *deep*.

1644e מַעֲמָקִים (ma'āmaqqīm) *depths*.

The verb 'āmōq may be compared with its synonym *shāqā* "to sink down," and the nouns *m'šōlā* "deep, depths," *šūlā* "abyss," and *t'hôm* "deep." It is cognate to Arabic *'amuqa* "to be deep; "Akkadian *emēqu* "to be (deep) wise" (cf. *emūqu* "power, ability"); and Ugaritic *'mq* II, "strong" (see Gordon, UT 19: no. 1874).

The verb 'āmōq is found in the Qal stem in an exclamation of descriptive praise in Ps 92:5 [H 6], where the Psalmist exults: "How great are your works, O LORD! / your thoughts are very deep!" In the other eight uses, 'āmōq is in the Hiphil, "to make deep."

In the Emmanuel prophecy Yahweh speaks to Ahaz through Isaiah, challenging him to ask for a sign to vouchsafe the surety of his words concerning Rezin and Pekah, "those two smoldering stumps" (Isa 7:4). God casts the verbal gauntlet that Ahaz make his request "as deep as Sheol or as high as heaven" (Isa 7:11). (This assumes *sh'ālā* is Sheol with a locative *hē*. The alternative is "make deep his request or make it high above." So Young, E. J. *The Book of Isaiah*, Eerdmans, 1965, Vol. I, pp. 277–78. Cf. also KJV and NIV. Young takes *sh'ālā* as a "paragoric imperative" preceded by a Hiphil inf. used adverbially.) Ahaz, in feigned piety, demurs. The remaining examples of 'āmaq are all severely judgmental. Isaiah 29:15 pronounces "woe on those who deeply hide their plans from Yahweh / and do their deeds in the dark," as though God does not see or know! (Cf. Isa 30:33, of Tophet [q.v.] made deep as a funeral pyre for the king of Assyria; 31:6, of Israel which had "deepened apostasy.") Jeremiah warns his hearers to flee for shelter from judgment, to "dwell in the depths" (Jer 49:8, of Dedan; 49:30, of Hazor). Hosea 5:2 is difficult to render, but the general intent is likely, "the revolvers have gone deep in depravity" (so NASB, but see commentaries; cf. 9:9).

'ēmeq. Vale, valley. (ASV, RSV similar). A common noun in the OT, cognate to 'mq I in Ugaritic.

The noun 'ēmeq "valley" (Ugaritic 'mq I), is a common term, used seventy times in the OT, generally in specific geographical phrases such as "the valley of Siddim (Gen 14:3). In Num 14:25 there is a bitter reminder to the sinning and rebellious Israel that at that time the Amalekites and the Canaanites were living in the valleys (enjoying the produce of the land). It was in the valleys of Canaan that agriculture was maintained (e.g. I Sam 6:13; Jer 49:4; Ps 65:13 [H 14]), as the hills were more eroded. It was also in the valleys that chariots could be used to best advantage (see

Josh 17:16). In the series of wars between Israel and Syria in the days of Ahab, the Syrian counselors erred greatly in supposing that Yahweh was a god of the mountains only, and impotent in the plains and valleys (I Kgs 20:22–30). Valleys figure in the description of judgment by God in prophetic writings. Micah 1:4 speaks of mountains melting under him, "And the valleys will be split / like wax before the fire / like water poured down a steep place."

'āmēq. Deep, strange. Used of speech, this adjective is best rendered "unintelligible" with the NASB (Isa 33:19; Ezk 3:5–6), or "obscure, foreign" with the RSV. Compare the wry *lō'ēz* of Egyptian language in Ps 114:1.

'āmōq. Deep, deeper. (ASV, RSV similar.) This adjective occurs sixteen times in the OT (seven in Lev 13 of the severity of leprosy). In Prov *'āmōq* describes a man's speech and thoughts (Prov 18:4; 20:5), and the disastrous destruction to be found in harlots (Prov 22:14; 23:27).

ma'āmaqgim. Deep, depths, of literal waters (Isa 51:10), and figurative (Ps 69:2 [H 3], 14 [H 15]; 130:1—an emblem of distress; cf. Ezk 27:34 of the fall of Tyre).

R.B.A.

- 1645 *עָמַר ('āmar) *I, bind sheaves.* This denominative verb occurs only once (Ps 129:7), in the Piel.

Parent Noun

- 1645a עֹמֶר ('ōmer) *I, sheaf* (e.g. Deut 24:19; Lev 23:11).
 1645b עֹמֶר ('ōmer) *II, omer* (Ex 16). One-tenth of an ephah (q.v.).
 1645c עֲמִיר ('āmīr) *swath, row of fallen grain* (e.g. Amos 2:13; Jer 9:21).

- 1646 *עָמַר ('āmar) *II, deal tyrannically with.* Occurs only in the Hithpael (Deut 24:7; 21:14).

עָמַש ('āmaš). See no. 1643.

- 1647 עֲנָב ('nab). Assumed root of the following.
 1647a עֲנָב ('ēnāb) *grape(s)* (e.g. Deut 32:14; Gen 40:10).

- 1648 *עָנָג ('ānōg) *be soft, delicate.* Occurs only in the Pual (Jer 6:2) and Hithpael (e.g. Deut 28:56; Isa 66:11).

Derivatives

- 1648a עֲנָג ('ōneg) *daintiness, exquisite delight* (Isa 13:22; 58:13).
 1648b עָנָג ('ānōg) *dainty* (Isa 47:1).
 1648c תַּעֲנֻג (ta'ānūg) *daintiness, luxury.*

- 1649 עָנַד ('ānad) *bind around, upon* (Job 31:36; Prov 6:21).

Derivative

- 1649a מַעֲדָנוֹת (ma'ādannōt) *bonds, bands* (Job 38:31; I Sam 15:32). Apparently from *'ānad* by metathesis.

- 1650 עָנָה ('ānā) *I, to answer, respond, testify, speak, shout.* (ASV and RSV translate similarly, but the RSV more clearly brings out secondary meanings.)

Derivatives

- 1650a עֲנָה ('ōnā) *cohabitation* (Ex 21:10; Hos 10:10).
 1650b עֵת ('ēt) *time.*
 1650c עַתָּה ('attā) *now.*
 1650d עֵתִי ('itti) *timely, ready* (Lev 16:21).
 1650e יָעַן (ya'an) *on account of.*
 1650f מַעֲנֵה (ma'āneh) *answer, response.*
 1650g לְמַעַן (l'ma'an) *in order that.*

Basically, the root *'ānā I* signifies a response. In several connotations it attests scattered meanings in Ugaritic, among them "to speak" or "to say." Distinguish this root from *'ānā II*, "occupy"; III, "afflict," "oppress," "humble"; IV, "sing." It occurs 617 times.

The most frequent meaning of this root is "to answer," and it is often used with *'āmar*, less often with *dābar*. It is sometimes used in a non-verbal clause. It corresponds to *qārā* "to call" and (less often) *zā'aq* "to cry out." God is not bound to answer the person who calls on him. Hence, the Psalmist uses "answer me" in pleading for God's grace (Ps 4:1 [H 2], 13:3 [H 4]). Thus it may occur as part of the normal motif petitioning God to be favorable in the petition section of lament psalms. Samuel warns Israel that God will not answer their prayer for relief when distress comes upon them as a result of rebellion (I Sam 8:18). All the prophets record the silence of the Almighty (Mic 3:4; Isa 46:7). When directed to God this root parallels words intimating God's hearkening (Ps 55:2 [H 3]) to the situation and delivering the petitioner (Ps 60:5 [H 7]). God may respond verbally (Isa 14:32) or nonverbally as with fire (I Chr 21:26) or thunder (Ex 19:19). In all instances it is clear that "to answer" the prayer is equivalent to looking with favor on the petition. The basis of such a petition is the righteousness, mercy, and veracity of God (Ps 69:13 [H 14]). The petition often asks for spiritual salvation (Ps 20:6, [H 7], 9 [H 10], 38:15 [H 16]), and/or physical salvation (Ps 22:21 [H 22], 60:5 [H 7]). It is noteworthy that the pleas introduced by this root are often for *yāsha'* "salvation," and that God is the only savior (Ps 118:21). When God called on man by his word (through Moses

and the prophets) he expected an answer, an appropriate response of obedience. To refuse was to sin (Jer 7:13; Isa 65:12).

One secondary meaning of this root is "to testify" with the emphasis on speaking ('*ūd*, q.v.). In many such cases a trial (*riḥ*,) is in view (I Sam 12:3). This is especially interesting in passages like Isa 3:9; 59:12; and Jer 14:7 where men are tried and found guilty by God. This usage has a more general meaning, however, as is evidenced by its occurring in the ninth commandment (Ex 20:16). Usually, this usage appears as an idiom, '*ānā b*', but there are exceptions (Ex 23:2; Hab 2:11).

Another secondary meaning is "to speak" (see Joūn, "Respondit et Dixit"). The root often is used of initiating conversation (Job 3:2; Song 2:10; I Sam 9:17). It can refer to loud crying out as of animals (Isa 13:22) or shouting as of a victory cry (Ex 32:18; Jer 51:14).

In the case of *l'ma'an* (see also below) the connotation "in order that" occurs with some known and intended end in mind, hence, "to the intended response that." Abraham told Sarah to say that she was his sister so that it might go well with him (Gen 12:13). Jehu arranged a feast ostensibly to honor Baal but secretly in order to destroy the worshippers of Baal (II Kgs 10:19). This aids in understanding passages like Jer 7:10, in which the people are chided for coming into the temple while loving sin and "fearing" God. Actually, they were trying to placate God so that they could continue their sin.

This word is also used in connection with God's action in history. In Gen 50:20 Joseph tells his brothers that they intended harm to him when they sold him into slavery (Gen 37:22). He also told them that God was active in all this "in order that" (i.e. to the intended and accomplished end) good might come to him. When God explained to Moses that he would harden Pharaoh's heart, the action (hardening) clearly is initiated by God, not Pharaoh. God is following a plan, since this "hardening" has a predestinated end: first, that God's glory might be displayed in the signs, and second, that God's glory might be recounted in testimony and that God's glory might be displayed in his causing the wrath of man to praise him (Ps 76:10 [H 11]). So, too, God hardened Sihon's heart (Deut 1:30) to the end that he might deliver him into Israel's hands. The basis of this hardening, however, was doubtless judicial and because of past sin.

When used to mean "in view of," *l'ma'an* does not specifically express causation. In passages like Deut 3:26 God is said to be angry with Moses in view of the people's sins. Cf. also Dt. 1:37 where *big'alal* is used "on account of the people," instead of *l'ma'an*. The Psalmist prays for God to take over his life in view of the

strength of his foes (Ps 5:9). God is praised for using the weak things (babes and infants) to establish a bulwark. He does this not because of, or to the advantage of his foes, but in view of them (Ps 8:2 [H 3]).

Sometimes the word is used (perhaps ironically) to show the foolishness of man's sins. In Isa 30:1 God condemns the people for false spiritual alliances to the end that they might add sin to sin. In Jer 44:8 God asks if their idolatry is to destroy themselves (cf. Hos 8:4; Amos 2:7; Mic 6:16). Obviously, they did not intend to destroy themselves or offend the deity. Their intention was the opposite. But they erred in straying from God's word. Good intentions were not enough.

As a preposition, *l'ma'an* designates the one who is to be vindicated, i.e. established as right. We see this in Gen 18:24 where Abraham asks God if he would spare Sodom for the sake of fifty righteous. Will he approve their righteousness, thus demonstrating that righteousness is indeed pleasing in his sight, or will their righteousness issue in futility (and destruction)? This question was very important to Abraham at that early stage of his walk with God. Would God keep his promise to reward obedience (righteousness)? Abraham learned the lesson; and he obeyed God (on the basis of believing God's promises of ultimate reward) in acting (righteous acts) as God required, and it was reckoned to him for (saving) righteousness. Ps 51:4 [H 6] is of interest. It does not mean that David sinned so that God's righteousness might be made manifest in his verdict. Rather David confesses that he sinned in order to establish the fact that God would be just should he give the verdict that David must die for his sin.

Many passages record action (intended or accomplished) for God's sake. Indeed, it is the Psalmists' frequent plea that God will save, lead, deliver, quicken, etc., for his sake, i.e. to demonstrate before the creation, the wicked, or the righteous (or all three) the certainty of his covenant (Ps 25:11; 143:11; Jer 14:21).

Bibliography: Gowan, Donald, "The Use of *ya'an* in Biblical Hebrew" VT 21: 168-85. Joūn, P., "Respondit et Dixit," Bib 13: 309ff. TDNT, VIII, pp. 6-15. THAT, II, pp. 335-40.

R.B.A.

'ēt. *Time, space of time, appointed time, proper time.* The ASV and RSV translate this word identically except for a few instances involving secondary meanings. Although BDB lists *'ēt* as a derivative of *'ānā* I, *to answer, respond*, it is difficult to trace any relationship. A clearer tie is perhaps with *'ānā* II, *to be occupied* (i.e. the filling of time?). The basic meaning of this word relates to time conceived as an opportunity or season. Other words similarly rendered are:

z^rman an Aramaic loan-word with a very similar meaning; *yôm* emphasizing the division of time into regular units; *mô'ēd* emphasizing the idea of appointment (it is sometimes used to further define 'ēt, e.g., Ps 102:13 [H 14]); *pa'am* denoting short spaces (beats) of time (cf. *regel*). Our word occurs 290 times.

Our word can apply to extensions of time. It is used of particular points in time as an hour of the day (Ex 9:18; Josh 11:6). It is used of an occasion such as the completion of childbearing (Mic 5:3 [H 2]), to mark the situation prevailing when Michael stands in God's court (Dan 12:1), and (used distributively) when Israel's judges are to function (Ex 18:22). It is used of a period narrowly conceived as late afternoon (perhaps dusk, Gen 21:11), and as the period when Nehemiah's enemies were writing and registering their complaint (Neh 6:1). It can refer to an extended period as well, e.g. the time during which the tabernacle rested at Gibeon (I Chr 21:29), and the period of God's gracious covenantal treatment of Israel (Ezk 16:8).

There are many situations which 'ēt describes. We will look at only three.

First, it is used of the usual, the regular events, such as rains (Ezra 10:13), harvest (Jer 50:16), seasons of the year like spring, the time of pregnancy (Gen 18:10, 14), the migratory time of birds (Jer 8:7), and mating season (Gen 31:10). God is consistently presented as the orderer (controller) of all recurring events. Secondly, it is used of the appropriate time for unrecurrent incidents such as death (Eccl 7:17). Thus those who return from the Exile plead that it is not the appropriate time for rebuilding the temple (Hag 1:2). Eccl presents God as the one who has designed life's components so that each has a suitable season (3:11; cf. Prov 6:14). In Lev 26:4 God asserts his sovereignty over rain. He tells Job (38:32) of his control over the stars. The Psalmist (104:27) notes God's maintenance of the seas and all that is in them according to their proper times. Just as all creation suits his plan, so he requires man to arrange life according to its times (i.e. according to his law, Jer 8:7). When man fails to do this God promises judgment. So, the Psalmist reminds God that it is time for him to act (119:126). Finally, the word connotes a fixed, set time or period (I Chr 9:25). As such it is what astrologers claim to discern (Est 1:13), but God alone knows such hidden matters because he controls them. Therefore, in the prophets God speaks of his appointed judgment (Jer 8:12), of a point (time) when all will be consummated (Dan 12:9), and which will result in an extended period (time) of glory and blessing for his people (Jer 3:17; 50:20).

'attā. *Now, at this time, henceforth, straightway, whereas.* (ASV, RSV similar.) Related to the He-

brew noun 'ēt "time" (q.v.), the adverb 'attā is derived from a root 'ānā (with assimilation of the *nun*). The adverb occurs in Ugaritic as 'nt, a word to be distinguished from the goddess 'nt (Anat, see UT 19: nos. 1888, 1889). In Arabic the cognate is *al-āna*, "at the time, now" (with def. art.).

The adverb of time 'attā, found frequently in the OT (425 times), is rendered usually as "now." As developed by KB this term may include the following nuances: "now (in the present moment)," as in Jud 11:8, "we have turned to you now;" now (with the present state of affairs)," as in Gen 19:9, "now we will deal worse with you than with them"; and "now (after what has happened)," as in Gen 22:12, "for now I know that you fear God." Very often 'attā with the conjunction (*waw*), "and now," introduces the next point in consequence, as in Isa 5:3, "And now, O inhabitants of Jerusalem and men of Judah, / judge between me and my vineyard." If the conjunction is adversative (determined by context), then the rendering is "but now," as in Isa 1:21, "Righteousness once lodged in her, / but now assassins." 'attā may be contrasted with 'āz "then," as in Josh 14:11, "as my strength was then, so my strength is now." The adverb may be contrasted with future time as well, as in Balaam's wistful, "I see him, but not now" (parallel to "near," Num 24:17).

The adverb 'attā is found in prophetic contexts of the imminent activities of Yahweh—activities of blessing, "Behold I will do something new, / now it will spring forth" (Isa 43:19); and judgment, "Now I will arise, says Yahweh, / now I will be exalted, now I will be lifted up" (Isa 33:10). "Now" in some prophetic contexts could be used from the prophetic standpoint of events or states still future; e.g. "Jacob shall not now be ashamed, nor shall his face now turn pale" (Isa 29:22).

ya'an. *On account of, because,* is used as a preposition or conjunction. It indicates purpose: perhaps, "in response to." When joined with *ki* or 'āsher it is the most common causal conjunction. Simple ya'an can serve the same function (GKC, sec. 158b). Once it occurs with *mā* "why," i.e. "on account of what" (Hag 1:9), and several times it is repeated for emphasis (e.g. Lev 26:43; see Donald Gowan, "The Use of ya'an in Biblical Hebrew").

ma'āneh. *Answer, response.* Cf. Ugaritic *m'n* used of a reply to a letter or school examination questions.

l'ma'an. *In order that, in view of, provided that* (conjunction, rarely used; cf. M. Dahood, *Psalms*, III, in AB, p. 216), for the sake of—(preposition). Grammarians differ as to whether

1651 עָנָה ('ānā)

l' *ma'an* with an infinitive is a preposition (BDB, p. 775) or a conjunction (KB, p. 549). The RSV and ASV usually agree although in some cases the RSV brings out secondary connotations better. *l'* *ma'an* seems to be related to 'ānā I, "to answer, respond." *ma'an* may mean "that which corresponds to." (cf. further on usage earlier under 'ānā I).

L.J.C.

1651 עָנָה ('ānā) II, be occupied, busied with (Eccl 1:13; 3:10).

Derivatives

1651a עֲנֵי ('inyān) *occupation, task*. Only used in Eccl 1:13; 2:23, 26; 3:10; 4:8; 5:2, 13; 8:16.

1651b מַעֲנֵה (ma'ānā) *place for task*, i.e. field (Ps 129:3; I Sam 14:14).

1652 עָנָה ('ānā) III, afflict, oppress, humble.

Derivatives

1652a עָנָה ('ānāw) *humble*.

1652b עָנָה ('ānāwā) *humility*.

1652c עָנִית ('ēnūt) *affliction* (Ps 22:25).

1652d עָנִי ('ānī) *poor, afflicted*.

1652e עָנִי ('ōnī) *affliction, poverty*.

1652f תַּעֲנִית (ta'ānīt) *humiliation (by fasting, Ezra 9:5)*.

The primary meaning of 'ānā III is "to force," or "to try to force submission," and "to punish or inflict pain upon," mostly in the Piel. Birke-land (see Bibliography) defines the verb "to find oneself in a stunted, humble, lowly position." Consequently it is not predicated of God in the Qal. It is distinguished from 'ānā I, answer; II, occupy; IV, sing. It differs both from *šārar* which connotes restriction or binding; from *yāgā*, the emotional side of distress (i.e. sorrow, grief), from *shāpal*, the objective state or condition of being low and/or humble, and from *kāna'* implying submission to another's will. Ugaritic attests this root with the meaning "cowed, humbled" (active) and "was humbled, punished" (passive). The Bible attests this root over two hundred times.

The verbal form occurs a few times in the Qal having varying shades of meaning. It most often occurs in the Piel (intensifying the concept). The Niphal and Hithpaël usages offer some interesting shades of meaning.

The verb is used in several ways. It is used of what one does to his enemy. It describes the discomfort Sarah inflicted upon Hagar (Gen 16:6) and what the lawless do to the defenseless (Ex 22:22 [H 21]). It speaks of the pain inflicted on Joseph's ankles by the fetters (Ps 105:18). It sets forth what Egypt did to Israel (Ex 1:11–12: this

was more than slavery). In Num 24:24 and Jud 1 it describes the physical pain brought by war. It is used for what God does to his enemies (Deut 26:6).

God uses affliction to prompt repentance; for example, the purpose of the wilderness wandering was to humble Israel (Deut 8:23). This is a recurrent theme in Scripture. The Exile is similarly viewed as to nature and end (Ps 102:23 [H 24]; Isa 64:12 [H 11]; Zech 10:2). God is therefore thanked for affliction (Ps 88:7 [H 8]; 90:15; 119:75; Lam 3:33). Onlookers are wrong to say that God afflicts the Messiah (Isa 53:4) because of his sin.

Another theological theme frequently connected with this word is self-inflicted inner pain expressing contrition and often accompanied by fasting. These are commanded by God (Lev 16:29, 31) for the Day of Atonement. It is striking that this is the only time such fasting and contrition are enjoined by God. The Niphal usages of the word are reflexive, emphasizing self-affliction (Ps 119:107; Isa 58:10). The Messiah is to afflict himself for the sins of his people (Isa 53:7). On the other hand, the verb may denote here the Messiah's humbling by submitting himself to the oppressions of the ungodly. The Psalmist uses this concept to emphasize the extent of his solicitude even for his enemy (Ps 35:13).

The Hithpaël stem is used to indicate submitting oneself to reproach (Gen 16:9) and fasting and contrition (Ezr 8:21; Dan 10:12).

This root may also be used to denote humbling. A young lion is undaunted at the shepherds' voices (Isa 31:4; cf. Ugaritic III AB. B [UT 16: text 137] 24, 26). Pharaoh refuses to submit himself to the Lord (Niphal Ex 10:3). Judgment is not humbled or brought low (and thus violated) by God (Job 37:23). The Psalmist says that God has weakened (brought low) his strength; God has shortened his days (Ps 102:23 [H 24]). One can also bow down or humble his soul by a binding oath (Num 30:13 [H 14]).

This verb is applied to the forcing of a woman including a captive woman later rejected (Deut 21:14) or cases of pre-marital relations (Deut 22:29; Gen 34:2). It can be a capital offence (Deut 22:24).

'ānāw. Humble, meek. This adjective stresses the moral and spiritual condition of the godly as the goal of affliction implying that this state is joined with a suffering life rather than with one of worldly happiness and abundance.

'ānāw expresses the intended outcome of affliction: humility. Moses' description of himself (Num 12:3) as such a man is no proud boast, but merely a report of his position: absolute dependence on God (cf. Paul's statement in Acts 20:19). Of all men he was most properly related to

God. Throughout the rest of scripture such an attitude and position is lauded as blessed and to be desired. This is the goal which God intended when he afflicted his people and toward which they are to endure affliction. The humble consider and experience God as their deliverer (Ps 10:17; 76:9 [H 10]) receiving grace (undeserved favor) from him (Prov 3:34). They rejoice when God is praised, seek God (Ps 69:32 [H 33]), and keep his ordinances (Zeph 2:3). They wait on God (Ps 37:11) and are guided by him (Ps 25:9). As such they are commended as being better than the proud (Prov 16:19). They are contrasted with the wicked (Ps 37:11) and the scoffers (Prov 3:34). Isaiah (61:1) writes that it is to such that the anointed of the Lord is to preach the good news of salvation (the parallel here is "the broken-hearted"). They are conscious of divine approval and are confident that in the eschaton God will save them (Ps 76:9 [H 10]; 147:6; 149:4).

It is interesting that the unleavened bread of Passover is called the bread of affliction (Deut 16:3) inasmuch as it constitutes a material reminder of sin which is the ultimate (sometimes immediate) cause of affliction (Ps 25:18), the bondage of sin (especially that hardship in Egypt), and God's deliverance (Lam 3:19).

'ānāwā. Humility, gentleness. This word sets forth the dual qualities gained by man in the school of affliction. Applied to the Messiah it connotes his gentleness in submission to his own nature (Ps 45:4 [H 5]).

'ānî. Poor, weak, afflicted, humble. The 'ānî is primarily a person suffering some kind of disability or distress. (Gray, G. B., *Isaiah*, ICC, I, p. 310).

The 'ānî, although frequently in synonymous parallelism with 'ebyôn and *dal*, differs from both in that it connotes some kind of disability or distress. In Deut 24:14–15 the hired servant is described as 'ebyôn and 'ānî. Israel is told not to oppress their hired servant by withholding the wages due him because he is 'ānî. Furthermore, if he is oppressed he may call on God his defender. We see that financially the 'ānî lives from day to day, and that socially he is defenseless and subject to oppression. Consequently, this word is used frequently in connection with 'ebyôn expressing the difficulty accompanying a lack of material possessions. The people are commanded to give alms to the 'ānî under sanction of God's blessing (Deut 15:11). God instructs his people to grant loans to the 'ānî of Israel even when they have only their outer garment as collateral or pledge (see *ābaṭ*) and not to further afflict them by keeping that garment overnight because the 'ānî would need it to keep warm (Ex 22:25–26), for it was his only outer garment. In Job 9:10 the 'ānî is classed with the stranger as having a

right to the gleanings of the field. 'ānî is distinguished from *dal* (the poor) in Prov 22:22, "Rob not the poor (*dal*) for he is poor (*dal*), neither oppress the afflicted ('ānî) in the gate." God is set forth as the protector and deliverer of the afflicted, and he enjoins his people to be the same. So the one who complies is considered godly (Ezk 18:17), while those who do not are considered ungodly (Job 24:9; Prov 14:21; Isa 58:7).

F. Hauck and S. Schulz argue that this much discussed word is "in the first instance a social and economic term like 'ebyôn, *dal*, *rāsh*, 'one who is in the position of a servant.' It describes a man who has no property and who has thus to earn his bread by serving others" (TDNT, VI, p. 647). They allow that a more developed usage refers to lowliness, distress, reduced circumstances (ibid., 888). They argue that in the Pentateuch it refers to a man with no inheritance, to one wrongfully impoverished whom the Lord therefore especially protects.

It is questionable if there is enough evidence to make these fine distinctions. The Pentateuch, on orthodox dating, was written when no Israelite had landed property, but all were to be given some in due time. The legislation does indeed envision times when people would become poor and would have to sell their land—until the jubilee. Many times these poor people would have been wrongfully impoverished; some times there were other factors. They were not to be discriminated against in judgment. God was their protector as he was the protector of the widow who was a widow through no one's fault. But that the word refers to a particular social class rather than to a social condition seems questionable and difficult to establish.

Material deprivation and the resulting difficulty are closely associated with social oppression. Social affliction is clearly in mind in Isa 3:14 and Ezk 18:17. So, God instructs his people to deal justly with the 'ānî (Isa 10:2). The king is especially charged with overseeing their rights forever (Ps 82:3).

This word can also describe the one afflicted physically as with the Exile (Isa 51:21) or by sickness (Ps 88:15 [H 16]).

Often physical affliction is closely tied to spiritual affliction, as in Ps 22:24 [H 25]. In many instances external affliction engenders inner affliction issuing in a cry to God for help (Ps 25:16; 34:6 [H 7]; 69:29 [H 30]). God's people are frequently described as afflicted (Ps 68:10 [H 11]). God does not forget them (Ps 9:18 [H 19], 74:19). He has pity on them (Isa 49:13), saves them (Ps 34:6 [H 7]), delivers them (Ps 35:10) and bestows favors upon them (Ps 72:2, 4).

Finally, the word is used in the sense of humble or lowly. It describes the Messiah in Zech 9:9. It

1653 עָנָה ('ānā)

is in contrast to the scoffers (Prov 3:34; cf. Jas 4:6) and the haughty (Ps 18:27 [H 28]; II Sam 22:28). Such a one has a contrite spirit (Isa 66:2), is God's turtledove (Ps 74:19), trusts God (Ps 14:6), and is assured of deliverance (II Sam 22:28).

'ānī (afflicted) is often confused with 'ānāw (humility), each being written for the other (or translated for the other as is reflected in the ASV and RSV). Perhaps this is an incidence of the famous *yod-waw* interchange (GKC, sec. 17c; Ernst Würthwein, *The Text of the Old Testament*, p. 72), although not necessarily so. This interchange appears frequently in the plural of the words. Isaiah seems to make no distinction between 'ānī and 'ānāw.

'ōnī. *Affliction*. This word expresses the state of pain or punishment resulting from affliction.

L.J.C.

1653 עָנָה ('ānā) IV, *sing* (e.g. Jer 51:14; Ex 15:21).

When the verb 'ānā I with a similar meaning "answer" is so frequently used, it is inevitable that there will be confusion between the two roots. Nevertheless this root "to sing" should be distinguished. Gesenius-Buhl lists twelve instances in the Qal and three in the Piel, BDB about the same. Some notable instances listed by them are: Miriam's singing after the Red Sea crossing (Ex 15:21, NIV); the worshipers of the golden calf (Ex 32:18); the women who sang David's praises (I Sam 18:7, etc.). Not listed in BDB and more debatable is Hos 2:21-22 [H 23-24] where the translation "sing" might be more apropos to the joyful context than the usual "answer" or KJV "hear."

R.L.H.

עָנָה ('ānāw). See no. 1652a.

עֲנוּשִׁים ('ānūshim). See no. 1659b.

עֲנוּת ('ēnūt). See no. 1652c.

1654 עָנָה ('nz). Assumed root of the following.

1654a עָז ('ēz) *goat, she-goat, kid*. (ASV, RSV similar.)

As may be seen by the doubling of the *zayin* in the plural and suffixed forms, 'ēz comes from a root 'nz; cf. Arabic 'anz^{un} and Akkadian *enzu*, both meaning "she-goat, goat." Synonyms in the OT include 'attūd, šāpīr, šā'ir, tayish (all "he-goat"), š'irā ("she-goat"), šeh and g'dī ("lamb, kid").

Of the seventy-four times 'ēz is used in the OT, fifty-six are in the Pentateuch. Many of these references demonstrate the importance of the goat

in the daily life of Israel from the patriarchal period onward. The kid was used occasionally for food (see Gen 27:9); the she-goat provided milk (see Prov 27:27), skin for leather goods, and hair for cloth (see Ex 25:4; 26:7; 35:6ff.). An animal of such varied uses and dependence was also appropriate for sacrifice. A regular phrase in sacrificial texts is "a kid of the goats" (e.g. Lev 4:23), but the female goat was also sacrificed (e.g. Num 15:27).

Twice in Solomon's Song the woman's hair is described in flowing loveliness, "like a flock of goats moving down the slopes of Gilead" (Song 4:1; 6:5).

R.B.A.

עָנָה ('ānī), עָנָה ('ōnī). See nos. 1652d,e. עֲנוּת ('inyān). See no. 1651a.

1655 *עָנָה ('ānan) I, *bring clouds*. A denominative verb, used once, in the Piel (Gen 9:14).

Parent Noun

1655a עָנָן ('ānān) *cloud, cloudy*.

"Cloud" is the only translation of 'ānān. It occurs about eighty times in the OT, and three-quarters of those refer to the pillar of "cloud" which directed the Israelites through the desert and represented God's presence over the tabernacle (Ex 13, 14, 16, 33, 40; Num 9-12, 14, 16, et al.). In Numbers 9:15-22 'ānān is used eleven times.

After the time of the tabernacle, a "cloud" was present in or over the temple (cf. I Kgs 8:10-11; II Chr 5:13-14). God's presence was accompanied by "clouds" when he met with Moses on Mount Sinai (Ex 19:9, 16; 24:15-16, 18; Deut 4:11; 5:22; Ps 97:2).

"Clouds" will accompany God's eschatological presence in judgment (Ezk 30:3; 32:7; Joel 2:2; and Zeph 1:15; cf. Dan 7:13).

Although most references to "cloud" aside from the "pillar of cloud" pertain to the ordinary kind made of water vapor, Nah 1:3 mentions dust "clouds" and Lev 16:13 and Ezk 8:11 refer to a "cloud" of smoke from burning incense (cf. also Isa 4:5 and Ezk 1:4).

Several times 'ānān is used to illustrate something by its characteristics or functions. Job 7:9 refers to the way "clouds" can disappear and illustrates the way people disappear at death (cf. Hos 13:3). Isaiah also speaks of the way "clouds" disappear, but is referring to the blotting out of sin (44:22). Hosea illustrates transitory goodness to a fast-disappearing morning "cloud" (6:4).

When God answered Job, he alluded to the "clouds" clothing the sea (38:9). According to

Jeremiah (4:13), judgment will rise like "clouds" (of dust?). Ezekiel refers to the shadow a "cloud" casts and compares it to a military horde invading the land (38:9, 16).

It is of interest to note that the Hebrews, far from thinking that rain actually poured through celestial windows, knew very well that rain came from clouds (Isa 5:6; I Kgs 18:44, etc.).

Bibliography: THAT. II. pp. 351-52.

R.L.A.

- 1656 עָנַן ('ānan) II, *observe times* (KJV); *practice soothsaying, practice spiritism* (Berkeley Version, II Chr 33:6); *practice magic* (JB, Lev 19:26); *practice augury* (ASV, Deut 18:10, 14); *practice witchcraft* (Berkeley, Lev 19:26); *soothsayer, enchanter* (AV); *sorceress, diviner, fortune-teller* (Berkeley Version, Jud 9:37); *barbarian* (NEB, Isa 2:6); *Meonenim* (AV, ASV, NAB, Jud 9:37); *cloud* (verb); *bring, gather, or collect* (clouds).

This verb only occurs eleven times. Its meaning is uncertain, as the above list of variant translations demonstrates.

It is questionable whether this variety of occultism is connected with the clouds, as the roots of the two words seem to indicate. Since the future was determined by the position of the stars (astrology), or by examination of the liver of a sacrificed animal (hepatoscopy; cf. Ezk 21:21), even as there are modern tealeaf readers and palm readers, the reading and interpretation of cloud patterns seems a natural explanation.

Another suggestion is that this is an onomatopoeic word. The sound of the word is the sound made by the one performing the art. Similarly, some say that *nāhash* (q.v.), a parallel word, is the snake-like hiss made by a "sorcerer."

Whatever the practice is, it is forbidden by God in Lev 19:26 and Deut 18:10 (cf. v. 14). Among Manasseh's sins was this kind of magic (cf. II Kgs 21:6; II Chr 33:6).

Isaiah (2:6; 57:3), Jeremiah (27:9), and Micah (5:12) make derogatory remarks about those who practice this kind of magic. In these passages, along with those in Deuteronomy, 'ānan occurs in the participial form.

The only other occurrence of the root 'ānan is in Jud 9:37, which the AV translates "the plain of Meonenim," the ASV "the oak of Meonenim," and the NAB "Elon-Meonenim." Others translate it as "the Diviners' Oak" (RSV, JB) and "the Soothsayers' Terebinth" (NEB).

R.L.A.

- 1657 עָנָה ('np). Assumed root of the following.

1657a עָנָה ('ānāp) *branch(es), bough(s)* (e.g. Ezk 17:8; Lev 23:40).

1657b עָנָה ('ānēp) *full of branches* (Ezk 19:10).

- 1658 עָנָה ('nq). Assumed root of the following.

1658a עָנָה ('ānāq) I, *neck* (e.g. Josh 15:14=Jud 1:20).

1658b עָנָה ('ānāq) II, *necklace* (Song 4:9; Jud 8:26).

1658c עָנָה ('ānaq) *serve as necklace*. Denominative verb (Ps 73:6; Deut 15:14).

- 1659 עָנַשׁ ('ānash) *amerce, punish, condemn*. Denominative verb.

Parent Noun

1659a עֲנֶשֶׁת ('ōnesh) *fine*.

1659b עֲנֻשִׁים ('ānūshim) *fines*.

'ānash is a term of legal redress, to punish by a pecuniary penalty (a monetary fine). Other types of punishment are expressed, e.g. by *yāsar* (Piel) "to chastise, discipline, rebuke" and *nāqam* "to take revenge, vengeance" (q.v.).

The verb 'ānash is used in two legal passages in which a monetary fine was to be assessed for a criminal act. In Deut 22:19 a groom who falsely challenged his bride's virginity was to be whipped and then fined one hundred shekels of silver. Exodus 21:22 is the crux passage on abortion and miscarriage in which a fine was to be levied ("he will most certainly be fined") against one who accidentally caused a woman to miscarry. On this verse, see Waltke (below); another view is given by Cotrell (below). There is a somewhat similar law in the Code of Hammurabi (ANET laws 209-214.) 'ānash is also used of tribute to be paid on the deposing of Jehoahaz (II Chr 36:3).

'ōnesh. *Fine, punishment*, used only in II Kgs 23:33 (of tribute) and Prov 19:19 (of penalty).

'ānūshim. *Fines*. Some authorities (e.g. KB, Holladay) identify this as a noun rather than Qal passive participle (found only in Amos 2:8).

Unjust fines are evil (Prov 17:26), but just fines may be instructive (Prov 21:11). Amos 2:8 speaks of people who "drink the wine of those who have been fined"; likely a reference to ill-gotten funds used for the purchase of wine in worship, an "act of gross hypocrisy" (Cripps, *Amos*, p. 143).

Bibliography: Cotrell, Jack, "Abortion and the Mosaic Law," *Christianity Today*, 17:6-8. Cripps, Richard S., *A Critical and Exegetical Commentary on the Book of Amos*, London: S. P. C. K., 1960. Waltke, Bruce, "The Old Testament and Birth Control," *Christianity Today*,

1660 עָסַם ('āsas)

13:3–5. (Also in *Birth Control and the Christian*, ed. Walter O. Spitzer and Carlyle L. Saylor, Tyndale, 1969, pp. 7–23.)

R.B.A.

עָסַם ('āsīs). See no. 1660a.

1660 עָסַם ('āsas) *press, crush, press by treading, tread down* (Mal 3:21).

Derivative

1660a עָסַם ('āsīs) *sweet wine*.

The derivation of 'āsīs would suggest fresh pressed juice. It is only used five times. An exact definition of 'āsīs is difficult because Song 8:2 speaks of the juice of the pomegranate. But Isa 49:26 and Joel 1:5 indicate it was fermented. Joel 3:18 [H 4:18] and Amos 9:13 are inconclusive. Perhaps the word refers to fermented juices in general, from grapes or other fruit. The usual definition "sweet wine" may mislead. "Sweet" wine today is wine that has had the fermentation stopped and has some unfermented sugar. "Sweet" wine of antiquity seems to refer to stronger wine (cf. Greek *gleukas*, Acts 2:13). It may mean wine that was stronger because made from sweeter juice.

R.L.H.

1661 עָפַם ('p'ym), *Kethib*; עָפַים ('ōpāyim), *Qere, foliage* (Ps 104:12). Aramaic loan word according to BDB, but "raven" from a root 'p' according to M. Dahood, *Psalms* III, in AB, pp. 38–39.

עָפַים ('ōpāyim). See no. 1661.

1662 עָפַל ('āpal) *I, swell, be lifted up*.

Derivatives

1662a עָפַל ('ōpel) *I, Ophel, fort, stronghold*.

1662b עָפַל ('ōpel) *II, tumor*.

Some authorities (e.g. BDB) differentiate two roots 'āpal. The only time a form of putative 'āpal I, "to swell," is found is in the classic Hab 2:4, in the phrase "his soul is lifted up" (KJV: ASV, "puffed up;" RSV, "shall fail" [emendation]; NASB, "the proud one"). (See 'āpal II, below.)

'ōpel *I. Ophel, fort, stronghold, tower*. (ASV, RSV, NASB read "hill" in II Kgs 5:24.) The noun 'ōpel "mound, knoll," is a designation for an acropolis within Samaria (II Kgs 5:24), and especially, Jerusalem (seven times). Ophel in Jerusalem is the spur on the eastern hill, running due south, just to the west of the temple area, joining the Kidron Valley on the east. The Ophel was the Jebusite stronghold taken by David (called "Zion" [šīyyôn, q.v.] in II Sam 5:7; cf. S.

Goldman, *Samuel* [Soncino series], p. 214). King Jotham was responsible for building on the wall of Ophel (II Chr 27:3; cf. 33:14). Ophel in Nehemiah's time was occupied by temple servants ("Nethinim," see Neh 3:26–27; 11:21).

The noun 'ōpel is used by Micah in a stunning millennial prophecy: "And Yahweh will reign over them in Mount Zion / From now on and forever. / And as for you, O tower of the flock / Hill of Daughter Zion, / To you it will come— / Even the former dominion will come, / The kingdom of Daughter Jerusalem."

'ōpel *II. Emerods*. (ASV, "emerods, tumors;" RSV, tumors;" NASB, "hemorrhoids;" NIV "tumors.") A noun occurring six times, five in I Sam 5–6, 'ōpel refers to boils or tumors (cf. Arabic 'afl^{un} "tumor, boil of the anus or vulva"). In all instances in the OT it is replaced by the *Qere* t' hōr (q.v.), apparently regarded as a more delicate euphemism by the Sopherim (see C. D. Ginsberg, *Introduction to the Massoretico-Critical Edition of the Hebrew Bible* [Reprint, KTAV, 1966], p. 346). In Deut 28:27 (in the "cursings" formula) Israel is threatened with loathsome diseases of the skin including 'ōpel. The noun figures prominently in the story of the Philistine control of the ark (I Sam 5:6, 9, 12; 6:4–5). Ashdod, Gath, and Ekron (the latter, in threat at least) were scenes of the Lord's affliction of the people by tumors and of the land by mice (I Sam 6:5). Five golden images of the tumors were made, along with five golden mice or rats, at the direction of the Philistine priests as a trespass offering to compensate Yahweh on the return of the ark. The number five represented the pentapolis of Philistia. Hindson writes, "These representations of their plagues were thought by pagan peoples to bring healing from the thing represented. Thus by the pagan notion of sympathetic magic they hoped to rid themselves of the creator's plagues. The mice may indicate that they suffered from the bubonic plague" (*The Philistines*, p. 143). If so, this would be the first time in history when the bubonic plague (characterized by swellings, especially in the lymph glands of groin and armpits) was observed to be associated with rodents.

R.B.A.

1663 *עָפַל ('āpal) *II, presume*. (So ASV, RSV; NASB, "to be heedless.")

This root, to which we may compare Arabic *ḡafala* "to be heedless, neglectful, inadvertent," is found in only one OT passage, Num 14:44 (Hiphil), of Israel's rash and reckless attack on the Amalekites and Canaanites, following her lack of faith and great rebellion. There are some authorities who suggest that the Pual of 'āpal in Hab 2:4 may be from the same root, "to presume, be proud" (e.g. Lisowsky; see root I, above).

עָפָה ('ap'ap). See no. 1582b.

- 1664 עָפָה ('āpar) I, to dust. Denominative verb, occurring only in the Piel (II Sam 16:13).

Parent Noun

- 1664a עָפָה ('āpār) dust, earth, ground, ashes, mortar, powder, rubbish. (ASV, RSV similar, but RSV has "plaster" in Lev 14:41–42, 45, where KJV reads "mortar.")

The masculine noun 'āpār is a common term in the OT (109 occurrences) meaning "dust," i.e. "dry, fine crumbs of earth." A rare synonym is 'ābāq, meaning "dust, soot." Another synonym is 'ēper "dust, ashes," whose paronomasia with 'āpār lends to coupling of the words in a common hendiadys (Gen 18:27; Job 30:19; 42:6) and parallelism (Ezk 27:30). Compare also 'it "mud, clay," and hōmer "mortar, clay." The broader term 'ādāmā "ground, soil," and 'ereṣ "land, territory, earth," should be consulted. Hebrew 'āpār has cognates in Ugaritic ('pr), Akkadian (eperu), and Arabic ('afar^{un}), all meaning "dust, loose earth, debris." The word is found in Amarna Canaanite as ḥaparu (= 'aparu).

The noun 'āpār is used literally in many contexts meaning "dust" or "loose earth." The Philistines filled the wells dug by Abraham with loose dirt (Gen 26:15). Dust from the ground of the tabernacle was to be taken by the priest and added to the holy water and was to be used as a potion in the ritual test for adultery (Num 5:17). Dust and stones were cast at David by the vengeful Shimei in his malicious cursings (II Sam 16:13, see above). Dust was thrown on the head as a sign of grief and mourning. Joshua and the elders of Israel expressed distress in this manner when Israel was defeated at Ai (Josh 7:6; cf. Ezk 27:30; Lam 2:10; Job 2:12; Mic 1:10, rolling in dust). This act of humiliation and self denigration (often accompanied by the wearing of sackcloth) bespeaks dependence upon the God who "formed man of dust from the ground" (Gen 2:7, accusative of material).

Man in his physical body was formed from dust, and it is to dust that his physical body re-

turns (Gen 3:19; Eccl 3:20; 12:7; Job 4:19; 8:19; 10:9; 34:15; Ps 104:29). Probably because of this usage, dust sometimes means just the grave (Job 7:21; 17:16; 40:13; Ps 22:29 [H 30]; Isa 26:19). Dust is used of the surface of the earth (Ex 8:16–17 [H 12–13]; Job 19:25), and is found in parallelism with 'ereṣ "earth" (e.g. Isa 25:13; 26:5). The fact that man comes from the dust of the earth is a reminder of the sovereignty of God in his creative acts, and of the insignificance of man apart from the intervening "breath of life" of his goodness. Man as a fashioned artwork owes praise and obedience to the Potter who fashioned him of clay (see Isa 29:16; 45:9; 64:8 [H 7]; Jer 18:1–14; cf. Rom 9:21). Dust-man became living-man by God's grace; therein lies his humility and his dignity.

Because of the abundance of dust particles on the earth, dust serves also as a figure for abundance in God's gracious promise to Abraham of innumerable descendants (Gen 13:16), a promise renewed to Jacob (Gen 28:14; cf. II Chr 1:9). Something as common as dust serves as well as a figure for worthlessness (Zeph 1:17; cf. Zech 9:3; Job 22:24). Because of its lightness, dust may also serve as a symbol for the scattered: "the king of Syria had destroyed them and made them like the dust at threshing" (II Kgs 13:7).

'āpār "dust," comes from a different root than the noun 'ōper "young hart, stag," and the name Ephraim ('ēper, e.g. Gen 25:4).

Bibliography: THAT, II, pp. 353–55.

R.B.A.

- 1665 עָפָה ('pr) II. Assumed root of the following.

1665a עָפָה ('ōper) stag.

1665b עָפָה ('ōperet) lead. But possibly this is a loan word not related to the root.

עָפָה ('ōperet). See no. 1665b.

עָז ('ēṣ). See no. 1670a.

- 1666 עָשַׁב ('āṣab) I, grieve, displease, vex, wrest.

Derivatives

1666a עָשַׁב ('eṣeb) sorrow, labor.

1666b עָשַׁב ('ōṣeb) sorrow.

1666c עָשַׁב ('āṣēb), עָשַׁב ('aṣṣāb) labor.

1666d עָשַׁב ('aṣṣebet) sorrow, wound.

1666e עָשַׁב ('iṣṣābôn) sorrow, toil.

1666f מַעֲשָׁבָה (ma'āṣēbā) terror.

The root 'āṣab relates to physical pain as well as to emotional sorrow (cf. 'āṣib in Biblical Aramaic, "sad"). Words similar in Hebrew are ḥil / hūl "to writhe," ḥārā "to be hot (with anger)," yāgā Niphal "to grieve," lā'ā "to become tired, weary," kā'as "to be irritated, an-

gry," *mārar* "to be bitter, despairing," *qûṭ* "to feel a disgust," *qûṣ* "to feel a disgust," *tāwā* II, "to trouble" (Ps 78:41), and the noun *rōgez* "turmoil."

The verb *'āṣab* as a term of physical and mental discomfort is used in a variety of contexts. The Qal is found three times in the OT. The prophet-historian of I Kings comments wryly concerning Adonijah that his father had "never crossed him" (I Kgs 1:6, NASB) at any time by inquiring into his activities, a shameful lack of parental interest and discipline. In another passage, Israel is depicted as a forsaken wife who is "grieved in spirit" (Isa 54:6). The third instance of the Qal is in I Chr 4:10 where the translation "hurt" serves as a pun on the name "Jabez" (see below).

The Niphal of *'āṣab* is found seven times; once of physical pain (Eccl 10:9, on the folly of a stoneworker being hurt by his stones). Usually mental and spiritual anguish are depicted by this form of the verb, as in the sorrowful and angry distress of Joseph's brothers on recognizing him (Gen 45:5); Jonathan's anguish concerning his father's foul plots respecting David (I Sam 20:34; cf. 20:3); and Israel's shocked grief at hearing the Torah recited and recognizing their deficiencies (Neh 8:10–11).

Twice the Piel is employed. Psalm 56:5 [H 6] speaks of David's enemies wresting his words (NASB, "they distort my words"). In Isa 63:10 it is declared of Israel that "they rebelled and grieved his Holy Spirit" (cf. Eph 4:30 where *lupeō* is used in a similar manner). The Hiphil of the Hebrew verb is found only in Ps 78:40, parallel to terms for rebellion, tempting, and provocation. One of the two uses of the Hithpael describes the reaction of the brothers of Dinah at her being raped (RSV, "the men were indignant," Gen 34:7). The other is the chillingly familiar prologue to the deluge, the grief in the heart of Yahweh concerning the wickedness of man and his continually evil thought patterns (Gen 6:6).

'ōseb. Sorrow, wicked. (ASV, RSV similar, but add "pain."): Rendered "wicked" in Ps 139:24, "and see if there be any wicked way in me."

'āṣēb, 'aṣṣāb. Labor (so ASV; RSV and NASB, "worker"). Only found in Isa 58:3, "and drive hard all your workers" (NASB).

ma'āṣēbā. Terror. (Literally, "a place of pain"; RSV renders "torment.") Used only in Isa 50:11.

The several derivatives listed above depict many types of pain. In I Chr 4:9–10 there is a pun complex on the name Jabez respecting the pain (*'ōseb*) his mother suffered in childbirth, and his own desire not to be hurt (*'āṣab*, Qal). His name, *ya'beṣ*, has the same root letters as *'šb*, but with

metathesis (see J. M. Myers, *I Chronicles*, AB p. 28).

Yet another example of paronomasia is noted by Cassuto in the pericope of the curse on the woman and the man in Gen 3. Pain in childbirth (*'issābôn* and *'eṣeb*) are decreed for the woman (Gen 3:16), and pain in manual labor (*'iṣṣābôn*) is decreed for the man (Gen 3:17). Both came as the consequence of the sin respecting the fruit of the forbidden tree. Noting that "tree" (*'ēṣ*) has the same first two radicals as pain (*'šb*), Cassuto writes, "It was with respect to *'ēṣ* that the man and the woman sinned, and it was with *'eṣebh* (pain) and *'iṣṣābhôn* (toil, suffering) that they were punished" (*Genesis*, I, p. 165).

R.B.A.

1667 *עָשַׁב ('āṣab) II, *make, worship*. Occurs only in the Piel.

Derivatives

1667a עָשַׁב ('eṣeb) *idol*.

1667b עָשַׁב ('ōṣeb) *idol* (Isa 48:5).

1667c עָשַׁב ('āṣāb) *idol*.

The verb *'āṣab* II is used only twice in the OT. In Job 10:8 the protagonist speaks of Yahweh shaping or fashioning him. A difficult construction is found in Jer 44:19, where the Hiphil reads "to make an image" (rendered "worship" in AV and ASV). The RSV smooths this to "bearing her image," and NASB to "in her image."

'eṣeb. Idol. Better, "vessel," something fashioned. RSV has "pot," NASB "jar." Only in Jer 22:28, used figuratively of Coniah = Jehoiachin.

'āṣāb. Idol. Always in the plural in the OT. Idols, though fashioned of silver and gold, are poor substitutes for the living God (e.g. Ps 115:3–11).

There doubtless are places where *'eṣeb* "idol" should be read for *'eṣeb* "sorrow" or its similar words. Ps 16:4 (though fem.) may be a case in point.

R.B.A.

עָשַׁב ('iṣṣābôn). See no. 1666e.

עָשַׁב ('aṣṣebet). See no. 1666d.

1668 עָשַׁד ('šd). *Assumed root of the following.*

1668a מַעְשָׁד (*ma'āṣād*) *axe* (Jer 10:3; Isa 44:12).

1669 עָשָׂה ('āṣā) I, *shut* (Prov 16:30).

1670 עָשָׂה ('šh) II. *Assumed root of the following.*

1670a עֵץ ('ēṣ) *tree, wood, timber, stock, plank, stalk, stick, gallows.*

1670b עֵשָׂה ('ēṣā) *trees* (Jer 6:6).

'ēš. *Tree, etc.* This masculine noun, which occurs 329 times in the OT, is the basic term for "tree" and also wood products. It is common Semitic, found in Ugaritic ('š "tree, vine"), Akkadian (iṣ [s] u), Arabic ('gīṣṣat^{un}), Aramaic ('a', etc.).

The noun 'ēš is used regularly throughout the OT, with good distribution in the Torah, the prophets, and the writings. The singular may be used in a collective sense, "trees" (e.g. Lev 26:20, "the trees of the land"), or of a single tree (e.g. Prov 11:30, "the fruit of righteousness is a tree of life," reminiscent of Gen 2:9). The plural is also to be found of standing trees (cf. Joel 1:12; Isa 7:2, etc.). More often the plural is employed for felled wood, used for timber (I Kgs 5:18 [H 32]), kindling (I Kgs 17:10, 12), sacrificial firewood (Gen 22:3ff.), and wooden articles (Ex 7:19). The singular 'ēš may be used for felled lumber or wood as well. Some examples are: a wooden idol (Hos 4:12; כִּנְי "stocks"), timber (Hag 1:8), wood paneling (Ezk 41:16), a wooden vessel (Lev 11:32), a wooden handle (Deut 19:5; כִּנְי "helve"), a stick (Ezk 37:16ff.), a shaft (II Sam 23:7), a gallows or pole (Gen 40:19—probably a pole for impaling), etc. Many varieties of trees are mentioned in the OT. Specific types of lumber listed include: "gopher" (the wood of Noah's ark, Gen 6:14; the variety is still in doubt, but perhaps is a type of pine or cypress), acacia (used in the construction of the tabernacle, Ex 25:5ff.; "shittah" and "shittim" in כִּנְי), "almug" (or "algum," used in the temple, I Kgs 10:11ff.; likely *Juniperus phoenicea excelsa*; Ugaritic 'lmg), cedar (used in the temple, I Kgs 6:9; the cedars of Lebanon are proverbial in the OT as producing great timber), pine (used in construction, I Kgs 5:8ff.; some authorities render Hebrew *b'rōsh* as "juniper" or "cypress"), olive (*zayit*, "olive tree" is found often in the OT; occasionally one reads 'ēš *shemen*, "tree of oil," e.g. I Kgs 6:23), etc. When 'ēš means "tree" as against "timber, lumber," it may refer to any kind of tree in God's creation (cf. Gen 1:11–12, 29).

In reading the description of the righteous in Ps 1:1–3, the reader, especially if he is from a forested area, must not miss the emotional "wallop" in the image of the tree, with its splendid emblematic parallelism. A tree in Palestine, particularly in the southern areas, was something rather special. It is fitting that one remember that Eden was characterized by the plenitude of its trees (Gen 3:9). An oasis in the desert of southern Palestine was a haven from oppressive heat, a place of rest and refreshment; but also it was a grim reminder of a well-watered and heavily forested garden lost through human sin. In that garden of God there were two trees of paramount import, the tree of life and the tree of knowledge of good and evil. We agree with Kidner that re-

specting these two trees, "there is much to commend the literal sense, naive though it may seem." The trees were not magical, but were the means of confronting man with God's will, giving "man a decisive Yes or No to say with his whole being" (*Genesis*, p. 62). It is morally significant that God fenced these two trees not with a wall but with his word!

It is no accident that human sin which began at the foot of a tree, the "tree of the knowledge of good and evil" (Gen 2:9ff.), found its resolution on another tree, the cross of Calvary. There is a poetic justice in the use of trees in the *Heilsgeschichte*, the redemptive directedness, of biblical theology. Satan's victory over the woman (and the man!) beneath the branches of that primal tree led to his own defeat beneath the crossed beams of another tree on which the Prince of Glory and the embodiment of wisdom died. Henceforth there is another tree, the "tree of life" of the New Jerusalem (Rev 22:2), transplanted, as it were, from Eden (Gen 3:9, 22, 24), and made available for the inhabitants of the coming new world.

'ēšā. *Trees.* A feminine collective noun, "wood," found only in Jer 6:6 (but some read as 'ēš with the 3d feminine pronominal suffix, "her trees"; so RSV, NASB).

Bibliography: For brief discussion and illustrations of the various types of trees in the OT, consult *Fauna and Flora of the Bible: Helps for Translators*, XI, London: United Bible Societies, 1972. Moldenke, H. N., and A. L., "Plants of the Bible" Ronald Press, 1952. THAT, II, pp. 356–58.

1671 עֵשֶׂה ('šh) III. Assumed root of the following.

1671a עֵשֶׂה ('āseh) *either spine or os sacrum, bone close to fat-tail* (Lev 3:9).

עֵשֶׂה ('ēšā). See no. 887a.

עֵשֶׂה ('āšūm). See no. 1673d.

1672 *עָשֵׁל ('āšēl) *be sluggish.* Occurs only in the Niphal, in Jud 18:9.

Derivatives

1672a עָשֵׁל ('āšēl) *sluggish, lazy* (e.g. Prov 24:30; 10:26).

1672b עָשֵׁל ('āšlā) *sluggishness* (Prov 19:15; Eccl 10:18).

1672c עָשֵׁל ('āšlūt) *sluggishness* (Prov 31:27).

עָשֵׁל ('āšlūt). See no. 1672c.

1673 אָשׁוּם ('āšōm), אָשָׁם ('āšam)

1673 אָשׁוּם ('āšōm), אָשָׁם ('āšam) I, *be strong, mighty, great, increased.*

Derivatives

- 1673a אָשָׁם ('ōšem) *might.*
 1673b אָשָׁם ('ōšmā) *strength.*
 1673c אָשָׁם ('ešem) *bone.*
 1673d אָשָׁם ('āšūm) *mighty, numerous.*
 1673e אָשָׁם (ta'āšūmā) *might* (Ps 68:36).

There are two roots in the OT spelled 'āšam (so KB, Holladay, Lisowsky; BDB confusingly lists four). The first is a stative verb, "to be mighty, numerous, strong"; the second a transitive verb, "to close (the eyes)" (see below, 'āšam II). 'āšam may be compared to Arabic 'aẓuma "to be great in bones," hence, "to be mighty." Synonyms used more often in the OT for "strength, power" are ḥāzaq "to be strong," 'āmaš "to be strong," gādal "to be great," rābab "to be numerous," etc.

The verb 'āšam is found once in the Piel (denominative of 'ešem "bone"), meaning "to break the bones" (BDB), or "to gnaw off the bones" (KB), in the figure of a lion gnawing on the bones of Israel (Jer 50:17). Once it is found in the Hiphil, "to make strong" (Ps 105:24). Elsewhere, 'āšam I is found in the Qal. Sometimes this is in a comparative sense (e.g. "my iniquities... are more than the hairs of my head," Ps 40:12 [H 13]; cf. Ps 40:5 [H 6], God's wondrous deeds and thoughts "are more than can be numbered"). Elsewhere the verb is used in an absolute sense (e.g. of Egypt, "they are very strong" [Isa 31:1]; of the thoughts of God, "How vast is the sum of them! [Ps 139:17, NASB]).

An important theological employment of this verb is in Ex 1:7 (cf. 1:20) where it is used in dramatic and emphatic juxtaposition with the verbs pāra "to be fruitful" (see Gen 1:28), shāraš "to swarm" (see Gen 1:20), rābā "to become numerous" (see Gen 1:28), and the doubled noun "exceedingly" (bim'ōd me'ōd, "with extraordinary muchness!"), "so that the land was filled with them" (see Gen 1:28). Such is a vivid summary of Yahweh's miracle of blessing the growth of his people in the "womb" of Egypt. The vocabulary of growth from Gen is quite purposeful in Ex 1—this is indeed a new beginning.

'ōšem. *Might, strong, substance.* Used three times (Deut 8:17; Job 30:21; Ps 139:15 ["my frame was not hidden from thee," ASV, RSV, NASB; KB and Holladay render "bones" in this passage]), and perhaps in Nah 3:9 (with defective 3 fem. sing. suffix; see K. J. Cathcart, *Nahum in the Light of Northwest Semitic* [Rome: Biblical Institute Press, 1973], p. 135).

'ōšmā. *Strength, abundance.* This feminine noun is used three times (Isa 40:29; 47:9; Nah 3:9 [but see above]), rendered "full might" by KB.

'ešem. *Bone, body, same, selfsame.* (ASV, RSV similar.) A very common noun in the OT, 'ešem is cognate to Ugaritic 'zm I, Arabic 'aẓum^{un}, and Akkadian ešemtu, all meaning "bone." A Hebrew synonym is gerem (which see).

This noun has a variety of nuances in the OT. It may mean "bone" in the anatomical sense, both human (e.g. Lam 4:8, of skin cleaving to the bones; Jud 19:29, of dismembering a concubine) and animal (e.g. Ex 12:46, of the passover lamb). In Num 19:18 'ešem is used, it seems, for a skeleton (which defiles). Adam's exclamation of identity and relationship to Eve who was fashioned from a part of him is given in the well-known words, "This is now bone of my bones, / and flesh of my flesh" (Gen 2:23a, NASB). From this stirring couplet comes the Hebrew expression "flesh and bone" (in English locution, "flesh and blood"), descriptive of close genetic relationship (Gen 29:14; Jud 9:2; II Sam 5:1; II Sam 19:13 [H 14]; I Chr 11:1).

The plural noun "bones" often is used for a corpse. Joseph demanded that his "bones" (i.e. his mummy) be taken back to Canaan with Israel (Gen 50:25; cf. Ex 13:19; Josh 24:32). Similarly, David took the "bones" (corpses) of Saul and Jonathan for burial (II Sam 21:12-14).

Yet another employment of 'ešem is as a figure of the seat of the emotions. Jeremiah speaks of the reticence of proclaiming Yahweh as "a burning fire shut up in my bones" (Jer 20:9; cf. 23:9, both used parallel to "heart"). David speaks of the burden of sin causing a lack of health in his bones (Ps 38:3 [H 4]). The revilings of his enemies challenging the reality of Yahweh are "as a shattering of my bones" (Ps 42:10 [H 11]). One's "bones" may refer to the entire person (see Ps 6:2 [H 3], where "bones" is used parallel to "self/soul" in the following verse).

A more specialized use of 'ešem is found in Ex 24:10 in the phrase, "the substance of the heavens" ("the sky itself" in the NASB). 'ešem expressing absolute identity is rendered "selfsame" as in the phrase, "exactly at this day" (e.g. Ex 12:17, and often).

'āšūm. *Mighty, strong.* This adjective is used thirty-one times in the OT. It may be cognate to Ugaritic 'zm II, "mighty" (UT 19: no. 1842), and Phoenician 'šmt "mighty deeds."

R.B.A.

1674 אָשָׁם ('āšam) II, *shut, close (eyes).* (ASV, RSV similar.) Used twice in the OT (Isa 33:15, shutting one's eyes from seeing evil [Qal]; and Isa 29:10, of Yahweh clos-

ing the "eyes" of Israel, the prophets [Piel]).

Derivatives

- 1674a עֲצָמָה ('ašmâ). Some authorities, e.g. KB, Holladay, Lisowsky, distinguish the feminine plural 'ašmôt from "bones" in three passages (Ps 53:5 [H 6], "evil deeds"; Job 7:15, Ps 22:17 [H 18], "severe sufferings").
- 1674b עֲצָמוֹת ('āšūmôt) *strong (reasons)*. (RSV, "proofs.") A feminine plural abstract, used only in Isa 41:21. (BDB, however, assigns this noun to a different root, 'šm, compared to Arabic 'ašama "to defend, protect." KB regards it as a plural of 'āšūm [above].)

R.B.A.

עֲצָמוֹת ('āšūmôt). See no. 1674b.

- 1675 עָצַר ('āšar) *restrain, close up, retain, shut, withhold, refrain, stay, detain*.

Derivatives

- 1675a עָשַׁר ('ešer) *oppression* (Jud 18:7).
- 1675b עֲשָׁרָה ('ōšer) *barrenness*.
- 1675c עֲשָׂרָה ('āšārâ), עֲשָׂרֶת ('āšeret) *solemn assembly*.
- 1675d מַעְצָרוֹ (ma'sôr) *restraint*.
- 1675e מַעְצָרָה (ma'sār) *restraint, control*.

The Hebrew root 'šr is compared to Ethiopic and Arabic roots meaning "to press," and to a Syriac root "to retain." (The Akkadian ešēru noted by BDB is omitted by KB; Akkadian eēru means "to draw, make a drawing" [CAD, IV-E, p. 346]). In the Amarna texts *ha-zi-ri* (= 'ašāru) is found meaning "to restrain, retain" (K. A. Barker, "Comparative Linguistic and Grammatical Study of Canaanisms in the Amarna Tablets (unpublished Doctoral Dissertation, p. 106). Synonyms of this Hebrew root include: *māna* "to retain, hold back" 'āhaz "to seize, hold fast," *hāšak* "to restrain, hold back," *hāzaq* Hiphil "to take hold of," etc. and *kālā* I, "to keep back."

The verb 'āšar is used forty-six times in the OT. In the Qal stem this root has three basic meanings: (1) "to hold back, restrain, retain, prevent" as in Sarai's words, "Yahweh has prevented me from bearing" (Gen 16:2; cf. 20:18); (2) "to keep from," as in David's words, "women have been kept from us" (I Sam 21:5 [H 6]); and (3) "to rule," only in I Sam 9:17, Yahweh to Samuel, of Saul. "This one shall rule over my people." The Niphal has the passive renderings, "to be re-

strained, shut up, under restraint," as in Num 16:48 [H 17:13], "and the plague was checked" (NASB). With Yahweh as subject, this verb contributes greatly to the doctrine of the sovereignty of God. It is he who restrains as well as who wills.

'ešer. *Oppression*, only in Jud 18:7. This masculine noun is used only in Jud 18:7 in the phrase "possessor of restraint" (LXX and RSV, "possessing wealth"), is suggestive of the NT phrase, "that which/he who restrains" (II Thess 2:6-7), although Greek *katechō* usually renders Hebrew 'āhaz or hāzaq (q.v.).

'ōšer. *Barrenness (closedness), oppression*. This noun is used of barrenness in Prov 30:16 and of oppression in Isa 53:8 and Ps 107:39.

ma'sôr. *Restraint, hindrance*. The feminine nouns 'āšārâ and 'āšeret are rendered "solemn, sacred assembly," perhaps from the semantic development suggested by KB: "suppression, stop of work" leading to "solemn assembly" (see Num 29:35). Such a solemn assembly can be proper and pious (e.g., Joel 1:14), apostate (Jer 9:2 [H 1]), or idolatrous (II Kgs 10:20).

ma'sār. *Restraint, control; "self-control"* in Prov 25:28, with *l' rūhō*.

R.B.A.

- 1676 עָקַב ('āqab) *take by the heel, supplant*. Denominative verb.

Parent Noun

- 1676a עֲקֵב ('āqēb) I, *heel, hoof, rear of a troop, footstep*.
- 1676b עֲקֵב ('āqēb) II, *overreacher* (Ps 49:6).
- 1676c עֲקֹב ('āqōb) *deceitful; showing footprints*.
- 1676d עֲקֵבָה ('āqēbâ) *deceitfulness* (II Kgs 10:19).
- 1676e עֲקֵב ('ēqeb) *consequence*. Usually occurs as an adverbial accusative, as a consequence of, because.
- 1676f יַעֲקֹב (ya'āqōb) *Jacob*.

'āqēb. *Heel*. From the literal idea of "heel" (cf. Job 18:9, a man caught by the heel), 'āqēb extends itself to describe horses' hoofs (Gen 49:17; Jud 5:22) or anything at the rear. 'āqēb denotes the rear guard of a troop (KB, p. 279; attacked, literally, at their heels, Gen 49:19) or the exposed buttocks (euphemistically, "thy heels made bare," Jer 13:22) of captive individuals (v. 19; cf. Ugaritic 'qbt "tendon" of a bull). At Ai, the Israelitish army's 'āqēb (Josh 8:13) is the concealed detachment directed against the Canaanitish "heel" (cf. Ps 49:5 [H 6]), therefore not so much a Hebrew rear guard (RSV) as an

ambush, "liers in wait" against Ai (KJV, ASV; KD, p. 86). 'āqēb may also connote the motion of the heel, i.e. a step—so in Ps 56:6 [H 7]. David's foes watch "his steps." The actual word is "heels," or the mark left by the heel, i.e. a footstep, whether of a man (Ps 89:51 [H 52] where enemies "reproach the footsteps" of God's anointed, perhaps referring to King Jehoiachin as he was led captive in 597 B.C.). It can also refer to a flock (Song 1:8), or even to God (so Ps 77:19 which speaks of Yahweh's leading Israel through the Red Sea; but after the water returned, "Your footsteps are not known").

The metaphorical usage of 'āqēb includes such ideas as a traitor's "lifting up the heel" against David (Ps 41:9 [H 10]), i.e. "proving faithless and spurning" him, or, "iniquity at my heels" (49:5 ASV; "iniquity of my heels" KJV), i.e. dogging one's steps ("wicked deceivers" NIV). Greatest of all references is the prophecy in Gen 3:15, that mankind is to achieve victory over Satan and reconciliation with God at the price of Calvary, where the serpent will "bruise the heel" of the seed of woman.

ya'āqōb. *Jacob. Abraham's grandson through Isaac.* Used collectively, it refers to the tribes of Israel, as descended from the twelve sons of Jacob.

Jacob, the second of Isaac's twin sons, received the preeminence before birth (Gen 25:23; an example of divine election in general, Rom 9:11–13). But he acquired his name when he was born "with his hand [symbolically] holding on to Esau's heel" (Gen 25:26 NASB; Hos 12:3 [H 4]). When he had later gained the birthright (Gen 25:29–34) and stolen Isaac's blessing (27:1–29), Esau thus exclaimed, "Is he not rightly named Jacob (ya'āqōb), for he has supplanted me these two times?" (v. 36). See also his devices against Laban (30:29–31:12; cf. Isa 43:27–28).

Yet at Bethel, as Jacob was fleeing from Esau, God assured him that he was with him (28:12, 15) and renewed the covenant which he had previously revealed to Abraham and Isaac (vv. 13–14; cf. 17:7–8; 26:3–4; Lev 26:42). Jacob thereupon vowed that Yahweh would be his God and receive his tithes (Gen 28:20–22). Then at Peniel, enriched by the Lord but dreading to meet Esau, he uttered a model prayer (32:9–12).

God, in the person of the Angel of Yahweh presumably Christ pre-incarnate (vv. 24, 30; Hos 12:4), next encountered Jacob, with whom the patriarch wrestled, literally, but also in prayer (Hos 12:4). Broken by God (Gen 32:25 [H 26]), Jacob thereby achieved his final spiritual victory and blessing (v. 29 [H 30]), for the Angel said, "Your name will no longer be Jacob (ya'āqōb "supplanter"), but Israel (yīsrā'ēl), for you have striven (sārā) with God and with men and have

prevailed" (v. 28 [H 29]; cf. his subsequent devotion, Heb 11:21).

Both names, Israel and Jacob, became designations of honor for the patriarch's descendants (from Num 23 onward; cf. 24:5, or 17 [Messianic]; Ps 47:4 [H 5]). God "loves Jacob" (Mal 1:2; cf. Rom 11:26). Yet finally the blessing reaches out to all the people of God, "the generation of those who seek Thy face—even Jacob" (Ps 24:6 NASB; cf. Gal 3:29).

J.B.P.

1677 עָקַד ('āqad) *I, bind* (Gen 22:9).

1678 עָקַד ('qd) *II. Assumed root of the following.*

1678a עָקַד ('āqōd) *striped, streaked* (e.g. Gen 30:40; 31:8).

1679 עָקַד ('qh). *Assumed root of the following.*

1679a מַעֲקֵה (ma'āqeh) *parapet* (Deut 22:8).

עָקַד ('āqā). See no. 1585a.

1680 *עָקַל ('āqal) *bend, twist.* Occurs only in the Pual, in Hab 1:4.

Derivatives

1680a עָקַלְקַל ('āqalqal) *crooked* (Jud 5:6; Ps 125:5).

1680b עָקַלְלָתוֹן ('āqallātōn) *crooked* (Isa 27:1).

עָקַלְקַל ('āqalqal). See no. 1680a.

עָקַלְלָתוֹן ('āqallātōn). See no. 1680b.

1681 עָקַר ('āqar) *I, pluck or root up* (Eccl 3:2; Zeph 2:4). Denominative verb.

Parent Noun

1681a עֶקֶר ('ēqer) *offshoot, member* (Lev 23:47).

1682 *עָקַר ('āqar) *II, hamstring.* This denominative verb occurs only in the Piel (e.g. II Sam 8:4; I Chr 18:4).

Parent Noun

1682a עָקָר ('āqār) *barren* (e.g. Deut 7:14; Ex 23:26).

1683 עֶקְרָב ('aqrāb) *scorpion* (e.g. Deut 8:15; Ezk 2:6).

- 1684 *עָשָׂה ('āqash) is *perverse*, Niphal; to *make crooked, pervert*, Piel; to *declare, prove perverse*, Hiphil.

Derivatives

- 1684a עָשָׂה ('iqqēsh) *crooked, perverse*.
 1684b עֲשִׂוֹת ('iqq' shūt) *crookedness*
 (Prov 4:24; 6:12).
 1684c מְעַשֵּׂה (ma'āqāsh) *crooked things*
 (Isa 42:16).

The root 'āqash is a descriptive term in hamartiology that emphasizes the perversion and twisted nature of sin. Hebrew 'āqash may be related to Arabic 'aqasha "to twist her hair" (a woman); as women braid and plait their hair, so people twist their ways.

With the exception of "crooked, rough places" in Isa 42:16, the root 'āqash and its derivatives are used to describe the twisted and perverted acts of sinful men. In Isa 42:16 it denotes the difficulties the Lord will overcome in saving his people out of their desperate situation. In Deut 32:5 'iqqēsh is used in hendiadys with p' taltōl "tortuous," of a desperately wicked generation (see also Prov 8:8; Ps 18:26 [H 27]). Other synonyms for 'āqash are hāpak "to turn;" lūz "to go the wrong way;" āwā "to pervert the right;" sālap "to twist;" āwat "to make crooked, pervert." Wicked rulers "twist everything that is straight" (Mic 3:9, NASB). The perverse of lips is a fool (Prov 19:1), and the perverse of heart is an abomination to Yahweh (Prov 11:20).

'iqq' shūt. *Froward*. (ASV, RSV, "wayward, crooked.") This is an abstract feminine noun, "perverseness," used twice in the phrase, "perverse mouth" (Prov 4:24; 6:12).

R.B.A.

עֲשִׂוֹת ('iqq' shūt). See no. 1684b.

עָרַב ('ār) *foe*. Only I Sam 28:16. Aramism(?). See no. 2930a.

- 1685 עֲרַב ('rb) I. **Assumed root of the following.**

- 1685a עֲרֵב ('ēreb) I, *mixture, mixed company* (e.g. Ex 12:38; Neh 13:3).
 1685b עֲרֵב ('ēreb) II, *woof* (Lev 13:48).
 1685c עֲרֹב ('ārōb) *swarm* (e.g. Ex 8:17; Ps 78:45).

- 1686 עֲרַב ('ārab) II, to *be / become surety, mortgage, engage, occupy, undertake for; give pledges* (Hithpael).

Derivatives

- 1686a עֲרֻבָּה ('ārūbbā) *pledge*.
 1686b עֲרֻבּוֹן ('ērābōn) *pledge*.

- 1686c מְעַרְבָּה (ma'ārāb) *merchandise*.

- 1686d תַּעֲרֻבָּה (ta'ārūbbā) *hostages*.

The verb 'ārab may be compared with one use of Akkadian *erēbu* "to enter (under one's authority)" (see CAD, IV-E, 264), and to Ugaritic 'rb "to enter (as a pledge)," e.g. in the phrase 'rb bbnšhm "they entered as pledges for their men = they guaranteed their employees" (so UT 19: no. 1915). Synonyms for the Hebrew 'ārab "to pledge," include hābōl, hābōlā, 'ābōt, nouns meaning "pledge"; and the verbs hābal "to take in pledge," and tāqa "to strike the hands in agreement." Cf. the noun 'ābōt "pledge." Depending on the manner of classification, there are four (KB) or six (BDB) roots 'ārab, eight in GB!

As used in the OT the range of meaning for the Qal of 'ārab I falls into three clusters. First, the term may mean, "to exchange merchandise, barter," as in Ezk 27:9 (cf. 27:27). Secondly, the verb may mean "to pledge, mortgage," and by extension, "to dare." Nehemiah 5:3 speaks of mortgaging fields, as an example of the former alternative, and Jer 30:21 (figure) of daring one's heart (NASB, "who would dare to risk his life"), as an example of the latter.

The third, and major, cluster is "to be/become surety or bail for." A splendid example is afforded by the Joseph narrative. Judah ventures to be the surety for his youngest brother, Benjamin, to his father, Jacob. He states, "I will be the surety for him: of my hand you shall require him" (NASB, "you may hold me responsible for him" Gen 43:9; cf. 44:32). Another type of example is given by the noun 'ērābōn (see below) in Gen 38 (vv. 17–18, 20). In this far less noble chapter of Judah's spiritual degradation, the reader observes that he is dull not only spiritually, but rationally as well. He leaves with Tamar, his disguised daughter-in-law, his signet, cord, and staff as 'ērābōn. By leaving behind his "credit card," he lost all chance for anonymity in the sordid affair.

The Hithpael of 'ārab is found in one context only, meaning "to make a wager" (RSV II Kgs 18:23; Isa 36:8). The Hithpael forms in Ps 106:35; Prov 14:10; 20:19; 24:21; listed by BDB under the root "to pledge," are better understood as from a homonym, "to associate with, intermix, meddle" (so KB, Holladay, Lisowsky).

'ārūbbā. *Pledge, surety*. Found only in I Sam 17:18; Prov 17:18.

'ērābōn. *Pledge*. Used only in Gen 38 (three times, vv. 17–18, 20; of Judah's seal, his "credit card"). The noun 'ērābōn (Ugaritic 'rbn) is one of the few Semitic words which have entered Western languages (Greek, *arrabōn*; Latin, *arabo*; French, *les arrhes*). In the NT *arrabōn* is used of the Holy Spirit who is the "pledge of our

inheritance" (Eph 1:14; cf. II Cor 5:5). The desire for God himself as one's "security" is an OT hope. Hezekiah, twittering and moaning like a bird, said: "My eyes look wistfully to the heights; / O Lord, I am oppressed, be my security" (Isa 38:14, NASB; cf. Ps 119:122). Similarly Job pleads with Yahweh: "Lay down, now, a *pledge* for me with Thyself; / Who is there that will be my guarantor?" (Job 17:3). Kidner observes, "Job is a bad risk for anybody but God" (*Proverbs*, p. 72). The parallel expression, "who will be guarantor," is literally to be read, "who will strike hands with me?" The verb *tāqa* (q.v.) is a stock-in-trade parallel for 'ārab I, in the sense, "to confirm a contract, bargain" (see Prov 6:1; 11:15; 17:18; 22:26).

The passages given above in Prov on acting as surety for a loan for another (to which we may add 20:16 and 27:13 where the parallel verb is *hābēl*) contain strong warnings against such well-meaning, but foolish acts. Such a man is "lacking in sense" (Prov 17:18) and "will smart for it" (Prov 11:15). The advice for one who has entered such an agreement, is to get out as best he may (Prov 6:1-5). Again, we quote Kidner who says such advice "does not banish generosity: it is nearer to banishing gambling. That is, a man's giving should be fully voluntary." He adds, "Even to the recipient, an unconditional pledge may be an unintended disservice by exposing him to temptation and to the subsequent grief of having brought a friend to ruin" (Kidner, *Proverbs*, pp. 71-72). Nevertheless, compare the acts of the Good Samaritan in Luke 10:35.

ma'ārāb. *Merchandise (articles of exchange).* This collective noun occurs only in Ezk 27 (nine times).

ta'arūbā. *Hostages* in the phrase, "children of pledges" found in II Kgs 14:14; II Chr 25:24.

Bibliography: Porten, Bezalel, "Guarantor at Elephantine-Syene," *JAOS* 89:153-57.

R.B.A.

1687 עָרַב ('ārab) III, *be sweet, pleasing.*

Derivatives

1687a עָרֵב ('ārēb) *sweet, pleasant* (Prov 20:17; Song 2:14).

1688 עָרַב ('rb) IV. Assumed root of the following.

1688a עָרַב ('ārab) *desert plateau, steppe* (Isa 21:13).

1688b עָרָבִי ('ārābī) *steppe-dweller* (Isa 13:20; Jer 3:2).

1688c עָרָב ('ārāb) *steppe-dwellers* (collective noun).

1688d עָרָבָה ('ārābā) *desert plain, steppe.*

1689 עָרַב ('ārab) V, *become evening, grow dark.* Denominative verb.

Parent Noun

1689a עֶרֶב ('ereb) *evening, night.*

1689b מִעֶרֶב (ma'ārāb) *westward.*

'ereb. *Evening, night.* This common masculine noun for "evening" likely developed from the expression, "the setting of the sun, sunset." It is cognate to Akkadian *erēbu*, a common verb of wide usage which includes "to enter, go down (of the sun)." Akkadian *erib šamši* means "sunset." Compare Arabic *garifa* "to set (of the sun)," and Ugaritic *'rb špš* (= *m'rb*), "sunset." Other important Hebrew words for time periods of the day are: *yōm* "day," *'ēt* "time," *bōker* "morning," and *laylā* "night" (all of which see). Some have suggested that "Europe," the western land is derived from this root (BDB, GB and cf. the American Heritage Dictionary).

'ereb is found 131 times in the OT. The phrase "there was an evening and there was a morning" occurs six times in the creation narrative (Gen 1:5, 8, 13, 19, 23, 31), delimiting the six days of divine creative activity. This phrase would indicate that in ancient Israel a day began with sunrise. Some have felt this at variance with the Jewish practice of regarding sunset as the beginning of the next day. Cassuto, after dealing with the biblical data and the Jewish custom, concludes that there was "only one system of *computing* time: the day is considered to begin in the morning; but in regard to the festivals and appointed times, the Torah ordains that they shall be observed also on the night of the *preceding day*" (U. Cassuto, *Genesis*, I, p. 29 [his emphasis]). This judgment appears vindicated in the employment of *'ereb* in Levitical legislation respecting uncleanness. One was considered unclean because of certain acts "until the evening" (Lev 11:24, plus thirty times). That is, one was unclean for the duration of the day.

Evenings were quite important for sacrificial acts and ceremonial meals in ancient Israel. The Passover began on the evening of the fourteenth day of the first month (see Ex 12:6, 18). Sometimes, as in Ex 12:6, the Hebrew reads literally, "between the two evenings," likely "twilight," the time interval between sunset and darkness in which there is a state of illumination. Only in Job 7:4 does *'ereb* denote "night" proper.

ma'ārāb. *Westward, from or toward the west, the west side.* (ASV, RSV similar.) Strictly, the "place of sunset," hence, "west." See Ps 103:12 where this word is contrasted to *mizrah*, "from the east" (see *zārah* "to rise").

R.B.A.

1690 עָרַב ('rb) VI. Assumed root of the following.

1690a עָרַב ('ōrēb) *raven*.

1690b עָרְבָה ('ārābā) *poplar*.

עָרְבוֹן ('ērābôn). See no. 1686b.

עָרְבִי ('ārābī). See no. 1688b.

1691 עָרַג ('ārag) *long for*.

Derivative

1691a עָרוּגָה ('ārûgâ) *garden terrace or bed*.

1692 *עָרָה ('ārâ) *uncover, leave destitute, discover, empty, raze, pour out*.

Derivatives

1692a עָרָה ('ārâ) *bare place* (Isa 19:7).

1692b עָרְוָה ('erwâ) *nakedness, shame*.

1692c עָרְיָה ('eryâ) *nakedness*.

1692d מָעַר (ma'ar) *nakedness*.

1692e תַּעַר (ta'ar) *razor, sheath*; cf. Ugaritic t'rt "sheath, scabbard" (that which makes bare).

The verb 'rh does not occur in the Qal stem. In the intensive and causative stems it is employed meaning: (1) "to lay bare, uncover, expose nakedness," and (2) to lay bare in the sense "to empty, to pour out." This latter sense may be used as a figure of death in the expression given in Ps 141:8 and Isa 53:12, "to pour out the soul/life" (*nepeš*, q.v.). Hebrew 'ārâ has cognates in Arabic ('ariya "to be naked"), Phoenician ('rh "to lay bare"), Akkadian (*āru* "nakedness, desert waste"), and Ugaritic ('ry "naked" [Ais-WUS, no. 2097]).

After the fall (or "plunge") of man, nakedness in the OT was a matter of shame. This is not because sex is evil, but because of sin-burdened minds (see J. B. Payne, *Theology of the Older Testament*, p. 218). As D. Kidner writes, "Man saw the familiar world and spoil it now in the seeing, projecting evil on the innocence (cf. Tit 1:15) and reacting to the good with shame and flight." He adds, "The fig leaves were pathetic enough, as human expedients tend to be, but the instinct was sound and God confirmed it, for sin's proper fruit is shame. The couple, now ill at ease together, expressed a foretaste of fallen human relations in general" (*Genesis*, InterVarsity, 1967, p. 69).

Hence, nakedness in the OT after Gen 3:7 is a symbol of human shame, the evil fruit of sin. It is quite impossible to build a case biblically for nudity. Nakedness cannot be tolerated outside proper sexual relationships (see the prohibitions of incest in Lev 18 and 20), nor may it occur in worship (Ex 20:26; cf. 28:42).

Conversely, nakedness, the exposure of shame, is a marked feature of judgment on evil-doers (see Isa 3:17; Hab 3:13; Zeph 2:14 Lam 4:21; and the extensive employment of the vocabulary for nakedness by Ezk in chapters 16, 22, 23).

In Ps 137:7 Edom's taunt of Jerusalem is an example of paronomasia. Edom's words, "raze it, raze it, down to its foundations," by double entendre signify, "strip her, strip her, down to her buttocks" (Jerusalem pictured as a woman being ravaged; see Dahood, *Psalms*, III, in AB p. 273).

The verb 'ārâ is employed in the Niphal (explained as passive of Hiphil by BDB) in Isa 32:15 of the Spirit being poured out upon us. Other examples of "make bare" leading to the idea of "pour out" are found in Gen 24:20 (Piel, Rebekah emptied her pitcher); II Chr 24:11 (Piel, an officer emptied the chest); Isa 53:12 (Hiphil, the Servant poured out his life unto death; cf. Ps 141:8).

The Hithpael in Ps 37:35 is somewhat problematical. The NASB renders, "a violent, wicked man spreading himself like a luxuriant tree." R.B.A.

עָרוּגָה ('ārûgâ). See no. 1691a.

1693 עָרֹד ('ārôd) *wild ass*. Only in Job 39:5.

עָרְוָה ('erwâ). See no. 1692b.

עָרִירִי ('āriri). See no. 1705a.

1694 עָרַךְ ('arak) *set (put, lay) in order, set in array, prepare, order, ordain, handle, furnish, esteem, equal, direct, compare*.

Derivatives

1694a עָרַךְ ('ērek) *order, row, estimate*.

1694b *עָרַךְ ('arak) *value, estimate, tax*. Occurs in the Hiphil only.

1694c מַעְרָכָה (ma'ārāk) *preparation* (Prov 16:1).

1694d מַעְרָכָה (ma'ārākā) *row*.

1694e מַעְרֶכֶת (ma'āreket) *row*.

'arak is a verb of preparation, arranging (so its Phoenician cognate), setting in order; often used in martial contexts of "drawing up in battle order." The militaristic tone of the verb may be compared to the Arabic 'araka in III stem, "to contend (in battle)," and to the Arabic nouns

ma'arak^{un} and *ma'arakat^{un}*, both meaning "battle-ground."

The verb *'arak* has two basic nuances in the OT. The first, found often, means "to set or arrange in order," used variously. The second, "to compare," is suggested by BDB to be the result of arranging in order (for the purpose of comparison). This latter use of the verb is found in Isa in a majestic paean of praise to the incomparability of Yahweh. Isaiah 40:18 reads, "to whom then will you liken (*dāmā*, Piel) God? / or with what likeness will you compare (*'arak*) him?" (so Ps 40:5 [H 6]; 89:6 [H 7]; cf. Job 28:17, 19). The incomparability of Yahweh is one of the grand, but sometimes neglected, themes of OT biblical theology.

More often *'arak* means "to set in order, arrange." One encounters this verb with many objects: pieces of firewood set in order for a sacrificial fire by Abraham for his son Isaac, in one of the most moving scenes in the OT (Gen 22:9); pieces of the sacrificial bull arranged on the altar by the priests (Lev 1:8); showbread set out in two rows of six cakes on the gold table (Lev 24:8); seven altars set up by the pagan mantic Balaam (Num 23:4); stalks of flax arranged by Rahab for hiding the spies (Josh 2:6); a table prepared for dining (Ps 23:5; Isa 21:5); words produced for speaking (Job 32:14); a legal case developed for presentation (Job 13:18); etc. In II Sam 23:5 David exults in the covenant granted him by Yahweh, "for he has made with me an everlasting covenant, / ordered (*'ārākā*) in all things and secure."

Often *'arak* is a military term describing the drawing up in battle order to commence the fighting. The verb may appear with *milhāmā* "combat" (Gen 14:8; Jud 20:22; I Sam 17:8, etc.), and with *liqrā't* "to meet" (e.g. I Sam 4:2; II Sam 10:9–10, etc.). The OT writers also speak of arranging weapons for battle (Jer 46:3; I Chr 12:9). At one point, Job described his anguishing state of affliction as that of military attacks by the forces of the terrors of God, set against him in battle array (Job 6:4).

'ārak. Hiphil, *to value, estimate, tax*. BDB lists this as a denominative verb from the noun *'erek* "estimate." It is found five times in Lev 27 and in II Kgs 23:35. Some authorities, e.g. KB, do not distinguish this use of *'arak* as a separate lexical entry; it is merely the Hiphil of the verb listed above.

ma'ārāk. *Preparation* (RSV, "plan"). Occurs only in Prov 16:1, "the plans of the heart."

ma'ārākā. *Row, rank, army, order, fight*. A feminine noun with three usages: (1) "battle line," as in I Sam 4:2ff.; (2) "ranks" or "army," as in I Sam 17:10; and (3) "row," as in Ex 39:37, "lamps of the row."

ma'āreket. *Row, showbread*. Found only of the rows of showbread or the table, as in Lev 24:6–7.

1695 עָרַל ('āral) *count uncircumcised (Qal); foreskin to be uncovered (Niphal)*. Denominative verb.

Parent Noun

1695a עֹרְלָה ('orlā) *foreskin, uncircumcised*.

1695b עֲרֵל ('ārēl) *having foreskin, i.e. uncircumcised*.

The denominative verb (so BDB, KB) *'āral* is used only twice. In Lev 19:23 the RSV and NASB render the Qal, "forbidden," and Holladay suggests, "leave unharvested." The Niphal in Hab 2:16 is a *crux*. The ASV reads, "be as one uncircumcised"; NASB, "expose your own nakedness"; NIV, "be exposed"; the RSV reads with the DSS and some versions, "stagger" [from the root *r'l*, metathesis].

'orlā. *Foreskin, uncircumcised*. (ASV, RSV similar.) The feminine noun *'orlā* may be related to Arabic *ḡurlat^{un}* "foreskin," and *ḡarila* "to be uncircumcised," Aramaic *ḡurl'tā* "foreskin," and Akkadian *urūl(l)āti* (pl.) "foreskins" (Bé-zold, *Glossar*, p. 68). The reader should compare the article on the verb *mūl* "to circumcise."

'ārēl. *Uncircumcised, uncircumcised person*, i.e. having the foreskin intact. (ASV, RSV similar.)

Circumcision has been practiced by many peoples of the world usually at puberty, but in Israel it was rooted in a profound religious conviction: by this act of dedication, witness was given to the fact of belonging to Yahweh and to his people (see Eichrodt, ETOT, I, p. 138). As far as we know, only Israel practiced infant circumcision. Of course this practice precluded the other licentious puberty rites of the surrounding pagans.

The institution of circumcision is detailed in Gen 17 as the sign of Yahweh's covenant with Abraham, as was the rainbow in his covenant with Noah. Every male of the community, bond and free, was to be circumcised when eight days old. The uncircumcised were to be cut off from the community. Youngblood writes, "From that time forward the rite of circumcision would become... a token of God's solemn promise to bless His people numerically. God had spoken, and He would bring His word to remembrance every time the circumciser's knife was wielded" (*The Heart of the Old Testament*, p. 46). The patriarchal covenant act was reaffirmed in the Mosaic code (Lev 12:3). Exodus 4:24–26 is somewhat obscure. See Cassuto, *Exodus*, pp.

58–61, and Clements, *Exodus*, p. 31. [This difficult passage has been much discussed but the suggestions of Hans Kosmala possibly bring new light ("The Bloody Husband," VT 12:14–28). He argues, first, that it is the first-born son who is in danger—not Moses. In the context the emphasis is on Israel as God's first-born. Pharaoh's first-born is in danger. Now Moses' first-born must be circumcised or he too is in danger. Second, the verb *nāga'* should be taken as a Qal "touch" not Hiphil "cast" as כָּנַח. Third, says Kosmala, Zipporah touched the child's legs with the foreskin to make a sign of blood—not that she cast it at Moses' feet. Moses is not mentioned by name in this sentence. Fourth, that her remark "a bloody husband" should rather be translated "a blood-circumcised (boy)." The Arabic verb *ḥatana* means "to circumcise" and Kosmala reminds us that Zipporah in Sinai may well have had early Arabic connections. Thus she was not petulantly blaming Moses, but in satisfaction claiming she had saved her boy by performing the rite. Kosmala finds the last clause of v. 26 to be not a mere repetition. It is a linguistic note that what she said in Arabic idiom applied to the boy who in Hebrew idiom was "the circumcised" (*māl*).

The suggestion changes no consonants in the text. It has linguistic support. And it avoids the otherwise strange tension between Moses and Zipporah. A free translation would be:

At a lodging place on the way the LORD met him (Moses) and sought to slay him (his first-born). But Zipporah took a flint knife and cut off the foreskin of her son and touched his legs with it. Then she said, "Surely you are my blood-circumcised one" and the LORD let him alone. So the term she used "blood-circumcised one" (Arabic) referred to the circumcised one (Hebrew). R.L.H.]

The adjective *ārēl* "having foreskin, uncircumcised," became a word of contempt, used particularly with reference to the Philistines who did not practice circumcision (cf. Jud 14:3; 15:18; I Sam 14:6; 17:26, 36; 31:4=I Chr 10:4; II Sam 1:20). This term was associated with moral and spiritual uncleanness (Isa 52:1) as well as with organs that did not function properly (Ex 6:12, "uncircumcised lips" do not speak well; Jer 6:10, "uncircumcised ears" cannot listen).

Circumcision was a spiritual act as well. Egypt, Edom, Ammon, Moab—and Judah!—all practiced circumcision of the penis, but not the heart (Jer 9:25–26 [H 24–25], see Bright, *Jeremiah*, AB, p. 78). Hence, Israel was commanded to circumcise the foreskin of the heart (Deut 10:16; Jer 4:4; cf. Rom 2:28–29).

Ezekiel uses *ārēl* in ch. 32 in his "conducted tour of the nations in Sheol" (Taylor, *Ezekiel*, p. 211). There the nations are described as uncircumcised, to bear out the concept of their pollu-

tion and defilement (see Feinberg, *Ezekiel*, pp. 184–85).

Bibliography: Youngblood, Ronald, *The Heart of the Old Testament*, Baker 1971.

R.B.A.

- 1696 *עָרַם ('āram) *I, be heaped up.* Occurs only once, in the Niphal (Ex 15:8).

Derivative

- 1696a עָרְמָה ('ārēmā) *heap.*

- 1697 עָרַם ('rm) **II. Assumed root of the following.**

- 1697a עָרְמוֹן ('armôn) *the plane-tree (as stripped of bark* (Ezk 31:8).

- 1698 עָרַם ('ārôm) *beware, take crafty counsel, be prudent.*

Derivatives

- 1698a עָרְמָה ('ōrem) *craftiness* (Job 5:13).

- 1698b עָרְמוּת ('ormā) *guile.*

- 1698c עָרְוּם ('ārūm) *crafty.*

'ārôm is a root with positive (prudence) and negative (shrewdness) connotations. It may be contrasted with its positive synonym *šākal* "to be skillful, wise," which is always positive. Its cognates in Arabic, Aramaic, and Syriac are negative in tone ("ill-natured, shrewd"). The Greek terms *panourgos* and *panourgia*, used in the LXX and the NT, mean "ready to do anything," usually in the bad sense of tricky and cunning behavior (e.g. Lk 20:23; Eph 4:14). Distinguish this root from 'āram, Niphal, "to be heaped."

The verb 'ārôm is used in the Qal five times; twice positively (Prov 15:5; 19:25), and twice negatively (I Sam 23:22). The Hiphil is used once meaning, "to act craftily," "they lay crafty plans against thy people" (Ps 83:3 [H 4]). Some authorities have considered all but the Qal infinitive absolute in I Sam 23:22 to be Hiphils. KB and Lisowsky say the only true Hiphil is in Ps 83:3 [H 4].

'ōrem. *Craftiness.* This masculine noun occurs only in Job 5:13.

'ormā. *Guile, prudence, subtlety, wilily, wisdom.* This noun may be used negatively of presumptuous guile (as in Ex 21:14), or positively of prudent behavior (as in Prov 1:4).

'ārūm. *Crafty, prudent, subtle.* The adjective 'ārūm is construed to be a positive virtue when rendered "prudent." The prudent one does not vaunt his knowledge (Prov 12:23), ignores an insult (Prov 12:16), acts with knowledge (Prov 14:8), looks where he is going (Prov 14:15), sees

danger and acts appropriately (Prov 22:3 = 27:12), and is crowned with knowledge (Prov 14:18).

This adjective is negative when rendered "crafty" (see Job 5:12; 15:5). The most memorable use of 'ārūm in this negative nuance is, of course, Gen 3:1, "Now the serpent was more crafty than any other wild creature which the Lord God had made." His "malevolent brilliance" (D. Kidner, *Genesis*, Chicago: Inter Varsity, p. 67) is contrasted by paronomasia to the naked innocence of Adam and Eve in Gen 2:25 ('ārūm "craftiness," vs. 'arūmmim "nakedness;" see U. Cassuto, *Genesis*, I, p. 143). Given this seminal passage, the comment of our Lord to his disciples is even more surprising: "Be shrewd [phronimos] as serpents, and innocent as doves" (Matt 10:16, NASB).

R.B.A.

עֲרֻמוֹ ('armôn). See no. 1697a.

1699 עָרַם ('rs). Assumed root of the following.

1699a עֲרִיסָה ('ārisā) coarse meal (e.g. Ezk 44:30; Neh 10:38). Meaning uncertain.

עֲרָעַר ('ar'ar). See no. 1705b.

1700 עָרַפָּה ('ārap) I, break the neck of an animal. Denominative verb (BDB; KB treats it as a homonym, compared to Arabic 'arafa "to cut to pieces").

Parent Noun

1700a עֲרֶפֶת ('ōrep) back, neck.

This anatomical term is often used metaphorically. It has been related to Akkadian *arūb(b)ul/arūp(p)u* "neck (mane?)," and Arabic 'urfat^{un} "mane of a horse, crest of a cock." Some Hebrew synonyms for "neck" are *gargārôt*, *gārôn*, *maprequet*, *ṣawwā'r*, and *ṣaww' rōnīm*.

'ōrep is used thirty-three times. In Gen 49:8, Jacob prophesies that Judah's hand will be on the neck of his enemies, a symbol of authority over his foes. In the expression "turned (one's) neck," 'ōrep is used as a synonym for *back* (see *gab*, *gaw*, *gēw*, *sh'kem* ["shoulder"]). This term occurs as a figure of fear and retreat of the enemies of Israel (Ex 23:27; cf. Josh 7:8, 12 of Israel turning her back; II Sam 22:41 in a psalm of David); as a figure for apostasy from Yahweh (II Chr 29:6; Jer 2:27; 32:33); and as a figure for shame and remorse (Moab in Jer 48:39).

From comparison with Arabic 'urfat^{un} "mane of a horse," "crest of a cock," one can see the possible semantic development of "neck" to "stiffness, arrogance, recalcitrance, refractoriness." Hence, there are numerous occasions in

which Israel is termed *q'shēh-ōrep* "stiff-necked" (e.g. Ex 32:9; 33:3, 5; 34:9, etc.). The term 'ōrep thus enters the vocabulary of hamartiology. Arrogance on the part of the vassal to the suzerain is a form of rebellion and treason.

R.B.A.

1701 עָרַפָּה ('ārap) II, drip, drop.

Derivatives

1701a עָרִיפָה ('ārip) cloud (Isa 5:20).

1701b עֲרֶפֶל ('ārāpel) dark cloud, darkness, gross darkness, thick darkness. (ASV, RSV similar, but RSV "gloom" in Deut 4:11 where NASB has "thick gloom.")

The word 'ārāpel is a masculine noun employed respecting the veiled glory of Yahweh, the darkness enveloping his appearance on Mount Sinai, and the judgment he brings on sin. Suggested etymologies are from (1) 'ārap "to drip, drop," with *lamed* affirmative (BDB); or (2) Arabic *ḡafara* "to cover" (KB). The word *ḡrpl* "heavy cloud," occurs in Ugaritic (UT 19: no. 1989a). Important synonyms in Hebrew for "cloud" are 'āb (used of theophany in Ex 19:9) and 'ānān (often used of the glory of God).

Descriptions of the glory of God in the OT seem deliberately vague, perhaps to preserve the element of reverential awe respecting the wonder of beholding tokens of God, and also, perhaps, to remind one of the horror of sin in his presence. Hence, while the people stand afar off, Moses comes near to the "thick darkness" enveloping Yahweh (Ex 20:21). Indeed, the very mountain visited by God became an awesome mountain, "burning to the heart of heaven, wrapped in darkness (*hōshek*), cloud ('ānān), and thick gloom (*wa'ārāpel*)" (Deut 4:11). Similar expressions are found in Deut 5:22 [H 19]; II Sam 22:10; Job 22:13; Ps 18:9 [H 10]; 97:2. When Solomon dedicated the temple, the glory of Yahweh filled the building in cloud and thick darkness (I Kgs 8:10–12; II Chr 5:13–6:1), "as a reminder of the darkness into which Moses penetrated on Sinai" (JTOT, p. 259).

Other uses of 'ārāpel include the poetic figure of darkness as a swaddling band for the sea (Job 38:9); and darkness as a symbol of ignorance, misery, and sin of man (Isa 60:2). The term 'ārāpel is also used as a symbol of Yahweh's judgment on sin (Jer 13:16; Ezk 34:12; Joel 2:2; Zeph 1:15). Because the same term is used of God's enveloped glory and his awesome judgments, the term is paradoxical: it bespeaks terror, wonder, fear, majesty, awe, and reverence.

R.B.A.

עָרַפֵּל ('ārapel). See no. 1701b.

- 1702 עָרַשׁ ('āraš) *to be affrighted, dread, fear, oppress, prevail, break, be terrified.*

Derivatives

- 1702a עָרֹשׁ ('ārūš) *dreadful* (Job 30:6).
 1702b עָרִישׁ ('āriš) *mighty, awe-inspiring.*
 1702c מַעְרָאשָׁה (ma'ārāšā) *awful shock, crash* (Isa 10:33).

The verb 'āraš denotes fear or terror; transitively, "to cause terror," or intransitively, "to be terrified." The Hebrew root may be compared with a Syriac root, "to come upon suddenly, violently," and the Arabic 'araša "to quiver, flicker." Hebrew synonyms include yārē "to fear," pāhad "to tremble," gūr "to be afraid," yāgōr "to be afraid," šā'ar "to bristle with horror," and ḥātat "to be shattered, filled with terror."

In the Qal stem the root 'āraš is used in two ways. In a transitive sense the verb means "to cause to tremble, to terrify." An example with Yahweh as subject is in Isa 2:19, 21, speaking of the terror of his judgment. The word occurs with men as the subject in Ps 10:18 (cf. Job 13:25) and Is 47:12 (with irony). The verb is used intransitively six times meaning, "to tremble, be afraid." In five instances those trusting in the might of Yahweh are commanded not to tremble, for Yahweh the great and awesome one is in their midst (Deut 1:29; 7:21; 20:3; 31:6; Josh 1:9). In these passages the verb 'āraš is associated with the synonyms yārē, pāhad, and ḥātat (q.v.).

The Niphal is used once (Ps 89:7 [H 8]) in the phrase, "a God greatly feared in the council of the holy ones" (parallel to nōrā "awesome"). The Hiphil occurs three times (Isa 8:12–13; 29:23). Yahweh is to be held in reverential awe; fearing him, one need fear no other.

'ārūš. (Properly, Qal passive participle) *cliffs* (Job 30:6). BDB reads "(most) dreadful (ravines);" ASV "frightful (valleys)." (KB regards this term as from another root, 'āraš II, and renders "slope," so RSV, "gully.")

'āriš. *Mighty, oppressor, in great power, strong, terrible, violent.* (ASV similar; RSV and NASB occasionally use "ruthless.")

The adjective 'āriš is found twenty times in the OT. Once it refers to Yahweh as a "dread champion" (Jer 20:11, NASB). More often it relates to the ruthless enemies of an individual (e.g. Ps 54:3 [H 5]; 86:14) or a nation (e.g. Isa 13:11; 25:3–5; 29:5; Jer 15:21). Ezekiel employs the phrase 'ārīā sē gōyim "the ruthless of the nations," four times (Ezk 28:7; 30:11; 31:12; 32:12). In Prov 11:16 violent and ruthless men are contrasted to a gracious woman ('ēšet hēn).

ma'ārāšā. *Terror* (Isa 10:33). BDB reads, "awful shock, crash;" RSV, "terrifying power;" NASB, "a terrible crash;" NIV "great power." R.B.A.

- 1703 עָרַק ('āraq) *gnaw* (Job 30:3).

- 1704 עַרַר ('rr) I. *Assumed root of the following.*
 1704a מַעְרָה (me'ārā) *cave, den, hole, Mearah.* (ASV, RSV similar.)

The word m'ārā is a feminine noun from the root 'ārar; compare Arabic maǧ'arat "cave," and perhaps the Ugaritic place name mǧ'rt (see UT 19: no. 1523; AisWUS no. 1630). Some authorities (KB, Holladay, Lisowsky, NEB) distinguish m'ārā II, "barren field" as a hapax legomenon in Isa 32:14. "Caves" is read there by other authorities (BDB, KJV, ASV, RSV, NASB, JB). Synonyms are ḥōr "hole, cave," and m'hillā "hole" (occurs only as a pl. in Isa 2:19).

The word "cave" is used for temporary dwelling, emergency refuge, or burial. Lot and his daughters dwelt in a cave for a period of time (Gen 19:30–38). On numerous occasions people are reported to have fled to caves for safety from enemies. Some examples include the Canaanite kings in the cave at Makkedah (Josh 10:16–27); Israelites during the Midianite oppression (Jud 6:2) and in a battle with the Philistines (I Sam 13:6); the prophets of Yahweh hidden from Jezebel by Obadiah (I Kgs 18:4, 13); and wicked men fleeing from the wrath of Yahweh (Isa 2:19; cf. Ezk 33:27).

The cave of Machpelah which Abraham purchased from Ephron the Hittite (Gen 23) became the burial place for Sarah (Gen 23:19), Abraham (Gen 25:9), Isaac, Rebekah, Leah (Gen 49:31) and Jacob (Gen 50:13). The manner of purchase fits nicely into what is known of Hittite customs of the day (see Kidner, *Genesis*, pp. 145–6). Theologically, the chapter continues Abraham's testing begun in Gen 22. He who had been promised the land of Canaan had to purchase a burial site upon the death of his wife. The cave of Machpelah is believed to be in the Haram el-Khalil at Hebron, surrounded by a wall built in Herod's time (see Avraham Negev, *Archaeological Encyclopedia of the Holy Land*, pp. 141–2, 191).

David in flight from Saul stayed in the Cave Adullam and a cave at Engedi, a scene of humor and pathos (see I Sam 22:1; I Chr 11:15; I Sam 24). The titles of Psalms 57 and 142 likely refer to Adullam.

Elijah is associated with a cave on Mount Sinai in I Kgs 19:9–18. The definite article in the Hebrew text (v. 9) suggests a specific cave, the very place in which Moses saw the glory of Yahweh

1705 עָרַר ('ārar)

(Ex 33:21 f.; on this parallel, see, with some caution, Cross (see bibliography)).

Bibliography: Cross, Frank Moore, Jr., *Canaanite Myth and Hebrew Epic*, Harvard University, 1973. Negev, Avraham, *Archaeological Encyclopedia of the Holy Land*, London and Jerusalem: Weidenfeld and Nicolson, 1972.

R.B.A.

1705 עָרַר ('ārar) II, make bare, strip oneself.

Derivatives

- 1705a עֲרִירִי ('āriri) *stripped*.
- 1705b עָרָר ('ar'ar) *stripped, destitute*.
- 1705c עֲרֹעֵר ('ārô'ēr) *tree or bush*.

The verb 'ārar II is one of several entries in the vocabulary of nakedness; compare the synonyms *gālā* "to uncover;" *ūr* "to be exposed, bare;" *arā* "to uncover, expose nakedness;" and *pāshat* "to strip off." The verb 'ārar is likely a by-form from the root 'arā (q.v.).

Forms from the verbal root 'ārar are found just four times in the OT, each in a different stem. The Qal is used in Isa 32:11 (parallel to *pāshat*) as a command to the complacent women of Jerusalem to strip off finery and clothe themselves for mourning. A Poel in Isa 23:13 has been rendered variously (KJV "they raised up the palaces;" ASV, "they overthrew;" RSV, "they razed;" and NASB "they stripped"), but the RSV and NASB seem preferable. E. J. Young writes, "The reference is to a stripping of the palaces of all their ornament and contents" (*The Book of Isaiah*, II, 135). In Jer 51:58 a Piipal inf. abs. is coupled to a Hithpalpel to render "completely razed" (of the broad wall of Babylon; RSV, "leveled to the ground").

'āriri. Stripped, childless. The adjective 'āriri means "stripped" and is used to describe the loneliness and "nakedness" of the childless in an era when children were necessary for a sense of completeness. Abraham is 'āriri in Gen 15:2, having only Eliezer as his adopted heir. Childlessness was a divine judgment for certain sexual sins (Lev 20:20–21; cf. the judgmental formula of Jer 22:30).

'ar'ar. Stripped, destitute. The adjective 'ar'ar, "stripped, destitute," occurs as a substantive in Ps 102:17 [H 18]. The prayer of the nakedly destitute is not spurned by the Lord.

'ārô'ēr. Tree, bush. Mentioned only in Jer 17:6. A type of shrub, perhaps the Juniper (Arabic 'ar'ar), *Juniperus phoenicia*. This is a shrub with minute leaves like scales, having small, round tawny-colored cones. (See *Fauna and Flora of the Bible* [London: United Bible Societies, 1972], p. 131). On this shrub, compare the Hebrew city name 'ārô'ēr.

R.B.A.

1706 עָרַשׁ ('rs). Assumed root of the following.

1706a עָרֶשׁ ('ereš) *couch, divan* (e.g. Deut 3:11; Amos 3:12).

1707 עֵשֶׁב ('šb). Assumed root of the following.

1707a עֵשֶׁב ('ēšeb) *grass, herb*. (ASV similar; RSV, add "plants.")

The masculine noun 'ēšeb is one of four major synonyms for "vegetation, verdure, herb, or grass." The English "herb," found in the KJV, is used in the broader and older sense of non-woody tissue vegetation, rather than in the more restricted nuance of seasoning or medicinal plants. 'ēšeb and its synonyms correspond more closely to the American English use of the word "plant" than to "herb." The other synonyms (which should be consulted) are: *deshe* "new, fresh grass;" *yereq* "green plant, verdure" (and *yārāq* "greens, vegetables"); and *ḥašir* I, "green grass, herbage" (distinguished by some authorities from homonyms *ḥašir* II, "leeks," and *ḥašir* III, "reeds, cattails"). The reader is also directed to the article on 'ēš "tree." A rare word for "shrub, bush" is *šī(a)h*, only in Gen 2:5; 21:15; and Job 30:4, 7. The Hebrew 'ēšeb may be compared to Arabic 'uṣb "green, fresh herbs, pasturage," and to Akkadian *ešēbu* "to grow luxuriantly." In Biblical Aramaic 'āšab occurs five times in Dan of Nebuchadnezzar's bestial affliction, "eating grass like an ox" (Dan 4:15, 25, 32, 33 [H 4:12, 22, 29–30]; 5:21).

The noun 'ēšeb is found thirty-three times in the Hebrew OT, fifteen of which are in the Torah, and four are in Gen 1. In the creation account this word has its most important role. On the third creative day God called for the earth to "sprout forth vegetation (*deshe*), plants ('ēšeb) yielding seed, and fruit trees ('ēš p'ri) bearing fruit with its seed within, each according to its kind, on the earth; and God saw that it was good" (Gen 1:11; cf. v. 12 for fulfillment). In this context, *deshe* "vegetation," appears to be the broader category, subsuming both 'ēšeb and 'ēš, "plants and trees."

[The absolute use of 'ēšeb in Gen 1 should be contrasted with its construct use in the expression 'ēšeb ḥaššādeh "plant of the field" in Gen 2:5. Cassuto has argued that this expression denotes "cultivated grains" (Cassuto, U., *Genesis in loc.*). But these did not exist at the time the Lord formed Adam because there was as yet "no man to till the ground" (Gen 2:5). Accordingly, Gen 1 and 2 are in harmony. Whereas "plants" did exist before the creation of man, cultivated plants did not. It is possible also, however, that Gen 2:5–6 refers only to the land where Eden was, which was watered by the rivers (not "mist," 'ēd, q.v.). This view would find the reconciliation of Gen 1 and 2 in the thought that they

describe different items of God's creative activity—the world at large in Gen 1, Eden alone in Gen 2:4 ff. (Cf. Harris, R. L., "The Mist, the Canopy and the Rivers of Eden," JETS, 11:177–79). R.L.H.]

Man and animals, some hold, were made originally as herbivores, according to Gen 1:29–30 (cf. 3:18). Not until God's covenant with Noah, following the Deluge, was man specifically instructed to add meat to his diet, but the blood of animals was still restricted (Gen 9:3–4). No account is given of the transformation of some animals to carnivores, but it is likely that this was one of many changes brought by the fall of man and the loss of Edenic conditions. Nevertheless, the ideal of a retransformation of animal life to herbivorous patterns is part of the eschatological hope of Israel—an Eden redivivus where "the cow and the bear will graze; / their young will lie down together; / and the lion will eat straw (*teben*) like the ox" (Isa 11:7; see context of the entire chapter and compare 65:25).

Some authorities, e.g. Kidner, would demur from the view that Gen 1:29–30 suggests that all creatures were herbivorous. Rather, he states that the statement "is a generalization, that directly or indirectly, all life depends on vegetation, and the concern of the verse is to show that all are fed from God's hand" (*Genesis*, p. 52). But he does admit that for man, meat was a new concession in Gen 9:3–4 (*ibid.*, p. 101).

Elsewhere in the OT, the noun 'ēśeb figures in the catastrophic plagues of hail (Ex 9:22, 25) and locusts (Ex 10:12, 15) brought by God through Moses in the classic confrontation with Pharaoh. As God was the creator of all vegetation in Gen 1, so he is the supplier of vegetation in his promises to his people respecting their new land (Deut 11:15). Nevertheless, for the recalcitrant, God may prevent the growth of vegetation in judgment (Deut 29:23 [H 22]). The pervasiveness of grass in a fertile field allows the noun to be used as a figure for abundance (II Kgs 19:26 [used with *yiraq deshe* "green vegetation"]; Job 5:25; Ps 72:16). The transitoriness of grass under the Palestinian sun also allows the noun to be used as a figure of brief flourishing followed by destruction and death (Isa 37:27; Ps 92:7 [H 8]; 102:4, 11 [H 5, 12]).

R.B.A.

1708 אָשָׂא ('āsā) *do, fashion, accomplish.*

Derivative

1708a מַעֲשֵׂה (ma'āseh) *deed, work.*

The verb 'āsā has the basic connotation of "do" or "make." It is used in numerous crystallized expressions, always with the same basic idea.

Aside from the numerous occurrences of the meaning "do" or "make" in a general sense, 'āsā is often used with the sense of ethical obligation. The covenant people were frequently commanded to "do" all that God had commanded (Ex 23:22; Lev 19:37; Deut 6:18, etc.). The numerous contexts in which this concept occurs attest to the importance of an ethical response to God which goes beyond mere mental abstraction and which is translatable into obedience which is evidenced in demonstrable act.

The word is often used in specialized expressions such as "make war" (Gen 14:2), "deal kindly" (Jud 1:24), "show faithfulness" (Gen 32:11), "do folly" (Deut 22:21), "offer sacrifice" (Ex 10:25), "keep the Passover" (Ex 12:48), "execute vengeance" (Jud 11:36), and many more.

When used in the sense of "make," the emphasis is on the fashioning of the object (Gen 8:6; 33:17; Ex 25:10–11, 13, 17, etc.).

The word also connotes the concepts "commit," when used of wrong (Hos 6:9), "to deal with one" (Zech 1:6), and "to follow" in the sense of following advice (II Sam 17:23).

When used of God, the word frequently emphasizes God's acts in the sphere of history. These contexts stress one of the most basic concepts of OT theology, i.e. that God is not only transcendent, but he is also immanent in history, effecting his sovereign purpose. Moses could recall God's great acts in Egypt, reminding the people of all that God "did" (Deut 29:1). That which God has done to the nations is a testimony to God's intervention in history (Josh 23:3). Solomon, in his dedicatory prayer, could beseech God to "act" (I Kgs 8:39). The word 'āsā is often used of the signs and wonders performed by God in the course of history (Josh 24:17; Ps 98:1; Isa 25:1), demonstrating again the heavy emphasis in the OT on the immanence of God.

The word occurs with great frequency in the Genesis account of creation, which is the first great act of God in history. The significant interchange between the words *bārā* "create" and 'āsā is of great interest. The word *bārā* carries the thought of the initiation of the object involved. It always connotes what only God can do and frequently emphasizes the absolute newness of the object created. The word 'āsā is much broader in scope, connoting primarily the fashioning of the object with little concern for special nuances.

The use of *bārā* in the opening statement of the account of creation seems to carry the implication that the physical phenomena came into existence at that time and had no previous existence in the form in which they were created by divine fiat. The use of 'āsā may simply connote the act of fashioning the objects involved in the whole creative process.

The word 'āśā is also used elsewhere in Scripture to describe aspects of the creative work of God (Ps 86:9; 95:5; 96:5).

ma'āseh. *Deed, acts, business, workmanship, purpose.* The primary meaning of the noun *ma'āseh* is "that which is done or made." It occurs frequently in the basic sense of "work" or "labor" (Gen 5:29; Ex 5:4). The word is used often in contexts denouncing idols as the "work" of men's hands (Ps 115:4; Isa 2:8).

The word has the sense of "deed" and, like its verbal root, uses that concept in both a general sense (Gen 20:9; I Sam 19:4) and an ethical sense. When used in the latter sense, it frequently has a negative connotation (Ex 23:24; Ezr 9:13). It may, however, be used positively (Prov 31:31). The "work" of an individual is the basis for requital on the part of God (Ps 62:12 [H 13]).

The word frequently occurs in the sense of "deed" in contexts dealing with God's activity in the created world (e.g. Ps 118:17). A basic theological concept emerges in this regard in the affirmation that God is kind in all his doings (Ps 145:17). The psalmist affirmed that all God's work is done in faithfulness (Ps 33:4). His deeds are awesome (Ps 66:3) and unparalleled (Ps 86:8).

The works of God include the wonders that God performed on Israel's behalf (Deut 11:3, 7), as well as his great acts as they are revealed in his creation (Ps 107:24). These contexts affirm a concept of God that is fundamental to the OT understanding of God. God's acts are discernible in two areas: the physical universe which testifies to God's power and the sphere of history where the acts of God may be clearly witnessed. A well-defined but severely limited natural theology thus exists in the OT. The concept of God's activity in history is an important aspect of OT theology. The psalmist warned of the dire results of forgetting the works of God (Ps 106:13ff.)

The word *ma'āseh* has great significance in the book of Ecclesiastes. Qoheleth asserts that he has seen all the works which are done under the sun, and he finds them devoid of reality (1:14). The word appears to refer here to the events of the world of history observed by Qoheleth. The same usage obtains in 2:17 and 8:9. In Ecclesiastes, the word is used most frequently of man's work. In 3:22 a theology of contentment emerges, for man is encouraged to enjoy his work.

The word occurs in an ethical sense referring to evil deeds (4:3; 8:14b) and good deeds (8:14a). Because evil deeds are not punished immediately, the wicked are encouraged to do more wickedness (8:11).

The word *ma'āseh* connotes "work" or "workmanship" in numerous contexts (Ex 39:5; Deut 14:29; I Kgs 7:8) and is frequently used of

God in this same sense. The heavens are the work of God's fingers (Ps 8:3 [H 4]), and they proclaim his workmanship (Ps 19:1 [H 2]). God's works are a source of gladness (Ps 92:4 [H 5]), and they are proclaimed as great (Ps 92:5 [H 6]; 111:2). The mighty nation of Assyria is only the work of God's hands (Isa 19:25). Man is also the work of God's hand, and this concept forms a basis for Isaiah's plea for mercy (Isa 64:7-8).

The word occurs in a number of technical expressions such as "the work of a baker," i.e. "baked goods" (Gen 40:17) and the work of a perfumer (Ex 30:25).

1711f עָשִׂירִי ('āśīrī), עָשִׂירִיָּה ('āśīrīyā), עָשִׂירִית ('āśīrit) *a tenth.*

1711g עָשָׂה ('āśārōn) *tenth part.*

1711h עָשָׂה ('ma'āśēr) *tithe.*

The Hebrew root 'śr is related to the Arabic verb 'ashara "to form a community, a group," and the Arabic nouns 'ashirat^{un} "tribe," and ma'shar^{un} "assembly." Likely because of the ten fingers, the semantic development was "ten = collection, union." Hence, "ten" in Arabic is 'ashr^{un}; in Ugaritic, 'śr I; in Akkadian, ešru; in Biblical Aramaic, 'āśar.

The concept of tithing in the OT is one of considerable importance in OT theology. As in the instances of circumcision (though infant circumcision does not seem to be documented outside Israel), sacrifice, dietary restrictions, and the like; tithing was not unique with Israel in the ancient near east. Other nations of antiquity practiced tithing. This is true of the Egyptians as well as the Mesopotamians (see, e.g., citations from Akkadian literature respecting tithes paid to gods or temples in CAD, IV-E, 369). Nor was tithing first introduced to Israel in the Mosaic law.

Abram paid a tithe of his war booty to Melchizedek after receiving a priestly benediction from him (Gen 14:20; cf. Heb 7, esp. v. 4), and Jacob vowed a tithe to God at Bethel following his dream of a ladder leading to the presence of Yahweh (Gen 28:22).

It is in the Mosaic code, however, that sense and shape are given to the tithing principle. As J.G.S.S. Thompson observes (NBD, p. 1284), the three clusters of instruction in the Torah serve to answer three basic questions concerning tithing: (1) "what?" (2) "to whom?" and (3) "where?"

The first question, "what is to be tithed?" is answered in the last paragraph of Lev 27 (vv. 30–34). In this major passage, of seemingly incidental setting in the book, the range of the tithe is given in the broadest possible terms, and in a manner perfectly suited for an agricultural economy. All the tithe of the land belongs to Yahweh. This includes vegetation as well as animal life, without exception. Moreover, the tithe is not to be confused with the offering of the firstfruits (Ex 22:29–30 [H 28–29]; see Eichrodt, *Theology of the Old Testament*, I, p. 153), nor is it to be based on partiality (keeping the better for oneself). Respecting animals, for instance, a herdsman was simply to count every tenth animal as it would leave the fold and regard it as belonging to Yahweh. A farmer might wish to convert his agricultural tithe to cash (for ease in transporting it), but he would have to add a fifth to it, to preclude any financial advantage. He could not make such an exchange for his animals. The resultant tithe was "holy to Yahweh" (see *qōdesh*), set apart to his exclusive use.

A second question respecting tithing, "to whom are tithes to be given?" is answered in Num 18:21–32. As the Levites were not to be given a territorial inheritance in Canaan, their reward for their service to God was "every tithe of Israel" (18:21). In their own regard, the Levites were to give a tithe of their own income ("a tithe of the tithe," 18:26), which was reckoned by Yahweh to be as fitting as the grain from agricultural workers. These Levitical tithes were paid to the priest.

A third question, "where are tithes to be given?" is answered in Deut 12: 1–14 and 14:22–29. Tithes and sacrifices were not to be given "at every place that you see" (12:13), but at the "place which Yahweh will choose in one of your tribes" (12:14). This central sanctuary site, subsequently decided to be Jerusalem, was the only authorized point for the presentation of tithes and offerings in the new land (12:6). In the presentation of these tithes and offerings there was to be a sacred meal, in which the Levite was to share, eaten with rejoicing and praise to the magnificent blessing of Yahweh (12:7; cf. 14:23). If the distance would prove to be too great, one might

convert the produce to a monetary equivalent. In Deut 14:28–29 regulations are given for the distribution of tithes within one's own locality every three years. In this tithe there was an emphasis on the needs of the poor and the defenseless (cf. 26:12–15).

Such were "the comparatively simple laws in the Pentateuch governing tithing" (Thompson). There are some complexities, however, respecting these simple laws.

One complexity concerns the number of tithes Israel was to pay. Some read the legislation in the Torah without any thought or question that more than one tithe might be under discussion. Yet, H. Landsdell and others, especially on the basis of Deut 14:22–29 as compared with Lev and Num argue for three tithes: (1) the tithe to be given to the Levites (14:27; Num 18), (2) the tithe for the sacred feast (14:22–26), and (3) the tithe in the third year in the local area for the poor (14:28–29). Landsdell concludes, "It would seem, then, that the Mosaic law enjoined upon the Israelite to pay yearly, in connection with his religion, two-tenths, and, at the end of three years, a third tenth, of his income" (*The Tithe and the Scripture*, p. 36; for *contra*, see S. R. Driver, *Deuteronomy*, ICC, pp. 166–73; M. G. Kline, *Treaty of the Great King*, Eerdmans, 1963, pp. 87–88 argues that only a small portion of the single tithe would go for a communal meal, and that the tithe for the poor was an alternate use of the annual tithe on the third and sixth years). Dennis Wretling argues that there were two kinds of tithes, one primary tithe (Lev 27 and Num 18), and two secondary tithes (Deut 12, 14, 26), whose purposes related to the "justice, mercy, and faithfulness" of our Lord's words in Matt 23:23; that is, justice to the Levite, faithfulness to God, and mercy to the poor (unpub. master's thesis, "Financial Stewardship in the New Testament Church," Western Baptist Seminary, 1975).

A second complexity relates to the perversion of the tithing legislation. Israel and later Judaism were prone to err in one of two ways. Either they kept the law too rigidly, losing its intended purpose, so that tithing came to be regarded as a means of obtaining mercy from God in the intertestamental and New Testament periods (cf. Lk 11:42); or Israel neglected the tithe and became guilty of robbing God (Mal 3:8–10).

Perspective on tithing in the OT is found in two directions, Godward and manward. Respecting the Godward thrust, tithing was never meant to be an onerous weight, that one *must* give a tithe of what one earns. Rather, the tithe was a liberating act of joyful worship (e.g. Deut 12:12; cf. the "cheerful giver" of II Cor 9:7). All that one has is God's (on this point, see J. B. Payne, *The Theology of the Older Testament*, p. 434). The surrender to his use of a small proportion of what one

holds in trust by his grace is a grateful act of submission and dependence. Secondly, tithing has a manward, or community thrust; it is part of the inter-relatedness of the people ('ām) of God. The Levites who were in the service of God, not in commercial activity, were the direct beneficiaries of the tithes (Num 18:21). There was an inter-relatedness, therefore, between their ministry and the daily labor of the non-Levites. In this synergistic bond there was a regular reminder of their need one for another. Moreover, the poor, the widows, and the orphans (proverbial subjects of neglect) were to be maintained by means of the tithe of the third year (Deut 14:29). They too, though defenseless, were a part of the community ('ām). The tithes insured their well-being (cf. the repeated test of true religion, one's care for the widow and orphan, e.g. Isa 1:23; James 1:27), a major step toward a healthy society.

'eśer, 'āsārā. Ten (ASV, RSV). The cardinal numeral "ten" in masculine and feminine forms, is found very often in the Hebrew OT (176 times). Only occasionally are the forms of the number ten joined to other numbers (e.g. Gen 50:22, "Joseph lived one hundred ten years"). More often these forms of the word are used for a group not exceeding ten items, such as "ten bulls" (Gen 32:15 [H 16]). In the Aramaic sections of the OT, "ten" is found five times ('āsar and 'aśrā). While ten is the number used in several important lists, such as the Ten Commandments (literally, "ten words," Deut 4:13), there does not appear to be any mystical or symbolic significance to the number ten in the OT.

'āsār, 'eśrēh. Ten, -teen (ASV, RSV). These are the masculine and feminine forms of "ten" which are joined to units to make the numbers 11–19, both cardinals and ordinals. Usually the numbered item, if commonly used with numbers, is in the singular (e.g. "day," "month," "year," etc.); otherwise, the numbered item will be in the plural. In making the "teen," the unit may precede or follow the form for "ten." Again, this is a very common entry in the Hebrew OT. The masculine is found 203 times and the feminine 144 times, the gender agreeing with the item numbered.

'āsar. To tithe, give or take a tithe, take a tenth. (ASV, RSV similar.) A denominative verb according to BDB, but not KB (witness the Qal in I Sam 8:15, 17; elsewhere Piel or Hiphil). The verb "to tithe" is used in only five passages in the OT (Gen 28:22, in Jacob's vow to God at Bethel; Deut 14:22, in God's command to tithe agricultural produce annually; Deut 26:12, in the tithe of the third year, designated for the Levite and the poor; I Sam 8:15, 17, in Samuel's warning of the taxation policies likely to be instituted with the

coming of kingship; and Neh 10:37–38 [H 38–39], of Levites who were to collect the tithes from rural areas). In four of these passages, tithing is described as an act of worship to God. In one (I Sam 8:15, 17) the word is used, perhaps with some irony, of the oppressive taxation of a king (a common practice in the ancient near east).

'āsōr. Ten, tenth. A masculine noun meaning "a ten." In Gen 24:55 it is used of a period of ten days, and in Ps 33:2 of an instrument with ten strings (so Ps 92:3 [H 4]; 144:9). Elsewhere, 'āsōr is used in a date formula, "on the tenth day of the month" (Ex 12:3, ten plus times).

'eśrim. Twenty. The plural of ten is used for "twenty" in the Hebrew OT; it is very common, seen 315 times.

'āsiri, 'āsiriya, 'āsirit. A tenth. These are the masculine and two feminine forms of the ordinal "tenth." They are used in such phrases as, "the tenth day" (Num 7:66). The words are used as well as substantives (e.g. "a tenth" [a remnant], Isa 6:13; "a tithe" of herds and flocks, Lev 27:32).

'issārōn. A tenth deal (ASV, "tenth part (of an ephah)"; RSV, "a tenth of an ephah"). A measure of quantity employed in Ex Lev and Num in sacrificial texts (thirty-three times).

ma'āśēr. Tithe, tenth part. This is the noun for "tithe," to which the verb 'āsar "to tithe" is related. The first mention of a tithe in the OT is Abram's offering to Melchizedek (Gen 14:20). Legislation respecting the tithe is given in Lev 27, Num 18, and Deut 12, 14, 26. After the legal corpus the word "tithe" appears infrequently in the OT. In pre-exilic texts subsequent to the Torah, this word occurs only in Amos 4:4 (although II Chr 31:5ff. records tithes in the reform of Hezekiah). In post-exilic texts, ma'āśēr is found six times in Neh and twice in the classic text in Mal 3 (vv. 8, 10). In Ezk this noun is used twice of a tenth part of a measurement (45:11, 14).

1712 אָשַׁן ('āshan) *to smoke; to be angry*. Denominative verb.

Parent Noun

1712a אָשָׁן ('āshān) *smoke*.1712b אָשֶׁן ('āshēn) *smoking* (Ex 20:18; Isa 7:4).

'āshān. Smoke. This noun (cf. Arabic *aṭana*) means "smoke," both literally and figuratively. Comparison should be made with the root *qātar* (Ugaritic *qtr*) which is a term used in the OT for sacrificial smoke.

'āshān is used of the smoke arising from the burning city of Ai (Josh 8:20–21). The term then becomes an ominous figure of the utter devastation of the enemies of Yahweh (Ps 37:20; 68:2 [H 3]; Isa 34:10; Nah 2:14); and, conversely, of the destructive powers of wickedness (Isa 9:18 [H 17]). Smoke is an irritant to the eyes (Prov 10:26), may be a military signal (Jud 20:38, 40), and smoke clouds arise from caravans (Song 3:6) or armies (Isa 14:31). Smoke, like vapor (see *hebel*), is a picture of transitoriness (Ps 102:3 [H 4]; Isa 51:6; Hos 13:3). Once the word is used of the fire-snorting Leviathan (Job 41:20 [H 12]).

Most significantly, the root 'āshān is used of Yahweh in two ways. First, smoke is a marked attendant to the theophanies to Abram (Gen 15:17), Moses on Mount Sinai (Ex 19:18; 20:18; cf. Ps 104:32; 144:5; II Sam 22:9; Ps 18:8 [H 9]; Isa 4:5; Joel 2:30 [H 3:3]), and in Isaiah's vision of God (Isa 6:4). The origin of the figure is obscure, but the portent is clear. Smoke (along with fire) proclaims the terror of Yahweh, the confrontation of his holiness with man's sin (see Derek Kidner, *Genesis*, pp. 124–25). Secondly, the verb and noun may refer to the anger of Yahweh (Deut 29:20 [H 19]; Ps 74:1; 80:4 [H 5]; Isa 65:5). Whereas the anger of God against his enemies is terrifying indeed, the smoke and terror of his presence does not create panic among his own, but a mysterious wonderment, attraction, reverence, joy, and confidence (see Eichrodt, *Theology of the Old Testament*, II, p. 270).

R.B.A.

1713 אָשַׁק ('āshaq) *oppress, get deceitfully, defraud, do violence*.

Derivatives

1713a אָשַׁק ('ōsheq) *oppression, extortion*.1713b אָשַׁקָה ('ōshqâ) *oppression, distress* (Isa 38:14).1713c אָשַׁק ('āshôq) *oppressor* (Jer 22:3).1713d אָשַׁקִּים ('āshûqim) *oppressions*.1713e מַשְׁשָׁקָה (ma'āshaqqâ) *extortion* (Prov 28:16; Isa 33:15).

The verbal root 'āshaq is concerned with acts of abuse of power or authority, the burdening, trampling, and crushing of those lower in station. Important synonyms in the semantic range of 'āshaq include: *gāzal* "to deprive, take by force;" *dākā* (Niphal) "to be crushed;" *yānā* "to be violent, to oppress;" *lāhaṣ* "to crowd, oppress, torment;" *šārar* "to be cramped, oppressed;" *rāšaṣ* "to ill-treat, abuse;" and *shādad* "to devastate, maltreat." The Hebrew root 'āshaq has been related to the Akkadian adjective *eṣqu* "strong, massive," and the Arabic noun 'āṣaq "roughness, injustice, ill-nature" (cf. Arabic 'uṣuq "hard toward his debtors").

E. Jacob writes in his *Theology of the Old Testament*, "If man's nature can be defined by the theme of the image of God, his function can be qualified as an imitation of God. This involves a double obligation for man, we might say a double outlook: one eye turned towards God and the other towards the world" (p. 173). This "double outlook" precludes for the righteous any oppression of those of inferior station in life. Just as man, much-forgiven, is expected by God to respond forgivingly to others, so one, who has been dealt with in extraordinary graciousness by the Master of eternity owes favorable treatment to the defenseless. The proverb explains, "He who oppresses the poor reproaches his Maker / But he who is gracious to the needy honors Him" (Prov 14:31, NASB).

Oppression, hence, is a grievous sin against which Israel was warned in stern terminology. One is never to oppress ('āshaq) or rob (*gāzal*) his neighbor (Lev 19:13), or his hired servant, whether a fellow Israelite or a foreign sojourner (Deut 24:14). Ludicrous is the poor man who would oppress the lowly (Prov 28:3). Those most likely to be mistreated and oppressed were those without adequate defense of their rights, i.e. the widow, the orphan, the sojourner and the poor. Against none of these were evil acts to be directed or contemplated (Zech 7:10; see Jer 7:6). Such acts of oppression are a breach of faith against Yahweh (see Lev 6:1–7 [H 5:21–26]). Of such gross abuses of privilege and power the prophet Samuel was able to maintain full innocence (I Sam 12:3–4). The king, a regent under Yahweh had as a divine task the vindication of those oppressed by wicked men (Jer 21:12). The king was to "crush the oppressor" (*widakkē* 'ōshēq, Ps 72:4). This is in imitation of Yahweh who "works vindication and justice for all who are oppressed" (Ps 103:6; see Ps 105:14; I Chr 16:21; Ps 146:7).

Nevertheless, one of the pervasive and persistent sins of many Israelites was the oppression of

1714 עָשַׁר ('āšar)

the poor and the weak and the committing of gross acts of extortion against the sojourner (Ezk 22:29, Hos 12:7 [H 8], "he loves to oppress"; Amos 4:1; Mic 2:2; Mal 3:5). For such acts, punishment by Yahweh is just: "You shall be only oppressed and robbed continually and there will be no one to help you" (Deut 28:29; cf. v. 33). Yet in his judgment God does remember mercy. Israel who is oppressed by others for her own oppressive actions (Hos 5:11) will yet see God's redemption (Jer 50:33-34).

Once (wrongly!) God is accused of oppressing the righteous (Job 10:3). The righteous may pray, however, that Yahweh will preserve them from oppressive acts (Ps 119:121-22). Two rare uses of the verb 'āshaq are in Job 40:23 (of a turbulent, raging river), and Prov 28:17 (one burdened, laden with the blood of another).

R.B.A.

1714 עָשַׁר ('āšar) *be rich*, Qal; *to enrich*, Hiphil; *pretend to be rich*, Hithpael.

Derivatives

1714a עָשֶׁר ('ōsher) *riches*.

1714b עָשִׁיר ('āšir) *rich, rich man*.

This verbal root ('atar in Biblical Aramaic) is one of the major entries in the lexicon of wealth and riches. Some synonyms are: *hôn* "wealth," *hāmôn* "riches," *hayil* "property, wealth," *hōsen* "treasure," *yitrā* "savings," *yitrôn* "profit," *n^ckāsīm* "wealth," and *matmôn* "treasure."

There is an ambivalent attitude in the OT respecting wealth and riches. On the one hand, riches are said to be the blessing of Yahweh to the righteous (Ps 112:3; cf. Prov 10:22; I Sam 2:7 [Hannah's psalm]), the reward of humble faith (Prov 22:4), the gain of wisdom (Prov 14:24), the reward of valor (I Sam 17:15), the result of diligent labor (Prov 10:4), and the proper adornment of kings (e.g. Solomon [I Kgs 10:23; II Chr 9:22; cf. II Chr 1:11-12], Jehoshaphat [II Chr 17:5], and Hezekiah [II Chr 32:27]; but cf. Deut 17:17).

Conversely, riches may lead to self-dependence rather than dependence upon Yahweh (see Ephraim in Hos 12:8 [H 9]), may derive from deceit and treachery (Jer 5:27), may fly away with eagles' wings (Prov 23:4), cannot redeem a soul (Ps 49:6 [H 7]; cf. I Pet 1:18-19), and cannot last (Ps 49:16-17 [H 17-18]; "you cannot take it with you!"). Hence, a good name is more desirable (Prov 22:1).

As in so many areas of life, the evil is not in one's riches, but in one's attitude toward them. Proverbs 28:20 reads, "A faithful man will abound with blessings / But he who makes haste to be rich will not go unpunished" (NASB). He who has riches (or wisdom or might) had rather

boast in knowing Yahweh (Jer 9:23-24 [H 22-23], cf. I Cor 1:29-30). Rather than in riches the righteous trust in the loyal love of Yahweh (Ps 52:7-8 [H 9-10]). The verb 'āšar in Ps 65:9 [H 10] refers to Yahweh's (millennial) enrichment of the earth in the year of his goodness (Ps 65:11 [H 12]).

The tension between the benefits and dangers of riches is well expressed in the sage's prayer: "Give me neither poverty nor riches, feed me with the food that is my portion, lest I be full and deny thee and say 'Who is the Lord?' or lest I be in want and steal and profane the name of my God" (Prov 30:8-9).

R.B.A.

1715 עָשַׁשׁ ('āshēsh) *waste away*.

Derivative

1715a עָשׂ ('āsh) *moth*.

1716 עָשַׁת ('āšat) *I, be smooth or shiny* (Jer 5:28).

Derivatives

1716a עֲשֶׂת ('eshet) *plate* (Song 5:14).

1716b עֲשׂוֹת ('āshôt) *smooth* (Ezk 27:19).

1717 *עָשַׁת ('āšat) *II, think*. Occurs only in the Hithpael, in Jon 1:6.

Derivatives

1717a עֲשׂוֹת ('ashtût) *thought* (Job 12:5).

1717b עֲשׂוֹנָה ('eshtônâ) *thought* (Ps 146:4).

1717c עֲשִׁתִּי ('ashtê) *one*.

עֲשׂוֹת ('ashtût). See no. 1717a.

עֲשִׁתִּי ('ashtê). See no. 1717c.

עֲשׂוֹנָה ('eshtônâ). See no. 1717b.

1718 עֲשִׁתֹּרֶת ('ashtôret) *Ashtoreth, Ashtoroth* (plural). This is the name of a Canaanite goddess of sex and war, a vivid representation of paganism in its most corrupt manifestations.

Derivatives

1718a עֲשִׁתֹּרוֹת ('ashtârôt) *I, flocks*.

1718b עֲשִׁתֹּרוֹת ('ashtârôt) *II, Ashtaroth*.

'ashtârôt *I. Flocks* (ASV, RSV, NASB, "young"). The term occurs four times in Deut (7:13; 28:4, 18, 51) in the phrase, *'ashtârôt šô'nekâ*, rendered "the flocks of thy sheep" (KJV), or "the young of thy/your flock" (ASV, RSV, NASB; "ewes" by KB, Holladay). Albright observes, "Since Astarte was best known as the patroness of sexual re-

production, this is a very natural development, quite acceptable in Israel, as the Israelites had little feeling for the religious connotations of the expression" (YGC, pp. 185–86).

'ashtārōt II. Ashtaroth. (ASV, RSV similar.) A place name, perhaps associated with the worship of Astarte, some twenty miles east of the Sea of Galilee, Tell 'Ashtarath; mentioned in the Amarna texts and Assyrian inscriptions (see maps 21, 23, 24, etc., in *The Macmillan Bible Atlas*). Ashteroth [near] Karnaim was conquered by Chedorlaomer in the war of Gen 14. Ashtaroth in the time of Moses was the principal city of Og, king of Bashan (Deut 1:4; see Josh 9:10; 12:4; 13:12, 31; I Chr 6:71 [H 56]—gentilic).

The goddess Astarte, as she is known in Greek transliteration, figures prominently in the religious world of the ancient Near East as a mother-goddess associated with sexual reproduction as well as warfare. The Hebrew *'ashtōret* is cognate to Akkadian *īštar* and Ugaritic *'ttrt* (there is also a masculine deity, *'ttr*; cf. Moabite *'shtr* [masc.], Phoenician *'shrt*, Aramaic *'tr*, Old South Arabic *'attar* [masc.]). The Hebrew *'ashtārōt* is the plural form. Albright and Pope suggest that the plural refers not to many such goddesses, but reflects "an increasing tendency to employ the plural of the name "in the clear sense of totality of manifestations of a deity" (Pope, p. 20, quoting Albright, p. 213). The BDB lexicon observes that the singular form *'ashtōret* may be an artificial pronunciation to suggest the vowel pattern of the Hebrew *bōsheh* "shame" (q.v.); the Akkadian, Ugaritic [normalized *'attart*], and Greek renderings show no vowel between the last two consonants. This singular Hebrew form is used three times in the book of Kings of a Sidonian goddess worshiped by Solomon (I Kgs 11:5, 33; II Kgs 23:13, called the *shiqquš* "abominable idol," of the Sidonians). Elsewhere in the OT the plural *'ashtārōt* is found, usually associated with Baalim (the plural of Baal [q.v.], Jud 2:13; 10:6; I Sam 7:4; 12:10), and once with "strange gods" (I Sam 7:3). Saul's armor was placed in a temple of Ashtaroth upon his death (I Sam 31:10).

Some scholars dissent, but it appears likely that the goddesses Ashera (q.v.) and Astarte are one and the same (e.g. Kapelrud, p. 62). In the Hebrew Bible, as in the Ugaritic texts, Astarte is used much less often than Ashera. Yet they are both associated with Baal (and in Ugaritic, with El). To complicate the picture of the Canaanite pantheon further, some scholars suggest that the goddess Anat (Ugaritic *'nt*, UT 19: no. 1889), the consort of El and the sisterspouse of Baal, is identified at times with Ashera and Astarte (e.g. Harrison, p. 167). *Anat* does not occur in the OT as the name of a goddess, but is the name of Shamgar's father (Jud 3:31; 5:6; cf. Anathoth, a

place name, Josh 21:18). The devotees of these goddesses glorified Astarte, Ashera, and Anat (or, as some suggest, one goddess under three designations) in terms of exaggerated sexual features (so the terra cotta figurines) coupled with vicious sadism (so the nauseating scenes in the Ugaritic epic literature).

Modern readers of the OT doubtless miss occasionally the import of Canaanite idolatry. The worship of a Canaanite god or goddess was no minor blemish in Israel's history. Besides having a devastatingly debasing effect on the practitioner, the acts of worship, which included male and female cultic prostitutes in hetero- and homosexual liaisons, were fundamentally opposed to the worship of the living God, and were, in fact, acts of treason against his suzerainty. R. K. Harrison, after describing the gross and savage worship system of the Canaanites, concludes that "its sordid and debased nature stand in marked contrast to the high ethical ideals of Israel. The absolute lack of moral character in the Canaanite deities made such corrupt practices as ritual prostitution, child sacrifice, and licentious worship the normal expression of religious devotion and fervor. In consequence there could be no compromise between the morality of the God of Israel and the debased sensuality of Canaanite religion" (see Bibliography, p. 170).

R.B.A.

עָת ('ēt). See no. 1650b.

1719 *עָתוֹד ('ātōd) *be ready*. Occurs only in the Piel and the Hithpaal.

Derivatives

1719a עָתִיד ('ātid), עָתוּד ('ātūd) *ready, prepared*.

1719b עָתוּד ('attūd) *he-goat, ram, chief one*.

'attūd. He-goat. The Hebrew noun *'attūd* is one of several terms used for goats in the OT, and

1720 *עָתַם ('*ātam*)

is to be compared to Akkadian *atūdu* "wild sheep," and Arabic '*atūd*^{un} "young he-goat." For a list of Hebrew synonyms see 'ēz.

The male goat was a sacrificial animal and the '*attūd* is so designated as part of the peace offerings of the leaders of Israel thirteen times in Num 7 (twelve times for each offering, plus once [v. 88] in the total). In these offerings the '*attūd* is associated with rams and male lambs. Sacrifice must be motivated by reverent attitude, to be acceptable. Hence, Yahweh spurns the blood of goats from the wicked and unrepentant (Isa 1:11), and expresses scornful irony in Ps 50:7-15 respecting those who sacrifice wrongfully.

Goats are part of Moses' picture of the plenty of the land of Canaan (Deut 32:14). Striped or speckled goats were rather rare; hence, Jacob's stratagem in the Laban struggle (Gen 31). The word is employed figuratively on occasion. Since the '*attūd* was the head of the flock (Jer 50:8), the term could be used of rulers and leaders (see Isa 14:9; Ezk 34:17).

- עָתַם ('*attā*). See no. 1650c.
 עָתוּד ('*ātūd*). See no. 1719a.
 עָתוּד ('*attūd*). See no. 1719b.
 עָתִי ('*atti*). See no. 1650d.
 עָתִיד ('*ātid*). See no. 1719a.
 עָתִיק ('*ātiq*), עָתִיק ('*attiq*). See nos. 1721c,d.

1720 *עָתַם ('*ātam*) Occurs only in Isa 9:18, in the Niphal. Meaning dubious, perhaps "will be scorched."

1721 עָתַק ('*ātēq*) *become old, be removed*, Qal; *copy out, leave off, remove*, Hiphil.

Derivatives

- 1721a עָתָק ('*ātāq*) *forward, arrogant (of speech)*.
 1721b עָתָק ('*ātēq*) *durable* (Prov 8:18).
 1721c עָתִיק ('*ātiq*) *durable*.
 1721d עָתִיק ('*attiq*) *ancient*.

This root is used infrequently in Hebrew of spatial motion and temporal aging. Its Akkadian cognate *etēqu* is a common verb meaning "to pass along, advance." Cognates are found also in Arabic ('*ataqa* "to precede, grow old"), Ugaritic ('*tq* "to pass") and Aramaic ('*attiq* "old").

The root is used in the Qal in Job 14:18 of a rock moving from its place (cf. Job 18:4). It is used of aging with consequent weakening (of the eye) (Ps 6:7 [H 8]), and of persistent strength of the wicked (Job 21:7).

In the Hiphil stem the root is used twice of patriarchal travels (Abram in Gen 12:8, Isaac in Gen 26:22). Job 32:15 speaks of words failing, leaving the speaker in the lurch. Job 9:5 tells of

the awesome power of Yahweh who *removes* mountains, overthrowing them in his anger. A unique employment of the Hiphil is found at Prov 25:1 where the proverbs of Solomon are said to have been *transmitted* by the men of Hezekiah (So R. B. Y Scott, *Proverbs*, in AB, p. 155).

'*ātāq*. *Arrogancy, grievous things, hard things, stiff*. Used of froward, insolent and arrogant speech (1 Sam 2:3; Ps 31:19; 75:6; 94:4).

'*ātēq*. *Durable*. (ASV same; RSV, "enduring.") An adjective used in Prov 8:18 of ancient or hereditary (hence, eminent) wealth.

'*ātiq*. *Durable*. (ASV same; RSV, "fine.") Used only in Isa 23:18, of noble or choice attire.

'*attiq*. *Ancient, drawn away*. (ASV, RSV, "ancient, weaned.") Used to mean removed from the breasts (weaned) in Isa 28:9, and old or ancient in I Chr 4:22.

R.B.A.

1722 עָתַר ('*ātar*) *I, pray, entreat*.

Derivative

1722a עָתָר ('*ātār*) *suppliant, worshiper* (Zech 3:10).

The verb '*ātar* is a somewhat unusual entry in the vocabulary of prayer. Its Arabic cognate '*atara* means "to slaughter for sacrifice." Perhaps the Hebrew '*ātar* has a sacrificial basis (so von Rad, *Old Testament Theology*, I, p. 380, and Eichrodt, *Theology of the Old Testament*, I, p. 172). In Ex 8:28 [H 24] '*ātar* is related to sacrifice, but see below. This verb is rendered in the LXX often by *euchomai* "to pray" (Ex 8-10) and (in the Niphal) *epakouō* "to hear with favor." The word "entreat" means "to make an earnest prayer or request, to beseech, implore." Important synonyms include *hānan* (Hithpaël) "to plead for grace," *pāga'* "to urge strongly," *pālal* (Hithpaël) "to pray," *shā'al* "to ask, request," and *hālā* (Piel) "to appease, entreat."

The biblical doctrine of prayer, as Eichrodt attests, is remarkable for the element of freedom from "any trace of hollow pathos or high-flown flattery; rather its marks are a childlike simplicity, sincerity and confidence" toward Yahweh. Further, in contrast to the prayer literature of the ancient Near East, there is not a "disparity between the prayer of the cultus and the prayer of the private individual" (Eichrodt, *Theology of the Old Testament*, I, p. 175). Biblical prayer is spontaneous, personal, motivated by need, unconditioned by time or place. As Vriezen observes, "God could be approached anywhere (Gen. XXIV) and at any moment of the day" (*Outline of Old Testament Theology*, p. 279). It is of interest that in Israel's worship despite the de-

tailed instructions for sacrifice, there is not a fixed liturgy of prayer. It was to be spontaneous.

Of the twenty occurrences of *'atar*, eight are found in the theological contest of the plagues in Ex 8–10, (viz. Ex 8:8–9, 28–30 [H 4–5, 24–26]; 9:28; 10:17–18). In Ex 8:28 [H 24] sacrifice is related to the prayer of entreaty; such a relationship seems likely throughout this episode. Sacrificial acts are associated with the making of entreaty in II Sam 24:15 (David offers burnt offerings and peace offerings to stay the plague at the direction of the prophet Gad), and perhaps in II Sam 21:14 (concerning the burial of Saul and Jonathan). Sacrifice need not always accompany prayer of entreaty, however, as the two and one-half eastern tribes prayed to God in the midst of battle, "and He was entreated for them, because they trusted in Him" (I Chr 5:20). Yet another example of sacrifice-less entreaty is given by Manasseh in his prayer of contrition while in Babylonian captivity (II Chr 33:12–13; cf. v. 19). In this passage *'atar* is used along with *hālā* "to appease," *kāna* "to humble oneself" (Niphal), *pālal* "to pray" (Hithpael), and the noun *hinnā* "supplication."

The active forms of *'atar* (Qal and Hiphil) have to do with prayer as it is given to Yahweh in

earnest entreaty; the passive (Niphal) is used of the prayer as received with favor by Yahweh, the marvelous display of his grace and condescension. This interplay of voice may be observed in Gen 25:21: "And Isaac *entreated to* (Qal) Yahweh on behalf of his wife, for she was barren, and Yahweh *was entreated of him* (Niphal) and Rebekah his wife conceived." This verb is to be distinguished from two homonyms: *'atar* II and *'atar* III.

R.B.A.

- 1723 *עֵתֶר ('*atar*) II, *be abundant*. Occurs only in the Niphal and Hiphil.

Derivative

- 1723a עֵתֶרֶת ('*äteret*) *abundance* (Jer 33:6).
- 1724 עֵתֶר ('*tr*) III. *Assumed root of the following*.
- 1724a עֵתֶר ('*ātār*) *odor* (of incense, Ezk 8:11).
- עֵתֶרֶת ('*äteret*). See no. 1723a.

1725 פָּאַר (pā'ā) *cleave in pieces* (Deut 32:26).

Derivative

1725a פִּנָּה (pē'ā) *corner, side*.

pē'ā. Corner, side. *pē'ā* is used eighty-two times in the OT, five times in the absolute state, seventy-seven times in the construct state. The one questionable reference is Amos 3:12, "The sons of Israel will be rescued that dwell in Samaria in the corner of a bed (*bip'at miṭṭā*)."¹ KB, p. 780, suggests that *pē'ā* here is from the root *yāpā/yāpā* "to be beautiful" and translates "splendid (i.e., luxurious) couch."

It is of interest to note that of the eighty-two occurrences of *pē'ā*, forty-four of them are in Ezekiel and without exception they are all found in the last unit of the book, chaps. 40–48, the prophet's vision and description of the new temple. Along with these Ezekiel passages, the word is used in Exodus, and in Joshua, in the stereotype phrase "east/west/north/south side" of the tabernacle, an apportionment of land, or the designation of a city's boundary.

The phrase "east side" (*p'at qādim/q' dēmā*) and its counterpart "west side" (*p'at yām*) each appear twenty-three times. The phrase, "north side" (*p'at šāpôn*) is used eleven times as is its polarity "south side" (*p'at negeb*). Thus, the use of *pē'ā* in relation to one of the four points of the compass accounts for sixty-eight of eighty-two usages.

The second basic way *pē'ā* is used in the OT is in the meaning "corner," though how "corner" in translation is to be distinguished from "side" is not always clear or obvious. As "corner" *pē'ā* may refer to (1) the corner of a foreign land (frontier regions), Neh 9:22; Num 24:17; Jer 48:45; (2) the corner of a table, Ex 25:26; 37:23; (3) the corner of the court (in the tabernacle), Ex 27:9; (4) the corner of a field, Lev 19:9; 23:22; (5) the corner of the hair on the head, Lev 19:27; (6) the corner of the beard, Lev 19:27; 21:5; (7) the sides of the head, i.e. the temples, Num 24:17 (maybe Jer 48:45).

In connection with (7) we might note the three references in Jer 9:26 (H 25); 25:23; 49:32. In each of these verses one finds the phrase *q' šūšē pē'ā*, literally, "those cut off/clipped on the corner," the temples. The KJV translation, "and all that are in the utmost corners" (9:26 [H 25]) seems to be in error. JB appropriately translates this phrase "Crop-Heads!" But NIV follows the older interpretation thought to be more appropriate to the context. Also the hair, beard or face

is not mentioned in these three passages as they are elsewhere when foreheads, etc. are intended. It is in any case a reference to the nomadic Arab tribes of Israel's day.

There are two especially interesting contexts in which *pē'ā* as "corner" occurs. The first is in Lev 19:27; 21:5. Both verses prohibit rounding off the hair at "the edges" or trimming "the edges" of one's beard. These injunctions, at first sight meaningless, are found listed with other abominations such as body laceration, tattooing, and even cultic prostitution. Presumably the references to the avoidance of cutting the edges of one's hair refer to the peculiar markings which the pagans put on themselves at their funerary rites (Jer 9:26 [H 25]; 25:23; 49:32). It is thought that their intention was to make the mourner incognito to the spirits hovering round the deceased. In Israel such deference to the presence of evil spirits is prohibited.

The second context is in Lev 19:9 and 23:22: "when you gather the harvest of your land, you are not to harvest to the 'very end' of the field" (and cf. Deut 24:19–22; Ruth 2:2). This fact is illustrative of the Bible's concern for the poor and the stranger.

V.P.H.

1726 פָּאָר (pā'ar) *I, glorify, beautify, adorn*.

Derivatives

1726a פָּאָר (p'ār) *turban*.

1726b תִּפְאָרָה (tip'ārā) *beauty*.

The verb *pā'ar* appears thirteen times in the OT, six times in the Piel (of which four are in Isa: 55:5; 60:7, 9, 13) and seven times in the Hithpael (of which five are in Isaiah: 10:15; 44:23; 49:3; 60:21; 61:3).

The basic meaning of *pā'ar* in the Piel is "to beautify/glorify." In the six instances of this, the subject of the verb is always God. The recipient is his child(ren), for example, Isa 55:5; Ps 149:4, or his sanctuary (Ezr 7:27; Isa 60:7, 13). This thought is carried into the use of *pā'ar* in the Hithpael (Isa 44:23; 49:3; 60:21; 61:3). An additional meaning in this stem is "to boast" as seen in Jud 7:2; Isa 10:15. Exodus 8:5, Moses speaking to Pharaoh, literally reads, "glory yourself over me," which seems to mean "please give me an order" or "explain yourself before me."

This distinction in the verb between "to beautify" and "to boast" is found in the derived substantive as well, although the primary meaning is "beauty," but including the nuance of "pride" (cf. Isa 10:12, "I will punish the 'pride' of his arrogant looks," and also Isa 13:19 (Babylon) and 20:5 (Egypt)).

There is a sense in which *tip'ārâ* speaks of a right kind of boasting, pride, a "glorying." This is especially true of this word in Proverbs: 17:6, "the children's 'glory' is their father"; 20:29, "the 'glory' of the young is their strength"; 28:12, "when the righteous triumph, there is great 'rejoicing'." (See also Jud 4:9.) Related to these are those verses in which God speaks of Israel as his "glory," Isa 46:13; 62:3; Jer 13:11; 33:9.

It is interesting to note the extensive vocabulary in the or for "beauty." This can be observed in the number of synonyms for *tip'ārâ* used in a parallel relationship. Isaiah 28:5, "The Lord will be a crown of glory (*š' bi*), a diadem of beauty." Psalm 96:6, "Strength (*'ōz*) and beauty are in his sanctuary." I Chronicles 29:11, "Yours, O Lord, is the greatness (*g' dūllâ*) and the power (*g' būrâ*) and the glory, and the victory (*nēsah*) and the majesty (*hōd*). Exodus 28:2, 40, "Clothes . . . for glory (*kābōd*) and beauty." Deuteronomy 26:19, "To make you high . . . in praise (*t' hillâ*), and in name (*shēm*) and in honor." Isaiah 4:2, "And the fruit of the earth shall be excellent (*gā'ōn*) and beauty." Isaiah 64:11 [H 10], "Our holy (*qādōsh*) and beautiful house." Also Isa 63:15.

p'ēr. Turban. If the idea behind the verb is "to clothe with beauty" it is only fitting that a derivative from the verb should refer to some kind of clothing. The turban was not limited to a certain sex or worn on just one occasion as the following shows. It could be worn by women (Isa 3:20, כִּנֹּר "bonnets") or by men (Ezk 24:17, 23, Ezekiel himself, כִּנֹּר "tire"). It also was worn by the high priest or priests and was made of linen (Ex 39:28; Ezk 44:18). It was worn by the bridegroom (Isa 61:10), perhaps here with the translation "wreath." Cf. also "garland" for ashes in Isa 61:3.

tip'ārâ. Beauty, glory, pride. Occurs fifty-one times in the OT, and with two exceptions (Isa 28:5 and Jer 48:17) always in the construct case, *tip'eret* "beauty of."

Bibliography: THAT, II, pp. 387-88.

V.P.H.

1727 *פָּאָר (pā'ar) II, *go over the boughs*. Denominative verb. Occurs only in Deut 24:20 (Piel).

Parent Noun

1727a פֹּאֲרָה (pō'râ) *bough*.

1727b פָּאָרוֹר (pā'rūr) *glow* (Nah 2:11; Jon 2:6). Meaning uncertain.

1728 פָּאָרָן (pā'rân) *Paran*.

This biblical place name is referred to only in the books of Gen, Num, Deut, I Sam, I Kgs, Hab. The accumulated evidence would seem to support a district or area in the northeast section of the Sinai peninsula, southwest of Edom, and south of the wilderness of Zin near the Judean mountains.

Though a desert area, it was both habitable and inhabited. In the campaigns of "kings" (Gen 14:6) El-Paran designated the extent of the conquest of Chedor-laomer as far as Edom, perhaps a campaign to clear the caravan route to the Red Sea. For the designation "El-Paran," "God of Paran," cf. "El-Bethel" (Gen 35:7), "God of Bethel." When Ishmael was cast out with Hagar by Abraham, presumably from Beersheba, he dwelt in the wilderness of Paran (Gen 21:21).

Paran also functioned as a base for clandestine operations for it was from here that Moses dispatched spies to reconnoiter the land of Canaan (Num 10:12; 12:16; 13:3, 26). Numbers 13:26 specifically says that the spies returned to Kadesh (-Barnea) in the wilderness of Paran, though note that Num 33:36 places Kadesh in the wilderness of Zin (but cf. the LXX reading, "In the wilderness of Paran, that is Kadesh"). Cf. also Deut. 1:1.

After the death of Samuel, David went to the wilderness of Paran (I Sam 25:1) where he came into contact with Nabal, a man of "Maon" i.e. southern Judah from whom David was to extort protection money. This also put safe distance between David and Saul, especially after the death of David's friend and supporter Samuel. Hadad the Edomite escaped Joab's slaughter (in Solomon's time) by fleeing from Edom to Midian, through Paran and on to Egypt, suggesting that Paran was contiguous with Edom and Midian. Deuteronomy 33:2 connects Mount Paran with Mount Sinai and Hab 3:3, Mount Paran with Teman, a north district of Edom.

V.P.H.

פָּאָרוֹר (pā'rūr). See no. 1727b.

1729 פֶּגֶג (pagg). Assumed root of the following.
1729a פֶּגְגָּה (paggâ) *early fig* (Song 2:13).

פִּגְגֹּל (piggûl). See no. 1730a.

1730 פִּגְל (pgl). Assumed root of the following.
1730a פִּגְגֹּל (piggûl) *foul thing, refuse*.

1731 פִּגְעַת (pāga') *encounter, meet, reach, entreat, make intercession*.

Derivatives

1731a פָּגַע (*pega'*) *occurrence, chance* (I Kgs 5:18; Eccl 9:11).

1731b מִפְּגָעָה (*mipgā'*) *thing hit, mark* (Job 7:20).

The verb *pāga'* appears forty-four times in the OT with the above range of meanings. The two basic meanings of the Hiphil are (1) "to intercede" (Isa 53:12; 59:16; Jer 15:11; 36:25); and (2) "to lay, burden" (Isa 53:6, "the Lord has 'laid' upon him all our iniquity"). The sixth use of the Hiphil of this root is Job 36:32b and a translation is difficult. Cf. NIV "he commands it to strike its mark" and Pope's "he directs it (viz. the lightning) with 'sure aim'" (Job in AB, pp. 268, 276) with Tur-Sinai's "and he commands for him an 'accuser'" (*Commentary on Job*, pp. 506-7).

In the Qal stem the basic meaning is "to meet." With but few exceptions *pāga'* is followed by the preposition *b'* "to, upon" and this combination of verb and preposition conveys the idea of physical contact. The basic meaning of the verb is illustrated in the following verses: I Sam 10:5, "You shall 'meet' a company of prophets"; Ex 23:4, "If you 'meet'/'come on' your enemy's ox or donkey going astray." Cf. Gen 32:1 [H 2]; Ex 5:20; Num 35:19, 21; Amos 5:19.

There are, however, three special ways in which the verb is additionally used. One is to describe that a piece of land or a designated territory went from place X and "reached" to place Y (Josh 16:7; 17:10; 19:11, 22, 26, 27, 34), or that a man in his journeys "reached" a certain place (Gen 28:11, Jacob).

A second use of this verb is to serve a number of times simply as a synonym for "to kill," to meet another person for the sake of eliminating him. The usual translation in these contexts is "to fall upon." There are fifteen uses of *pāga'* in this context. In only one instance is God the subject who doles out punishment in the form of death (Ex 5:3). Every other time it is man, normally (but not always) acting outside of divine will, selfishly, capriciously. The verse in Ruth (2:22), "That they not 'meet' thee in any other field" (כִּנְיָ) means likely, "that they not 'molest' thee" rather than "kill."

The third way the verb is used is in the context of making intercession (1) to man (Ruth 1:16, "entreat me not," i.e. "don't press me to leave you," and Gen 23:8, "entreat for me to Ephron," i.e. "put pressure on, use your influence"); (2) to God (Jer 7:16, "don't make intercession to me"; also Jer 27:18; Job 21:15). We have already noted the four references to this verb in the Hiphil as "intercede" (to man: Jer 36:25 "to beg"; Jer 15:11; Isa 53:12; 59:16). An intercessor is one

who makes "contact" with God as opposed to the many who simply dabble in prayer.

V.P.H.

1732 פָּגַר (*pāgar*) *be exhausted, faint*. Occurs once, in the Piel (I Sam 30:10, 21).

1732a פָּגַר (*peger*) *corpse, monument, stela*.

peger. *Corpse, monument, stela*. The word *peger* appears twenty-two times in the OT.

peger refers to the corpse of men, never of animals (except Gen 15:11), and not just the body immediately after death, but the corpse in which decay and stench have started (Isa 34:3; cf. Jn 11:39). The idea of "dead/death" is contained in *peger*, though twice it is qualified by the word *mētīm* "dead" (II Kgs 19:35; Isa 37:36). In most instances the presence of death is the result of divine judgment, not death through natural causes: I Sam 17:46; Amos 8:3; Nah 3:3; Isa 14:19, *inter alia*.

Of interest is that in Ugaritic the root *pgr* means "monument, stela" (Gordon, UT 19: no. 2005). This has led some to believe that this is the correct translation in some instances of Hebrew *peger*. Leviticus 26:30 most likely does not refer to "corpses of your idols" but "the stelae of your idols." Ezekiel 43:7, 9 "carcasses of kings" should come out as "the (idolatrous) stelae of kings" and this is the sin for which Ezekiel rebukes the people, sacralizing the dedicatory stelae of earthly monarchs.

V.P.H.

1733 פָּגַשׁ (*pāgash*) *meet, encounter*.

The basic meaning of the verb is illustrated in the following passages: Gen 33:8, "What do you (Jacob) mean by all this company I (Esau) have met?" Also Gen 32:17 [H 18]; Ex 4:24, 27 (the first, an encounter fraught with danger and the second, an encounter fraught with happy consequences): I Sam 25:20; II Sam 2:13; Jer 41:6. Even in the Qal stem more than simply "meet" may be involved, as is obvious in Hos 13:8, "I will 'pounce' on them as a bear bereaved of her whelps."

In the Niphal the verb seems to mean "to co-exist" as in Prov 22:2, "the rich and poor are met together," or Prov 29:13, "the poor and deceitful man meet together." That is, the rich and poor are found side by side in every community. There is a polarity of wealth and poverty. In Ps 85:11 *pāgash* is parallel to *nāshaq* "kiss, embrace."

V.P.H.

1734 פָּדָה (*pādâ*)

1734 פָּדָה (*pādâ*) *ransom, rescue, deliver.*

Derivatives

1734a פְּדוּיִם (*p' dūyim*) *ransom* (Num 3:49).

1734b פְּדוּתָא (*p' dūt*) *ransom.*

1734c פְּדִיּוֹם (*pidyôm*) *ransom.*

1734d פְּדִיּוֹן (*pidyôn*) *ransom money.*

The basic meaning of the Hebrew root is to achieve the transfer of ownership from one to another through payment of a price or an equivalent substitute. The root occurs in Assyrian with the meaning "to spare," and in Ugaritic it is used in the sense "to ransom (UT 19: no. 2013)." The root with its derivatives occurs sixty-nine times in the OT.

The semantic development of *pādâ* is one of great significance to Christian theology. Originally, it had to do with the payment of a required sum for the transfer of ownership, a commercial term. Exodus and Lev 19:20 speak of the redemption of a slave girl for the purpose of marriage. It is also used to speak of the redemption of a man's life who is under the sentence of death, as in I Sam 14:45, when Jonathan was redeemed by the people of Israel.

The word was given special religious significance by the Exodus. When God delivered Israel from servitude to Egypt, he did so at the price of the slaughter of all the firstborn in Egypt, man and beast (Ex 4:23; 12:29). Consequently, the event was to be perpetually commemorated in Israel by the consecration of all the firstborn of man and beast to the Lord (Ex 13:12).

When the Israelites were numbered at Mount Sinai, it was ordained by divine direction that the Levites should be exempted from enrollment and separated unto the Lord in place of the firstborn of the people and their cattle in the place of the cattle of the people (Num 3:44ff.). The number of firstborn in excess of the number of the Levites were then redeemed at the price of five shekels apiece, and the money was given to Aaron and his sons. According to the legislation in Ex 13:11–16; 34:19–20 and Num 18:8–32, in later generations the firstborn of men and unclean animals were to be redeemed, but the firstborn of a cow, a sheep or a goat were unredeemable because they were holy to the Lord and were therefore to be sacrificed; but the firstborn of asses were to be redeemed with a lamb or be killed.

That which is holy to the Lord, i.e. the cow, sheep or goat, was not to be redeemed. Similarly, any thing or person "devoted" to the Lord (*hrm*), i.e. placed under ban and therefore unlawful for human appropriation, was "most holy" to the Lord, and was therefore unredeemable (Lev 27:28–29). (The word used here for redeem is

gā'al, which is sometimes used synonymously with *pādâ*.) The *herem* refers to the spoils of war, as in the battle of Jericho (cf. Josh 6–7 in the light of the law in Lev).

The theme of redemption was not to be related merely to the firstborn of Israel. Israel itself was the firstborn of God (Ex 4:22) and had been redeemed by Yahweh: "You shall remember that you were a slave in the land of Egypt and the Lord your God redeemed you . . ." (Deut 15:15; 24:18). Israel had been delivered, ransomed from servitude in Egypt by the hand of God. This fact was to color Hebrew thought through the centuries to come (cf. II Sam 7:23; Ps 78:42; 111:9; Mic 6:4). Isaiah even saw God's calling of Abraham from Ur as redemption (Isa 29:22; cf. I Pet 1:18). Likewise he saw the future deliverance of Zion as the result of that same redemptive activity (Isa 35:10; 51:11; cf. also Isa 50:2; Zech 10:8).

The concept of redemption continued to broaden. God, who had redeemed his people from Egypt, would also deliver them from other difficulties. David could affirm that God had redeemed him from all adversity (II Sam 4:9; I Kgs 1:29); therefore he could pray, "Redeem Israel, O God, out of all his trouble" (Ps 25:22).

The Psalms often speak of God's deliverance or redemption of life from some danger (Ps 26:11; 31:5; 34:22 [H 23]; 44:26 [H 27]; 71:23), or from the hand of human oppression (Ps 55:18 [H 19]; 69:18 [H 19]; cf. also Job 6:23). The greatest danger or adversary that man faces is Death, Sheol, the Pit. The Psalmist gives poignant expression to man's inadequacy in Ps 49:8–9, but concludes that God's redemptive power is not limited (v. 16). The resurrection is God's ultimate redemption of man.

Interestingly enough, only once is *pādâ* used with reference to redemption from sin (Ps 130:7–8). This remained for the completed revelation of the new covenant. Unfortunately, this emphasis has become so dominant in Christian redemptive theology, there is the tendency to overlook the fact that the NT as well as the OT sees redemption, or salvation, in terms of the total human situation. Even a cursory reading of Luke's Gospel will catch the reflection of the OT heritage in the concept of salvation.

The use of *pādâ* and its derivatives is sometimes paralleled by other roots. Particularly it should be noted that *gā'al* is used synonymously. Both roots have to do with redemption by the payment of ransom though it is suggested that *gā'al* basically is associated with family situations; hence, the idea of acting as kinsman. Nevertheless, the usage of both *pādâ* and *gā'al* in parallelisms in Hos 13:14 and Jer 31:11, and the synonymous usage in Lev 27:27 et al. illustrate the overlapping of the two words. Also, of the ninety-nine times the LXX uses the verb *lutroō*,

forty-five times it translates the root *gā'al* and forty-three times the root *pādā*.

The word *kōper* sometimes parallels *pādā* as in Ps 49:8 and Ex 21:30. The root *kāpar* means "to appease, to make an atonement," and the *koper* is the ransom paid to secure favor or reconciliation.

pādā occurs in parallelism with *nāsāl* (Jer 15:21) and *mālaṭ* (Job 6:23), both of which mean "to deliver." In fact, *pādā* is sometimes translated "deliver" (as in Ps 44:26 [H 17]; 55:18 [H 19]), because the idea of payment recedes into the background and the emphasis is upon release. While it may be said that the price of redemption in the Exodus is the firstborn of Egypt (Ex 12:13), there is no indication of ransom price in other contexts. In the NT, however, the Scriptures are clear: "You know that you were ransomed . . . with the precious blood of Christ, like that of a lamb without blemish or spot" (1 Pet 1:18–19).

p'dūt. Ransom, redemption. A feminine abstract noun. This form occurs only in Ex 8:19; Ps 111:9; 130:7 and Isa 50:2. The significance of this term in Ex 8:19 is difficult. Here translators render *p'dūt* either as "division" or "distinction," so also Septuagint and Vulgate, but it is not clear whether this is an interpretation or whether it depends on a different text. (Cf. A. A. Macintosh, "Exodus VIII 19, Distinctive Redemption and the Hebrew Roots פָּדָה and פָּדַר," VT 21 (1971), 548–555, for a discussion of the problem.)

p'düyim, pidyôm. Ransom. The former is a plural abstract form of the passive participle (which is used substantively in Num 3:49, Isa 35:10 and 51:11 with the meaning "the redeemed"), occurring only in Num 3:46, 48. The latter is found only in Num 3:49, 51.

pidyôn. Ransom money. Occurs only in Ex 21:30 and Ps 49:8 [H 9]. Both passages use a parallel word also, *koper*, which refers to money given (though sometimes it refers to a bribe, as in 1 Sam 12:3, Prov 6:35 and Amos 5:12).

פָּדִיִּים (p'düyim). See no. 1734a.

פָּדוּת (p'dūt). See no. 1734b.

פִּדְיוֹם (pidyôm). See no. 1734c.

פִּדְיוֹן (pidyôn). See no. 1734d.

1735 פָּדָן (paddān) *Padan*.

This noun occurs only in Genesis, and always is combined with *ārām* to form *paddan-ārām*, *Padan-aram* (except for Gen 48:7, *mippaddān* "from Padan"). Its location is obviously in northern Mesopotamia since it included, we know, the city of Haran (Gen 29:4). Some have suggested that *Padan-aram* is Haran, the meaning of *Padan-aram* being the "route/road" of Syria/Aram (on basis of Akkadian *padānu* "route"), synonymous with Haran (Akkadian, *harrānu*, also meaning "route/road"). The expression in Hos 12:13, *ś'dēh 'ārām*, takes *Padan* to mean "field" of Aram instead of "route" of Aram.

The Bible consistently refers to Laban, the uncle of Jacob and a resident of *Padan-aram*, as an Aramean (קִנְזִי, "Syrian"): Gen 25:20; 28:5; 31:20, 24. Laban is connected with *Padan-aram* not only geographically but also linguistically. That is, he is portrayed as speaking Aramaic, Gen 31:47: "And Laban called the place (in a covenant with Jacob) *Jegarsahadutha*" ("mound of testimony," the Aramaic equivalent to Jacob's Hebrew designation "Galeed").

There are eleven references to *Padan-aram* in Genesis. One of them, Gen 25:20, relates that it was at *Padan-aram* that the servant of Abraham found Rebekah and brought her back to Canaan as a wife for Isaac. This mission was performed at the personal request of Abraham (Gen 24:1ff.) in hopes that Isaac would not marry a local Canaanite woman (v. 3). In v. 4 Abraham refers to the area from which Rebekah was eventually fetched as "my own land and my own kinfolk."

Similarly Isaac follows the same plan with his son Jacob—Gen 28:2, and for the same reasons (Gen 27:46), but this time without the presence of an intermediary. The remaining nine references to *Padan-aram* refer to Jacob and his experiences.

Note that in the case of both Isaac and Jacob, the prohibition on marrying a Canaanite woman is to maintain the line through which God's covenant would be perpetuated. Also, in both cases neither Isaac nor Jacob are to be repatriated to Mesopotamia (Aram Naharaim), for the covenant is vitally connected with the promised land.

V.P.H.

1736 פָּדַע (pāda') *deliver*. Occurs only in Job 33:34. Meaning uncertain.

1737 פֶּדֶר (*peder*)

1737 פֶּדֶר (*peder*) *fat* (of the burnt offering, Lev 1:8, 12; 8:20). Derivation uncertain.

1738 פֶּה (*peh*) *mouth*.

This word appears almost 500 times in the OT, most frequently in Ps (sixty-six times) and Prov (fifty-six times). Some preliminary observations on the various uses of *peh* may first be noticed. (1) Primarily as an organ of speech (a) for God, (ca. 50 times) only in Ps 18:8 [H 9] (=II Sam 22:9), and perhaps in Job 37:2, is God's mouth something other than an organ of speech. (b) for man; (c) for animals (Num 22:28). (2) Less frequently, an organ for eating and drinking (Ezk 3:3, *inter alia*). (3) Mouth as "opening/outlet/aperture/entrance" for example, of a well (Gen 29:2); a sack (Gen 42:27); a cave (Josh 10:18); a city (Prov 8:3); "edge" of a sword (Gen 34:26). (4) In phrases such as *peh 'ehād* "with one accord" (Josh 9:2); *peh 'el peh* "mouth to mouth" (Num 12:8); *peh lāpeh* "from one end to another" (II Kgs 10:21); (5) *peh* with prefixed prepositions: "according to (*k'pi*) his service" (Num 7:5); "according to (*l'pi*) the multitude of years" (Lev 25:16); (6) *peh* in fractional units: *peh sh"nayim* (Deut 21:17; II Kgs 2:9; Zech 13:8). This particular phrase has been translated two ways—"a double portion" or "two-thirds," which is more correct. Hence, Elisha asks not for a "double portion" of Elijah's power and gift but for two-thirds.

We can now look at how *peh* is applied to God, then to man. Approximately fifty times the OT speaks of God's mouth. The God of the OT is a God who speaks. His voice has not been muted. Interestingly, in all but two passages it is in God's capacity as the LORD that he speaks. Lamentations 3:38 uses the phrase *mippī 'elyōn* "out of the mouth of the most High." II Chr 35:22 informs us that the saintly king Josiah met his death because he refused to listen to the words of the Pharaoh "from the mouth of God" (*mippī 'ēlōhim*).

Most prominent is the phrase *'al pī yhwh*, "according to the mouth (=commandment) of the LORD." It occurs twenty-four times, eighteen in Num plus Ex 17:1; Lev 24:12; Deut 34:5; Josh 19:50; 22:9; II Kgs 24:3. Note the heavy concentration of this phrase in the Pentateuch. When God speaks he speaks with authority and finality. God's speech is also prophetic speech as is illustrated in references from the prophets (Isa 1:20; 40:5; 62:2; Jer 9:11; etc.). Thus, the prophet's word is not his own concoction. He becomes God's mouth (cf. Jer 15:19). In God's mouth there is also a creative word: Ps 33:6 and Deut 8:3 (live on what comes from the mouth of God).

In Ps and the wisdom literature the uses of *peh* refer predominantly to man's mouth, not God's.

The mouth is the external manifestation of one's character and disposition.

The mouth is the organ through which one's relationship to God is ascertained. Obvious here is the oft repeated theme of praise to God in one's mouth (Ps 8:2–3 [H 3–4]; 34:1 [H 2]), or a prayer that God may guard the believer's mouth (Ps 142:3).

V.P.H.

1739 פֹּה (*pōh*) *here, hither*.

Forty-three times *pōh* is simply an adverb meaning "here," translated in the LXX primarily as *hōde*, but also *entautha* or *autou*. "Here" as an adverb means "present/in this place" as in "Is there not 'here' a prophet of the Lord?" (I Kgs 22:7; II Chr 18:6). "Why sit we 'here' until we die... if we sit still 'here' we will die" (II Kgs 7:3–4).

In Ezk 40–41 the word *mippōh* or *mippō* is used not as an adverb but as a correlative in the phrase *mippōh... mippōh*, literally, "from here... from here" or "on this side... on that side." The LXX translation of such a phrase is *enthen kai enthen* "on this side and on that."

V.P.H.

1740 פֹּג (*pūg*) *grow numb*.

Derivatives

1740a פֹּגַת (*pūgat*) *benumbing, cessation* (Lam 2:18).

1740b הִפְּגָה (*hāpūgā*) *benumbing* (Lam 3:49).

פֹּגַת (*pūgat*). See no. 1740a.

פֹּג (*pūd*). See no. 1765.

1741 פֹּחַ (*pūah*) *breathe, blow*.

Derivative

1741a פִּיחַ (*pīah*) *soot* (Ex 9:8, 10).

The verb appears fifteen times in the OT, of which seven are in Prov: 6:19; 12:17; 14:5, 25; 19:5, 9; 29:8. The problem of tracing the occurrences of this root in the OT is complicated by the fact that in Hebrew there are two roots, *pūah* and the by-form *yāpah*, both meaning "to breathe, puff" and in many instances the consonantal skeleton of verbal forms of these two verbs will

be indistinguishable. (Gordon, *UT* 19: no. 1129 lists Ugaritic *yph* but no *pwh*.)

Primarily the verb means "to breathe/blow" in the negative sense of "to utter" lies, be utterly deceitful. Thus the object of *pûah* in Prov 6:19; 14:5, 25; 19:5, 9 is *k'zābīm* "lies." Similarly, Prov 29:8 speaks of scornful men who "stir up" (*pûah*) a city to strife. (There is some question in these Prov passages whether the form *yāpiāh*, a verb should be pointed as a noun, *yēpiāh*. Thus Prov 14:5 is not "a false witness will utter lies" but "a perjurer is a false witness.") In most of these verses *pûah* is translated in the LXX by *egkleō* "to accuse." Only in Prov 12:17 is *pûah* used of uttering "truth."

Twice the verb occurs in the Psalter: 10:5, "God's rivals, he puffs/sneers at them all," (though Dahood, *Psalms* I, in AB, p. 60 translates, "He (the unbeliever) 'sniffs' at them all (i.e., God's decrees).") He shows contempt and scorn for God's laws.). Also, in Ps 12:5 [H 6] is the phrase, "I will set him in safety from him that 'puffeth' at him" (κιν). Better is the RSV translation, "I will give my help to him that 'longs' for it."

pûah in reference to nature refers to the "blowing" of the day, i.e. the first appearance of the morning (Song 2:17; 4:6; also 4:16).

V.P.H.

1742 פָּזַח (*pûk*) *antimony*, *stibium* (e.g. Jer 4:30; II Kgs 9:30).

1743 פֶּזֶל (*pól*) *beans* (II Sam 17:28; Ezra 4:9).

1744 פֶּזֶן (*pûn*). *Meaning* *dubious*. Occurs only in Ps 88:16.

1745 פָּזַח (*pûṣ*) *I, be dispersed, scatter*.

Derivatives

1745a מְפִיֵּשׁ (*mēpiṣ*) *scatterer*, *dispenser* (Nah 2:2; Prov 25:18).

1745b תְּפִזָּה (*t'pôṣâ*) *dispersion* (Jer 25:34).

The verb appears sixty-four times in the OT, twelve times in the Qal, fifteen times in the Nip-

hal, thirty-seven times in the Hiphil. *pûṣ* is used most often in the prophets, thirty-seven times, (eighteen times in Ezk and ten times in Jer).

The word is first used in Scripture to describe the "scattering" of the families of the Canaanites in Gen 10:18. On the heels of this is the famous Tower of Babel incident (Gen 11) in which the builders of the tower(?) did not want to be "scattered abroad" upon the face of the earth (Gen 11:4). The Lord, however, made such a scattering inevitable (vv. 8–9) by destroying their language. This made further communication among the peoples impossible, and thus brought to a halt their building project. It should be observed in this passage that no mention is made of God confusing the languages. Rather, what was destroyed was the universal language (11:1), an international *lingua franca*. The individual dialects (Gen 10:5, 20, 31) remained intact.

There is no substantial change in the meaning of the verb as it is used in one of the above mentioned three stems. The only perceptible difference is that in the Qal and Niphal *pûṣ* is intransitive and in the Hiphil it is transitive.

There are three repeated categories which most often serve as the subject or object of *pûṣ*. (1) It may refer to the scattering of armies, either that of the enemy (Num 10:35; Ps 68:1 [H 2]) or one's own (I Sam 11:11; 14:34; II Kgs 25:5=Jer 52:8). (2) The subject/object of *pûṣ* may refer to sheep, (a) as subject, in Jer 10:21; Ezk 34:5–6, 12; Zech 13:7; (b) as object, in Jer 23:1. Sheep may get lost inadvertently. They may, quite literally, nibble their way to lostness. But that is not the nuance inferred by the verb under consideration. Sheep scatter, if possible, impulsively when there is some external threat to their safety and security. It is the shepherd's duty at that time to take command of the situation and repulse the threat. Ezekiel 34:5 mentions the hapless sheep who were scattered because of the absence of a shepherd. (3) Most frequently, the object of *pûṣ* is Israel, who sometimes is likened to scattered sheep (I Kgs 22:17=II Chr 18:16). In a few passages not only Israel, but Israel's enemy, Egypt, is scattered abroad (by God): Ezk 29:12–13; 30:23, 26.

There are two things of interest when the Bible speaks of God's "scattering" Israel. One, the phrase, "I/He/the LORD scatters Israel" is confined to the prophetic books of the Bible (and here, either in the past, Ezk 20:23; 28:25, or as a threat, Ezk 22:15 for example). The only exceptions to this are: Deut 4:27; 28:64; 30:3; Neh 1:8. Two, when in this phrase God is the subject and Israel is the object, the verb is always in the Hiphil stem. It is not the Assyrians or Babylonians who scatter the people of God. They are simply instrumental. God himself is the scatterer.

1746 פוץ (pûṣ)

dictionnaire hébraïque, ZAW 62:199–207, esp. p. 202 (on *pûṣ* in Prov 5:16).

V.P.H.

1746 פוץ (*pûṣ*) *II, flow, overflow* (Prov 5:16; Zech 1:17).

1747 פוק (*pûq*) *I, reel, totter* (e.g. Isa 28:7; Amos 2:13).

Derivatives

1747a פוקה (*pûqâ*) *tottering, staggering* (I Sam 25:31).

1747b פיק (*pîq*), פק (*pîq*) *tottering* (Nah 2:11).

1748 פוק* (*pûq*) *II, bring out, furnish, promote*. Occurs only in the Hiphil (e.g. Isa 58:10; Prov 3:13).

1749 פור (*pûr*) *lot*.

The word occurs only in the book of Esther, 3:7; 9:24; 9:26 (two times), 28, 29, 31, 32. Hebrew *pûr* is to be distinguished from *gôrâl*, the usual word for "lot." In Est 3:7 and 9:24 the two words appear beside each other.

It appears obvious that *pûr* is related to Babylonian *pûru* which means "lot" and secondarily "fate." Of special interest is that in Est 9:26, 28, 29, 31, 32 the Hebrew "Purim" is translated in the LXX by *phrovrai*, from a verb meaning "to watch, guard." One suggestion has been to see in *phrovrai* the aramaized form of Babylonian *purruru* "to destroy, exterminate." (Lewy).

From Est 9:20–28 we learn that Purim was a feast instituted by Mordecai to celebrate the deliverance of Jews from Haman's plot to kill them. The observance of Purim was determined after lots were cast by Haman in order to determine the month in which the slaughter was to take place. Esther 3:7 says that Haman, having already decided on the pogrom, consulted the lots only to learn the most propitious day on which to extirpate the race of Mordecai. The LXX adds to the MT these words, "And the lot fell on the fourteenth of the month called Adar" (March/April); that is, the decree was to be enforced almost a full year after its original promulgation. One asks, why did Haman send the edict out almost twelve months in advance of the proposed day of slaughter? Is it reading in too much to see in this unusual arrangement the sovereign hand of God once again protecting his children, even though they are in exile?

V.P.H.

1750 פור (*pwr*) *Assumed root of the following.*

1750a פורה (*pûrâ*) *winepress* (Isa 63:3; Hag 2:16).

1750b פורר (*pârûr*) *pot* (Num 11:8; Jud 6:19).

1751 פוש (*pûsh*) *I, spring about* (e.g. Hab 1:8; Mal 3:20).

1752 פוש* (*pûsh*) *II, be scattered*. Occurs only once, in the Niphal (Nah 3:18).

1753 פזז* (*pâzaz*) *I, be refined*. Occurs twice, only in the Hophal (I Kgs 10:18; II Chr 9:17).

Derivative

1753a פז (*paz*) *refined, pure gold* (e.g. Lam 4:2; Isa 13:12).

1754 פזז (*pâzaz*) *II, be supple, agile* (Gen 49:24; II Sam 6:16).

1755 פזר (*pâzar*) *scatter* (e.g. Jer 50:17; Joel 4:2).

פח (*pah*). See nos. 1759a,b.

1756 פחד (*pâhad*) *fear, tremble, revere* (RSV sometimes "be in dread," "be in terror").

Derivatives

1756a פחד (*pahad*) *I, dread*.

1756b פחדה (*pahdâ*) *fear, religious awe*.

1756c פחד (*pahad*) *II, thigh* (Job 40:17).

pâhad serves as a strong verb of fearing with emphasis either on the immediacy of the object of fear or upon the resulting trembling. The verb may refer to the kind of fear aroused by a *pahad* "terror" (see below). Most of its occurrences are in poetic passages so that it could be considered a strong, poetic synonym for *yārâ* (q.v.).

pâhad refers to a strong emotion of fear, such as the fear of the princes at hearing Jeremiah's scroll read (Jer 36:16; lit. "feared to each other") and the fear of sinners before God's judgment (Isa 33:14). It is appropriately used in contexts which refer to such ideas as quaking and trembling (e.g. Isa 19:16; 33:14; Jer 33:9). (The categories used for this discussion roughly parallel those used for the verb *yārâ*).

However, in some contexts, the particular significance of *pâhad* seems less in mind than the

desire to use an appropriate synonym in a poetic context. This verb occurs only rarely in prose.

While the verses cited above show *pāḥad* used to refer to the emotion of fear, there are no clear examples in which the immediacy of feeling is lost sight of for this verb. Thus, unlike *yārā'*, it is not used to refer to the abstract, intellectual apprehension of evil.

It may refer to awe or reverence; Ps 119:161 speaks of David's standing in awe at God's word (cf. also Prov 28:14). The "fear" of Hos 3:5 is probably this kind of reverence. Unlike *yārā'*, it is not used to refer to pious living or formal religious worship.

pāḥad twice occurs in the Piel (Isa 51:13; Prov 28:14). In both cases the Piel probably has iterative meaning, particularly in light of the iterative adverbs in these two contexts ("continually" and "always" respectively). Proverbs 28:14 is another case of this verb with the meaning of "revere."

The Hiphil is once used (Job 4:14) with causative meaning; i.e. "cause to fear" (RSV "made . . . shake").

pahad I. Dread, fear, terror, etc. (RSV sometimes "panic"). May refer either to a strong emotion of fear or terror or to the external person or thing arousing terror.

Clear instances of the substantive, *pahad*, referring to the emotion of terror are the terror in the hearts of the Jews' enemies in Deut 2:25 (RSV "dread") and the "dread" of Job 4:14.

A larger number of passages use the term to refer to an external terror or object of fear. The Psalmist was a "terror" (RSV "object of dread") to those who knew him (Ps 31:11 [H 12]). In other contexts poetic parallels indicate that the *pahad* is an external danger comparable to the pit and the snare (e.g. Isa 24:17-18; Jer 48:43). In Isa 2:10, the "terror" of the Lord is something external from which one can hide; here, "terror" may refer to the terrifying aspect of God's revealed glory. On the surface, the weapons of Solomon's bodyguard were better utilized against some external night-terror (Song 3:8; RSV "alarms by night," כַּיָּו "fear") than against an emotion. Psalm 91:5 probably refers to a similar, if not identical nightterror. The "sudden panic" (RSV) of Prov 3:25 may be better taken as referring to an external terror. Similarly, in Ps 53:5 (H 6; cf. also Ps 14:5) the phrase, "are in great terror" may mean "fear the [external] terror." God, as an external object of terror, is in view in the phrase "Fear of Isaac" cf. E. A. Speiser, *Genesis*, in AB "The Awesome One of Isaac" (Gen 31:42, 53). [W. F. Albright (FSAC 2nd Ed. p. 248) follows the suggestion of Alt and translates this phrase "kinsman of Isaac" similarly to the "Champion 'abir of Jacob" (Gen 49:24). This

translation derives from the alleged meaning of "thigh", "loins" for *pahad*. Cf. *pahad* II. But see Bibliog. R.L.H.]

At times careful exegetical judgment may be needed to decide whether a given passage refers to internal emotion or to an external object of terror; some passages could refer to either (e.g. Deut 28:67). A large group of such passages are those referring to the terror of some personage. Examples are the terror of the Hebrews which fell upon Egypt (Ps 105:38), the terror of the Jews upon the Persian subject peoples (Est 8:17), and passages referring to the terror of God (1 Sam 11:7). Such passages are easiest taken as expressing the emotion aroused towards the personage; and there is no firm objection to this interpretation. However, in light of the examples above, one must consider the possibility that such passages refer to the personage as an external object of terror (in such a case, the genitive relationship would express the genitive of apposition).

The immediacy of the object of terror and the strength of the emotion are clearly seen in such passages as Deut 28:67, Ps 119:120, and 1 Sam 11:7.

pahdā Fear. Feminine of *pahad*. Used once referring to fear of God as an inner attitude lacking in the Jews' hearts (Jer 2:19).

pahad II. Thigh (כֶּן "stone"). Occurs once in the physical description of "Behemoth" (Job 40:17). Its meaning is unclear, but cognate evidence indicates that "thigh" is the most likely meaning.

A.B.

1757 פֶּהָדָה (*pehā*) **governor** (e.g. Neh 5:14; Mal 1:8). Probably a loan word from Akkadian.

1758 פָּהָז (*pāhaz*) **be wanton, reckless** (Jud 9:4; Zeph 3:4).

Derivatives

1758a פָּהָז (*pāhaz*) **wantonness, recklessness** (Gen 49:4).

1758b פָּהָזוּת (*pāhāzūt*) **recklessness, extravagance** (Jer 23:32).

פָּהָזוּת (*pāhāzūt*). See no. 1758b.

1759 *פָּהָה (*pāḥaḥ*) **ensnare**. Denominative verb, occurring once, in the Hiphil (Isa 42:22).

1760 פֶּחַם (*phm*)

Parent Noun

1759a פֶּחַ (*pah*) I, *bird trap* (e.g. Hos 5:1; Amos 3:5). Often used figuratively for calamities and plots.

1759b פֶּחַ (*pah*) II, *plate of metal* (Num 17:3; Ex 39:3).

1760 פֶּחַם (*phm*). Assumed root of the following.

1760a פֶּחָם (*pehām*) *coal, ember* (e.g. Prov 26:21; Isa 44:12).

1761 פָּחַת (*pht*). Assumed root of the following.

1761a פָּחַת (*pahat*) *pit* (e.g. Jer 48:43; Isa 24:17). Never used for the pit of the grave as is *shahat* and *bôr*.

1761b פָּחַת (*p^hhetet*) a *boring or eating out* (of leprous decay in garment, Lev 13:55).

פָּחַת (*p^hhetet*). See no. 1761b.

1762 פִּטְרָה (*pit^edā*) *topaz* (e.g. Ezk 28:13; Ex 28:17). A loan word; from Sanskrit (?).

1763 פִּטְיֵשׁ (*pat^tish*) *forge hammer* (Isa 41:7; Jer 23:21). Possibly a loan word.

1764 פָּטַר (*pātar*) *set free, remove, open, escape*.

Derivatives

1764a פִּטְרָה (*peter*) *firstborn*.

1764b פִּטְרָה (*pit^rā*) *firstborn* (only in Num 8:16).

This verb is used nine times in the OT. All instances are in the Qal stem except for one use in the Hiphil, Ps 22:7 [H 8]; cf. Mat 27:39). "They 'gape' (open/separate the lip) at me, they shake their head."

There are four discernible uses of *pātar* in the Qal. (1) "To escape from." "David escaped from Saul's presence" (I Sam 19:10). (2) "To set free, let out." "The beginning of strife is as when one lets out water," (Prov 17:14), comparing the commencement of disagreement to the seepage of water. (3) "To set free/exempt from duty" I Chronicles 9:33; II Chr 23:8, "For Jehoiada the priest had 'exempted' none of the (priestly) orders." (4) In I Kgs 6:18, 29, 32, 35 it is said regarding the interior furnishings of the walls of Solomon's temple that they were of "knops and 'open' flowers" (*p^htûrê šiššim*) of cedar." Literally the Hebrew phrase reads, "open parts of flowers," i.e., calyxes.

peter. *Firstborn.* Occurs in Ex: 13:2, 12, 13, 15; 34:19, 20. *peter* refers to both the firstborn of children and animals. The more usual word in Hebrew for "first(born)" is *b^ekôr*, which is the firstborn of the males. Regarding the institution

of primogeniture in the OT, there are two distinct conceptions. First, there is a socio-legal one which assigns special status to the first male of the paternal line (*b^ekôr*). Second, there is a cultic conception which assigns special responsibilities to the first male issue of the maternal line (*peter*). This one is dedicated to God. If it is a sacrificial animal it must be sacrificed. Otherwise, the firstborn must be redeemed (Ex 34:19).

V.P.H.

1765 פִּיר (*pyd*), פֹּדַר (*pwd*). Assumed root of the following.

1765a פִּיר (*pid*) *ruin, disaster* (e.g. Job 12:5; Prov 24:22).

פִּיחַ (*piah*). See no. 1741a.

1766 פִּיִּם (*pym*). Assumed root of the following.

1766a פִּימָה (*pimā*) *super abundance* (Job 15:27).

1766b פִּיִּם (*pim*) (or *payim*) a weight of two-thirds of a shekel.

The KJV erroneously translates "file." Most recent versions use either two-thirds of a shekel or *pim*.

The word occurs only in I Sam 13:21 where it was formerly connected with *peh* (BDB called the text corrupt). Now the word has been found inscribed on several weights of two-third shekel size. Speiser (see bibliography) suggested that the word is a dual and arose from a false Hebraizing of the Akkadian *shanipu* (a Sumerian loan word for two-thirds of a shekel), reading it as two *pu*'s therefore in Hebrew a dual of *peh*—*payim*. (the ordinary plural of *peh* "mouth" has a feminine ending).

This identification of *pim* or *payim* helps beautifully to elucidate I Sam 13:19–22. The verse is not corrupt. It tells of the beginning of the iron age in Palestine. Iron was known before then (about 1200 B.C.) but it was wrought iron and not as strong as steel which is made by heating the iron then quenching it in water. Apparently, the Philistines brought with them the secret of tempering and therefore were able to make long steel swords which were much better than the short bronze daggers the Israelites had used. I Samuel 13:19 really says the Israelites had no ironsmiths. The Philistines effectively kept their military secret for some time and the Hebrews had to pay them to get their agricultural implements repointed after use in the rocky soil of Palestine. The price for sharpening a plow point was a *payim*, two-thirds of a shekel. It is of some interest that David lived for a while as a Philistine subject in Philistine territory. The military secret could not be kept after that.

R.L.H.

פִּיק (piq). See no. 1747b.

פָּק (pak). See no. 1767a.

1767 פָּכַר (pkk). Assumed root of the following.

1767a פָּךְ (pak) *vial, flask*.

1767b *פָּכָה (pākā) *trickle*. Occurs in the Piel only (Ezk 47:2). Perhaps denominative from pak.

1768 *פָּלָא' (pālā') *be marvellous, wonderful*. This denominative verb does not occur in the Qal.

Parent Noun

1768a פֶּלֶא' (pele') *wonder*.

1768b פִּלְי' (pil'i) *wonderful, incomprehensible*.

1768c מִפְּלָא' (mipplā'ā) *wondrous work* (Job 37:16).

The basic meaning of the verb is “to be wonderful” and in the Hiphil “to cause a wonderful thing to happen.” In the Piel, however, it means “to fulfil (a vow),” Lev 22:21; Num 15:3, 8, though this nuance is also present in two instances of *pālā'* in the Hiphil (Lev 27:2; Num 6:2).

Preponderantly both the verb and substantive refer to the acts of God, designating either cosmic wonders or historical achievements on behalf of Israel. That is, in the Bible the root *pl'* refers to things that are unusual, beyond human capabilities. As such, it awakens astonishment (*pl'*) in man. Thus, the “real importance of the miraculous for faith (is) —not in its material factuality, but in its evidential character . . . it is not, generally speaking, the especially abnormal character of the event which makes it a miracle; what strikes men forcibly is a clear impression of God’s care or retribution within it” (Eichrodt). We may add that it is essential that the miracle is so abnormal as to be unexplainable except as showing God’s care or retribution.

pālā' is applied to man around fifteen times. In such cases the thrust of *pālā'* is “to be beyond one’s capabilities,” and hence, unsolvable or inaccessible, and such are God’s mighty and wonderful acts. To illustrate. (1) Deut 17:8, “If a case comes before you which is ‘too difficult’ for you” (in the LXX, *adunatein*). The same Greek verb is used in the translation of Gen 18:14, “Is there anything ‘too hard’ for the LORD?” Two verses in Jeremiah—32:17, 27—are almost identical to this rhetorical question but the LXX uses instead the

verb *kruptein*. Zechariah 8:6, “If this seem a ‘miracle’ in the eyes of the remnant.” (2) Prov 30:18, “There are three things which are ‘too wonderful’ (LXX *adunatos*) for me.” (3) Deuteronomy 30:11, “This commandment is not ‘hidden’—κρυπ—from you (LXX *huperogkos*).” That is, it is accessible, and hence knowable. The same Greek word translates *pl'* in II Sam 13:2 and Lam 1:9. (4) The root may also be used negatively to mean “unbelievable.” The reference in Dan 8:24 and 11:36 to the diabolical apocalyptic figure who hatches “incredible schemes” or speaks “incredible blasphemies” illustrates this. We have seen, then, that when *pl'* refers to man it means unsolvable, suprarational, incredible.

Our clue for *pl'* applied to God will be found in the Psalter. There appears to be no significant difference here between *pele'* and *niplā'ōt*, both referring to God’s wonders, either in a general sense, or in a specific historical antecedent. As might be expected, the root appears mostly in Ps that are classified as hymns or prayers of thanksgiving but also the historical Pss 78, 105, 106. Often, in such psalms the key verb is “hōdā” (“praise”): 9:1 (H 2); 75:1 (H 2), etc., though *niplā'ōt* is the direct object of *hōdā* only in Ps 107:8, 15, 21, 31.

Equally important are the verbs in the imperative in the Psalter exhorting the people to recite orally the wonders God has done. This forms the heartbeat of Israel’s liturgical celebrations. The most frequent verb here is *sāpar*, “tell”: Ps 9:2; 26:7; 75:2; 96:3, etc.; but also *śiaḥ*, “talk of”: Ps 105:2 (= I Chr 16:9); 119:27; 145:5; *nāgad*, “declare”: Ps 40:5 [H 6]; 71:17; *dabar*, “speak”: Ps 40:5 [H 6]. There is to be a public sharing of what God has done and not just a private musing.

It is of interest to note that the function of God’s wonders is ultimately to make mercy available to the recipient or reciter, and not just to make a demonstration of power. Thus, in Ps 107:8, 15, 21, 31 *niplā'ōt* is parallel with *hesed* “loving kindness, mercy.” God performs “marvels of love,” Ps 31:21 (H 22), *hipli ḥasdō*.

pele'. Wonder. Always in a context of God’s acts or words, except for Lam 1:9. The root appears most frequently in the Psalms, of eighty-four instances of *pālā'/'pele'*, thirty-seven of them are in the Psalter.

Bibliography: Eichrodt, W., *Theology of the Old Testament*, II, Westminster, 1967, pp. 162–67. TDNT, III, pp. 27–42. THAT, II, pp. 413–19.

V.P.H.

פִּלְי' (pil'i). See no. 1768b.

1769 *פָּלַג (pālag) *split, divide*. Occurs in the Niphal and Piel only.

1770 פִּלְגֵּשׁ (*pilegesh*)

Derivatives

- 1769a פֶּלֶג (peleg) *channel, canal*.
 1769b פִּלְגָּה (*p'laggā*) *stream; division*.
 1769c פִּלְגָּה (*p'läggā*) *division* (II Chr 35:5, only).
 1769d מִפְּלָגָה (*miplaggā*) *division* (II Chr 35:12, only).

1770 פִּלְגֵּשׁ (*pilegesh*), פִּילְגֵּשׁ (*pilegesh*) *concubine*.

pilegesh. Concubine. The Hebrew equivalent of Greek *pallakis* and Latin *pellex*. A concubine was a true wife, though of secondary rank. This is indicated, for example, by the references to a concubine's "husband" (Jud 19:3), the "father-in-law" (Jud 19:4), "son-in-law" (Jud 19:5). Thus, the concubine was not a kept mistress, and did not cohabit with a man unless married to him. The institution itself is an offshoot of polygamy.

A number of men in the OT had concubines, either one, or many (as sign of wealth and status symbols). Note that many of those who have concubines are kings (and cf. Est 2:14; Song 6:8; Dan 5:3, 23).

There are two famous concubines mentioned in the OT. They are (1) Rizpah, the concubine of Saul, whose moving display of maternal love so moved David that he had her children buried in the family sepulcher (II Sam 3:7 and 21:8–14); (2) the concubine of an unnamed Levite of Gibeah whose rape and murder brought about the death of 25,000 members of the tribe of Benjamin, and the ban against members of the other tribes intermarrying with them (Jud 19–20; one-third of the uses of *pilegesh* in the OT are in these two chapters).

To lie with a king's concubine was tantamount to usurpation of the throne. This explains why Abner soon fell out with the house of Saul because he sought in marriage Rizpah, Saul's concubine (II Sam 3:7). Marrying a king's widow could easily suggest designs on the throne (cf. II Sam 16:21–22 and similarly the idea in I Kgs 2:21–24).

Bibliography: Morgenstern, J., "Additional Notes on 'Beena Marriage (Matriarchat) in Ancient Israel,'" ZAW 49:46–58, esp. pp. 56–58. Patai, R., *Sex and Family in the Bible*, Doubleday, 1959, pp. 39–43. Plautz, Werner, "Monogamie und Polygynie im Alten Testament," ZAW 75:3–27.

1771 פֶּלֶדָה (*p'lādā*) *iron, steel* (Nah 2:4). Derivation uncertain.

1772 *פָּלָה (*pālā*) *be distinct, marked out*.

Derivative

- 1772a פֶּלְנִי (*p'loni*) *a certain one*. Always used with 'almōnī (Ruth 4:1; I Sam 21:3; II Kgs 6:8).

According to BDB, p. 811, this root occurs seven times, four times in Ex, three times in Ps. It is used in the Niphal twice (Ex 33:16; Ps 139:14), and in the Hiphil five times. KB, p. 761, on the other hand, treat only the Ex passages (8:22 [H 18]; 9:4; 11:7; 33:16) under the root *pālā*. If this is the case, *pālā* occurs once in the Niphal (Ex 33:16, "to be marked out, separated"), and three times in the Hiphil (8:22 [H 18]; 9:4; 11:7, "to set apart, discriminate").

In the fourth plague on Egypt of flies (8:22 [H 8]), the Lord "sets apart" the land of Goshen from the plague which infests the Egyptian houses. In the fifth plague, the death of the Egyptians' livestock, the Lord "discriminates" between the cattle of Israel and Egypt (9:4). When Moses announces the death of the firstborn, Ex 11:1ff., he says again that the Lord will "discriminate" between Egypt and Israel (11:7).

The three passages in question in the Psalter are 4:3 (H 4); 17:7; 139:14. To illustrate, Ps 4:3 [H] reads, "the Lord 'works wonders' (Hiphil) for those he loves." The MT for "works wonders" reads *hiplā*, from *pālā*, but many manuscripts read *hiplā*, from *pālā*, akin to the form *hipli* in Ps 31:21 [H 22], and *haplēh* in Ps 17:7.

For Ps 17:7 and 139:14 cf. the juggling efforts of Dahood in AB, *Psalms*, I, p. 96; III, p. 293.

V.P.H.

1773 פָּלַח (*pālah*) *cleave* (e.g. Ps 141:7; Job 16:13).

Derivative

- 1773a פֶּלַח (*pelah*) *cleavage, millstone* (e.g. Job 9:53; Song 4:3).

1774 פָּלַט (*pālat*) *escape, save, deliver*.

Derivatives

- 1774a פָּלַט (*pallēt*) *deliverance* (Ps 32:7; 56:8, only).
 1774b פָּלִיט (*pālīt*) *fugitive*.
 1774c פָּלִיט (*pālīt*) *fugitive*.
 1774d פָּלִיטָה (*p'lētā*) *escape*.
 1774e מִפְּלָט (*miplāt*) *escape* (Ps 55:9).

The verb *pālat* appears twenty-seven times in the OT, of which nineteen are in the Psalter. The verb always occurs in the Piel, except for its usages in Isa 5:29, Hiphil, and Ezk 7:16 (Qal). Dahood has suggested repointing the Piel in Job 23:7 to a Qal, and reading, "I would forever escape his condemnation."

As we indicated above, the verb *pālat* is con-

fined primarily to the Ps. The only places *pālaṭ* occurs in the Piel outside of the Ps (or parallel passages to Psalm verses) are: Mic 6:14, "You shall store away (food) but never 'preserve'"; Job 21:10, "His cow 'calves' (i.e. escapes from the womb) with no loss"; Job 23:7 (in KJV), "so should I be 'delivered' forever from my judge."

It can be observed then that the verb *pālaṭ* in the sense of "rescue, deliver" is limited to poetry in the OT. In the Psalter the verb is always on the lips of the Psalmist addressed to God either in the form of a testimony of praise for deliverance or, *pālaṭ* is in the form of an imperative, seeking God's deliverance. In 43:1 and 71:2 we find illustrations of *pālaṭ* in the imperfect, but with imperative function. Only in Ps 91:14 is God the subject of the verb, "I will deliver him."

A frequent parallel of *pālaṭ* is 'āzar "to help, assist" as in Ps 37:40; 40:17 [H 18]; 70:5 [H 6]. Cf. the Ugaritic passage, *aqht yplḥk bn dnll wy'ḏrk*, "And (call) Aqhat and let him save you, Daniel's son, and let him rescue you," 3 Aqht; rev 13–14.

pālīt. *Fugitive, escapee.* Nineteen times in the OT. In form, a Qal passive participle of *pālaṭ*. Always *pālīt* refers to someone who has escaped from a calamity, a survivor in battle or war. A few times *pālīt* refers to a single survivor or fugitive as in the case of the one who brought to Abraham the news of the capture of his nephew Lot (Gen 14:13, and cf. similarly the references to the survivor who announces that Jerusalem has been taken by the Babylonians, Ezk 24:26, 27; 33:21, 22).

More often *pālīt* is used collectively to refer to the remnant of Jews who escaped either death or deportation at the hands of an enemy. By way of extension, Lam 2:22 indicates that none shall "escape" on the day of the Lord.

p'lēṭā. *Escape, survival.* Twenty-eight times in the OT. Once again, the primary use of this noun is to refer to the remnant of God's people (II Kgs 19:30, 31 = Isa 37:31, 22, etc.) But those who have escaped do not owe their survival to simply fortuitous circumstances or luck. Their survival is only of God's mercy. As a matter of fact, *p'lēṭā* means not only "escape" but also "deliverance," as in II Chr 12:7. "In a little while I will grant them deliverance." Cf. also the statement of Joseph (Gen 45:7): "God sent me before you to make sure that your race would have 'survivors' in the land." The goodness of God in preserving a remnant, rather than liquidating the race, is especially emphasized in Ezra 9:8, 13–15.

פָּלִילְיָה (*p'liḥiyā*). See no. 1776e.

1775 פָּלַךְ (*plk*). Assumed root of the following.

1775a פָּלַךְ (*pelek*) *whirl of spindle, stick, district* (e.g. II Sam 3:29; Neh 3:9, 12, etc.).

1776 פָּלַל (*pālāl*) *intervene, interpose, pray.*

Derivatives

1776a תַּפְלָה (*t'pillā*) *prayer.*

1776b פָּלִילִי (*pālil*) *assessment, estimate.*

1776c פָּלִילָה (*p'liḥā*) *office of judge or umpire* (Isa 16:3, only).

1776d פָּלִילִי (*p'liḥi*) *assessable, criminal.*

1776e פָּלִילְיָה (*p'liḥiyā*) *reasoning.*

The verb is found eighty-four times in the OT, usually in the Hithpael (except Gen 48:11; I Sam 2:25; Ps 106:30; Ezk 16:52). The usual translation for the root in the Hithpael is "to pray." The semantic development behind this will be discussed below.

There is a rich nomenclature for "praying" in the OT. There are at least a dozen Hebrew words for pray and prayer. But easily the most common word for "prayer" is *t'pillā* and the related verb, *pālāl*. A number of suggestions have been made for the etymology of *pālāl*. Wellhausen in the 19th century connected it with the Arabic *falla*, "to notch the edge of a sword" and thus *pālāl*, it was thought, meant "to cut or wound oneself," and reflected the pagan custom of slashing oneself in a frenzy during worship, a practice forbidden by the law (Deut 14:1).

A second suggestion also relates Hebrew *pālāl* to Arabic *falla* but sees the connection between the two in the common meaning "to break, cut" with the subsequent development: to cut > to divide > to compare > to distinguish > to pass a judgment (Ap-Thomas).

A third suggestion is that Hebrew *pālāl* and *nāpal* are developments of the same bilateral stem meaning "to fall," emphasizing prayer and prostration.

A fourth suggestion is to see in *pālāl* the meaning "to estimate, assess" on the basis of the reflexes of the derivatives. The Piel (the 4 uses noted at the beginning of this article) then means "to count on, figure" (Gen 48:11) or "cause (re)assessment" (Ezk 16:52 "you have caused reassessment in favor of your sisters." That is, Jerusalem is so corrupt she has made Sodom and Samaria look angelic!) (Speiser).

What then is the relationship between the Piel and the Hithpael of this root and what is the sig-

nificance of the 80 of 84 usages of this verb in the Hithpael, meaning "to pray"? First, it should be observed that several verbs in Hebrew for prayer are found preponderantly in the Hithpael stem. For example, I Kgs 8:33, "and they shall pray (*w^e hitpall^e ū*) and make supplication (*w^e hitḥan-n^e nū*)."¹ Ezra 10:1, "Now when Ezra had prayed (*ūk^e hitpallēl*) and confessed (*ūk^e hitwadōtō*), weeping, and casting himself down (*ūmitnap-pēl*)..." Isa 44:17, "and he worships (*w^e yish-tahū*) and prays (*w^e yitpallēl*)."

The traditional explanation is that the Hithpael is connected with *p^e lilm* "judges" and hence, *hitpallēl* means to "invoke God as judge." A second explanation, taking *pālal* as "to break," is that the Hithpael, a reflexive, means here, "to break oneself," that is, "to be contrite, pray," (Goldman). A third suggestion is to move from the Piel *pillēl* "to decide, settle an affair," to *hitpallēl* "to act as mediator," (Ap-Thomas). A fourth suggestion is to move from the Piel *pillēl* "to estimate, make assessment" to *hitpallēl* "to seek assessment, consideration, to pray," on the basis that one of the syntactical functions in the Hebrew Hithpael is to seek what the simple stem designates (Speiser). An interesting case where the Piel and Hithpael of *pālal* are juxtaposed is I Sam 2:25, "If one man sin against another, God can 'intervene' (*ūpil^e lō 'ēlōhim*) but if a man sins against the Lord who can 'intercede' for him (*yitpallēl-lō*)?" GB divides the root into two verbs, **pālal* I judge (mostly Piel) and **pālal* II pray (Hithpael).

Most often both the verb and the noun refer to intercessory prayer. This is best illustrated in Solomon's prayer for the people at the dedication of the temple (I Kgs 8 and its parallel II Chr 6) where the root occurs 30 times in these chapters alone. The first reference there, I Kgs 8:28, reads, "listen to the prayer (*r^e pillat*) of your servant and to his entreaty (*r^e ḥinnātō*)... listen to the cry (*rinnā*) and the prayer (*r^e pillā*) your servant makes to you today (*mitpallēl*)."

t^epillā. *Prayer.* Found seventy-six times in the OT, most often in Ps (thirty-two times). Indeed five Psalms are specifically called "prayers" in their superscription (Ps 17, 86, 90, 102, 142).

pālil. *Assessment, estimate.* It is found three times (Deut 32:31; Ex 21:22; Job 31:11) all in the masculine plural. In each of these cases the translation by the KJV/RSV, "judges," seems unlikely. To illustrate, the relevant section of Deut 32:31 reads in the RSV, "even our enemies themselves being 'judges'." More likely it should read something like, "even in our enemies' estimation." Or Ex 21:22, "He shall pay as the 'judges' determine," a passage dealing with the liability of one who caused a miscarriage by brawling. It is preferable to read, "He shall pay according to the

husband's 'assessment'" (LXX, *meta axiōmatos* "according to estimate").

p^elili. *Assessable, criminal* (?), found only in Job 31:28, KJV, "this also were an iniquity to be punished by the 'judge'." Perhaps it means, "this was an 'assessable' offence," or "criminal iniquity."

p^elilyyā. *Reasoning, judgment,* only in Isa 28:7, "they stumble in (making) 'judgment'."

V.P.H.

פָּלִי (p^e lōnī). See no. 1772a.

פָּלְמוֹנִי (palmōnī). A form of no. 1772a.

- 1777 *פָּלַס (pālas) *weigh, make level.* Denominative verb occurring in the Piel only (e.g. Prov 4:26; Isa 26:7).

Parent Noun

1777a פָּלֶס (peles) *balance, scale* (Prov 16:11; Isa 40:11).

1777b מִפְּלָשׁ (mip̄lāš) *swaying, poisoning* (Job 37:16). derivation uncertain.

- 1778 *פָּלַשׁ (pālaš) *shudder.* Occurs only once, in the Hithpael (Job 9:6).

Derivatives

1778a פָּלָשׁוּת (pallāšūt) *shuddering* (Job 21:6; Isa 21:4).

1778b מִפְּלֶשֶׁת (mip̄lešet) *horrid thing* (I Kgs 15:13; II Chr 15:16).

1778c תִּפְלֶשֶׁת (tip̄lešet) *shuddering, horror* (Jer 49:16).

פָּלָשׁוּת (pallāšūt). See no. 1778a.

- 1779 *פָּלַשׁ (pālāsh) *act of mourning.* Occurs only in the Hithpael (e.g. Mic 1:10; Ezk 27:30).

- 1780 פֶּן (pen) *lest, not.*

In biblical Hebrew, *pen* is a conjunction that negatives dependent clauses, "neither shall you touch it 'lest' you die" (Gen 3:3). In every occurrence, except two, it is followed by the imperfect form of the verb. The two exceptions are: (1) II Sam 20:6, "pursue after him 'lest' he get

(*māšā'*) fenced cities and escape (*w' hizzil*) us"; (2) II Kgs 2:16, "'lest' the spirit of Yahweh has taken him up (*n' šā'ō*) and cast him on some mountain." The conjunction *pen* always stands at the beginning of the clause, followed by the verb and then the object. The one departure from this is Prov 5:6, '*ōrah hayyim pen t' pallēs* "lest you should ponder the path of life."

The primary function of *pen* at the beginning of a clause is to express precaution. For example, many of the instances of *pen* in Prov follow the negative particle '*al*' and the jussive form of the verb: "reprove not ('*al tōkah*) a scorner, 'lest' (*pen*) he hate you" (Prov 9:10); also, 20:13; 22:25; 26:4-5; 30:6, 10. For *pen* following a positive imperative, see Prov 25:16-17.

On the other hand, in Deuteronomy, *pen* often follows the phrase *hishshāmer l' kā* (Niphal inv. of *shāmar*) or a variant of that. Deut 4:9 "take heed to yourself (*hishshāmer l' kā*)... 'lest' (*pen*) you forget." Cf. also Deut 4:16, 19; 6:12; 8:11; 11:16; 12:13, 19, 30; 15:9; also, Gen 24:6 and 31:24.

Dahood has argued that occasionally *pen* is the equivalent of the negative adverb "not" and is merely a stylistic substitute for the normal negative adverb '*al*' followed by the jussive.

V.P.H.

1781 פָּנָג (*pannag*). *Meaning dubious*. Apparently some kind of food (Ezk 27:17).

1782 פָּנָה (*pānā*) *turn*.

Derivatives

- 1782a פָּנִים (*pānim*) *face*.
- 1782b לִפְנֵי (*lipnē*) *before*.
- 1782c פְּנִימָה (*p' nimā*) *toward the inside*.
- 1782d פְּנִימִי (*p' nīmī*) *inner*.

The frequency with which *pānā*, and even more its derivatives, occurs in the OT is attested by KB p. 76, who notes that the root appears twenty-one-hundred times in the OT.

The basic meaning of the verb, which appears most frequently in the Qal stem, is "to turn," but here it may assume a number of nuances. For example *pānā* may mean "to turn towards" a direction (Deut 2:3); a person (Jer 50:16); a thing (Ex 16:10). It may mean "to turn back" (Josh 8:20); "to turn from" (Gen 18:22); "to turn around" (Ex 2:12); "to look for, expect" (Hag 1:9); "to pay attention to, consider" (Job 6:28).

pānim. *Face.* This particular word always occurs in the plural, perhaps indicative of the fact that the face is a combination of a number of features. As we shall see below, the face iden-

tifies the person and reflects the attitude and sentiments of the person. As such, *pānim* can be a substitute for the self or the feelings of the self.

In the Bible the "face" (along with the other parts of the body) is described not merely as an exterior instrument in one's physiology, but rather as being engaged in some form of behavioral pattern, and is thus characterized by some personal quality. It is only natural that the face was considered to be extraordinarily revealing vis-a-vis a man's emotions, moods, and dispositions.

A "hard" face is indicative of defiance (Jer 5:3), impudence (Prov 7:13), ruthlessness (Deut 28:50). A "shining" face is evidence of joy (Job 29:24). A "shamed" face points to defeat, frustration, humiliation (II Sam 19:5). A "flaming" face is one convulsed by terror (Isa 13:8). An "evil" face is a face marked by distress and anxiety (Gen 40:7). A "fallen" face stems from very strong anger or displeasure (Gen 4:5). To make a person's face "sweet" is to conciliate him or seek his favor (of God: I Kgs 13:6; II Kgs 13:4). The KJV translates freely this last phrase "X sought/entreated the Lord." But the Hebrew runs literally "X made sweet the Lord's face." Similarly, this idiom is used of man (Prov 19:6).

The phrase "to hide one's face" means to show aversion or disgust (Isa 53:3) and "to turn away the face" is to reject (Ps 132:10). Conversely, "to raise the face" of another is to show favor, respect, acceptance (I Sam 25:35), or show partiality and favoritism (Lev 19:15).

Most of these idioms and phrases are also applied to God. God's face "shines" (Ps 4:6 [H 7]) as a sign of favor and good will. His face may "fall" in anger (Jer 3:12). God may "hide" his face (Ps 13:1 [H 2]).

Five times one encounters the phrase "to see God's face" probably in the technical sense of visiting the sanctuary for cultic worship: Ex 23:15; 34:20 (KJV, "none shall appear before me"); Deut 31:11; Ps 42:2 (H 3); Isa 1:12. In each of these instances the verb *rā'a* "to see," is pointed as a Niphal, and is translated then "to appear," the idea of "appearing before" softening the concept of seeing God's face. In one case (I Sam 1:22) the Niphal is indicated by the consonantal text. The thought of *lērā'ōt pānāy*, Niphal infinitive construct, "to appear before God" is acceptable, even mandatory, but the possibility of *lir'ōt pānāy*, Qal infinitive construct, is inconceivable, according to Ex 33:20. There are some exceptions to this, for example, Jacob (Gen 32:30 [H 31]) and Moses (Ex 33:11). They saw God "face to face" *pānim el pānim*.

A man must perish if he looks on or even hears God (Ex 19:21). For this reason Moses (Ex 3:6), Elijah (I Kgs 19:13), and even the seraphim (Isa 6:2) cover their faces in God's presence. The man

who remains alive after seeing God is overwhelmed with astonishment and gratitude (Gen 32:30; Deut 5:24); with awe (Jud 6:22–23; 13:22; Isa 6:5). In the New Testament God is manifested in Jesus who alone has seen the Father (Jn 1:18; 6:46; I Jn 4:12). Christ is not only the Word through whom God is heard. He is the image through whom God is seen.

lipné. A preposition, *in the presence of, before*. This is the most frequent usage of *p'nê* (plural construct) with a prefixed preposition. Literally, the phrase means "at/to the face of." We are dealing then with a case of a substantive which has become a preposition by virtue of its union with a prefix. In the meaning "before" the following object is most frequently a person, God or man, 'before' in the sense of 'in full view of, under the eye of, at the disposal of, in the estimation of' (BDB, pp. 186–187).

p'nimi. *Inner*, always used of parts of buildings, usually the temple (esp. Ezk 40–46).

פָּנָה (pinnā). See no. 1783a.

פָּנִים (pānim). See no. 1782a.

פָּנִימָה (p'nimā). See no. 1782c.

פָּנִימִי (p'nimi). See no. 1782d.

פָּנִינִים (p'ninim). See no. 1783b.

1783 פָּנָה (pnn). Assumed root of the following.

1783a פָּנָה (pinnā) *corner*.

1783b פָּנִינִים (p'ninim) *corals* (e.g. Job 28:18; Lam 4:7).

pinnā. *Corner* is one of the two words translated "corner" in the OT, the other being *pē'ā* (q.v.). *pē'ā* includes the idea of "side" or "extremity"; *pinnā* is more specifically "corner." *pinnā* may refer to the corner of a house (Job 1:19); an altar (Ex 27:2; 38:2); a city wall (Neh 3:24, 31); a street (Prov 7:8, 12); a roof (Prov 21:9; 25:24); a tower in the tract of a wall (II Kgs 14:13; Jer 31:38; figuratively, "chieftains" (Jud 20:2; I Sam 14:38).

Most interesting is the use of *pinnā* as cornerstone of the world (in Job 38:6). In two passages the cornerstone is figurative, and has a Messianic significance. These are: (1) Isa 28:16 (Rom 9:33); (2) Ps 118:22 (and cf. the quotation of this in Mt 21:42; Mk 12:10; Lk 20:17; Acts 4:11; I Pet 2:7).

The question is whether the cornerstone of Scripture is a foundation stone or a stone which crowns the building. Isaiah 28:16 seems to refer to the former and Ps 118:22 (*rō'sh pinnā*) to the latter. By extension, in the NT, Christ is both the foundation on which the church is built, and he is also the coping stone or keystone which crowns the church.

1784 *פָּנָה (pānaq) *indulge, pamper*. Occurs only once, in the Piel (Prov 29:21).

פָּס (pas). See no. 1789a.

1785 *פָּסַח (pāsaq) *pass between*. Is used once, in Ps 48:14 (Piel).

פִּסָּה (pissā). See no. 1789b.

1786 פָּסַח (pāsaḥ) *I, pass or spring over*.

Derivative

1786a פֶּסַח (pesaḥ) *Passover*.

pesaḥ. *Passover*. There are three areas, which one must investigate, to put together the data in the Bible on Passover. These are: (1) the historical setting for Passover, Ex 12; (2) references to texts that spell out the procedures in the observance of Passover, Num 28:16–25; Lev 23:5–8; Deut 16:1–8; (3) historical texts that narrate the celebration of a particular Passover, Num 9:1–14; Josh 5:10–12 (at Gilgal); II Chr 30:1–27 (celebrated by Hezekiah, but interestingly no parallel to this in Kgs); II Kgs 23:21–23; II Chr 35:1–19 (celebrated by Josiah, and note the amplification in the Chronicles account); Ezr 6:19–22.

The name "Passover" is derived from *pāsaḥ* which some think means "to pass (over)" (BDB, p. 820). There are four instances of this. (1) Ex 12:13, "When I see the blood I will 'pass' (*ūpāsaḥ*) over you." (2) Ex 12:23, "The LORD will 'pass' through (*ābar*) . . . and the LORD will 'pass' (*ūpāsaḥ*) over the door." (3) Ex 12:27, "It is the sacrifice of the LORD's passover who 'passed' (*pāsaḥ*) over the houses of the children of Israel." (4) Isa 31:5, "The LORD of hosts will protect Jerusalem (*gānan*) he will protect (*gānan*) and deliver (*nāṣal*) it. He will pass over (*pāsaḥ*) and deliver (*mālat*) it."

In addition to this etymology for *pesah* (i.e. the merciful passing over of a destructive power), several others have been suggested. (1) It is to be linked with the root *pāsaḥ* II, "to limp, hobble," and thus Passover describes a special cultic dance. (2) Some have connected *pesah* with the Akkadian verb *pašāhu*, "to appease, assuage" (a deity) in ritual. (3) The interpretation of others suggests that *pāsaḥ* in the above four passages means not "to pass over" *per se* but rather "to defend, protect." The LORD will protectively cover the houses of the Israelites and will not suffer the destroyer to enter (Ex 12:23b, and cf. I Cor 10:10; Heb 11:28). It is the destroyer who seeks to enter the houses and the LORD rebuffs him, standing guard by the houses of his people. The blood is a sign to the LORD. "When I see the blood (cf. Gen 9:16, "when I see the rainbow") I will 'protect' you" (not the negative idea, "I will pass over/omit you" (Glasson, Weiss). (4) A final suggestion is to relate *pesah* to an Egyptian word meaning "stroke, blow" and thus the Passover is the blow of the tenth plague in which the Lord struck the firstborn of Egypt. The traditional etymology and (3) seem the most plausible.

According to Ex 12, the Passover was to be celebrated at the full moon in the first month of the year (Abib = March/April). On the tenth day of the month every family chose a one-year-old lamb, a male, and one without blemish. This lamb was killed at the twilight on the 14th, and its blood was sprinkled over the two doorposts and the lintel of the house where it was eaten. On the following day, the 15th, the feast of unleavened bread began. Note that it is a domestic ceremony originally without reference to any central sanctuary or priestly involvement. Interestingly, it was very advantageous for the Israelites to leave Egypt on the night of a full moon.

The critical theory regarding the relationship between Passover and Unleavened Bread is as follows. Originally, both were separate feasts, Passover a nomadic shepherd's rite, and Unleavened Bread a Canaanite agricultural feast. Subsequently the two were historicized (by being connected with the Exodus) and coalesced, or reestablished (Kraus), in the time of Josiah as a consequence of the centralization of worship. This, of course, is speculation. Hezekiah celebrated a great Passover (II Chr 30, where it is also called the Feast of Unleavened Bread). Solomon celebrated the three annual feasts (Unleavened Bread, Weeks, and Tabernacles, II Chr 8:13). The silence of the books of Samuel and Kings is not a valid argument against the early date of the Passover. None of the prophets except Ezekiel (only Ezk 45:21) mention either the Passover or the Feast of Unleavened Bread. Even Jeremiah passes over Josiah's great celebration in silence, a silence that proves nothing.

Jesus celebrated this feast (Mt 26:2, 18). Christ is the 'Passover' for the Christian (I Cor 5:7 and also Jn 1:20, I Pt 1:19).

V.P.H.

1787 פָּסַח (*pāsaḥ*) II, *limp*.

Derivative

1787a פִּסְעָה (*pisēah*) *lame*.

It is debated whether or not there are two distinct verbs in biblical Hebrew with the consonants *psh*. BDB, p. 820, suggests there are and discusses *pāsaḥ* I, "to pass over" and *pāsaḥ* II, "to limp." KB, p. 769, does not differentiate between roots I and II, remarking that the etymology of *pesah* "Passover" is not clear.

There are only three uses of *pāsaḥ* II in the OT. (1) II Sam 4:4, "and he (Mephibosheth) fell and 'became limp/lame'." (2) I Kgs 18:21, "how long 'halt' ye (קִיּוּ) between two opinions?" Another suggested translation is, "how long will you 'hobble' on two crutches?" (i.e., Yahweh and Baal). (3) I Kgs 18:26, "and they (the priests of Baal) 'leaped' upon/'hobbled' upon the altar," presumably a reference to some kind of pagan ritual dance.

 1792d מִפְּעַל (*mip'alā*) *deed* (Ps 46:9; 66:5).

The verb appears fifty-six times in the OT. Most often it is found in the Psalms, twenty-six times, (eighteen times in the expression *pō'alē 'āwen*, "workers of iniquity"). *pā'al* is found only in the Qal stem and in poetic texts. Its use in the OT, only fifty-six times, is of interest when one observes that the verb *āsā* "to do, make," occurs over twenty-six hundred times (BDB, p. 793).

When *pā'al* describes man's actions or deeds, like the substantive *pō'al*, it refers to his moral acts, either positive (Ps 15:2; Zeph 2:3), but more often negative: Prov 30:20—wickedness; Job 34:32—iniquity; Isa 44:15—idolatry.

In connection with this we may note the significance of the phrase *pō'alē 'āwen* "workers of iniquity." In addition to the eighteen instances in the Psalter the phrase appears in: Isa 31:2; Hos 6:8; Job 31:3; 34:8, 22; Prov 10:29; 21:15. In spite of the suggestion made famous by Mowinckel in *Psalmenstudien* that the word *'āwen* is a magical power and the *pō'alē 'āwen* were sorcerers who by their potent spells brought about the affliction of the righteous, we may be safe in assuming that the "workers of iniquity" are foreign enemies who harass and gloat over their defeats of Israel and her king.

pō'al. *Work, deed.* Sixteen times the reference is to God's work and twenty-one times to man's work. When applied to God, *pō'al* refers primarily to God's acts in history, not his acts in creation. When applied to man *pō'al* often has a moral nuance, positively, Prov 21:8; negatively, Prov 21:6, for example.

p'ullā. *Work, recompense, reward,* fourteen times in the OT. It may refer to normal labor (Jer 31:16); most often recompense in the sense of wages (Isa 40:10); a reward (Prov 11:18); reward (of sin) (Isa 65:7; Ps 109:20), all paid by God. *p'ullā* is used with *sākar/sākār* "to hire/wages" in Lev 19:13; II Chr 15:7; Isa 40:10; 62:11; Jer 31:16; Prov 11:18.

1793 פָּעַם (*pā'am*) *thrust, impel*.

Derivatives

- 1793a פֿאַם (*pa'am*) *foot, step*.
 1793b פֿאַמֿון (*pa'amōn*) *bell, on robe of high priest*.

pa'am. *Foot, step, anvil, time.* This noun occurs one hundred-seventeen times in the OT, usually meaning "time, occurrence." When *pa'am* means "foot" it may refer to: (1) the foot of man (Ps 58:10 [H 11]); (2) (foot)step(s) (Ps 17:5; 85:13 [H 14]); (3) supports or a pedestal for a building (Ex 25:12). The meaning "anvil" is found once, in Isa 41:7.

There are numerous expressions for "time" in which *pa'am* is one of the elements. For example, "This is 'at last' (*happa'am*) bone of my bones" (Gen 2:23). "And I will speak 'but this once'" (*'ak-happa'am*) (Gen 18:32). "'Now this time' (*'attā happa'am*) will my husband be joined to me" (Gen 29:34). "'Many times' (*p'āmim rabbōt*) he delivered them" (Ps 106:43).

Hebrew *pa'am* is a blend of Ugaritic *p'm* "time" and *p'n* (Phoenician *p'm*) "foot" (Gordon, UT 19: nos. 1998, 2076).

1802f פָּקֻדוֹן (*piqqādōn*) *deposit*.

1802g מִפְקָד (*mipqād*) *number*.

pāqad occurs primarily in the Qal, Niphal, and Hiphil stems. It also occurs a few times in the Piel, Pual, Hophal, Hihtpael, and Hothpael stems. The basic meaning is to exercise oversight over a subordinate, either in the form of inspecting or of taking action to cause a considerable change in the circumstances of the subordinate, either for the better or for the worse.

It has been said of this verb, which occurs more than three hundred times in the OT: "There is probably no other Hebrew verb that has caused translators as much trouble as *pqd*" (Speiser, BASOR 149:21). KB wrongly asserts that *pqd* originates from the idea of missing. The only basis for such a statement is a similar word in Arabic, which, as far as most of our available texts are concerned, represents a late development in Semitic languages. The verb occurs in Akkadian, usually with the meaning of appointing a governor or other official.

Speiser considers the root meaning to be "attend to with care" or "take note." It is impossible to prove whether this is the actual origin, but the fact that at least half of the occurrences involve positive action by a superior in relation to his subordinates strongly suggests that such action is a vital part of the meaning of the word, an idea that is supported by the fact that the LXX most frequently translates it by *episkeptō* or a similar word.

The word is translated "to number" 110 times in the KJV, but the fact that the LXX renders it by *arithmein* in only eight of these occurrences, and usually uses *episkeptein* or a related word

suggests that in this usage its real meaning is to muster troops or to ascertain the available manpower. It usually concerns soldiers, Levites or priests. There are a number of other Hebrew words that express the simple idea of counting or numbering.

[It may be noted that the so-called census in Num 1 concerns only the adult men "able to go forth to war" (v. 20). It was more than a census: it was an organizing of the troops for battle "by their armies" (v. 3). It was the mustering of the troops in preparation for Moses' invasion of Canaan from Kadesh Barnea. The similar numbering of Num 26 is not a duplicate account or from a separate source. It was another mustering of the troops, this time for Joshua's invasion from the east.

It is probable that David's "census" of II Sam 24 was also not just a head count to satisfy a monarch's pride, but was again a preparation for some ill-conceived military adventure. Notice that Joab, the commander of the army, was charged with the mustering and that he had strong objections to it. R.L.H.]

When translated "visit," as fifty-seven times in the KJV (RSV the same in many of these occurrences), this word almost always has the sense, now largely obsolete, of "making a visitation" and points to action that produces a great change in the position of a subordinate either for good or for ill. Speiser suggests a close parallel to the phrase "to raise the head," used in Gen 40:13, 19 for Pharaoh's treatment both of the butler and of the baker, one to be restored to his position in the court and the other to be hanged. The word *pāqad* is similarly used in what might seem to be two opposite senses in Jer 23:2. There are many instances where "visit" means to inflict injury or harm and RSV translates many of these as "punish." However, in a considerable number of cases it is clear that the "visitation" produces a beneficial result, e.g. Gen 50:24-25, Ruth 1:6, I Sam 2:21; Ps 8:4 [H 5]; Jer 15:15; 29:10. In Isa 24:21 the evil forces that God imprisons for a season are "visited" by him after many days. Scholars divide about equally as to whether "visit" here means punish or release, with Delitzsch and Calvin leaning toward the latter interpretation.

There is only one occurrence where the present usage of "visit" (make a call) would seem appropriate (I Sam 15:2). In view of all the circumstances here, and of the many occurrences with quite a different idea, one may reasonably suggest that this passage is not an exception to the general usage.

Such translations as "miss," "lack," "want," and their passives (altogether about sixteen occurrences) seen at first sight to suggest quite a different idea, but on examination prove to come

under the general meaning of the verb. Thus references in I Sam 20:6, 18, 25, 27 to David's seat being empty or to David being missed involve the idea of Saul's oversight over his subordinate. The references to cattle or sheep not being missed in I Sam 25:7, 15, 21 relate to David's protection of Nabal's flock. A similar reference to God's oversight of his people and finding none missing is contained in Jer 23:4. In Num 31:49 and II Sam 2:30 reference is made to oversight of the survivors of a battle with a check on the number that had been lost. In II Kgs 10:19 there is a demand by the king that the priests of Baal be watched over so that all will be assembled and none found to be absent. In Jud 21:3 there is a reference to God's care of his people and the importance that no tribe be lacking.

The Hiphil is often used for a king's appointment of officers; also for committing Jeremiah to prison (Jer 37:21) and for committing one's spirit into the hand of God (Ps 31:5 [H 6]).

p'qūddā. *Visitation, office, officer, account, charge, custody, ordering, oversight* (RSV similar, but usually substitutes "punishment" for "visitation," except in Job 10:12 where it substitutes "care"). This noun corresponds closely to the verb *pāqad* and has just about the same range of meanings. Its commonest use is to express the primary idea of that verb—intervention by a superior power (usually God or a king) in order to make a great change in the situation of a subordinate. In most of the occurrences of *p'qūddā* of this type the change is for the worse, but Job 10:12 shows that this noun, like the verb, can also have the idea of a change for the better. While the noun, like the verb, may simply involve oversight, it more generally represents an active intervention to help or injure the one visited.

p'qūdim. *Sum* (RSV the same), is used in the pl. to mean "appointments" or "allocation." It occurs only in Ex 38:21, where it indicates the amount designated for the tabernacle.

pāqid. *Officer, overseer* (RSV similar, adds "leader"). This word designates a subordinate who has been placed in a position where he has the oversight of others, whether assigned for a special duty (Gen 41:34; Est 2:3) or in a permanent position in charge of soldiers, priests, Levites, or singers.

piqqūdim. *Precepts, statutes, commandments* (used only in pl.) (RSV "precepts" in all twenty-four occurrences), used only in Ps (all but three of its occurrences are in Ps 119), is a general term for the responsibilities that God places on his people.

mipqād. *Number* (gate of commandment, appointed place; RSV "numbering," "appoint-

ment," "Muster" Gate, "appointed place"). Although this word occurs only five times, it covers a wide range of meanings, all related to the general idea of *pāqad*.

1803 פקח (pāqah) *open (the eyes).*

Derivatives

1803a פקח (piqēah) *seeing* (Ex 4:11; 23:8).

1803b פתח-פקח (p'qah-qōah) *opening (of eyes)* (Isa 61:1).

The verb *pāqah* occurs twenty-one times in the OT. Most often in II Kgs (4:35; 6:17; 6:20; 19:16) and Isa (35:5; 37:17; 42:7, 20; 61:1). Eighteen times *pāqah* is in the Qal; three in the Niphal (Gen 3:5, "your eyes shall be opened"; 3:7; Isa 35:5).

pāqah refers to the opening of the eyes with two exceptions (Isa 42:20, the opening of the ears; Isa 61:1, the opening of a prison to those who are bound [cf. Lk 4:18–19]).

The eyes may be God's (Job 14:3; Dan 9:18; Zech 12:4; II Kgs 19:16=Isa 37:17; Jer 32:19) or, as in the other passages, man's. The references to God's eyes, an anthropomorphism, may suggest the idea that God is attentive and aware, as opposed to passive and uninvolved (II Kgs 19:16=Isa 37:17, "Lord, open thy eyes, and see

(*rā'â*) the words of Sennacherib"). Or, it may suggest not only awareness, but more, loving compassion (Zech 12:4, "but on the house of Judah (as opposed to God's enemies) I will open my eyes.")).

When *pāqah* refers to the opening of man's eyes, more often than not God is the subject of the verb: Gen 21:19; the six passages in II Kgs referred to above; Isa 35:5 (and cf. Mt 11:5; Lk 7:22); 42:7; Ps 146:8. Only in II Kgs 4:35 does *pāqah* seem to refer to the opening of the eyes in a physical miracle (the son of the Shunemite woman). One is reminded of Jesus' healing of the man with congenital blindness (Jn 9) and especially Jn 9:39, "It is for judgment that I have come into the world so that they which see not might see, and that they which see might be made blind."

V.P.H.

פָּקִיד (*pāqid*). See no. 1802c.

1804 פָּקַע (*pq'*). Assumed root of the following.

1804a פָּקְעִים (*p'qā'im*) carved wood or metal ornaments, either ball or knob-shaped (I Kgs 6:18; 7:24).

1804b פָּקְעַת (*paqqū'ōt*) gourds (II Kgs 4:39).

פָּקְעִים (*p'qā'im*). See no. 1804a.

פָּקְעַת (*paqqū'ōt*). See no. 1804b.

פָּר (*par*). See no. 1831a.

1805 פָּרָא (*pr'*). Assumed root of the following.

1805a פָּרָא (*pere'*) wild ass (e.g. Hos 8:9; Jer 2:24).

1806 פָּרַד (*pārad*) I, divide, separate.

Derivative

1806a פָּרְדָּה (*p'rūdā*) grain of seed (Joel 1:17).

The verb *pārad* appears twenty-six times in the OT in a number of stems: Qal (only Ezk 1:11), Niphal, Piel (only Hos 4:14), Pual only (Est 3:8), Niphal, and Hithpael.

In the sense of "to separate," *pārad* may refer: (1) to the separation of a river into tributaries (Gen 2:10); (2) the separation of the wings of a bird (Ezk 1:11; cf. Job 41:17 [H 9]); (3) the separation of friends on an amiable basis (Gen 13:9, 11, 14; Ruth 1:17; II Sam 1:23; (4) the dispersal of peoples (Gen 10:5, 32; 25:23; Deut 32:8).

The verb has an interesting nuance in Prov, where it occurs five times. Here it may mean to drive a wedge between solid friendships. Thus, Prov 16:28 refers to the man who destroys other people's friendships by creating discord. *pārad* is used in Prov 18:1 to describe the unsociable man.

He is the abominable no-man. Proverbs 18:18 says that the lot "separates" powerful parties locked in a legal contest.

Bibliography: Wieder, A., "Ugaritic-Hebrew Lexicographical Notes," JBL 84:160-64, esp. pp. 163-64.

1807 פָּרַד (*prd*) II. Assumed root of the following.

1807a פָּרֵד (*pered*) mule.

1807b פִּרְדָּה (*pirdā*) she-mule (I Kgs 1:33, 38, 44).

pered. Mule (LXX, *hēmionos* "the separated animal"). The mule is the offspring of a mare and a male ass (the offspring of a stallion and she-ass is called a hinny). Because Lev 19:19 forbids the crossbreeding of animals we must assume that mules were imported into Israel. The mule was ridden (II Sam 13:29; 18:9; Isa 66:20) and served as a beast of burden (II Kgs 5:17).

From the time of David mules function as transportation for members of the royal family (II Sam 13:29; 18:9; I Kgs 1:38, *pirdā*, 18:5). They were received by kings as gifts (I Kgs 10:25; II Chr 9:24). Until recently the word *pered* was unique to biblical Hebrew. It has now appeared in the Ugaritic phrase (2102:12) *rt l ql d yhl prd* "a garment for the courier who is borne by a mule."

Bibliography: Dahood, M., "Hebrew-Ugaritic Lexicography VIII," Bib 51:391-404, esp. p. 400.

V.P.H.

1808 פָּרְדֵּס (*pardēs*) park, enclosed garden.

The word from which comes (through the Greek) the word "paradise." This is a loan word into Hebrew as well as into Greek from the Zend Avestan. It is never in the Hebrew OT applied to the Garden of Eden, although the LXX uses it to translate "garden" (*gan*) in Gen 2:8. Used only three times (Neh 2:8; Song 4:13 and Eccl 2:5), it does not prove that Song and Eccl were written in exilic times. The Zend Avesta, a holy book of Zoroaster, is indeed from 600 B.C. (or later), but its language is a branch of old Indo-Iranian and the word may easily have been borrowed by Solomon's wide-ranging traders. Just as the few Greek words in Dan may have been borrowed before the Greek age of Alexander so this word may have been borrowed before the Persian age of Cyrus. Extensive Persian borrowing came later. It is of interest that the several Persian loan words in the Hebrew OT are found in Ezra, Neh, Est, Dan, Song, and Chr. None occur in the Pentateuch.

R.L.H.

1809 פָּרָה (*pārâ*) bear fruit, be fruitful, branch off.

Derivative

1809a פֶּרִי (p^rri) *fruit*.

The verb *pārā* is used twenty-nine times in the OT, most often in Gen (fifteen times). *pārā* appears twenty-two times in the Qal, seven times in the Hiphil (with the meaning "make fruitful"). Quite often it appears in conjunction with the verb *rābā* "to increase, multiply." It either follows *rābā* (Jer 3:16; Ezk 36:11) or, more frequently, it precedes it (Gen 1:22, 28; 8:17; 9:1, 7; 35:11; 47:27; Ex 1:7; Jer 23:3; in the Hiphil, Gen 17:20; 28:3; 48:4; Lev 26:9).

The root *pārā* is at the heart of the name of one of the tribes of Israel. Genesis 41:52, "[Joseph] named the second son Ephraim ('*ep-rāyim*) because God has made me fruitful (*hip-rani*) in the country of my affliction." The same promise and sustenance came to Jacob at Bethel (Gen 28:3; cf. 48:4). Even the banished Ishmael received this promise of God (Gen 17:20). Most interesting of all is the word of the Lord to Abraham in Gen 17:6, "I will make you fruitful and will make you into nations." Two things are of special interest here. First, in Gen 17 Abraham was ninety-nine years old. Twenty-four years had elapsed after God's original promise to him (Gen 12:4). Second, at the time of this promise of fruitfulness Sarah was post-menopausal and Abraham was impotent (Gen 17:17; Rom 4:19). Unwavering faith!

p^rri. Fruit. Three primary meanings are covered by Hebrew *p^rri*: (1) the fruit of a tree (Gen 1:12); a vine (Zech 8:12); or a fig tree (Prov 27:18); (2) the fruit of the womb, i.e. children (Gen 30:2; Deut 28:4, 11; Ps 21:10 [H 11]; 127:3); (3) fruit as consequences resulting from an action, e.g. "reward" (Ps 58:11 [H 12]; Prov 11:30). Six times *p^rri* is juxtaposed with *shōresh* "root" (II Kgs 19:30; Isa 14:29; 37:31; Ezk 17:9; Hos 9:16; Amos 2:9). Ginsberg has suggested that in these passages *p^rri* does not mean "fruit," but "branch, bough." Such may also be the meaning of *pārā* in verses such as Deut 29:18 [H 17], "lest there be among you a stock 'branching out into' (i.e. 'sprouting') gall and wormwood." Isaiah 11:1, a famous messianic passage, may be translated, "and a shoot shall 'branch' off from his stock."

Of the three usages cited above, the third, i.e. fruit as being indicative of consequences, occurs most frequently (especially in Ps, eleven times, and Prov, ten times). Proverbs refers to the "fruit of one's speech/mouth" (12:14; 13:2; 18:20; also, 18:21), and twice to the "fruit of one's hands" in the sense of achievements (31:16, 31). Proverbs 1:31 says that the heedless will eat of "the fruit of their way." There is a relationship between action and consequence as there is between seed and plant.

V.P.H.

1810 פֶּרֶךְ (parwār). *Structure attached to the west side of Solomon's temple* (II Kgs 23:11; I Chr 26:11). Perhaps a colonnade.

פָּרוּר (pārūr). See no. 1750b.

1811 פֶּרֶז (perez) *warriors, leaders* (Hab 3:4). Meaning dubious.

1812 פֶּרֶז (prz). *Assumed root of the following.*

1812a פֶּרְזָא (p^rrāzā) *open region, hamlet.*

1812b פֶּרְזִיּוֹן (p^rrāzōn) *rural population, rustics.* This word occurs only in Jud 5:7. Its meaning is dubious.

1812c פֶּרְזִי (p^rrāzī) *open region.*

פֶּרְזִיּוֹן (p^rrāzōn). See no. 1812b.

פֶּרְזִי (p^rrāzī). See no. 1812c.

1813 פָּרַח (pārah) *I, bud, sprout, shoot.*

Derivatives

1813a פֶּרַח (perah) *bud, sprout.*

1813b פִּרְחָה (pirhā) *brood* (Job 30:12).

1813c עִפְרָה ('ep^rōah) *young ones* (of birds (Deut 22:6; Job 39:30).

The meaning of this verb is connected with growing objects in nature. Its two basic translations are to sprout; to blossom/bud.

pārah always occurs in the Qal, except for five usages in the Hiphil. Of special interest is Ps 92:12-13 [H 13-14] which illustrates the use of a verb in different conjugations in the same context. Thus, 92:12 [H 13] "the righteous shall flourish (*yiprāh*) like the palm tree"; 92:13 [H 14] "they shall flourish (*yaprihū*) in the courts of our God." Dahood (in AB, *Psalms*, II, p. 338) understands the latter form as a Hiphil elative and translates, "they will richly flourish," to bring out the force of the Hiphil stem.

Many times the verb is used metaphorically to describe, for example, the "flourishing" of God's people, specifically, Israel (Isa 27:6), both in numbers and in influence. It also refers, more generally, to the righteous (*šaddiq*; Ps 72:7; 92:12-13 [H 13-14]; Prov 11:28; cf. Prov 14:11).

perah. Bud, sprout. This substantive refers to either buds or blossoms (Num 17:8 [H 23]; I Kgs 7:26; Isa 5:24; 18:5; Nah 1:4). It may also refer to bud-shaped ornaments (Ex 25:23, 31, 34; 37:17, 19, 20; Num 8:4; I Kgs 7:49; II Chr 4:5), a decorative piece.

1814 פָּרַח (pārah) II, *break out* (of leprosy).

This verb describes the eruption of skin diseases such as leprosy (?) and boils (Ex 9:9-10). Apart from Ex 9:9-10, *pārah* II occurs only in Lev 13 and 14 (13:20, 25, 39, 42, 57; 14:43).

It is questionable whether or not *pārah* II, "to break out" (of diseases) is to be distinguished from the root *pārah* I, "to bud, spring up, flourish." BDB, p. 827, separates the two. KB, pp. 777-78, treats them as one.

Leprosy might "break out" in place of an old boil (Lev 13:20), or it might "break out" in place of a burn which had not healed (Lev 13:25). Skin which had "broken out" in bright spots might be diagnosed as psoriasis or eczema (אֵפֶרֶת, "tetter," Lev 13:39). Leprosy might "break out" on a bald head, the symptom being a whitish-red spot (Lev 13:42). Leprosy might "break out" on clothing (Lev 13:57) (probably mildew or fungus). Finally, leprosy, spread by dry rot, could "break out" in one's home (Lev 14:43). See *tāmē'* and *šara'at* for the view that other communicable diseases were also so designated.

There are two kinds of leprosy: (1) nodular leprosy in which the patient exhibits eruptions which develop into nodules which subsequently become ulcerated; (2) a more severe kind, anesthetic leprosy, which involves degeneration of the nerves, loss of sensation and muscular movement, progressive paralysis, and eventually the loss of extremities.

Few lepers are mentioned in the OT. They include: (1) Moses, Ex 4:6ff.; (2) Miriam, Num 12:10ff.; (3) Naaman, II Kgs 5:1ff.; (4) Gehazi, II Kgs 5:27; (5) Uzziah/Azariah, II Kgs 15:5; (6) the four lepers at the siege of Samaria, II Kgs 7:3ff. Only the leprosy of Uzziah and the four demanded exile and banishment.

Leprosy, like all sicknesses described in the OT, came not from the realm of impurity or the demonic, but from the realm of God. It is the Lord who made Moses (his hand) and Miriam leprous. He infected houses with defiling leprosy (Lev 14:34). Elisha, the Lord's prophet, made Gehazi leprous on account of his avarice. Uzziah was smitten by the Lord (II Kgs 15:5).

"While the leper was regarded as ceremonially unclean, the Bible never refers to leprosy as a type of sin. Its incidence was regarded as an act of God, and in consequence the healing of the leper was invariably interpreted as a miracle of divine grace," (Harrison, see bibliography).

According to Lev 14 the priest visited the leper during his sickness. He examined the diseased area (not as a physician, but as an interpreter of the Law). He quarantined him, and later pronounced him pure or infected. Most important, the priest performed no therapeutic or exorcistic activity. A purification rite was carried out only after the leprosy healed.

In the OT healing pertains to the man of God, not the priest. Miriam's leprosy was cured not by Aaron, but by Moses' prayer (Num 12:10ff.). Naaman was healed when he followed a remedy prescribed by Elisha.

V.P.H.

1815 פָּרַח (pārah) III, *fly*. Occurs only in Ezk 13:20.1816 פָּרַט (pārat) *improvise carelessly* (Amos 6:5). Meaning uncertain.

Derivative

1816a פָּרַט (peret) *the broken off, i.e. fallen grapes* (Lev 19:10).

פָּרִי (p'ri). See no. 1809a.

פָּרִישׁ (pāriš). See no. 1826b.

1817 פָּרַךְ (prk) I. Assumed root of the following.

1817a פָּרַךְ (perek) *harshness, severity* (Lev 25:53; Ex 1:13).

1818 פָּרַךְ (prk) II. Assumed root of the following.

1818a פָּרֹכֶת (pārōket) *curtain* (e.g. Ex 26:31; Lev 4:6).

פָּרֹכֶת (pārōket). See no. 1818a.

1819 פָּרַם (pāram) *tear, rend garment* (Lev 21:10; 10:6; 13:45).1820 פָּרַס (pāras) *Persia*, the equivalent of Greek *Peris*, both derived from the Persian designation *Parsa*.

Its designation, the Achaemenian Empire, reflects the name of Achaemenes (700-675 B.C.), the eponymous ancestor of the dynasty.

Cyrus II (559-530 B.C.) is the first Persian monarch referred to in the OT. He promulgated the famous edict (in 539 B.C.) allowing the Jews (and other captured peoples) to leave Babylon and return to their native soil. He is referred to, by implication, in Isa 41:1-7, as the future liberator of the Judeans. In Isa 44:28 he is called God's "shepherd" and in 45:1 God's "anointed," literally, "messiah." Far from being an independent power bent on self-aggrandizement, he is an instrument whom God has raised up for deliverance, one of the actors on the stage of God's unfolding drama.

Two other Persian kings also figure prominently in the Bible. If Cyrus II authorized the restoration, then it was Darius I (522–486 B.C.) who confirmed it. Both Haggai and Zechariah received their call in the second year of Darius' reign (i.e. 520 B.C.), each of whose prophecies deal with the rebuilding of Jerusalem and the temple. Secondly, it was under Artaxerxes I (465–424 B.C.), who sponsored and authorized the ministries of Ezra and Nehemiah, that the restoration plans in Jerusalem were bolstered and completed.

There is no doubt but that the cruelty and rapacity demonstrated by the Assyrians and Babylonians on their subject peoples is missing with the Persians. They have become famous for their remarkably humane treatment of their vassals. Two factors may account for this benign policy. One, the Persian respect for other's autonomy may have had an ulterior motive. That is, the Persians were prepared to respect national sensibilities only to the extent that they served to weld together a new empire greater even than its Babylonian and Assyrian predecessors (cf. Est 1:1). Two, the religion of Persia, Zoroastrianism, was itself geared to tolerance, for it made a place for foreign gods as helpers of Ahuramazda, the chief god. The strategy in the political administration of the empire may have been a spillover from this mentality.

V.P.H.

1821 פָּרַס (pāras) *divide, break (in two).*

Derivatives

1821a פֶּרֶס (peres) *bird of prey, perhaps vulture.*1821b פֶּרְסָה (parsâ) *hoof.*

The verb is used twice in the Qal to describe the "breaking" of bread for the hungry (Isa 58:7) or at a funeral meal (Jer 16:7). Every other time it is in the Hiphil, used of those particular animals which "separate" or "split" the hoof.

parsâ. Hoof. Found in (prophetic) passages to describe the might of an enemy raised by God himself against his people (Isa 5:28) or against Israel's neighbors (Jer 47:3, Philistines; Ezk 26:11, Tyre), or even the strength of Israel herself (Mic 4:13).

Of more important interest is the use of *parsâ* in Lev 11:3–7 (seven times) and Deut 14:6–8 (five times) to describe the animals with cloven hoof.

Leviticus 11 begins the third section in Lev which discusses the theme of legal purity, that is, what the covenant of God with Israel meant for the latter in terms of daily living. Other items discussed in this unit beside chapter 11 (clean and unclean animals) are childbirth (chap 12), leprosy (chaps 13–14), sexual uncleanness (chap 15).

Specifically, Lev 11:1–8 identifies clean and unclean beasts on land. What is permissible for food and consumption are only those who "part the hoof" (*mapreset parsâ*) and chew the cud (a ruminant). Thus, Lev 11 forbids the pious to eat the camel, the hyrax, the hare, the pig, the first three because of the absence of the cloven hoof, the swine because it is not a ruminant. The list in Deut 14:3–8 begins, unlike the list in Leviticus, with the permissible and then moves to the outlawed.

It is interesting to trace man's relationship to animals in the OT, at least as the latter being a source of food (companionship aside!). It is quite clear that before the fall man was a vegetarian (Gen 1:28–29). Only after the flood is man specifically given permission to eat meat, and that without blood (Gen 9:3–4). By the time of Lev and Deut man's meat menu is largely narrowed to a few living creatures of the tame, herbivorous species.

Perhaps the most important thing is not the specifications of what is clean and unclean, but the underlying motivation that prompted the drawing of such a distinction. One obvious truth here is that God is concerned with the total life of his people, and nothing is beyond his concern or purview. Whether the categorization of animals is based on pagan associations or simply on hygienic concerns is difficult to say. Perhaps both.

Conceivably this is one illustration of how the OT unites hygiene and religion, or health and holiness (III Jn 2). It is noteworthy that no punishment for violating these laws is ever mentioned. The prohibited animals are declared unclean, and it is understood that anyone absorbing their impurity would be cut off from all contact with the holy and therefore from God. So then, Israel's total life is to be brought into conformity with God's demands.

V.P.H.

1822 פָּרַע (pāra') *I, act as leader, lead.* This denominative verb occurs only in Jud 5:2.

Parent Noun

1822a פֶּרֶעַ (pera') *leader* (Jud 5:2; Deut 32:42).1823 פָּרַע (pr') *II. Assumed root of the following.*1823a פֶּרַעַת (pera') *long hair of head, locks.*1824 פָּרַעַת (pāra') *III, let go, let loose, ignore.*

This verb, used sixteen times in the OT, has three basic meanings. The first is "to let loose,"

used of the hair in the sense of "cutting" (Lev 10:6, 13:45; 21:10), or "unbraiding" (Num 5:18). The second is "to let loose" in the sense of "to let run wild" (Ex 32:25 [twice]), "when Moses saw the people 'so out of hand'." The third is "to let loose" in the sense of "to let slip through the fingers," i.e., "to ignore, reject" (Prov 1:25; 8:33; 13:18; 15:32).

Twice *pāra'* is used in the Hiphil (Ex 5:4; II Chr 28:19). Once it is used in the Niphal, Prov 29:18, "where there is no vision the people 'perish'" (אָנַח). On the basis of the use of *pāra'* in the Qal a possible translation for Prov 29:18 is, "where there is no vision (revelation from God), the people are 'undisciplined/get out of hand'."

V.P.H.

- 1825 פָּרַעַה (*par'ōh*) **Pharaoh**. The Hebrew *par'ōh* (in Akkadian, *pir'u*) represents the transcription and vocalization from the Egyptian *per a'o* "the Great House."

Originally the Egyptian designation did not refer to the king of Egypt, but rather to his palace. Not until the middle of the eighteenth Dynasty (1575–1308 B.C.) did the expression become the appellative title of the king. As a circumlocution used to specify the king, the phrase *per a'o* may be analogous to the phrase "the White House," or to the title "the Sublime Porte," i.e. the Turkish sultan of the Ottoman Empire. There is no indication that Egyptian texts ever used "Pharaoh" as part of the official titulary of the king.

There are several pharaohs named in the Bible: (1) Necho, II Kgs 23:29, (the twenty-sixth Dynasty) who killed Josiah (609 B.C.) at Megiddo. II Chronicles 35:22 says that Josiah met his death because he would not listen to God's word from Necho's mouth! (2) Hophra, Jer 44:30, who succeeded Necho, is an object of Jeremiah's prophecy; (3) Shishak, I Kgs 11:40 (twenty-second Dynasty) who harbored Jeroboam when the latter escaped the wrath of Solomon; (4) So, king of Egypt to whom Hoshea sent envoys (II Kgs 17:4). H. Goedicke argued that this is not the name of a king but of a city (BASOR 171:64–6). K. Kitchen holds that it is Osorkon IV (*The Third Intermediate Period in Egypt*, Aris & Phillips, 1973, pp. 372–75).

There are also a number of pharaohs in the Bible who are incognito. Some of these are: (1) the Pharaoh visited by Abraham (Gen 12:10–20); (2) the Pharaoh under whom Joseph served, presumably one of the Hyksos kings (Gen 39ff.); (3) the Pharaoh of the oppression of the Exodus, either Thutmose III and Amenhotep II, (eighteenth Dynasty), or Ramesses II and his son Merenptah (nineteenth Dynasty), depending on whether one dates the Exodus events in the fif-

teenth or early thirteenth centuries B.C. Concerning the Pharaoh whose heart "God hardened" (reflecting perhaps the monistic way in which the Hebrew put the facts of history), see Rom 9:14–29. To use the unfaithful man providentially as a means of revealing God's gracious redemption to others so that they may become redeemed is itself an act of mercy; (4) the father-in-law of Solomon (I Kgs 3:1; 9:16, 24; 11:1). Solomon's marriage with Pharaoh's daughter signifies, possibly, Egypt's inferior status as a political power *vis-à-vis* Israel at this time. The Pharaoh's donation of Gezer is most likely a territorial concession made in the guise of a dowry. This Pharaoh has been identified, tentatively, as Siamun or Psusennes II, the last two kings of the twenty-first Dynasty.

Bibliography: Gardiner, A., *Egyptian Grammar*, London: Oxford University, 1966, pp. 71–76. Redford, D., "The Pronunciation of Pr in Late Toponyms," JNES 22:119–22. Wilson, J., "Pharaoh" in IDB, III, pp. 773–74.

V.P.H.

- 1825.1 פָּרַעַשׁ (*par'ōsh*) **flea**.

- 1826 פָּרַץ (*pāraṣ*) **I, break (through, down, over), burst**.

Derivatives

- 1826a פָּרַץ (*pereṣ*) **breach**.

- 1826b פָּרִיץ (*pāriṣ*) **violent one**.

The verb is used some fifty times in the OT, often in a military or disaster situation. The subject may be God or man. When God is the subject, *pāraṣ* describes his punitive activity upon Israel herself (I Chr 15:13; Isa 5:5; Ps 60:1 [H 3]; 80:12 [H 13]; 89:40 [H 41]); upon one of her priests (Ex 19:22, 24); upon the individual (II Sam 6:8; Job 16:14); upon a recalcitrant king (II Chr 20:37); upon Israel's enemies (II Sam 5:20; I Chr 14:11).

When *pāraṣ* is associated with man it often connotes malicious and destructive activity, for example, to describe what the Babylonians did to the walls of Jerusalem. In Neh 4:3 [H 3:35] and Eccl 3:3 *pāraṣ* is used in contrast to *bānā* "to build, erect," showing that *pāraṣ* does not mean simply "to punch a hole through" but "to level, raze."

Another important nuance of *pāraṣ* is "to increase" (explained by KB, pp. 780–81, as "to break over (by plenty), i.e., increase"). Some have suggested that there are actually two roots here "to break" and "to increase" (Guillaume; see bibliography) or "to break through" and "command" (Driver; see bibliography). When *pāraṣ* means "to increase" it refers to an increase either in produce (Job 1:10; Prov 3:10) or in progeny (Gen 28:14; I Chr 4:38). This increase

may be due to the assistance of a friend or relative (Gen 30:30, 43) but more often is due to God's grace (Ex 1:12; Isa 54:3). The inability to make increases, conversely, is indicative of God's wrath (Hos 4:10).

A third sense for *pāraš* is "to urge, be insistent" (I Sam 28:23, "they 'pressed' Saul to eat" i.e., they broke his abstinence; also, II Sam 13:25, 27, David by Absalom; II Kgs 5:23, Gehazi by Naaman).

peres. *Breach, gap*, mostly in a wall (I Kgs 11:27; Isa 58:12; Amos 9:11; Neh 6:1). God looks for a man "to stand in the breach/gap" in front of him when he views the idolatry in Jerusalem (Ezk 13:5; 22:30; cf. Ps 106:23). *peres* may also describe the breaking of a dike (II Sam 5:20; I Chr 13:11); a rupture between tribes (Jud 21:15); a perineal rupture (Gen 38:29, the birth of Perez and the sudden and unexpected priority of his birth over that of his brother Zerah).

V.P.H.

1827 פָּרַץ (*prš*) II. Assumed root of the following.

1827a מִפְּרָץ (*miprāš*) *landing place* (Jud 5:17).

1828 פָּרַק (*pāraq*) *tear apart, away* (e.g. Gen 27:40; Lam 5:8).

Derivatives

1828a פָּרַק (*pereq*) *parting of ways* (Ob 14); *plunder* (Nah 3:1).

1828b פָּרַק (*pārāq*) *fragment* (Isa 65:4).

1828c מַפְרָקֶת (*mapreket*) *neck* (I Sam 4:18).

1829 פָּרַר* (*pārar*) I, *break, destroy, frustrate, invalidate*.

The verb appears fifty-three times in the OT, most often in the Hiphil stem (forty-six times), never in the Qal. It can be used only transitively. The suggestion of KB, p. 782, to distinguish between *pārar* "to break" and *pārar* II "to stir, rouse" (Isa 24:19; Ps 74:13) seems unnecessary.

In the sense of "to break" *pārar* may take the following objects: (1) a vow, *nēder*, in the sense

of "to make invalid" or "annul" (Num 30:9, 13, 14, 16). These all deal with vows taken by women, be she newly married, a divorcee, or a widow. They may be "annulled" only by the bridegroom/husband, and must be done so immediately (v. 16). The opposite in Num 30 of *pārar* is *qūm* "to rise" with the meaning here of "validate, endorse." The same relationship between these two verbs is found in Prov 15:22: "Without deliberation plans 'come to nothing' (*hāpēr*), where counsellors are many plans 'succeed' (*tāqūm*)": (2) counsel/advice, 'ēšā (II Sam 15:34; 17:14; Ps 33:10; Ezr 4:5; cf. also Isa 14:27); (3) sign/omen, 'ōt, "foiled" by God; (4) the fear (of God) *yir'ā* (Job 15:4); (5) the commandment(s), *mišwā*, (Ezr 9:14); (6) God's judgment, *mishpāt* (Job 40:8).

It will be seen that in all these instances *pārar* has a moral overtone. It does not mean "to break" in the sense of an exhibition of physical strength, but to violate or renege on revealed truth. Only in Ps 74:13 do we find a reference to *pārar* and strength: "You have 'broken' the sea by your strength," a reference not to the Exodus events (Ex 14:21) but to the primeval actions of Gen.

This is borne out by the fact that of the fifty-three uses of *pārar*, in twenty-three the direct object is "covenant" *b'rit*. Of course, usually man is responsible for "breaking" the covenant. On a few occasions, however, the possibility of God's "breaking" the covenant is alluded to: Lev 26:44; Jud 2:1; Jer 14:21; Zech 11:10. Similarly, Ps 89:33 [H 34]. Possibly then here in this covenant relationship was that of annulment. Yet, "though the expectation of God's punitive intervention was very real, it looked on the whole for individual divine acts of punishment, the aim of which was not an annihilating judgment that would dissolve the covenant, but rather the maintenance of that relationship by the removal of disturbing elements" (Eichrodt).

V.P.H.

1830 פָּרַר (*pārar*) II, *split, divide* (Isa 24:19; Ps 74:13).

1831 פָּרָא (*par*) III. Assumed root of the following.

1831a פָּרָא (*par*) *young bull, bullock*.

1831b פָּרָה (*pārā*) *heifer, cow*.

par. *Young bull, bullock*, referred to 132 times in the OT (KB, p. 775, derives *par* from *pārar* III,

“turn away, be untamed, unmannerly”). It is a type of cattle (*bāqār*), a category which subdivides into: (1) *‘elep/’ālāpim* and *shôr*, the male working ox used in tillage, ploughing; (2) *par* “bull”; (3) *pārâ* “cow”; (4) *‘egel* “calf”; *‘eglâ* “heifer.”

Only in Ps 22:12 [H 13] is *par* used as a figure of strength and power. Mostly it is mentioned as a sacrificial victim, especially in Lev and Num. Often *par* is followed by the phrase *ben bāqār* (e.g. Ex 29:1; Lev 4:3, 14; Num 7:15).

In the Hebrew sacrificial system the bull (*par*) figured prominently as a sacrificial animal, used: (1) at the consecration of Aaron and his sons (Ex 29:1, 3, 10, 11, 14); (2) as the sin offering either for the sins of the high priest (Lev 4:3, 4, 5, etc.), or the community in Israel (Lev 4:14, 15, 16, 20, 21; in both cases the bull was to be immolated. Its remains were burned “outside the camp,” the animal having served as a substitute for the guilty person who should be expelled); (3) on the Day of Atonement, when the high priest offered a bull for himself (Lev 16:6, 11, etc.); (4) at the investiture of priests when a bull was offered for their sin (Lev 8:2); (5) at the feast of tabernacles (Num 29:20, 36); (6) at the feast of weeks (Num 28:28); (7) at the feast of the new moon (Num 28:11). Most frequently *par* is used in the description of the offering for the dedication of the tabernacle’s altar (Num 7:15, 21, etc.).

pārâ. Cow. Unlike the *par* “bull,” the cow was never used in the OT as an animal of sacrifice. The only exception is the red heifer, which was slaughtered and burned outside the camp (Num 19:1ff.). Its ashes were mixed with the water of purification (vv. 17–22), which removed defilement incurred through contact with the dead (Num 19:11–16). Hebrews 9:13 refers to this custom when speaking of the effectiveness of Christ’s blood for the remission of sin.

Of interest is the story of the Philistines’ returning the ark to Israel (I Sam 6). The presence of God is always a problem for the sinner! The Philistines were instructed to send the ark back on a new cart, drawn by two previously unworked cows that had just calved (I Sam 6:7). The calves were to be separated from the cows (I Sam 6:7). The striking evidence that God is leading them is that the cows, though separated from their calves, go forward and head for Bethshemesh (I Sam 6:12).

Twice, *pārâ* is used symbolically, Hos 4:16, comparing Israel’s backsliding to a stubborn cow, and Amos 4:1, symbolizing the reckless luxury of the women of Samaria.

V.P.H.

Derivative

1832a פָּרָשׁ (*miprās*) *spreading out, thing spread.*

This verb appears sixty-nine times in the OT (Qal, fifty-seven times; Niphal, once; Piel, eleven times). There are a number of direct objects that follow *pāraś*. Those which appear most often are: (1) *kānāp* (thirteen times; twice in the singular, Ruth 3:9; Ezk 16:8, “skirt,” and eleven times in the plural, “wings”). Many of these references are to the cherubim spreading their wings above the Ark (Ex 25:20; 37:9; I Kgs 6:27; 8:7; I Chr 28:18; II Chr 3:13; 5:8). God’s “wings” may act as a net to trap the wicked (Jer 48:40; 49:22) or act as a protection and a covering to the righteous (Deut 32:11).

(2) A second frequently found object of *pāraś* is *reshet* “net,” nine times. The net may be spread by God himself over his own backslidden people (Ezk 12:13; 17:20; 32:3; Hos 7:12). Or the net may be spread over Israel, by an invader (Ezk 19:8), or over an individual (Ps 140:5 [H 6]) by hostile men. Cf. Prov 29:5; Lam 1:13; Hos 5:1.

(3) Most frequently the direct object of *pāraś* is “hand” (*kap* “palm,” thirteen times; *yad*, five times). This is, of course, a reference to the spreading of one’s palms before God in prayer. The OT data would indicate that the prayer could assume a number of different postures in his prayer time: (1) standing, I Sam 1:26; I Kgs 8:22; Jer 18:20; (2) kneeling, I Kgs 8:54; Ezr 9:5; Dan 6:11; (3) prostration, Josh 7:6; (4) head bowed, Gen 24:26; Neh 9:6; (5) face between the knees, I Kgs 18:42; (6) sitting, II Sam 7:18.

It may be of no special significance, but the word used after *pāraś* in the Qal when the verb refers to prayer is always *kap*, more literally, “the palm.” In the Piel, however, the object, if the reference is to prayer, is *yad* (Ps 143:6; Lam 1:17) except for *kap* in Isa 1:15.

Some whose prayers are physically accompanied by the raising of or spreading before God the palms are: (1) Moses, Ex 9:29, 33; (2) Solomon, I Kgs 8:22, 54; II Chr 6:12, 13; (3) Ezra, Ezr 9:5; (4) Job, on advice by Zophar, Job 11:13; (5) the prayer of the pious who spread their hands toward the temple, I Kgs 8:38; II Chr 6:29; (6) those who degrade prayer to a cover-up for injustice and oppression, Isa 1:15; (7) those who stretch their palms to an alien God, Ps 44:20 [H 21].

It would appear that in most cases where uplifted hands are involved it is in a spirit of supplication. The same idea may be found, though, with the verb *nāśâ* “to lift, raise” in Ps 28:2; 134:2; 141:2. Cf. the Ugaritic *ša ydk šmm* “lift up your hands toward heaven” (Krt: 75–76). Paul reflects this practice in I Tim 2:8.

1833 פָּרַשׁ (*pārash*)

The odd form *parśez* Job 26:9 is called a *Pi'lel* of *pāraš* by BDB and GB.

V.P.H.

פָּרַשׁוּ (*pārśez*). See discussion under no. 1832.

1833 פָּרַשׁ (*pārash*) I, *make distinct, declare*.

Derivative

1833a פָּרָשָׁה (*pārāshā*) *exact statement* (Est 4:7; 10:2).

This verb is found five times in the OT (or four if in Ezk 34:12 the MT is changed from *niprāshôt* to *niprāsôt*, "his sheep that are 'scattered'," that is from *pāraš* instead of *pārash*). The one use of the verb in the Hiphil is Prov 23:32, "it 'stings' like an adder." KB, p. 782. 83 includes this under *pārash* I, but BDB, p. 831, relegates this Prov passage to a separate root *pārash* II.

The three passages we are left with then are: (1) Lev 24:12—in the case of blasphemy it is said of the culprit that he is to be placed under guard until the will of the Lord "should be made clear" unto them. (2) Num 15:34—in a case of Sabbath breaking the violator is to be kept in custody until his penalty should be "determined" or "fixed." (3) Neh 8:8, "So they read in the book in the law of God 'distinctly'" (קִנְיָ), or in some versions, "they read from the Law of God, 'translating'," i.e. from Hebrew to Aramaic. Conceivably the form of the verb in Hebrew here, *m'pōrāsh*, is the equivalent of the Aramaic form in Ezr 4:18, "The document you sent to me has been 'translated', *m'pārash*, and read before me." (Ezr 4:6-6:18 are written in Aramaic, the rest in Hebrew.)

The basic meaning still remains, "to make/be made clear" (by revelation, explication, or translation).

It is from this Hebrew root that the term "Pharisee" is derived. The origin both of the movement and the designation itself, Pharisee, is somewhat puzzling. It has been suggested that the Pharisees, under the Hasmonean prince John Hyrcanus (135-104 B.C.), himself an ex-Pharisee, were expelled from the Sanhedrin and were subsequently branded with the name the "Perushim," i.e., "the separators." In other words, the term was originally one of opprobrium, akin to that attached to the Holy Club at Oxford, the "methodists." And like the Methodists, the Pharisees took the name as their own but used its alternative Hebrew meaning, "the exponents" (of the Law). The Pharisees are, then, the "separators" in that they are the expositors of the Law, both written and oral.

V.P.H.

1834 *פָּרַשׁ (*pārash*) II, *pierce, sting*. This verb occurs only once, in the Hiphil (Prov 23:32).

1835 פָּרַשׁ (*prsh*) III. Assumed root of the following.

1835a פֶּרֶשׁ (*peresh*) *fecal matter*.

1836 פָּרַשׁ (*prsh*) IV. Assumed root of the following.

1836a פָּרָשׁ (*pārāsh*) *horse, horseman*.

Both of these translations are covered by the one Hebrew word. The various lexica differ radically among themselves as to how often and where *pārāsh* = "horse" and where "rider." Some have suggested that the proper translation of *pārāsh* is always "horse" and if "horsemen" is ever allowable, the reference is to those who were charged with managing the horses (as in a chariot), not to those who mount for riding (Mowinckel).

The word occurs fifty-seven times in the OT and all but three are in the plural. Since the singular form is *pārāsh*, one would expect the remaining fifty-four instances to have the plural form *p'rāshim*. Instead the form is *pārāshim*. The MT presupposes an original *parrāsh*.

The heaviest clusters of *pārāsh* are found in the Solomon cycle in reference to his vast resources (ten times), and in the account of the death of the Egyptians at the Red/Reed Sea, Ex 14 (six times).

Bibliography: Gurney, O. R., "Hittite Paras-Horse?" PEQ 69:194. Mowinckel, S., "Drive and/or Ride in O.T.," VT 12:278-99, esp. pp. 289-95. Sayce, A., "Origin of the Hebrew PĀRĀSH," JTA 24:175.

1837 פָּרְשֵׁגֶן (*parshegen*) *copy*. This Persian loan word occurs only in Ezra 7:11.

1838 פָּרְשֵׁדָנָה (*parsh'dōnā*). Meaning unknown. Only Jud 3:22. BDB connects with *peresh* fecal matter. LXX takes it as part of Eg-lon's palace.

1839 פָּרְתָמִים (*part'mim*) *nobles*. Only in Est and Dan. Loan word from Old Persian.

1840 פָּשָׂה (*pāšā*) *spread*.

1841 פָּשַׁע (*pāšā'*) *step, march* (Isa 27:4).

Derivatives

1841a פָּשַׁע (*pešā'*) *step* (I Sam 20:3).

1841b מִפְּשָׂא (*mipšā'ā*) *hip or buttock* (I Chr 19:4).

1842 פָּשָׁה (*pāšaq*) *part, open wide* (Prov 13:3; Ezk 16:25).

1843 פָּשָׁה (*pash*) *folly* (Job 35:15). Meaning uncertain.

1844 *פָּשָׁה (*pāshah*) *tear in pieces*. Occurs only in the Piel (I Sam 15:33; Lam 3:11).

1845 פָּשַׁח (*pāshat*) *strip, invade*.

The verb occurs forty-two times in the OT, twenty-three times in the Qal; three times in the Piel (I Sam 31:8; II Sam 23:10; I Chr 10:8, always "to strip the slain" after a battle); fifteen times in the Hiphil; once in the Hithpael (I Sam 18:4, "Jonathan 'took off' the cloak he was wearing").

In the Qal stem *pāshat* has two basic translations. One is to "strip off" (clothing), the second is "to invade." The meaning "to strip off" is not unique to the Qal stem but may be found also in the Piel (where the object of the verb is "armor" of a fallen warrior) and in the Hiphil (primarily with the object "clothing" but also "armor" (I Sam 31:9) or "skin" in the sense of "to flay, dismember" (Lev 1:6; II Chr 29:34; 35:11; Mic 3:3). Of the fifty-two occurrences of *pāshat*, twenty-three times the meaning is "to strip, remove, make naked."

In such a context *pāshat* may denote violent or judgmental action—those passages which refer to the stripping off of one's armor—but also, the stripping off of one's clothing when Israel/Judah is overrun by an alien power (Ezk 16:39; 23:26; Josh 2:3 [H 5]). Micah 2:8 observes that Judah "pulls off," i.e. "steals" the coats of others. Similarly Joseph was "stripped" of his coat by his brothers (Gen 37:23). Aaron is to be "stripped" of his vestments, before he dies, on account of Israel's past sins (Num 20:26, 28).

On other occasions "to remove" the clothing simply means to make a change in one's dress, at a sacred occasion (Lev 6:11 [H 4]; 16:23); at the end of a day's work (Neh 4:23 [H 17]); as a sign of repentance and mourning over one's sins (Isa 32:11); in an act of ecstatic prophecy (I Sam 19:24).

Bibliography: On *pāshat* in Hos 2:5: Gordon, C. H., "Hos. 2:4–5 in the Light of New Semitic Inscriptions," ZAW 54:277–80.

V.P.H.

1846 פָּשָׁה (*pāsha'*) *rebel, transgress, revolt*.

Derivative

1846a פֶּשַׁח (*pesha'*) *rebellion*.

The fundamental idea of the root is a breach of relationships, civil or religious, between two par-

ties. In Ugaritic the substantive *pš'* "sin" is found (UT 19: no. 2128).

In a context of international relationships, the verbal form designates a casting off of allegiance, a rebellion against rulers. This secular concept of revolt appears in I and II Kgs and parallels in II Chr. By analogy, but in a religious sense, Israel was accused of rebelling against her divine king and the established covenant between them (Isa 1:28; 48:8; Ezk 2:3; Hos 8:1). Obviously, God is never guilty of committing this act since there is no higher authority than himself; hence, this is a trait of human activity (Hos 14:9), and is sometimes set in contrast to the actions of faithful (Prov 28:21; and righteous (Ps 37:38) men. In one instance, Israel is accused of engaging in rebellion "since your birth" (Isa 48:8). The acts of transgression, i.e. going beyond the limits of God's laws, have impact on inner attitudes which create deceitfulness (Isa 59:13) or a distorted love for this "independence" from God (Amos 4:4). It may dull one's knowledge of the right (Hos 8:1; Ps 51:13) and be a rigid refusal to accept correction (Jer 2:8, 29; Hos 7:13; Zeph 3:11; Amos 4:4).

God's reaction to transgression may be judgment (Ps 37:38; Isa 1:28; Dan 8:23), but his deep desire is really to provide salvation from this way of living. Through Isa (46:8) he gave a ringing call to remember and turn, and through the Suffering Servant made provision for a change (Isa 53:12). Those who would cast away, and acknowledge these sins (Jer 3:13; Ezk 18:31), God would forgive and redeem (Jer 33:8; Hos 7:13; Zeph 3:11). At least one so redeemed desired to tell others how to be converted (Ps 51:13).

pesha'. *Rebellion, revolt, transgression.* This masculine noun designates those who reject God's authority. In the indictments of the first two chapters of Amos, *pesha'* is done by non-Israelites to other people, but overwhelmingly the Hebrew people were the ones who were guilty of *pesha'* against the authority and covenant of their God. In a few Psalms, the book of Prov and a few instances in Ezk the individual is emphasized, instead of the corporate body, guilty of this sin. Lam personifies Jerusalem three times and Isa says the earth (a figure for its inhabitants) was involved in *pesha'*.

In a few secular contexts, this term refers to violations of personal and property rights of others (Gen 31:36; 50:17; I Sam 24:11; 25:28). In a religious context, this term refers to involvement in fertility cult practices (Isa 57:4), active persecution of God's people (Ps 5:10 [H 11]; 59:3 [H 4]) and telling falsehoods (Prov 12:13; 17:9). Predominantly *pesha'* is rebellion against God's law and covenant and thus the term is a collective which denotes the sum of misdeeds and a fractured relationship.

The measure of this kind of sin is the character of God himself, for if there were no such God, there could not be *pēsha'*. Some passages highlight the contrast between God and man's rejection of him, especially his desire to correct the estrangement (Ex 34:7; Num 14:18; Josh 24:19; I Kgs 8:50; Prov 19:11; Mic 7:18).

Not only does *pēsha'* create a gulf between God and man, it generates distortions within himself, i.e. a tendency to hide his actions (Job 34:6), deceitfulness (Prov 28:24), apathy (Ps 36:1 [H 2]), illness (Ps 107:17), a love for strife (Prov 17:19), a sense of enslavement (Prov 12:13), easily angered (Prov 29:22), hypocritical worship (Isa 58:1) and a sense of defilement (Ezk 14:11). In one case, *pēsha'* is depicted as a heavy, crushing weight (Isa 24:20).

As far as God is concerned, there are two ways the rebellion may be ended; it may end with punishment or a renewal of the relationship. God's first step is to indict his people and expose their sin as a rebellion. Some key passages with this theme are Job 36:9; Mic 3:8. Through his servants, God warns his people of their danger (Ps 89:32 [H 33]; Amos 3:14), and takes pains to designate their transgression as the cause for their punishment (Ezk 39:24; Mic 1:13; Dan 8:12–13).

The references given above on the character of God indicate that God wants to pursue a different course of action; he wants to save his people. In the ceremonies of the Day of Atonement he provided a scapegoat (Lev 16:16, 21) and in Isa 53:5, 8 promised redemption through the Suffering Servant. Through his servants he promised forgiveness (Job 7:21; Isa 43:25; Ezk 18:22; 37:23). God also makes man's role of choice clear (Ezk 33:12; cf. Job 8:4).

Before God actually grants his pardon, man is called upon to act (Ezk 18:30–31) with a warning attached and that man must personally repudiate his rebellion and the idolatry that was an integral part of it (Ezk 18:28, 37:23).

An examination of several prayers of supplication reveals that the one who prays does indicate awareness of sin (Isa 59:12) and does engage in confession of sin (Ps 51:3 [H 5]; Ezk 33:10). Yet, it is clear that human effort can not bring salvation, so these prayers also exhibit an earnest plea for God to act (Job 13:23; 14:17; Ps 19:13 [H 14]; 25:7; 51:1 [H 3]). Best of all, testimonies are recorded that God did indeed pardon and redeem his people (Ps 32:1; 65:3; Prov 19:11; Isa 43:25; 44:22; 53:5; 59:20).

Historically, Israel as a nation and as individuals knew God's acts of judgment and his acts of salvation. Man's rebellion was the cause of the judgments, but God's compassion was the grounds for their salvation.

G.H.L.

1847 פֶּשֶׁר (*pēsher*) *solution, interpretation*.
Loan word from Aramaic (*pishrā'*, Eccl 8:1).

1848 פֶּשֶׁת (*pēshet*) *flax, linen*. Derivation uncertain.

1849 פִּשְׁתָּה (*pishtā*) *flax*.

1850 פֶּת (*pōt*) *sockets* (I Kgs 7:50; Isa 3:17).

פֶּת (*pat*). See no. 1862a.
פִּתְּאָם (*pit'ōm*). See no. 1859a.

1851 פַּת־בָּגַג (*pat-bāg*) *portion* (of food) for king, delicacies (Dan 1; 11:26).

1852 פִּתְגָּם (*pitgām*) *edict, decree* (Est 1:20; Eccl 8:11). Persian loan word.

1853 פָּתָה (*pātā*) *entice, deceive, persuade*.

Derivative

1853a פֶּתִי (*peti*) *simple, foolish*.

The verb *pātā* appears twenty-seven times, primarily in the Piel and Pual stems. The basic verb idea is "be open, spacious, wide," and might relate to the immature or simple one who is open to all kinds of enticement, not having developed a discriminating judgment as to what is right or wrong.

The verb usage is seen in the tactics of Samson's bride-to-be in wrangling the secret of his riddle (although in the end she lost her husband, Jud 14:15–16). Enticement is described in terms of a man seducing a woman (Ex 22:15). The immature are warned not be enticed by sinners (Prov 1:10). Another arresting usage of enticement is what happens when a man refuses to follow God's direction. He is enticed to do wrong to his ultimate hurt, a discipline or judgment for rejecting the Lord (II Chr 18:19–21).

To deceive carries almost the same idea as to entice. Israel is warned not to be deceived by turning to other gods in the midst of plenty (Deut 11:16). To be a witness against a neighbor without cause is to deceive with one's lips (Prov 24:28). Jeremiah in the depths of despair complained that God had deceived him when his ministry seemed so fruitless. The Lord was gra-

cious with him (as he is with all who serve him), for Jeremiah could not escape the commission (20:7-9). Even a prophet can be deceived by God when a double-minded people ask guidance. The Word already given (regarding idols) must be obeyed before further light is sought or else it is mockery (Ezk 14:9).

peti. *Simple, foolish.* *peti* generally describes the naive (not deranged) in Prov who must be well taught, since an immature person believes anything (Prov 14:15). [But is not something worse than immaturity implied when the *p^e tāyim* along with mockers *lēšim* and fools *k^e sīlīm* (Prov 1:22) are said to have "rejected me," "ignored my advice" and not to have "accepted my rebuke" (1:24-25 NIV)? R.L.H.] If the *peti* refuses to learn he will go on to inherit folly (*iḥwelet*, the impairment of moral and spiritual values, Prov 14:18). To achieve moral and spiritual maturity, the naive are encouraged to receive prudence (Prov 1:4), to understand wisdom (Prov 8:5), and to dwell where wisdom makes her home (Prov 9:4). Otherwise, he may drift into temptation and then sin, immorality (Prov 7:7f.), robbery and murder (Prov 1:10-14). Apart from godly tutelage, he is on the road to death (Prov 7:7; 22:3).

The verb appears 135 times in the OT, in the Qal, 97 times; in the Niphal, 18 times; in the Piel, 19 times; in the Hithpael, once. In the Qal stem the meaning "to open" remains standard. The same is basically true in the Niphal except for Isa 5:27; 51:14 where the respective translations are "to loose" and "to release." In the Piel, however, the primary meaning is "to loose, untie, strip off, undo," either in the sense of "to humiliate" (Job 12:18; 30:11; Isa 45:1), but more often "to liberate" (Isa 58:6; Jer 40:4; Ps 102:20 [H 21]; 116:16).

pātaḥ is a transitive verb always with a direct or implied direct object. Most commonly the ob-

ject of *pātaḥ* is a part of the body—forty-one times (the mouth: twenty-three times; the eyes: seven times; the hands: six times; the lips: three times; the ears: twice).

Since *pātaḥ* is followed most frequently by *peh* "mouth," it will be instructive to see what are the various nuances behind the phrase, "to open the mouth." In some places this combination is simply a literary device to draw attention to what follows as in "Job opened his mouth," (Job 3:1). This is comparable to the introduction in the NT to the Sermon on the Mount, "And Jesus opened his mouth," (Mt 5:2) or "Then Peter opened his mouth and said" (Acts 10:34). Quite often it is simply a circumlocution for "talk," or "speak." "When she 'opens' her mouth, she does so wisely," (Prov 31:26; cf. 24:7). Thirdly, it may mean "to make an announcement" (Ezk 21:22 [H 27]). Fourth, "to open the mouth" sometimes denotes "to slander, to attack with words" (Ps 109:2). Fifth, one may open his mouth to eat (Ezk 3:2).

Sixth, one who does not open his mouth is compared to one afflicted with dumbness (Ps 38:13 [H 14]). He refuses to give back to his accusers the sharp answer or to retaliate orally. This can be seen too of the suffering Servant in Isa 53:7, "He opened not his mouth." In the several instances of this phrase in Ezekiel the meaning is "to function and speak prophetically"; thus, Ezk 3:27, "When I speak to you, I shall 'open your mouth' and you will tell them." When Ezekiel was struck dumb (3:26) it is very unlikely that this means he lost his capacity for speech. What he lost was his capacity to function as a prophet and to act as an intermediary or intercessor. Cf. too Ezk 24:27; 33:22.

Finally "the opening of the mouth" is applied to something other than humans: (1) a cave: Josh 10:22; (2) the earth: Num 16:32; 26:10; (3) a donkey: Num 22:28.

petah. *Opening, entrance,* 164 times. It may describe the opening/entrance of: (1) a tent, Gen 18:1; (2) a house, Gen 19:11; (3) a city, I Kgs 17:10; (4) an "open" place, Gen 38:14; (5) a cave, I Kgs 19:13; (6) a gate, Ps 24:7, 9. The word is used figuratively in Hos 2:15 [H 17], "a door of hope." Only in Mic 7:5 is *petah* connected with the mouth, "keep the 'doors' of your mouth."

maptēaḥ. *Key* an opening instrument, Jud 3:25; I Chr 9:27; Isa 22:22.

earth," Mt 16:19). Gertner, M., "Terms of Scriptural Interpretation: a Study in Hebrew Semantics," BSOAS 25:1-27, esp. pp. 14-16 (*Pātaḥ* means 'interpret/interpretation' in Ps 49:4 [H 5]; 119:130). Wilson, R. R., "An Interpretation of Ezekiel's Dumbness," VT 22:91-104.

V.P.H.

1855 *פָּתַח (pātaḥ) II, carve, engrave.

Derivative

1855a פִּתּוּחַ (pittūaḥ) engraving.

This verb appears eight times in the Piel and once in the Pual (Ex 39:6). It may refer to engravings on buildings (Solomon's temple, I Kgs 7:36; II Chr 3:7; and the worker, Hiram, who did the engraving on that temple (II Chr 2:7, 14 [H 6, 13]). Secondly, it refers to engravings on the priestly vestments, specifically (1) the two stones on which the names of the tribes of Israel are to be inscribed, which are then to be attached to the shoulder straps of the Ephod (Ex 28:9, 11), and (2) the diadem (Ex 28:36). Cf. also Zech 3:9.

V.P.H.

פִּתּוּחִי (pit' ḥōn). See no. 1854c.

פִּתִּי (peti). See no. 1853a.

1856 פִּתְיִיל (p' tīgīl) rich robe (Isa 3:24).

פִּתְיִיחָה (p' tīḥā). See no. 1854d.

פִּתִּיל (pātīl). See no. 1857d.

1857 פָּתַל (pātal) twist.

Derivatives

1857a פִּתִּיל (pātīl) cord, thread.

1857b פִּתְלֹל (p' taltōl) tortuous (Deut 32:5).

1857c נִפְתָּלִים (naptālim) wrestlings (Gen 30:8).

פִּתְלֹל (p' taltōl). See no. 1857b.

1858 פָּתַן (ptn). Assumed root of the following.

1858a פִּתְּנוּ (peten) venomous serpent, perhaps cobra.

1858b מִפְתָּן (miptān) threshold.

1859 פִּתְעָה (peta') suddenness.

1859a פִּתְּאוּם (pit'ōm) suddenly, surprisingly.

pit'ōm. Suddenly, surprisingly. The word appears twenty-five times in the OT, most often in the prophets, ten times (Isa, four times; Jer, five times; Mal, once) and in Wisdom Literature, eight times (Prov, four times; Job, three times; Eccl, once). The one dubious passage is Prov 7:22 which translates, "He goes after her

'straightway' (קַיָּו) or 'impulsively.'" The LXX reads for "straightway" *kepphōtheis* "simples-ton" suggesting that behind the MT *pt'm* is *p'tā'im*. We retain the Massoretic vocalization (W. McKane, *Proverbs*, p. 340) as more in line with the context.

The final -m in *pit'ōm* is in biblical Hebrew and Ugaritic frequently an adverbial indicator. Compare such words as: *ḥinnām* "in vain"; *rêqām* "empty-handed"; *yômām* "daily"; *etmōl shil-shōm* "previously."

Of the twenty-five uses of *pit'ōm* all of them occur in connection with disaster or judgment. The one exception where *pit'ōm* has a pleasant sense is II Chr 29:36. After describing the rededication of the temple by Hezekiah the writer says, "And Hezekiah rejoiced and all the people over what God had prepared for the people, for the thing was done 'suddenly'," most likely a reference to the reforms of Hezekiah which were so speedily and happily executed.

The word first appears in the OT in Num 6:9. Because a Nazirite had to avoid contact with anything deceased, if anyone died "suddenly" in his presence, the Nazirite had to present a sacrifice to God. Cf. also Num 12:4.

The adverb appears for the first time in a military context in Josh 10:9; 11:7, describing the blitzkrieg attack of Joshua on the Amorite kings and Hazor. This is preponderantly the motif in the prophetic references too: Isa 47:11; Jer 51:8 for example.

Malachi's proclamation (3:1) of the Messiah's appearing is well known, "And the Lord, whom you seek, shall 'suddenly' come to his temple." This sudden coming will be a combination of judgment and vindication, curse and blessing. Who can remain standing on that day?

V.P.H.

1860 פָּתַר (pātar) interpret (dreams).

Derivative

1860a פִּתְרוֹן (pitrōn) interpretation.

The verb occurs nine times in the OT, always in connection with the interpretation of dreams, and here it is confined exclusively to Gen 40-41, Joseph's dream interpretations while in Egypt.

pitrōn. Interpretation. Only in Gen 40-41. The Aramaic equivalent for *pātar* is *p'shar* which is found as a noun and a verb in Dan 2-5. It has been speculated that the place of residence of Balaam-Pethor (Num 22:5) is not a Hebrew locative at all but instead is Balaam's Aramaic professional title-*pathorah*-a regular *nomen agentis*

of *pātar* "the interpreter," (Yaure; see bibliography).

Among the literature from Qumran there have been discovered "commentaries" on several of the canonical books. The characteristic feature of these compositions is that the gloss after the biblical verse quoted is preceded by the phrase *pishrô 'al*, "its interpretation concerns." Hence, because of the use of the root *pshr*, these commentaries (better, apocalyptic expositions of biblical passages, for the most part from the prophets) are known as *p" shārīm*.

The technical name for dream interpretation is oneiromancy. An individual who engages in such an activity is called an oneirocritic. It is well known that in the ancient Near East there existed a whole discipline of dream interpretation even to the existence of manuals on the subject. In these cultures dreams were always understood causally. By magic one could induce good dreams. The local deity could be petitioned to turn a dream to good. Or, the ill effect of a bad dream could be cancelled by a counterspell.

It is of no little importance that a science of dream interpretation failed to emerge in Israel. Only two Hebrews engage in oneiromancy—Joseph and Daniel—and that while they belong to the court of heathen kings. The biblical Hebrews never need interpreters to explain their dreams,

although individual Hebrews may interpret dreams for foreigners. And even when they do, the Scripture emphasizes that neither was able to solve the dream through his own wisdom. It was God who revealed the interpretation to them (Gen 40:8; Dan 2:7ff.).

שָׂדִי (*šō'i*). See no. 1884c.

1863 שְׂדִימִים (*še'elim*) a kind of lotus (Job 40:21–22).

1864 צֹאן (*š'n*). Assumed root of the following.

1864a צֹאן (*šō'n*) flock, sheep. (ASV and RSV very similar.)

šō'n is the generic term for "small cattle" comprised mostly of sheep and goats, but the emphasis in the word is on sheep (cf. Gen 38:17; I Sam 25:2). Flocks were the staple animals throughout Israel's history, especially during the patriarchal period (Gen 46:32). They provided milk (Deut 32:14) and food. Their wool was woven into cloth that served numerous purposes and their hide had many functions, including tent covering (Ex 26:14). A man's wealth was measured by the size of his flocks (I Sam 25:2). Abraham had a large flock (Gen 12:16), and the flocks of Jacob and his sons were so large that they grazed from Hebron to Dothan (Gen 37:12–17). King Solomon's household consumed 100 sheep a day. Finding water for the flocks was a major concern. Wells were thus both a major gathering place and yet a source of deep contention (Gen 24:11–27; 26:17–22). Sheep were protected in caves and folds made from rock (cf. Num 32:16). A shepherd was responsible for the sheep; he had to stand the loss of his negligence (cf. Ezk 34:10). But if he fulfilled his task faithfully, any sheep lost was the loss of the owner (cf. Gen 31:39).

The firstborn of the flock belonged to Yahweh (Ex 13:12; Deut 15:19), and the tithe of the flock was given to him (Lev 27:32). A sheep remained with its dam seven days before being presented on the eighth (Ex 22:29). In addition, sheep served for numerous offerings. Their most prominent place was on the day of the passover. A year old, male lamb without blemish was offered up by each household (Ex 12:5f.). The animal could be either a sheep or a goat. In addition, they served for burnt offerings (Lev 1:10), sin offerings (Lev 5:6), guilt offerings (Lev 5:15) or peace offerings (Lev 3:6). To qualify, the animal had to be perfect, without blemish, except minor defects were allowed for a freewill offering (Lev 22:21–25). When Israel was faithful to the covenant, God promised to bless them; this blessing included an increase in flocks (Deut 7:13; 28:4); conversely when they were disobedient, a part of their curse would be the loss of their flocks (Deut 28:18, 31, 51).

Sheep frequently serve as a symbol for the people of God (Num 27:17). The imagery indicates the people are naive and must be led and protected by a compassionate shepherd (Ps 100:3). The sheep too have the responsibility of responding to the voice of their master (Ps 95:7). When they are wayward, they must confess their wrong and return to the Lord (Isa 53:6).

A compassionate leader is called a shepherd (cf. Jer 3:15). When the people lack leadership, they are considered as sheep scattered on the hills; i.e., without leadership they do not have the direction to work together to overcome obstacles (I Kgs 22:17; Num 27:17). Two of Israel's greatest leaders, Moses and David, learned to lead people by tending flocks (Ex 3:1; Ps 77:20 [H 21]; I Sam 16:11; II Sam 7:8; Ps 78:70ff.). Amos, a prophet, also was taken from tending the flock to preach in Northern Israel (Amos 7:14f.). Yahweh is pictured as the good shepherd (Ps 23:1; 80:1 [H 2]; Ezk 34:15, 31), and the people are the sheep of his pasture (Ps 95:7; 100:3; Ezk 34:31; Jn 21:15ff.). When he brings salvation, he will tenderly and strongly gather them into his arms (Isa 40:11). The coming Messiah is also anticipated as the true shepherd of the sheep (Ezk 34:23f.; cf. Jer 23:3–6; Jn 10:11, 14). Conversely, false shepherds scatter the sheep (Jer 23:1–3; 50:6; Isa 56:11f.; Jn 10:12f.). They feed themselves and not the flock (Ezk 34:2f.). The sheep flee and are threatened with destruction by numerous dangers (I Kgs 22:17; Ezk 34:5f.). The people under distress and sensing that they have been forsaken by God describe their condition as sheep led to the slaughter (Ps 44:11, 22 [H 12, 23]; cf. Jer 12:3). This same feeling was to be encountered literally by the suffering servant (Isa 53:7). These shepherds will be judged and God himself will search for his sheep, rescue them from dangerous places, and bring them back to their own land (Jer 23:3; Ezk 34:10ff.; Mic 2:12). Therefore one description of the blessings of the new age is that of flocks securely pasturing on the hills of Palestine (cf. Jer 33:12f.; Zeph 2:6).

J.E.H.

שָׂבָא (*šāb*). See nos. 1866a, 1867a.

1865 שָׂבָא (*šābā'*) fight, serve.

Derivatives

1865a שָׂבָא (*šābā'*) war, army.

- 1865b שָׁבָאוֹת (*š' bā'ōt*) *armies, hosts*.
(RSV and ASV are similar; ASV uses "hosts" more often while RSV has "army," "service," "company" and for Lord of hosts, ASV has "Jehovah of hosts"; NIV "Lord Almighty"—note Rev 4:8).

šābā' has to do with fighting, e.g. Israel warring against Midian (Num 31:7). It has also a wider use in the sense of rendering service. Interestingly four uses have to do with the work of the Levites in the tent of meeting (Num 4:23; 8:24). No doubt service for Yahweh is seen as involving total dedication and careful regimentation, and since God is Yahweh of hosts, enthroned between the cherubim housed inside the tent of meeting, work associated with the tent may be considered spiritual war. In Ex 38:8 and I Sam 2:22 a participle refers to the women who ministered at the door of the tent of meeting.

Dhorme suggests that *šābā'* may denote the length of time spent in the army. Such is its use in Job 7:1 and 14:14. In the first passage man's earthly existence is likened to hard military service. He must continually labor, endure suffering and be subject to a destiny beyond his control. In the latter passage man's tenure of abode in Sheol is described in terms of the restrictions and hardships of military service.

Translated as host(s) *šābā'* means army(ies). It can refer to any arrayed army (Jud 4:2), the inhabitants of heaven (I Kgs 22:19), or the celestial bodies (Deut 4:19). The Israelites in their wilderness journey were numbered in armies by their tribal units (Num 1:52). Since they had been slaves in Egypt, a concerted effort was made to organize them into a company. Under the monarchy the king maintained a formidable army well equipped for war (e.g. II Chr 26:11–15). Israel bore arms, but their victories resided in the fact that Yahweh as head of armies fought for them. When God fought for Israel, so did all the forces of heaven. An angel known as the commander (*šar*) of Yahweh's army appeared to Joshua to give him directions for going to battle against Jericho (Josh 5:13ff.). Unless Yahweh, head of all the armies of existence, went to battle with Israel's army, the effort ended in failure (Ps 44:9 [H 10]; cf. Prov 21:31).

The heavenly bodies, including the sun and the moon, are called the host of heaven (Gen 2:1). When referring to them the word is always singular. God created this host by his breath (Ps 33:6), and he preserves their existence (Isa 40:26). They thus serve and worship him in complete obedience (Neh 9:6; Isa 45:12). The host are identified as his ministers that do his will (Ps 103:21). Israel is exhorted never to worship them (Deut 4:19). Yet man has a tendency to worship those created

objects (II Kgs 17:16). Anyone who would lead Israel astray in this regard was to be put to death (Deut 17:2–7). Unfortunately both northern Israel and Judah succumbed to this temptation during various eras (e.g. II Kgs 17:16ff.; 21:3; 23:5). As a result, both nations were eventually devastated by their enemies. But there is a day coming when this host will cease to exist (Isa 34:4).

Yahweh of Hosts is a special name for God. Yahweh and *'ēlōhim* occur with *š' bā'ōt* some 285 times (based on Mandelkern); most frequently in Isa (62), Jer (77), Hag (14), Zech (53) and Mal (24). It is absent from the Pentateuch. Most often the word *š' bā'ōt* follows Yahweh, around 261 times; after *'ēlōhē*, 18 times; after *'ēlōhim*, 6 times. There is often a building of divine titles as: *yhwh š' bā'ōt 'ēlōhē yisrā'el*, 37 occurrences; *yhwh 'ēlōhē š' bā'ōt*, 13 (with article 3, + *'ēlōhē yisrā'el*, 3 times; + *'ādōnāy* 1); *yhwh 'ēlōhim š' bā'ōt*, 4; *'ādōnāy (hā'ādōn 5) yhwh š' bā'ōt*, 20 (1 with article); *'ādōnāy yhwh 'ēlōhē hašš' bā'ōt*, Amos 3:13; *yhwh š' bā'ōt 'ēlōhēhem* 2 (or *'ēlāy* 2, or *'ēlōhēnū* 1). For emphasis "his name" is sometimes added to these divine titles (e.g. Amos 4:13; Isa 47:4; 54:5). It is impossible to determine conclusively which formula is the source of the other. The three part formula shows that *'ēlōhē* stands in construct relationship with hosts. But it is doubtful that Yahweh is similarly in construct. Some have proposed that *ōt* is an abstract plural ending (cf. GK 124*d,e*); then *š' bā'ōt* is a noun in apposition to Yahweh: Yahweh the mightiest Warrior or Yahweh the all-powerful King. Therefore *Yahweh š' bā'ōt* has become a technical term. The LXX supports this possibility by translating *š' bā'ōt* with *sabaōth* (especially in I Sam and Isa; cf. Rom 9:29; Jas 5:4) and *pantokrātōr*, "Almighty," "All-Powerful." The LXX, however, employs *kýrios (ho) theós tōn dynámeōn*, "Lord of powers," a few times; this translation lends some support to taking hosts as a genitive after Yahweh (but cf. GK 125*h*).

This divine name appears for the first time in I Sam 1:3. Its origin appears to have been at the close of the period of the judges and in the vicinity of the sanctuary Shiloh, where the ark of the covenant was housed. The ark itself symbolized Yahweh's rulership; for he is declared to be enthroned between the cherubim (I Sam 4:4; cf. Ps 99:1). This name certainly contains the affirmation that Yahweh is the true head of Israel's armies. The idea that more than Israel's armies is encompassed in this title is clear from David's statement, "Yahweh of hosts, the God of the armies of Israel" (I Sam 17:45). Rather it affirms his universal rulership that encompasses every force or army, heavenly, cosmic and earthly. Now that Israel was emerging as a nation with international relationships, the language which

exposed the theology of its God needed to keep pace. It was important to affirm that Yahweh was not merely one warrior god among the leading warrior gods of the nations, but that he was the Supreme God. Particularly for Israel, located on the landbridge between three major continents which was constantly crossed by the armies of the great world powers, it became essential to emphasize that Yahweh was King even of the armies of these mighty empires. As a result he was sufficient to lead Israel to overcome any crisis brought on by those armies. The prophets, during the kingdom period, faced a further problem, namely that God used these mighty armies to punish Israel in their rebellion against God. Hence it was essential to point out that Yahweh indeed was the king of those nations and that he would judge them. Conversely, if Israel would not return to God, then Yahweh could employ those armies against her and reduce her to captivity (cf. Isa 10:5-34). Further for the prophets during the time of the Babylonian crises when the people were attracted to astral worship, this name conveyed clearly to the people that it was foolish to worship these stars which were merely obedient creatures to Yahweh (cf. Isa 47).

When captured in all of its thrust the name *yahweh š' bā'ôṭ* is a most exalted title. It is definitely associated with Yahweh's kingship as Isa 6:5 and Ps 84:3 [H 4] show. On a festive day before a triumphal procession entered the temple court, the chorus sang: "Lift up your heads, O gates! and be lifted up, O ancient doors! that the King of glory may come in. Who is this King of glory? The LORD of hosts, he is the King of glory!" (Ps 24:9f.). The text here clearly shows that Yahweh of hosts conveys the concept of glorious king. Yahweh is King of the world (cf. Zech 14:16) and over all the kingdoms of the earth (Isa 37:16). This God is the source of all (Jer 10:16). His rulership necessitates a time when he will visibly display that lordship. In the last days the nations will wage war against Mount Zion. They will think they have won, only to come to the realization that their imagination has outdistanced their accomplishment. At that time Yahweh will lead a great army into battle aided by the forces of nature. Every opponent in heaven and on earth will be subjugated (Isa 13:4; 24:21ff.; 29:5-8; 31:4f.; 34:1-12). Then Yahweh will visibly manifest a universal reign from Mt. Zion. All kings and nations will acknowledge that the Yahweh of hosts is the king of glory. His total authority and lordship will be eternally established.

Although the title has military overtones, it points directly to Yahweh's rulership over the entire universe. He continually rules, but at times he directly intervenes to secure his own victory and insure the direction of history for the salva-

tion of his people. In Amos 4:13 it is associated with his creating the mountains and wind and his ability to control nature (cf. Amos 5:8f.; 9:5f.). He is master over every force; he alone secures peace. To him prayer may be addressed (e.g. Ps 80:19 [H 20]). Special attention is given to the majestic splendor of Yahweh's rule in this title (cf. Ps 84:1 [H 2]; Isa 28:5f.).

צָבָאוֹת (š' bā'ôṭ). See no. 1865b.

1866 צַב (šbb) I. Assumed root of the following.

1866a צָב (šāb) *litter, covered wagon* (Num 7:3; Isa 66:20).

1867 צַב (šbb) II. Assumed root of the following.

1867a צָב (šāb) *lizard* (Lev 11:20).

1868 צָבָה (šābā) I, *swell, swell up* (Num 5:27; Isa 29:7).

Derivative

1868a צָבָה (šābeh) *swelling, swollen* (Num 5:21).

1869 צִבָּה (šbh) II. Assumed root of the following.

1869a צִבִּי (š' bī) *beauty*. (ASV, RSV similar; most often "glory" or "glorious"; ASV once "goodly," Jer 3:19.)

The best in regards to splendor and honor is referred to as beautiful or glorious: the promised land (Ezk 20:6, 15; Dan 11:16, 41), the temple mount (Dan 11:45), the strategic cities of Moab (Ezk 25:9), Babylon, the greatest nation (Isa 13:19). Yahweh will destroy all beauty that has its own source (Isa 23:9; 28:1-4). But he will be a crown of beauty to his remnant (Isa 28:5). His branch also will be beautiful in his reign (Isa 4:2;

1870 צבה (*šbh*)

cf. 24:16; II Sam 1:19 "glory" refers to King Saul).

J.E.H.

1870 צבה (*šbh*) III. Assumed root of the following.

1870a צבי (*š^cbi*) gazelle.

1870b צביה (*š^cbiyā*) gazelle (Song 4:5; 7:4).

צבוע (*šābūa'*). See no. 1872b.

צבור (*šibbūr*). See no. 1874a.

צבי (*š^cbi*). See nos. 1869a, 1870a.

1871 צבט (*šābat*) reach, hold out (Ruth 2:14).

1872 צבע (*šb'*) I. Assumed root of the following.

1872a צבע (*šeba'*) dye, dyed stuff (Jud 5:30).

1872b צבוע (*šābūa'*) colored, variegated (Jer 12:9).

1873 צבע (*šb'*) II. Assumed root of the following.

1873a אצבעט (*'ešba'*) finger (ASV and RSV identical.)

The word is used in a normative sense for measuring width, about three-quarters inch (Jer 52:21), and for the priestly activity of sprinkling blood or oil (Lev 4:6, 17; 14:16; 16:14). In addition, "finger(s)" refer to work artfully produced, especially in regard to God. They refer to the handiwork of his creative power, e.g. the heavens (Ps 8:3; [H 8:4]), the plagues (Ex 8:19), and the Law on the stone tablets (Ex 31:18; cf. Lk 11:20). In regard to man, it often deals with his artistic work which is contrary to God, as the making of idols and cultic objects (Isa 2:8; 17:8). These and other sins defile the finger; this expression means man is separated from approaching God, especially cultically (Isa 59:3). Rather, the fingers should have the instructions of the wise teacher bound to them (Prov 7:3). Further, "pointing of the finger" is a gesture of contempt made by the self-righteous (Isa 58:9; cf. Prov 6:13, which some, as McKane, interpret as a practice of magic).

J.E.H.

1874 צבר (*šābar*) heap up (Gen 41:35; Ps 39:7).

Derivative

1874a צבור (*šibbūr*) heap (II Kgs 10:8).

1875 צבת (*šbt*). Assumed root of the following.

1875a צבתיים (*š^cbātim*) bundles of grain (Ruth 2:16).

צבתיים (*š^cbātim*). See no. 1875a.

צד (*šad*). See no. 1876a.

1876 צדד (*šdd*). Assumed root of the following.

1876a צד (*šad*) side.

1877 צדה (*šādā*) I, lie in wait (Ex 21:13; I Sam 24:11).

Derivative

1877a צדיה (*š^cdiyā*) lying in wait (Num 35:20, 22), with malicious intent.

1878 *צרה (*šādā*) II, lay waste. This verb occurs only in the Niphal, in Zeph 3:6.

צדיה (*š^cdiyā*). See no. 1877a.

צדיק (*šaddiq*). See no. 1879c.

1879 צדק (*šādēq*) be just, righteous. Denominative verb.

Parent Noun

1879a צדק (*šedeq*) justice, rightness.

1879b צדקה (*š^cdāqā*) justice, righteousness.

1879c צדיק (*šaddiq*) just, lawful, righteous.

This root basically connotes conformity to an ethical or moral standard. It is claimed by Snaith (N. Snaith, *Distinctive Ideas of the OT*, Schocken, 1964, p. 73) "the original significance of the root *šdq* to have been "to be straight." But he adds that it stands for a "norm." Perhaps the origin of the word is not so clear or even significant. Words having a secular origin often are baptized into special meanings and a word originally meaning straight may develop easily into a moral term just so *canon* "rod," "measuring rule" becomes a standardized list of sacred books. *šedeq*, then, refers to an ethical, moral standard and of course in the OT that standard is the nature and will of God. "The Lord is righteous (*šaddiq*) in all his ways and holy in all his works" (Ps 145:17).

The masculine *šedeq* occurs 118 times, the feminine *š^cdāqā* 156 times. The two forms do not differ in meaning, as far as we can prove (Snaith, *ibid.*, p. 72).

The earliest usages of *šedeq* or *š^cdāqā* (except Gen 15:6; 18:19; 30:33, *š^cdāqā*) occur in relation to the functions of judges. All of their deliverances or decisions are to be according to the truth and without partiality (Lev 19:15). It is applied similarly to weights and measures (Lev 19:36).

Commercial fraud and deception are not allowed. In both these usages is seen the basic sense of "not deviating from the standard." The word describes three aspects of personal relationships: ethical, forensic, and theocratic.

The ethical aspect involves the conduct of men with one another. It is held by some (Achtemeier, *The Gospel of Righteousness*, pp. 68–70) that righteousness is the quality of relationships between individuals. What follows from this view, however, is that righteousness is a matter of current norms. Actually, righteousness is exhibited only through conformity to standards set out in the word of God.

The man who is righteous tries to preserve the peace and prosperity of the community by fulfilling the commands of God in regard to others. In the supreme sense the righteous man (*ṣaddiq*) is one who serves God (Mal 3:18). Specifically, he, like Job, delivers the poor and orphan, helps the blind along the way, supports the weak and is a father (provider) to the poor (Job 29:12–15). This was the righteous "clothing" of Job's life. To return the poor man's pledged coat before sundown so that it may serve as his night clothes is righteousness (Deut 24:13), the purpose in this case being the man's comfort. But the "righteousness" consisted in obedience to God's law and conformity to God's nature, having mercy for the needy and helpless. Among other righteousnesses of Job were his care for the traveler (Job 31:31–32), eschewing wealth for its own sake (31:24–25), thus not victimizing himself or others in its pursuit. Nor did he squeeze out of his servants the last ounce of effort (31:13) having their limits of strength and comfort in mind. Job's long oath of innocence was a declaration of righteousness as the three friends recognized (32:1).

The *ṣaddiq* gives freely (Ps 37:21), without regard for gain. The presence of this kind of people is the exaltation of the nation (Prov 14:34), and the memory of the righteous man is a blessing. When men follow God, righteousness is said to dwell in the city (Isa 1:21). But when sin rules, it becomes a harlot. To rule on behalf of the wicked for a price is perversion of righteousness, for it takes away the righteousness (decency, God-likeness) of the righteous (Isa 5:23). David was (more) righteous than Saul because he refused to slay Saul when unprotected (I Sam 24:7), although God seemingly had given Saul into his hands. The source of all this righteous conduct is the bestowal of God's judgments (or laws) and righteousness on his people (Ps 72:1–2).

The above discussion elucidates the message of the prophets, whose cry for righteousness rang throughout the land. Amos cried for justice in the gates (5:15, 24) that is, that right institutions be rightly administered. All who function in public areas are to be righteous in all they do—not for all

they do. Beautiful singing will not persuade God to accept corrupt religious practice (Amos 5:23–24). Jeremiah declares that justice and righteousness together means to deliver the weak, to do no violence to them, nor to shed innocent blood. This righteousness will preserve the city (Jer 22:1–4).

Whether by nations or individuals, righteous conduct can only be secured by plowing up fallow ground, sowing in righteousness, and reaping in mercy, i.e. making a new base for righteousness (Hos 10:12). All must become new persons whose actions are governed by the law of God. Righteous conduct issues from a new heart (Ezk 36:25–27). Habakkuk puts it another way: the just shall live by his faith (Hab 2:4). Isaiah (32:15–17) couples righteousness with the work of the Spirit, all resulting in peace and therefore eternal, assured quietness. It is possible that this thought lies behind the figure in Ps 85:10 [H 11], "Righteousness and peace have kissed each other." Because there has been reconciliation between man and God, peace comes to bless his way. Isaiah apparently refers to the state of these people: "thy people shall all be righteous." True ethics derive from imparted righteousness.

The forensic aspect of *ṣedeq* applies to the equality of all, rich and poor, before the law. The righteous one, the *ṣaddiq*, is not to be put to death (Ex 23:7) for the law does not condemn him. The man who has the position of right (the righteousness of the righteous, *ṣid' qat ṣaddiq*) in litigation must not be turned aside, (Isa 5:23). It should be emphasized that in Israel's law the judge was not considering a man's innocence with regard to breaking a human law, but a man's righteousness in regard to God's law. Today a man may transgress a statute but be innocent before God. In the OT law, to be innocent and to be righteous were one and the same. The maintenance of righteousness is frequently expressed by the Hiphil stem. This construction refers to making righteous or to declaring righteous.

The comparative status of right is expressed by Judah in comparison to Tamar (Gen 38:26), i.e. she was within her rights to act as she did, Judah was not. But this is not a total approbation of her actions. A just or true claim is a "righteousness" (Ps 17:1; 18:20 [H 21]), always opposing the lie (Ps 37:6). In terms of an individual involved in litigation, to be righteous means to be free from guilt in relation to any infraction of law (Gen 30:33). One is righteous who is declared to be right (Ex 23:7; Deut 25:1). Such is Job's affirmation (Job 19:7) (cf. *The Argument of the Book of Job Unfolded*, W. H. Greeves [New York: 1891], p. 188. It is the duty of judge and king to maintain righteousness in the community; Ex 23:7–8; I Chr 18:14; Prov 16:12).

Noah, Daniel, and Job were righteous (Ezk

14:14, 20). Good conduct by an individual establishes a claim on the Lord of deliverance from calamitous judgment. Similarly, Gen 15:6 teaches that Abraham received Isaac as his heir because his trust in God's promises was accounted as righteousness.

sedeq is used attributively when applied to God himself as to his character. The Lord is the just judge (II Chr 12:6; Ps 11:7; Jer 12:1; Lam 1:18) even to the utmost degree as the judge of all the earth (Deut 32:4; Ps 119:137; Isa 5:16). Therefore his standards, his judgments set out in his word are righteous (Ps 119:144, 160, 172). Being everlasting, they are the confidence of his people and will not fail. God's hate of sin and love of righteousness (Psa 45:7 [H 8]) express his essential righteousness. Therefore righteousness and judgment are the habitation ("foundation" NASB, NIV) of God's throne, i.e. they always characterize his actions (Ps 97:2).

Corollary to the forensic aspect of God's righteousness is the concept of salvation as vindication (cf. Isa 1:27; 46:13, in which *šū'ā* "salvation" occurs in parallelism with *š' dāqā*). The salvation of God appears in this righteousness, for God delivers his people (Isa 51:1ff.). God is characterized as right in delivering his people (Ps 85:9–11 [H 10–11]; 97:2). Cyrus is summoned to deliver God's people and is therefore termed righteous (Isa 42:6; 45:13). Because God is always righteous, his saving action is properly signified by his righteous right hand (Isa 41:10). His saving righteousness is expressed with judgment, fidelity, and love (Ps 36:6–7 [H 7–8]) and with power (Ps 71:19). Those who experience this deliverance celebrate it in song (Ps 40; 10 [H 11]; 71:15–16).

The covenant or theocratic aspect involves the nation of Israel. The covenant requires obedience to God by the nation and is the way of his people (Ps 1:1–6; Deut 6:25), a way of righteousness. God is righteous, under the covenant, when he delivers his people from trouble (Ps 31:1 [H 2]), their enemies (Ps 5:8 [H 9]), the wicked (Ps 37:6) and when he is vindicating Israel before her foes or executing vengeance on them (Jer 11:20). It is appropriate that Israel be assured of ultimate victory over her foes (Isa 54:14–17). In this last event the Lord is both righteous and the savior (Isa 45:21).

Yet God is just to deliver the national sanctuary to the sword of Israel's enemies on account of her sins. God's judgment is just and Israel's evil conduct can in no way be justified i.e. considered righteous. But the righteous ones remember the covenant to do it, and God's promise to them is their restoration (Isa 51:1–8). For Israel to look to her maker involved repentance and reform. On the basis of this new righteousness came a deliverance. Israel in exile was far from righteousness (Isa 46:12) but God would bring her

back according to his own righteousness (Isa 46:13). Rather than finding here a meaning of deliverance, salvation or triumph for *š' dāqā* as some do, it is better to find God's solution of the problem of justification for the sinner in the teaching of Isa 53 where the suffering servant justifies sinners by bearing their sin. This same forensic meaning of justification of the ungodly is a real precursor of Rom 3:26. So Israel's restoration to the land of promise is righteousness (Isa 46:12–13) and it is in righteousness that the Lord raises up Cyrus to restore Israel to the land (45:13). Such righteousness will be set out before all the world, for God will help Israel. In this fulfillment of the covenant God is declared righteous (Isa 54:14), and Israel's status is that of being righteous, *šaddiq*.

The root presents a development or variety of usage. 1. The abstract meaning of conformity to some standard (Gen 15:6), Abraham measuring up to the requirement of trust. 2. As a descriptive characteristic of God (Deut 32:4), as just and righteous, the standard being his own will and nature as the supreme being. The illustration of the potter and the clay, (Isa 45:9–12) points to the appropriateness of the divine decision. 3. *š' dāqā* or *sedeq* when applied to God mean righteousness, his characteristics then becoming the ultimate standard of human conduct. 4. The visitation of punishment on moral infractions is an example of righteousness, as were God's judgments on Pharaoh for refusing to release the Israelites (Ex 9:27). To judge sin is, one may say, a divine necessity for a righteous God. 5. God shows his righteousness in vindicating the deserving among his people (Gen 18:25). Although that righteousness may require punishment, it is followed by mercy on repentance. 6. The work of justification is seen when David pleads for forgiveness (Ps 51:14 [H 16]), calling on God to bestow deliverance without regard to merit to fulfill his obligation to his own standards. Implicit in this justification is the substitutionary sacrifice for sin sincerely offered as noted in Ps 51:16–19 [H 18–21]. These verses are no later addendum to the Psalm. They give the OT parallel to Rom 3:26. 7. The word describes the righteous standing of God's heirs to salvation, with no charge to be laid against them (Isa 54:17), this righteousness, actually possessed by Messiah (Jer 23:6), is bestowed by him, thus pointing toward the NT doctrine of Christ our righteousness. The righteousness of God's heirs of salvation is the righteousness of the Messiah attributed to them by God through faith in the redemptive work of Messiah in which God declares them righteous only because of the grace provided through that redemptive work. 8. Finally in post-exilic times the root develops to mean benevolence, alms-giving etc. as acts of a godly man (cf. Ps 112:9).

There are different concepts of the meaning of

this root. G. Schrenk cites Diestel and Kautzsch as working out "thoroughly the idea of the consistent and normative action of God (God himself being the norm rather than standing under it)" (TDNT, II, p. 195). Schrenk himself, however, declares that "š' *dāqā* implies relationship. A man is righteous when he meets certain claims which another has on him in virtue of relationship" (ibid.). He does not attempt to prove this concept of relationship, but he bases much on the idea that "Deutero-Isaiah" always uses the image of a legal dispute whereby God defends the people under covenant to him much as an ancient eastern suzerain promised to do in a suzerainty treaty. This covenant concept is so paramount in Schrenk that he can say: "This linking of right and salvation is most deeply grounded in the covenant concept. š' *dāqā* is the execution of covenant faithfulness and the covenant promises. God's righteousness as His judicial reign means that in covenant faithfulness to His people He vindicates and saves them" (ibid.). By this emphasis on the covenant, God's righteousness becomes fidelity to promises and there is no eternal justice of God to be satisfied by a substitute. Indeed, rescue of the covenant people from trouble is both righteousness, salvation, and victory.

Snaith writes from a similar viewpoint. He holds that "the eighth century prophets use the word *šedeq-š' dāqā* (righteousness) in an ethical sense. . . . Second Isaiah thought of *šedeq* more from the point of view of that which actually is established in this world. It is that which triumphs and prospers" (op. cit., p. 87). In a note (p. 89) he argues that only in the very late passages of Isa 26:19 (Trito Isaiah, third century) and Dan 12:2 (which he holds is Maccabean) is there any teaching of a "resurrection life beyond the grave." Therefore (since the other verses on resurrection are retranslated and their teaching denied) he says that righteousness, i.e. salvation, for the Israelite "must involve the blessings of honor from men and general prosperity." The biblical declaration of the personal righteousness of the living God is thus evaporated by critical theory.

H.G.S.

- 1880 *צָהַב (*šāhēb*), צָהֹב (*šāhōb*) *gleam*. Occurs only in the Hophal, in *Ezr* 8:27.

Derivative

- 1880a צָהֹב (*šāhōb*) *gleaming, yellow* (of hair, *Lev* 13).

- 1881 צָהַל (*šāhal*) *I, neigh, cry shrilly* (*Est* 8:15; *Isa* 24:14).

Derivative

- 1881a מִצְהָלָה (*mišhālā*) *neighing* (*Jer* 8:16; 13:27).

- 1882 *צָהַל (*šāhal*) *II, make shining*. Occurs only in the Hiphil, only in *Ps* 104:15).

- 1883 צָהַר (*šhr*). Assumed root of the following.

- 1883a צָהַר (*šōhar*) *I, noon, midday*.

- 1883b צָהַר (*šōhar*) *II, roof* (*Gen* 6:16).

- 1883c יִצְהָר (*yishār*) *fresh oil*.

- 1883d *צָהַר (*šāhar*) *press oil*. Denominative verb. Occurs only in the Hiphil, only in *Job* 24:11.

šōhar. *Noon, midday.* (ASV, RSV similar; they use "noonday"; ASV also "noontide.") Noon, being the hottest part of the day, is siesta time (*II Sam* 4:5). The brightness of that hour symbolizes the intense purity of justice (*Ps* 37:6; cf. *Job* 11:17) and the blessing that dispels gloom (*Isa* 59:10). It is also viewed as a time of security; thus a conquest carried on at this time indicates a conqueror's superior strength (*Jer* 6:4; 15:8; 20:16; *Zeph* 2:4). Conversely, the rebellious grope in darkness even at noonday (*Deut* 28:28f.; *Isa* 58:10; *Job* 5:14). Since the sun will set at noon on the day of judgment, the troubles of that day will be very severe (*Amos* 8:9).

yishār. *Fresh oil.* (ASV and RSV identical.) Oil provides light, is used for cooking, and serves as an ointment. BDB considers it to be "fresh oil," the unmanufactured product of the olive tree. It almost always appears with grain (*dāgān*) and new wine (*tirōsh*) (q.v.) these three agricultural products were the staples for the inhabitants of Palestine. Therefore the government had storehouses built for them (*II Chr* 32:28). These three products were guaranteed to Israel as God's blessing for fulfilling the covenant (*Deut* 7:13; 11:13f.), but were withdrawn when Israel failed to obey (*Deut* 28:49ff.). The first fruits of the grain, new wine, and oil were presented to the

priests as God's representatives (Deut 18:4; Num 18:12f.). Under the reforms of King Hezekiah and of governor Nehemiah, the people demonstrated their desire to follow the covenant by bringing abundantly of their first fruits to the priests (II Chr 31:5; Neh 10:35–39 [H 36–40]; 13:12). Unfortunately during other periods the people forgot that Yahweh gave them the grain, new wine and oil (Hos 2:8 [H 2:10]). Since they forsook Yahweh, he in turn forsook them by bringing drought and loss of crops (Joel 1:10). Yet God never completely forsook his people. Through his prophets he foretold of a coming time when he would restore Israel to their land and bless them with abundance of grain, new wine and oil (Joel 2:19, 24; Hos 2:22 [H 24]; Jer 31:12 NIV). The blessing would be so abundant that Israel's needs would be satisfied and their reproach would be completely removed (Joel 2:19). Only in Zech 4:14 is *yīšhār* used in the sense of anointing; "sons of oil" = "anointed ones."

J.E.H.

צוֹ (šaw). See no. 1887c.

1884 צוֹא (šw'). Assumed root of the following.

- 1884a צָאָה (šē'ā) *filth*, i.e. human excrement (Deut 23:13; Ezk 4:12).
 1884b צָאָה (šō'ā) *filth* (Isa 28:8; Prov 30:12).
 1884c צָאִי (šō'i) *filthy* (Zech 3:3).

צָאָר (šawwār). See no. 1897c.

1885 צוֹר (šūd) I, *hunt*.

Derivatives

- 1885a צִיד (šayid) *hunting, game*.
 1885b צַיִד (šayyād) *hunter* (Jer 16:16, only).
 1885c מְצֹד (m'šād) מְצֹד (m'šad) *fastness, stronghold* (I Chr 11:7; 12:8 [H 9]).
 1885d מְצֹד (māšōd) I, *siegeworks* (Eccl 9:14).
 1885e מְצֹד (māšōd) II, *hunting implement, net* (Prov 12:12; Job 19:6).
 1885f מְצֹדָה (m'šōdā) I, *net* (Eccl 9:12; Ezk 19:9).
 1885g מְצֹדָה (m'šūdā) I, *net prey* (Ezk 13:21; Ps 66:11).
 1885h מְצֹדָה (m'šōdā) II, *fastness, stronghold* (Isa 29:7; Ezk 19:9).
 1885i מְצֹדָה (m'šūdā) II, *fastness, stronghold*.

Hunting was a means of supplementing the food supply and also provided a pleasant change of menu. Nimrod, the founder of a kingdom in

Babylon and Assyria, was known as a mighty hunter, and his skill became the basis of the proverbial saying, "Like Nimrod a mighty hunter before the Lord" (Gen 10:9). Esau distinguished himself from Jacob, especially in his father's eyes, as a good hunter (Gen 25:27f.). Hunting was often done with nets and various types of traps, as the two derivatives meaning "net" indicate. Under the Levitical code hunting of clean birds and beasts was permitted; the hunter had to prepare the game that was killed by pouring out its blood and covering it with dirt (Lev 17:13; Deut 12:15; 14:5 (a list of clean game)). In addition, Prov points out that the hunter must be diligent, for the "slothful man will not catch his prey" (Prov 12: 27 RSV).

This root is used metaphorically to indicate one who pursues the life of another to destroy it. The adulterous woman stalks a man's very life; i.e. she yearns for more than he can provide and she holds power over his whole life (Prov 6:26). Even more intense than she is is the woman who through magic hunts the souls of God's people (Ezk 13:18). God is against them and will free the hunted souls (Ezk 13:20). God too pursues man, especially in judgment (Jer 16:16; cf. Job 10:16). Because of Israel's waywardness God decreed, "I will send for many hunters, and they shall hunt them from every mountain and every hill, and out of the clefts of the rocks" (Jer 16:16). Lam says that this assertion became the experience of the people, "I have been hunted like a bird by those who were my enemies without cause" (Lam 3:52).

m'šūdā II. *Stronghold, fortress*. (ASV and RSV similar: ASV also "high tower.") Apparently related to m'šād which means "mountain-height" or "summit"; then "fortress, castle" (Arabic *mašādun*) so Mašada, the fortress-palace plateau of Herod near the Dead Sea. In the rocky crag the eagle makes his stronghold (Job 39:28). But man erects his fortress out of stone or brick to protect himself from external dangers. Nevertheless with great strategy a stronghold may be taken: e.g. David captured the stronghold of Zion (II Sam 5:7). For the believer, especially David, God himself was the stronghold in whom he trusted throughout his trials (Ps 18:2 [H 3]; 91:2).

J.E.H.

1886 צוֹד (šwd) II. Assumed root of the following.

- 1886a צִיד (šayid) *provision, food* (Neh 13:15; Job 38:41).
 1886b צִדָּה (šēdā) *food* (Josh 1:11; Gen 42:25).
 1886c צִידָּה (šid) *supply oneself with provisions*. This denominative verb

occurs only in the Hithpael (Josh 9:4, 12).

1887 *צַוָּה (šāwā) *command, charge*. Occurs in the Piel and Pual.

Derivatives

1887a צִיּוֹן (šīyūn) *signpost, monument* (II Kgs 23:17; Ezk 39:15).

1887b מִצְוָה (mišwā) *commandment*.

1887c צַוָּה (šaw) *command*.

Command is used for the instruction of a father to a son (I Sam 17:20), a farmer to his laborers (Ruth 2:9), a king to his servants (II Sam 21:14). It reflects a firmly structured society in which people were responsible to their right to rule by God's command (cf. II Sam 7:7; I Kgs 1:35). The leader was then in a position to command the people and to expect their obedience (Josh 1:9, 16). God commissioned Joshua to succeed Moses (Num 27:18f.; Deut 31:14f.). When God chose David to be king, he "commanded him" (commissioned him as) prince (*nāgīd*, I Sam 13:14). The prophet's word possesses authority, because he speaks whatever God commands him (Jer 1:7; cf. Deut 18:18).

God "commanded" the world into existence (Ps 33:9; Isa 45:12). All creatures and elements therefore obey his command (cf. I Kgs 17:4; Job 37:12; Ps 78:23). God also directs the course of history by decreeing crucial events; indeed no determinative event happens without God's ordaining it (Lam 3:37). Indeed he decrees that his people be victorious (Ps 44:4 [H 5]).

What God commands to be done, he provides the means to accomplish, e.g. he instructed Moses concerning the building of the cultic furniture and buildings; then he inspired Bezalel and Oholiab with the Spirit of wisdom to be able to accomplish the work (Ex 31:2-6; 35:30-36:1). Regarding the making of these objects the text first details the instructions and then describes Israel's careful fulfillment of God's commandment (Ex 25-30; 36-39; Lev 8; cf. Ex 39:5, 7, 32, 42f.).

God insures the truth of his word by commanding it; he commanded the covenant (Ps 105:8; 111:9) and will command blessing to those faithful to the covenant (Deut 28:8; Ps 133:3). God remembers what he has commanded and is careful to fulfill every part of his side of the command decreed (I Chr 16:15).

Blessing accompanies obedience to God's commands; rebellion, however brings curses (Deut 11:26ff.). Adam and Eve disobeyed and encountered curses (Gen 3:16-19). In contrast, God commanded Noah to build an ark; Noah did all that God commanded and survived the flood (Gen 6:22; 7:5). Israel obeyed the commands of God at the Exodus, particularly regarding the Passover, and they escaped their enslavement

(cf. Ex 12:28, 50). But unfortunately Israel was prone to leave the way God directed (cf. Deut 31:29). To follow his commandments results in a good and long life (Deut 5:33). Therefore, Israel was not to deviate to the right or to the left from what God commanded them (Deut 5:32). Obedience to God's command becomes the obedient one's righteousness (Deut 6:25).

God instructed Hezekiah, who was suffering from a fatal illness to command his house; i.e. he was to make sure all his responsibilities were executed or properly entrusted to his successors (II Kgs 20:1). Jacob also gave orders to his sons concerning his burial (Gen 49:29, 33).

mišwā. Commandment. In a deed of purchase for a plot of land, *mišwā* refers to the terms of the contract (Jer 32:11). It is also the word used by the wisdom school for the instruction of a teacher to his pupil (Prov 2:1; 3:1). More frequently the commandments are the particular conditions of the covenant. It is used for the Ten Commandments in Ex 24:12.

God clearly reveals his commandments in order that they be available to all the people. No one has to spend a lifetime in search of them (Deut 30:11). They are right at hand. The Lord reaches out to man long before man seeks him. God's commandments are considered pure (Ps 19:8 [H 9]), true (Ps 119:151), reliable (Ps 119:86), righteous (Ps 119:172). The man of faith has his delight in God's commandments; and he is called blessed (Ps 119:47; 112:1). The commandments of Yahweh provide insight into the meaning of life in order that it may be lived to its fullest significance (Ps 19:8f. [H 9f.]; cf. Deut 5:29; 6:2; 8:11). Following God's commandments gives one wisdom and the respect of his neighbors (cf. Deut 4:5f.). Consequently the one who follows them often rises to a place of leadership. So too, Israel would become a leading nation if she remained true to the Lord's commandments (Deut 28:13). The splendor which it experienced under David and Solomon bears witness to the validity of this affirmation. The reason Israel was to obey the commandments rests in God himself (Lev 22:31). By his very nature he knows what is best for his people and by his very position they are bound to serve him. The one who loves God keeps his commandments (Deut 11:1). Thereby he shows his reverence for (or fear of) God and develops a walk with God (Deut 8:6; 13:4 [H 5]). God extends his love (*hesed*) to those who obey him (Deut 5:10).

To do the commandments, man must remember them. The Hebrews were to make fringes (or tassels) on the corners of their garments to remind them of the law (Num 15:39). Also they were to bind God's words on their foreheads and on their hands and write them on the doorposts of their houses. The fathers were to

teach them to their sons and to speak of them frequently (Deut 6:6-9). And they were preserved by being written in the book of the law (Deut 30:10). However, the commandments possess no real value if they are considered only a human document learned by rote (Isa 29:13f.).

Furthermore, man in his depravity is tempted on the one hand to reject God's commandments and on the other hand to add to them by interpreting them very minutely. The latter leads to the sense of secure arrogance that one is even doing God a favor. Therefore God declares that one is not to add to or to diminish from the commandments given (Deut 12:32 [H 13:1]; cf. 5:32).

The violation of any commandment results in guilt and the need for atonement (cf. Lev 4). But whoever goes so far as to spurn God's commandments is cut off from God's people (Num 15:31). Solomon's failure to follow the commandments in his later life resulted in the division of the kingdom (II Kgs 11:31-39; 14:8). Then the continued disobedience of various kings, especially Manasseh, led to the end of David's dynasty. But God extended his mercy to Israel even in captivity (cf. Neh 1:8f.). And he will fulfill his promise to David through the Messiah.

In the postexilic period the scribal class developed. They were skilled in the commandments, i.e. they interpreted the law for the people (Ezr 7:11).

The writer of Eccl searched every possibility for meaning to life and came to this conclusion: "The end of the matter; all has been heard. Fear God, and keep his commandments; for this is the whole duty of man" (12:13).

saw. Command. (ASV, RSV "precept" in Isa 28:10, 13.) In Isa 28:10, 13 the word appears parallel to *qaw* ("line," q.v.). Some suggest these are elliptical sarcastic mimicries mocking a prophet's speech. One suggestion is the sound of a teacher and pupil constantly reciting the alphabet. Another possibility is a sound alluding to the root *š-w-h*, "command." Another is that it is baby talk. The context is clear; the people are ridiculing Isaiah's message as meaningless tidbits (v. 10); he in turn announces that these tidbits will be the standard by which they will be judged (v. 13). In Hos 5:11 *šāw* ("he was content to walk after man's command" ASV) is emended with LXX to *šāw* ("he was determined to go after vanity" RSV). If *šaw* means worthless and *qaw* is a measuring line used to mark off something for destruction, then the play on sounds in Isa 28:10, 13 draws from the vocabulary of judgment.

צוה (*šwh*). See no. 1909.

1888 צָוָה (*šāwah*) *cry aloud* (Isa 42:11, only).

Derivative

1888a צֹהָה (*š'wāhā*) *outcry* (Jer 14:2; Ps 144:14).

1889 צִיל (*šwl*). Assumed root of the following.

1889a צִלָּה (*šulā*) *ocean-deep* (Isa 44:27).

1889b מְצִלָּה (*m'šölā*), מְצִלָּה (*m'šulā*) *depth, deep* (Job 41:23; Ex 15:5).

1889c מְצִלָּה (*m'šulā*) *basin, hol-low* (Zech 1:8). Meaning doubtful.

1890 צֹם (*šûm*) *fast*. (ASV and RSV identical.)

Derivative

1890a צֹם (*šôm*) *fast, fasting*. (ASV and RSV identical.)

Fasting is depriving the body of nourishment as a sign that one is experiencing great sorrow. Mourning is further expressed in weeping and lamentation and in putting on sackcloth and ashes (Est 4:3). He who fasts claims to afflict himself or his soul, i.e. his inner person. One could fast in behalf of another, e.g., the Psalmist for his enemies during their illness (Ps 35:13). The fast most often lasted from sunrise until sunset (cf. II Sam 1:12), and it could be total or partial abstinence (Ps 35:13; Dan 10:3). Fasting accompanied mourning for the dead, and for severe grief it lasted seven days (I Sam 31:13). One also fasted to gain the attention of God on behalf of his suffering in sickness. David's illegitimate son by Bathsheba was critically ill; therefore David fasted and mourned many days (II Sam 12:16ff.). On the seventh day David learned that the child had died; then he arose, washed, anointed himself and changed his clothing, for he perceived that he could accomplish nothing now that the child was dead (II Sam 12:20-23).

Another occasion for fasting was making a critical decision or following an ominous course of action. Esther, intending to seek the king's favor in reversing the decree of Haman, placed herself under the king's mercy and possible wrath which could end in her death. Therefore she requested that all the Jews fast and entreat God for her mission (Est 4:16). Nehemiah fasted upon learning of the sorrowful condition of Jerusalem (Neh 1:4), and then proceeded to work to correct the situation. Apparently before a person was stoned for blasphemy, the people mourned the sin and coming execution with fasting. Jezebel proclaimed such a fast for Naboth (I Kgs 21:9, 12). Also upon learning of one's sin, fasting is in order. When Elijah condemned Ahab for Naboth's death, he mourned in sackcloth and fasted. God

had mercy on him and delayed the punishment on his house (I Kgs 21:27ff.).

An individual could intercede in supplication and fasting for an entire nation. Daniel confessed his sin and his people's sins that had led them into captivity (Dan 9:3–19). Gabriel answered his prayer, assured him of the ending of the captivity and promised the establishing of a new covenant (Dan 9:22–27).

National fasting was called during times of extreme crisis, such as a plague, a military threat or the death of a king. Jehoshaphat proclaimed a fast because the kings of Moab and Ammon were planning a campaign against Judah. The people assembled at Jerusalem. Jehoshaphat led the assembly in prayer. Then Jahaziel, a Levite, under the inspiration of the Lord's Spirit, proclaimed an assurance of salvation. Prayer and enthusiastic praising followed. Afterwards Jehoshaphat led the army to war, but Yahweh had already discomfited the enemies; the army had only to collect the spoil (II Chr 20:1–29). In 604 when the Babylonian army was camped against Ashkelon, about a three day march from Jerusalem, King Jehoiakim proclaimed a fast. Jer used this occasion to have Baruch read his prophecies from a scroll before the people near the New Gate of the temple (Jer 36:1–10). Jer wanted the people to move from an outward show of contrition to true repentance. On another occasion, Joel foresaw the coming of the Day of Yahweh; therefore he exhorted the people to sanctify a fast and call a solemn assembly (Joel 1:14; 2:15). He proclaimed that if the people would truly repent in mourning and fasting, then God would be gracious and postpone the day of judgment (Joel 2:12–14). The case of Nineveh shows God's desire to extend mercy and not judgment. On hearing the proclamation of judgment by Jonah, the Ninevites proclaimed a fast and repented. Thereby they averted for a time the day of judgment (Jon 3:5–10).

Certain days in the calendar were for national fasting, the most prominent being the Day of Atonement (Lev 16:29, 31; 23:27–32; fasting is indicated in the phrase "afflict oneself," *nh nps*). The number of these days appears to have grown in the post-exilic period. Zech 8:19 lists four fast days during the year. A fast day precedes the celebration of Purim (Est 9:31). By the time of the NT the pious fasted on Monday and Thursday of every week (cf. Lk 18:12).

Fasting in itself did not cause Yahweh to turn to his people. He did not succumb merely to the afflictions of the body. A true fast had to indicate that the people were intent on seeking righteousness, which included taking care of the poor and needy (Isa 58; cf. Jer 14:12; Zech 7:5). However, when the Lord brings final salvation to his people, the months of fast will be turned into feasts of joy and gladness (Zech 8:19).

J.E.H.

1891 צִיץ (*šw'*). Assumed root of the following.
1891a צִצְצִים (*ša'āšū'im*) *things formed, images* (II Chr 3:10, only).

1892 צִיץ (*šûp*) *flow, overflow* (Lam 3:54; Deut 11:4).

Derivatives

1892a צִיץ (*šûp*) *honeyscomb* (Prov 16:24; Ps 19:11).

1892b צִפָּה (*šāpâ*) *outflow* (Ezk 32:6).

1893 צִיץ (*šûš*) *I, blossom; shine, sparkle.*

Derivative

1893a צִיץ (*šîš*) *blossom, flower, plate.*

The verb *šûš* refers to the growth of plants and to the gleam of a crown. The crown of the ruler of Zion shall shed its luster in contrast to the shame with which his enemies will be clothed. Injustice too may blossom forth, but God comes to destroy it on the day of doom (Ezk 7:10).

šîš. Blossom, flower, plate. Within the temple built by Solomon, the cedar was carved in the form of gourds and open flowers (I Kgs 6:18). Also on the wall were carved figures of cherubim, palm trees and open flowers (6:29). The two doors of olivewood which led to the inner sanctuary (6:32) and the folding doors of fir or cypress which led to the nave (6:34f.) were similarly carved.

šîš also refers to the plate made out of pure gold and engraved with "Holy to Yahweh" which was placed on a lace of blue and put as a sacred diadem on the high priest's turban (Ex 28:36f; 39:30). Aaron thereby bore the iniquity of the holy offerings in order that they might be accepted before Yahweh (Ex 28:38).

During the wilderness sojourning the tribes challenged the priestly role of Aaron's house (Num 17:1–11 [H 16–26]). The contest was settled by each tribe's placing its rod before the testimony in the tent of meeting. God demonstrated in finality that solely Aaron's house was chosen as priests, for his rod alone budded, produced blossoms, and bore ripe almonds (Num 17:8 [H 23]).

The length of man's life is compared to the flourishing flower of the field, which is soon gone and fades when it encounters the winds (Ps 103:15f., cf. Ps 90:5f.; Job 14:1f.). In Isa the fading flower is contrasted to the enduring word of God (Isa 40:6ff.). The wicked too for a season

may prosper abundantly and receive magnificent splendor, but although they flourish like the sprouting grass, they are doomed to eternal destruction (Ps 92:7 [H 8]). Similarly Ephraim's flower of his glorious beauty will fade and be destroyed before Yahweh's fierce anger; i.e. his rich valleys will be trodden down (Isa 28:1-4). In contrast, during the reign of the righteous king, men will blossom in the cities (Ps 72:16). Israel too shall blossom abundantly and fill the whole earth with its produce (Isa 27:6). Its rich produce will easily support the people.

J.E.H.

1894 *צִיץ (*šûš*) *II, gaze, peep*. Occurs only in the Hiphil, only in Song 2:9.

1895 *צִיץ (*šûq*) *I, constrain, press, bring into straits*. Occurs only in the Hiphil.

Derivatives

1895a צִוָּק (*šôq*) *constraint, distress* (Only in Dan 9:25).

1895b צִוָּקָה (*šûqâ*) *distress, pressure*.

1895c מוֹצָק (*mûšâq*) *constraint, distress*.

1895d קִצּוֹק (*mâšôq*) *straits, distress*.

1895e קִצּוֹקָה (*m'šûqâ*) *distress*.

šûq refers to strong inner motivation or great external pressure. Elihu described the strong inclination within him to address Job and his comforters as "the spirit within me constrains me" (Job 32:18). Samson twice succumbed to the external pressure put on him by two importuning Philistine women (Jud 14:17; 16:16). It includes the distress created by an enemy in besieging a people. The enemy may be called literally "one who brings distress" (Isa 51:13).

God may distress his people in an attempt to bring about their repentance and salvation (Isa 29:2). The strongest curse of judgment that God brings against his disobedient people is the distress of siege and captivity. The distress will become so severe that they will even eat their children (Deut 28:53, 55, 57; Jer 19:9 [*mâšôq*]). Isaiah declares that during such a time Israel will unfortunately fail to seek comfort in the Creator God, but will instead continue to fear the destroying oppressor (Isa 51:13). But fortunately God is able to bring relief to his people (Isa 51:14).

The Day of the Lord is described as a day of great distress, anguish, and gloom (Zeph 1:15, *m'šûqâ*). It will be a time of thick darkness, but into that darkness will break the light that comes from God himself intervening in human history through his Messiah (Isa 8:22-9:2 [8:22-9:1]).

J.E.H.

1896 צִיָּק (*šûq*) *II, pour out, melt*. Probably a by-form of *yâšaq*.

Derivative

1896a קִצּוֹקָה (*mâšûq*) *molten support, pillar*.

Man's ingenuity is demonstrated in his great technological skills. One such skill as Job points out, is his ability to recover precious ores from the ground (Job 28:1-4); he has discovered how to smelt copper ore (v. 2). But true wisdom exceeds these skills and can not be purchased (Job 28:12-19). It belongs to God alone and is discovered by man when he fears Yahweh (Job 28:23-28). In Job 29, Job describes the honors and blessings he had before his great trial. One blessing was that the rock poured out oil for him (v. 6). The abundance of oil for anointing the body was the property of the rich. (For these two passages Dhorme argues that *yâšûq* is Qal passive participle of *yâšaq* = "hard.") Isaiah 26:16 is also difficult; *šâqûn* is variously emended. But IQIs^a reads the same text and E. J. Young argues that its root is *šûq*. The passage describes the distress of God's people during a time of punishment. They pour out their hearts in prayer, but they are so oppressed they only utter a whisper (Isa 26:16).

mâšûq. *Molten support, pillar*. I Sam 2:8 asserts that God owns the pillars of the earth, therefore, he has control over everything that happens on the earth. The word also describes a rocky crag near Michmash, which most likely was pillar shaped (I Sam 14:5).

J.E.H.

1897 צוֹר (*šwr*) *I. Assumed root of the following*.

1897a צִנְאָרָה (*šawwār*) *neck*.

1897b צִנְרֹן (*šawwārôn*) *necklace* (Song 4:9).

šawwār. *Neck*. (ASV and RSV identical except Job 15:26, RSV emends to "stubbornly.") The prominence of the neck makes it the place to bind jewelry (Gen 41:42; Song 1:10). Hard work may be described as putting the neck to the work (Neh 3:5). The total subjugation of an enemy is pictured as standing with a foot on the neck of a prostrate foe, e.g. Joshua's treatment of the five southern kings of Canaan (Josh 10:24). The tender compassion of reunion is expressed by embracing one and weeping on his neck (Gen 33:4; 45:14). In contrast the proud may express their arrogance through the bearing of the neck (Ps 75:5 [H 6]; cf. Job 15:26, neck connotes strength and arrogance).

The neck is considered to be a place of strength, no doubt because animals are harnessed for work by a yoke laid on the neck. Both the horse and Leviathan have great strength in the

neck (Job 39:19; 41:22 [H 14]). When a people submit to the authority of a more powerful nation, they are described as wearing a yoke, a symbol of a suzerainty covenant (Jer 27:8, 12; 28:14). God and his people are bound by such a yoke. At first God in his kindness spared Ephraim the yoke, but because of their rebellion, they had to submit (Hos 10:11; cf. Mic 2:3). Lamentations puts it thus, "My transgressions were bound into a yoke . . . they were set upon my neck; he caused my strength to fail" (1:14; cf. 5:5). In contrast, liberation from a foreign government is described as breaking the yoke. God promised to break the yoke of Babylonian captivity (Jer 30:8; cf. Isa 10:27; Gen 27:40). Similarly in anticipation of the great deliverance the suffering servant was to accomplish, Isa exhorted, "Arise, O captive Jerusalem; loose the bonds from your neck" (52:2).

J.E.H.

1898 צור (*šûr*) II, *bind, besiege*.

Derivatives

1898a מְצֹרָה (*māšôr*) *siege, entrenchment*.1898b מְצֹרָה (*m'šûrâ*) *stronghold*.

This root means to make secure a valuable object, such as money (II Kgs 5:23), similar to *šārar* I (q.v.). Applied to military action it means to relentlessly attack an opponent's stronghold. Every effort was made to shut off supplies (especially water, cf. II Sam 12:27) from the city and to prevent the people from escaping. The tactics included building a mound to reach the wall and using battering rams and towers to breach it (cf. II Sam 20:15; Ezk 26:8f.). The inhabitants of a besieged city were threatened by both sword and famine; therefore, some surrendered to the enemy in order to preserve their lives (Jer 21:9). Without great discipline, tension inside the city mounted as prices for anything resembling food soared (II Kgs 6:25). It took the Assyrians three years to capture Samaria (II Kgs 17:5). Sometimes armies lacked the capacity to move from victories on the battlefield to take a stronghold (II Kgs 16:5).

The law restricted Israel from the wanton destruction of fruit trees while besieging a city (Deut 20:19f.).

māšôr. *Siege, bulwarks, defense, besieged* (ASV, RSV similar also using siegeworks, fortified).

m'šûrâ. *Stronghold, fenced.* These nouns, which may also be used adjectively, refer to a siege itself or to siege works, either defensive or offensive. The Psalmist draws on the image of a besieged city to describe the tremendous blessing the Lord gave him by manifesting his steadfast love so that the siege by his troubles was lifted (Ps 31:21 [H 22]).

Metaphorically this verb expresses God's full effort to confront the Psalmist on every side, leaving no place for escape from his presence (Ps 139:5). In Song 8:9 it figuratively refers to the defense a young girl must develop to keep her morality secure.

The walled cities were an important factor in ancient warfare. The walls were a welcome protection and the surrounding population crowded into the cities in times of attack. But if the siege were not soon relieved, the walls became a trap and the people endured agony. The general practice—right up to the Middle Ages—was to offer amnesty to a besieged city. If it was refused, all the inhabitants were subject to slaughter if and when the city fell. This type of total war caused many a city to give in, rather than face destruction. (Cf. the willingness of the men of Jabesh Gilead, I Sam 11:3.) Israel was to follow this concept of total war in the conquest of Palestine (Deut 20:16–18). But the individual Israelite was not to profit from the pillage—all was dedicated to the Lord (Josh 6:24). However, in warfare outside the land, Israel was to offer amnesty and if that were refused would not kill non-combatants (Deut 20:12–15).

The punishment for breaking God's covenant was that Israel herself would be heavily besieged (Deut 28:47–57; Isa 29:1–4; Jer 19:8f.).

Bibliography: Yadin, Yigael, *The Art of Warfare in Biblical Lands*, I, II, McGraw Hill, 1963.

J.E.H.

1899 צור (*šûr*) III, *show hostility to, be an adversary*. (ASV and RSV quite varied, e.g. ASV "vex," "constrain," "assault"; RSV "harass," "attack.")

This root describes the act of inciting someone into an outward conflict or battle (cf. Jud 9:31). Israel was not to provoke Ammon or Moab into war, for God had not allotted Israel any of their land (Deut 2:9, 19). On the other hand, God promised his people that when they were obedient then whoever acted hostile toward them should experience his hostility (Ex 23:22). This verb is similar in meaning to *šārar* II to which it probably is a by-form.

J.E.H.

1900 צור (*šûr*) IV, *form, fashion*. Possibly a by-form of *yāšar*.

Derivatives

1900a צִירָה (*šûrâ*) *form, fashion*.1900b צִיר (*šîr*) *image* (Isa 45:16; Ps 49:5).

"To form" regards the making of an object according to a certain style, especially a metal that can be molded. Hiram of Tyre cast two pillars of bronze for the temple (I Kgs 7:15). At Mount

Sinai Aaron fashioned the gold with a graving tool into a calf (Ex 32:4). The text in Jer 1:5, where God asserts that he formed Jer in the womb, is debated; the K supports *šūr* as the root and Q *yāšar*, but evidence from the Dead Sea Scrolls supports the possibility that a *wāw* can stand for a *qāmeš ḥātūph*; then K and Q are from *yāšar*.

šūrā. Form. Four times in Ezk 43:11; (three times rsv emends on the basis of the Greek text). It refers to the form of the temple. Its form is carefully described because God desires that the people make sure the physical objects conform exactly to their description. Although the text in Ps 49:14 [H 15] is difficult, "form" (ASV "beauty") most likely refers to the substance that survives the corpse and which is consumed in Sheol (but see *sh'ōl*).

J.E.H.

1901 צור (*šwr*) V. Assumed root of the following.

1901a צורָּ (*šūr*) *rock*. (ASV and RSV same.)

šūr appears about seventy-five times. Rock stands for boulders or formations of stone and for the material which composes mountains (Job 14:18 rock parallel to mountain). Rock may serve as a toponym, e.g. Wildgoats' Rocks (I Sam 24:2 [H 3]; cf. Jud 7:25; II Sam 2:16). The rock may house pleasant surprises for man such as wild honey (Ps 81:16 [H 17]) and precious jewels (Job 28:10). Rocks provide refuge, but in the day of judgment people will unsuccessfully seek refuge in the caves of the rocks (Isa 2:19ff.). Men engraved into various rock formations pictures and writing pertaining to all aspects of his life. Such writing in stone remains forever (Job 19:24).

Rock, by reason of its magnificence and hardness, affords many metaphorical uses. People who confidently occupy their habitation so that an enemy cannot defeat them are referred to as a rock (Jer 21:13). The gods of the nations are called a rock (Deut 32:31, 37); to them are attributed qualities of strength and reliability. Perhaps the Scripture in some places is playing on the fact that some of these idols were only statues hewn from stone. Wayward Israel went so far as to claim that a stone (*'eben*) gave her birth (Jer 2:27).

Albright, who prefers the translation "mountain," claims that *šūr* was a common name for deities in Syria and Anatolia and is an old appellation (AYGC pp. 24, 188f.). He rightly adds that these appellations were used by the Israelites with no borrowing of the heathen deities to whom the words were applied by the surrounding nations.

Yahweh himself is many times called a Rock; I Sam 2:2 says, "There is no rock like our God." Yahweh is a Rock, not in being represented as an idol carved from stone, but in that he is totally reliable. He is a sure source of strength and he endures throughout every generation. There is no unrighteousness found in him; he is completely upright (Deut 32:4; Ps 92:15 [H 16]). God is a Rock of salvation (Deut 32:15; Ps 89:26 [H 27]). He is a strong refuge in which his people may take shelter from any difficulty (cf. Ps 94:22). In distress the psalmists cry out to Yahweh so that they may experience the security of his steadfast endurance (Ps 27:5; 28:1). *šūr* thus appears in theophoric names: Zuriel (Num 3:35, "my Rock is El"); Zurishaddai (Num 1:6, "my Rock is Shaddai"). The man who relies on God as his Rock will not be greatly moved (Ps 62:2, 6, 7 [H 3, 7, 8]). When Israel strays, Isaiah exhorts them to "look to the Rock from which you were hewn" (Isa 51:1). Perhaps he is alluding to Deut 32:4. Yahweh gave birth to Israel through Abraham's faith in him. Isaiah encourages the people to trust in Yahweh; as a result they shall have perfect peace (Isa 26:4f.). The quality of strength connoted by "rock" applies not only to defense but also to aggressive leadership in battle (Ps 18:31-48 [H 32-49]; 144:1). The quality of authentic endurance assures Habakkuk that Yahweh will bring the wicked to judgment (Hab 1:12). Yahweh's ability to protect and to help his people as a Rock sets him apart as the only true Rock (II Sam 22:32; Isa 44:8).

The coming Messiah is called "a rock of stumbling" (Isa 8:14). He cannot be ignored; all who come into contact with him are made aware of their sin and misunderstanding about God's way of providing salvation. Some stumble and are broken to repentance; others fall and are crushed by the rock itself (cf. Mt 21:42ff.; Rom 9:32f.; I Pet 2:8).

In the desert Moses struck the rock and water came forth to quench the people's thirst (Ex 17:6; Deut 8:15; Ps 78:15, 20; 105:41; 114:8; Isa 48:21). Paul identifies this rock typically with Jesus (I Cor 10:4).

צורון (*šawwārôn*). See no. 1897b.

צָה (*šah*). See no. 1903a.

1902 צָהָה (*šahh*). Assumed root of the following.

1902a צָהָה (*šihēh*) *parched* (Isa 5:13).

1903 צָהָה (*šāhah*) *be dazzling*. Occurs only in Lam 4:7.

Derivatives

- 1903a שָׂחַק (*śah*) *dazzling, glowing, clear* (Isa 18:4; Jer 4:11).
 1903b שִׁחִיחַ (*śāhiāh*) *shining, glaring* (Ezk 24:7–8; 26:4, 14; Neh 4:7).
 1903c שִׂחִיחָה (*ś"hihā*) *scorched land* (Ps 68:7).
 1903d שַׁחֲסָחָה (*śahṣāhā*) *scorched region* (Isa 58:11).

שִׁחִיחַ (*śāhiāh*). See no. 1903b.

1904 שָׁחַן (*śhn*). Assumed root of the following.

1904a שַׁחְנָה (*śahānā*) *stench* (Joel 2:20).

שַׁחֲסָחָה (*śahṣāhā*). See no. 1903d.

1905 שָׂחַק (*śāhaq*) *laugh* (Qal); *play, mock* (Piel).

Derivatives

- 1905a שִׂחֻק (*ś"ḥōq*) *laughter, laughing stock*.
 1905b יִשְׁחָק (*yishāq*) *Isaac*.
 1905c שִׂחָק (*śāhaq*). Alternate form of *śāhaq*.
 1905d שִׂחֻק (*ś"ḥōq*). Alternate form of *ś"ḥōq*.
 1905e יִשְׁחָק (*yishāq*). Alternate form of *yishāq*.
 1905f מִשְׁחָק (*miṣhāq*) *object of derision* (Hab 1:10).

The simple stem of *śāhaq* conveys the idea of laughter, whether in joy or incredulity. The stronger Piel stem connotes positively, play and sport, or negatively, mockery and derision. *Śāhaq* reproduces Ugaritic *śḥq* "to laugh." Of its thirteen biblical occurrences, one is in Jud and the rest are in the Pentateuch (eleven in Genesis). In documents of later periods, the verb used for "laughter" is *śāhaq*.

The thirty-six occurrences of *śāhaq* parallel its earlier equivalent, with the additional ideas, in the Qal, of laughing in achievement, smiling, and deriding, (especially with 'al "over," or l' "at"). In the Piel it is used for playing musical instruments or rejoicing. In the Hiphil to laugh to scorn is an alternate to *ś"ḥōq* (cf. *miṣhāq* Hab 1:10, a "laughing matter"), with added ideas of sport or games.

śāhāq first occurs in the Qal stem, describing the reactions of the patriarch Abraham (Gen 17:17) and his wife Sarah (18:12–13) as they laughed incredulously at God's promising them a son. But the promise was fulfilled, and Sarah exclaimed, "God has made laughter (*ś"ḥōq*) for me, so that all who hear will laugh with me" (*yishāq-lī*, 21:6; KB, p. 800); cf. the child's name, *yishāq* "Isaac."

In Solomon's wisdom literature the verb *śāhaq* designates the opposite of weeping (Eccl 3:4).

Job smiles (in AB, *Job*, p. 187) at his retainers (Job 29:24). The able and virtuous woman can live without concern and "smile [rejoice, KJV] at the future" (Prov 31:25, NASB).

The Qal of *śāhaq* also has a negative usage. Young men laugh at Job (Job 30:1). While the righteous can laugh at destruction (5:22), so can the Chaldeans, at the fortifications of their helpless foes (Hab 1:10) or at Jerusalem's fall (Lam 1:7). Metaphorically, the ostrich laughs at horsemen for she can outrun them (Job 39:18); wild donkeys laugh at (scorn, KJV) cities (v. 7); the war horse mocks at fear (v. 22); and Leviathan, the crocodile, laughs at human weapons (41:29 [H 21]). God laughs, *śāhaq*, at rebellious sinners (Ps 2:4; 37:13; 59:8 [H 9]), so does divine Wisdom (Prov 1:26); and so may the righteous (Ps 52:6 [H 8]). Similarly the Piel of *śāhāq* represents the charge brought by Potiphar's wife against Joseph, that he was "brought in to mock us" (Gen 39:14, 17; see ICC, *Genesis*, p. 458, which interprets this euphemistically as does "to make love to us," AB, *Genesis*, pp. 202–3). Sarah insists that Ishmael be driven away because he was "mocking" Isaac al (Gen 21:9). The rsv innocuously renders this participle "playing." Yet in the light of Gal 4:29, on Ishmael's persecuting Isaac, KJV, ASV, NASB, NIV prefer mocking. Observe that the Hiphil of *śāhaq* (II Chr 30:10) describes the mockery by Israelites of the Northern Kingdom at Hezekiah's invitation to share in the Passover at Jerusalem.

The Piel of *śāhaq* does, however, progress toward more positive concepts. Samson was summoned by the cruel Philistines to "make sport," i.e. entertainment, before them (Jud 16:25). At Sinai faithless Israel rose up "to play" (Ex 32:6). Jeremiah disdained the company of "them that make merry" (Jer 15:17, ASV, as in I Kgs 4:20). When Lot warned his sons-in-law of the impending destruction of Sodom (Gen 19:14), he seemed to them not so much as "one that mocked," (KJV), as one simply jesting (rsv; cf. Prov 26:19, NASB, "joking"). Isaac was observed "sporting with Rebekah his wife" (Gen 26:8; rsv, "fondling", NIV "caressing"; ICC, *Genesis*, p. 364, "to exchange conjugal caresses"). The Piel of *śāhaq* depicts children playing (Zech 8:5; cf. Job 41:5 [H 40:29]), or even God's wild creatures "playing on the mountains" (Job 40:20) and in the ocean (Ps 104:26). It may mean to perform combat (II Sam 2:14; KB, p. 918), to play tambourines and dance (I Sam 18:6–7), or to celebrate (II Sam 6:5, 21, NASB) the restoration of the ark. Above all, the personal wisdom of God (cf. the description of Christ in I Cor 1:24) rejoices before God the Father and delights in men upon earth (Prov 8:30–31).

ś"ḥōq. *Laughter, laughingstock* (cf. KB, p. 918). Feasts are made for *ś"ḥōq* (Eccl 10:19), and

laughter is a gift of God (Job 8:21; Ps 126:2). Yet wickedness is as "sport to a fool," like a game (Prov 10:23). The laughter of fools is vanity (Eccl 7:6); whereas sorrow may lead to a better wisdom (v. 3). At her fall, Judah was made a *š'hōq* "laughingstock" (Ezk 23:32; cf. Lam 3:14; likewise Moab, in Jer 48:26, 39). Twice in one verse Job complains that he has become a joke to his friends (Job 12:4, NASB, cf. Jer 20:7).

yishāq. *Isaac*, "he laughs." While the name "Isaac" (Gen 17:19) arose out of Abraham's incredulity, *way-yishāq* (v. 17), it could yet become a symbol of blessing (21:6) and ultimately an identification for the entire nation of Israel (Amos 7:9, 16).

śāhaq. An alternate form of *śahaq*. Both appear in Jud 16:25. *śahaq* became popular after the time of David (hence even *yishāq* for *yishaq* (Ps 105:9; Amos 7:9, 16; Jer 33:26).

J.B.P.

1906 צַחַר (*šhr*). Assumed root of the following.

1906a צַחַר (*śahar*) reddish-gray, tawny (Ezk 27:18).

1906b צַחֹר (*śāhōr*) tawny (Jud 5:10).

1907 צִי (*šī*) *I, ship*. An Egyptian loan word.

1908 צִי (*šī*) *II, a wild beast, desert-dweller* (Isa 13:21; Jer 50:39).

צִיד (*šayid*). See nos. 1885a, 1886a.

צִיד (*šid*). See no. 1886c.

צִיָּד (*šayyād*). See no. 1885b.

1909 צִיה (*šyh*), צוה (*šwh*). Assumed root of the following.

1909a צִיָּה (*šiyā*) dryness, drought (Hos 2:5; Ps 105:41).

1909b צִיּוֹן (*šāyōn*) dryness, parched land.

1910 צִיּוֹן (*šiyōn*) *Zion*.

It is possibly related to Arabic *šāna* from root *š-w-n*, meaning protect, defend; hence *šiyōn* may have meant place of defence, fortress. Others suggest derivation from root *šāhā* "be bald"; cf. Syriac spelling *šehyōn* for this name.

Zion is the fortified mound between the Kidron and the Tyropean valleys that David captured from the Jebusites (II Sam 5:7). Subsequently, it became known as the city of David. With the building of the temple to the north, that hill later became known as Mount Zion. Zion may even refer specifically to the temple vicinity or more generally to Jerusalem itself; sometimes it in-

cludes the entire nation, the covenant community itself (Isa 1:27; Ps 97:8). "Zion" appears frequently in Ps and Lam. It seldom refers to the political capital of Judah, but much more often stands for the city of God in the new age.

From the time Solomon built the temple, Zion became the center of Yahweh's activity. Yahweh identified himself as "the One who dwells on Mount Zion" (Isa 8:18). Here he initiates his work of salvation and here he begins his judgment against sin (Amos 1:2).

Zion frequently occurs in poetic passages, referring to the temple area where Yahweh dwells. Psalm 48 renders great praise to Mount Zion. It is called "the joy of all the earth" and "the city of the great King" (v. 2 [H 3]). It is also said to be located in the far north (v. 2 [H 3] but cf. NIV). In Canaanite religion the assembly of the gods was thought to meet in the far north. Therefore the Psalmist is using poetic language to show that Zion is the religious center, not only for Israel, but for the entire world. Since the city of Yahweh is in the same place as the assembly of the gods, it means these gods have no existence or power outside of Yahweh. Ezekiel even seems to refer to Zion as the "navel" of the earth, the place where God sustains this planet (38:12, though 'ereš here may refer only to the land of Palestine). Its sanctity, however, does not rest in location, but rests solely in the fact that Yahweh has chosen to dwell there. The crucial distinguishing factor between mythical ideas and the biblical expressions concerning Zion resides in the fact that Zion was not set apart as holy at creation. It possesses no intrinsic holiness. It became important to the Lord and to Israel only within history (cf. Ps 78:68). Hence it acquired meaning and sacredness. This fact is further verified in that "Zion" is not mentioned in the creation account nor in the Pentateuch at all, except that Mount Moriah is specified as the place where Abraham offered up Isaac (Gen 22:2, 14; II Chr 3:1); the first reference to Zion is II Sam 5:7.

Nevertheless because of Israel's disobedience even Zion would not be spared; it actually fell to the Babylonians in 587/6 B.C. Lamentations frequently refers to Zion and "the daughter of Zion" to express overwhelming sorrow at Zion's destruction (Lam 1:4, 6, 17; etc.). In captivity the Psalmist was so despondent that he could not bring himself to sing any of the songs of Zion (Ps 137:1ff.). But even in exile the people still had faith and prayed for Yahweh to rebuild his city and to restore its fortress (Ps 102:13, 16 [H 102:14, 17]; 69:35 [H 69:36]).

In some of the prophets, especially Isa, Jer, Joel, Zech, Zion appears as the central location for Yahweh's great deeds of salvation in the future. He will cleanse away Zion's sin by judgment (Isa 4:4). That is, the city will be redeemed

by justice and righteousness (Isa 1:27; 33:5). God will build the city by laying a precious cornerstone in Zion (Isa 28:16). The glory of Yahweh which was present in the Exodus shall return to protect its inhabitants from the elements (Isa 4:5f.). God shall firmly secure the city from its enemies (Isa 33:20). God's people shall return in joy and singing to Zion from the various places of their exile (Isa 35:10; 51:11). Then they shall weep no more (Isa 30:19). The land will become as fruitful and lush as the Garden of Eden (Isa 51:3). The scope of this restoration is for all peoples: foreign nations shall come to Mt. Zion to worship (Isa 2:3; Mic 4:2). All of these fantastic changes in Zion will give her the new name "My delight is in her" (Isa 62:1-5). But the greatest difference is that God himself will reign there in that day (Zech 8:3; Isa 59:20).

 צִיּוֹן (*ṣāyôn*). See no. 1909b.
 צִנּוֹק (*ṣinōq*). See no. 1941a.

1911 צִיץ (*ṣiṣ*). Occurs only in Jer 48:9. Meaning dubious.

1912 צִיֶּצֶת (*ṣiṣit*) *tassel* (RSV, *fringe* (ASV); *lock*.

It is debated whether *ṣiṣit* indicates the fringe around the edges of a garment or a tassel at each corner; Snaith suggests the threads were twisted in groups to form "a fringe of tassels." A cord of blue was to be placed on each tassel. Traditionally they were woven out of eight threads tied into five knots. These tassels served to remind the people to keep Yahweh's commandments and not to follow their own desires (Num 15:38ff.; cf. Deut 22:12; Mt 9:20; 14:36; 23:5). For a faith based on a saving history and a law, memory is crucial to preserving its integrity. It also means "a lock"; in a vision the Spirit transported Ezekiel by a lock of hair to Jerusalem (Ezk 8:3).

- צִיץ (*ṣiṣ*). See no. 1893a, 1911.

1913 צִיר (*ṣyr*) I. Assumed root of the following.
 1913a צִיר (*ṣir*) I, *envoy, messenger* (Jer 49:14; Isa 18:2).

1914 צִיר (*ṣyr*) II. Assumed root of the following.

- 1914a צִיר (*ṣir*) II, *pivot of door, hinge* (Prov 26:14).
 1914b צִיר (*ṣir*) III, *pang* (Isa 13:8; Dan 10:16).

- צִיר (*ṣir*). See nos. 1900b, 1913a, 1914a,b.
 צֵל (*ṣēl*). See no. 1921a.

1915 צָלָה (*ṣālā*) *roast*.

Derivative

- 1915a צָלִי (*ṣālī*) *roasted, roast*. (RSV and ASV are the same except in Isa 44:16 RSV has "meat" and ASV "roast.")

This root appears in connection with the Passover lamb, the offerings desired by the sons of Eli, and Isa's argument against idolatry. The Passover lamb was to be roasted whole, including its head, legs, and inner parts. It could not be boiled or eaten rare (Ex 12:8f.). Roasting permitted the lamb to be cooked entirely without being butchered. The wholeness of the animal as a means of redemption for the firstborn was crucial to the significance of the ceremony. Being quick and easy, roasting also coincided with the theme of haste. It also consumed the fat which according to later legislation was forbidden to be eaten (Lev 3:17; 7:24f.). And perhaps it anticipated that the judgment on the lamb of God would be total.

The sons of Eli flagrantly violated the standards for making sacrifices to Yahweh. One example is their requesting only raw flesh to roast, rather than accepting it boiled as was apparently customary (1 Sam 2:15; cf. Ex 29:31f.; Lev 6:28f. [H 21f.]). No doubt they desired the flavor added by the fat.

Isaiah ridicules idolatry by describing the process of making an idol. One cuts down a tree; with part of it he makes a fire and roasts meat over it. He is warm and his stomach is full. With the rest of the wood he carves an idol. He worships it and prays to it saying, "Deliver me, for thou art my god" (Isa 44:17). His prayer comes after he himself has met all his needs. Isa argues that such worship of idols is completely absurd.

- צָלוּל (*ṣ/lwl*). See no. 1922a.

1916 שָׁלַח (*šālāḥ*)

1916 שָׁלַח (*šālāḥ*) *I, rush* (I Sam 10:6; Amos 5:6).

שָׁלַחַת (*š'lohīt*). See no. 1918c.
שָׁלַחַת (*šallahat*). See no. 1918b.
שָׁלִי (*šālī*). See no. 1915a.

1917 שָׁלַח (*šālēah*) *II, prosper, succeed, be profitable*; Hiphil, make prosperous, experience prosperity (ASV and RSV are similar.) (Cf. Aram. *š'lah* "cleave through," "press through," "succeed"; used especially in Haphel stem. The Arabic *šalāḥa* means "thrive," "be well," or "be righteous.")

The root means to accomplish satisfactorily what is intended. Real prosperity results from the work of God in the life of one who seeks God with all his heart (II Chr 31:21; cf. Josh 1:8; Ps 1:3). As II Chr 26:5 says, "As long as [Uzziah] sought Yahweh, God made him prosper." Joseph is called a prosperous man, for Yahweh turned all of his misfortunes into benefit for Jacob's sons (Gen 39:2-3, 23). The devout man earnestly petitions God to grant him success in his work (Ps 118:25).

Its use with a negative describes the worthlessness of a rotten cloth (Jer 13:7). Those who refuse to worship Yahweh are just as rotten (Jer 13:10).

God expresses his purposes through his word. Therefore his word will not prove empty, but it will prosper in its fulfillment (Isa 55:11). God accomplishes salvation for man through the suffering of his obedient servant (Isa 53). Isaiah says, "The will of Yahweh shall prosper in his hand" (53:10).

Although true prosperity comes only from God's blessing, externally it often appears that the wicked prosper. This appearance causes the righteous to question God's involvement in human affairs (Jer 12:1). In the last days those who are opposed to God shall prosper for a time through cunning and deceit (Dan 8:12, 24f.). But their success will be only temporary, for God is preparing a time of judgment against all evil to accomplish his indignation (Dan 11:36). It must be clearly affirmed that transgression of God's law will never finally succeed (Num 14:41; cf. the argument in Ps 37:7-11 and Ps 73:12-20 where, however, the word is *shālēw* "be at ease.")

J.E.H.

1918 שָׁלַח (*šlḥ*) *III. Assumed root of the following.*

1918a שָׁלַחַת (*šēlāḥā*) *cooking pot* (II Chr 35:13).

1918b שָׁלַחַת (*šallahat*) *dish* (II Kgs 21:13; Prov 19:21; 26:15).

1918c שָׁלַחַת (*š'lohīt*) *jar* (II Kgs 2:20).

1919 שָׁלַל (*šālal*) *I, tingle, quiver.*

Derivatives

1919a שָׁלָל (*šilšāl*) *I, whirring, buzzing* (Isa 18:1).

1919b שָׁלָל (*šilšāl*) *II, spear* (Job 40:31).

1919c שָׁלָל (*š'lašāl*) *whirring locust* (Deut 28:42).

1919d שָׁלִילִים (*š'šelim*) *cymbals.*

1919e מְשִׁלָּה (*m'šillā*) *bell* (Zech 14:20).

1919f מְשִׁלְתַּיִם (*m'šiltayim*) *cymbals.*

šels'lim. Cymbals. These instruments were an integral part of an ancient orchestra that played especially on high occasions such as David's bringing the Ark of the Covenant into Jerusalem (II Sam 6:5). In Ps 150:5 two kinds of cymbals are distinguished: "sounding cymbals" (*shāma'*) and "loud clashing cymbals" (*š'ru'ā*). KB interprets them as small, tinkling cymbals and large, clashing ones. Sachs considers them to be "clear," broad-rimmed with small bosses, struck softly and "harsh," narrow-rimmed with large bosses, struck forcefully. Both were used to render praise to the Lord.

m'šillā. Bell. (Only in Zech 14:20; ASV and RSV identical.) Zechariah is describing the nature of life in Jerusalem when the righteous king reigns. Then the bells of the horses will be inscribed, "Holy to Yahweh." Formerly this inscription was engraved on a gold plate fastened to the high priest's turban (Ex 28:36ff.). The contrast indicates that everything shall be holy in that time; the distinction between the sacred and profane shall be eliminated.

m'šiltayim. Cymbals. (ASV and RSV the same.) The distinction between this word and *šels'lim* is not clear; Sachs conjectures that this word may be "cymbals on clappers" or at least those with a stronger gemination. Cymbals, some made out of bronze, were used to make a loud melody of praise to Yahweh on occasions of rejoicing (I Chr 13:8; 15:19). According to I Chr 16:5 nine Levites were appointed to play the harps and lyres, but only two the trumpets, and one the cymbals; interestingly he is named chief. They played on special occasions, e.g. at the dedication of Solomon's temple (II Chr 5:11-14). They also played on the day when Hezekiah completed the sanctification of Yahweh's house (II Chr 29:25-30). This order established by King David and Nathan the prophet (II Chr 29:25) continued into the second temple period (Ezr 3:10). They played at the laying of the foundation of that temple (Ezr

3:10f.) and at the dedication of the wall of Jerusalem (Neh 12:27–30).

J.E.H.

1920 לָלַץ (*šālal*) II, *sink, be submerged* (Ex 5:10, only).

1921 לָלַץ (*šālal*) III, *be or grow dark* (Neh 13:19; Ezk 31:3).

Derivatives

1921a לָלַץ (*šēl*) *shadow*.

1921b צִלְמָוֶת (*šalmāwet*) *deep darkness*.

šēl. Shadow. In a positive sense, "shadow" conveys the ideas of shade, protection, and defense. Shade, even that of a boulder, gives some relief from the heat of the day, especially for the slave (cf. Job 7:2). "Under the shadow of one's roof" connotes that the head of the house provides protection for his guests (Gen 19:8, ASV). Similarly a strong nation may offer someone or another nation shelter (Isa 30:2f.; cf. Ezk 17:23). But God may remove a nation's shelter or defenses in order to enable his people to conquer them (Num 14:9). On the other hand, shadow serves as a negative metaphor when it is viewed as ephemeral and fleeting. Man's life is compared to a shadow, for it has no permanence and flees quickly away (I Chr 29:15). Shadow also describes the failing condition of one who is enduring a sickness (Job 17:7).

Yahweh is the shade or the source of protection for his people (Ps 121:5f.; Isa 25:4). Therefore the Psalmist prays that God may hide him under "the shadow of his wings" (Ps 17:8; cf. 36:7 [H 8]; 91:1). God promises to hide the suffering servant in the shadow of his hand in order that he can proclaim his penetrating message for a period of time (Isa 49:2). And in the latter days Yahweh's glory will return to Jerusalem. It will be a shade from the heat and a shelter from the other elements (Isa 4:6; cf. Hos 14:8).

šalmāwet. Deep darkness. (ASV prefers "the shadow of death" and also has "thick darkness," "thick gloom"; RSV prefers "deep darkness" and also has "gloom.") Some treat it as a combination of *šalāmu* "be dark" (Akkadian, also Arabic) plus *ūt* as an abstract ending. Most versions understand it as combination of "shadow" and "death." D. W. Thomas accepts the latter, but convincingly argues that *mūt* possesses superlative force: "very deep shadow," "thick darkness." M. Dahood agrees, vocalizing it *šalmawet* and citing other compound nouns in Ugaritic (*Psalms* I, AB, p. 147). It describes the

darkness of eyelids tired from weeping (Job 16:16), the thick darkness present in a mine shaft (Job 28:3), the darkness of the abode of the dead (Job 10:21f.; 38:17), and the darkness prior to creation (Amos 5:8). Emotionally it describes the internal anguish of one who has rebelled against God (Ps 107:10–14; cf. 44:19f. [H 20f.]). Thus it is the strongest word in Hebrew for darkness.

Since sinful man uses darkness as an aide to accomplish his woeful deeds, the terror associated with thick darkness becomes his experience in the morning (Job 24:16f. ASV). Yet there is no place dark enough for them to hide from God's eyes (Job 34:22). Further, God is never threatened by deep darkness; it causes him no terror. No matter how dark a place is, God will lead his people through so that they fear no evil and are comforted by his rod and staff (Ps 23:4). The application in this Psalm to the experience of death is apt and has comforted multitudes of dying saints. The people could trust this statement of the Psalm, for God had proven his ability by leading his people through the drought and deep darkness of the wilderness from Egypt to Canaan (Jer 2:6). He can always bring light to dispel the power of deep darkness (Job 12:22; cf. Amos 5:8). The most dramatic demonstration was to be when God would send the Messiah as a light to those who dwell in a land of deep darkness (Isa 9:2 [H 9:1]). Conversely, in judgment, God is able to turn light into thick darkness (Jer 13:16).

J.E.H.

1922 צֶלֶל (*šll*) IV. *Assumed root of the following.*

1922a צֶלֶל (*šwl*) *Kethib*, צֶלֶל (*š^elil*) *Qere, cake, round loaf* (Jud 7:13).

1923 צֶלֶם (*šlm*). *Assumed root of the following.*

1923a צֶלֶם (*šelem*) *image*.

Used sixteen times. The Aramaic is used similarly in Dan 2 and 3. The word basically refers to a representation, a likeness. Five times it is used of man as created in the image of God. Twice it is used of the golden copies of the mice and swellings that afflicted the Philistines (I Sam 6:5, 11 and see 'ōpel). Mostly it refers to an idol.

There are a number of words used for idol (see under *gillūl* and 'āšāb). Some, like *gillūl*, refer to their shape; others, like *hebel*, (כֶּבֶד vanity) may be just a derogatory substitute (Deut 32:21; Jer 8:19 NIV). *šelem* refers to the image as a representation of the deity. As such, images were strictly forbidden. Notice, not all sculpture was forbidden (cf. the golden cherubim), only the idols.

Man was made in God's image (*šelem*) and likeness (*d'mūt*) which is then explained as his having dominion over God's creation as vice-regent. Ps 8:5-8 [H 6-9] is similar citing man's God-given glory, honor and rule. God's image obviously does not consist in man's body which was formed from earthly matter, but in his spiritual, intellectual, moral likeness to God from whom his animating breath came. The emphasis of the prohibition of idols is that they are all material created things. God is non-material, the creator (Deut 4:15-19). This spiritual aspect of man has been damaged by the fall and is daily tarnished by sin. But it was seen in perfection in Christ and will be made perfect in us when salvation is complete (Heb 2:6-15).

צֶלְמֹת (*šalmāwet*). See no. 1921b.

1924 צֶלַע (šl') I. Assumed root of the following.

1924a צֶלַע (*šēlā'*) *side, rib* (ASV, RSV are almost identical.)

šēlā' is used once for a man's side (Gen 2:21f.) and once for the side of a hill, perhaps a ridge or terrace (II Sam 16:13; BDB); elsewhere it is an architectural term. It refers to the sides of an object, e.g. the sides of the ark of the covenant (Ex 25:12, 14). It is also employed to describe a location within a building (cf. Ex 26:35). Further it means a side chamber. There were three levels of these chambers around the temple proper (I Kgs 6:5; Ezk 41:6). It also indicates a board of wood used for a wall or a floor (I Kgs 6:15). And it stands for the leaves of a folding door (I Kgs 6:34). For I Kgs 7:3 KB gives "girder" or "moulding"; but others (as J. Gray) understand that it continues to mean "side chambers" in this passage.

The most crucial passage in which *šēlā'* appears is, of course, the one explaining the origin of woman (Gen 2:21f.). God created woman by taking "a rib" from Adam while he was in a very deep sleep (cf. *tardēmā*). Conceivably this means that God took a good portion of Adam's side, since the man considers the woman to be "bone of his bones" and flesh of his flesh (Gen 2:21f.). This picture describes the intimacy between man and woman as they stand equal before God. Since God made the woman, she is responsible to him in worship. She is not a mere extension of man; she possesses a unique individuality in her own right. There is no indication that woman is inferior. On the other hand, since her body is made from man's, there is a continuity between

the two with the result that they can find a fulfilling relationship only in one another, but never with the same intensity in any other part of creation. Therefore woman's origin makes it possible for a man and a woman to establish a dynamic relationship in which they become "one flesh" (cf. Gen 2:24).

The text of Job 18:12 is debated as to whether the text is *šēlā'* or *šela'* ("limping"; RSV "for his stumbling"). The latter could be "at his side" as Dhorme and ASV take it; but KD rejects this possibility.

1926 צָמָא (*šāmē'*) *be thirsty*.

Derivatives

1926a צָמָא (*šāmā'*) *thirst*.

1926b צָמָא (*šāmē'*) *thirsty*.

1926c צָמָא (*šim'ā*) *parched condition* (Jer 2:25, only).

1926d צָמָאוֹ (*šimmā'ôn*) *thirsty ground* (Deut 8:15; Isa 35:7).

Israel is a dry land, with some desert regions and hot dry summers. Whoever travels in this land, especially in the wilderness or the Negeb, experiences parching thirst. Such thirst can drive one to extreme distress. The Psalmist was driven to intense agony by his enemies, for they gave him vinegar for his thirst, an accepted drink but one which would increase his thirst (Ps 69:21 [H 22]); Jesus' thirst on the cross and the offer of vinegar parallels the Psalmist's experience (Jn 19:28ff.; Mt 27:48; Mk 15:36; Lk 23:36). [The vinegar which Jesus took however may have been the dilute vinegar drink used by Roman soldiers. It was called *posca* and was a cheap acidulated thirst quencher. R.L.H.] Thirst was especially felt during the siege of a city. With the major water supplies cut off the besieged had to ration their water. The terrible pain the children encountered heightened the distress (Lam 4:4). Thus thirst was considered a means of judgment (Hos 2:3 [H 5]; cf. Ps 107:5; Isa 29:8). But a far greater thirst is for God (Ps 42:2 [H 3]; 63:1

[H 2]). Amos tells of a future thirst brought by a lack of hearing the words of Yahweh (Amos 8:11ff.).

One of the ways to show hospitality was to give the thirsty a drink; e.g. Abigail brought food and drink to relieve the weary men attending David in the wilderness (II Sam 17:29). One was even to give water to his thirsty enemies (Prov 25:21; cf. Isa 21:14). God too provides water for his people's thirst (Ps 107:4-9). In the journey across the Sinai desert God provided water from a rock on two different occasions (Ex 17:1-7; Num 20:2-13; Isa 48:21; Neh 9:15, 20). God promises to meet the thirst of his people once again in a new Exodus (Isa 41:17f.; 49:10). Therefore Isa cries, "Ho everyone who thirsts, come to the waters; and he who has no money, come, buy and eat" (55:1), an invitation reminiscent of Jn 7:38. This indicates God is able to meet the deepest longing of his people. Further, the blessing of the latter days is pictured in terms of the desert blossoming forth abundantly, because attending the outpouring of the Holy Spirit is abundance of rain on the thirsty land (Isa 44:3; cf. 32:15; 35:6f.).

שִׁמְמוֹ (*šimmā'ôn*). See no. 1926d.

1927 שָׁמַד (*šāmad*) *bind, join*.

Derivatives

1927a שָׁמַד (*šemed*) *couple, pair*.

1927b שָׁמִיד (*šāmid*) I, *bracelet* (Num 31:50; Ezk 16:11).

1927c שָׁמִיד (*šāmid*) II, *cover, of vessel* (Num 19:15).

The verb relates to fastening a sheath for a sword to the loins (II Sam 20:8). Another use describes the tongue's deliberate production of deceit; it frames deceit (Ps 50:19). Three times the verb is used to describe the seduction of the Israelites to idolatry at Baal-Peor under Balaam's suggestion to Balak, the king of Moab (Num 25:3, 5; Ps 106:28; LXX has *telēō*, used by Herodotus (4.79) for "to initiate into the mysteries," Snaith). The people sacrificed to their gods, ate, worshiped, and participated in cult prostitution. The entire activity is powerfully described as yoking oneself to Baal-Peor. Perhaps the verb indicates that the people even bound themselves to this false worship in covenant. This verb connotes how flagrantly obstinate their rebellion against Yahweh was.

šemed. *Couple, pair, yoke.* (ASV and RSV the same, but RSV "team" (Jer 51:23).) It refers to two animals yoked together or to those that ride side by side, like horsemen riding in pairs (Isa 21:7). Oxen were yoked for plowing; e.g., Elijah

plowed with twelve yoke of oxen (I Kgs 19:19). Very wealthy, Job owned five hundred yoke of oxen (Job 1:3). *šemed* also stands for a measure of land, perhaps the amount that a span of oxen can plow in one day (i.e. around a half acre (Isa 5:10; I Sam 14:14)).

שָׁמָה (*šammā*). See no. 1929a.

שִׁמְמוֹ (*šimmūq*). See no. 1930a.

1928 שָׁמַח (*šāmah*) *sprout, spring up*.

Derivative

1928a שָׁמַח (*šemah*) *sprout, growth, branch*.

There are thirty-two occurrences of this verb and half as many different translations involving the ideas of growing, budding, and sprouting. Some connect it with the Arabic and Syriac root "to shine forth," but the word is never so used in Hebrew. Rather it is limited to the realm of grass, plants, and trees in the Qal and Hiphil forms (e.g. Gen 2:5, 9; Ex 10:5; Gen 41:6, 23; Gen 2:9; Ps 104:14; 147:8), and the abundant growth of hair or the beard (in the Piel stem, Jud 16:22; II Sam 10:5; and Ezk 16:7).

In addition, the Qal and Hiphil forms are used metaphorically in connection with other objects: a posterity springing up (Isa 44:4), trouble (Job 5:6), the future (Isa 42:9), the restoration (Isa 58:8), and righteousness and praise (Isa 61:11).

Especially significant are the passages related to the coming up of a shoot from the root or seed of David, i.e. the future messianic person (II Sam 23:5; Jer 33:15; Ezk 29:21; Ps 132:17; Zech 6:12).

šemah. *Sprout, growth, branch.* The noun appears twelve times and is used as a messianic term in at least five passages.

A late Phoenician inscription discovered at Larnaka, Cyprus dating from the third century B.C. contains the phrase *šemah šedek* "the right-ful shoot" which meant that the individual was the legitimate heir to the throne. A similar idea is found in the fifteenth century B.C. Ugaritic Keret epic which calls Keret *šph ltpn*, i.e. "the shoot or progeny of Ltpn." Thus *šemah* is a technical term signifying a scion or son. While the idea is attested in Ugaritic with the root *šph*, so far the only use of the root *šmh* attested in Ugaritic is in several personal names.

As David reflects on the everlasting covenant which Nathan previously announced to him, he asks rhetorically; "Will not God cause all my salvation and all my desire to sprout?" (II Sam

23:5). The later biblical writers take up this theme and answer, as did one of the Psalms of Ascent (132:17), with a "yes!" In Jerusalem God will cause the horn of David to sprout up; in fact, it will spring forth for the whole house of Israel (Ezk 29:21).

The first writer to take up the thought of II Sam 23:5 and use the root *šmh* as a noun to designate the Messiah is Isaiah (4:2). Many deny that Isaiah is referring to the Messiah when he speaks of "the Branch or Shoot of Yahweh" because it is paralleled by the expression "the fruit of the earth." Therefore, 4:2 is simply a reference to the agricultural prosperity of the land. But this view fails to notice that both of these expressions are elsewhere messianic. It also neglects to account for the unusual limitation of this fruitfulness "in that day"; the fruitfulness is for the survivors of Israel. Furthermore, they overlook the progressive nature of revelation, for certainly II Sam 23:5 and perhaps Ps 132:17 are controlling ideas when we come to the eighth century B.C. Thus the "Sprout of Yahweh" (or as clarified by the cognate studies, "the son of Yahweh") is an obvious reference to the divine nature of the *šemaḥ*. Yet his human nature is also in view, for he is "the Offspring or Fruit of the Earth."

In Jer 23:5-6 and 33:15-16, he is "the Righteous Branch [or Sprout]" raised up for David to reign as King. While focusing on his human, but regal nature, this passage also stresses his deity by calling him "the Lord our Righteousness." Note that the context of both passages is the promise that Israel will return to the land. Even more pointedly, Jer 33:19-26 sets the *šemaḥ* promise in line with God's previous promises to Abraham, Isaac, Jacob, the Levite priests, and David!

Zechariah (3:8) pictures the Branch (*šemaḥ*) as the Lord's Servant. No doubt the allusion is to Isaiah's archetypal statements concerning Yahweh's Servant, Jesus Christ. In Zech 6:12 the prophet proclaims, "Behold the Man" who is "a priest on his throne," a ruler, a counselor of peace, whose name is Branch. Zechariah sees the high priest Joshua as a type of the promise, but only a pledge of God's future fulfillment in Jesus Christ.

The DSS use the phrase *šemaḥ dāwid* as a Messianic term in explanation of the Davidic covenant of II Sam 7:14 (JBL 77:353).

The NT makes at least two references to this messianic title "Branch" using the LXX translation of the root *šmh*: *anatolē* and *anatellō*. Hebrews 7:14 is to be translated "our Lord sprang forth (or sprouted) from Judah." But in Luke 1:78 with its *anatolē exhypsous* the equation of *šemaḥ* YHWH is complete. Therefore we translate the verse, "Because of the tender mercy of our God by which the Branch from on High shall visit us." The only change needed is to convert

the term "height" into the divine name and the or expression appears again.

Additional evidence for this messianic concept may be found in *nēšer* "branch" and *hōter* "shoot" (Isa 11:1) and *yônēq* "young plant" and *shōreš* "root" (Isa 53:2).

צָמִיד (*šamid*). See nos. 1927b,c.

צָמִים (*šammim*). See no. 1929b.

צְמִיתָ (*š'mitūt*). See no. 1932a.

1929 צָמֵם (*šmm*). Assumed root of the following.

1929a צֶמֶה (*šammā*) woman's veil (Isa 47:2; Song 4:1, 3; 6:7).

1929b צָמִים (*šammim*) snare, trap (Job 5:5; 18:9). Meaning uncertain.

1930 צָמָק (*šāmaq*) dry up, shrivel (Hos 9:14, only).

Derivative

1930a צִמּוּק (*šimmûq*) bunch of raisins (I Sam 25:18; 30:12).

1931 צֶמֶר (*šmr*). Assumed root of the following.

1931a צֶמֶר (*šemer*) wool (Isa 1:18; Ezk 27:18).

1931b צֶמֶרֶת (*šammeret*) treetop (Ezk 17:3, 22; 31:3, 10).

צֶמֶרֶת (*šammeret*). See no. 1931b.

1932 צָמַת (*šāmat*) put an end to, cut off, destroy. (ASV and RSV vary frequently; ASV also "consume"; RSV "vanish," "hem in," "wipe out.")

Derivative

1932a צְמִיתָ (*š'mitūt*) completion, finality (Lev 25:23; 30).

The word *šāmat* occurs fourteen times. The verb is a very strong word for destruction or for completely silencing someone (KB; cf. Job 23:17); e.g. friends vanish under stress like snow before the heat (Job 6:15ff.). It describes the intense desire of one to obliterate completely his enemies (cf. Ps 143:12). David was able to vanquish his foes, because God had caused them to turn their backs (Ps 18:40 [H 41]) // *māḥaš* (Ps 18:38 [H 39]) as in Ugaritic 'nt II:7f. Ais WUS no. 2330). The Psalmist too was attacked by those who wished to eliminate him. The method of at-

tack included false charges of committing a theft (Ps 69:4 [H 5]). Consequently in his justice God seeks to cut off from his city those who slander the righteous and those who possess an arrogant heart (Ps 101:5f.; cf. Ps 73:27). When the Psalmist encounters God's fierce assaults, he too feels that he is being destroyed (Ps 88:16 [H 17]). Similarly one who serves God zealously is consumed by that very zeal, especially when he sees his adversaries forgetting God's word (Ps 119:139). He who lamented the destruction of Jerusalem also had his life jeopardized by being "flung . . . alive" (RSV; "cut off my life" ASV) into a dungeon with water that reached up to his head (Lam 3:53f.). Yet in faith these men continue to make their prayer to Yahweh confident of deliverance (Ps 88; Lam 3:55ff.).

שָׁן (*šēn*). See no. 1936a.

1933 שֹׁנֶה (*šōneh*), שֹׁנֶה' (*šōne'*) *flocks* (Ps 8:8; Num 32:24). A by-form of *šō'n*.

שִׁנָּה (*šinnā*). See nos. 1937a, 1938a.

שָׁנוּט (*šānūa'*). See no. 1939a.

שִׁנּוֹר (*šinnôr*). See no. 1942a.

1934 שָׁנַח (*šānah*) *descend* (Jud 1:14; Josh 15:18; Jud 4:21).

שָׁנִיפ (*šānip*). See no. 1940a.

1935 שָׁנַם (*šānam*) *dry up, harden* (Gen 41:23).

שָׁנִין (*šānîn*). See no. 1936c.

1936 שָׁנָן (*šnn*) I. Assumed root of the following.

1936a שָׁן (*šēn*) *thorn, barb* (Prov 22:5; Job 5:5). Meaning uncertain.

1936b שִׁנָּה (*šinnā*) *hook, barb* (Amos 4:2, only).

1936c שָׁנִין (*šānîn*) *thorn, prick* (Num 33:55; Josh 23:13).

1937 שָׁנָן (*šnn*) II. Assumed root of the following.

1937a שִׁנָּה (*šinnā*) *coolness* (Prov 25:13, only).

1938 שָׁנָן (*šnn*) III. Assumed root of the following.

1938a שִׁנָּה (*šinnā*) *large shield* (I Sam 17:7; II Chr 11:12). The smaller shield was called *māgēn*.

1938b שִׁנְשֶׁנֶת (*šinšenet*) *jar* (Ex 16:33, only).

1939 שָׂנְאָה' (*šāna'*) *be modest, humble*. Occurs only once, in the Hiphil (Mic 6:8).

Derivative

1939a שָׁנוּט (*šānūa'*) *modest* (Prov 11:2, only).

1940 שָׁנַפ (*šānap*) *wrap, wind up together* (Lev 16:4; Isa 22:18).

Derivatives

1940a שָׁנִיפ (*šānip*) *turban* (e.g. Zech 3:5; Job 29:14).

1940b שִׁנְפָּה (*š' nēpā*) *winding* (Isa 22:18 only).

1940c מִשְׁנֶפֶת (*mišnepet*) *turban of the high priest*.

misnepet. *Turban*; also a sign of royalty. (KJV renders it "mitre" and "diadem"; ASV, "mitre" throughout; RSV, "turban.")

The term occurs twelve times, eleven in Ex and Lev and once in Ezk (21:31). It was the distinctive headgear of the high priest. The reference in Ezk vividly foretells the cessation of Davidic kings and Aaronic priests. The translation *turban* is supported by the derivation of the word from *šānap* meaning "to wrap around."

C.L.F.

שִׁנְשֶׁנֶת (*šinšenet*). See no. 1938b.

1941 שָׁנַק (*šnq*). Assumed root of the following.

1941a שִׁנּוֹק (*šinōq*) *pillory* (Jer 29:26, only).

1942 שָׁנַר (*šnr*). Assumed root of the following.

1942a שִׁנּוֹר (*šinnôr*) *pipe, spout, conduit* (II Sam 5:8; Ps 42:8). See Madvig, D. H., "Gutter," in ZPEB, II, p. 854.

1942b שִׁנְתָּרוֹת (*šant' rôt*) *pipes feeding lamps with oil* (Zech 4:12).

שִׁנְתָּרוֹת (*šant' rôt*). See no. 1942b.

1943 שָׂעַר (*šā'ad*) *step, march*.

Derivatives

1943a שָׂעַר (*šā'ad*) *step, pace* (e.g. Prov 30:20; Jer 10:3).

1943b שָׂעָדָה (*š' ādā*) I, *marching* (II Sam 5:24; I Chr 14:15).

1943c שָׂעָדָה (*š' ādā*) II, *armlet, anklet* (Isa 3:20; II Kgs 11:12).

1943d מִשְׁעָד (*miš'ād*) *step* (Dan 11:43; Ps 37:23; Prov 20:24).

1943e שָׂעָדָה' (*š' ādā*) *armlet, ankle chain* (Num 31:50; II Sam 1:10).

šā'ad means to walk in cadence (cf. II Sam 6:13). It describes the manner in which one is brought before the king (Job 18:14). It pictures how one methodically takes the path to the house of the harlot, fully conscious of his direction but

totally ignorant of its consequence—Sheol (Prov 7:8; cf. 5:5). The teacher instructs his student in the way of wisdom in order that his pattern of living (steps) will not bring him hardship and sorrow (Prov 4:10ff.).

Yahweh watches the path that man takes (Job 34:21). God gives the Psalmist a wide place to step on in order that he will not slip and fall (II Sam 22:37). Proverbs 16:9 states, "A man's mind plans his way, but Yahweh directs his steps." This proverb carefully balances the interplay between God and man in directing a person's destiny. Man must initiate his course of action, but the full consequence of the outcome belong to Yahweh. But the believer realizes that he needs God's direction. Jeremiah in a repentant mood and seeking Yahweh's favor profoundly affirms, "I know, O Yahweh, that the way of man is not in himself, that it is not in man who walks to direct his steps" (Jer 10:23).

In military terms it is used primarily for Yahweh. He marches before Israel's army, securing the battle for them (Jud 5:4). As God goes forth, all the natural elements respond, acknowledging his lordship and supporting his effort (Ps 68:7f. [H 8f.]; Hab 3:12; cf. Jer 10:5).

1944 שָׁא (šā'ā) *stoop, bend, incline* (e.g. Isa 51:14; Jer 2:20).

שָׁאִי (šā'ip). See no. 1946a.

שָׁאִיר (šā'ir). See no. 1948a.

1945 שָׁאֵן (šā'an) *wander, travel* (Isa 33:20, only).

1946 שָׁאֵן (šā'p). Assumed root of the following.
1946a שָׁאֵן (šā'ip) *wrapper, shawl or veil* (Gen 24:65; 38:14).

שָׁאֲשׁוּיִם (šā'āšū'im). See no. 1891a.

1947 שָׁאֵק (šā'aq) *cry, cry for help, call*. (ASV and RSV similar, except Niphal RSV "call out," ASV "gather together.")

Derivative

1947a שָׁאֲקָ (šā'āqā) *cry, outcry*.

BDB suggests the original meaning in Arabic was "sound as thunder." This root means to call out for help under great distress or to utter an exclamation in great excitement (cf. II Kgs 2:12). E.g., immediately on realizing that the pottage they were contentedly eating was poisonous, the sons of the prophets cried out in anguish (II Kgs 4:40). A woman who is raped is exonerated as long as she cries for help. If she does not, she is guilty of consenting to adultery (Deut 22:23–27). Israel's leaders often had to petition God earnestly for help. As a leader, Moses faced numer-

ous difficult situations which caused him to cry out in desperation to Yahweh for direction (cf. Ex 17:4). One time God's response to Moses was simply for Moses to cease crying and get into action (Ex 14:15). Further it describes the response of Esau to the loss of his blessing and of the nation Israel to the loss of the ark of the Philistines (Gen 27:34; I Sam 4:14). This word often refers to the cry of those plundered and ravaged in war (cf. Jer 49:21).

A strong outcry frequently indicates that righteousness is absent or judgment is being executed. Even though Yahweh established Israel as a nation to produce justice and righteousness, he discovered bloodshed and a cry; i.e., the city was oppressing the unfortunate (Isa 5:7). The righteous lament in loud cries over the loss suffered by their nation (cf. Isa 33:7; Lam 2:18). They intercede for forgiveness by repenting of the sins which led to this calamity and seeking God's help for the future. God listens to the cries of men, particularly when the righteous cry out under affliction. The Hebrews cried under the weight of their bondage in Egypt (Ex 3:7). God heard their cry and came to deliver them through the mighty deeds at the Exodus. Because of the cry of the oppressed in Sodom and Gomorrah, God came to judge the oppressors (Gen 18:21; 19:13). God especially promises to hear the cry of the afflicted, the alien, the orphan, and the widow (Ex 22:22f. [H 21f.]; cf. Ps 9:12 [H 13]). The fact that God hears the cries of his people and delivers them from their distress distinguishes him as the true, living God; for men cry to idols, but they do not respond (Ps 107:6, 28; Isa 46:7).

God, however, returns punishment to the wicked in kind. In response to the outcry of the Hebrews, the Egyptians uttered a great cry because of their sorrow over the death of their firstborn (Ex 11:6; 12:30). In the end times a portion of the punishment of the wicked will be crying from a painful heart (Isa 65:14).

God's suffering servant accomplishes his task differently than earthly rulers who seek reform and office. He will not cry in the streets (Isa 42:2); i.e. he will not seek through rhetoric to arouse the multitudes to move against their present rulers.

In the Niphal and Hiphil šā'aq means "to be called into assembly" (cf. Jud 7:23f.). A leader may summon the people together to pursue their enemies. Saul was the first leader since the Conquest who was able to assemble the entire nation, to go to battle against their enemies (I Sam 13:4). The people could also be called into assembly in order for their leaders to present an important matter. Samuel gathered such an assembly at Mizpah in order to install Saul as king (I Sam 10:17).

Bibliography: THAT, II, pp. 568–74.

J.E.H.

- 1948 שָׁר (*šā'ar*) *be or grow insignificant* (e.g. Job 14:21; Jer 30:19).

Derivatives

- 1948a שָׁר (*šā'ir*) *little, insignificant, young*.
 1948b שָׁרָה (*š' 'irā*) *youth* (Gen 43:33; Jer 14:3; 48:4).
 1948c מִשְׁעָר (*miš'ār*) *a small thing* (e.g. Gen 19:20; Job 8:7).

šā'ir. *Little, etc.* ASV and RSV translate similarly. In some cases the RSV is superior (cf. I Sam 9:21; Jer 14:3; cf. Jer 48:4; Ps 68:27 [H 28]). Our root denotes that which is smallest in age and, therefore, least in significance, privilege, and desirability (I Sam 9:21; hence, Jer 14:3). There are Akkadian and Arabic cognates; its Ugaritic equivalent is *šgr* (UT 19: no. 2182). For synonyms see *qātōn*; *dal* (poor, weak, Jud 6:15), *bāzā* (despised, Ps 119:141). Its antonyms are *bākōr/bākīr* (firstborn), *rab* (elder, Gen 25:23), *y' shish* (old, Job 32:6), and *'āšūm* (strong, Isa 60:22).

This word for last born child (the opposite of *bākōr/bākīr*) also connotes insignificance. Even as the firstborn received the double portion and blessing, the second born of two received a lesser portion and blessing. Similarly, Saul protested his unworthiness on the grounds that his family was the least significant (cf. Ps 68:27 [H 28]) among the small/little Benjamites (Gen 43:33; note that the scepter was not to depart from Judah, although not the firstborn, Gen 49:10). Thus, our word connotes last born and/or insignificant (Jer 49:20). The young (insignificant) are the unwise (Job 32:6) and the disdained (Job 30:1). Sometimes our word refers to servants or slaves (Jer 14:3; 48:4). The Psalmist affirms his humble estate and his obedience to God (Ps 119:141; cf. *'ānā*).

L.J.C.

- 1949 שָׁפַד (*šāpad*) *draw together, contract* (Lam 4:8).

- 1950 שָׁפַח (*šāpā*) *I, look out or about, watch*.

Derivatives

- 1950a שִׁפְיָה (*šippiyā*) *lookout post* (Lam 4:17).
 1950b מִשְׁפַּח (*mišpeh*) *watchtower, lookout point* (Isa 21:8; II Chr 20:24).

šāpā conveys the idea of being fully aware of a situation in order to gain some advantage or keep from being surprised by an enemy. The verb appears in the sense "to lie watching in ambush"; the wicked watches the righteous to slay him (Ps 37:32). Conversely the wise woman watches (looks to) the ways of her household; i.e. she diligently takes care of its every need (Prov

31:27). So too Yahweh is alert to what happens on earth in order that he may properly judge its inhabitants (Prov 15:3; cf. Ps 66:7). It also expresses the posture of faith; Micah says, "As for me, I will look to Yahweh, I will wait for the God of my salvation; my God will hear me" (7:7). Dhorme takes the form in Job 15:22 as a passive ptc. (*šāpū*) meaning the result of being looked over, "choice" or "marked."

As a ptc. (*šōpēh*) it means "watchman," one who was stationed on the wall and was responsible to inform the nation's leadership of any danger (cf. I Sam 14:16; II Sam 18:24ff.; II Kgs 9:17–20). Failure in his duties often carried the death penalty. The prophetic office is sometimes described in this language. To Ezekiel God says, "I have made you a watchman for the house of Israel: whenever you hear a word from my mouth, you shall give them warning from me" (3:17; cf. 33:7; Jer 6:17; Hab 2:1). If Ezekiel failed to give them God's warning he was liable for their lives; but if he faithfully proclaimed the message, he was free from any further responsibility regardless of the people's response (Ezk 3:18–21). Although God was faithful in sending Israel watchmen, many became blind to their mission (Isa 56:10). The failure of these watchmen and the rejection of the true ones were major reasons for the downfall of Israel. Conversely, the true prophets will be the watchmen who are first to sing of the advance of God's new saving deeds (Isa 52:7–10).

The use of the name Mispah in Gen 31:49 is of interest. It has given its name to a Mispah benediction, "The Lord watch between me and thee." But originally it was far from a benediction. It was a sign of a kind of boundary between Jacob and his hostile father-in-law. Both parties here promised to keep the peace.

J.E.H.

- 1951 שָׁפַח (*šāpā*) *II, overlay*.

Derivatives

- 1951a שִׁפּוּי (*šippūy*) *metal plating* (Isa 30:22; Ex 38:17, 19; Num 17:3–4).
 1951b שָׁפִית (*šāpīt*) *rug, carpet* (Isa 21:5).
 1951c שֶׁפֶת (*šepet*) *plated capital of pillar* (II Chr 3:15).

Many of the furnishings in the tabernacle were to be overlaid with pure gold, including the ark of the covenant inside and out (Ex 25:10f., 13, 28), the table (Ex 25:23f.), and the altar of incense (Ex 30:3, 5). The horns of the altar of burnt offering were overlaid with bronze (Ex 27:2, 6).

Solomon overlaid the inside of the temple with gold (I Kgs 6:20ff.) and many of its furnishings (I Kgs 6:20, 22, 28, 30, 32). He also adorned the house with precious stones (II Chr 3:6). Even his

great ivory throne was overlaid with gold (I Kgs 10:18). Apparently the gold overlay sometimes had to be replaced. Hezekiah is said to have overlaid the doors and the doorposts of the temple (II Kgs 18:16). This gold was not the thin gold leaf used today; it could be stripped off and used as tribute (II Kgs 18:16).

This root also is used for laying a wood floor and panelling (I Kgs 6:15). Proverbs compares a person with smooth speech but an evil heart to a pot glazed with silver dross (Prov 26:23). (But see *šig* for the possibility that silver dross in this verse is one word, witnessed to in Ugaritic, meaning *white glaze*).

A difficult text is Isa 21:5; *šāpōh haššōpīt*, which is taken by various scholars from either *šāpā* I, "they set the watch" (ASV), or *šāpā* II, "they spread the rugs" (RSV). The latter seems to fit the context better. The nobles, engrossed in their own pleasure, continued to feast during the darkening hours which threatened their nation's existence.

 1953d מַצְפֹּן (*mašpōn*) *hidden treasure* (Obadiah 6, only).

šāpan occurs thirty-six times. It means to conceal something with a definite purpose, either for

protection or for sinister reasons. Moses was hidden at home for three months to protect him from Pharaoh's death decree against all Hebrew male children (Ex 2:2). The wicked hide themselves in order to ambush the innocent (Prov 1:11), but in the end it is their own lives for which the ambush is set (1:18). The wicked cannot conceal their iniquitous deeds from God (Jer 16:17). Sins are said to be stored up in the sense that they will receive their appropriate punishment on a day of judgment (Hos 13:12; cf. Job 15:20; 21:19).

Amidst trials and plots of men, God hides his people in his presence (Ps 27:5; 31:20 [H 21]). Israel's God displays his special concern for his people in giving them security and shelter. In fact, his people are referred to as the hidden ones (Ps 83:3 [H 4], RSV "[thy] protected ones").

The word also connotes storing or treasuring things on account of their value (Jer 36:29). Thereafter Jeremiah refers to Judah's foe as Babylon. He goes on to prophesy that Babylon shall be defeated by a nation from the north (Jer 50:9; 51:48). Ezk too places Israel's foes who will fight the last climactic war as coming from the far places of the north (Ezk 38:6, 15). The north, then, becomes a harbinger of evil. In various mythologies it is the seat of demons.

šāpōn. North. In Canaanite mythology the north was considered to be the place for the meeting of the assembly of the gods. The gods assembled on Mount *šāpān*; *šāpān* may be taken as a proper name. Here Baal reigned supreme. The mountain is usually identified with Mount Casius, Jebel el Aqra', to the north of Ras Shamra. Kapelrud suggests that the tower for sacrifices in Baal's temple may have been called *Sapan*, a mythical connection between the mountain and the cultic shrine (p. 58). This concept of the divine assembly on Mount *šāpān* is alluded to in Isa's oracle against Babylon in which he pictures the proud king saying, "I shall sit on the mount of assembly in the far north" (14:13). The king asserts for himself both universal and divine lordship. Such arrogance was soon to encounter the fury of God's wrath.

The fact that Ps 48:2 [H 3] places Mt. Zion figuratively in the far north means that God is the sole ruler of the universe. He alone is to be revered and praised. It is also possible that this verse should be taken more locally. *yarē kā* can mean merely "side" (Ex 26:22 cf. *yarek* Num 3:35). The temple was located on the north side of David's city. God is sometimes pictured as appearing out of the north to one of his servants (Job 37:22); he moves from his throne to communicate his splendor directly. Ezk was overwhelmed by a stormy wind coming out of the north, and from the midst of the cloud he had a vision of Yahweh's glory (Ezk 1:4ff.).

God promises to bring his people back from the north (Isa 43:6; 49:12; Jer 16:15). There is no location where an earthly power can banish them from his concern (Jer 31:8). Job says that God stretches out the north over the void (26:7). This statement shows that God created even the sinister places or the mountain of the gods from nothing. No evil power or god or divine assembly, therefore, has any existence co-eternal with God or any power or existence outside of God's creative power (cf. Ps 89:12 [H 13]).

Meaning uncertain.צפעני (*šip'ōni*). See no. 1954b.1957 *צפא (*šāpap*) *chirp, peep*.

Derivative

1957a צפצפה (*šapšāpā*) *a kind of willow* (Ezk 17:5, only).

šāpap occurs only four times, in Isa. It appears in the Pilpel and is onomatopoeic. It stands for the chatter of an angered bird (Isa 10:14). In that passage the Assyrian king boasts of his great prowess and wisdom in conquering the nations and taking their wealth quite easily just as a man who robs a nest without any bird making a sound. For this boastful arrogance God is about to destroy Assyria (Isa 10:15-19). According to Isa 38:14 Hezekiah expressed his mourning for a fatal sickness in sounds like those from a swallow or a crane. In a different line of thought the word indi-

cates the sound produced by the dead (Isa 29:4) and also by wizards and mediums perhaps mimicking the sound of the dead in their attempt to arouse them (Isa 8:19). When Ariel, the city of David, is defeated, her end will be merely to let her voice peep from the dust (Isa 29:4). Isaiah claims that when God hides his presence from Israel, the people are advised to turn to the occult for direction and counsel, but he asserts that Israel is to find her meaning in the teaching and the testimony given by God only (Isa 8:19f.).

J.E.H.

צפצפה (*šapšāpā*). See no. 1957a.1958 צפר (*šāpar*) I. Meaning uncertain; occurs only in Jud 7:3.1959 צפר (*špr*) II. Assumed root of the following.1959a צפור (*šippôr*) *bird*. (ASV and RSV identical, except Ps 102:7 [H 8] ASV has "sparrow.")

This word for bird is related to the "chirping" sound that a bird makes. God is concerned for the birds. He created them and gave them a place to nest (Ps 104:17). He preserved them during the flood (Gen 7:14). The sparrow makes its nest even at Yahweh's altars (Ps 84:3 [H 4]). A part of man's invested lordship is over the birds of the air (Ps 8:8 [H 9]).

Certain birds are considered clean. They are edible (Deut 14:11) and some of them, such as doves, were even specified as acceptable sacrifices. The majority, if not all, of the unclean birds are birds of prey.

An Israelite was bidden to show kindness even to birds; if he found a nest with eggs or young ones, he could not take both young and the mother bird as well (Deut 22:6f.). Apparently some birds were domesticated as pets (Job 41:5 [H 40:29]). A bird, however, was never to be used to represent the deity (Deut 4:17), as was done in Egypt and Mesopotamia.

The bird served to convey many different pictures: 1) quick flight for safety (Ps 11:1); 2) one being hunted (Lam 3:52); 3) one being snared unsuspectingly (Prov 6:5; cf. Ps 124:7; Eccl 9:12); 4) straying from home (Prov 27:8); 5) flightiness (Prov 26:2); 6) a strong feeling of loneliness (Ps 102:7 [H 102:8]); 7) the manner of the return of Israel from exile (Hos 11:11); 8) the peoples of the various nations who shall inhabit the noble cedar, the Kingdom of God (Ezk 17:23); 9) Yahweh's protecting Jerusalem as a hovering bird (Isa 31:5).

1960 צפר (*spr*)

1960 צפר (*spr*) III. Assumed root of the following.

1960a צפירה (*s"pirā*) *plait, chaplet* (Ezk 7:7, 10; Isa 28:5).

1961 צפר (*spr*) IV. Assumed root of the following.

1961a צפֿרֿן (*šippōren*) *fingernail, stylus point* (Jer 17:1; Deut 21:12).

1962 צפר (*spr*) V. Assumed root of the following.

1962a צפֿירָ (*šāpir*) *he-goat*. (ASV and RSV the same.)

šapir appears only in late texts (Dan, Chr and Ezr). The he-goat was one of the animals used for a sin offering; e.g., twelve were offered at the dedication of the second temple (Ezr 6:17; cf. II Chr 29:21). In a vision, Daniel saw a he-goat with a horn between its eyes arise from the west (Dan 8:5–8). The goat is identified as the king of Greece, Alexander (Dan 8:21). Sometimes fierce, it is a symbol of power especially in domineering sheep (cf. Ezk 34:17; Zech 10:3).

צפֿת (*šepet*). See no. 1951c.

1964 צִקְלֹן (*šiqqālōn*). Meaning doubtful, perhaps garment (II Kgs 4:42).

1965 צֶר (*šōr*) *Tyre*. (ASV and RSV the same.)

Tyre was one of the main city-states of the Phoenicians in the area of Lebanon. The center of Tyre was located on a rocky isle, a short distance from the coast. Such a location provided an excellent defense. With a long breakwater it boasted one of the best harbors along the Palestine coast. Its history paralleled the Hebrew occupation of Canaan. The Phoenicians were excellent merchants of the seas and traders in purple. They worshipped many gods, including Baal.

At various periods they interacted with Israel, commercially and religiously. David entered into covenant with Hiram, King of Tyre. He sent the famous cedar trees of Lebanon for the building of the palace (II Sam 5:11f.). Hiram continued the agreement with Solomon and supplied him lumber and gold needed for building the temple and his own house (I Kgs 5). Another Hiram, a skilled craftsman, was sent to instruct and help the Hebrew craftsmen in the various aspects of building (I Kgs 7:13f.). In return Solomon furnished King Hiram with large supplies of food.

Later he had to add twenty cities in Galilee to the payment, but Hiram was not satisfied (I Kgs 9:11–14). Solomon also joined with Hiram in merchant ventures to the African coast in search of all sorts of exotic goods (I Kgs 10:22); Jehoshaphat unsuccessfully tried a similar joint adventure (I Kgs 22:48f.). The greatest impact of Phoenician religion on Israel was under the zealous efforts of Jezebel, daughter of Ethbaal, King of Tyre, married to Ahab. Her efforts created a crisis for Yahwism, which was championed by Elijah and Elisha (I Kgs 16:29–II Kgs 10:35). And her impact was extended to Judah with the marriage of her daughter Athaliah to Jehoram, King of Judah (II Kgs 8:16ff.; 11:1–20). Later Tyre and Sidon once again supplied cedar trees for the building of the second temple in exchange for food, drink and oil (Ezr 3:7). But the merchants of Tyre violated Jewish law by selling fish and other goods on the Sabbath (Neh 13:16).

The prophets composed many oracles and laments of destruction against Tyre for its arrogant pride as the greatest merchant of the sea who handled the finest and richest goods (Isa 23; Jer 25:22; 47:4; Ezk 26–28; cf. Ps 45:12 [H 13]). They had gained enormous wealth through their outstanding wisdom (Joel 3:1–8 [H 4:4–8]; Zech 9:3f.; Ezk 28:3ff.). Skill and success had led its prince to assert that he was a god (Ezk 28:2, 9). In a lament Ezk describes him as perfect in the Garden of Eden, but he became corrupt with violence in his trade. Therefore God had him cast out of the garden and punished (Ezk 28:12–19). But through Isaiah God extended the hope of restoration to Tyre. Her merchandise and her hire then would be dedicated to Yahweh and she would supply food and fine clothing to those who dwell before him (Isa 23:17f.).

- 1970 צָרַךְ (*šrk*). Assumed root of the following.
 1970a צָרֶךְ (*šōrek*) *need* (II Chr 2:15, only).

- 1971 צָרַע (*šāra'*) *be diseased of skin, leprous*. (ASV and RSV similar). This denominative verb is used chiefly in the Pual.

Parent Noun

- 1971a צָרַעַת (*šāra'at*) *malignant skin disease, leprosy*. Strictly, leucoderma and related diseases. (ASV and RSV similar: "leprosy").
 1971b צָרָה (*šārā*) *hornet*.

While usually rendered leper or leprous, the term "leper" is not correct medically, since *šāra'at* refers to a wider range of skin diseases (cf. "malignant skin disease," NEB). For convenience, however, the term "leper" can be retained.

A person with leprosy, apart from the telltale malignant raw flesh and white hair, was to be otherwise identified by torn clothes, announcement of "unclean" when in the streets and was to live isolated from the community. Four persons are named in the OT as becoming leprous. Not counting Moses (Ex 4:6; cf. also II Kgs 7:3), there were Miriam (Num 12:10), Uzziah (II Kgs 15:5), Gehazi (II Kgs 5:27) and Naaman, the Syrian (II Kgs 5:1).

God may inflict the disease of *šāra'at* as punishment for sins such as jealousy (cf. Miriam), anger, and lack of full compliance with God's commands (cf. Uzziah), and covetousness (cf. Gehazi). One must not conclude, however, that all sickness is a result of an individual's sin (cf. Job; Lk 13:1-5; Jn 9:1-7).

šāra'at was not necessarily incurable (cf. II Kgs 5:7). Leprosy by contrast, was likely incurable (Lev 13). In any event, healing of *šāra'at*

could serve as a sign of divine power (Ex 4:6; II Kgs 5:8).

The isolation of a leprous person was doubtless a sanitary measure in order to avoid further contagion. That a priest in Israel's theocracy was to diagnose the illness does not mean that today's clergy should become health officers. But the principle of God's concern for the health of bodies is not only self-evident but remains an enduring principle (cf. Jesus, Mt 8:2-3).

Diseases with eruptions affecting the skin are sometimes mild, sometimes, as in smallpox, scarlet fever, etc., both dangerous and highly contagious. The only effective control in antiquity would have been isolation. Only the Hebrew laws had this very valuable provision.

šāra'at is found primarily (twenty times) in the two chapters that govern the diagnoses and the cleaning measures for one who had become unclean (*tāmē'*, Lev 13, 14). In the nature of a contagion, *šāra'at* refers not only to eruptions on the skin but to mildew or mold in clothing (Lev 13:47-52) or in houses (Lev 14:34-53); therefore obviously the word is not specific for leprosy. The determination by the priest of an individual as unclean meant separation from the community, and ceremonial unfitness to enter the temple (cf. II Chr 26:21). The cleansing measures to be performed upon recovery involved a ritual with two birds, which ritual according to KD was necessary for restoration to the community (Lev 14:2-9). An additional set of offerings followed, notably the guilt offering, perhaps because disease is ultimately to be linked with sin (Lev 14:10-20).

There is no Scriptural warrant for regarding leprosy as a type of sin, though the analogy can be helpful for illustrative purposes.

E.A.M.

צָרַעַת (*šāra'at*). See no. 1971a.

- 1972 צָרַפַּה (*šārap*) *smelt, refine, test*. (ASV and RSV sometimes identical, others varied; both also "goldsmith," "refine," "try"; ASV also "founder," "purge"; RSV also "silversmith," "cast," "smelt," "prove true.")

Derivatives

- 1972a צָרַפִּי (*šār*pi*) *goldsmiths* (Neh 3:31, only).
 1972b מַצְרֶפֶה (*mašrēp*) *crucible* (Prov 13:3; 27:21).

šārap is primarily used for gold and silversmiths and for the process of refining metals

before they were worked into fine vessels (Prov 25:4). One of the great demands for the smith's skill was for the making of molten images (Jud 17:4). An idol could be gold plated and fitted with silver chains which were cast for it (Isa 40:19). The smith who practices his skill in making idols, however, will be put to shame by his work, for these images are nothing but a delusion (Jer 10:14; 51:17).

Various aspects of the refining process are vividly used for judgment on and purification from sin; e.g. a blazing furnace, bellows, lead, dross, refuse silver (e.g. Isa 1:25; Jer 6:27-30; Ezk 22:18-22). God seeks to remove from his people all wickedness and sin so that they can endure his holy presence. Man has the responsibility of purifying himself so that he can be refined; i.e. he must respond obediently to God's word in order to experience cleansing (Dan 12:10). Further, when his people are wayward and violate the covenant, God seeks to bring them back by refining them (Jer 9:7 [H 6]). God tries them in the furnace of affliction (Isa 48:10). Although they have to endure difficult circumstances, as long as their faith in him remains firm, they will eventually experience deliverance (Ps 66:6-12). Between the promise and its fulfillment, the word itself tests and refines the one who has heard it (Ps 105:19). However, sometimes the people become so obstinate that no matter how intense the refining fire becomes, it is in vain (Jer 6:27-30). Then God must come against his people in judgment. But in the midst of this judgment, God is still preparing a people for himself. Those who undergo the judgment as a refining shall turn to God and enter into covenant with him once again (Zech 13:9). According to Mal, God shall refine the Levites as gold and silver; then they will offer the sacrifices correctly and these sacrifices will be accepted (Mal 3:2ff.). The climax of God's refining process will result in the establishment of a city over which he has complete rule; that city shall be called "the city of righteousness, the faithful city" (Isa 1:25f.).

The upright man endures Yahweh's faithful testing without despising it. He confidently affirms that the trial has discovered nothing amiss (Ps 17:3). In fact, when he seeks God's protection, he even prays that God will test or refine his innermost thoughts and attitudes so that his petition may indeed be worthy of being answered (Ps 26:2).

God's word also is tried; or according to the RSV "the promise of Yahweh proves true" (Ps 18:30 [H 31]). That is, what God says is authentic; since it has been refined, it is completely reliable. Psalm 12:6 [H 7] compares Yahweh's speech to "silver refined in a furnace on the ground, purified seven times" (RSV). Therefore those who serve Yahweh love his word (Ps

119:140) and take refuge in him as their shield (Prov 30:5).

צָרַר (*šōr'pī*). See no. 1972a.

1973 צָרַר (*šārar*) *I, bind, be narrow, be in distress* (Qal); *make narrow, cause distress, besiege* (Hiphil).

Derivatives

- 1973a צָרַר (*šar*) *I, narrow, tight.*
 1973b צָרַר (*šar*) *II, distress.*
 1973c צָרָה (*šārâ*) *straits, distress.*
 1973d צָרָר (**šārar*) *suffer distress.* This denominative verb occurs only in the Piel (Jer 48:41; 49:22).
 1973e צָרוּר (*š'rôr*) *bundle, parcel, pouch, bag* (e.g. Gen 42:35; Hag 1:6).
 1973f מָצָר (*mēšar*) *straits, distress* (Ps 116:3; 118:5; Lam 1:3).

šārar may refer to anything which is narrow or confining. A place may become too small for people to inhabit when they increase in number (II Kgs 6:1; Isa 49:19f.). Isaiah speaks of a blanket too narrow to wrap oneself (28:20). It also refers to being restricted (II Sam 20:3), and it may signify "to hamper something" (Prov 4:12).

šārar means "to bind up" or "to tie." It is used for binding a stone in a sling (Prov 26:8), tying a kneading trough to a mantle (Ex 12:34), or mending an old torn wine skin (Josh 9:4, Pual). God is said to bind up the water in thick clouds (Job 26:8; cf. Hos 4:19). Hosea describes the sin of Ephraim as bound up; i.e. it was kept in store for the time of judgment (13:12). Since the people reject his message, Isaiah exhorts his disciples to preserve his teaching among themselves saying, "Bind up the testimony, seal the teaching among my disciples" (8:16). It further is used for preserving one's life (I Sam 25:29); "the life of my Lord will be bound in the bundle of the living."

It also may refer to the strong emotional response that one experiences when pressed externally by enemies or internally by wrong decisions or passions; e.g. Jacob's confrontation with Esau (Gen 32:7 [H 8]). Israel was frequently placed in sore distress by her enemies during the period of the Judges (Jud 2:15; 10:9). Even a great leader may be distressed by reaction to controversial decisions (cf. I Sam 30:6). One can be obsessed with a passion and be so bound up emotionally

that he becomes ill; e.g. (Amnon's distorted desire for his sister (II Sam 13:2).

One curse for violating the covenant states that enemies will besiege Israel's towns (Deut 28:52). Similarly God brings distress on any who have sinned (Zeph 1:17; Jer 10:18). Some under such distress become more faithless, as did Ahaz (II Chr 28:22), while others humble themselves and seek Yahweh, as did Manasseh (II Chr 33:12; cf. Deut 4:30f.).

This root or a very similar one describes the emotional distress of a woman in travail (Jer 48:41; 49:22).

šar I. Narrow, tight. (ASV and RSV are similar for rest of derivatives). *šar* I describes something as narrow, e.g. a place where one can travel in only one direction (Num 22:26). A narrow river has a rushing current (Isa 59:19). Strength that is narrow has too short a span (Prov 24:10).

šar II. Distress, trouble. Describes the personal anguish one encounters in adverse circumstances; e.g. the great distress which comes from the death of a close friend (II Sam 1:26) or from God's refusal to give help or direction (Job 7:11; cf. I Sam 28:15; Isa 25:4; 63:9).

šārā. Straits, distress. It indicates intense inner turmoil (Ps 25:17). It describes the anguish of a people besieged by an enemy. It is comparable to the pain of a woman bearing her first child (Jer 4:31). It refers to terror at the approach of a raping army (Jer 6:24). It defines the quality of time when Judah suffers her severest punishment for violating the covenant (Jer 30:7; cf. Ps 78:49). The land of a people that reject the Lord's word is described as full of distress, darkness, and the gloom of anguish (Isa 8:22; cf. 30:6). Into such darkness Yahweh will bring the light of his salvation (Isa 9:1–2 [H 8:23–9:1]).

A brother provides help in adversity (Prov 17:17). Similarly the Lord helps his people out of the times of affliction (Ps 50:15; 37:39). God graciously promises to save Israel from the trouble of the Day of the Lord (Jer 30:7).

1974 צרר (šārar) II, show hostility toward.

Derivatives

1974a צר (šar) adversary, enemy.

1974b צרה (šārā) vexer, rival wife (I Sam 1:6, only).

1974c צרר (šārar) make a rival wife. This denominative verb occurs only in Lev 18:18.

This root deals with the harassment and torment engendered by an enemy. God promised Israel victory over all her adversaries (Num 24:8). However, if she should fail to drive the foreign nations from Canaan, those nations would remain to vex Israel like thorns and pricks (Num 33:55). Their weapons included wiles such as enticing the Hebrews into licentious idolatry (Num 25:18). In the postexilic period Haman, who sought to destroy the Jews by a decree from a Persian King, is called "the enemy of the Jews" (Est 3:10; 8:1, etc.).

Whenever a foe defeated Israel, he scoffed at Yahweh (Ps 74:10, 17, 23). So too the believer under oppression is taunted by his enemies. They ask, "Where is your God?" (Ps 42:10 [H 11]; cf. 31:11 [H 12]). In response the people entreated God to deliver them for the sake of his honor or reputation (Ps 74). His help on the basis of his mercy and love demonstrates that he is the living God (cf. Ps 143:12). He also uses unexpected ways to confound his foes, even through the utterance of the mouth of babes (Ps 8:2 [H 3]; Ps 105:24).

God executes justice against his adversaries in order to cleanse (*kippēr*) the land (Deut 32:41ff.). Israel, as God's instrument of punishment against other nations, is sometimes commanded to become hostile toward one of her enemies and strike them (Num 25:17). The Day of the Lord will be his climactic day of vengeance against all his enemies (Jer 46:10).

J.E.H.

1975 צרר (šrr) III. Assumed root of the following.

1975a צר (šar) hard pebble, flint (Isa 5:28, only).

1975b צר (šōr) flint (e.g. Ex 4:25; Ezk 3:9).

1975c צרור (š"rôr) pebble (II Sam 17:13; Amos 9:9).

ק

ק

קָא (qē'). See no. 2013a.

1976 קָאָת (qā'at), קָאָת (qā'āt) *a bird*, perhaps pelican or a kind of owl (e.g. Lev 11:18; Deut 14:17).

קָב (qab). See no. 1977a.

1977 קָבֵב (qbb) **I. Assumed root of the following.**

1977a קָב (qab) *a dry measure* (II Kgs 6:25, only). Probably 1/6 of a seah, 1/18 of an ephah (q.v.).

1977b קָבֵבָה (qūbbā) *large vaulted tent* (Num 25:8, only).

1978 קָבַב (qābab) **II, curse.** (ASV, RSV translate similarly.)

This word connotes the act of uttering a formula designed to undo its object. For a treatment of synonyms see the article on *qālal*. Our word occurs fifteen times. Distinguished from *qbb*, I (BDB).

This word may well be a loan word since it appears either on the lips of (or is applied to) Gentiles (or persons of mixed parentage, Lev 24:11), or in poetical passages. At times it is difficult to tell whether the text represents *qbb* or II *nqb* (the lexicons and grammars disagree).

The most frequent use of our root relates to the incident involving Baalam and Balak. Certainly the "magical" belief and intent of Balak is prominent here. (For the effect of such cursing and Balaam's understanding of it, see *qālal* and the discussion of Num 23:8.) Perhaps the same overtone is present in Lev 24:11, where the man of mixed parentage may have used the name of God as a magical formula. Elsewhere our root is used apart from any magical connotation and as the uttering of a formula (as compared to 'ārar and *qālal*, q.v.), although the usage in Job 3:8 has been disputed. Job there requests conjurers (?) to excise the day of his birth from history (see Michael Fishbane, "Jeremiah, IV, 23–26 and Job, III, 3–13"; also "A Recovered Use of the Creation Pattern," VT 21:152).

L.J.C.

1979 קָבָה (qbh). **Assumed root of the following.**

1979a קָבָה (qēbā) *stomach, belly* (Deut 18:3; Num 25:8).

קִבּוּץ (qibbūš). See no. 1983a.

קִבּוּרָה (q'burā). See no. 1984b.

1980 *קָבַל (qābal) *take, receive* (Piel and Hiphil only).

Derivative

1980a קָבֵל (q'bol) *something in front, attacking engine* (Ezk 26:9).

The basic idea represented by this verb is receiving something given. The usual Hebrew word is *lāqah* (q.v.). Our root appears to be a loan word, perhaps from Aramaic (as suggested by KB). It occurs only in clearly late texts except for the technical sense of Ex 26:5; 36:12. Our root occurs twelve times (its derivatives occur only in Ezk 26:9 and II Kgs 15:10).

This root can be used of receiving even though circumstances might move one to reject the offer. David received without prejudice Amasai and his companions because of their oath of fealty (I Chr 12:18 [H 19]) even though their tribe opposed him. The Levites took the uncleanness (even though it was uncleanness) and carried it from the city (II Chr 29:16). Even gifts from the heathen were accepted to be used in the new temple (Ezr 8:30). At other points the thing received has no negative overtones (II Chr 29:22). One can receive such intangible things as instruction (Prov 19:20, parallel to "hear counsel"), punishment (I Chr 21:11), good and evil (without complaint, Job 2:10), and observance of a new holy day (Est 9:23).

L.J.C.

1981 קָבַע (qāba') *rob* (Mal 3:8; Prov 22:23). Meaning uncertain.

1982 קִבְּעָת (qūbba'at) *cup* (Isa 51:17, only). Perhaps a loan word from Assyrian *kabu'tu*.

קִבְּעָת (qūbba'at). See no. 1982.

1983 קָבַשׁ (qābaš) *gather, assemble.* (ASV and RSV translate similarly.)

Derivatives

1983a קִבּוּץ (qibbūš) *assemblage* (cf. the Israeli kibbutz).

1983b קִבְּצָה (q'busā) *gathering*.

Our verb refers primarily to gathering people into one place. Cf. Ugaritic *qbš* (AisWUS no. 2386).

The following Hebrew synonyms should be compared: 'āšap "to gather together, up," (much broader than our root, but is paralleled to it),

qāhal "to assemble, congregate, especially for worship," *gādad* "to muster troops," and *yā'ad* "to meet, gather together, by appointment." The root occurs 127 times.

A few occurrences of our root denote gathering in general (cf. *'āšap*), e.g. to gather food (Gen 41:35), money (II Chr 24:5), etc. The most common use, however, relates to the gathering of people.

First, people are gathered together for various social reasons: to ask Samuel for a king (I Sam 8:4), to recognize David as king (II Sam 3:21; I Chr 11:1). God reflects on the return from the exile (or in the eschaton [?]) saying they will gather to select a king (Hos 1:11). Also note: gathering to work on the walls of Jerusalem (Neh 5:16); gathering nobles, etc., to enlist them according to genealogy (God is concerned about covenant (church) rolls—Neh 7:5), and gathering virgins to select a queen (Est 2:3).

Second, the root often denotes the mustering of troops (e.g. Josh 10:6; Jud 12:4). The people are assembled (as an army?) to stop the water sources outside Jerusalem (II Chr 32:4). During attack a trumpet (*qeren*) served as the rallying point (Neh 4:20 [H 14]). After a battle Joab gathered his troops to take account of his losses (II Sam 2:30). Does Elijah possibly ask Ahab to gather the people and false prophets as an army to do battle (II Kgs 18:19)?

Third, people are gathered for religious functions. Jacob assembles his sons to deliver the blessing (Gen 49:2). David gathers the priests and Levites to transport the ark to Jerusalem (I Chr 13:2). The people assemble to renew their covenant with God (I Sam 7:6; II Chr 15:9–10), ask his help (II Chr 20:4), to serve him (Ps 102:22 [H 23]), to vow to put away their foreign wives (Ezr 10:1, 7, 9), etc. In the prophetic writings (Qal and Niphal) divine convocations are for judgment and blessing (including salvation, Isa 43:9; Joel 3:11 [H 4:11]).

Finally, God pledges to assemble his people from the places where he had scattered them (Deut 30:3–4). Even before the Babylonian exile David cites this promise as the cause of his victories (I Chr 16:35; cf. Ps 106:47). During the great exile this promise is repeatedly recalled by the prophets (e.g. Isa 11:12). This hope they offer the captives is rooted in the sovereignty of God (Isa 40:11). Contrariwise, God condemns Babylon to "captivity" with no deliverer (Isa 13:14). In the eschaton this divine gathering is to extend to all peoples (Isa 66:18)—even the Gentiles (Isa 11:12). By so accomplishing such a clear prophecy, God exhibits his sovereignty and, therefore, sanctifies himself in those gathered (Ezk 20:41). After the return God tells his people to remember his ancient promise (Neh 1:9), and so they did (Ps 107:3).

L.J.C.

1984 קָבַר (*qābar*) *bury*. Used 132 times, always of human burial.

Derivatives

1984a קָבֵר (*qeber*) *grave, sepulcher*.

1984b קְבֻרָה (*q'burâ*) קְבוּרָה (*q'burâ*) *grave, burial*.

The verb *qābar* is translated with unusual uniformity as "bury" in the KJV and other versions. It is not used figuratively of concealing or of causing horror. It is seldom used in poetry, only once in the Pss (79:3) where it is used of burial after a battle at Jerusalem.

qeber. *Grave, sepulcher*. This word also is mostly used just for the literal tomb. It is used only three times in Pss (out of sixty-seven) and not often in poetry elsewhere. It is used for the cave of Machpelah, the graves of Egypt and the sepulchers of the kings as mentioned in Chr. The phrase "open *qeber*" is applied to the throat of a wicked man in Ps 5:9 [H 10]. Its usage in Ps 88 is interesting. The Ps concerns those approaching *sh'ôl* (q.v.) (v. 3 [H 4]), those who go down to the pit *bôr* (q.v.) (v. 4 [H 5]), the dead *mētim* (v. 5 [H 6]), the pit beneath *bôr tahtiyôl* (v. 6 [H 7]), the dead *r'pā'im* (v. 10 [H 11]), destruction *'abaddôn* (v. 11 [H 12]), the place of darkness and the land of oblivion (v. 12 [H 13]). It seems that *qeber* is used both in v. 5 and v. 11 [H 6 and 12] as a synonym needed to give a parallel to the other words more often used in poetry. It serves, however, to suggest the meaning of the other words. A similar usage with these same synonyms is found in Ezk 32 (given in some detail under *sh'ôl*). Isa 14:19, like Ezk has *sh'ôl* in parallel with *bôr* which is parallel with *qeber* and *q'burâ*. *qeber* appears to be the prose equivalent of these other words, which are used more in poetry.

R.L.H.

1985 קָדַד (*qādad*) *I, bow down*. (ASV and RSV translate the same.)

This root refers to the bowing of one's head accompanying and emphasizing obeisance (cf. *shāhâ* = *hwy*). Hence, it has a very restricted use, unlike its Akkadian cognate *qadādu*. It is to be distinguished from all other words for "bow" by this restricted use (cf. *kāra'*). Our root occurs fifteen times (perhaps sixteen; cf. *qādar*).

This root is used to emphasize devotion and thus occurs at especially crucial times. When Joseph's brothers return to Egypt with Benjamin, their obeisance is notably and understandably pronounced (Gen 43:28). Similarly, when Saul sees the vision of Samuel he is especially respectful (I Sam 28:14). The deepest awe and reverence typifies one's attitude toward God at crucial times, for example, when Eliezer's prayer is miraculously answered (Gen 24:26), and when the

people celebrated at Hezekiah's consecration of the temple (II Chr 29:30). Israel reacted in this way when they saw Aaron's signs (Ex 4:31) validating the announcement that God had sent Moses to deliver them from Egypt, and when the Passover was initiated (Ex 12:27).

God's giving the law a second time in spite of Moses' anger (sin) in the face of Israel's idolatry elicited this deep reaction from Moses. Each recorded dedication of the temple met with this deepest worship (I Chr 29:20; II Chr 29:30; Neh 8:6).

L.J.C.

1986 קדר (*qdd*) II. Assumed root of the following.

1986a קֶדֶד (*qoqōd*) *head, crown of head* (e.g. Deut 33:20; Jer 2:16).

1986b קֶדָה (*qiddā*) *a spice, cassia* (Ezk 27:19; Ex 30:24). Derivation uncertain.

קֶדָה (*qiddā*). See no. 1986b.

קָדוּם (*qādūm*). See no. 1988g.

קָדוֹשׁ (*qādōsh*). See no. 1990b.

1987 קָדַח (*qādah*) *be kindled, kindle* (e.g. Deut 32:22; Jer 15:14).

Derivatives

1987a קִדְחַת (*qaddahat*) *fever* (Deut 28:22; Lev 26:16).

1987b אֶקְדָּח (*'eqdāh*) *fiery glow, sparkle of a gem* (Isa 54:12, only).

קִדְחַת (*qaddahat*). See no. 1987a.

קָדִים (*qādīm*). See no. 1988d.

1988 *קָדַם (*qādam*) *meet, confront, go before* (Piel and Hiphil only). Denominative verb.

Parent Noun

1988a קָדָם (*qedem*) *east, antiquity, front*.

1988b קֶדֶם (*qēdem*) *east*.

1988c קִדְמָה (*qadmā*) *antiquity, former estate, before*.

1988d קָדִים (*qādīm*) *east wind, east*.

1988e קִדְמוֹן (*qadmōn*) *eastern* (Ezk 47:8, only).

1988f קִדְמוֹנִי (*qadmōnī*) *former, ancient, eastern*.

1988g קָדוּם (*qādūm*) *antiquity*.

The root *qdm* incorporates two basic concepts: first, (and most often) "to confront (meet) someone with either a good or bad intent," second, "to precede someone or something either temporally or geographically." It occurs in Ug. (*qdm*) meaning "precede, draw near" (also "in front of (before)," and "east wind(?)" UT 19: no.

2208). Our verb occurs twenty-six times. It is to be distinguished from the more common *qārā* "meet" (q.v.). See also *māšā* "find."

The verb *qādam* is most often used against a possible martial background. The confrontation thus set forth is either peaceable or hostile. In Deut 23:4 [H 5], Israel's "relations" did not meet them (and hence their God) as relatives and allies should have, so they incurred God's judgment (Neh 13:2). David tells how his enemies came against him in his calamity (II Sam 22:19). He prays God to confront his enemies, and cast them down (Ps 17:13). A peaceable confrontation is often in view. For example, Job complains about the help he received which caused him to live (3:12). More important, God brings lovingkindness (covenantal concern, Ps 59:10 [H 11]) and tender mercies (cf. *rāham*, Ps 79:8) to the faithful. But man cannot reciprocate by aiding God (Mic 6:6), for God lacks no resource (Job 41:11 [H 3]).

qedem. *East, antiquity, front*. The noun *qedem* has either a geographical meaning, "east," or a temporal notion "ancient time, aforeside." This noun occurs sixty-one times. It denotes an idyllic state whereas 'ōlām, 'ad denote perpetuity, *zā-qēn*, agedness, and *rī'shōn* primacy (q.v.).

The "East" may have either good or bad connotations. On the one hand it is the location of Eden, but on the other hand, it was the habitat of the men who built Babel (Gen 11:2). When denoting the dwellers E or NE of Canaan, it frequently refers to tribes hostile to Israel (Num 23:7; Jud 6:3, 33). But the prophets envision a day when they will be subject to Israel (Isa 11:14).

H. W. Wolff likens the Hebrew conception of time to the situation of a man rowing a boat. He sees the past as before him (*qedem*); the future is behind his back ('*ahārīt*). There is truth in this, except that this was not necessarily the concept of time of the Hebrews, for this etymological usage was determined before the Hebrews adopted the language (H. W. Wolff, lecture notes).

In poetic passages *qedem* describes the created state. So Joseph is blessed with the chief things of the ancient (idyllic) mountains (Deut 33:15), and God is enthroned (abides) of old (since creation, Ps 55:19 [H 20]). Our word is used of the Exodus as typifying the intended ideal (Mal 3:4). The Psalmist recalls the glorious works of God performed then (Ps 44:1 [H 2]), especially in his times of distress (Ps 77:5 [H 6]). Surely, these references recall the divine covenant (Ps 74:2).

qedem is also used of the Davidic period (Neh 12:46). All three ideas (creation-Exodus-Davidic reign) are joined in Ps 74:12. So we see that the three form a theological model. This is further emphasized in statements about the Messiah

(Mic 5:2 [H 1]; Ezk 36:11), and the eternal covenant (Mic 7:20). Finally, Isaiah applies this model (from creation to perfection) to the Lord's coming (Isa 45:23) according to the counsel of God. All is known and done by him (Isa 45:21).

qēdem. *East.* This noun may be simply *qēdem* plus a final *he* expressing direction toward (GKC sec. a,c.) with which it always occurs. This noun occurs twenty-six times. It should be compared with *mizrāḥ* (where the sun rises), which emphasizes location rather than direction.

qadmā. *Antiquity, former estate.* This is the abstract noun form of the derived meaning (ancient, former) of *qēdem*. An exception is the temporal use in Ps 129:6, "before," which appears to employ the locative *he* extended to time (GKC 90 h, *qēdem* plus the locative *he*?). Our word occurs five times.

qādim. *East wind, east.* This noun denotes the desert wind which brings feared destruction (Job 27:21; Ps 48:7 [H 8]), and which is, nonetheless, absolutely controlled by God (Job 38:24; Ps 78:26) even for good (Ex 14:21) when he so desires. Occurring in Ezekiel fifty-two times, its most frequent usage is "east" (cf. Hab 1:9)—perhaps a dialectical variant for *qēdem*. The word occurs sixty-nine times.

qadmōni. *Former, ancient, eastern.* This is the adjectival form of *qēdem* (GKC, sec. 86f). It occurs ten times.

Bibliography: THAT, II, pp. 587–88.

L.J.C.

קָדְמוֹן (*qadmōn*). See no. 1988e.

קָדְמוֹנִי (*qadmōni*). See no. 1988f.

1989 קָדַר (*qādar*) *be dark, mourn.*

Derivatives

1989a קְדָרוֹת (*qadrūt*) *darkness, gloom* (Isa 50:3, only).

1989b קְדָרָנִית (*qēdōrannit*) *mourners* (Mal 3:14).

ASV and RSV translate this verb similarly, except in Jer 14:2 and Job 30:28 (in both cases the context supports the RSV). This root denotes blackness (the absence of light, Jer 4:28; cf. v. 23) as well as the preparations surrounding mourning rites. It occurs nineteen times. Compare the more usual *ḥāshak* which is restricted to blackness "kāhā," growing dim, and 'ārab "become evening." Other roots relating to mourning are *dā'ab*: inward attitude, 'ānā, *bākā*, and 'ānāḥ, the sounds of mourning; *sāpad*, 'ābal: observing mourning rites in general.

The root is used in contexts of judgment where the heavens and heavenly bodies are to be blackened (Jer 4:28). There is clearly an overtone of

mourning in such contexts. Hence, the great and terrible day of the Lord is associated with mourning by the heavenly bodies (Joel 2:10). This day, in turn, is directly connected with the eschaton—as is the blackening of the heavenly bodies (Joel 3:15 [H 4:15]). [Conzelmann correctly notes that in the ancient Near East brightness and darkness were regarded as very important for life, thought, and religion (TDNT, VII, p. 427). Darkness denotes the whole range of what is harmful or evil. Our root connects darkness and sorrow—a connection not limited to the ancient Near East. Conzelmann says of this passage: "Here it is no longer meant figuratively but literally" (ibid., p. 430). For eschatological darkening see Isa 13:10; Joel 2:30–31 [H 3:3–4]; 3:15 [H 4:15] (Acts 2:20); Zeph 1:15; Rev 6:12, 17; 8:12. But in spite of its threatening aspect, darkness is only a penultimate entity with God. B.K.W.]

In the midst of oppression David confesses that he is mourning, i.e. in an objective, noticeable sense: he was dirty, unattended, and in mourning attire (KB). Jeremiah goes to such lengths of mourning over his people in view of the encroaching judgment (8:21).

Job 5:11 seems to attest the d/r interchange (cf. Akk. *qadādu*).

קְדָרוֹת (*qadrūt*). See no. 1989a.

קְדָרָנִית (*qēdōrannit*). See no. 1989b.

1990 קָדַשׁ (*qādash*) *be hallowed, holy, sanctified; to consecrate, sanctify, prepare, dedicate.* Denominative verb.

Parent Noun

1990a קְדֹשׁ (*qōdesh*) *apartness, holiness, sacredness.*

1990b קְדוֹשׁ (*qādōsh*) *holy, Holy One, saint.*

1990c קְדֹשֶׁת (*qādēsh*) *male temple prostitute* (Deut 23:18; II Kgs 23:7).

1990d קְדֵשׁ (*qedesh*) *Kedesh.*

1990e קִדְשׁ (*qādēsh*) *Kadesh.*

1990f מִקְדָּשׁ (*miqdāsh*) *holy place, sanctuary.*

The verb *qādash* in the Qal connotes the state of that which belongs to the sphere of the sacred. Thus it is distinct from the common or profane. In the Piel and Hiphil it connotes the act by which the distinction is effected. It is a denominative verb.

The suggestion that the root *qdsh* is derived from an original biliteral *qd* ("cut") is attractive but tenuous in view of the uncertainties surrounding the transmission of biliteral roots to the trilateral form. The meaning "to separate" is favored

by many scholars, but the fact that *qdash* rarely, if ever, occurs in a secular sense makes any positive conclusion in this regard difficult because of the limited evidence on which to base philological comparison.

The word occurs in several dialects of Akkadian with the basic meanings "to be clean, pure, consecrated." In the Canaanite texts from Ugarit, the basic meaning of the word group is "holy," and it is always used in a cultic sense.

A definitive use of the term occurs in Num 16:38 [H 17:3]. The censers of the Korahites were regarded as holy because they had been devoted to the Lord. They were thus regarded as having entered the sphere of the sacred by virtue of cultic ritual (v. 17 [H 16:18]) and were accorded a special place in the sanctuary. The devotion of the censers seems to have created a condition of inviolable holiness that could not allow for their being treated in a common way. It seems best to see the root *qdash* as serving to delineate the sphere of the "holy."

In the Qal the verb *qādash* is used most frequently to describe the state of consecration effected by Levitical ritual. In Ex 29:21, 37; 30:29 certain articles used in the Levitical service were consecrated to God and were thus recognized as belonging to the realm of the sacred. Transmission of the state of holiness to anything that touched a person or object so consecrated (Ex 29:37; 30:29; Lev 6:18 [H 11], 27 [H 20]) does not necessarily imply that a transferable divine energy exists in the "holy." Rather, it seems that the person or object entered the state of holiness in the sense of becoming subject to cultic restrictions, as were other holy persons or objects, in order to avoid diffusion of the sacred and the profane (cf. the state of holiness of the priesthood [Lev 21:1-8] and the strictures applied to a garment accidentally sprinkled with the blood of the sin offering [Lev 6:27, H 20]).

In the Piel the word is used most frequently of the act of consecration. In Ex 19:23 the consecration of Mt. Sinai by establishing boundaries around it served to keep out all that might have profaned God's holy presence.

The ethical connotations of the concepts of holiness find their basis in the proscriptions against diffusing the realms of the sacred and the profane (Lev 22:32).

In the Niphal the verb *qādash* may connote the concept "to prove one's holiness." God proves his holiness by judging sin (Lev 10:3; cf. 1-2; Num 20:13; Ezk 28:22). His holiness is also demonstrated in his adherence to his promises (Ezk 20:41; 28:25; 39:27).

qōdesh. *Apartness, holiness, sacredness, hallowed, holy* (ASV, RSV, similar). The noun *qōdesh* connotes the concept of "holiness," i.e. the essential nature of that which belongs to the sphere

of the sacred and which is thus distinct from the common or profane. This distinction is evident in Lev 10:10 and Ezk 22:26 where *qōdesh* occurs as the antithesis of *hōl* ("profane," "common").

There is some truth in the idea of R. Otto (see bibliography) that the word "holy" refers to the *mysterium tremendum*. It speaks of God with a measure of awe. It can be used almost as a synonym of deity. "His holy name" is the name of God. The inner room of God's dwelling is called the Holy of Holies—the most holy place.

But the biblical viewpoint would refer the holiness of God not only to the mystery of his power, but also to his character as totally good and entirely without evil. Holy objects therefore are those with no cultic pollution which is symbolic of moral pollution. They are not merely dedicated, but dedicated to what is good and kept from what is evil. The separation of men from what defiles ceremonially is but typical of the holiness that is spiritual and ethical. "Be ye holy for I am holy" is quoted from the OT (I Pet 1:16; Lev 19:1; 20:7, etc.) and the so-called holiness code is heavily ethical. "Man was made in the image of God and capable of reflecting the Divine likeness. And as God reveals himself as ethically holy, he calls men to a holiness resembling his own" (ISBE, "Holiness").

A basic element of Israelite religion was the maintenance of an inviolable distinction between the spheres of the sacred and the common or profane (Num 18:32). That which was inherently holy or designated so by divine decree or cultic rite was not to be treated as common. The sabbath was holy, and the restrictions connected with that day served to maintain its distinctive nature and to guard against its being treated as common (Ex 16:23-26; Isa 58:13, 14). Special restrictions were placed on the priests to guard against profanation of its holy status (Lev 21:6ff.). Sexual intercourse was not considered immoral in the OT but it did effect a state of Levitical defilement (Lev 15:18) which prohibited contact with that which was holy (I Sam 21:4). The same principle applied to the peace offering (Lev 19:5-8), the holy oil (Ex 30:32-33), and holy incense (Ex 30:37).

That which was dedicated to God was conceived of as entering the sphere of the "holy." This included the various elements of Levitical worship called "holy things" in Lev 5:15-16, the produce of the land (Lev 19:24), personal property (Lev 27:28), and spoils obtained in military action (Josh 6:19). The sacrifices that were to be eaten only by the priests were denominated "holy" by virtue of their absolute dedication to the sphere of the sacred as represented by the priesthood (Lev 19:8).

While the realm of the holy was conceptually distinct from the world with its imperfections, it could nevertheless operate within the world as

long as its integrity was strictly maintained. The maintenance of the integrity of the "holy" was a function of the Israelite cultus. The holy God came to man in redeeming love within the context of regulations and proscriptions that were designed to maintain the purity of holiness that characterized God's essential nature. Even before the establishment of the Levitical system, this principle was recognized (see Ex 3:5).

The cultus also effected the holiness of those who participated in it. This was essential to the concept of redemption for, by definition, holiness is separate from all that is sinful and profane. God, therefore, calls man to holiness because he himself is holy (*qādōsh*) (Lev 19:2; cf. I Pet 1:15).

Because of his holiness, God is above the weaknesses and imperfections of mortals and thus can accomplish the deliverance of his people (Ex 15:11–12). Only those who are holy will dwell in God's holy hill (Ps 15:1ff.). Because God is holy by nature and separate from moral imperfection, he can be trusted to be faithful to his promises (Ps 33:21).

Inherent within the redemptive work of God is the promise of the ultimate manifestation of God's holiness in the glorification of his people and the deliverance of the creation from the imperfections resulting from the edenic curse (Rom 8:18–23).

qādōsh. Holy, Holy one, saint (ASV, RSV similar). The adjective *qādōsh* (holy) denominates that which is intrinsically sacred or which has been admitted to the sphere of the sacred by divine rite or cultic act. It connotes that which is distinct from the common or profane.

God is intrinsically holy and he calls his people to be holy, providing for them the standard of obedience whereby that holiness may be maintained (Lev 19:2ff.). Because God is holy, he is free from the moral imperfections and frailties common to man (Hos 11:9) and can be counted on to be faithful to his promises (Ps 22:3–5). This aspect of God's character forms the basis of Habakkuk's hope that his people would not perish (Hab 1:12).

The title "The Holy One of Israel" is applied to God numerous times in the OT, but is especially frequent in the prophecy of Isaiah (in all parts). It serves to place the sins of Isaiah's society in stark contrast to God's moral perfection (Isa 30:11) and expresses God's absolute separation from evil (Isa 17:7).

The inviolability of the spheres of the sacred and the profane forms the ground for the ethical aspects of the concept of holiness. Because God is holy, the Israelites could not serve him when they persisted in their idolatrous practices (Josh 24:19ff.). They were to be separate from all that was unholy (Lev 11:44–45; Deut 14:21). Stipula-

tions were imposed on them that they might not engage in practices common to other peoples (Lev 19:2; 20:7; Num 15:40). Their call to holiness was based on the fact that they had become God's possession by virtue of his separating them from the nations (Lev 20:26; Deut 7:6; 14:2; 26:19).

It is unthinkable that a holy God could condone sin; such a concept would involve a diffusion of the sacred and profane, thus destroying the nature of holiness. The call to be holy was accompanied by the imposition of certain restrictions that served to ensure the continuing holiness of those who believed (Lev 11:44–45; 19:2ff.; Deut 14:2, 21; Num 15:40).

Various aspects of the cultus were denominated holy by virtue of their being conceived of as belonging to the realm of the sacred and were not to be treated as common. This included portions of the sacrifices (Lev 6:16; 7:6), the temple and its aspects (Ps 65:4 [H 5]; Lev 6:16, etc), and the priests (Lev 21:6, 8) and Levites (II Chr 35:3).

The presence of God within the world delineated a sphere that was holy, for God's holiness cannot be diffused by the common (Deut 23:14).

That which is "holy" is not only distinct from the profane but in opposition to it as well. God, therefore, hates and punishes sin (Josh 24:19; Isa 5:16, 24). In the light of God's holiness, Isaiah saw himself and his people as sinners (Isa 6:3; cf. v. 5).

qādēsh. Temple prostitute, male or female. The adjective *qādēsh*, like the name Kadesh, means "holy," but holy to what? The female functionaries in the pagan shrines were called *q' dēshā*, temple prostitutes, because that is what they were. The name is a sad commentary on the licentiousness of Canaanite worship. The masculine form is used similarly for the male counterpart (Deut 23:17 [H 18]). In Gen 38:21–22 the usage may be extended to refer to prostitution in general.

qedesh. Kedesh. The name of several cities cited in the OT. The name *kedesh* means "holy."

1. Kedesh in Naphtali. A settlement located in upper Galilee in the hill country of Naphtali. It is generally identified with the modern Tell Qades. Kedesh was designated as one of the cities of refuge in the list in Josh 20 (v. 7), and it was one of the Levitical cities of the Gershonite clan of Levites in the parallel lists in Josh 21:27–33 and I Chr 6:71–76. It was one of the fortified cities of Naphtali according to Josh 19:37.

The king of the Canaanite city of Kedesh is cited in the list of kings defeated by Joshua (Josh 12:22). It is generally thought that this Kedesh was the birthplace of Barak, but for another view see Y. Aharoni, *The Land of the Bible*, p. 204.

However, some identify it with Kedesh (see 2 below).

Kedesh is mentioned in II Kgs 15:29 as one of the Israelite cities conquered by Tiglath-pileser.

2. Kedesh in Issachar. In I Chr 6 a Kedesh is listed in the territory of Issachar (v. 72) as well as in Naphtali (v. 76). In the parallel list in Josh 21, the city of Kedesh is omitted and replaced by Kishion. It is possible that this is a different name for the same site (cf Jud 4:11, 13).

The location of the Kedesh in Josh 15:23 is uncertain. It has been identified with Kadesh Barnea and Kadesh in southern Judah.

qādash. Kadesh. The name of two cities in the OT. The name "kadesh" means "holy."

1. Kadesh Barnea. An area of desert springs located fifty miles southwest of Beersheba. It is sometimes called simply Kadesh. One of the springs, 'Ain Qedeis, preserves the ancient name. The Masoretes made a vocalic distinction between this *qādash* and the other name *qedesh*, but doubtless they came from the same form. The name refers to a holy spot, but of course a spot holy to the heathen pre-Israelite worship. Such "holiness" would be an abomination to Israel.

Kadesh Barnea is cited several times in connection with the patriarchs. In Gen 14:7 Kadesh occurs in what is evidently a very ancient tradition describing a full-scale military action in which Lot, Abraham's nephew, was captured. The more ancient name of Kadesh, according to this account, was 'ēn mishpat ("spring of judgment").

Kadesh Barnea was in the area to which Hagar fled (Gen 16:14) and Abraham settled there for some time (Gen 20:1).

Kadesh figured prominently in the wilderness period of Israelite history. It was the site of a prolonged stay in the wilderness (Deut 2:14) and the place to which the spies returned from Canaan (Num 13:26). It is also one of the sites mentioned in the southern boundary of Canaan (Num 34:3-6; Josh 15:1-4; Ezk 47:19; 48:28). According to Josh 10:41 it was the southernmost boundary of the Conquest.

2. Kadesh on the Orontes. A Hittite capital situated on the Orontes River eighty miles north of Damascus. The RSV accepts a reading of the Lucianic recension of the LXX that includes Kadesh in the extension of the Davidic empire (II Sam 24:6).

miqdāsh. Holy place, sanctuary, chapel, hallowed part. (ASV and RSV similar except that RSV translates "holy things" in Num 10:21, Ezk 44:8; "sacred area" in Ezk 43:21 and "temple" in Dan 11:31).

The noun *miqdāsh* is used most frequently in the OT as the designation of the tabernacle and the temple. It is frequently translated "sanctuary,"

in these cases. In keeping with the basic meaning of the word group that it represents (*qādash*), *miqdāsh* denotes that which has been devoted to the sphere of the sacred. When it refers to the sanctuary, it connotes the physical area devoted to the worship of God. This area was sacred because it was the place where God dwelled among the people (Ex 25:8) and its sanctity was not to be profaned (Lev 12:4; 19:30; 20:3; 21:12, 23).

The word also designated sanctuaries that were devoted to false worship (Lev 26:31; Isa 16:12; Ezk 21:7; Amos 7:9).

The word is used for the articles of the tabernacle that were devoted to the Levitical worship (Num 10:21). The portions of the sacrifices that were particularly holy were called *miqdāsh* (Num 18:29). The word *miqdāsh* may refer to the abode of God in Ps 68:35 [H 36], but some commentators see this as the temple in Jerusalem. Metaphorically the word is used to refer to a place of refuge (Isa 8:14; Ezk 11:16).

T.E.M.

1990.1 קָהָה (*qāhā) *be blunt, dull.*

1991 קָהַל (*qāhal) *assemble.* Denominative verb.

Parent Noun

1991a קָהָל (*qāhāl) *assembly, company, congregation.*

1991b קְהֵלָה (*qāhālā) *assembly, congregation* (Neh 5:7; Deut 33:4).

1991c קְהֵלֶת (*qāhelet) *speaker in an assembly, Qoheleth.*

1991d מִקְהֵל (*maqhēl) *assembly.*

The verb *qāhal* conveys the idea of assembling without regard to purpose. It is used in the Niphal and the Hiphil. The LXX often translates this root as *ekkaleō*.

The Niphal carries the reflexive idea of a group assembling themselves. The assembling may be for mutual defence (Est 8:11; 9:2; 15-16, 18), to make war (Josh 22:12; Jud 20:1), to worship (II Chr 20:26), to ask for idols (Ex 32:1), for the anointing of Aaron (Lev 8:4), for erecting the tent of meeting (Josh 18:1), for the transporting of the ark to the temple (I Kgs 8:2; II Chr 5:3), for the

assembling of a mob (Jer 26:9) for rebellion (Num 16:3; 20:2; I Sam 20:14).

The Hiphil, used for assembling of groups, such as the people (Deut 4:10), the officers and elders (Deut 31:28), and the tribes (I Kgs 12:21), shows a similar variety in the purposes of assembly. In addition there is an assembly for the census (Num 1:18), for the purification of the Levites (Num 8:9), for the consecration of Aaron (Lev 8:3), to bring water from the rock (Num 20:8), to hear the words of the law (Ex 35:1; Deut 31:12, 28); and to hear Moses' farewell (Deut 4:10).

qāhāl. *Assembly, company, congregation.* Usually *qāhāl* is translated *ekklesia* in the LXX, but in thirty-six instances it is *sunagōgē*.

qāhāl is a masculine noun from which the denominative root *qāhal* derives, but it is sometimes conjecturally derived from *qāl* "to speak," hence a convocation (so KB suggests). The noun occurs twenty-two times in the prophets, most frequently in Ezk. The verb occurs thirty-nine times in the Niphal and the Hiphil forms meaning "to assemble" or "to gather." The root *qhl* occurs thirteen times in the nonbiblical Qumran materials for gatherings and for groups of various sorts, only one case of which (*Hodayot* 2:20) is in a worshiping context, paralleling the use in Ps 22:23.

An assembly of any sort and purpose may be designated by *qāhāl*. It may be for evil counsel or deeds (Gen 49:6; Ps 26:5), civil affairs (I Kgs 2:3; Prov 5:14; 26:26; Job 30:28), or war (Num 22:4; Jud 20:2, etc.). The assembled armies see the fight between David and Goliath (I Sam 17:47). The term may in other contexts designate an assembled multitude of nations (Gen 35:11), peoples (Gen 28:3; 48:4), and even the dead (Prov 21:16). It may be of the returning exiles (Jer 31:8; Ezr 2:64), and then the restored community in Jerusalem is a *qāhāl* (Ezra 10:12, 14; Neh 8:2, 17).

But the *qāhāl* is especially an assembly for religious purposes. The experience at Horeb for receiving the Law was "the day of assembly" (Deut 9:10; 10:4; 18:16). There were also assemblies on other occasions for feasts, fasts, and worship (II Chr 20:5; 30:25; Neh 5:13; Joel 2:16). In these cases *qāhāl* designates a gathering less than the totality of the people of Israel. Such was the assembly when David exhorted the people to build the temple (I Chr 29:1, 20). We encounter the idea of gathering (*haqhil*) the assembly (*qāhāl*) (Num 10:7; 20:10), which seems to distinguish between the assembly gathered and ungathered.

A distinction between 'ēdā and *qāhāl* seems to be intended in "if the whole congregation ('ēdā) commit sin . . . and the thing is hidden from the eyes of the assembly" (*qāh* Lev 4:13). Here the *qāhāl* is the judicial representatives of the com-

munity. There is also the case where certain Israelite persons cannot enter the *qāhāl* (Deut 23:2). But elsewhere the two words are used in successive clauses in the same sense (Num 16:3) and are joined together (Prov 5:14). In general, the terms are synonymous.

qāhāl may also designate the congregation as an organized body. There is *q'hal yiśrā'ēl* (Deut 31:30), *q'hal YHWH* (Num 16:3, etc.), and *q'hal 'ēlōhim* (Neh 13:1) and then at other times merely "the assembly" (*haqqāhāl*). We encounter "the assembly of the congregation of (*q'hal 'adat*) Israel" (Ex 12:6), and the "assembly of the people of God" (Jud 20:2). Of special interest is the phrase "congregation of the Lord" (*q'hal YHWH*) of which there are thirteen instances (Num 16:3; 20:4; Deut 23:2-4; Mic 2:5; I Chr 28:8). It is the nearest or equivalent of "church of the Lord." The LXX *ekklesia kuriou* for this phrase.

qōhelet. *Preacher, speaker in assemblies.* *qōhelet* is a Qal feminine participle from *qāhal*, which in the Niphal means "to come together" and in the Hiphil "to bring together." The Qal form is used only here. The word is related to the noun *qāhāl* (assembly). The LXX chose *ecclesiastes* (a member of an assembly) as a translation due to the alleged relation of *qāhāl* to *ecclesia* (assembly, see above). The English rendering "Preacher" follows Jerome's Latin *concionatur* ("speaker before an assembly"), however the meaning of the Hebrew name is by no means clear. The content of the book fits the wisdom literature category rather than the sermonic category. A second conjecture contends that the Qal form *qōhelet* is used as though it were a Hiphil and means "one who convenes an assembly." The word has the definite article in Eccl 12:8 which lends credence to the claim that the word is intended to be a description, not a personal name.

qōhelet occurs seven times in the book of Ecclesiastes (1:1-2, 12; 7:27; 12:8-10) and nowhere else in biblical literature. As a noun designating the speaker, it also gives the Hebrew name *Qōhelet* to the book itself. The noun is ordinarily construed with masculine forms of verbs. The exception in Eccl 7:27 may be due to an erroneous word division, since *qōhelet* identifies himself as a son of David, king in Jerusalem (1:1, 12).

J.P.L.

קוֹהֶלֶת (*qōhelet*). See no. 1991c.
קו (*qaw*). See nos. 1992, 1994a.

1992 קו (*qaw*). Mimicry of Isaiah's words, perhaps senseless.

The word occurs in Isa 28:10, 13. Its meaning is debated. It may mean "line" as *qaw* II, especially a measuring line for judgment. Others (e.g. BDB) take it as an onomatopoeic mimicry of Isaiah's prophesying. Cf. *saw*.

1993 קוֹבֵעַ (*qōba'*) *helmet* (Ezk 23:24; I Sam 17:38). Perhaps Philistine loan word.

1994 קוֹה (*qāwā*) *I, wait, look for, hope.*

Derivatives

- 1994a קוֹה (*qaw*) *line*.
1994b קוֹקֵוֹ (*qawqāw*) *might* (Isa 18:2, 7).
1994c מִקְוֵה (*miqweh*) *hope*.
1994d תִּקְוָה (*tiqwā*) *I, cord* (Josh 2:18, 21, only).
1994e תִּקְוָה (*tiqwā*) *II, hope*.

This root means to wait or to look for with eager expectation. It is used for the wicked who make an attempt to destroy the life of the righteous (Ps 56:6 [H 7]; 119:95). Waiting with steadfast endurance is a great expression of faith. It means enduring patiently in confident hope that God will decisively act for the salvation of his people (Gen 49:18). Waiting involves the very essence of a person's being, his soul (*nepeš*; Ps 130:5). Those who wait in true faith are renewed in strength so that they can continue to serve the Lord while looking for his saving work (Isa 40:31). There will come a time when all that God has promised will be realized and fulfilled (Isa 49:23; Ps 37:9). In the meantime the believer survives by means of his integrity and uprightness as he trusts in God's grace and power (Ps 25:21). His faith is strengthened through his testings, and his character is further developed (Ps 27:14). Israel is encouraged to hold fast to love and justice, i.e. they are to follow the law faithfully and maintain consistently the standards of justice, at the same time preserving an attitude of godly love (Hos 12:6 [H 7]; cf. Ps 37:34; Job 4:6).

During times of visitation and judgment, the righteous must exercise great faith (Isa 26:8; Lam 3:19–33). Thus Isa confidently asserts, "I will wait for the Lord, who is hiding his face from the house of Jacob, and I will hope in him" (Isa 8:17). When God arrives on the scene with redemptive power, the response of those who have waited will be jubilant joy and great singing (Isa 25:9).

Job amid his intense trial claimed that God was pulling up his hope like a tree (Job 19:10). Perhaps this statement is a response to his assertion of faith: "For there is hope for a tree, if it be

cut down, that it will sprout again, and that its shoots will not cease" (Job 14:7). But his complete frustration had been expressed in exclaiming, "My days... come to their end without hope" (Job 7:6; cf. Prov 11:7).

The wicked too have hope. But since it has a false basis, it shall end with their death (Prov 11:7, 23; cf. 10:28). God himself will cut them off (Job 8:13; 27:8). Job says, "Their hope is to breathe their last" (Job 11:20).

Hope has an eternal home in man's heart. As long as there is a future, there is hope (Prov 23:18; probably an eternal future is intended). But only the believer can really express his hope in the future, for it belongs to Yahweh alone. And God supplies wisdom to insure that future ('*ahārit*) and to substantiate hope (Prov 24:14). The wicked have no such future, '*ahārit*' (Prov 24:20), nor hope, *tiqwā* (Prov 10:28). God is the source of hope for his people, and he has promised them a future and a hope (Ps 62:5 [H 6]; Jer 29:11). Jer says to besieged Judah, "There is hope for your future" (31:17). Zechariah calls God's people, "prisoners of hope." And he summons them to look forward to experiencing God's restoration (Zech 9:12). Therefore, Yahweh himself is called "the hope of Israel" (Jer 14:8; 17:13; 50:7; cf. Ps 71:5).

God expresses hope in man. He planted Israel and made her a fully prepared vineyard. His hope or purpose was for her success, i.e. that she yield fruit; this was parabolically expressed by placing a wine press in the vineyard (Isa 5:2ff.). However, she only yielded wild grapes. Therefore he had to judge her severely (v. 5f.). But his hope continued, for he planned a new vineyard that could some day be productive (Isa 27:2–6).

qaw. Line. ASV, RSV translate the same; except Ps 19:4 [H 5] RSV reads emended text "voice" but cf. the discussion of Dahood, in AB, *Psalms* I, p. 122. It is used about seventeen times (cf. Isa 18:2, 7 ASV margin). A line is basically a measuring line. It stands parallel to plummet (Isa 28:17). A line was used to measure long linear distances (e.g. Jer 31:39), and it served to measure round surfaces; (e.g. I K 7:23); e.g. the craftsman who carved a figurine to be his god used the line to mark his raw material (Isa 44:13). Yahweh described his creation of the earth as stretching out a line over it (Job 38:5) i.e. everything about the earth's constitution was subject to his exact specifications. Zechariah speaks about the rebuilding of Jerusalem, "the measuring line shall be stretched out over Jerusalem" (Zech 1:16; cf. Isa 34:17). No doubt he means the city will be zoned for construction projects once again. Many times the idea of a measuring line connotes destruction at hand. The line represents justice (Isa 28:17). Since the people or the nation against whom the line is laid do not measure up to the standard of

justice, they come under judgment. The line delineates exactly who and what will be destroyed (cf. Lam 2:8; II Kgs 21:13). In Isa 34:11 the line is called a line of confusion (*tôhû*); i.e. the land returns to the chaotic condition described in Gen 1:2.

J.E.H.

1995 *קָוָה (*qāwā*) II, *collect.* Occurs in the Niphal (Jer 3:17; Gen 1:9; Isa 60:9).

Derivative

1995a מִקְוֶה (*miqweh*) *collection, collected mass* (e.g. Gen 1:10; Ex 7:19).

1996 קִיַּט (*qût*) *be grieved, loathe.* (ASV and RSV translate similarly, except Job 10:1.)

Our root denotes the deep emotional reaction of the subject issuing in a desired repulsion (or destruction) of the object. For synonyms, see *qûš*, the etymological equivalent; cf. the same shift from *š* in Hebrew *šûr* "rock" to *ṭ* in Aramaic *tûr* "rock." Our word occurs seven times.

In the midst of his affliction Job says he is so distressed and irritated that he "loathes" his life (Job 10:1; Sarah's statement, in Gen 27:46). David says he reacts thus toward the treacherous (Ps 119:158) and the enemies of God (Ps 139:21). This confession is interesting since historically it is sandwiched between God's description of his similar deep irritation with the sinful Canaanites (Lev 20:23, *qûš*), and his description of Israel's contriteness of heart while in exile (Ezk 6:9; cf. Deut 30:1ff.), upon their restoration to the land (Ezk 20:43), and in the eschaton (Ezk 36:31). The last reference is relevant to the restoration, of course, but it is especially meaningful in the age of fulfillment (cf. Heb 8:8ff.). True repentance and contrition come from God's work in the heart as Paul reveals in Rom 7–8.

L.J.C.

1997 קִיַּט (*qôṭ*) *break, snap* (Job 8:14). Derivation uncertain.

1998 קוֹל (*qwl*). *Assumed root of the following.*

1998a קוֹל (*qôl*) *voice, sound, noise.* (ASV and RSV are similar. RSV renders into a better idiom [e.g. I Sam 15:1].)

kôl primarily signifies a sound produced by the vocal cords (actual or figurative). In poetical passages (for the most part) the denotation embraces sounds of many varieties. Infrequently, *qôl* denotes the thing said whether spoken (Gen 3:17) or written (II Kgs 10:6). Our word also serves as an exclamative "hark" (cf. GKC, 146b; Isa 13:4;

66:6, etc.). *qôl* should be distinguished from and compared to *hegeh*, *higgāyôn* (a low noise or utterance), *hāmôn* (a tumultuous, agitated noise or uttering), *rê'a*, *t' rû'a* (a shout of alarm, or joy). Also see *shā'ôn* "roar" *t' shû'a* "noise." Our word is a common Semitic root (Ugaritic *ql*, UT 19: no. 2213). Biblical occurrences number 506 (with the possible exception of Jer 3:9 which may reflect Ugaritic "fall" *ql* (AisWUS no. 2408; see KD, in. loc.)).

The phrase "to lift up the voice and weep" embraces a wide diversity of emotions and situations, e.g. crying out for help (Gen 39:14); mourning for real or expected tragedy (Gen 21:16), the sound of disaster (Ex 16:34) or joy (Gen 29:11). God having indicated that the ark was not to be considered a palladium by speaking to Moses from the mountain and, later, from above the mercy seat (Ex 25:22; Num 7:89; cf. Ex 20:22) confirmed it (I Sam 4:6, 14). Later God's voice dispersed the Philistines (I Sam 7:10).

The phrase "to hearken to one's voice" includes: to take note of and believe (Gen 4:23), to follow one's suggestion (Gen 3:17), to obey a request (Gen 21:12), to obey a command (Gen 21:18), to answer (of God) a prayer (II Sam 22:7).

Theological themes in which our word figures prominently are (for lack of better names): prophetic, thunder, covenantal, trumpet. These themes are often intertwined. In Ex the voice of God and the voice of Moses (later, the prophets) are interchangeable (cf. Ex 3:18; 4:1; 7:1). God gave him certain signs which would, in effect, speak (Ex 4:8), miraculously confirming the intended identity (however, 5:2, cf. *qāshā*). The thunder symbolized God's absolute sovereignty by effecting judgment and evoking fear and submission (Ex 9:23, 29; cf. Ps 29). God's *qôl* is the roar of thunder, while man's *qôl* in approaching him is the tinkle of bells (28:35). The covenantal theme is seen when, through Moses, God briefly enunciated the principle that the commands (voice) of his servant Moses are his commands (voice) and if the people obey (hearken) and keep his covenant (19:5) they will be blessed. If they disobey they will be judged. All this is much evidenced at Sinai (especially in Deut; I Sam 12:14–18; the uses in Jer). The sovereign power of God which thundered judgment on Pharaoh now appears as a sign of blessing (19:16; cf. II Sam 22:7–14; 3:16 [H 4:16], etc.). Finally, it is the sound of the trumpet which Moses heard at Sinai. The trumpet blast signals divine power (Josh 6:5) and presence (II Sam 6:15; I Kgs 1:40–45; I Cor 15:52).

In Elijah's battle with the false prophets of Baal (the thunder god of Canaan) it is God who fills the claims with facts by bringing lightning, thunder (I Kgs 18:41), and rain (I Kgs 18; cf. Ps 29). Yet God shows that he is more than just a

natural force (as was Baal) by speaking in the still small voice (I Kgs 19:12). This battle with Baal is part of a long complex confrontation between the two religions (cf. W. F. Albright, *Yahweh and the Gods of Canaan*, Doubleday, 1968), as is evidenced throughout the prophets and poetry of the OT.

Finally, one might well consider that it was the sound of God's voice going on the wind that Adam heard in the garden (Gen 3:8; I Kgs 14:6).

L.J.C.

1999 קום (*qûm*) *rise, arise, stand.*

Derivatives

- 1999a קומה (*qômâ*) *height.*
 1999b קמה (*qâmâ*) *standing grain.*
 1999c קים (*qim*) *adversary.*
 1999d קמה (*qimâ*) *rising up.*
 1999e קומיית (*qômmyût*) *uprightness.*
 1999f יקום (*y'qûm*) *substance, existence*
 (Gen 7:4, 23; Deut 11:6).
 1999g תקומה (*t'qûmâ*) *ability to stand.*
 1999h מקום (*mâqôm*) *place.*

Our root refers essentially to the physical action "rising up." Derived denotations entail the end of such action: standing. Also, our root is used of figurative rising and/or standing. The same usages appear in Ugaritic (cf. UT 19: no. 2214). Our root occurs 1085 times. It should be distinguished from the more narrow *shâkam* (= *qîs*), to rise from bed, 'alâ, to go up, and 'amad to take a stand, or stand (cf. *yâšab*, to be at one's place or station).

The verb *qûm* appears in many and varied contexts. Basically, it denotes rising up from a prostrate position (e.g. Josh 3:16). In many instances it refers to preparatory activity, especially (although not exclusively) pursuant to traveling (Deut 17:8, et al.). Thus in Gen 27:19 "arise, sit down" (!) merely means "now sit down." This root can connote an action showing respect. Balaam tells Balak to "rise up" to receive God's oracle (Num 23:18). God commands his people to "rise up" before the aged (i.e. honor old men, Lev 19:32). This emphasis is carried over into the cult. When Moses entered the tent every man "rose up" at his door and worshiped (Ex 33:10), thus showing due respect for God. When God delivers his people, even kings will rise up (parallel to worship, Isa 49:7). Further cultic usage embraces the setting up and consecrating of holy objects or shrines (Deut 27:4). God commands that idols not be set up (Lev 26:1). Indeed, in the eschaton he will see this commandment is fulfilled (Isa 27:9). Our verb also has an official usage. That is, it applies to the assumption of a particular office, e.g. religious head of a clan (Gen

37:7), prophet (Deut 34:10), judge (Jud 10:1). These offices are distinguished by their non-hereditary succession (the word was not applied to the priestly office). Our word has a legal usage whereby it connotes the validity of one's testimony in a trial (Deut 19:15). A related usage is the sense of the valid transfer of property (Gen 23:17). Perhaps, God reflects on this legal sense in his statements that his word shall stand (Num 23:19; Isa 40:8; etc.). This usage often occurs in contexts referring to covenants, and especially the divine covenant. God announces his covenant to men (Gen 9:11), and asserts that he will see that it is accomplished (Gen 17:19). He notes at various historical moments that he has established (frequently a Hiphil of *qûm*) his covenant (Ex 6:4). He makes sure that men recognize that covenantal blessings are contingent on their obedience (Deut 28:9), although they should never forget that blessing does not come because of their merit (Deut 9:5). The interchange of *kârat* "cut" and *hêqim* "establish" with *b'rit* "covenant" is not due to different sources, J/E and P respectively, but due to the semantic difference between *initiating or making* (*kârat*) a covenant and *confirming or establishing* (*hêqim*) one. Throughout Israel's history these interconnected themes emerge, and pious men affirm God's faithfulness in carrying out his covenant (e.g. I Kgs 8:20). Ultimately, all of man's promises will fail and only God's covenant will stand (Isa 28:18). God's temporal covenants are stages in the unveiling of his eternal covenant which is the expression of his unbreakable counsel (Isa 46:10) and purpose (Isa 14:24). His will (covenant) finds its most perfect and fullest expression in the person and work of Jesus Christ (e.g. Gal 3; Heb 9).

Finally, our word is frequently used in martial contexts. It refers to preparation for (Jud 7:15), engagement in (Ex 2:17), and victory in war (or struggle, Josh 7:2). Sometimes, *qûm* connotes anticipated or realized victory. When God engages in combat victory is certain. Thus the word may denote his creative, saving, and judging action. Pious men frequently beseech him to rise in their behalf (Num 16:35). This enlightens many Psalm texts in which this idea of victory is not immediately apparent (Ps 3:7 [H 8]); 76:9 [H 10]; 35:2). When God is on one's side he prevails over his enemies. Those who are against God are warned of immediate (Ps 89:43 [H 44]) and ultimate (Ps 1:5) failure.

qômâ. *Height, high.* This noun modelled on the Qal infinitive absolute (plus a feminine ending) is used of vertical dimension, i.e. what a thing has when it is raised upright.

qâmâ. *Standing grain.* This noun (the normal Qal participial form, plus feminine ending) is used

of a cereal crop which can be harvested (Deut 23:25 [H 26]), ground to make meal, may or may not have heads (Hos 8:7), and like grass may be planted on rooftops (II Kgs 19:26).

qim. *Adversary.* This collective noun (participle) denotes those who stand up against. It occurs only in Job 22:20, but this usage of the root is not rare (see below).

qimâ. *Rising.* This noun (participle plus feminine abstract ending) together with "sitting down" constitutes an expression denoting all activity (Lam 3:63).

qômmyût. *Upright.* This substantive denotes an upright position. In Lev 26:13, however, it is an adverb (GKC sec. 86k).

t'qumâ. *Ability to stand and resist.* This abstract noun (GKC, 85r) represents the ability to stand and resist one's enemies.

mâqôm. *Place.* This mem preformative noun represents the physical location where something is or ought to be, i.e. its station. So, it is translated "place," "home," "room." Infrequently, it applies to that where nothing is, hence, open space (cf. I Sam 26:13; Isa 5:8).

L.J.C.

2000 קוֹף (*qôp*) *ape* (I Kgs 10:22 = II Chr 9:21).

2001 קוֹף (*qwp*). **Assumed root of the following.**

2001a תְּקוּפָה (*t'qûpâ*) *coming round, circuit of time or space* (Ex 34:22; II Chr 24:23 = I Sam 1:20; Ps 19:7).

2002 קִיַּץ (*qûṣ*) **I, be grieved, loath.** (ASV and RSV frequently translate differently, with RSV introducing the idea of "fear" or "dread" [Ex 1:12] and probably [at least in part] because of the seeming parallelism with *gûr* III.)

qûṣ denotes the deep emotional reaction of the subject issuing in a desired repulsion (or destruction) of the object. Compare the following synonyms: *bā'ash* "to be or become stinking, odious," *gā'al* "to cast away as unclean, to loathe," *shāqas* "to detest as unclean," *tā'ab* "to treat as an abomination" in a ritualistic and, also, a moral and general sense, *dērā'ôn* "object of contempt," and *qût*, a variant spelling of our root. The root occurs nine times.

Understanding the state of mind denoted by this root enlightens many passages. Rebekah complained to Isaac that she loathed her life be-

cause of Esau's wives (Gen 27:46). If she is telling the truth perhaps their strange ways had so irritated her that her life had become unbearable. At least this is probably what Isaac believed. It is such an irritation and loathing that is forbidden toward God's fatherly reproof (*qûṣ* is parallel to *mā'aš*, q.v.). This word describes God's feelings toward the Canaanites (Lev 20:23) and toward all idolatry (cf. *qût*). Israel used it to describe their feelings toward the manna after prolonged feeding on it (Num 21:5). Several peoples are described as having such an irritating abhorrence of Israel (Ex 1:12; Num 22:3; I Kgs 11:25), and Israel felt the same toward her enemies (cf. Isa 7:6, 16).

L.J.C.

2003 קוֹץ (*qws*) **II. Assumed root of the following.**

2003a קוֹץ (*qôṣ*) *thornbush, thorn* (e.g. Gen 3:18; Hos 10:8).

2003b קְצוֹת (*q'wûṣṣôt*) *locks of hair* (Song 5:2).

קְצוֹת (*q'wûṣṣôt*). See no. 2003b.

קוֹקוֹ (*qawqāw*). See no. 1994b.

2004 קוּר (*qûr*) **I, dig for water.**

Derivative

2004a מְקוֹרֵי (*māqôr*) *fountain.*

This root denotes the action of digging for water, but not in the sense of digging a permanent well (apparently). Due to the aridity of Palestine, much attention was devoted to acquiring sources of water. It occurs only in the report of Sennacherib's boast (II Kgs 19:24).

māqôr. *Fountain.* ASV and RSV translate similarly, with the RSV consistently (rightly so) rendering fountain. Basically, this noun of place emphasizes the source of flowing water and the product of one's effort (or at least, of change). It occurs eighteen times. Its near cognate *ma'yān* emphasizes the place of an "ayin "spring" (a natural flow of water; cf. *mabbū'a*). Cf. Ug. *mqr* "fountain" (UT 19: nos. 2215, 2263).

This word is probably a loan word, since it occurs primarily in poetical contexts (except Lev 20:18; 12:7). Interestingly, this word is usually used figuratively. But its figurative use can be best comprehended against the great importance attached to water sources in Israel. The womb, e.g. is referred to not only as a fountain of blood but also as the fountain from which children issue (Prov 5:18; cf. Ps 68:26 [H 27]). God punishes nations by drying up their sources of water (Jer 51:36).

The major theological use of *māqôr* occurs in the phrase "fountain of life." In wisdom litera-

ture it expresses the goal of prudent action. Thus the phrase describes the blessing of the law of the wise (Prov 13:14), understanding (Prov 16:22), and the mouth of the righteous (Prov 10:11). It can hardly be overlooked that the "fear of the Lord" is so described (Prov 14:27). The source of life (indeed, of all that precedes) in the godly is God himself (Ps 36:9 [H 10]) whom the Israelites forsook (Jer 2:13) for broken cisterns which neither produce nor retain lifegiving water (Jer 17:13). In the covenant God reasserts his promise (Deut 30) to restore his people, but this time he would open to them a fountain of life which removes sin and uncleanness (Zech 13:1); Jesus (John 4:13–14). This is another of the many witnesses to the deity of Christ.

L.J.C.

2005 קור (qwr) II. Assumed root of the following.

2005a קור (qūr) *thread, film* (Isa 59:5, only).

קורה (qôrâ). See no. 2068d.

2006 קוש (qūsh) *lay bait or lure* (Isa 29:21, only).

2006.1 קט (qāt) *a small thing*. Ezk 16:41, meaning uncertain.

2007 קטב (qtb). Assumed root of the following.

2007a קטב (qeteb) *destruction* (e.g. Deut 32:24; Hos 13:14).

2008 קטל (qātal) *slay* (Job 24:14; 13:15; Ps 139:19).

Derivative

2008a קטל (qetel) *slaughter* (Ob 9, only).

2009 קטון (qāṭōn) *be small, insignificant*.

Derivatives

2009a קטון (qātān) *young, insignificant*.

2009b קטון (qātōn) *small, insignificant*.

2009c קטון (q'ṭōn) *little finger* (I Kgs 12:10 = II Chr 10:10).

The root *qtn* denotes diminutiveness in quantity or quality. For synonyms compare 'eprōhīm, gōzāl (young of birds), dak (thin, scarce, fine), z'ēr (little, short), tap (little children, as compared to adults), ma'at (few, little of quantity, and infrequently, of quality), šā'ir (younger, little, insignificant and less privileged and/or desirable), and bāzūy (despised). Its antonyms are gādōl (great, etc.), and bāhūr (fully developed, vigorous, unmarried young man). The root occurs (with the derivatives here listed) 107 times.

The root *qtn* is frequently contrasted with *gādōl* (e.g. II Chr 36:18). Israel was forbidden to carry two sets of weights (Deut 25:13; cf. Amos 8:5). Rehoboam defiantly said that his small (finger) would be more oppressive (cf. qāshā) than Solomon's loins (I Kgs 12:10). God's word binds his messengers (Num 22:18). His sovereignty is seen as upholding all sea creatures (Ps 104:25), indeed, all things.

The concept "little in years" (young) is also denoted by our root. Benjamin is described as the youngest (Gen 42:15, qātōn; 44:20, qātān; 43:33, šā'ir), as are Ham (Gen 9:24) and David (I Sam 17:14). Leprous Naaman followed a young (little) girl's (II Kgs 5:2) advice and ended up with skin like that of a young child (v. 14). Elisha being taunted (cf. qālaṣ, qārah) by young lads (perhaps teen-age ruffians) (II Kgs 2:23) who as members of covenant families ought to have been taught God's law whereby cursing his servant was tantamount to cursing him and rightly punishable by death (cf. qālal).

Often the little is the weak and the insignificant. Bathsheba seeks a not too insignificant boon of Solomon (I Kgs 2:20). When Jacob blesses Joseph's sons, he says the younger (qātōn Gen 48:19; cf. 48:14, šā'ir, q.v.) shall be greater (not just larger, but more important) than the elder. God reminds Saul that when he was insignificant and weak in his own eyes (I Sam 15:17; 9:21), he made him king over the mighty ones of Israel. In the eschaton God will make the weak and insignificant among his people to be strong and great (Isa 60:22), and it is the little child who will lead the mighty (Isa 11:6). Our word is paired with "the great" (gādōl) representing all (I Sam 5:9) men in Israel (Deut 1:17), and Israel's army (I Kgs 22:31). Josiah summoned all of Israel from small to great to hear the law read (II Kgs 23:2; cf. Jer 44:12; 42:8; Ps 115:13).

qātōn. *Young, insignificant, little.* This adjective basically modifies its subject in terms of littleness in quantity or quality. It occurs fifty-six times.

qātān. *Young, insignificant, little.* This adjective parallels *qātōn* in meaning. It occurs forty-seven times.

2010 קטף (qāṭap) *pluck off or out* (e.g. Ezk 17:4; Deut 23:26).

2011 קָטַר (*qāṭar) I, *burn incense or sacrifices*. Denominative verb. Does not occur in the Qal.

Parent Noun

2011a קִטְרֶת (q'ṭōret) *incense*.

2011b קִיטּוֹר (qītōr) *thick smoke* (Gen 19:28; Ps 119:83; 148:8).

- 2011c קָטָר (qittēr) *incense* (Jer 44:21, only).
 2011d מִקְטָר (miqtār) *place of sacrificial smoke*.
 2011e מִקְטָר (mūqtār) *incense* (Mal 1:11).
 2011f מִקְטֶרֶת (miqteret) *censer*.
 2011g מִקְטָרָה (m'qattērā) *incense altar*.

The verb *qātar* is used only in the Hiphil and Piel, and their passives.

qātar means "to cause to rise up in smoke." It is generally used cultically, but is used once non-cultically (of perfuming, Song 3:6). One should compare the many Hebrew words for sacrifice; especially *zābah* (to sacrifice by offering blood), *ālā* (in Hiphil, to offer up to a deity), *qārab* (to approach, engage in offering; cf. *nāgash*). Also compare words for "to burn," especially *sārap* (to destroy by burning), *bār* (the burning of wood, lamps, etc.), *yāqad* (the burning with fire, i.e., kindled), etc. The Babylonian cognate is *qatāru* "to rise, cause to rise." Hebrew uses the root 190 times (115 times as a verb).

Our verb is a technical expression denoting not only the burning of incense but all other offerings as well (KD, *Jeremiah*, p. 46). It may parallel *zābah* (Hos 4:13; 11:2; etc.), or be used of burning (offering) burnt offerings and incense (II Chr 13:11). The purpose of such burning is to render the thing offered into smoke which would ascend (as the ethereal essence of the thing) to the deity as a sweet-smelling savor (KD, *Pentateuch*, II, p. 288). Most of these sacrifices consisted of common foods and as such served to consecrate life (cf. *dām*, blood), one's calling, and the fruits (i.e. the blessings from God) of life to God (OTOT, p. 262; cf. Jer 44:15). Hence, the best parts (fat, Lev 4:10) and the firstborn of sacrificial animals (as representing both the best and the whole, Num 18:17) always belong to God. The offering represents both the surrender of the thing offered to God and a vicarious substitution (death penalty) of the offering for the offerer (Vos, BT, p. 186f.). This answers to the fulfillment in Christ (Jn 17:19; Eph 5:2).

The Hiphil stem is used for true (or at least what is thought to be true) sacrifices. Because man is a creature limited by creatureliness and the fall (Gen 8:21; Rom 5:12), the sovereign gracious Jehovah specifies the particulars of sacrifice. Almost every specification was broken at one time or another and violators blasphemously demanded (or assumed) acceptance in God's sight. Eli's sons dishonored God by disregarding his claim to the choicest parts (I Sam 2:16; Lev 7:31; 4:10). The kings of Israel changed both the how and where apparently intending the result to be acceptable before God (I Kgs 12:33; II Chr 28:4; II Kgs 16:13; cf. Ex 9). Lest one think God

is concerned only about external conformity, the prophets repeatedly emphasized that the spiritual is the essence of true sacrifice (cf. Vos's remarks on Amos 4:4–5 in BT, p. 286). Love in practice means obedience (Deut 6:4–6; cf. *qōl*).

The Piel stem (occurring only after the Pentateuch) can also represent the total act of ritual in worship (II Chr 25:14). Its occurrences trace a downhill history through the kings of Israel and Judah. Apparently those acts described by using this stem either consciously (on the part of the offerer) or judgmentally (on the part of the recorder) were acknowledged contrary to true worship. This certainly heightens the irony of Amos's statement (4:5). Such false offering imitative of Canaanite worship (AI, p. 438) was blasphemous (Isa 65:7), shameful (Jer 11:17), evidenced both forgetting (Jer 18:15) and forsaking God (Jer 19:4), and offered no hope or help to the idolater (Jer 11:12).

In the eschaton God promises an eternal (Jer 33:18; Heb 7:23f.) and universal (Mal 1:11; cf. II Pet 2:9) priesthood.

Old Testament ritual was permeated with incense burning (Isa 6:4). God orders that a special gold-plated altar (the "golden altar") be placed before the veil of the innermost sanctuary (hence, Ex 30:10). Every morning and evening burnt offering as well as the great offering of the annual atonement was to be accompanied by burning incense (Ex 30). Incense mixtures not divinely prescribed were unacceptable (Ex 30:34), while the divine prescription was not to be used for non-cultic purposes (Ex 30:37). This holy incense was to be ignited only by coals from the altar of burnt incense (Isa 6:6) which had had the sacrificial blood upon them. Use of other (strange) fire was punishable by death (Lev 10:1–2). Incense smoke represents prayer (cf. Ps 141:2; OTOT, p. 273; cf. Lk 1:10; Rev 5:8; 8:3f). Even the prayers of God's people need atonement (Ex 30:10). Finally, unwitting sin is atoned by smearing blood on the horns of the altar of incense (Lev 4:7).

These are the only two instances in the perpetual rites of Israel where blood is smeared on the horns of an altar. A comparison of the places of the smearings in their respective rituals will reveal that the sprinkling and smearing of blood are reversed—the great atonement ritual (Lev 17:18) placing the smearing first. Furthermore, the two rituals stipulate a different procedure of the smearing with respect to which altar(s), etc., the blood is to be applied. The rite for unwitting sin (Lev 4:7) symbolically restores the offender to service in his proper covenantal role. The sprinkling in the great atonement serves as a purification of the respective altars, and hence, symbolically what they represent. Their defilement rests not upon any act of the nation, but upon the nature of the nation itself, i.e., it consists of a conglomerate of humanity. Therefore,

perhaps these smearing rituals are to teach the people the close relationship, and yet distinct difference between original and unwitting sin.

q^ʔtōret. *Incense, perfume.* ASV and RSV the same. This noun denotes that which produces a sweet smelling odor (*q^ʔtōret šammim*) when burned; a perfume (Prov 27:9) or (more commonly) an incense for cultic usage. Compare: *l^ʾ bōnā*, a spice (frankincense) which may be used as an incense and *rqh*, perfume, ointment. Compare Phoenician *qtrt* (H. Donner and W. Rollig KAI, II, p. 21). The noun occurs sixty times.

qītōr. *Smoke, vapor.* ASV and RSV differ only in Ps 148:8, which RSV emends to "frost." This non-cultic term (occurring four times) usually denotes that which ascends from burning.

q^ʔtōrā. *Incense.* This *hapax legomenon* (Deut 33:10) is a variant (ancient?) spelling for *q^ʔtōret*.

qittēr. *Incense.* This *hapax legomenon* represents all the elements of idolatrous worship (Jer 44:21). It may be the Northwest Canaanite spelling for *q^ʔtōret*, cf. Ugaritic *qtr* (UT 19: no. 2220).

miqtār. *Place of sacrificial smoke.* This *hapax legomenon* (Ex 30:1) in conjunction with *q^ʔtōret* specifies an altar (*mizbēah*, q.v.) upon which to burn incense.

mūqtār. *The kindling of incense.* This *hapax legomenon* denotes either the burnt offering (KB), or (preferably) that which accompanies the sacrifice, viz., the kindling of incense (KD, in loc.).

miqteret. *Censer.* This word denotes the golden vessel held in the hand to carry coals (II Chr 26:19) and incense (Ezk 8:11).

m^ʿqattērā. *Incense altar.* This noun, modelled after the Piel participle, is used of idolatrous altars. Canaanite altars shaped like the one in the temple (but smaller) have been found from the time of Solomon (AI, p. 411).

L.J.C.

2012 קָטַר (*qātar*) II, *shut in, enclose* (Ezk 46:22, only). Meaning dubious.

קִטְרֵה (*q^ʔtōret*). See no. 2011a.

2013 קִיא (*qīʾ*) *vomit up, disgorge* (e.g. Lev 18:28; Jon 2:11).

Derivatives

2013a קֵא (*qēʾ*) *what is vomited up* (Prov 26:11, only).

2013b קִיא (*qīʾ*) *vomit* (Isa 28:8; 19:14; Jer 48:26).

2014 קָיָה (*qāyā*) *vomūt* (Jer 25:27). Probably a by-form of *qīʾ*.

קִיטֹר (*qītōr*). See no. 2011b.

קִיִּם (*qim*). See no. 1999c.

2015 קִין (*qyn*). **Assumed root of the following.**

2015a קִיִּן (*qayin*) *spear* (II Sam 21:16).

2016 קִיִּן (*qayin*), קֵיִנִי (*qēnī*) **Kenite, Kenites, Kain.** (ASV and RSV translate the same.)

This tribe did not descend from Adam's son Cain (whose descendants were destroyed by the flood), but were perhaps so named because of their occupation, metalworking. Their origin cannot be determined (KD, *Pentateuch*, I, p. 218). Our word occurs fifteen times.

These people appear as dwellers among the Canaanites (Gen 15:19) and later among the Midianites (Num 10:29), although probably not physically descended from either (KD, loc. cit.). The Kenites living in Canaan were among the enemies of Israel cursed by Balaam (Num 24:21–22). The Kenites of Midian became allied to Israel (or election was selective but not exclusive) when Moses married Zipporah and then Hobab went along to help Israel in the desert (Num 10:29). They also intermarried among the Calebites (I Chr 2:55). It appears that the Canaan dwellers joined their southern brothers in the alliance (cf. Jud 4; I Sam 15:6; et al.).

Much has been fabricated regarding the so-called Kenite origins of the Mosaic religion and documents (cf. R. K. Harrison, IOT; R. G. North, "The Cain Music," *JBL* 83:373–89). The Kenites figure prominently in the recorded history of Israel especially through Rechab and his descendants. He was so well-known for his zeal for God that Jehu accepted him as an ally and identified with him as an example of godly zeal (cf. *qnʾ*, II Kgs 10:15–24). Rechab's son Johonadab established a nomadic and religious order which so perpetuated the godly zeal of Rechab even until Jeremiah's day that the prophet could use them as a living illustration of what God required (Jer 35). Of course, the concern was with their zeal for God and not their zeal for nomadism.

L.J.C.

2017 קִיִּן (*qayin*) **Cain.** (ASV and RSV translate the same.)

This is the name of Adam's murderous son (cf. KD for fuller treatment). The root has a late (but clear) connection with metalworkers (G. A. Cooke, *A Text-Book of North-Semitic Inscriptions*, Oxford: Clarendon Press, 1903, pp. 286–87). Perhaps this explains its application to peoples of Abraham's day (Gen 15:19). It occurs

sixteen times of Adam's son. Cf. *qayin* I, spear, and II, Kenite, Kenites, Kain. As is usually the case in popular etymologies, however, the proper name is probably not associated with this precise etymological root *qyn* "to forge," but, as Gen 4:1 shows, by assonance and word play with another root, *qānā* "to possess" or "to bring forth."

L.J.C.

2018 *קִין (*qin) *chant a dirge*. This denominative verb occurs only in the Polel stem.

Parent Noun

2018a קִינָה (*qinā) *lamentation*.

qin denotes that activity whereby mourners intoned (sung: cf. Amos 8:10), a poem of bereavement. It differs from other words of mourning by having this very limited use (cf. 'ābal, mourning rites, mourning in general; *šāpad*, to perform the lamentation; I Sam 25:1, etc.; AI, p. 60). Our word occurs six times.

qinā. Lamentation, dirge. ASV and RSV similar. This noun represents a poem which is chanted (sung). It is to be distinguished from 'āniyā (mourning by uttering various ejaculatory sounds; cf. *n"hi*), *mišpēd* (various acts of mourning, especially, beating the breast), etc. The noun occurs eighteen times.

The lamentation was sung during the mourning rites or prophetically of impending death and/or destruction (Jer 7:19; Ezk 2:10). It constituted the chief funeral ceremony. Simpler forms consist of sharp repeated cries (Mic 1:8; I Kgs 13:30). This rite was performed by close relations (Gen 32:2), close friends, everyone present (I Sam 28:3), and often by professional male or female mourners (II Chr 35:25; Amos 5:16)—but, especially, women (Jer 9:16f.). The lamentation is the closest Hebrew poetry comes to using meter (T. Weir, in ISBE, p. 1836), although the *qinā* meter could be used for other purposes than mourning (cf. Ps 19:7–9). Some scholars note that biblical elegies have no religious content (AI, p. 61), and although this is true in some instances (II Sam 1:19ff.), it is not always the case since in the best example of *qinā* meter (Lam) there is much religious content (R. K. Harrison, *Introduction to the Old Testament*, Eerdmans, 1969, p. 1066).

Bibliography: Harrison, R. K., "Hebrew Poetry," ZPEB, III, pp. 76–87. TDOT, III, pp. 150–52. Gevitz, S., *Patterns in the Early Poetry of Israel*, University of Chicago, 1973, pp. 12–13.

L.J.C.

קִינִי (*qēni). See no. 2016.

2019 קִיץ (*qīš) I, *awake*. This verb occurs only in the Hiphil (e.g. II Kgs 4:31; Ezk 7:6). Used of resurrection in Job 14:12 (cf. *hālap*); Ps 17:15; and Dan 12:2.

2020 קִיץ (*qyš) II. **Assumed root of the following.**

2020a קִיץ (*qayīš) *summer* (Gen 8:22), summer-fruit (Amos 8:1–2 where it is used in a play on words with *qēš* "end" from *qāšas*).

קִיץ (*qīš). See nos. 2019, 2020, 904.

קִיָּצוֹ (*qīšōn). See no. 2060b.

2021 קִיקָיוֹן (*qīqāyōn) *a plant* (NIV, "vine," Jon 4:6, 7, 9, 10).

קִיקָלוֹן (*qīqālōn). See no. 2028f.

2022 קִיר (*qīr) *wall, side*. Derivation uncertain. (ASV and RSV translate the same.)

qīr denotes a wide (proportionately) perpendicular structure (especially the surface) usually made of stone, but possibly of other materials. It occurs seventy-four times. Our word occurs in Ugaritic (UT 19: no. 2265), and extra-biblical Canaanite (H. Donner and W. Rollig, KAI, II, p. 22). Distinguish it from *gāder*, a wall of stones without mortar, *hōmā*, an enclosure, *hayīš*, an outside or partition wall, *kōtel*, the wall of a house, and *shūr*, the wall around a well or between fields.

"Wall" is frequently a symbol of refuge and strength. Amos (5:19) depicts the baseless hope of hypocrites who long for the day of the Lord: entering a house to escape danger, they lean on the wall and are bitten by a serpent. There is no refuge for the ungodly when God judges. So, Isaiah (22:5) declares that the walls will be hurled down by siege artillery, and the echoing cries of the unrepentant godless will be their only answer. Nor is there refuge and strength in the thin walls built by false prophecies (Ezk 13:12–15). On that day an impenetrable iron wall will stand between the true prophet(s) and the godless (Ezk 4:3). Jehovah is the perfect wall which restrains all danger (Isa 25:4). The Psalmist's enemies seeing his weakness (Ps 62:3 [H 4]) fail to see his real strength, which is not himself but God (1–2, 6 [H 2–3, 7]).

L.J.C.

קָל (*qal), קֹל (*qōl). See nos. 2028a,b.

2023 קָלָה (*qālā) I, *roast, parch*.

Derivative

2023a קָלִי (*qālī), קָלִיָּא (*qālī') *roasted grain*.

This root signifies what is done to cook grain. It is to be contrasted with *bāshal* "bake, boil" meats and/or bread dough, *šālā* "roast" flesh (cf. *šālī*, the product, roasted flesh). Our root should be distinguished from *qālā*, II, disgrace, dis-

honor, insignificant. Also, cf. Akk. *qālû*, (vS, AkkH. II, pp. 895–96). Our root occurs ten times.

qāli', qāli. *Roasted grain.* ASV and RSV translate the same. This noun represents the product of *qālā*, i.e. roasted grain. This was a staple in the diet of the ancient Near East, and is still common today.

Roasted grain ('*ābib qālūy*) was the primary element of the meal offering (*minhā*, q.v.) of the firstfruits (Lev 2:14). Israel was not supposed to partake of the produce of Canaan until after such an offering (Lev 23:14).

Our root is also used (as is its Babylonian cognate) to mean "to roast flesh," i.e. the manner of Zedekiah's and Ahab's ignominious deaths. It is to this end that the false prophets curse Jeremiah (Jer 29:22; cf. Dan 3:6). Also, see Ps 38:7 [H 8] where this word is applied to David's loins: it is, perhaps, as though he had a fevered body.

L.J.C.

2024 *קָלָה (*qālā*) *II, disgrace, dishonor* (Niphal and Hiphil only).

Derivative

2024a קָלֹן (*qālōn*) *shame, disgrace.*

This root signifies the lowering of another's social position; cf. *qālal* (q.v.). Our root frequently occurs as the opposite of glory and honor (*kāb-ēd*). It occurs twenty-three times. Distinguish *qālā* I "parched, roasted."

God orders his people not to punish a man who starts a pugilistic duel with more than forty stripes lest he be degraded (put in an unwarranted social position) in their sight, because he is a brother Israelite (Deut 25:3). In view of his material and social inferiority (cf. *rūsh*), David declined becoming the king's son-in-law because this would have degraded that position (I Sam 18:23). Fulfilling Saul's request he advanced his social position. Isaiah describes the ungodly chaos of his day wherein covenantal relationships were reversed. Brother oppresses brother, and the young exalt themselves over the aged (cf. Lev 19:32, *qūm*, q.v.), and the base (those who do not deserve honor) against those who are worthy of honor (Isa 3:5).

The Psalmist beseeches God to show his proud enemies their place (Ps 83:16 [H 17]). Knowledge of one's true stance before God is required of all who are to seek God. God says that he will change Israel's self-acclaimed glory into their rightful social position—dishonor (Hos 4:7). He will expose their true state for all to see (Jer 13:26). Man's sinful heart leads him to self-exaltation, claiming credit for the blessings graciously bestowed by God. But God thrusts his creations into an objective state more clearly reflecting reality and thus engenders repentance (Deut 9:5).

qālōn. *Shame, disgrace, abuse, dishonor.* This noun represents the effect on the object(s) of the action exercised in the verb. It denotes a state wherein its referent is as if he were in a lower social position than he in fact occupies. This noun occurs exclusively in poetical contexts, but is not a late word. Cf. Ugaritic *qlt* (UT 19: no. 2231).

L.J.C.

2025 קִלְחַת (*qallahat*) *cauldron* (I Sam 2:14; Mic 3:3). An Egyptian loan word.

2026 קִלְט (*qlt*) *I. Assumed root of the following.*

2026a מִקְלָט (*miqlāt*) *refuge, asylum.*
(ASV, and RSV translate the same.)

This noun denotes the place of refuge from the blood-avenger (*gō'ēl*, q.v.). It should be distinguished from *maḥseh*, a place of refuge for man and/or animals, *mānōs*, a place of escape to which one flees, and *miṣgāb*, a place which is strong or high and, hence, inaccessible. *miqlāt* occurs twenty times.

This noun is always used in connection with the cities appointed to provide asylum for those guilty of involuntary manslaughter. Such a provision prevented excesses in the law of retribution. Murder constitutes "a transgression against the Creator and Lord of human life." The guilty person must be executed in order to purify the theocracy from blood-guilt (OTOT, p. 237). Initially, those not guilty of homicide could seek asylum at the altar (Ex 21:12–14), but those who killed with premeditation should be dragged from the altar and executed (cf. I Kgs 2:28–31, and *qeren*). Once settled in Palestine, distance would render successful flight difficult for many. Therefore, divine wisdom ordered cities of refuge throughout the promised land (Num 35:9–34). The justice of God is merciful and practical.

The instruction to appoint cities of refuge is first recorded in Num 35. Those who fled to such cities were to receive temporary asylum until they stood trial to substantiate their innocence (regarding intentional murder) before the congregation. If vindicated, the fugitive was to be received into the city. He was to stay there until the death of the high priest. Were the *gō'ēl* to encounter him outside its environs, the fugitive could be killed legally. After the death of the high priest, the fugitive could return home a "free" man. Hence, one guilty of involuntary homicide was imprisoned in a sense. To take life (even unintentionally) was to attack the image of God (Gen 9:5–7), and therefore warranted death. Some believe that the only significance of the high priest's death was to set a definite limit to the period of incarceration. However, in view of the specific note that no ransom (*kōper*, q.v.) was to be exacted to effect the release (Num 35:32), it

seems that the priest's death stood in lieu of such a ransom—it propitiated for the offense. Ultimately, the proper avenger was God himself (Gen 9:5–7). So, God the judge and avenger accepted the death of the high priest as a propitiation for such crimes. It can hardly be denied that in this the priesthood constituted a type of Christ.

Subsequently, the elders of a town were assigned (in addition to their other responsibilities) to be judges on behalf of the congregation (Deut 19:12). For the New Testament application, compare the system of elder-judges established by Christ (Matt 18:17ff.) and the apostles (Acts 14:23; 15; 1 Tim 3; et al.).

The cities of refuge were designated in two groups after each major stage of the conquest (Deut 4:41–43; 19:2; Josh 20:7–8). There is no record as to how (or whether) these cities functioned, but this hardly proves that they did not so function. Finally, all these cities were made levitical towns.

Bibliography: Cf. R. deVaux, *AI*, p. 160–3; N. H. Ridderbos, "Cities of Refuge," in *NBD*. L.J.C.

2027 קָלַט (*qālat*) *II*, *be stunted* (Lev 22:23, only).

קָלִי (*qālī*), קָלִי' (*qālī'*). See no. 2023a.

2028 קָלַל (*qālāl*) *be slight, swift, trifling, of little account*.

Derivatives

- 2028a קָל (*qal*) *swift*.
 2028b קָל (*qāl*) *lightness, frivolity* (Jer 3:9, only).
 2028c קָלַל (*qālāl*) *burnished* (Ezk 1:7; Dan 10:6).
 2028d קָלָלָה (*q' lālā*) *curse*.
 2028e קָלָלָה (*q' lōqēl*) *contemptible, worthless*.
 2028f קִיקָלֹן (*qīqālōn*) *disgrace*.

The basic meaning of this root sets forth the quality of "slightness" as to provision, speed (where it means swift), or circumstance. In the latter instance the condition described is less than that deserved by or divinely intended for the object. So, this root is used (especially in the intensive stems) of intending a lowered position, technically, to curse. Our root occurs 130 times.

The primary meaning "to be light or slight," applied to individuals, is used of Hagar's esteem for Sarah (Gen 16:4–5). Sarah was not lowered in position. As a barren woman, however, she was "lowered" in function and prestige. Hence, Hagar's attitude "struck home." A similar use occurs where David (II Sam 6:22, Niphal) tells Michal that he will lower himself even more (paralleled by *shāpal*). This idea is the exclusive

emphasis of the intensive stems. So Nehemiah (13:25) asserted a curse formula and saw it effected on its objects (those who married foreign women) by publicly disgracing them. The Psalmist (Ps 109:28) contrasts his enemies' vilification of him with God's blessing and prays that the fate they desire for him be applied to them, i.e. that they be put to shame (cf. Ps 62:4 [H 5]).

The noun *q' lālā* represents a formula expressing lowering from election. Thus, when informed of Rebekah's scheme, Jacob fears he will bring a *q' lālā* "a curse"—removed from the blessing of election—upon himself (see Gen 27:11–12; also especially Jer 24:9). It is used similarly in Deut 27:13 as the opposite of covenantal blessing. When actually enunciated as covenantal sanction, the word for "curse" is 'ārar (the state accomplished). So, our word represents the state described and possible (as in Deut 11:26; 30:19) where God sets before his people the result of breaking the covenant. God does not destroy humanity in his dealings with man (man is a decision-making creation). Neither does God give man the just recompense due his repeated and essential rejection of the covenant. So with Josiah, for example, God's grace is clearly operative (I Kgs 22:19; cf. Jer 26:6). The promise of divine provision of eternal deliverance is, therefore, exhibited in this use. Finally, this noun infrequently depicts the end itself. According to Deut 21:23 the corpse of a crucified person, impure and defiling, is to be burned before dark in order to avoid polluting the land.

The heathen felt that men could manipulate the gods (God). Hence, Goliath cursed David (I Sam 17:43), and Balaam was called to curse Israel (Num 22:6). The baseless curse, however, has no effect (Prov 26:2). Only God's formulas are effective (Ps 37:22). As God said to Abraham: "he who curses (*qālāl*) you" (pronounces a formula), "I will curse ('ārar) him" (put him in the state). To curse God's prophet was to attack God and to bring on one's head divine judgment, as was the case with the boys who vilified (cf. *qālas*) Elisha and were cursed (*qālāl*) by him (II Kgs 2:24). See also Neh 13:1–3 where the descendants of Moab and Ammon are barred from worship (a form of spiritual death).

To enunciate a baseless formula is to intend or accomplish a violation (or reversal) of the created structure and to intend real harm, as by sympathetic magic. This is what children (or servants) are forbidden to do with parents (or lords, life-givers, Ex 21:17ff). Such an action is an attack on God himself and is punishable by death (Lev 20:9). It is deep rebellion against God to curse one's parents and then assert one's ethical purity (Prov 30:11; cf. Ezk 22:7). The ultimate offense is to rob God of his honor by using his name to express anger or frustration (Lev 24:11–23).

qal. *Swift.* This adjective qualifies its object as to speed. When the Lord comes in judgment it is upon a swift cloud (Isa 19:1). The Lord's recompensing is effected speedily and swiftly in the day of judgment (Joel 3:4 [H 4:4]).

q'lālā. *Curse.* The primary emphasis here is the absence (or reversal) of a blessed or rightful state and lowering to a lesser state. *q'lālā* also stresses the formula whereby this is expressed. Our word should be distinguished from *'ālā* connoting oaths in general and curses as part of that larger category, from *'ārar* (which describes the state of lifelessness (absence of blessing, Deut 27:16), from *hāram* which signifies devotion to destruction or sacred use, and *qābab* which has to do with actually uttering the curse on something (used mainly in the Balaam narrative and Job).

q'lōqēl *Worthless or vile.* Complaining Israel thus described the food which the Lord provided (Num 21:5). This word occurs only once.

qiqālōn. *Disgrace.* The root idea "lowered" honor predominates here and is intensified as is clear from the sole use of the word (Hab 2:16).

L.J.C.

קָלוֹן (*qalōn*), קָלוֹן (*qālōn*). See no. 2024a.

2029 *קָלַס (*qālas*) *mock, scoff* (Piel and Hithpael only).

Derivatives

2029a קָלַס (*qeles*) *derision.*

2029b קָלָסָה (*qallāsā*) *mocking.*

This root denotes the scornful belittling issuing from an attitude which counts as valueless that which is of real value. It is to be compared to *hātal*, "trifle," *lā'ab* "to make jest of," *lā'ag* "to scornfully mimic," *'ālal* "to abuse, laugh at," *šāhaq/šāhaq* "to make sport of, laugh at." Ugaritic attests *qls*, a near cognate (AisWUS no. 2414). Our verb occurs four times.

The primary meaning of this word is seen in Ezk 16:31 where Jerusalem is compared to a whore (temple prostitute) who gives herself freely, despising (*qls*) the money, i.e. she counts the money as of no value.

2030 קָלַע (*qāla'*) *I, sling, hurl forth* (e.g. Jud 20:16; I Sam 17:49).

Derivatives

2030a קָלַע (*qela'*) *I, sling.*

2030b קָלָעָה (*qallā'*) *slinger* (II Kgs 3:25).

2030c קָלַע (*qela'*) *II, curtain, hanging* (e.g. Ex 27:9; Num 3:26).

2031 קָלַע (*qāla'*) *II, carve* (I Kgs 6:29, 32, 35).

Derivative

2031a מִקְלָעַת (*miqla'at*) *carving* (I Kgs 6:18; 7:31).

קָלָקֵל (*q'lōqēl*). See no. 2028e.

2032 קָלָשׁוֹן (*qill'shōn*) *forks.* Meaning in detail dubious (I Sam 13:21).

קָמָה (*qōmā*), קָמָה (*qāmā*). See nos. 1999a,b.
קִמְמוֹשׁ (*qimmōš*). See no. 2037a.

2033 קָמַח (*qmḥ*). *Assumed root of the following.*

2033a קָמַח (*qemah*) *meal flour.* (ASV and RSV translate the same.)

Our word denotes the product resulting when grain (perhaps wheat) is ground. It should be distinguished from *sōlet* (q.v.), fine flour, and the various unground grains. It occurs in Ugaritic as *qmḥ* (UT, 19: no. 2237), and in Akkadian *qēmu* (vs, AkkH. II). Biblical usages number fourteen.

This word denotes the common people's flour. It was the product of cereal grain plants and not the plants themselves (Hos 8:7). It was made by women (or slaves) using millstones (Isa 47:2). It was the staple of the woman of Zerephath (I Kgs 17:12), and part of David's (I Chr 12:40) and Solomon's (I Kgs 4:22 [H 5:2]) provender. Apparently, it was mixed with oil and cooked to make biscuits (Gen 18:6). Abraham served these biscuits to his mysterious guests and they ate. When Gideon served a similar meal to the angel of the Lord as a sacrifice the offering was consumed by fire (Jud 6:19).

God makes it clear that he does not depend on man's offerings for sustenance. How different from the pagan concept of God as reflected, for example, in the *Enūma Elish* (Roland de Vaux, *AI*, p. 448ff.). The usual flour involved in the meal offering was *sōlet*, which was perhaps a finer variety of *qemah* (cf. II Sam 17:28). Hence, in Num 5: 15, since this "offering" was not to God, it consisted of secondary (and cheaper) flour with no incense or oil added. In Gen 18:6 Abraham parenthetically (perhaps) tells Sarah to prepare biscuits from not just *qemah* (ordinary meal) but from *sōlet* (finely ground meal). It may well be that this *sōlet* reflects Akkadian *salātu*, crushed.

L.J.C.

2034 קָמַט (*qāmaṭ*) *seize* (Job 16:8; 22:16).

2035 קָמַל (qāmēl)

2035 קָמַל (qāmēl) *be decayed* (Isa 33:9; 19:6).

קָמְמִיּוּת (qōmmi'yūt). See no. 1999e.

2036 קָמַשׁ (qāmaš) *enclose with the hand, grasp* (Lev 2:2; 5:12; Num 5:26).

Derivative

2036a קָמַשׁ (qōmeš) *closed hand, fist* (Gen 41:47; Lev 1:2; 5:12).

2037 קָמַשׁ (qāmaš). *Assumed root of the following.*

2037a קִמְמוֹשׁ (qimmōš) *thistles or nettles* (Isa 34:13; Hos 9:6; Prov 24:31).

קָעַן (qēn). See no. 2042a.

2038 קָנָא (qānā) *be jealous, envious, zealous* (Piel and Hiphil only). Denominative verb.

Parent Noun

2038a קִנְיָה (qin'ā) *ardor, zeal.*

2038b קָנָא (qannā) *jealous.*

2038c קָנָא (qannō) *jealous.*

This verb expresses a very strong emotion whereby some quality or possession of the object is desired by the subject. This root occurs eighty-seven times. There is a questionable occurrence(s) of the root in Ugaritic (UT 19: no. 2246). The verb is (perhaps) a denominative of *qin'ā* (BDB).

The term may be used in a purely descriptive sense to denote one of the characteristics of living men (Eccl 9:6), or in a derogatory sense to denote hostile and disruptive passions (Prov 27:4) or in a favorable sense to denote consuming zeal focused on one that is loved (Ps 69:9 [H 10]).

It may prove helpful to think of "zeal" as the original sense from which derived the notions "zeal for another's property" = "envy" and "zeal for one's own property" = "jealousy."

Accordingly, our root is often translated "envy." It expresses the feeling which barren Rachel had toward prolific Leah (Gen 30:1). Joseph's brothers were similarly related to him after his fateful dream (Gen 37:11). Edom's deep jealousy of Israel's favor before God accompanied anger and hatred (Ezk 35:11). So, this root does not express superficial emotion. God says the righteous are not to long deeply after the apparent (but short-lived) prosperity of the wicked (Ps 37:1). A consideration of their ultimate end led the palmist to cease his envy (Ps 73:3).

The central meaning of our word, however, relates to "jealousy" especially in the marriage relationship. Adultery was punishable by death (Lev 20:10; Deut 22:22). By marriage the "two become one flesh" (Gen 2:24). Hence, adultery

was a severing of the body—a form of murder. Because woman usurped man's position in Eden the law was constructed to emphasize her subjection and man's leadership (Gen 3:16). Hence, provision was made for a husband to accuse and discover suspected adultery (Num 5). Nor should it be overlooked that this was also a means whereby an accused but innocent woman could escape the accusation and wrath of a jealous husband inasmuch as God himself would pronounce her guiltless. The law provides a fit end for justified jealousy, the death of the offender (IDB, III, p. 332).

God is depicted as Israel's husband; he is a jealous God (Ex 20:5). Idolatry is spiritual adultery and merits death. Phinehas played the faithful lover by killing a man and his foreign wife, and thus stayed the wrath of divine jealousy (Num 25:11). Joshua repeated the fact that God is a jealous God who would not tolerate idolatry and the people voluntarily placed themselves under God's suzerainty (Josh 24:19). Through idolatry Israel incited God to justified wrath, e.g. in the days of Ahab, and God punished them. Ultimately, repeated warnings went unheeded and God gave his people the justice due their spiritual adultery (Ezk 5:13; 8:3, 5; 16:38). The Psalmist identified the jealousy of God as the cause of the exile and he besought his Sovereign to quench his wrath against Israel (Ps 79:5). According to promise God rested his jealous wrath against Israel (Ezk 16:42; cf. Deut 30) and turned against those who had misused them (Ezk 36:5–6). So strong is his disposition to vindicate his name (Ezk 39:25) and his people, that all the earth felt his wrath (Zeph 3:8). Thus it will be seen that the action informed by this intensity may result in ill and perdition and is associated with words denoting wrath (Num 25:11; Ezk 16:38, 42; 36:6; 38:9) and anger (Deut 29:19 [H 20]), and as a consuming force with fire (Zeph 1:18; 3:8).

On the other hand the divine action accomplished with "jealousy" may result in good and salvation. Thus this arduous love effected the return (Isa 42:13). The restoration of Israel does not, however, exhaust God's gracious activities in behalf of his people. He will effect their salvation (the restitution of a perfect relationship between himself and his creatures), which they lost in father Adam, by a second Adam—Immanuel (Isa 9:7 [H 6]). Furthermore, the return from the exile foreshadowed an even greater event—God's creating and choosing a perfect bride through his Servant (Isa 42:13). God's jealousy when offended issued in just retribution, but when stirred by his grace it resulted in eternal love. Hence, the church is called the bride of Christ. It is now being perfectly prepared and preserved for the wedding.

God expects man to return his love. Love,

however, is not simply an emotion. It is a structured relationship. To love God is to obey him. So the word is used to denote a passionate, consuming "zeal" focused on God that results in the doing of his will and the maintaining of his honor in the face of the ungodly acts of men and nations. Phinehas, Elijah and Jehu are particular examples of this zeal (TWNT, II, p. 878). Saul (II Sam 21:2) and Jehu (II Kgs 10:16) were prompted by their ardent zeal (jealousy) for God to commit acts violating his commands. Thus, they stirred the wrath of God who is jealous for his name (Ezk 39:25)—that it be vindicated by the keeping of the whole law (Deut 29:20 [H 19]). The godly (esp. Messiah) are consumed, therefore, by an ardour (jealousy) to exalt God by maintaining purity of worship (Ps 69:9 [H 10]), and purity of obedience respecting the whole of God's word (Ps 119:139).

qin'ā. *Ardor of jealousy, zeal, anger.* This noun, modelled after the Qal infinitive form, describes the state wherein the subject is dominated by *qānā*—either positive or negative. This word is translated in the KJV in a bad sense in Song 8:6, "jealousy is cruel as the grave," but it could be taken in a good sense in parallel with the preceding, "ardent zeal is as strong as the grave."

qannā'. *Jealous.* This noun, modelled after the Piel infinitive, is used solely of God and in the context of idolatry. It shows the parallel between adultery and idolatry. As a husband holds his wife to himself and is permitted to kill her and her paramour in the case of adultery, so God relates to his people. It occurs only in the Pentateuch (five times).

qannō'. *Jealous.* This noun is also modelled on the Piel infinitive. Its use is the same as *qannā'*. It appears only twice and outside the Pentateuch.

L.J.C.

2039 קָנָה (*qānā*) *I, get, acquire, create.*

Derivatives

- 2039a קִינְיָן (*qinyān*) *wealth.*
- 2039b מִקְנֶה (*miqneh*) *cattle.*
- 2039c מִקְנָה (*miqnā*) *purchase.*

These radicals involve three (KB), not two (BDB) roots. In *qānā* we discern one root denoting a commercial financial acquisition of moveable goods (except some uses in Prov where wisdom is to be acquired: 4:5, 7, etc.), and another root denoting "creation" by God (*bārā'*). For the third root, see *qāneh* "reed." Distinguish *qānā* from *rākash* (to get property by laboring, q.v.), *gā'al* (to redeem, buy back; but, also see Lev 25:33, KD, in loc.). Both meanings of *qānā* occur

in Ugaritic (where Gordon UT 19: no. 2245 and AisWUS no. 2426 do not separate the two roots). Biblical occurrences number 182.

The verb *qānā* is the usual word for "buying" something. Commercial transactions were accomplished in several ways (cf. AI, pp. 167ff.). Especially interesting is the ancient custom involving the giving of one's shoe (Ruth 4:8; Amos 8:6 [H 7]) to the purchaser symbolizing forfeiture of the hereditary right of redemption. Transactions could either be recorded (Jer 32:16) or, otherwise, publicly witnessed (Ruth 4; cf. laws of Nuzu, AI, p. 168).

Because sacrifices were to be offered for oneself they must also come from one's own possessions. Therefore, when David sought to make a sacrifice to end the plague he felt compelled to purchase the land (II Sam 24:21–24). As king and perpetrator of the census it was his responsibility to personally appease divine anger (II Sam 24:16). Temple repairs were not paid for from the royal coffer but from the gifts of God's people (II Kgs 12:12 [H 13]; 22:6).

The laws of Israel safeguarded private ownership and the right to amass private capital (for a detailed study, see R. Rushdoony, *Institutes of Biblical Law*, Nutley, N.J.: Craig, 1973, pp. 448ff.). Since the land and all that is in it belongs to God (Deut 25:23–24) it was not theirs to sell but only to "rent." Other nations were not so constituted. Hence, Abraham could purchase land from Ephron and it became the perpetual possession of his family (Gen 25:10; Josh 24:32). In Egypt the Pharaoh bought all the land (Gen 47:19–20) except the land of the priests (v. 22). God ordered the theocracy so that the original allotment of the land (which represented the eternal rest) would be reestablished every fiftieth year (Lev 25:15ff.), the year of jubilee. This reallocation was to govern the real estate transactions, as is evidenced by the injunctions regarding purchase prices (vv. 15–16). Land lost due to poverty could be redeemed by a kinsman, or, if the original owner prospered, he could redeem it. If no human redeemer was to be found, the land was redeemed by God himself on the fiftieth year (God being Israel's redeemer, Ps 74:2, and father, Isa 11:11; see *gā'al*). This explains why houses in walled cities could be sold into perpetuity (i.e. they did not involve ancestral land rights, Lev 25:29–34), why Levitical houses were perpetually redeemable (they were God's "personal" possessions either because they were his allotment for his personal staff [the Levites], or because they were "returned" [and holy] to him), and why Levitical lands could never be sold at all (they were eternally "redeemed").

Slavery was allowed in Israel under certain conditions. Only non-Israelites could be true slaves, i.e., property of an Israelite (Lev 25:44f.).

All Jews were brothers and servants ('*ebed*, q.v.) of God (Lev 25:42–43). Hence, they could not "own" one another. If because of poverty or punishment (for theft) a Jew went into bondage, he was to be treated as a hired servant. He could be redeemed (bought out of bondage) either by a kinsman or, if he prospered, by himself. If no redemption was forthcoming he would be set free the seventh year (Lev 21:2; Deut 15:12), or the fiftieth year (Lev 25:39–46). Kinsmen were to "buy back" enslaved relatives (Neh 5:8). These injunctions virtually establish the abolition of slavery for Jews. In the NT where there is neither Jew nor Greek and the theocracy is co-extensive with mankind (Gal 3:28; Eph 1:20–23) slavery is also principally abolished.

In view of the above discussion it is significant that God who redeemed (*qānā* parallel *gā'al* Ex 15:13, 16; Ps 74:2) Israel from Egypt promised to bring unrepentant Israel back to Egypt to be sold as bondsmen. But no one would purchase them (Deut 28:68). However, God himself would purchase them out of the exile (Isa 11:11). This was by means of leaders of the exile like Nehemiah (Neh 5:8). Certainly all this finds perfect fulfillment in Christ (I Cor 6:19–20).

There are six places where *qānā* appears to mean "create": Ps 139:13 (cf. Gen 4:1; in Akkadian the root can be used of man); Deut 32:6 (cf. v. 13; Ps 74:2), and Gen 14:19, 22 (see Ugaritic and Phoenician parallels, AI, p. 310). It is questionable whether Ps 78:54 attests "create" or "acquire" (in a general sense), although the former is to be preferred. Most interesting is the use in Prov 8:22. If we are right, then Prov tells us of the eternal generation of Wisdom, i.e. Christ (Jn 1; Lk 11:49). [The relation of these two roots or the two meanings of the one root has been much debated. It is of interest that all of the derivatives show the usual meaning "acquire," "possess." The Ug evidence seems to prove the possible meaning "create" although several of the usages are found in broken and difficult texts. The main usage in Ug is the title of Asherah as "creatress of the gods." But the title of El the chief deity is "creator" (*bny*). It is probable that the word *qny* in Ug should be interpreted as "one who brings forth" rather than "creator." The NIV translates Prov 8:22, "The Lord possessed me" with the footnote, "Or, The Lord brought me forth." R.L.H.]

qinyān. *Wealth, property, possessions.* ASV and RSV somewhat similar with the RSV more correctly preferring "property, possessions." This noun denotes that which is acquired by purchase, "movable goods." Six of its ten occurrences contrast it with *miqneh* (see below). Three times it refers to wealth in general or property considered as wealth (Lev 22:11; Ps 105:21; Prov 4:7). Once

it seems to be a form of *qānā* "create" (Ps 104:24). This word also is found in Old Aramaic (H. Donner and W. Rollig, KAI, II, p. 41).

miqneh. *Livestock, herd* (or flock); purchase, possession. ASV and RSV translate similarly. This mem-preformative noun denotes the thing possessed. Most usually it refers to livestock in general (although it may refer to one or more varieties thereof). It refers to valuables as distinguished from money (Gen 13:2). It also denotes land fit for grazing (Num 32:1, 4), and owners of livestock (II Chr 14:14; Gen 46:32). Genesis 49:32 may well be *miqnā*. Cf. Phoenician *mqn'* (DR, p. 15).

miqnā. *Purchase, purchase price.* ASV and RSV translate almost the same. This noun denotes the thing purchased, and the price whereby a thing may be purchased.

Bibliography: Katz, Peter, "The Meaning of the Root קָנָה," JJS 5:126–31. TDNT, III, pp. 1005–28. THAT, II, pp. 650–58.

L.J.C.

2040 קָנָה (*qnh*) II. Assumed root of the following.

2040a קָנָה (*qāneh*) *reed, stalk, bone, balances.* (ASV and RSV translate similarly.)

This noun apparently denotes the Persian reed *Arundo donax*. However, vS. AkkH II, pp. 897–98 notes this root represents several reed-like plants in Akkadian. From the primary denotation derives the second meaning, that which is shaped like a reed, i.e. a stalk, bone (only Job 31:22), balance part (Isa 46:6, lever). This word also represents an aromatic spice used in sacred ministration (cannot be "calamus," according to KD, Isaiah, II, p. 199, n.1). Our word occurs sixty-two times. It is to be distinguished from *gōme'* (Cyprian Papyrus), *sūp* (an Egyptian loanword meaning rushes in general), *'āhū* (marsh plant), and *yārāq* (green plant). Cf. *qānā*, I, "get, acquire, create."

Egypt is called a bruised reed—an undependable, weak staff (II Kgs 18:21). God pronounces judgment on Egypt because she boasted of her selfmade power, and weaned Israel away from trusting him. When the test came, Egypt proved to be a weak support (bruised reed) and thus caused Israel to suffer pain (Ezk 29:6–7). When the Messiah comes he will gently lead his flock, not setting on them more than they can bear. The Lord's servant will establish justice even on a bruised reed—either the poor of society or possibly Egypt (Isa 42:3; cf. II Kgs 18:21). This expectation found fulfillment in Jesus' healing of the crippled man, a truly broken reed, in the synagogue on the Sabbath day (Mt 12:9–21).

The spice *qāneh* was one of the four which God directed to be mixed and used as holy anointing oil. With it the instruments and ministers of the tabernacle (and temple) were anointed (Ex 30:23). Later God berates his people for ignoring his appointed means of worship in the midst of their great sin (Isa 43:24, sweet cane AV, calamus NIV). Finally, he tells them that external sacrifice apart from inward devotion is useless (Jer 6:20). God's worship is holy to him. He intends men to follow his directions specifically. If so, the result will be sweet smelling (acceptable) to him. If not, the result is unacceptable: rite and attitude must conform to his standard. L.J.C.

קָנָה (*qannô*). See no. 2038c.

קִינְיָן (*qinyān*). See no. 2039a.

2041 קִינָמֹן (*qinnāmôn*) *cinnamon* (Prov 7:17; Song 4:14; Ex 30:23).

2042 קִינֵן (*qinnēn*) *make a nest*. This denominative verb occurs in the Piel and Pual only (e.g. Isa 34:15; Ezk 31:6).

Parent Noun

2042a קֵן (*qēn*) *nest* (e.g. Deut 22:6; Job 39:27).

2043 קִנָּה (*qns*). Assumed root of the following.

2043a קֶנֶשׁ (*qēneš*) *snares* (Job 18:2).

2044 קָסָם (*qāsam*) *practice divination*. Denominative verb.

Parent Noun

2044a קֶסֶם (*qesem*) *divination, witchcraft*.

2044b מִקְסָם (*miqsām*) *divination*.

Like the noun *qesem*, this verb describes some variety of divination. And as with all other manifestations of the occult, this practice was outlawed in Israel and spoken of with scorn.

The participial form appears in the long list of such practices in Deuteronomy 18 (vv. 10, 14).

Balaam was such a "soothsayer" or "diviner." Both the participial and nominal forms are used in connection with him (Num 22:7; 23:23; Josh 13:22).

Saul commanded the woman at En-dor to "divine" for him with 'ōb (q.v.) in I Sam 28:8. The only other prose passages using *qāsam* are I Sam 6:2 in reference to the Philistine "diviners" and II Kgs 17:17, a list of Israelite offenses which prompted God to exile them.

The major prophets Isaiah, Jeremiah, and Ezekiel and the minor prophets Micah and Zechariah all mention *qāsam* in a derogatory sense. In Isa 3:2 the "diviner" is grouped with the honorable professions of soldier, judge, prophet, and elder as well as enchanter (v. 3). But the "diviners" receive God's curse in Isa 44:25.

Jeremiah's two uses are in 27:9 and 29:8, where he compares his own prophecy with those who would rather offer god omens.

Ezekiel uses *qāsam* in 13:9; 21:21, 23, 29; and 22:28. The references in chap. 21 are to Nebuchadnezzar's "divination" with arrows. Apparently he chose the route of attack by flinging down a handful of arrows. This is the only passage to hint at the actual process involved in *qāsam*.

Micah 3:6f. and Zech 10:2 also speak disparagingly of the "diviners" comparing them with the false prophets and dreamers.

qesem. Divination, witchcraft, sorcery, fortune-telling, omen, lot, oracle, decision. The exact meaning of this variety of occultism is unknown. That fact accounts for the variety of translations. The account in Ezk 21:21–22 [H 27–28] is the only clue to exactly how *qesem* may have been practiced. Shaking or flinging down arrows, consulting teraphim, and hepatoscopy (looking at the liver) may be subcategories of *qesem*. In any event, verse 22 [H 28] uses *qesem* as if it were one of the arrows to be thrown down. In fact, the NEB translates the word as "augur's arrow" and the NAB as "divining arrow." The JB uses "omen" and "lot" in these two verses.

Another interesting use of *qesem* is at Num 22:7, where the word seems to indicate a "reward" or "fee" for "divination" (Berkeley Version, sorcery; Amplified, foretelling; NEB, augury) to be paid to Balaam. Later in that account (Num 23:23) *qesem* is parallel to *nahash* (cf. II Kgs 17:17). In Jer 14:14 it is parallel to "lying vision," "a thing of nought," and "self-deceit" (cf. Ezk 13:6, 23).

A third noteworthy passage is Prov 16:10. There the AV has "divine sentence," the RSV "inspired decisions," and the JB, NEB, and NAB "oracles." Whereas *qesem* is generally forbidden (Deut 18:10), or only used by non-Israelites, in Prov 16:10 it seems perfectly permissible and commendable. The best known occurrence of *qesem* is in I Sam 15:23, where Samuel confronts Saul for disobedience in the matter of the spoils from the Amalekite victory. The prophet declared:

To obey is better than sacrifice

and to hearken than the fat of rams.

For rebellion is as the sin of *qesem*.

The traditional rendering "witchcraft" is followed by the ASV, Amplified and the NEB, while the JB has "sorcery" and the Berkeley Version has "fortune-telling."

miqsām. Divination. Ezekiel 12:24 and 13:7 have the only occurrences of *miqsām*. In the former reference the "divination" is characterized by the adjective *hālāq* (flattering or deceitful) and in the latter reference by *kāzāb* (lying).

R.L.A.

2045 *קָסַס (qāsas) *strip off*. Occurs only once, in the Poel (Ezk 17:9).

קָסַת (qeset). See no. 2080b.

2046 קָעַע (q'q'). Assumed root of the following.

2046a קָעַעַע (qa'āqa') *incision, tattoo* (Lev 19:28).

2047 קָעַר (q'r). Assumed root of the following.

2047a קָעַרָה (q'ārā) *dish, platter* (e.g. Num 7:85; Ex 25:29).

2047b שְׁקָעַרְרָה (sh'qa'ārūrā) *depression hollow*.

2048 קָפָא (qāpā') *thicken, condense, congeal* (e.g. Zech 14:6; Zeph 1:12).

Derivative

2048a קִפְּאוֹן (qippā'ōn) *congelation* (Zech 14:6, only).

קִפְּאוֹן (qippā'ōn). See no. 2048a.

2049 *קָפַד (qāpad) *gather together, roll up*. This verb occurs only once, in the Piel (Isa 38:12).

Derivatives

2049a קִפְּדָה (qippōd) *porcupine* (Isa 14:23; Zeph 2:14; Isaa1).

2049b קִפְּדָה (q'pādā) *shuddering* (Ps 119:20; Ezk 7:25).

2050 קָפַז (qpz). Assumed root of the following.

2050a קִפְּפוֹן (qippōz) *arrow snake* (Isa 34:15), or *owl* (Klotz, J. W., WBE I, p. 89).

2051 קָפַץ (qāpaš) *close, shut*. (ASV and RSV translate the same.)

This root refers to the drawing together (shutting, or closing) of the mouth or hands. It occurs as Akkadian *kap/bāšu*. Biblical occurrences number five. The apparent occurrence in Job 24:24 is best explained by assuming a b/p interchange (cf. *qābas*), and in Song 2:8 by assuming the appearance of Akk. *kabāsu* (used of armies marching upon mountains; cf. vS. AkkH. I, p. 443). Compare the following: 'āṭar "shut a pit," sāḡar "shut a door" (the nearest Hebrew root), and 'āšar "restrain."

The basic meaning of this root is most clearly discerned in Deut 15:7 (opposite of "open," *pātaḥ*). A note of finality sounds there. This is especially significant in considering the other biblical uses (cf. Ps 77:9 [H 10]). Eliphaz having recounted the absolute sovereignty of God and his love for the godly, concludes (rightly, cf. Ps 107:42) that this is the basis of hope for the godly and thus closes the mouth of iniquity (Job 5:16). Isaiah (52:15) contrasts the surprise of the many and the awe of kings. Even the most exalted of men will be struck speechless at the utter novelty of the salvation they will come to experience and the one who brings it (E. J. Young, *Isaiah*, III, Eerdmans, 1972, p. 339).

L.J.C.

קָשַׁ (qēš). See no. 2060a.

2052 קָצַב (qāšab) *cut off, shear* (II Kgs 6:6; Song 4:2).

Derivative

2052a קָצַב (qēšeb) *cut, shape* (I Kgs 6:25), *extremity* (Jon 2:7).

2053 קָצָה (qāšā) *I, cut off*.

Derivatives

2053a קָצַהַה (qāšeh) *end, extremity*.

2053b קָצָה (qāšā) *end, extremity*.

2053c קָצַהַה (qēšeh) *end*.

2053d קָצָה (qāšā) *end, border*.

2053e קָצַתָה (q'šāt) *end*.

The ASV and RSV translate variously, with the RSV tending to present a superior translation. The RSV translation is sometimes confusing. Why does it render differently Neh 1:9, when it is obviously a direct reference to Deut 30:4 which uses the same Hebrew phrase. This verb denotes a cutting off. It is difficult to determine if this is a denominative of the noun forms which in turn are derivatives of *qāšaš*, or if this is an original Canaanite root (especially since *qsh* [originally *qsw*] occurs in Phoenician; H. Donner and W. Rollig, KAI, II, p. 22). We opt for an original root. The verb occurs only five times. Two of those occurrences (Lev 14:41, 43) may well be the result of later scribal error confusing the verb *qās'a* of similar meaning with *qāšā*. Our root occurs 152 times. Compare its synonym *qāšaš* (q.v.), and contrast *kārat* (q.v.) which is considerably broader in meaning.

qāseh. End, extremity. This is what GKC (n.1, p. 269) terms the regular Hebrew noun form of *lamed-he* verbs. It stresses the point at which a thing is cut off, and therefore its extremity. The following derivatives are distinguished more by their orthographic history than by their meanings.

qāšā. End, extremity. GKC calls this an Aramaised form (loc. cit.). Perhaps it would be

better to consider it a dialectical form since Aramaised has connoted lateness to some. Its meaning parallels *qāṣeh* except that is applied to time and *qāṣā* is not. Note that the two words are applied to the same object (Ex 26:4-5).

qēseh. End. In this noun the original *waw* is resolved (GKC, Sec. 84^{ac}). It appears only with a preceding 'ēn meaning "no limit."

qāṣū. End, border. In this noun the original *waw* becomes a strong consonant again (GKC, Sec. 24d). The word is applied only to extremities of land.

qṣāt. End. This noun occurs only in the construct. It, too, denotes extremity.

Compare this cycle of nouns to *qēš* which applies to immaterial extremities (e.g. time), *sōp* which applies to the "last" of a thing, 'ahārīt which denotes the "hinder part," and 'epes which denotes "cessation, nothingness, limit".

The nouns denoting extremity may refer to the tip of a rod (I Sam 14:27) or wings (I Kgs 6:24), the edge of a curtain (Ex 26:4-5), the end or outskirts of a land (Num 20:16). This helps us better understand I Kgs 12:30, where Jeroboam in establishing his rival apostate cult disdained God's law by choosing priests from other than Levitical lines, thus rejecting the cultic stipulations of the Sinaitic covenant. In Prov 17:24 we are told that fools fix their eyes on the ends (horizon) of the earth—they seek the never attained earthly goals and reject wisdom (the fear of the Lord). The expression should not be forced to imply an erroneous cosmology of a flat earth with edges to fall off of. The phrase sometimes only refers to national boundaries "the ends of the land." Sometimes it is poetic for distant places. The extent of the earth from India to Spain was well known in antiquity and travel was extensive.

Especially significant is the recurring theological theme: the end(s) of the world/heavens. It denotes both the source and place of Israel's judgment and the area of universal salvation. This is the abode of the people who were to bring judgment (destruction) if (and when) Israel threw off the rule of the Lord (Deut 28:49). Such peoples were summoned by God in fulfillment of Moses' prophecy (Isa 5:26). Indeed, God used different peoples to judge Israel's "judgers" (Isa 13:5) and Elam (Jer 49:36). This phrase also represents the place of judgment and suffering to which God will scatter rebellious Israel (Deut 28:64), and from which he will gather them (Deut 30:4). David describing his suffering places himself in the ends of the earth (Ps 61:2 [H 3]). Nationally, God tells Isaiah to declare deliverance to his people in exile at the ends of the earth (Isa 62:11). Nehemiah confesses the justice of the exile (clearly recalling Deut) and prays God to remember his promised

deliverance. Isaiah sees the return from Babylon as a reenactment of the call of Abraham from the ends of the earth (Mesopotamia) to come to the Holy Land (Isa 41:9).

On the other hand, the prophets foreseeing the exile now predicted a salvation to all nations. Even as Abraham was called from the ends of the earth to begin a new program with a particular people, so now when the exiles return, the Lord will bring universal salvation through his servant. God informs his servant that only to save the Jews is less than his calling (cf. *qālal*), so the Gentiles are also to be summoned into the kingdom "that thou mayest be my salvation to the end of the earth" (Isa 49:6). Indeed, in the eschaton the end(s) of the earth are eternally pacified by God, and they are transformed into the locus of songs of praise to the Lord (Isa 42:10).

In view of the fact that the end(s) of the earth are the source and place of judgment, it is noteworthy that God is the only confidence of the ends of the earth (Ps 65:5 [H 6]), and that those who dwell there fear God's providential control of nature (Ps 65:8 [H 9]). There sounds the declaration of God's glory (Ps 19:4 [H 5]). There God exercises absolute control over war (Ps 46:9 [H 10]), and all things (Ps 135:7; cf. Jer 10:13) according to what pleases him. So when Israel complains that God is unconcerned with their exile, Isaiah responds that God's knowledge knows no bounds and that he cares. He will remember his covenant (Isa 40:28). Creation and many providential acts, however, are inscrutable outskirts of God's way (Job 26:14). Man depends on God to learn his way. God's knowledge rests on his sovereignty and, hence, embraces all that is (or may be) known (Job 28:28).

L.J.C.

2054 קֶשֶׁח (qṣḥ) II. Assumed root of the following.

2054a קֶשֶׁח (qāṣin) *chief, ruler* (e.g. Jud 11:6; Isa 3:67). ASV and RSV translate "leader," "chief."

This word is a military term. It signifies the man responsible for recruiting, an administrator in the army. It appears to denote the one at the head (parallel to "head ones," Mic 3:1, 9) of an army (Josh 10:24), or people (i.e. as political ruler; cf. Isa 1:10; Mic 3:1). The cognate root in Arabic is used for a judge, the qadi. The word occurs twelve times.

קֶשֶׁח (qāṣū). See no. 2053d.

2055 קֶשֶׁח (qṣḥ). Assumed root of the following.

2055a קֶשֶׁח (qeqah) *black cumin* (Isa 28:25, 27).

קֶשֶׁח (qāṣin). See no. 2054a.

2056 *קָצַץ (*qāṣa'*)

קָצִיעַ (*qeṣi'ā*). See no. 2056a.

קָצִיר (*qāṣir*). See nos. 2062a,b.

- 2056 *קָצַץ (*qāṣa'*) *I, scrape, scrape off*. This noun occurs only once, in the Hiphil (Lev 14:41).

Derivatives

2056a קָצִיעַ (*q' ṣi'ā*) *cassia* (Ps 45:9).

2056b קָצַץ (*maṣṣū'ā*) *scraping tool, used in fashioning idols* (Isa 44:13).

- 2057 *קָצַץ (*qāṣa'*) *II, cornered, set in corners*.

This denominative verb occurs only in the Hophal (Ezk 46:22; Ex 26:23; 36:28).

Meaning uncertain.

Parent Noun

2057a מִקְצָא (*miqṣā'*) *place of corner structure, inner corner-buttress* (e.g. Neh 3:19; Ezk 46:21).

- 2058 קָצַץ (*qāṣap*) *I, be displeased, angry; fret oneself*.

Derivative

2058a קָצַץ (*qeṣep*) *wrath*.

The verb *qāṣap* is used to give pointed expression to the relationship between two or more persons, one or both of which can be said to feel anger ('*ap*), have wrath (*hēmā*), indignation (*ka'as*), or express anger ('*ebrā*). Deuteronomy 9:19 presents a good case. Moses, referring to the golden calf incident, says he was afraid of the anger ('*ap*) and wrath (or displeasure) (*hēmā*) with which God was wroth (*qāṣap*) against Israel. It can be said then that here, as in most of the other thirty-three instances where this verb appears, *qāṣap* refers to the relationship developed, held or expressed in various ways when there is anger, heat, displeasure held or felt within one because of what another has said or done. It is said eleven times that men were wroth, (e.g., Pharaoh, Moses, Naaman, Philistine princes). Twenty-three times it is said that God was wroth, whether against the heathen or against his covenant people.

Of the six main synonyms referring to anger, the strongest, probably, are *qeṣep* which often refers to the Lord's anger, and *hēmā* and *hārōn* both of which refer to a burning and consuming wrath. The noun '*ap* taking its meaning of "anger" from the dilation of the nostrils is the most widely used word of the class. It is used for anger both of God and men and often with verbs like "kindle" *hārā*. The word '*ebrā* emphasizes the overflowing or excess of anger. It and the weaker words *za'am* "indignation" and *ka'as* "vexation" are not used as often.

qeṣep. *Indignation, wrath.* *qeṣep* in Hos 10:7 is derived from a *qāṣap* II, related to Arabic "to

break, snap off." BDB renders the noun as probably meaning "splinter" (as a simile for a helpless king); GB as a "piece of wood" (Holzstück); KB as a "snapped-off branch (*abgeknickter Zweig*). See *qāṣap* II below.

Three times this noun is used in reference to men. In two of these instances (I Kgs 3:27; Est 1:18) it can be said this wrath of men is righteous or justifiable. Moses, Joshua, Isaiah, Jeremiah, the Chronicler and Zechariah either warn of or speak about the righteous wrath of God coming upon his unfaithful covenant people.

The following should be read after the reader has consulted the above discussion of the verb *qāṣap* and its synonyms.

The subject of the wrath of God has been discussed by the Church throughout the ages. The consensus of opinion has been, and that correctly, that wrath in and of itself is not necessarily evil. Lactantius, who does not clearly distinguish between the various synonyms, spoke of "anger as the mind arousing itself for the restraining of evil"; "wrath" is the expression of this anger in various ways to restrain evil, to correct the sinner and to punish the hardened and stiffnecked rebel. However, wrath is not merely an energy of divine justice which is concerned basically with the preservation of the divine order. Rather, wrath (from which retributive justice cannot be separated) is concerned with the protection of God's holy interests; i.e. his holy nature, his love and the objects of his love. Hence, wrath is inseparably related to God's love, holiness and jealousy. Indeed, the wrath of God speaks directly of God maintaining himself completely and absolutely as a holy God who loves his covenant people with an infinite passion and therefore is very jealous over them. When either people from without, or the covenant people themselves, profane, thwart or reject this love of the covenant God, God expresses his vexation, agitation, displeasure, anger and/or hatred: he pours out his wrath.

The wrath of God, then, must not be considered a permanent attribute of God; it is an ever-present divine potential because of the ever-present divine qualities of love, holiness, and jealousy. So, whenever God reveals his wrath, he always manifests his own "unsearchable greatness." It must be that his wrath is expressed in harmony with his justice. The guilt due to lawbreaking must be dealt with according to the just demands of the law (Deut 29:13). However, the working out of God's wrath is tempered by his grace and mercy. In fact, it is in the midst of wrath that God may reveal his mercy (Hab 3:2), manifesting and bestowing his grace upon guilty sinners (Gen 3:15). There is no question of "despotic rage" and there is nothing of "the demonic in God's nature" (contra Eichrodt, ETOT, I, p. 262), which leads him to pour out his wrath or to determine the object, method

and occasion for it apart from considerations of condign justice.

G.V.G.

2059 קָשַׁפַּ (qšp) **II. Assumed root of the following.**

2059a קִשְׁפָּה (*q'šāpā*) *snapping or splintering* (Joel 1:7, only).

2059b קִשְׁפָּה (*qēsep*) *splinter, twig* (Hos 10:7, only).

2060 קָצַץ (*qāṣaṣ*) *cut off*.

Derivatives

2060a קָצַץ (*qēṣ*) *end*.

2060b קִיצוֹן (*qīṣôn*) *at the end, outermost* (Ex 26:4, 10; 36:11, 17).

This root means "to sever," i.e. to separate in two. It should be compared to *qāṣā*, its semantic equivalent. Our root occurs in Ugaritic (UT 19: no. 2259). Compare also Akkadian *qaṣāṣu*. The root occurs eighty-two times.

A woman who humbles a man by grabbing his genitals even when her action might be to save her husband is to be punished by having her hand cut off (Deut 25:12). Later David orders the severing of the hands that beheaded Ishbosheth and the feet that carried his head to David's presence. The act of the murderers—no doubt intended to remove a rival claimant—was viewed as an attack upon the Lord's anointed (the father, Saul, being continued in the son, II Sam 4:12). David distanced himself from that act even though (or perhaps because) he was the anointed of the Lord (I Sam 24:1–7). The emotion behind David's command is evidenced by the use of the Piel. In Jud 1:6–7 Adonibezek is punished as he had afflicted others. He had rendered them unable to bear arms and to flee with speed, and unqualified to lead or religiously officiate before their people. The Piel (repetitive function) is used in describing how Nebuchadnezzar had the temple vessels cut in pieces (II Kgs 24:13). The gold (representing the glory of God?) was ultimately delivered into the hands of heathen oppressors as tribute in spite of God's direct command forbidding it (II Kgs 18:16, Piel). When God cuts the bonds (probably, reins) of the wicked (Ps 129:4), and their spears (Ps 46:9 [H 10]), he hacks them in pieces (Piel).

qēs. End. This noun is used in a context of judgment. God brought an end to all flesh (Gen 6:13). So Ezekiel speaks about the end of Israel (7:2–3). Contrariwise, the Messiah's kingdom will know no end (Isa 9:7 [H 6]). This word, unlike *qāṣeh* is very seldom used of a geographical boundary.

L.J.C.

2061 קָצַר (*qāṣar*) **I, be short, impatient, vexed, grieved.**

Derivatives

2061a קָצֵר (*qāṣēr*) *short*.

2061b קָצֵר (*qōṣer*) *shortness* (i.e. impatience, Ex 6:9, only).

The root designates that which is short (Ps 89:45 [H 46]; 102:23 [H 24]) or inadequate, such as a bed (Isa 28:20). Rhetorical questions ask if the Lord's hand (Num 11:23; Isa 50:2; 59:1) or spirit (Mic 2:7), is short, i.e. unable to accomplish the task. In some passages the root means discouragement (Num 21:4), vexation (Jud 10:16; 16:16; Job 21:4), or loathing (Zech 11:8).

qāṣēr. Short, shortened. This adjective occurs in the construct state in idioms: "short of hand" (feeble; asv, of small power; rsv, shorn of strength; II Kgs 19:26; Isa 37:27); "short of nostrils" (irascible; asv: soon angry; rsv: of quick temper; Prov 14:17); "short of spirit" (impatient; asv: hasty of spirit; rsv: hasty temper, Prov 14:29); and "short of days" (shortlived; asv and rsv: few of days; Job 14:1). Of similar background is the noun *qōṣer* "anguish," i.e. "compressed in spirit."

J.P.L.

2062 קָצַר (*qāṣar*) **II, reap, harvest.**

Derivatives

2062a קָצִיר (*qāṣīr*) **I, harvest.**

2062b קָצִיר (*qāṣīr*) **II, boughs, branches.**

Most frequently the root refers to the reaping of crops of various kinds (Lev 23:10, etc.). It also refers, metaphorically, to receiving the consequences of one behavior, whether righteous or wicked (Jer 12:13; Hos 8:7; 10:13; Prov 22:8). Hence harvest is a fitting symbol for a time of judgment (cf. Amos 9:13).

The Qal participle designates those who do the reaping, i.e.—the reapers (Ruth 2:3; II Kgs 4:18, etc.).

qāṣīr I. Harvest. This masculine noun is used for the process of harvesting (Gen 45:6; etc.), the harvest season (Gen 8:22; etc.), and that which is harvested (Lev 19:9; Joel 1:11; etc.). The endless

cycles of "seedtime and harvest" and "plowing and harvest" are metaphors for the procession of the seasons (Gen 8:22; 45:6; Ex 34:21). In Palestine the grain harvest came between April and June and was celebrated by the offering of the first sheaf of grain (Ex 34:22; Lev 23:10) and by the feast of harvest, one of the three pilgrimage festivals (Ex 23:16). The grape harvest followed later in the summer. The Gezer calendar gives the sequence of the agricultural year to harvest. In the OT events are dated by the wheat (Gen 30:14; Jud 15:1, etc.) and the barley (II Sam 21:9; Ruth 1:22, etc.) harvests. Harvest was a hot (Isa 18:4), busy season requiring diligence (Prov 6:8; 10:5) and prior work (Prov 20:4). Harvest was a time appointed by the Lord (Jer 5:24).

Metaphorically, harvest is a time of retribution (Hos 6:11; Joel 3:13 [H 4:13]; Jer 51:33). Honor is as unfitting to a fool as rain in harvest (Prov 26:1), while a faithful messenger is as refreshing as the cold of snow in harvest (Prov 25:13). The passing of opportunity is as the passing of harvest (Jer 8:20).

The gleanings of the harvested field were left for the poor (Lev 19:9–10; 23:22; Deut 24:19). The yield was dependent upon the Lord's blessings (Isa 17:11). Labor was vain when the harvest was devoured by locusts (Joel 1:11) and by enemies (Isa 16:9; Jer 5:17). Harvest was not to be reaped in the sabbatical year (Lev 25:5).

qāšir II. Boughs (RSV, branches or boughs). The connection with the root *qāšar* is dubious. Used of a tree (Job 14:9; Isa 27:11) and in comparisons of a man to a tree (Job 18:16; 29:19) and of Egypt to a vine (Ps 80:11 [H 12]).

J.P.L.

קָצַת (*q'šāt*). See no. 2053e.

קָר (*qar*), קָר (*qōr*). See nos. 2077a,b.

2063 קָרָא (*qārā'*) *I, call, call out, recite (read).*

Derivatives

2063a קָרָא (*qōrē'*) *partridge* (I Sam 26:20; Jer 17:11; Jud 15:19).

2063b קָרִיאָה (*qārī'*) *called one, summoned* (Num 1:16; 16:2; 26:9).

2063c קְרִיאָה (*q'rī'ā*) *proclamation* (Jon 3:2, only).

2063d מִקְרָא (*miqrā'*) *convocation.*

The root *qr'* denotes primarily the enunciation of a specific vocable or message. In the case of the latter usage it is customarily addressed to a specific recipient and is intended to elicit a specific response (hence, it may be translated "proclaim, invite"). Infrequently, *qārā'* denotes just an outcry (e.g. Ps 147:9; Isa 34:14). Our root with the same semantic distribution occurs in Old Aramaic (KAI, II, p. 41), Canaanite (H. Donner

and W. Rollig, KAI, II, p. 22), and Ugaritic (UT 19: no. 2267). The most frequently recurring synonyms are *š/za'aq*, *šāwā'* (to cry out urgently for help, Jer 20:8). The root occurs 689 times.

The verb may represent the specification of a name. Naming is sometimes an assertion of sovereignty over the thing named. God's creating entailed naming and numbering the stars (Ps 147:4), the darkness (Gen 1:5), indeed all things (Isa 40:26). God presented the animals to Adam to assert his relative sovereignty over them (Gen 2:19). God sovereignly called Cyrus by name (note that election to a task is involved here, Isa 45:4). Sometimes this idea of sovereignty is entailed even though the concept "naming" is omitted, e.g., God called all generations from the beginning (Isa 41:4; cf. Amos 5:8). In these instances the object must respond.

Frequently, the name given indicates a primary characteristic of the thing named. Sometimes this involves a play on words (Gen 27:36). Elsewhere, this constitutes a confession, or personal evaluation of the object (Isa 58:13; 60:14), or even a recognition of an eternal truth, e.g. the child prophetically promised is *divinely* named "Immanuel" (Isa 7:14). God asserted his sovereignty over Israel (Isa 41:2), and yet called them by another name (Isa 65:15; "refuse silver," Jer 6:30). In Ex 33:19; 34:6 and Deut 33:3, proclaiming the name of God includes the description of his attributes and/or sovereign acts.

Our verb also connotes calling one to a specific task (cf. *miqrā'*). The maidservant of Pharaoh's daughter asked if she is to go and "summon" a nurse (Ex 2:7). The destruction of all the inhabitants of Canaan is to obviate all possibility of friendships leading to the acceptance of personal invitations to and involvement in idolatry (Ex 34:15). The most prominent usage here has to do with calling on the name of God. Usually, the context has to do with a critical (Ps 34:6, 81:7 [H 8]) or chronic need (e.g., after Cain killed Abel, man realized the full effects of the curse and began to call on God's name—Gen 4:26). The godly recognize the presence of original sin by their continual calling on God (Gen 12:8; 13:4; Ps 116:2). God responds to all who thus call on him (Ps 145:18). Indeed, the covenant people (including the stranger, I Kgs 8:43) are admonished to so pray and are assured that God will reverse the curse (Isa 55:6, 13). Not to so call on God is to deserve (Ps 79:6) and justly receive God's wrath (Isa 65:12). In the eschaton God's people are to be those whom God will sovereignly call, even the cursed Gentiles (Isa 55:5), and they will run to him. He will reverse Babel, and with a pure language all those called of God will call on him and serve him (Zeph 3:9). Even before they call he will answer (Isa 65:24). Thus Eden is restored,

and the curse is fully annihilated. How tragic that Israel, to whom such promises were given, rejected the Lord's call (Isa 65:12). Salvation is truly of the Lord.

qāri'. *Called one.* This word is used (with 'ēdā) to designate those among Israel "called to the diets of the congregation" (KD, Pentateuch, II, p. 15; cf. Deut 18).

miqrā'. *Convocation, reading.* ASV and RSV similar. This noun denoting the result of *qārā'* is used, first, for convocations exclusively cultic, and secondly, of the result of reading aloud (Neh 8:8). One should compare its synonym *mō'ēd*, an appointed time therefore also an appointed gathering (q.v.).

miqrā' designates the weekly Sabbaths (Lev 23:2) and the new moons (Ezk 46:3; cf. Isa 66:23). However, its most usual meaning is reserved for the seven special convocation sabbaths. These were observed in the course of the five annual feasts (Passover and the Feast of Tabernacles were opened and closed with a special convocation Sabbath). Such days (and the weekly Sabbath as well) included a formal summoning of people to worship by the blast of trumpets (Num 10:2, 10; cf. *qōl*). Physical presence was mandatory, however, only for the three festal pilgrimage feasts and only for males (Ex 23:14, 17). The Sabbath and Day of Atonement were further distinguished by the divine prohibition excluding all labor (Lev 23:3, 31), indeed, any pursuit of non-cultic goals (Isa 58:13f.). The godly were to focus their time and effort on worship. The six other special convocations did not exclude the preparation of food even though servile labor was prohibited (Lev 23).

For more on feasts see OTOT, pp. 323–52.

Bibliography: TDNT, III, pp. 700–702. THAT, II, pp. 666–73.

L.J.C.

2064 קָרָא (*qārā'*) II, *encounter, against, befall.* (ASV and RSV translate similarly, with the latter offering some improved renditions (Ex 5:20; I Sam 25:20).)

This root denotes a planned encounter wherein the subject intentionally confronts the object. It is a by-form of *qārā'* (q.v.). Compare the following synonyms: *yā'ad* "meet by appointment," *pāga* "come or fall upon, reach to," *pāgash* "to meet, encounter" (of hostile or opposing subjects), *māšā'* (a close cognate including reach, find), and *nāgash*. Our word occurs 137 times (120 times as an infinitive with *lamed*).

This word can represent friendly encounters like that of a host rushing out to meet a prospective guest (Gen 18:2; Jud 4:18), or going out to meet someone in order to recognize or gain (II

Sam 19:15 [H 16]) him as an ally (cf. Josh 9:11; II Kgs 10:15; Ps 59:4 [H 5]). Such meetings are purposeful and intentional. In the cultic use the subject confronts the divine (Ex 5:3; 19:17; Num 23:3).

Hostile usages entail a formal confrontation of enemies martially (cf. II Kgs 23:29; Josh 8:5, 22) and non-martially (Ex 5:20; 7:15). It is not always clear to the parties which is involved (Gen 32:6 [H 7]). This martial connotation is especially useful in helping to enrich Amos 4:12, "Prepare to meet thy God, O Israel" (see W. A. Brueggemann, "Amos 4:4–13 and Israel's Covenant Worship," VT 15:1–15).

The infinitive of the root appears to be used as the preposition "against" in Ex 14:27; Jud 14:5. Sometimes the infinitive is used as a finite verb (II Kgs 20:26; cf. Huesman, *Biblica*, 76:271–95).

For more on the denotation "befall" see *qārā'*.
L.J.C.

2065 קָרַב (*qārab*) I, *come near, approach, enter into.*

Derivatives

2065a	קָרַבַּת (<i>qārēb</i>)	<i>near.</i>
2065b	קָרַב (<i>q'rāb</i>)	<i>battle, war.</i>
2065c	קִרְבָּה (<i>qirbā</i>)	<i>drawing near.</i>
2065d	קְרוֹב (<i>qārōb</i>)	<i>near, kinsman.</i>
2065e	קִרְבָּן (<i>qorbān</i>)	<i>offering.</i>
2065f	קִרְבָּן (<i>qūrbān</i>)	<i>supply.</i>

Basically our root denotes being or coming into the most near and intimate proximity of the object (or subject). A secondary meaning entails actual contact with the object (Ezk 37:7; the Piel imperative in Ezk 37:17; GKC, 52n, 64h; also, perhaps, Ex 14:20; Jud 19:13). Our root occurs about 455 times (verb, 279 times). It is a common Semitic root (cf. Akkadian *qarābu*, *qrb*, UT 19: no. 2268). Among its synonyms, note *nāgash* (very close to *qārab* in use), *bō'* (somewhat wider in meaning and emphasizing movement toward).

The various uses of the root surface in the verb. There are a few general non-technical uses connoting approach or coming near apart from any sense of intimacy (Gen 37:18). The more essential significance of the root emerges in cases where the "drawing near" renders the subject close enough to the object to see it (Ex 32:29), to speak to it (Num 9:6), or even to touch it (Lev 10:4; Ex 36:2).

Spatial proximity is a connotation of the adjective *qārōb* (e.g. Gen 19:20). It is often coupled with "far" (*rāhōq*) as a technical phrase for "all" (Ezk 22:5). Solomon repeats the phrase in the course of his prayer at the dedication of the temple (I Kgs 8:46). The prophets employed our phrase quite frequently, e.g. the peoples "far and

near" will mock Israel (Ezk 22:5), yet God's preservation of his people will cause their enemies to acknowledge his might (Isa 33:13).

The temporal sense of imminence is used of joyous (Lev 15:9, the year of Jubilee; Num 24:17, the "scepter") and foreboding (Gen 27:41, death) events. The second connotation (the sense of impending doom) is used by Moses (Deut 32:35) of the day of calamity and by the prophets for the day of the Lord (Lam 4:18; Isa 13:6; Zeph 1:3). The idea here is not just that a certain event is near, but that that event is foreboding.

The general sense of the verb *qārāb* develops into still other technical uses. In martial contexts it connotes armed conflict (Deut 2:19; 20:10). Sometimes qualifying words ("to fight," "unto battle") are omitted and the verb carries the full force of "entering into battle." Moses records that Israel came not near the land of the children of Ammon (Deut 2:37) and that they did come near them (2:19). This seeming difficulty is cleared up by understanding Deut 2:37 to refer technically to closing in battle and 2:19 to approach in general. This martial connotation is clear in Deut 25:11 and Josh 8:5. Especially note Ps 27:2; 91:10; 119:150, where the martial significance may well be hidden to the casual reader.

Another technical use relates to having sexual relations. So Abimelech affirms his innocence with regard to Sarah (Gen 20:4). Also, compare Deut 22:14, the case of the groom who "draws near" and discovers no tokens of virginity in his bride; also Isa 8:3 where the prophet "draws near" his wife and she conceives. Perhaps this is the connotation of *qārōb* in Ezk 23:5 where it is parallel to "lovers" (*m'ahābim*) and in Ps 38:11 [H 12] (cf. Ps 88:18 [H 19]).

A final technical use of our verb is cultic and connotes every step man performs in presenting his offering to God. This idea begins to develop with Moses' drawing near to God (Ex 3:5). Later at Sinai the people exercised the same care in approaching his holy mountain (Lev 4:11; Deut 5:23 [H 20]). Having gathered as near as they were instructed, they commissioned Moses to meet with (draw near to) God and receive his instructions (Deut 5:27 [H 24]). Henceforth, they met God at his designated place. They brought the materials for the tabernacle and presented them as an offering (*qorbān*) before God. The Levites were presented as an offering (drawn near) to serve God as custodians of the tabernacle (Num 16:9; 18:4; cf. Josh 3:4) while Aaron and his descendants were presented as sole officiants (cf. Lev 10:3; Num 18:3, 22) of the sacred sacrifices. This official sense of drawing near entails the special choosing by God and presentation by Israel (Ex 29:4). The officiants were enjoined to further purity (separating themselves from the ordinary) by washing, replacing their

clothes, and making sacrifices for themselves (Lev 9:4, 8, 10). Interestingly, the Hiphil stem becomes most frequently used to connote the sacrificial presentation of offerings by the people (Lev 1:14), through the priests (Lev 1:5) unto the Lord (Lev 1:13). Whatever is thus presented to the priests is holy, and all parts not consumed in the sacrifice (or otherwise destroyed) belong to those officially related to the cultus (Lev 3:7). A most significant application of this official sense appears in Jer 30:21 where in future days God's prince (the kingly line?) is to officiate at the altar (normally no king did this in the monarchy except in apostasy, cf. II Kgs 16:12)!

In difficult litigation God was the judge before whom they came (at the tabernacle, Lev 9:5; I Sam 10:20f.). Hence, compare, cases like the detection of Achan (Josh 7:14) with trial by lot, the decision regarding the advisability of war (I Sam 14:36) and the eschatological (and spiritual) assemblage of peoples to hear the divine sentence on mankind (Lev 41:1; Isa 48:16, etc.).

This cultic connotation is related to other occurrences of *qārāb* as, for example, Lam 3:57 when the suppliant calls (*qārā'*, q.v.) God is near, i.e. ready and willing to help (cf. Deut 4:7; Ps 34:18 [H 19]). God under various attributes is described as the ally (cf. Neh 13:4; Gen 45:10) of the faithful, e.g. his name (Ps 75:1 [H 2], 119:151), his salvation (Ps 85:9 [H 10]), and his righteousness (Isa 51:5). The idea here is not passive (i.e. nearness), but active (i.e. a helper, ally). Also, God's word is epistemologically near to man (Deut 30:14). Jeremiah, however, perhaps reflecting on this (and the cultic sense) says of Israel that God is near in their mouth but far from their heart (Jer 12:2). Perhaps Solomon offers his words to God as a continual sacrifice (I Kgs 8:59).

qārēb. *Near.* This adjective equals *qārōb* (intimate proximity), except its primary (nearly exclusive) usage is cultic. It occurs eleven times.

q'rāb. *War, battle.* Our noun (an Aramaic loan word; cf. GKC, 84n) denotes the actual engaging in battle. The Psalmist recounts both Jehovah's delivering him from battle (Ps 55:18 [H 19]; cf. Zech 14:3), and his instruction in the art of warfare (Ps 144:1). Compare as a synonym: *milhāmā*. The word occurs eight times.

qirbā. *Drawing near.* Both occurrences of this infinitive construct reflect the cultic use (see below) of our root (Ps 73:28; Isa 58:2).

qārōb. *Near, kinsman, neighbor.* ASV and RSV translate similarly except in Neh 13:4 (ASV "allied" is preferred), and Ps 75:1 [H 2] (RSV emends). This adjective can indicate nearness in space (Gen 19:20), time (Deut 32:35), family ties (Lev 21:2), interest (Neh 13:4), or an epis-

temological nearness (Deut 30:14). It has many synonyms, e.g. 'ēsel (at the side of), 'alyad, and 'āmīt (fellow, neighbor), rēa' (companion), shā-kēn (one who dwells beside), and gō'el (a responsible blood relative), shē'ēr (a blood relative), etc. The word occurs seventy-three times.

qorbān. *Offering, oblation.* ASV usually renders "oblation" to the RSV's "offering." This noun denotes that which is brought near, i.e. an "offering" to the deity both in the sense of that which is to be "sacrificed" (as such it is used of all the cultic sacrifices and offerings), or merely that which is destined to be used in the sanctuary (Num 7:13ff.; cf. KD, *Pentateuch*, II, p. 271; Vos, BT, p. 175). This word occurs eighty times and only in Lev, Num, and Ezk (20:28; 40:43). Cf. Old Aramaic *qrbn* (H. Donner and W. Rollig KAI II, p. 41). For synonyms compare *mattānā* (a gift, broader than our word), *minhā*, and *zābah*.

The noun *qorbān* deserves considerably more attention than can be given here. The major elements of a cultic offering include: first, what is done by the offerer. His choice must reflect his self-sacrifice and consist of that which comes from his life's sustenance and products (Vos BT, p. 175). It must be without blemish because the best belongs to God. The offerer's love and consecration should naturally lead him to present the best (Gen 4:4), and only this could reflect the moral purity of the necessary and perfect sacrifice (I Pet 1:19). The gift being divinely specified (Lev 1-7) was brought to a divinely appointed place (KD, *Pentateuch*, II, p. 279). Acceptable worship depends on meeting God's standards. Hands were laid on the living sacrifice setting it apart for the task (KD, *ibid.*), transferring to it not only the intentions but the guilt of the offerer (Vos, BT, p. 180). The self-confessed penalty of death was then vicariously inflicted upon the beast (Vos, *ibid.*). Thus, the blood (q.v.) was procured as a covering (Heb 13:15), the flesh as firefood (KD, *op. cit.*, p. 280), and a human life was symbolically devoted to God. The priest received the blood and flesh (or "meal") presenting it according to the specifications of the intended rite. The whole was consummated by a divine indication of acceptance. One should be careful to note that unlike pagan concepts of sacrifice, the biblical teaching indicates that there was no transference of value to God (Vos, BT, p. 176). The central significance of Israel's cult was spiritual (Ex 19:4-8; Jer 7:21ff.; Hos 14:3). In NT times, *qorbān* represented a vow whereby one's goods were ideally given to the temple (but in reality retained), and hence could not be given to others (Mk 7:11; Mt 15:5; ISBE., p. 709). (For further discussion see: KD, *Pentateuch*, II, p. 265ff.; OTOT, p. 262; Vos, BT, p. 172ff.)

qūrbān. *Supply, offering.* This appears to be a variant pronunciation (or writing) of *qorbān*. This noun occurs only twice and in Nehemiah.

L.J.C.

2066 קָרַב (*qrb*) II. Assumed root of the following.

2066a קָרַבָּ (*qereb*) *midst, among, inner, part.* (ASV and RSV translate similarly, with RSV frequently improving the translation [Ps 82:1; 94:19], but not in Ps 55:15 [H 16]).

This noun denotes the internal. It can represent the inward part(s) of human or animal bodies, or of groups of people, or of social structures (e.g., a city). It frequently functions as a preposition "in the midst, among" (Hab 3:2; Num 14:13). Our word is used parallel to *lēb* (heart, Jer 9:8 [H 7]), *nepeš* (soul, Isa 26:9), and various other internal organs (frequently as seats of various psychological functions). A close synonym is *tōk* (q.v.). It is found in Ugaritic (UT 19: no. 2269) and Akkadian (*qerbu*). Our word occurs 222 times (perhaps Ps 49:11 [H 12] is better read *q'barim*, "sepulchres" with the LXX and Syriac [so NIV]).

Theologically, it is significant that the inward attitudes (Gen 18:12) and thoughts (Ps 64:6 [H 7]) of man are known to God. The spirit within man (and all that constitutes a man's inner being) was created by God (Zech 12:1). Hence, the Psalmist can pray that the Creator may create a right spirit within him (Ps 51:10 [H 12]). God can promise to do so (Ezk 11:19; 36:26), and more, by putting his own Spirit within man (Ezk 36:27). It was God's Spirit within Israel that made her possess Palestine, granting victories over her enemies (Isa 63:11). The Trinity (Ex 23:21; 34:9) was a jealous God (Deut 6:15; cf. *qānā'*) assuring victory (Deut 7:21; Josh 3:10) upon the condition of holiness (Deut 23:14 [H 15]; 17:7, etc.) and under the threat of death (Deut 20:5). If his people did not execute the penalties due rebellion, he would do so, as he threatened (Deut 11:6; 31:17).

L.J.C.

קָרַבָּ (*qorbān*), קָרַבָּ (*qūrbān*). See nos. 2065e,f.

2067 קָרָדָם (*qardōm*) *axe* (e.g. I Sam 13:20; Jud 9:48). Derivation uncertain.

2068 קָרָה (*qārâ*) *encounter, meet, befall, happen, build with beams.*

Derivatives

2068a קָרָהָ (*qāreh*) *chance, accident.*

2068b קָרָה (*qārî*) *encounter.*

2068 קָרָה (*qārā*)

- 2068c מִקְרָה (*miqreh*) **happening**.
 2068d קִרְיָה (*qōrā*) **beam**.
 2068e *קָרָה (*qārā*) **build with beams**. Denominative verb, does not occur in the Qal.
 2068f מִקְרָה (*m^cqāreh*) **beamwork** (Eccl 10:18, only).
 2068g קִרְיָה (*qiryā*) **city, town**.
 2068h קֶרֶת (*qeret*) **city**.

This root, a by-form of *qārā'*, has three connotations: first, to meet, confront, and second, the happening and/or occurring of that which is (for the most part) beyond human control. For the meaning, to build with beams, see the denominative verb *qārā*. For cognates see Ugaritic *qry* "to meet" (UT 19: no. 2277). Our root (the verb and its derivatives here listed) occurs fifty-one times.

The first connotation of the root parallels the by-form *qārā'* in its cultic (cf. Ex 3:18; Num 23:2-3) and in the hostile (martial) uses (Deut 25:18).

The second meaning is clearly seen in cases where as a general principle men renounce human (or self) control over events. Interestingly, the Scripture immediately corrects Haman's wrong concept of events (Est 4:7) by making it clear that everything occurred by God's sovereign providence. When Jacob refused to let Benjamin go to Egypt (Gen 24:12) he used a word which was not judgmental toward the brothers. Apparently, he still did not suspect their misdeed toward Joseph (note use of *qārā'*, Gen 42:38; Ex 1:10). Saul assured the witch of Endor that plying her art in his behalf would not cause her to meet with punishment. All would be held in strictest confidence (I Sam 28:10).

The second meaning is also seen in cases where divine providence is the cause. Abraham's servant prays for God to control events causing his request to be met (Gen 24:12; cf. Gen 27:20). God confronts the false gods (no-gods) challenging them to unveil that which shall "happen" and that which has. His omnipotence and omniscience stand unrivalled. He knows because he causes all things (Isa 41:22-23; 46:8-11; cf. Num 11:23), and, therefore, unveils future events at his own discretion (Dan 10:14; cf. the use of *qārā'*, Gen 49:1; Deut 31:29). So, nothing happens by chance, or fate. God controls all. Although (and because) this is so, man is responsible for that which is unintentional or uncaused by him (cf. Deut 23:10 [H 11]). He is bound by God's laws and cannot plead happenstance and/or expedience to justify his violations (II Sam 1:6). The major instance of this is, of course, the Adamic sin.

The dilemma of Eccl is heightened by the ostensible meaningless of human accomplishment and overriding control (Prov 16:33) of divine

providence (Eccl 2:14; 9:11; 3:19). Ecclesiastes concludes that man the creature should not question but obey the Creator (12:13-14). It has rightly been said that the idea of fate or chance is utterly foreign to the Hebrew mind (G. H. Trevor, "Chance," ISBE, I, p. 593). Perhaps, however, the idea of fate is found in the mouth of the pagan Philistines (I Sam 6:9), or the Egyptians (Ex 1:10).

qāreh. (A nocturnal) **accident**. This noun denotes an occurrence beyond human control, the nocturnal emission polluting a man whether it is seminal or diarrhetic (Deut 23:10 [H 11] only).

q^cri. (Hostile) **encounter**. This noun (only in Lev 26) denotes a hostile meeting with the intention of fighting. Our noun occurs seven times.

miqreh. **Happening, lot**. The RSV differs from the ASV by introducing the idea of "fate." This *mem*-formation noun denotes the consequences of the verbal meaning "to happen, occur." It appears ten times.

qōrā. **Beam**. This noun denotes something that may be chopped down (II Kgs 6:2); it can become part of a building (II Chr 3:7) over one's head (Gen 19:8). It occurs five times. The connection with *qārā* may be the fitting of beam to beam.

m^cqāreh. **Roof, rafters**. This *hapax legomenon* denotes the structure covering one's home, which may sag (Eccl 10:18). It is distinguished from the Piel participle (which it duplicates in form) by the presence of a *dagesh* (indicative of the definite article) even though *mem* over silent *sh^cwa* normally rejects the *dagesh* (Ps 104:3).

L.J.C.

qiryā. **City, town**. (RSV and ASV similar.) Perhaps derived from the root *qārā* which means "to meet," the city being a meeting place of men. A synonym, *ir*, is the more common word, with *qiryā* being used primarily in poetry.

Specific cities are designated by this word: Gilead (Hos 6:8), Sihon (Num 21:28) and Damascus (Jer 49:25). Most frequently the city is Jerusalem. While it is a besieged city (Isa 29:1—here called Ariel), it will not fall to the Assyrians (Isa 33:20). It is the city of the great King (Ps 48:2 [H 3]) who is its certain defense.

The term "Great King" had originally been the title of the kings of Babylon and Assyria (cf. II Kgs 18:19, 28; Judith 2:5). It is now ascribed to the Lord (cf. Ps 47:2; 95:3; Mal 1:4). Even in the NT the term "city of the Great King" designates Jerusalem (Mt 5:35). Isaiah noted that Jerusalem, the once faithful city, was now a harlot, i.e. unfaithful (1:21; cf. Hos 4:1) but justice will be restored in her midst and she will again be called the city of righteousness and the faithful city

(1:26). This means that not only will Jerusalem be characterized as pious and loyal, she will also be firmly established (this expression is used of Davidic dynasty, II Sam 7:16; Ps 89:37 [H 38]). Jerusalem is known as the "Enduring City" even as Rome is now known as the "Eternal City."

This word is used in its construct form with other words as a proper noun: Kiriatharba—city of four (Josh 14:15; 15:13; 21:11), Kiriathbaal—city of Baal (Josh 15:60), Kiriathhuzoth—city of streets (Num 22:39), Kiriathjearim—city of forests (I Sam 6:21) and Kiriathsepher—city of the scribe or of the recruiting officer; cf. *sōpēr* (Jud 1:11).

Various characteristics and actions are assigned the city. It can be sinful (Hab 2:12), but also faithful (Isa 1:21) and righteous (Isa 1:26). It can be located strategically (Deut 2:36), be fortified (Isa 25:3) and be viewed as a place of security (Prov 10:15; Prov 18:11). The city can rejoice (Prov 11:10; Isa 32:13), be exultant (I Kgs 1:41, 45; Job 39:7; Isa 22:2), and be chaotic (Isa 24:10, Gen 1:2).

Bibliography: THAT, II, pp. 681–83.

C.S.

קָרָה (*qārā*). See nos. 2077c, 2068, 2068e.
קָרֹב (*qārōb*). See no. 2065d.

2069 קָרַח (*qārah*) *I, be bald*.

Derivatives

- 2069a קָרֵחַ (*qērēah*) *bald*.
2069b קָרְחָה (*qorhā*) *baldness*.
2069c קָרַחַת (*qārahāt*) *back baldness*.

Our root denotes the lack of hair on the human head. This may result from shaving (Mic 1:16, where *gāzaz* "to shear" is the parallel; Job 1:20; Jer 7:29), from plucking (*māraṭ*, Neh 13:25), from leprosy (Lev 13:42), and other and natural causes (Lev 13:40?). For synonyms see *gāzaz*, and *gib-bēah* (forehead baldness). The root occurs twenty-three times.

Ritualistic shaving of the head in imitation of Canaanite mourning rites is prohibited for priests (Lev 19:27; cf. Jer 41:5) and laity (Deut 14:1), because as holy servants and children of God they were to keep themselves as from all idolatry (cf. Barnes on Mic 1:16). Not all baldness, however, is unclean (Lev 13:40). Indeed, not all shaving of the head to express mourning is prohibited. God commands (Mic 1:16) and expects his people (Isa 22:12) to show deepest mourning over their sin. His punishment will effectuate mourning over their dead (Ezk 7:18; Isa 3:24), but even such tragedy will not humble them. Ultimate judgment is preceded by a picture of widespread death and a prohibition of mourning (Jer 16:6). Baldness is a picture of mourning (Jer 47:5).

The taunt (J. W. Kapp, "Baldness" ISBE, I, p. 380f.) hurled at Elisha (II Kgs 2:23) is especially ignominious because it showed abject disrespect for God's prophet (*qālaṣ*, q.v.) and God himself. According to the Law, death was the punishment (cf. *qālal* and Lev 20:9).

qērēah. *Bald.* ASV and RSV the same. This twice occurring noun denotes the state of *qārah*.

qorhā. *Baldness.* ASV and RSV translate the same. This noun refers specifically to the shaved head expressing deep grief. It occurs eleven times.

qārahāt. *Back-baldness.* ASV and RSV translate similarly. This noun (occurring four times) refers specifically to baldness of the crown of one's head as compared to *gabbahāt*, baldness of the front of the scalp (Lev 13:42).

L.J.C.

2070 קָרַח (*qrh*) **II. Assumed root of the following.**

2070a קָרַח (*qerah*) *frost, ice* (e.g. Gen 31:40; Ps 147:17).

קָרַחַת (*qārahāt*). See no. 2069c.

קָרִי (*q'ri*). See no. 2068b.

קָרִיא (*qārī*). See no. 2063b.

קִרְיָה (*qiryā*). See no. 2068g.

2071 קָרַם (*qāram*) *spread or lay something over* (Ezk 37:6, 8).

2072 קָרַן (*qāran*) *shine* (Qal); *have horns* (Hiphil). Denominative verb.

Parent Noun

2072a קֶרֶן (*qeren*) *horn*.

This denominative of *qeren* denotes first, those rays of radiance streaming from Moses' face after he met with God (Ex 34:29), and secondly, the possession of horns (Ps 69:31 [H 32]). It was this mistranslation as "horn" in the Vulgate which led Michael Angelo to place two small horns on Moses' head in his famous statue. Note the same mistranslation in the KJV of Hab 3:4. The Qal usage denotes the form of a horn(s) rather than the substance. Our root is to be contrasted with *'āhal*, *'ōr*, *hālāl*, et al. which denote the substance of a "shining" rather than a form. This root occurs seventy-seven times (four times as a verb).

qeren. *Horn, ray, hill.* ASV and RSV translate the same. Our word primarily denotes the horn(s) of various animals (ram, wild oxen). (Cf. Ugaritic *qrn*, UT 19: no. 2279.) Elephant tusks were referred to (or mistaken) as huge horns (Ezk 27:15). A frequently occurring derived denotation relates

to strength, pride, and *élan vitale*. L. Schmidt rightly stated: "In the OT the horn is not only an expression for physical power in symbolical prophetic action (II Kgs 22:11) or in visionary depiction of the might which has scattered Israel (Zech 2:1-4); it is a direct term for power" (TWNT, III, p. 669). (Cf Deut 33:17; II Sam 22:3; Ps 18:2 [H 3]). Schmidt further notes that whereas teeth, mouth and claws are images of violent exercise of force, the horn denotes physical might and power. It is for God to exalt or trample down the horn; when men exalt their horn, it denotes arrogance (Ps 75:4-5). Consequently, "horn" becomes a symbol for men endowed with such power (Dan 8:20-21). Our word is also used of horn-like projections, or hills (Isa 5:1). Musical instruments (Josh 6:5) and flasks (I Sam 16:1) were made of horns.

The radiance of God's power beaming from Moses' face was fittingly described as horn-like (Ex 34:29; cf. also Hab 3:4). Subsequently, horns were put on the altars to focus the symbolic presence and power of God. It was especially on these horns that blood to atone for original and unwitting sin was to be applied (Ex 30:10; Lev 4:7, et al.). Adonijah and then Joab recognized this and took hold of the horns of the altar of burnt offering, seeking forgiveness. The former having sinned "unwittingly" was forgiven, since David long was aware of his designs on the throne and had not corrected him (I Kgs 1:5-6, 53). The latter was killed (I Kgs 2:28, 34) for his duplicity. Also, this is entirely in keeping with Mosaic legislation regarding murder (Ex 21:14).

As horns are the focus of a beast's power, so God promises to grant strong horns to those of his choosing (Deut 33:17). Thus one could parallel his heart and his "horn" as exalting in God (I Sam 2:1). One could defy God by lifting up his horn in arrogance (Ps 75:4-5 [H 5-6]). Actually, it was God who would cut off the evildoers' horns and exalt the horns of the righteous (Ps 75:10 [H 11]). To have one's horns exalted by God is to gain victory and salvation (Ps 92:10 [H 11]; David's horn is to bud, Ps 132:17). God is the source of all true salvation, hence he is termed the horn of salvation (II Sam 22:3).

Bibliography: TDNT, VII, pp. 76-85.

L.J.C.

2073 קָרַם (*qāras*) *bend down, stoop, crouch*-
(Isa 46:1, 2).

Derivative

2073a קָרַם (*qeres*) *hook* (on edges of
tabernacle curtains, Ex 26:11 =
36:13, 18).

2073b קָרְסֹל (*qarsöl*) *ankle* (II Sam
22:37 = Ps 18:37). Probably derived
from *qāras* (so BDB and GB).

קָרְסֹל (*qarsöl*). See no. 2073b.

2074 קָרַע (*qāra'*) *tear, tear in pieces*.

Derivative

2074a קָרַע (*qūra'*) *rag* (e.g. I Kgs 11:30;
Prov 24:21).

qāra' has to do with rending cloth or a similar substance (except Jer 4:30; 22:14). It occurs sixty-three times. Distinguish it from *bāqa'* "split, cleave"—of making a channel through hard objects, *gāzal* "tear away from," *pānaq* "break in two," *ṭārap* "rend flesh," *šāraṭ* "skin something," *shābar* "break in pieces," and cf. *pāram* "tear," the synonym. Cf. Aramaic *qrq* (W. Donner and H. Rollig, KAI, II, p. 42), tear, slander (?) (Ps 35:15, "slander," rsv).

qāra' may be used with a literal meaning of cloth (Lev 13:56, I Sam 15:27), or figuratively of tearing a kingdom from a royal line (I Sam 15:28, et al.). Most frequently it refers to an act of heartfelt and grievous affliction (tearing one's upper and under garment in front of the breast baring the sorrow of the heart; cf. *KD*, Lev 10:6). This occurred at the first news of a death (Gen 37:29) or other tragedy (Num 14:6; Josh 7:6). "Rending" of one's clothes could be accompanied by putting on sackcloth (*saq*, q.v.; Gen 37:34), putting dirt or ashes on the head (I Sam 4:12), removing the shoes (II Sam 15:30), and putting the hands on the head (II Sam 13:19). On two occasions when the king of Israel confessed his impotence to heal or to provide food by tearing his garments, Elisha proved that the Lord, whom the people had forsaken, was indeed the true king of Israel by healing Naaman and by giving food (II Kgs 5:7ff.; 6:30ff.). (Cf. R. de Vaux, *AI*, p. 59). Israel was forbidden to imitate the Canaanite (cf. *qārah*) mourning ritual of shaving the beard and head (Lev 21:5; Deut 14:1). So such practices when continued indicated the lack of instruction even among the godly in Jeremiah's day (Jer 41:5). Ezra (9:5) did not shave, but plucked his hair indicating violent wrath and moral indignation (*KD*). God will cause his rebellious people to mourn—he will rend their chests (Hos 13:8). Also, he tells his people to repent and rend their hearts rather than their garments (Joel 2:13).

L.J.C.

2075 קָרַץ (*qāraš*) *narrow, form*.

Derivative

2075a קָרַץ (*qeres*) *a nipping, i.e. nipping
or stinging insect* (Jer 46:20).

This root refers to a pinching together. It is applied to eyes, lips, and clay. It occurs in Ug. (UT 19: nos. 2280, 2281) meaning "to bite," and "to shape" (clay into an effigy). Note also, Akk. *q/kaṣu*. Our root occurs six times.

In the Qal stem our root is associated with an "insidious malicious gesture" (KD, *Psalms*, I, p. 427). "Winking" is not a felicitous translation (Ps 35:19, et al.) since it connotes merriment rather than hostility. Perhaps "narrow the eyes" would better represent a deceitful and malicious look. Hence, "he who narrows his eyes causes sorrow" (Prov 10:10). Further support comes from Prov 16:30 where the man of violence "shuts his eyes" and "bars (*qāraṣ*) his lips." The apparent intent is to depict a harsh man whose eyes are closed to others' troubles and who bars his lips in hard cruelty.

A totally different connotation occurs in Job 33:6 where the Ugaritic/Akkadian meaning "to shape clay" figuratively applies to the creation of mankind and, hence, to Job's own origin. This usage is found in the Dead Sea *Hodayot* in dependence on the Job passage (Gaster, T. H., *The Dead Sea Scriptures*, Doubleday, rev. ed. 1964, p. 183).

L.J.C.

2076 קָרַקַע (*qarqa'*) *floor* (e.g. I Kgs 6:15; Amos 9:3). Derivation uncertain.

2077 *קָרַר (*qārar*) *I, be cold* (Hiphil only, Jer 6:7, NIV, "pour out").

Derivatives

- 2077a קָר (*qar*) *cool* (Prov 17:27; Jer 18:14; Prov 25:25).
- 2077b קָר (*qōr*) *cold* (Gen 8:22).
- 2077c קָרָה (*qārā*) *cold* (e.g. Nah 3:17; Job 24:7).
- 2077d מִקְרָה (*m^cqērā*) *coolness* (Jud 3:20, 24).

2078 *קָרַר (*qārar*) *II, tear down*. Occurs only once, in the Pilpel (Isa 22:5).

2079 קִרַּשׁ (*qrsh*). Assumed root of the following.

2079a קִרַּשׁ (*qeresh*) *board, boards* (e.g. Ex 26:18; Ezk 27:6).

קִרֵּת (*qeret*). See no. 2068h.

2080 קָשָׁה (*qśh*). Assumed root of the following.

2080a קָשָׁה (*qaśwā*) *a kind of jug, jar* (e.g. Ex 37:16; I Chr 28:19).

2080b קֶסֶת (*qeset*) *pot for ink, inkhorn* (Ezk 9:2, 3, 11). Variant form of *qešet*.

קָשָׁה (*qaśwā*). See no. 2080a.

2081 קָשָׁה (*qśt*). Assumed root of the following.

2081a קָשִׁיטָה (*q^eśītā*) *a unit of unknown value* (Gen 33:19; Josh 24:32; Job 42:11).

קָשִׁיטָה (*q^eśītā*). See no. 2081a.

קָשָׁקֶשֶׁת (*qaśqešet*). See no. 2082a.

2082 קָשָׁה (*qśś*). Assumed root of the following.

2082a קָשָׁקֶשֶׁת (*qaśqešet*) *scale of fish* (e.g. Deut 14:9, 10 = Lev 11:9, 10, 12).

קָשׁ (*qash*). See no. 2091a.

2083 קָשָׂה (*qsh*). Assumed root of the following.

2083a קִישְׁשׁוּ'א (*qishshū'ā*) *cucumber* Num 11:5).

2083b מִקְשָׂה (*miqshā*) *I, field of cucumbers* (Isa 1:8; Jer 10:5).

2084 קָשַׁב (*qāshab*) *hear, be attentive, heed*.

Derivatives

- 2084a קָשֶׁבַּת (*qesheb*) *attentiveness*.
- 2084b קָשֶׁבַּהּ (*qashshāb*) *attentive*.
- 2084c קָשֶׁבַּהּ (*qashshūb*) *attentive*.

This root denotes the activity of hearing, emphasizing either paying close attention or obeying (heeding). Compare it to *shāma'* (a nearly identical synonym) and 'āzan "to give ear," and 'ānā, "to respond." Also, *mā'an* "to refuse" (an antonym). Our word appears in synonymous parallelism with 'āsā in the sense of obedience to laws (Neh 9:34). It appears fifty-four times, almost exclusively in poetry.

God requires man to give close attention to (to obey) his word. Saul wrongfully exalted the importance of sacrifice over obedience. Samuel in reminding him that God prefers responsible conscientious obedience, enunciated the central principle of our religion (I Sam 15:22; cf. Deut 6:4-6), and sacrifice. Through his prophets (e.g. Jer 6:17, 19), God repeatedly summoned his people to heed the warnings of impending judgment (Isa 28:23), but they did not (Isa 48:18; Jer 6:19; 18:18). Finally, God called all nations to attest his promised deliverance to vindicate his name (Isa 49:1), and to judge all rebellion (Isa 34:1). Those who do not hear (heed) are sovereignly subdued so that they must heed. God's request and command are executed. Man's requests to God, however, beg attention without enforcing compliance (cf. Ps 10:17; 55:2 [H 3]; cf. 'ānā).

2085 קָשָׁה (*qāshâ*)

qesheb. *Attentiveness.* This thrice-occurring segholate noun is better translated by the rsv in I Kgs 18:29 and II Kgs 4:31. It makes concrete the action of the verb.

qashshāb. *Attentive.* This twice-occurring adjective (for form, see GKC 84^b) is employed figuratively of God's ears being attentive. He regards the petition addressed to him.

qashshūb. *Attentive,* an alternate spelling of *qashshāb*.

Bibliography: THAT, II, pp. 684–88.

L.J.C.

2085 קָשָׁה (*qāshâ*) I, *be hard, severe.*

Derivatives

2085a קָשָׁה (*qāsheh*) *hard, cruel.*

2085b קָשִׁי (*q^oshi*) *stubbornness.*

The root *qāshâ* apparently arose from an agricultural milieu. It emphasizes, first, the subjective effect exerted by an overly heavy yoke, which is hard to bear, and secondarily, the rebellious resistance of oxen to the yoke. For synonyms see *kābēd* (heavy, emphasizing the weight of the thing bearing down), *hāzaq* (strong, emphasizing the pressure exerted), *hāmaš* (violent, cruel), *'akzār* (fierce). Note, *qāshah* with the same variant spelling in Arabic has similar meaning to *qāshâ*. Our root (with the derivatives here listed) occurs sixty-four times.

A number of passages use the metaphor of a yoke (*'ôl*), which is hard (and, therefore, cruel and oppressive) to bear: the servitude in Egypt (Ex 1:14), Solomon's rule (I Kgs 12:4, hyperbolically?), and the Babylonian exile (Isa 14:3). Christ's yoke, however, is easy (Mt 11:29–30), although it too requires submission (Phil 4:3) and discipline (II Cor 6:15). Other situations emphasize only the idea "hard to bear" (Gen 35:16; Gen 42:7; Ps 60:3 [H 5]); cf. the meaning "difficult" (Deut 1:17; 15:18). The other side of the word (cruel and oppressive) develops the meaning fierce (Gen 49:7; Isa 27:8).

A frequent use of the word relates to the stubborn (stiff-necked) subjects of the Lord. Like rebellious oxen, calf-worshipping Israel quickly turned aside from the Lord's service (Ex 32:9). The spirit of Israel remained (for the most part) stubborn, intractable, and non-responsive to the guiding of their God (Deut 10:16; Jud 2:19; II Kgs 17:14; Neh 9:16) and of his Holy Spirit (cf. Acts 7:51). Pharaoh stubbornly refused divine leading (Ex 13:15) in accordance with divine counsel (Ex 7:3). Hannah used this word to describe her impassiveness created by great vexation (I Sam 1:15).

qāsheh. *Hard, cruel, obstinate, stiff.* This adjective modifies its objects employing a semantic distribution parallel to that of the verb.

q^oshi. *Stubbornness.* ASV and RSV translate this *hapax legomenon* (Deut 9:27) the same. Moses used it to characterize Israel's reaction to God's leading.

Bibliography: THAT, II, pp. 689–91.

L.J.C.

2086 קָשָׁה (*qshh*) II. *Assumed root of the following.*

2086a מִקְשָׁה (*miqsheh*). A *hapax legomenon* of uncertain meaning used in Isa 3:24. NIV, "well-dressed hair"; KJV "well-set hair," referring perhaps to the alleged artistry of the hairdo.

2086b מִקְשָׁה (*miqshâ*) II, *hammered work, finely decorated cultic objects of gold or silver* (Ex 25:18, 31; Num 10:2); hence, ASV translates "beaten" (RSV, "hammered"), and ASV margin "turned" (on basis of Isa 3:24).

2087 *קָשָׁה (*qāshah*) *make hard.* This verb occurs only in the Hiphil (e.g. Isa 63:17; Job 39:16).

2088 קָשֶׁט (*qōshet*) *bow* (Ps 60:6). A variant spelling of *qeshet* (q.v.).

2089 קָשַׁט (*qshṭ*). *Assumed root of the following.*

2089a קָשֶׁשׁ (*qōshṭ*) *truth* (Prov 22:21, only).

2090 קָשַׁר (*qāshar*) *bind, conspire.*

Derivatives

2090a קֶשֶׁר (*qesher*) *conspiracy.*

2090b קִישְׁשׁוּרִים (*qishshūrīm*) *bands, sashes* (Isa 3:20; Jer 2:32).

Basically this root denotes binding or tying something to something. It is also used of a binding together of human beings. Its synonyms are *'ānad* "bind" (occurs only twice, see Prov 6:21), *'āsar* "bind, tie up with a rope or thicker object," *hābash* "to wrap with a wide object." Synonyms to the secondary meaning (conspire) are *nābal* "to show oneself deceitful," and *kārat b'rit* "to make a pact." Our root (with the derivatives listed) occurs sixty times.

The basic meaning of this root "to bind" emerges clearly in Gen 38:28 where Zerah's hand was marked by tying with a scarlet thread. Rahab was instructed to tie a scarlet thread to her window to mark it (Josh 2:18). God instructed Israel to bind his laws (words) to their foreheads and hands (Deut 6:8). Thus, their thoughts and actions were to be governed by his word. The commandments of godly fathers and mothers (Prov 6:21) as well as truth and kindness are to be

bound to one's fingers (or neck, Prov 3:3), and written on one's heart (cf. Jer 31:31ff.). In the eschaton Zion is to display her restored children as a bride displays jewelry (Isa 49:18). Perhaps we might add that thus the pious are to display God's word (H. Leuring, "Finger," in ISBE, II, p. 1111). The Judaism of Jesus' day had certainly fulfilled the commandment to literally bind God's word to themselves, but by adding thereto had changed it from an ornament to a heavy weight (Mt 23:4).

God reminds Job that only he binds the stars in place (38:31) and controls wild (39:10) and possibly mythological beasts (but cf. 40:19) (41:5 [H 40:29]).

Our word can apply to human relationships. Men can be bound together (inseparably) in love (Gen 44:30; I Sam 18:1) or conspiracy (I Kgs 16:9). Treasonous pacts if exposed were met with denunciation (II Chr 23:13), and even death (II Sam 15:12; II Kgs 17:4). It is noteworthy that in evil days prophets who declared God's counsel were accused of treason (Amos 7:10; Isa 8:12) by the real enemies of the theocracy (Young, E. J., *Isaiah*, Eerdmans, 1967, I, p. 311)—the leaders of Israel (Isa 8:13f.; Jer 11:9).

qesher. *Conspiracy, treason, treaty* ASV and RSV translate similarly. This segholate noun in Isa 8:12 denotes "a conspiracy with treasonable intent" (Young, op. cit. p. 310). This is more than a mere alliance such as that of Syria and Israel against Judah. Our noun occurs sixteen times (six times as the cognate accusative of *qāshar*).

L.J.C.

קִישְׁחִירִים (*qishshūrim*). See no. 2090b.

- 2091 *קָשָׁשׁ (*qāshash*) **I, gather stubble.** This denominative verb occurs only in the Poel (e.g. Ex 5:7; Num 15:32, 33).

Parent Noun

- 2091a קָשׁ (*qash*) **stubble, chaff** (e.g. Isa 5:24; Nah 1:10; Joel 2:5).

- 2092 קָשָׁשׁ (*qāshash*) **II, gather stubble, sticks.** Occurs only in the Qal and Hithpoel, in Zeph 2:1. Meaning doubtful.

- 2093 קֶשֶׁת (*qeshet*) **bow.** (ASV and RSV are the same.)

The word *qeshet* denotes the hunter's (Gen 27:3) and warrior's (I Sam 31:3) weapon by which arrows are shot (I Kgs 13:15ff.). Its Ugaritic cognate is *qsht* (UT 19: no 2287). Our word occurs seventy-seven times. Derivation uncertain.

The bow, a common weapon in the ancient Near East, was not too common in early Israel. The Benjamites, however, were noted archers (Jud 20; I Chr 8:40). Jonathan used a bow (I Sam 20:20) and later the bow became the weapon of leaders and kings (II Kgs 9:24; Ps 18:34 [H 35]). Apparently David's lament became a permanent part of training Israel's army, so in II Sam 1:18 the enigmatic *qeshet* may be the title (or part of the title) of the song so employed (II Sam 1:18). By the time of Jeroboam the bow may well have been Israel's national weapon (Hos 1:5, 7). In later times bows could be mounted with bronze (Ps 18:34 [H 35]; however, see AI, p. 243), or made of horns (AI, p. 243; B. Couroyer, "Corne et arc," RB 73:510-21). Large battle bows were strung by stepping on one end, hence, *dārak qeshet*, to bend the bow, i.e. prepare to shoot (Jer 50:14; cf. G. Eager, in ISBE, p. 233). The conjoining of "sword" and "bow" often represents all weapons, and even war itself (Gen 48:22; Josh 24:12). A "deceitful" bow (with a flaw) always misses the mark (Israel, Ps 78:57; Hos 7:16).

Man's bow is controlled by God (Gen 49:24). The arrow finds its mark because of God's guidance (esp. I Kgs 22:34; II Kgs 13-16). The broken bow can represent divinely imposed defeat (I Sam 2:4), and/or peace (God peaceably "hangs" his bow, Gen 9; cf. Ps 76:3 [H 4], 46:9 [H 10]; Hos 2:18 [H 20]).

L.J.C.

- 2094 קָשָׁת (*qashshāt*) **bowman** (Gen 21:20; Jer 4:29).

2095 רָאָה (*rā'ā*) *see, look at, inspect.*

Derivatives

- 2095a רָאָה (*rā'eh*) *seeing* (Job 10:15, only).
 2095b רֹאֶה (*rō'eh*) *I, seer.*
 2095c רְאָה (*rō'eh*) *II, prophetic vision.*
 2095d רְאִית (*r'ūt*) *look* (Eccl 5:10, only).
 2095e רְאִי (*r'i*) *mirror* (Job 37:18, only).
 2095f רְאִי (*rō'i*) *looking, appearance.*
 2095g מְרָאָה (*mar'ā*) *I, vision.*
 2095h מְרָאָה (*mar'ā*) *II, mirror* (Ex 38:8, only).
 2095i מְרָאָה (*mar'eh*) *sight, appearance.*
 2095j רְאוּבֵן (*r'ūbēn*) *Reuben.*

The extended and metaphorical senses in the Qal include to regard, perceive, feel, understand, learn, enjoy; Niphal, to be seen or to reveal oneself; Pual, to be seen; Hiphil, to cause to see, show, make to feel or know or enjoy; Hophal, to be made to see, to be shown; Hithpael, to look at one another.

The literal sense of the verb calls for no special comment, for it is the common word for seeing with the eyes (Gen 27:1). But this word has extended and metaphorical meanings. Some of these appear in the definitions above. Five, however, are of special importance. (1) *rā'ā* designates the saving, understanding, believing acceptance of the Word of God as delivered by his accredited messengers. In Isa 6:10 to see with the eyes is to hear God's Word, to understand it, and to turn to him. On the other hand, in the same passage to harden the heart against God's message is to shut the eyes (Isa 6:10). In the previous verse, nevertheless to "see indeed" *r'ū rā'ō* (Qal imperative masculine plural, followed by infinitive absolute) is used of the bare act of intellectual perception of the message of God's prophet. Further examples of the sense of believing understanding are to be found: Isa 52:10, 15; II Chr 26:5; Ps 63:2 [H 3]; 69:23 [H 24], et al. (2) *rā'ā* has the sense of the act of acceptance, especially on the part of God. God says to Noah, "Thee have I seen righteous" (Gen 7:1). Another example is Num 23:21. (3) Another sense is "to provide," usually of God's provision: I Sam 16:1, Gen 22:8, 14 (as in English to see *to* something is to provide it). (4) "To have respect to" is another, especially of God in acting with mercy (Isa 38:5; Ps 138:6). See also Ps 66:18 for a similar sense.

(5) Of special importance is that *rā'ā* is employed far more than any other word for the act of

an authentic prophet in receiving oracles from God. This is suggested first in the basic text, Num 12:6. God's part in revelation is denominated a *mar'ā* (vision), a noun derived from *rā'ā*, as also in ten other texts (Gen 46:2; I Sam 3:15; Ezk 1:1; 8:3; 40:2; 43:3; Dan 10:7-8, 16). See also *mar'eh*. More importantly, *rā'ā* is used many times in the major and minor prophets in this precise manner: Isa 6:1; Jer 1:11, 12, 13; Ezk 1:1, 4, 15, 27, 28; 2:9; 8:2, 6, 7, 10, 15; 10:1, 9; 11:1. The synonym *hāzā* (q.v.) is used in the same sense.

A name for the *nābī'* (prophet) is *rō'eh* (seer) suggesting that the act of seeing God's message (by dreams or visions) was so important that the spokesman (*nābī'*) might be called one who sees (divine things), that is, a "seer" (I Sam 9:9, 11, 18, 19 and at least seven other times in the OT). This feature placed certain limits on prophetic communication about the future and prophetic interpretation as God was careful to point out (Num 12:4-8) and as the prophets regretfully acknowledge (Dan 8:27; 12:8). The vision often needed further interpretation.

rō'eh. *Seer* (synonym of *nābī'* "prophet," properly a Qal participle of the verb *ra'ā*, "seeing or one who sees." It is used many times in this general sense. It is used twelve times in the OT, however, as an alternate for *nābī'* "prophet." It is always rendered "seer." Inasmuch as the *nābī'*, spokesman for God, received his message by seeing visions this name was appropriately employed. It is always used with the article (*hārō'eh*) except once at II Sam 15:27 where the sense requires the anarthrous form; sometimes it has the holam full, (*rō'eh*), sometimes defective (*rō'eh*). Often this name designates a prophet whose name also is given: Samuel, Zadok, Hanani. The name alternates with *hōzeh*, used sixteen times, a word of almost the same meaning. Apparently *rō'eh* is the earliest name, "For he that is now called a prophet (*nābī'*) was beforetime called a seer (*rō'eh*, I Sam 9:9). Gad was both *nābī'* and *hōzeh* (II Sam 24:11). These three terms are used for the OT prophet in a single passage, "Now the acts of David the king, first and last, behold they are written in the history of Samuel the seer (*rō'eh*), and in the history of Nathan the prophet (*nābī'*), and in the history of Gad the seer (*hōzeh*, I Chr 29:29).

"Since, quite obviously, the same individual can be designated by the three terms, what if any, is the distinction between them? ... The word *nābī'* ... stressed the *objective* or *active* work of the messenger of the Lord in speaking forth God's Word. The terms *rō'eh* and *hōzeh*, translated seer

on the other hand emphasized the *subjective* element, namely the receiving of divine revelation by seeing. In Isa 30:10 the rebellious Israelites say to the seers, "See not." The term prophet emphasized the prophet's utterances, *rō'eh* and *hōzeh* indicated his method of receiving divine communication" (Hobart E. Freeman, *An Introduction to the OT Prophets*, Moody, 1968, pp. 40–41).

See also Man of God (Deut 33:1; II Kgs 4:9, etc.) and "servant" of the Lord (I Kgs 14:18; II Kgs 9:7; 17:13, etc.) and "messenger" of the Lord (Hag 1:13; Mal 1:1).

Lexicons list one occurrence (Isa 28:7) of the form *rō'eh* II, as a noun meaning prophetic vision. Inasmuch as Hebrew participles may be used as nouns and indeed partake of many noun characteristics (Gesenius, *Hebrew Grammar*, p. 116) it might be best to regard this single occurrence as a present active participle of *rā'ā* meaning here the act of seeing, somewhat as the same form earlier in the chapter (v. 4) means the "one who sees."

mar'eh. *Sight, vision, appearance, countenance, beauty.* This word merits attention in three respects: 1) its essential general meaning, 2) a special meaning with reference to "the Servant of the Lord" in Isaiah and 3) a special meaning in connection with biblical prophecy.

1. Essential general meanings. Being derived directly from the verb *rā'ā* "to see," by simple addition of a familiar noun-making prefix, this word bears much of the variety of significance of that word. The verb appears in every main Hebrew stem, except possibly Piel, and exhibits every conceivable sort of literal, metaphorical, and extended meaning of "to see"—as in English. As one would expect, the word *rā'ā* appears hundreds of times. Our noun *mar'eh* can mean almost anything having to do with outward appearance, the way things look. So the notions of a "sight" or phenomenon, the thing seen, whether usual (Lev 13:3, and ten times in the chapter), or unusual (Ex 3:3) is common. The act of looking (Isa 11:3) and the faculty or function of seeing (Eccl 6:9) are two other senses; also "appearance" in the sense of how something seems outwardly to be, as opposed to the inner reality (I Sam 16:7). By a slight extension our word expresses the very common notion of face or countenance, the part of a person visible to the eye (Song 2:14; 5:15). Adjectives for fair and desirable as well as ugly and undesirable are commonly used with *mar'eh*.

2. Special meaning with reference to the Servant of the LORD."

a. The opening canto of the last "Song of the Servant" (Isa 52:13—53:12) has this line: "His visage (*mar'ēhā*) was more marred than any man" (Isa 53:14). This strange statement seems to give the reason why "many were astonished" at the Servant when they saw him at Golgotha, the low-

point in his career as far as human acceptance was concerned. What does it mean? Taken (as it surely must be) as a characterization of what happened to his "physique" at the crucifixion, men have supposed many things. Perhaps it refers to the physical injuries—and no one was ever so injured ("more than any man"). But quite a point is made of the fact in the Gospels that not a bone of his body was broken. People receive more disfiguring injuries from fire, explosions, etc. every day and live to bear the scars. Someone has suggested the inward suffering of abandonment by God and man. But that has nothing to do with *mar'eh*, outward appearance. The correct understanding of *mar'eh* here can be adequately interpreted if we start with *mē'ish* "than any man," better translated literally, "from a human adult male." The male of our species in his perfection, dignity, and privilege was most thoroughly degraded, not by smashing him physically but by destroying all evidence of that perfection, dignity, and privilege which man has as viceregent lord of earth's creatures. Convicted as a criminal, tortured as a sneak-thief, abused as being of no status whatsoever and then ignored by his executioners, as they amused themselves with his attire—perhaps this was how *mishhat mē'ish mar'ēhū* "ruined from a human male as regard his appearance" was fulfilled.

b. In Isa 53:2 it is said of him, "And when we shall see him there is no *beauty* (*mar'eh*) that we should desire him." Though close to the last-mentioned reference where the meaning is somewhat unique, here another nearly unique sense is employed. Without any qualifying adjective for beautiful, attractive, lovely, etc., the bare noun means good appearance, hence rendered "beauty" here and here alone in KJV. To get the sense here, think of what a husband means when he calls his new bride a "vision" as opposed to what he might be thinking of if he called her a "sight." The missing "beauty" was regal trappings, prestigious accoutrements. Like John the Baptist, he wore none of the soft clothing and had no flabby muscles, characteristic of those who live in kings' courts. The Jews wanted a courtly prince; God offered them a muscular carpenter.

3. Special meaning with reference to biblical prophecy. There is a nearly identical noun *mar'ā*, distinguished from *mar'eh* only by the second vowel. This related word is used almost exclusively for vision(s) as a vehicle of divine revelation to prophets. The words alternate in this obvious sense in Ezekiel and Daniel. See BDB, p. 909.

r'ūbēn Reuben. Behold a son! Jacob's first son, by Leah, was God's special favor to her and as his name seems to hint, an unexpected blessing (Gen 39:31). Another meaning has been postulated, regarding it as abbreviated from *rā'ū b'ānyī* "[Jehovah] hath seen my affliction"

[Leah's]; hence "pity of God." While derivations of names in the OT sometimes seem whimsical—as naming of children sometimes seems to be—the obvious meaning surely must be the designed one. However, a name may be explained in a word play that does not depend on etymology. Indeed "Reuben" may mean "Behold, a son" and yet sound sufficiently like "he has seen my affliction" to have that mentioned.

Reuben turned out to be a spirited but not very disciplined person, connected with scrapes both shameful and noble, constructive and very harmful (see Gen 37:22; 42:22, 37–38; 49:3–4). He committed one very repulsive crime (Gen 35:22) which must surely have occurred under conditions of great enticement. But it cost him his rights of firstborn—the pre-eminence of leadership going to Judah (Gen 49:8–10) and the double portion to Joseph's sons (Gen 48:5). His descendants, the tribe of Reuben, figure prominently at the time of the conquest, being the first tribe settled, even before the transfer of leadership to Joshua from Moses (Num 32). We hear very little of them after that. They maintained their former nomadic ways from their "headquarters" lands in the highlands of Moab north of the River Arnon [Arabic *Wadi Mojib*]. The tribe was as "unstable" as their parent Reuben and were among the first to lose themselves in the population transfers of antiquity (II Kgs 10:33). Their towns appear in later history as in possession of Moabites. The theological information derived from Reuben is mainly ethical—the lessons quite obvious ones: evils of polygamy, perils of remoteness from worship centers, etc.

2097f מראשות (m^era'āshôt) *place at the head, head place* (e.g. Gen 28:11, 18; I Sam 19:13, 16).

The primary meaning of this root is "head." It is common to all Semitic languages and appears in its root forms and derivatives nearly 750 times. It is used for the "head" as part of the body (Gen 3:15) and by extension for the notion of "chief" of a family (Ex 6:14), as "chief officer" of the divisions of Israel (Ex 18:25) and the like. The unique Hebraic character of this usage is clear in the OT as the root is rarely applied to chiefs of Gentile nations. It is used also for the top or summit of a geographical feature such as a mountain or hill (Ex 17:9) and the upper part of a building or architectural feature (Gen 11:4; II Chr 3:15) and as a personification for such features (Ps 24:7, 9). The root was utilized in many colloquial expressions for plant names (Job 10:4) parts or portions of things (Gen 2:10) and terms for artifacts. In this last category is the usage of the root for both "head stone" (Zech 4:7) and "chief corner stone" (Ps 118:22). This passage and usage are carried over into the NT and quoted by Jesus concerning his being rejected by the Jews (Mt 21:42; Lk 20:17; Eph 2:20; I Pet 2:7). The root is widely used in the OT with other terms in the sense of the superlative, since Hebrew does not have any simple form to express the third degree. There are many examples of this usage (Ex 30:23) where the meaning is "best," "foremost," the uniquely finest, which alone was fit for the service of God. This theological meaning is carried over to the officers of the temple (II Kgs 25:18) and the best musicians (Neh 11:17). In most of the versions there are divergencies in the translation of *rō'sh* when it is used in the sense of "chief" as for example (Num 31:26) and many similar passages KJV reads "chief," NIV and RSV read "head" but none are completely consistent. The root appears in many passages in the sense of "sum" or "total" (Prov 8:26) RSV "first" with a footnote which cites the difficulty of the Hebrew. The KJV consistently reads "total," "sum" in passages dealing with the census of Israel (Ex 30:12; Num 1:2 etc.) and the Aramaic form appears in the unusual sense of the "sum" or "substance" of a dream (Dan 7:1). Although many of the usages of the root can be traced back to Akkadian and ultimately to Sumerian, the reliance on the nation's "head" as a high officer or chosen personage is developed in Hebrew to much greater degree than the other languages. The theological use of the root to designate divinely appointed offices in the OT is carried over into the NT in such terms as "head of the church" (Eph 5:23), a title ascribed to Christ.

ri'shōn. *First, primary* (ordinal number). This adjective, a derivative of the same root as *rō'sh* (q.v.), is cognate to Akkadian *rēštu*. The word occurs over 180 times in the OT in a very wide variety of connotations and contexts. It is used in three distinct senses and a number of special constructions. The overwhelming number of occurrences are best translated "former," "first" of two, of time (Gen 25:25); "previous" (Num 21:26); "former men," "the patriarchs" (Deut 19:14); "former times," "former events" (Isa 41:22). The next most common usage is in the sense of "first," as in "first" of mankind (Job 15:7); "first" day of a ritual (Deut 16:4); "first" to fall in battle (1 Sam 14:14); "first" as "briefest" (Ezr 9:6). The third most common usage is in the sense of "before," "formerly" in time (Gen 28:19; Deut 13:10). There are other more specialized usages, "first in command" (II Kgs 20:17); "set out first" (Num 10:14); "to prepare first" (I Kgs 18:25). Since the Hebrew orthography at least in later days admitted no easy numerical notation, all ordinals are spelled out and vocalized in the MT. However, there is some scant evidence that there was a notational system for both cardinal and ordinal numbers in use in antiquity.

rē'shīt. *First, beginning, choicest, first/best of a group.* A feminine noun derived from the root *rō'sh*, it appears fifty times in nearly all parts of the OT. The primary meaning is "first" or "beginning" of a series. This term may refer to the initiation of a series of historical events (Gen 10:10; Jer 26:1) but it also refers to a foundational or necessary condition as the reverence or fear of God (Ps 111:10; Prov 1:7) and the initiation, as opposed to the results, of a life (Job 8:7; 42:12). It is used frequently in the special sense of the choicest or best of a group or class of things, particularly in reference to items to be set aside for God's service or sacrifice. The "first fruits" (Lev 2:12; 23:10; Neh 12:44) and "choicest" (Num 18:12) fruits are so distinguished. Difficult usages of the term occur in several passages. In Deut 33:21 the KJV reads "first part" which is followed by JPS, however the RSV, "best of the land" is preferred. In Dan 11:41 the KJV reads "chief of the children of Ammon," but RSV reads "main part of the Ammonites," the more probable reading is "best of the Ammonites." The most important use of *rē'shīt* in the OT occurs in Gen 1:1 where it is combined with the proclitic preposition *b* (q.v.). There has been a great deal of debate over this use of *rē'shīt*. Many commentators both ancient and modern have tried to read the phrase as "when-" rather than "in the beginning" as do several modern versions. The chief modern justification for this interpretation of the root is to relate it to the phrase "*enūma elish*" which begins the Babylonian epic of creation. However there is no evidence to connect the two

different terms, the one in Hebrew and the other in Babylonian (see White, W., "Enuma Elish," in ZPEB, II, p. 314). The proper interpretation of *rē'shīt* can be deduced from the other occurrences and the witness of all ancient versions. The NT (Jn 1:1) translates the Hebrew and follows the LXX precisely in its reading of (Gen 1:1) the first phrase of the OT. The use of this root leaves no doubt that Gen 1:1 opens with the very first and initial act of the creation of the cosmos.

W.W.

2098 ראש (*rō'sh*) II, *gall, venom*. (RSV usually "poison".)

This is probably a Babylonian plant name which originally meant "head" of some kind of plant. It comes to mean "poison" and "poisonous" and occurs twelve times in the OT. The initial occurrence is in Deut 32:32, "Their grapes are grapes of poison." It is also used to describe bitter waters (Jer 8:14; 9:14; 23:15), "has given us poisoned water to drink." The "poisoned" or "bitter" water of Palestine may have merely been water too salty to drink. The translation of *rō'sh* is difficult in some passages, where it is parallel in poetry to another term (Ps 69:21 [H 22]), "They gave me bitter herbs (*rō'sh*) for food, and for my thirst they gave me vinegar to drink." BDB remarks that the word is always used figuratively.

2099b רבב (*rab*) II, *captain, chief*.

2099c רבב (*rōb*) *multitude, abundance*.

2099d רבבָה (*rē bābā*) *ten thousand*.

2099e רבבָה (*ribbō*) *ten thousand*.

2099f רבבִּים (*rē bibīm*) *copious showers*.

A verbal root cognate to Akkadian and other Semitic languages, it appears twenty-three times in the OT in the Qal stem and once in the Pual stem. The initial occurrence appears in Gen 6:1 and many other passages in the sense of "become many" referring to human population, in other passages (Ex 23:29) referring to animal populations. The usage of the term in the story of Sodom (Gen 18:20) is difficult and the versions fail to agree except on *rābab*, which they all read

as "great," when actually it is not the immensity of the cry of Sodom which is meant, but its manifold nature. In the single usage of the Pual stem (Ps 144:13) in a very difficult parallelism, the term seems to be an indeterminate large quantity like the Greek, myriad, and is usually translated "ten thousand" or more properly "ten thousandfold." Lexicons treat it as a denominative form from *r^ebābā* "myriad, "ten thousand."

rab I. Much, many, great. This is the common Hebrew adjective meaning "much," or "many." It occurs 420 times in the OT. The root, *rab*, is cognate both philologically and semantically to Ugaritic *rb* and Akkadian *rabū*. The primary meaning is "many," which occurs initially in Gen 21:34. KJV translates "many" in 190 occurrences most dealing with objects (Gen 30:43), days (Gen 37:24), times (Ps 106:43), and similar subjects. The root is often used in contexts referring to "many" people, as "many evildoers" (Ex 23:2), "Gentiles" (Deut 9:14), and "multitude" at the Exodus (Ex 12:38). The other exceedingly common usage is in the sense of "great," the translation used by the KJV and in most part by the RSV in 128 occurrences. Many objects, institutions, and persons are said to be "great." Among the subjects so described with the adjective, *rab*, are: "goodness" (Ps 31:20), "evil" (Gen 6:5), "a person" (Ps 48:3). There are some special usages of the root which require more colloquial translation. *rab* with the prefix *min* is used as the comparative degree of the adjective, "greater than" (Deut 7:1 et al.). In some texts the root means "enough" (Gen 45:28); in others it has the connotation, "too much for" (1 Kgs 12:28). This is the proper translation of the difficult verse Prov 26:10. Unfortunately the root is confused here in the versions and there are a great many minor inconsistencies in their choice of translations (KJV, "The great God"; RSV, NASB, and NIV "archer" from *rābab* "to shoot").

rab II. Captain, chief. A title of Babylonian origin which appears in both Hebrew and Ugaritic. It designates the chief or executive of a group such as a military detachment (II Kgs 25:8 et al.). It is often a prefix as it is in Akkadian; cf. Jer 39:9–10. The term was adopted by the Neo-Babylonians (Dan 1:3), "his chief-eunuch," and by the Persians who succeeded them (Est 1:8), "all the captains of his house." There is no evidence that the term was ever used except as a rank of foreign origin as in Isa 36:2, 4, 11, 12, 13, 22; 37:4, 8.

[An interesting use of the title is in Jer 39:3 where the names were long misunderstood, but the consonants accurately preserved. Instead of six names as in the MT and KJV it is probable that there are three names and three titles: (1) Nergal-Sharezer of Samgar (The Babylonian district of SinMagir with assimilation of the "m");

(2) Nebo-Sarsechim, the Rab Saris (chief of the eunuchs, or of the officers); (3) Nergal-Sharezer the Rab Mag (a chief official). So NIV; some others (RSV) find four names. R.L.H.]

rōb. Multitude, abundance. This root also appears as *rōb* in many occurrences. A masculine noun, it is derived from the Semitic verbal root *rbx*, where "x" may be one of several different consonants depending on the precise morphological form. In Hebrew the parent form is probably *rābab*. *rōb* appears 147 times in the OT. The highest number of usages is found in II Chr, where it is used to describe the various quantities of materials and efforts required by Israel's and later Judah's kings (II Chr 1:15; 2:8; 4:18, et al.). In some cases *rōb* can best be translated by "long," as in "long time" (Isa 24:22; KJV, "many days," RSV, and JPS read the same). *rōb* also means "long" in "long way" (Josh 9:13). The root is straightforward and offers no real difficulty in any of its occurrences.

r^ebābā. Ten thousand. This root is found also in Ugaritic as *rbt/rbbt*, and appears in most West Semitic languages. Since the science of numeration is not well developed in the West Semitic writing systems, more often than not, *r^ebābā* simply stands for a very large number, "a multitude." The initial usage is in Gen 24:60, "Our sister, be the mother of thousands of ten thousands." In Hebrew parallel poetic structure, numbers are usually handled by using the number in the first phrase then the number plus one in the second phrase (Job 5:19). In the case of *r^ebābā*, however, the parallelism is thousand // ten thousand as in I Sam 18:7; Ps 91:7. In other passages the root is used to communicate the enormity of the host involved Num 10:36, "Return O Lord to the ten thousand thousands of Israel." It is always used poetically and never used like *ribbō* in enumerations.

ribbō. Ten thousand. Since this root is derived from the same proto-Hebrew root as Ugaritic *r^ebābā*, but it does not appear earlier than I Chr 29:7, "Ten thousand coins of gold," it is probably a later form of *r^ebābā*. Unlike the former root, *ribbō* is often used in multiple expressions (Ps 68:17 [H 18]), "with mighty chariots, twice ten thousand" (Ezr 2:64, 69, where *ribbō* is written with an *aleph* added, *ribbō'*).

W.W.

2100 רַבָּב (*rābab*) II, shoot (Gen 49:23; Ps 18:15).

Derivative

2100a רַב (*rab*) III, archer (Jer 50:29; Job 16:13).

2101 רָבַד (rbd)

2101 רָבַד (rbd) I. Assumed root of the following.

2101a רָבִיד (rābid) *chain, ornament for neck* (Ezk 16:11; Gen 41:42).

2102 רָבַד (rābad) II, *bespread, deck* (Prov 7:16; I Sam 9:25).

Derivative

2102a מְרַבֵּד (marbād) *spread, coverlet* (Prov 7:16; 31:22).

2103 רָבָה (rābā) I, *be(come) great, many, much, numerous*.

Derivatives

2103a אֲרֵבָה ('arbeh) *a kind of locust*.

2103b מְרַבֵּה (marbeh) *abundance* (Isa 33:23), *increase* (Isa 9:6).

2103c מִרְבָּה (mirbā) *much* (Ezk 23:32, only).

2103d מְרִבִּית (marbīt) *increase, multitude*.

2103e תְּרִבִּית (tarbūt) *increase, brood* (Num 32:14, only).

2103f תְּרִבִּית (tarbīt) *increment, usury, interest*.

This is the West Semitic form of a very common term cognate to Ugaritic *rb* and Akkadian *rabū*. This is the suffix common to so many Babylonian-Assyrian names, e.g. "Hammurabi" = "The god Ham (perhaps 'ammu) is great." The root appears over two hundred times in the OT. The two major differentiations in meaning are connected with occurrences in the Qal stem, 60, and the Hiphil stem, 155 in all. The initial occurrence of the root is Gen 1:22. "Multiply" is read by all of the versions, but in subsequent usages a variety of translations appear, "increase" (Gen 7:17-18); "be many" (I Chr 23:17); "so much" (Gen 43:34). In single instances a great many more meanings are in evidence. In the Hiphil stem the standard and most common meaning is "multiply," but a variety of other translations are also given: "ask much" (Gen 34:12); "gather much" (Ex 16:18); "yield much" (Neh 9:37); "give more" (Num 26:54); "to heap" (Ezk 24:10). The wide range of proffered meanings shows the latitude of the original Hebrew root. Although generally restricted to quantitative contexts, the root *rābā* has some use in metaphorical expressions. It is used in the following special senses: "live long" (Job 29:18); "make words great," "to brag" against God (Job 34:37), and "have many children" (I Chr 7:4).

W.W.

'arbeh. *Locust*. The word is probably derived from the root *rābā* "to become numerous." It occurs in Akkadian as *erebu*, *arbū*, etc. In the Ugaritic KRT text (103, 192), the king's army is described as covering the field like locusts (*irby*).

Of the many words for locust, 'arbeh is the general word, and is used most frequently, twenty-four times. The KJV translates it "locust" twenty times and "grasshopper" four times.

The 'arbeh plague (Deut 28:38) is listed as one of the divine curses which would befall the Israelites if they disobeyed God's commands. The 'arbeh is one of the plagues which Moses called down upon Egypt (Ex 10:4ff.; Ps 78:46; 105:34).

Locusts are used in similes of vast numbers in Jud 6:5; 7:12; Jer 46:23; Nah 3:15.

Locusts belong to the order of the *Orthoptera*, "straight-winged." With the grasshoppers they belong to the subfamily *Saltatoria*, "leapers," which were considered edible (Lev 11:21-22). The biblical locust is not the cicada called "locust" in some areas of the United States.

Locusts belong to the family *Acridiidae*, "short-horned grasshoppers." Of the ninety-one species found in Palestine only the desert locust (*Schistocerca gregaria* or *Acridium peregrinum*) has served to plague the near east from time immemorial.

At maturity these locusts are two and one-half inches long. They have two sets of wings and an enlarged pair of legs for jumping. In appearance they are compared to horses (Joel 2:4; Job 39:20; Rev 9:7; cf. German *Heupferd*, Italian *cavallette*).

Desert locusts are phenomenal travelers. They are able to fly for seventeen hours at a time and have been known to travel fifteen hundred miles. The sound of their wings is compared to the sound of chariots (Joel 2:5; Rev 9:9). Their route of travel is determined by the prevailing winds (Ex 10:13, 19). In the plague of 1915, locusts came to Jerusalem from the northeast (cf. Joel 2:20).

The Bible does not exaggerate when it speaks of swarms of locusts covering the ground (Ex 10:5). A swarm has been known to cover a hundred square miles and to be so dense as to blot out the sun. A truly large swarm may contain ten billion locusts.

The four words used by Joel (1:4; 2:25) in his vivid description of the locust plague evidently represent stages of the locusts' development (RSV, NEB, JB, NAB), rather than separate species of insects (KJV, KB). In Joel 2:25 we have first the 'arbeh, the mature locust which deposits the eggs. The *yeleq* may be the larva as it emerges from the egg. The *hāsil* may be the intermediate instar (stage between molts). The *gāzām* may be the ravenous nymph which strips the bark from the trees.

Unlike the Babylonians who resorted to magical incantations to avert locust plagues, the Israelites asked God in fasting, repentance, and prayer to remove locust plagues (I Kgs 8:37; II Chr 6:28).

In Lev 11:22 the 'arbeh and three other types

of locusts (*sol'ām*, *ḥargōl*, *ḥāgāb*) are listed as edible insects. Bas reliefs from Nineveh show servants bringing skewered locusts for Sennacherib's table. John the Baptist subsisted on honey and locusts (Mt 3:4; Mk 1:6). Many Africans and Arabs after removing the wings, legs, and heads eat locusts either cooked or ground up as flour.

There are nine Hebrew words which designate locusts: *'arbeh*, *gāzām*, *gēbā*, only as plural *gēbīm*, *gōbay*, *hāgāb*, *ḥasil*, *yeleq*, *sol'ām*, *š'lašal*. Akkadian recognizes eighteen names for locusts, and the Talmud twenty names.

E.Y.

marbit. *Multitude, greatness, larger part, increase, interest.* The participial form of the root, *rābā*, it appears five times in the OT. The initial occurrence appears in Lev 25:37 "interest," "usury," in connection with *neseq* "usury" and *tarbit* "increase" (q.v.). In I Chr 12:30 the root is read "greatest part" of the Benjamites. The same notion of "the greater portion" is in evidence in the usage of the root in II Chr 9:6, "the half of your wisdom," while II Chr 30:18 reads "multitude" in describing the unclean participants in the Passover. The only other usage of *marbit* in the OT is in I Sam 2:33, the curse of Eli's house, wherein the root is read "increase" by all versions.

tarbit. *Increase, usury, interest.* This is a feminine noun developed from the root *rābā*. It appears four times in Ezk, three in one chapter, and in only two other passages. In all cases it appears with the masculine noun *neseq* q.v. The association with *neseq* "usury," which derives from the verb "to bite" suggests oppressive or

exorbitant interest. The initial occurrence is in Lev 25:36 which is studied by E. A. Speiser, who shows that the practice forbidden there is the charging of additional interest after a defaulting debtor was taken into bondage. The primary interest was deducted in advance (discounted). See the fuller discussion under *neseq*. The charging of *neseq* and *tarbit* is denounced in Prov 28:8 and classed with other heinous sins in Ezk 18:8, 13, 17; 22:12. The KJV translates these words in Prov 28:8 "usury" and "unjust gain"; elsewhere "usury" and "increase"; the RSV always by "interest" and "increase."

רִבּוֹ (*ribbō*). See no. 2099e.

רִבִּימִים (*rēbibīm*). See no. 2099f.

רִבִּיד (*rābīd*). See no. 2101a.

רִבִּיעִי (*rēbī'i*). See no. 2107c.

2105 רָבָה* (*rābak*) *mix, stir* (Hophal only, Lev 6:14; 7:12; I Chr 23:29).

2106 רִבַּע (*rb'*) I. **Assumed root of the following.**

2106a אַרְבַּעַת (*'arba'*) *four*.

2106b אַרְבַּעִים (*'arbā'im*) *forty*.

2107 רִבַּע (*rāba'*) II, *squared, square*. This denominative verb occurs only as a passive participle (e.g. Ex 27:1; Ezk 45:2).

2107a רִבַּע (*reba'*) *fourth part* (Ex 29:40), *four sides* (Ezk 43:16).

2107b רִבַּע (*rōba'*) *fourth part* (Num 23:10; II Kgs 6:25).

2107c רִבִּיעִי (*rēbī'i*), רִבִּיעִית (*rēbī'it*) *fourth* (e.g. Gen 2:14; I Kgs 6:1).

2107d רִבְעָה (*ribbēa'*) *pertaining to the fourth* (Ex 20:5=Deut 5:9).

These are very ancient roots of East Semitic origin. They are cognate to Akkadian *arba'u*, which appears frequently in some of the very earliest cuneiform inscriptions. The Hebrew form appears nearly 250 times, mostly in the Pentateuch and Ezekiel. Since Hebrew numerical notation was very limited in scope, numbers in texts (at least in our copies including the DSS) were written out vocally. The word *'arba'* is used to enumerate and measure every possible type of object and situation. It is universally translated "four" by the versions. The initial citation appears in Gen 2:10, many citations are translated by the ordinal number form, "fourth" (I Kgs 22:41). The plural form means "forty" (Gen 5:13) and appears well over one hundred times. The plural form *'arbā'im*

is used in some poetical and metaphorical passages in the sense of an indeterminate, long period of time (Gen 50:3; Ex 16:35 et al.) [It should also be kept in mind that the number forty is not always indeterminate. The wilderness wandering was thirty-eight years plus the time at Sinai (Deut 2:14). David's kingship was seven years in Hebron and thirty-three in Jerusalem (1 Kgs 2:11). Caleb was forty years old at Kadesh Barnea; forty-five years later he was eighty-five (Josh 14:7, 10). The periods of rest and oppression during the Judges varied. Only four out of seventeen figures mentioned were forty years long. These figures may not always be precise, but neither are they to be too easily discounted. R.L.H.]

W.W.

- 2108 רָבַעַ (rāba') II, *lie stretched out, lie down* (Ps 139:3; Lev 20:16). Probably an Aramaic form of *rābaš* (note the *š* to *'* shift.)

- 2109 רָבַצַּ (rābaš) *lie down*.

Derivatives

- 2109a רָבַעַצַּ (rēbeš) *resting place*.

- 2109b מַרְבֵּעַצַּ (marbēš) *resting place*.

This verbal root is cognate to Akkadian *rabāšu*, a nominal form meaning "a stable," possibly "a lying place." It occurs in Ugaritic in the form, *trbš* which is obviously based upon this root. It occurs thirty times in the OT and has the connotation of "repose" or "rest from exertion" rather than sleep. The initial occurrence of the verb in Gen 4:7, the interesting phrase, "If you do not do well, sin lies at the door." This verse, of course, has been much discussed. Another view interprets "sin" in the figure of a ferocious beast ready to spring. But this meaning of *rābaš* seems to be found only in Gen 49:9 (see below). Others, taking the usual meaning of *rābaš* take the word "sin" as "sin offering" which is lying available at the door. Speiser offers a third view importing unnecessary mythology. He takes the part, *rōbēš* as a noun "a demon" ready to spring (E. A. Speiser, *Genesis*, in AB). *rābaš* describes the "lying" of many living things, figurative of people as sheep (Ezk 34:14), "There they shall lie down in good grazing land"; of the needy person (Isa 14:30), "And the needy lie down in safety"; of flocks (Isa 13:20, Hiphil stem), "No shepherds will make their flocks lie down there"; of sheep (Gen 29:2), "Three flocks of sheep lying beside it"; of wild animals, specifically the lion (Gen 49:9), "He stoops down, he lies in wait as a lion"; of the leopard and goat in tranquility together (Isa 11:6), "And the leopard shall lie down with the kid"; and of the nesting mother bird (Deut 22:6). The Hiphil stem is used in a few passages with the meaning of "cause to lie down" (Jer 33:12; Ezk 34:15; Ps 23:2, "He maketh me to lie down in green pastures,"

also Song 1:7). The image of the people of God as sheep and the Lord as the good shepherd is used in both OT and NT. In the OT prophetic writings the final state of the blessed in the messianic kingdom is portrayed in pastoral imagery as a grazing flock. *rābaš* is used in one unusual sense in Isa 54:11, "Behold, I will set your stones in antimony, and lay down (*rābaš*) your foundations in lapis lazuli."

rēbeš. Resting place. This nominal form of the verbal root *rābaš*, an Akkadian loan word in Hebrew, is used four times in the OT. It occurs in Isa 35:7; 65:10; Jer 50:6 and Prov 24:15. rsv, "Do not violence to his home," is in error, the text should be translated, "Despoil not his resting place."

marbēš. Resting place, shelter. This masculine noun occurs twice in the OT (Ezk 25:5; Zeph 2:15), "A shelter for beasts to lie in."

W.W.

- 2110 רָבַקַּ (rbq). Assumed root of the following.

- 2110a מַרְבֵּקַּ (marbēq) *stall* (e.g. Amos 6:4; Mal 3:20).

- 2111 רָגַבַּ (rgb). Assumed root of the following.

- 2111a רָגַבַּ (regeb) *clod of earth* (Job 38:38; 21:33).

- 2111b אֶרְגָבַּ ('argāb) *heap, mound* (I Sam 20:19, 41).

- 2112 רָגַזַּ (rāgaz) *tremble, quake, rage*.

Derivatives

- 2112a רָגַזַּ (rōgez) *trouble, turmoil*.

- 2112b רָגַזַּ (rogzā) *trembling*.

- 2112c רָגַזַּ (raggāz) *trembling*.

- 2112d אֶרְגָזַּ ('argāz) *box, chest* (I Sam 6:8, 11, 15).

The primary meaning of this root is to quake or shake, from which ideas such as shaking in anger, fear, or anticipation are derived.

This verb may describe the literal quaking of the earth (I Sam 14:15). More often the "quaking" is in a poetic expression such as the quaking of the mountains before the thunderstorm which marks the Lord's coming (Ps 18:7 [H 8]) or the "three things" under which the earth trembles (Prov 30:21).

It is not clear whether physical displacement or disturbance is involved in the promise to David that God's people shall be planted and not "be moved" or "be disturbed" (II Sam 7:10; I Chr 17:9). The rsv rendering, "be disturbed" is more in harmony with typical meanings of this term; on the other hand, "be moved" is usually taken as fitting the context better. If correct, the latter meaning is unique to the context under discussion.

Most usages of *rāgaz* express agitation growing out of some deeply rooted emotion. From the range of usages it is clear that the term refers to the agitation itself, and the underlying emotion is to be recognized only from context. In these usages, it may parallel other expressions for physical movement such as *hārad* "to quake" (Isa 32:11), or *hīl* "writhing in birth pangs" (Ex 15:14). This term expresses the trembling of the world's inhabitants before God's appearance in judgment (Isa 64:2; Joel 2:1). People tremble at God's great works, both the destructive works (Deut 2:25) and the beneficent ones (Jer 33:9). Trembling may be a reaction to such diverse things as misfortune (Isa 32:10–11 RSV "shudder"; KJV, ASV "be troubled"), bad news (II Sam 18:33; RSV "deeply moved"), some profoundly stirring knowledge or revelation (Hab 3:16), and the prospect of God's rule (Ps 99:1).

Similarly, *rāgaz* may describe God's trembling or raging in anger (Isa 28:21, "be wroth"). It describes the raging of a fool at the words of the wise (Prov 29:9). Once it refers to trembling in anticipation (Isa 14:9; RSV "is stirred up").

Occasionally its meaning may be difficult to discern. In Gen 45:24 it is usually translated as some kind of arguing or bickering (RSV "quarrel"; ASV, KJV "fall out") following the idea of raging in anger noted above, but this translation is not certain. Ezekiel 16:43 is unusual in that the meaning is transitive, "to enrage" (KJV "fretted") rather than the normal intransitive meaning. BDB suggests reading the form as a Hiphil. Perhaps the ASV "raged against" is best. In Ps 4:4 [H 5], *rāgaz* has been variously translated: "be angry" (RSV), "stand in awe" (KJV). In light of contexts cited above, "tremble! and sin not" is equally possible.

[The NT (Eph 4:26) which is taken from the LXX is variously interpreted also. Perhaps best is Meyer's suggestion that the negative force applies to the second imperative "In being angry do not sin," i.e., do not sin by anger. Or NIV: "In your anger do not sin." R.L.H.]

The meaning of the Hiphil stem is causative, "to cause to shake." Physical objects may be shaken (Job 9:6; Isa 13:13). "Shaking" may express the idea of disturbing or giving unrest (I Sam 28:15; Jer 50:34). Or the term may refer to those who cause God to shake in indignation or anger, i.e. those who "provoke" God (Job 12:6).

The Hithpael stem is used in one context, recorded twice (II Kgs 19:27–28; Isa 37:28–29) and is translated reflexively as "raging," i.e. "causing self to move about in rage."

rōgez. *Trouble, turmoil, wrath, rage.* Can refer either to external disturbances or troubles or to inner emotional agitation as in anger. Job uses this term for external disturbances (3:17, 26; 14:1). The RSV and ASV correctly prefer a similar

meaning in Isa 14:3 (cf. KJV "fear"), as is shown by other elements in that context. God's wrath is expressed by this term (Hab 3:2; cf. also the raging of the war horse, Job 39:24). Its meaning in Job 37:2 (KJV, ASV "noise"; RSV "thunder"; BDB "rumbling") is not clear.

rogzā. *Trembling.* Expresses trembling with fear (Ezk 12:18).

raggāz. *Trembling.* Describes the fearful heart of God's people in exile (Deut 28:65).

A.B.

2113 רָגַל (*rāgal*) *go on foot, spy out.* Denominative verb.

Parent Noun

2113a רָגֵל (*regel*) *foot.*

2113b רַגְלִי (*ragli*) *foot soldier.*

2113c מַרְגְּלוֹת (*marg'lot*) *place of the feet, feet* (Ruth 3:4, 7; Dan 19:6).

regel. *Foot.* This primary, feminine noun is found only in Hebrew, Aramaic, and some later Semitic dialects. It appears 245 times in the OT. In the overwhelming number of occurrences it means the "foot/feet" of human beings. However, it is also used in poetic passages in an anthropomorphic sense for an attribute of God (Ex 24:10) and for God's transcendent nature (II Sam 22:10; Ps 18:10) and similar passages. It is applied to the "living beings" of Ezekiel's prophetic vision (1:7ff.) to the seraphim (Isa 6:2), and cherubim (II Chr 3:13). Although the greater number of usages are in the plural (Ex 23:14), it follows general Semitic grammar and as with other paired organs of the body appears in the dual (Isa 28:3) and on rare occasion in the singular (Deut 2:5). Although it usually means "foot" there is some limited extension to the "leg" (Deut 2:5). It is used in referring to the feet of cattle (Gen 33:14), undefined animals (Job 39:15), birds (Gen 8:9; Lev 11:21–23), and unclean creatures such as insects and other arthropods (Lev 11:42). It is used of the feet of Pharaoh personified as a beast (Ezk 32:2) and of idols (Ps 115:7). *regel* is used with many extended meanings such as "pace" (Gen 33:14), "time" or "number of times" (Ex 23:14) and "leg of a table" (Ex 25:26). Since walking was the primary means of travel during the centuries of Israel's history, the term took on many colloquial meanings. Some of these are not unlike modern expressions, while others are difficult to interpret in modern speech. A fine example is in the plea of Jacob before Laban (Gen 30:30), the Hebrew says literally, "at my feet," however the versions all seek better sense to fit the context. The RSV reads "wherever I turned," KJV "since my coming." Both are closer to the actual sense. The root *regel* also implies "presence" (Deut 11:24),

“swiftness” (II Sam 2:18), “immediacy” (Num 20:19). It is used in connection with the “big toe” in warfare (Jud 1:6–7) and in rituals (Ex). Some of the most interesting usages are in euphemistic expressions for bodily excretions (Jud 3:24; I Sam 24:3 [H 4]), for unkempt appearance as in mourning (I Sam 19:24), to show homage at the feet (II Kgs 4:37 and numerous other passages). In a rare usage (Isa 7:20) it is used of the pubic hair (i.e. hair of the legs). The main force of the word throughout the OT is the individual whose feet are mentioned as traveling or holding dominion.

ragli. *Men on foot, foot soldiers.* A secondary adjective developed from the noun *regel*, *ragli* appears twelve times in the OT in historical contexts (Ex 12:37, “And the people of Israel journeyed from Ramses to Succoth, about six hundred thousand men on foot, besides women and children” rsv).

W.W.

רָגַלִּי (*ragli*). See no. 2113b.

2114 רָגַם (*rāgam*) to stone.

Derivatives

- 2114a רִגְמָה (*rigmā*) *heap* (of stones),
i.e. crowd of people (Ps 68:28).
2114b מִרְגְּמָה (*margēmā*) *slings* (Prov
26:8).

This purely Hebrew root occurs fifteen times in the OT. It means literally, “To kill by stoning.” This method of capital punishment is specified for idolaters (Lev 20:2), soothsayers (Lev 20:27), a blasphemer of the sacred name (Lev 24:11). The legal act of stoning was a corporate one. In some cases the men of Israel are commanded “to stone” (Deut 21:21) in others the congregation of Israel (Num 15:35) and in still others the children of Israel (II Chr 10:18). It is the participation of all members of the society which is important, since all persons regardless of sex or age could throw stones, it became the total act of the whole population in obedience to God’s command. The method of execution is not usually stated in Hammurabi’s law. Occasionally it was by burning. Stoning seems not to have been used in Mesopotamia or Egypt—stones are more abundant in Palestine!

W.W.

2115 רָגַן (*rāgan*) *murmur, whisper* (e.g. Isa 29:24; Deut 1:27).

2116 רָגַע (*rāgaʿ*) *I, act in an instant.*

Derivative

- 2116a רֵגַע (*regaʿ*) *a moment.*

The differentiation between this root and *rāgaʿ* “to rest” is very difficult to determine. However, in several OT passages there appears to be a usage of the root with an antithetical meaning, “act quickly,” “act in an instant.”

A key passage for the meaning of the verb is Isa 51:4, KJV, “And I will make my judgment to rest for a light of the people.” rsv disregards the whole problem, “And my justice for a light to the people.” The JPS, on the other hand, reads, “And my right on a sudden for a light of the peoples.” None of these translations are acceptable, as the Hebrew says, “For law (*tôrā*) shall go forth from me, and my instruction shall instantly be a light of the people.” The same confusion exists among the lexica which differentiate the roots in contradictory ways. Another passage which yields this second verbal root is Job 20:5. However, the phrase occurs at the end of a long parallel construction, (vv. 4–5), “Did you not know this from olden times, since man was put upon earth, that the wicked’s triumphing is short-lived, and the joy of the godless but for an instant (*rāgaʿ*).” Similar occurrences are found in Jer 49:19; 50:44 and Prov 12:19. The masculine noun *regaʿ* occurs twenty times in the OT in the sense of a momentary or instant space of time. The initial usage is in Ex 33:5, “If I go among thee for one moment.” In the plural it means “every moment” (Isa 27:3), “I, the Lord, am its keeper; I water it every moment.” In one passage there is confusion about the meaning of the root (Job 21:13). rsv, “They spend their lives in prosperity, and in peace go down to Sheol,” is incorrect, the root *regaʿ* still maintains the meaning “a moment.” The proper reading is that of the KJV.

W.W.

2117 רָגַע (*rāgaʿ*) *II, rest, be at repose.*

Derivatives

- 2117a רָגַע (*rāgēaʿ*) *restful, quiet* (Ps 35:20).
2117b מִרְגָּוֶה (*margôaʿ*) *rest* (Jer 6:16).
2117c מִרְגָּוָה (*margēʾā*) *rest, repose* (Isa 28:12).

The root *rāgaʿ* is a very difficult one to separate into its philological and semantic relationships. Although there is a development of the root in Judeo-Arabic and the later Semitic dialects, there are no ancient cognates. The root appears fifteen times in the OT. It appears to have two opposite meanings which are still not adequately explained. They are nearly equally divided. The first is “rest,” “be at repose” (Deut 28:65; KJV, rsv, “ease”; JPS, “repose”). This meaning extends to several stems of the root. The second is “stir,” “act in a moment” (Jer 49:19; KJV, rsv, “suddenly”). The versions both ancient and modern are confused and most follow the

context in translating this difficult root. The preponderance of usages are found in Jeremiah and even there the term is used in both senses: "repose" (Jer 50:34) and "stir" (Jer 50:44). Several secondary forms are derived from the root, *rāga'*, the participle, *margôa'* "resting place" Jer 6:16. An adjective is also existent, *rāgēa'* which appears only in Ps 35:20.

W.W.

2118 רָגַע (*rāga'*) **III, harden** (Job 7:5).

2119 רָגַשׁ (*rāgash*) **conspire, plot** (KJV "rage," Ps 2:1).

Derivatives

2119a רֶגֶשׁ (*regesh*) **in company** (RSV "in fellowship"; ASV "with the throng"; Ps 55:14).

2119b רִגְשָׁה (*rigshā*) **scheming** (KJV "insurrection"; ASV "tumult"; Ps 64:2).

rāgash and its derivatives have been translated by such ideas as "tumult" (KB, AV) or "noisy throngs" (BDB). However contextual parallels ("to plot" Ps 2:1; "secret plots" Ps 64:2; "sweet converse" Ps 55:14) indicate that ideas such as "conspire" (RSV) are probably correct.

A.B.

2120 רָדַד (*rādād*) **beat down, subdue**.

Derivative

2120a רָדִיד (*r^edid*) **wide wrapper or large veil** (Isa 3:23; Song 5:7).

This root is cognate to Akkadian *radādu*, although the Hebrew has developed other meanings. It is the subject of some controversy as to exactly how many times this root occurs, there are other homophones with which the morphological forms may be easily confused. There are four passages about which there is no doubt, in the Qal stem. They are Isa 45:1 and Ps 144:2 in which the root means "subdue." The clearest occurrence of the Hiphil stem (I Kgs 6:32) means "to beat down," in the special sense, "to overlay" with gold leaf. The difficult verse Jud 19:11 has been understood in several ways. The clearest is, "When they were near Jebus, the day was far gone (*rādād*)."¹ Other passages (Ps 55:3; Jer 2:31) are also listed by some authorities as occurrences of this root, but the evidence is only partially clear.

W.W.

2121 רָדָה (*rādā*) **I, rule**.

Derivative

2121a מִרְדָּה (*mirdā*) **dominion** (Isa 14:6).

This verbal root is found in later Semitic dialects (but not Ugaritic). It occurs in two senses. One is cognate to Akkadian *radû* although the Hebrew root developed the specialized meaning "to tread" and is used in the Qal stem in this sense only once (Joel 4:13), "Come! Tread! for the winepress is full, the vats are overflowing." The second meaning is "to rule" and is used some twenty-two times in the OT, occurring in every section and type of context. The initial usage appears in Gen 1:28, "And let them rule over the fish of the sea." (The allusion to this verse in Ps 8:6 [H 7] uses *māshal*.) There is no definite structure to its use in parallel poetry, as the root may be placed in either the first (Ps 68:28) or the second hemistich (Ps 49:15). *rādā* does not occur as a synonym in proximity to the more frequent verb, *māshal* (q.v.). Generally *rādā* is limited to human rather than divine dominion (Ps 110:2, et al.) The root is used of the rule of Israel over its enemies (Isa 14:2) and of the Gentile nations' rule over subject peoples (Isa 14:6). A most difficult and unusual usage occurs in Lam 1:13, RSV mistakenly reads, "From on high he sent fire; into my bones he made it descend," while KJV and JPS more precisely translate, "From above hath he sent fire into my bones, and it prevailed against them." But to be preferred is the reading, "He sent fire from above into my very bones and it overruled them." There is one instance of the Hiphil stem in Isa 41:2, speaking of the reign of the king-messiah, "And causes him to rule over kings."

A possible derivative is *mirdā* "dominion" which is not found unless it be the true reading of the MT *murdāp* (q.v.) in Isa 14:6.

W.W.

2122 רָדָה (*rādā*) **II, scrape out** (Jud 14:9; Jer 5:31).

רָדִיד (*r^edid*). See no. 2120a.

2123 רָדַם (*rādam*) **be asleep, be unconscious**.

Derivative

2123a תַּרְדֵּמָה (*tardēmā*) **deep sleep** (e.g. Gen 2:21; I Sam 26:12).

A relatively rare verbal root, *rādam* occurs seven times, but its infrequent usages are spread throughout the OT prophets and writings. Not once does the verb appear in the Pentateuch.

The initial occurrence of the verb is in Jud 4:21, in the story of Joel's slaying of Sisera, "fast asleep." In Ps 76:6 [H 7] the judgment of God is viewed as throwing down the horse and rider "unconscious," KJV, "dead sleep," RSV, "lay stunned," JPS, "cast into a dead sleep." In the occurrence in Prov (10:5) it is applied to a slothful son. Perhaps the most interesting occurrences

deal with the unconscious state of prophetic insight. Daniel 8:18; 10:9 both envision the prophet "unconscious" before the theophany. In Jon (1:5-6) the prophet is said to be "asleep" in the boat bound for Tarshish. The root does not seem to have any metaphorical connotations.

tardēmā. *Deep sleep, sleepiness; lethargy.* This feminine noun developed from the verbal root, *rādam*, appears seven times in the OT. The initial occurrence is in Gen 2:21, "a deep sleep." It is used to describe the state in which Abram had his vision of God (Gen 15:12). In I Sam 26:12, "a deep sleep" is sent upon Saul and his army when pursuing David. The same connotation of "insensitivity" to danger is presented in Isa 29:10 and Job 4:13; 33:15. All of these texts present "sleep" as the profundity of divine intervention. It is God who casts such sleep or sleeplessness upon his chosen servant. *tardēmā* occurs also in Prov 19:15, "Slothfulness casteth into a deep sleep."

Bibliography: Thomson, G. S. S., "Sleep: An Aspect of Jewish Anthropology," VT 5:421-33. W.W.

2124 רָדַפַּ (rādap) *be behind, follow after, pursue, persecute.*

Derivative

2124a מִרְדָּפָה (mirdāp) *persecution.*

rādap is found in biblical and later Hebrew but not other contemporary Semitic languages. This occurs over 150 times in the OT. The most frequent occurrences are found in Josh and Ps.

While all the versions translate this verb in similar fashion, there are divergences of understanding (Gen 14:14) which KJV reads "pursued," RSV "went in pursuit," which is more often than not the meaning in active forms. Usually the term refers to a man or group pursuing another for purpose of making war or taking revenge. On one occasion it is used in reference to "hunting" a partridge (I Sam 26:20). In a more theological context, God is said to pursue the wicked. KJV reads "persecute" (Jer 29:18). In other contexts it is the faithful who pursue their enemies (Ps 18:38). In an especially poetic and beautiful passage (Nah 1:8), the Lord rescues his faithful but causes a flood and pursues after his enemies with darkness. Some uses of the root *rādap* involve the pursuit of abstract concepts such as evil (Prov 11:19). In some passages (Job 18:18) the verb *hādap* has almost the identical meaning and there is the definite possibility that at points the two have been drawn together in usage. In the intensive and reflexive stems, *rādap* means being "hounded" or "persecuted" (Ps 71:11-13). One of the most blessed aspects of God's providence is his rescuing his people from pursuit. In the

well-known phrase from Psalm 23, God's blessing itself is said to "follow" (KJV and RSV, v. 6), which is not strong enough for the sense of the root. It should be more active. "Only goodness and mercy shall pursue me" is the preferred reading. Job has a slightly variant usage of the root, in some passages (30:15; 19:22) the sense appears to be "chased after."

mürdāp. *Persecution.* This noun occurs only in Isa 14:6. It is probably an ancient scribal error for *mirdā* derived from the verbal root *rādā* (so Vg) and means "dominion."

W.W.

2125 רָהַב (rāhab) *behave proudly.*

Derivatives

- 2125a רָהַב (rāhāb) *proud.*
- 2125b רִהָב (rōhab) *arrogance, pride.*
- 2125c רָהַב (rahāb) *pride.*
- 2125d מְרָהֶבָה (marhēbā) *boisterous behavior* (Isa 14:4).

The verb occurs only four times in the OT and signifies storming at or against something. The fundamental idea of *rāhab* appears in the proverb, "Make sure thy friend" (Prov 6:3 KJV), literally, storm him; ASV, importune, i.e. make every effort—in this instance, to be released from one's pledge (IB, IV, p. 818). It denotes a tempestuous, and then arrogant, attitude. Children might thus *rāhab* "behave themselves proudly, against their elders" (Isa 3:5). Two Scriptural hapax legomena are *rōhab*, identifying an unfounded pride in one's life span (Ps 90:10), and *rāhāb*, a proud man, turning aside to falsehood (Ps 40:4 [H 5]). Employing the verb's causative stem, David affirms that the prayer-answering God "strengthens" him (Ps 138:3; RSV marg. makes arrogant); and Solomon exclaims how the Shulamite's eyes "overcome" him (Song 6:5), literally, make him afraid or confused (KB, p. 876).

rahāb. *Pride.* In three of its six occurrences KJV reads "Rahab" (so ASV and RSV consistently, though twice ASV marg., "arrogancy"). In the latter three instances "Rahab" represents the Nile crocodile and stands figuratively for the haughty Egyptians (in usage paralleling *liwyātān* "Leviathan," q.v.).

In describing God's irresistibility (Job 9:12), Job insists that those who would be helpers of *rahāb* "pride" (v. 13), must stoop before him. Later, however, he cites *rahāb* in connection with *nāhāsh* "serpent" (26:12-13; cf. *tannin* "large reptile" in Isa 51:9). When therefore Job refers also to God's power over the sea, the phrase that follows seems best rendered that "he smites through the "crocodile," not the "proud" (v. 12b; see KJV). Historical specification for both sea and creature appear in Isaiah: "in the genera-

tions long ago, was it not Thou who cut *rahab* in pieces... was it not Thou who dried up the sea, who made the depths of the sea a pathway for the redeemed to cross over?" (51:9–10; cf. Ps 89:9–10). Confirmation is furnished by the prophet's ironic comparison of the Egyptians with a torpid crocodile, "They are a *rahab* who sits still" (30:7). This symbol was indeed so well understood that the Korahites could employ it, without comment, for Egypt as the companion power of Babylon (Ps 87:4).

Just as in the parallel figure of "leviathan," negative criticism seeks to discover in "Rahab" a belief in pagan mythology rather than recognizing its symbolic use by the inspired prophets and poets of the OT (IDB, IV, p. 6). The sea (Ps 89:9 [H 10]) is identified with a Canaanite water deity, *yam*, overcome by Yahweh at creation. *Rahab* is seen as the chaos monster Tiamat, crushed in primordial combat with, originally, Marduk, god of Babylon; and the "helpers of pride" (Job 9:13), with her eleven demonic deputies (*Enuma Elish*, I:105–7).

But all of these suggested connections and derivations fail to explain the complete absence in the OT of belief in the existence or reality of any of these mythological figures that are alluded to. If such figures are alluded to, they would be analogous to Milton's use of Greek mythological figures in *Paradise Lost*. Cf. Albright, YGC, pp. 183–193.

J.B.P.

2126 רָהָה (*rāhâ*) *fear* (Isa 44:8).

2127 רָהַט (*rahṭ*) **I. Assumed root of the following.**

2127a רָהַט (*rahaṭ*) *trough* (Gen 30:38, 41; Ex 2:16).

2128 רָהַט (*rahṭ*) **II. Assumed root of the following.**

2128a רָהַט (*rahaṭ*) *lock of hair* (Song 7:6).

2128b רָהִיט (*rāhîṭ*) *rafters, boards* (Song 1:17). Meaning dubious.

רָהִיט (*rāhîṭ*). See no. 2128b.

2129 רוּד (*rûd*) *wander, restlessly, roam* (e.g. Hos 12:1; Gen 27:40).

Derivative

2129a מְרוּד (*mārôd*) *restlessness, straying* (e.g. Lam 3:19; Isa 58:7).

2130 רָוָה (*rāwâ*) *be satiated, have one's fill*.

Derivatives

2130a רִי (*rî*) *moisture* (Job 37:11).

2130b רָוָה (*rāweh*) *watered, saturated*.

2130c רְוָיָה (*r'wâyâ*) *saturation*.

A purely Hebrew root, *rāwâ* occurs fourteen times in the prophetic and poetical books, but not once in the Pentateuch or historical portions of the OT. It is used three times in the Qal stem: Jer 46:10, "The sword shall devour and be sated (*rāwâ*)"; Ps 36:9, "They are abundantly satiated"; Prov 7:18, "Come! let us be sated with love until morning." The Piel, in one aspect of the stem of *rāwâ* occurs twice, but only in Isa 34:5, 7, "My sword has been satiated in heaven," and "their land shall be satiated with blood." The causative sense of the Piel is foremost in four other passages: Isa 16:9, "I cause you to be sated with my tears." *rsv* "drench you with my tears" looses something of the Piel force. The other texts are Jer 31:14; Ps 65:11; Prov 5:19. The Hiphil form is used in four passages: Isa 43:24, "Nor have you caused me to be satisfied"; Isa 55:10; Jer 31:25; Lam 3:15. In a difficult passage (Prov 11:25) the infrequently used Hophal stem of the root *rāwâ* and the participle formed from the root both appear. *KJV* reads, "The liberal soul shall be made fat; and he that watereth shall be watered also himself." *rsv* offers little improvement with, "A liberal man will be enriched, and one who waters will himself be watered." The more precise translation is "The soul that blesses shall be made rich, he that satisfies abundantly shall also be satisfied himself."

rî. Moisture, waters. This obscure word is found only once in the OT. There is some confusion as to its origin which appears to be the verbal root *rāwâ*. Specifically, this is the apocopated or contracted form of the singular noun *r'wî* (Job 37:11), "Yea he ladeth the thick cloud with moisture." It may occur in one other passage (Ps 104:13, with, however, a change of the text).

rāweh. Watered, saturated. An adjective which occurs three times in the OT. The usage is purely figurative in all cases. "I shall have peace even though I walk with a stubborn heart, that the watered will be swept away with the parched" (Deut 29:19 [H 18]); "And thou shalt be like a watered garden" (Isa 58:11); "Their life shall be as a watered garden" (Jer 31:12).

r'wâyâ. Saturation. This noun is formed from the Hiphil stem of the root *rāwâ*. *r'wâyâ*, used in highly poetic contexts, occurs in only two passages in the Psalms. They are both poetic passages that are well known in the *KJV* form, even though that reading obscures some of the nuances of the Hebrew. A literal translation is,

2131 *רִיחַ (*riah*)

“You have anointed my head with unguent, filled my cup to saturation” (Ps 23:5); “But thou did bring us to saturation” (Ps 66:12).

W.W.

רִיחַ (*riah*). See no. 2131a.

2131 *רִיחַ (*riah*) *smell, scent, accept*. Literally “breathe an odor.” This denominative verb occurs only in the Hiphil.

Parent Noun

2131a רִיחַ (*riah*) *wind, breath, mind*.

2131b רִיחַ (*riah*) *scent, fragrance, aroma*.

rûah. *Wind, breath, mind, spirit.* This noun occurs 387 times in the OT, usually feminine. Although some derive it from *rāwah*, “be spacious, be refreshed” (1 Sam 16:23; Job 32:20; Hiphil, *hēriah* “perceive by breathing an aeriform thing,” KB, p. 877, see below), it is best considered a primitive noun, related to an *ayin*-vowel root *rûh*, “to breathe” (BDB, p. 924); cf. *rēah* “odor”; Ugaritic *rh*.

The basic idea of *rûah* (Gr. *pneuma*) is “air in motion,” from air which cannot come between a crocodile’s scales (Job 41:16 [H 8]) to the blast of a storm (Isa 25:4; Hab 1:11 ASV, RSV). The “four winds,” *rûhôt*, describe the four quarters or four directions of the world (Jer 49:36; Ezk 37:9). In living beings the *rûah* is their breath, whether of animals (Gen 7:15; Ps 104:25, 29), men (Isa 42:5; Ezk 37:5), or both (Gen 7:22–23); whether inhaled (Jer 2:24) or on the lips (Isa 11:4; cf. Job 9:18; contrast dead idols, Jer 10:14; 51:17). God creates it: “The *rûah* “spirit” [s] of God (from God) is in my nostrils” (Job 27:3).

The connotations of breath include power (1 Kgs 10:5, where the Queen of Sheba had “no more *rûah*, i.e. she was “breathless,” overwhelmed), courage (Josh 2:11; 5:1, where the “spirit” of Israel’s enemies failed them), or value (Lam 4:20, where the Davidic king was “the breath of our nostrils,” or prized hope—a phrase borrowed from the common Egyptian *ṯwn fnd.sn* “the breath of their nose”). Yet false prophets become *rûah* “wind” because they lack the word (Jer 5:13), the connotation being emptiness, the futility of “mere breath” (Job 7:7; Isa 41:29). As a rush of air, a snort through one’s nose, *rûah* depicts emotions of aggressiveness (Isa 25:4) or anger (Jud 8:3; Prov 29:11, ASV, RSV). Ultimately breath signifies activity and life. One’s “spirit” is consumed when he is sick or faint (Job 17:1), but it comes back as a “second wind” and he “revives” (Jud 15:19; 1 Sam 30:12; cf. Gen 45:27). In God’s hand is the breath, *rûah*, of all mankind (Job 12:10; Isa 42:5). So Genesis 6:3 is best rendered, with the RSV, as “my spirit (the breath of life, from God) shall not abide [following LXX] in man forever, for he is flesh

(mortal), but his days (until the deluge) shall be a hundred and twenty years” (cf. Job 34:14–15). Yet the word *rûhî* elsewhere, when spoken by God, means “my spirit,” and the word rendered “abide” is much debated. E. Speiser argues for “shall not answer for man” or “shall not protect man” JBL 75:126–29.

The unique feature of human life is not, however, the physical but the spiritual, i.e. the mental and personal. The “breath” of man was bestowed by a special creative act of God (Gen 2:7; contrast the beasts in 1:24). But it is his inner being that reflects the image of God, formed by the counsel of the Trinity (“us,” 1:26) and sovereign over all other living things (2:20). Biblical Hebrew therefore speaks of things that come into your mind, i.e. *rûah* (Ezk 11:5; 20:32). Daniel’s Aramaic refers likewise to Nebuchadrezzar’s mind (ASV, spirit) being hardened (Dan 5:20). Even the physically oriented verb *riah* “to smell” (Gen 27:27), assumes figurative connotations. A thread is consumed when it “touches” (ASV, smelleth, Jud 16:9) the fire. It may also assume connotations of mental awareness, i.e. God will “accept” (ASV marg., smell, 1 Sam 26:19) a sacrifice. The goal, indeed, of OT sacrifice, to be a *rēah han-nihōah* “sweet savor,” a soothing aroma to God (Gen 8:21 NASB), points by symbol and type to the idea of the propitiating atonement through Christ. The noun *rûah*, further, depicts disposition of mind or attitude. Caleb’s spirit was different from that of his faithless colleagues (Num 14:24; cf. Sennacherib’s spirit, i.e. resolve in II Kgs 19:7 ASV). A person’s *rûah* may be sad (1 Kgs 21:5), overwhelmed (Ps 77:3 [H 4]), or contrite (Isa 57:15). It can be “cool” (restrained, Prov 17:27), jealous (Num 5:14), and either patient or proud (Eccl 7:8). People may be marked by a spirit of wisdom (Deut 34:9) or whoredom (Hos 4:12).

rûah comes finally to denote the entire immaterial consciousness of man: “With my spirit within me I will seek you earnestly” (Isa 26:9); a wise man “rules his spirit” (Prov 16:32; cf. Dan 5:20), and “in his spirit there is no guile” (Ps 32:2). While the OT generally treats man as a whole (see *nepeš* “soul,” often rendered simply as “self”), it also recognizes his essential dualism (A. B. Davidson, *The Theology of the OT*, p. 202). Flesh and spirit combine to form the “self,” so that while man may be said to have a *rûah* he is a *nepeš* (yet he is sometimes said to possess a *nepeš*, which departs from his body at death). The *rûah* is contained with its bodily *nidneh* “sheath” (Dan 7:15, Aramaic; cf. Zech 12:1). At death the body returns to dust, but the immortal spirit returns to God who gave it (Gen 3:19; Eccl 12:7). In this regard *rûah* and *nepeš*, here meaning distinctly “soul,” tend to overlap (Job 7:11; Isa 26:9; cf. Ex 6:9 with Num 21:4; RTWB, p. 234). This differs from liberal theology, which

tends to limit *rûah* to an impersonal vital power that becomes individualized only in the *nepesh*. Thus it claims that the soul cannot exist independently of the body, i.e. that when the *rûah* or "power" departs (Eccl 12:7), the person ceases to exist (L. Köhler, *Old Testament Theology*, p. 145, opposed by Davidson, op. cit., pp. 200–201). Yet both *nepesh* and *rûah* may leave the body at death and exist in a state separate from it (Gen 35:18; Ps 86:13; cf. 1 Kgs 17:22 on the rare case of a soul's return to its body).

On a higher plane, *rûah* may then designate a supernatural, angelic being, "a spirit from God" (1 Sam 16:23, NASB). The function may be revelatory (Job 4:16[?]; cf. Zech 1:9, 19 [H 1:9; 2:2], *mal'āk*, q.v.). Or, appropriately, God might have his angels serve as *rûhôt* "winds" (Ps 104:4, not "spirits"; Heb 1:7) or fire (cf. 1 Kgs 19:11–12). Satan is "the great, accusing spirit" (1 Kgs 22:21). Other evil spirits could fall upon men, as decreed by God (1 Sam 16:14; 18:10; 19:9).

The preeminent example of spiritual personality is God (Isa 31:3). *rûah* can exhibit a range of meaning. The "breath" of God may be a strong wind (Isa 40:7; 59:19; cf. Num 11:31). His "spirit" may indicate no more than active power or mood (Isa 40:13, "Who hath directed the spirit [intention] of the Lord?" or, "who has known the mind [intention] of the Lord," so LXX and 1 Cor 2:16). At most points, however, context approves and the analogy of the NT strongly suggests that the *rûah* YHWH is the Holy Spirit, "in the fullest Christian sense" (A. F. Kirkpatrick, *Cambridge Bible, Psalms*, II, p. 293). From the outset God's *rûah* moves upon the primeval waters (Gen 1:2), "like a hypostasis or person" (H. Schultz, *Old Testament*, II, p. 184); cf. his guiding presence, separate from that of both Yahweh and Moses, which the Lord "placed" upon the elders in the wilderness (Num 11:17, 25). David first designated him "Holy Spirit" (Ps 51:11 [H 13]; cf. Isa 63:10–11), and Isaiah, whether thinking of him as his own inspirer or as a fellow speaker, assumes his distinct personality when he says, quoting the Messiah, "The Lord hath sent me and his Spirit" (48:16).

The work of God's Spirit may be cosmic, whether in creation (Job 26:13) or in continuing providence (Job 33:4; Ps 104:30); redemptive, in regeneration (Ezk 11:19; 36:26–27); indwelling, to uphold and guide the believer (Neh 9:20; Ps 143:10; Hag 2:5); or infilling, for leadership (Num 11:25; Jud 6:34; 1 Sam 16:13), service (Num 11:17; Mic 3:8; Zech 7:12), or future empowering of the Messiah (Isa 11:2; 42:1; 61:1) and his people (Joel 2:28 [H 3:1]; Isa 32:15).

[Distinctions between *rûah* and *nepesh*: *rûah* is the principle of man's rational and immortal life, and possesses reason, will, and conscience. It imparts the divine image to man, and constitutes the animating dynamic which results in

man's *nepesh* as the subject of personal life. The distinctive personality of the individual inheres in his *nepesh*, the seat of his emotions and desires. *rûah* is life-power, having the ground of its vitality in itself; the *nepesh* has a more subjective and conditioned life. The NT seems to make a clear and substantive distinction between *pneuma* (*rûah*) and *psychē* (*nepesh*). G.L.A.]

2132 רָוַח (*rāwah*) *be wide, spacious* (e.g. 1 Sam 16:23; Job 32:20).

Derivatives

- 2132a רָוַח (*rewah*) *space, interval* (Gen 32:17), *respite, relief* (Est 4:14).
2132b רָוַחָה (*r'wāhā*) *respite, relief* (Lam 3:56; Ps 66:12).

רָוַיָּה (*r'wāyā*). See no. 2130c.

2133 רוּם (*rûm*) *be high, lofty; rise up*.

Derivatives

- 2133a רוּם (*rûm*), רוּם (*rûm*) *height, haughtiness*.
2133b רוּם (*rôm*) *on high, upwards*.
2133c רוּמָה (*rômā*) *proudly*.
2133d רוּמָה (*rāmā*) *height, high place*.
2133e רוּמוֹת (*rāmût*) *height, lofty stature*.
2133f רוּמָם (*rômām*) *praise*.
2133g רוּמְמוֹת (*rômēmût*) *uplifting, arising*.
2133h מְרוּם (*mārôm*) *height*.
2133i תְּרוּמָה (*t'rûmā*) *contribution*.
2133j תְּרוּמִיָּה (*t'rûmīyā*) *portion*.

Three broad groups of ideas are present in non-cultic usages of *rûm* and its derivatives: 1) literal height, 2) height as symbolic of positive notions such as glory and exaltation, 3) height as symbolic of negative notions such as arrogance and pride.

The Qal can have either a stative meaning, "being high," or it can signify movement, rising up. All three of the broad groups of meanings mentioned above are found. It refers to literal height speaking of the height of people (Deut 1:28), the height of stars (Job 22:12), and the literal rising up of the angels in Ezekiel's vision (Ezk 10:16) and the rising of the ark (Gen 7:17). The "high voice" is loud (Deut 27:14). "Rise up" is an idiom for "to appear" (Ex 16:20, lit. "worms rose up").

The OT uses several idioms which have positive meaning. The most frequent is the use of God's being high to represent God's rank ("May God be high," II Sam 22:47; Ps 18:46 [H 47]; cf. Ps 113:4; Isa 6:1). Superiority of wisdom over a fool is thus described (Prov 24:7). Deliverance is equated with the height of the delivered one's head (Ps 27:6, lit. "my head is higher than my enemies." Note, this verse is typically translated passively, "Be lifted up"). Relative height expresses relative political rank (Num 24:7). The "high hand" may symbolize victory (Num 33:3). God's high hand shows readiness to judge (Isa 26:11). The high horn once pictures joy (I Sam 2:1).

Negative idioms are the following: The high heart represents presumption (Deut 8:14) or pride (Ezk 31:10). Lofty eyes (Ps 131:1) and the high arm (Job 38:15) are also presumptuous. The "high ones" or the "haughty" (II Sam 22:28) is a poetic term for the wicked just as terms such as "afflicted" and "humble" describe the righteous.

Polal and Hiphil forms express causative counterparts to the above ideas. God can make men high in rank (i.e. "exalt" them, I Sam 2:7; I Kgs 16:2). Or men can exalt God in praising him (Ps 30:1; [H 2] 99:5). Other idioms include lifting the hand for an oath (Gen 14:22), lifting the face in prayer (Ezr 9:6), and setting up a building (Ezr 9:9). The voice may be lifted to cry for help (Gen 39:15), or the sound of musical instruments may be lifted up (II Chr 5:13). The Hiphil also serves as a technical term for presenting an offering, particularly the "heave offering."

Polal and Hophal forms express the passive of the above ideas. The Hithpolal occurs once, apparently with reflexive meaning, "to exalt oneself" (Dan 11:36).

rûm, rûm. *Height.* Once describes literal heights of the heavens in a poetic simile (Prov 25:3). Other usages are figurative; "height of eyes" (Prov 21:4; rsv, asv "haughty eyes"; Isa 10:12, rsv "haughty pride"), "height of men" (Isa 2:11, 17, rsv "pride of man") and "height of heart" (Jer 48:29, rsv "haughtiness of his heart"). All refer to pride or arrogance.

rôm. *On high, upwards* (Hab 3:10; but cf. KB).

rômâ. *Proudly, haughtily,* since an unfavorable connotation is demanded by the context (Mic 2:3). Feminine or locative of above term.

rômâm. *Praise.* One clear example translated "high praises" (Ps 149:6). One other example is probably a passive verbal form (i.e. Polal of *rûm*) and is translated "he was extolled" (Ps 66:17, AV, RSV; cf. BDB).

mârôm. *Height, elevated place, on high.* Often used adverbially meaning "on high" or "above." It includes the same general range of meanings as the verb. References to God's rank and position form the largest group of usages (e.g. II Sam 22:17; Ps 92:8 [H 9]). Literal height (Prov 9:3) and presumption (II Kgs 19:22, RSV "haughty") may also be attested. Motifs not already illustrated with the verb are the following: lifting the horn "on high" as a sign of rebellion (Ps 75:5 [H 6]) and being "on high" as symbolic of (hoped for) security (Hab 2:9).

t'rûmâ. *Contribution, offering, heave offering.* The usages of this term roughly parallel those of *t'nûpâ* (v. *nûp*) being used both as a general cultic term for various offerings and as a term for those parts of the offerings designated especially for the officiating priest. In general usage it denotes the following: materials contributed for the building of the tabernacle (Ex 25:2-3), contributions of the Persian king and others to rebuild the temple (Ezr 8:25), the half-shekel atonement money (Ex 30:13), the tithe of the tithe designated for the priests (Num 18:25-32), and the sacred precincts of Ezekiel's temple vision (Ezk 45:1, KJV "oblation"; NASB "allotment"). Gifts to idols (Isa 40:20) and the offering of war booty (Num 31:29) may also be thus designated. The usage of this term for the offering of a cake from the first of the meal of the land (Num 15:20) calls to mind the usage of *t'nûpâ* "wave offering," to refer to the sheaf of the Firstfruits.

As a term for sacrificial portions designated for the officiating priest, there are repeated references to the thigh of the "heave offering" (Lev 10:14-15; Num 6:20; KJV "shoulder" for "thigh"). In the ritual of the peace offering, the portion of the accompanying cereal offering assigned to the officiating priest is designated by this term (Lev 7:14; note *t'nûpâ* "wave offering," by contrast, never designates a non-meat priest's portion). It occurs, seemingly incidentally, in a passage forbidding relatives to eat of the priest's portion (Lev 22:12).

Probably, the term "heave offering," originally referred to the physical manipulation of the offering at the time it was given; but there are no biblical examples which clearly refer to such manipulation. The term had worn down until it simply meant "gift" or "offering" without implication as to how the gift was manipulated.

It occurs once in a non-cultic usage referring either to those who bribe with gifts or those who selfishly extort gifts (Prov 29:4; "men of gifts").

rûmîyâ. Portion (ASV "oblation"). Diminutive of *rûmâ* (above). Describes the holdings of Zadok in Ezekiel's restoration temple (Ezk 48:12).

Bibliography: THAT, II, pp. 753–60.

A.B.

רוֹמָם (*rômām*). See no. 2133f.

רוֹמְמוֹת (*rômēmût*). See no. 2133g.

- 2134 רוּן (*rûn*) **overcome** (Ps 78:65). Used only in Hithpoel. This form is taken by KJV as from *rānan* (q.v.).

- 2135 רוּץ (*rûa'*) **shout, raise a sound, cry out.**

Derivatives

2135a רָעַץ (*rēa'*) **shouting.**

2135b תְּרוּצָה (*t' rû'â*) **alarm, signal, sound of tempest.**

An unusual verb, although it occurs forty-two times throughout the OT, the most frequent usages are in Ps. The root is only developed in Hebrew, with a much later similar term appearing in medieval Judeo-Arabic.

The root and its few extensions occur only in the Hiphil stem, although the use of that normally intensive form does not influence the meanings. A number of different shades of meaning and a variety of senses are developed for the root in various OT passages. The primary meaning is "to raise a noise" by shouting or with an instrument, especially a horn (Num 10:7) or the traditional ram's horn, the "shofar" (Josh 6:5). It is used in this sense in rituals of the Israelite tabernacle (I Sam 4:5) to describe the exaltation of the people of Israel when the ark of the covenant was brought to the camp. Later in Israel's history in the First Commonwealth, the same root is used to describe the exaltation of the people when David brings the ark to Jerusalem. The poetic description of this in the Psalms (45:7) and the later glorification of the king at his enthronement by acclamation (I Sam 10:24) has been selected by some scholars as evidence of an enthronement ritual similar to that found in contemporary societies. However, there is no evidence to suggest such an interpretation for the root, *rûa'*. In fact, the usage in passages encouraging the praise of God by the whole earth (Isa 44:23) and the shout of victory over an enemy (Jer 50:15; Zeph 3:14) are more closely related. The poetic song of praise in Job 38:7 uses this root to describe the shout of joy given by the "sons of God," a controversial phrase referring to the faithful followers of the covenant. The root *rûa'*

is also used for cries of complaint and distress (Isa 15:4). However, the most common usage of all is in signals for war (Num 10:7) and war cries (Josh 6:10). As an extension of this last usage, it is also employed for shouts of alarm (I Sam 17:20) and encouragement, as in Psalm 95 and 98 in which it appears twice in each related context. This unusual word appears only three times in widely scattered locations (Ex 32:17; Job 36:33; Mic 4:9, "Now why do you shout aloud").

t'rû'â. Alarm, signal, sound of trumpet. This is a feminine noun formed from the root *rûa'*. It is a purely Hebrew formation and occurs thirty-six times in the OT, mostly in the singular. There are four distinct senses in which it is used. It is used for "signal" (Lev 25:9), the "sound of the trumpet" for the blowing of the *shofar* on the day of atonement. It is also used for "alarm" as in case of attack (Josh 6:5; Jer 4:19), "I hear the sound of the trumpet, the alarm of war." In addition, it is used for the trumpet in the tumult of the battle, "And Moab shall die amid uproar, amid shouting, and the sound of the trumpet" (Amos 2:2). Lastly, the noun is used for the exultation of praise to God, "Praise him with trumpet sound, praise him with lute and harp" (Ps 150:3).

W.W.

- 2136 רוּץ (*rûp*). **Assumed root of the following.**

2136a תְּרוּצָה (*t' rûpâ*) **healing** (Ezk 47:12).

- 2137 רוּץ (*rûṣ*) **run.**

Derivatives

2137a מְרוּץ (*mērôṣ*) **running, race** (Eccl 9:11).

2137b מְרוּצָה (*m' rûṣâ*) **running** (II Sam 18:27), course of life (Jer 8:6).

The root *rûṣ* is that of the common Hebrew word meaning "to run," "make haste by running." It occurs over seventy-five times in the OT and frequently in postbiblical Hebrew. Although the root is philologically cognate to Akkadian *râsu*, the two terms underwent separate semantic development, the Akkadian term meaning to "help," a meaning only remotely attached to the Hebrew root. The greater number of occurrences of *rûṣ* are found in Gen and I–II Samuel. The root tends to be used less often in the prophetic and later historical books. Throughout the Pentateuch the word is used to describe the running of human beings, usually men (Gen 18:27; 24:17) and occasionally women (Gen 24:20). The Akkadian cognate is rarely applied to animals or inanimate objects and the same is true of the Hebrew root. Although horses are mentioned in the early history of Israel, the root, *rûṣ* is not used to describe the running of horses until Joel 2:4.

2138 רוּשׁ (*rûsh*)

There are a number of different types and modes of running described by this root. There is the running to greet a stranger and make ready the welcome (Gen 18:2, 7); the running of excitement (Gen 24:28); running in terror (Jud 7:21); running to bring news (II Sam 18:22); and the running of an official, ritual nature (I Kgs 1:5). In most usages a preposition is used to indicate the place from which or place to which the action takes place. The precise direction of the action is indicated with the following prepositions: "against," Hebrew 'al (Job 16:14); "away from," Hebrew *min* (I Sam 4:12); "before," Hebrew *lipnê* (I Sam 8:11); "behind," Hebrew 'ahârê (I Kgs 19:20); "far" Hebrew prefix *l-* (Hag 1:9); "to," Hebrew prefix 'el- (Gen 24:20; Num 17:12); "towards," Hebrew *liqra't* (Gen 18:2); and "upon," Hebrew prefix 'ad- (II Kgs 4:22). Several special meanings of the root are also found. One is the Hiphil stem of *rûš* which connotes the meaning, "To run (bring) quickly" (Gen 41:14), KJV "brought him hastily." rsv and JPS read the same. Another special usage appears only once in the OT. The Pilpel stem of *rûš* in Nah 2:5 describes the chariots of an army which "run back and forth" like lightning.

W.W.

2138 רוּשׁ (*rûsh*), רִישׁ (*rîsh*) *be poor*.

Derivatives

- 2138a רִישׁ (*rêsh*), רֵאשׁ (*rê'sh*), *poverty*.
2138b רִישׁ (*rîsh*) *poverty* (occurs only in Prov).

This root implies destitution. It occurs thirty-two times. Orthographically it displays the frequent insertion of the vowel letter *aleph* (GKC, sec. 23g). There may be a connection with Ugaritic *rsh*, I Kgs 10, 22 (cf. AisWUS no. 2545 "destroy," *zerstören*).

The root refers to the condition common to the lower class. David uses it in describing his unworthiness to marry Michal (I Sam 18:23), and Nathan uses it in his classical parable (II Sam 12:1ff.).

2139 רָזָה (*rāzā*) *be(come) lean* (Zeph 2:11; Isa 17:4).

Derivatives

- 2139a רָזָה (*rāzeh*) *lean* (Ezk 24:20; Num 13:20).
2139b רָזִי (*rāzî*) *leanness, wasting* (Isa 24:16).
2139c רָזוֹן (*rāzôn*) *leanness* (Isa 10:16), *wasting* (Ps 106:15), *scantness* (Mic 6:10).

רָזוֹן (*rāzôn*). See nos. 2139c, 2142a.

2140 רָזַח (*rzh*). Assumed root of the following.

- 2140a מָרְזָח (*marzēah*) *cry* (Jer 15:12; Amos 6:7).

רָזִי (*rāzî*). See no. 2139b.

- 2141 רָזַם (*rāzam*) *wink, flash* (of eyes, Job 15:12).

- 2142 רָזַן (*rāzan*) *be weighty, judicious, commanding* (e.g. Jud 5:3; Hab 1:10).

Derivative

- 2142a רָזוֹן (*rāzôn*) *potentate* (Prov 14:28).

- 2143 רָהַב (*rāhab*) *be wide*.

Derivatives

- 2143a רָחַב (*rahab*) *breadth, broad expanse* (Job 36:16; 38:18).
2143b רֹחַב (*rōhab*) *breadth, expanse, width*.
2143c רָחַב (*rāhāb*) *broad, wide*.
2143d רְחֹב (*r'hōb*) *open place*.
2143e מְרָחַב (*merhāb*) *broad, roomy place* (Hos 4:16; Ps 31:9).

An important West Semitic root, *rāhab* occurs in a most incisive Canaanite gloss in Amarna letter 162.41 showing that it was used in common parlance in Palestine c. 1370 B.C. It is found in Ugaritic, *rhb*, and later Semitic dialects and is cognate to Akkadian *rēhu*. *rāhab* appears over twenty times in the OT. A number of derivative forms of *rāhab* are also found and the precise differentiation between them has been confused in the versions.

The root is used in two completely different semantic extensions. The term is used to describe the breadth or expanse of land or the width of an object. The root often occurs in descriptions of the spaciousness of the land of Canaan (Gen 26:22). It is the root of the place name, Rehoboth in the same context. It is repeated in reaffirmations of the extent of Israel's promised inheritance both during and after the conquest of Canaan (Ex 34:24; Deut 12:20; Isa 54:2). The term also describes architectural features of the heavenly temple in prophetic vision (Ezk 41:7). However, its most frequent occurrence is in psychologically revealing phrases involving parts of the body or bodily attributes. These phrases are completely colloquial and defy literal translation. The root *rāhab* appears with the following nouns in colloquial phrases: "mouth" (I Sam 2:1; Ps 35:21; 81:11; Isa 57:4); "heart" (Ps 119:32; Isa 60:5); "troubles of the heart" (Ps 25:17); "steps" (Ps 18:37); "nepesh" (Isa 57:8). Of special interest is the extremely obscure usage of *rāhab* in Ps 4:1 [H 2] read by KJV, "Thou hast enlarged me":

RSV, "Thou hast given me room"; JPS (v. 2), "Thou who didst set me free"; NIV "Give me relief." Since it is a colloquial expression practically defying translation, all these attempts are in a measure correct. In the view of the worldly-wise man, Prov uses the verb only once (18:16) to apply to the increase of "money." The term is one which has no single English equivalent, it may best be translated in all its colloquial usages as "made greater the effect of mouth, heart, etc." Although this is a clumsy translation it brings some semblance of the original Semitic flavor to all passages wherein it occurs.

rōḥab. *Breadth, expanse, width.* The masculine noun formed from the root, *rāḥab*, is used nearly one hundred times in the OT, thirtyseven times in Ezk 40–43, 45, 46, 48. It appears initially in Gen 6:15, KJV "breadth," which is the translation of the root in both KJV and RSV in some seventy-two occurrences. In twenty-two occurrences KJV reads "broad" (Ex 27:1). This is the translation followed in fifteen of the Ezk usages. None of the other versions are any more consistent. In a few occurrences the KJV diverges from these two regular meanings of *rōḥab*. In two passages the KJV reads "thickness" (Ezk 41:9; 42:10). In the latter passage the RSV supplies an acceptable paraphrase, "Where the outside wall begins." In the single passage (I Kgs 4:29) KJV translates "largeness of heart." RSV incorrectly supplies "largeness of mind." The word is fairly easy to understand in its many contexts.

rāḥāb. *Broad, wide, large.* This adjective appears twenty-one times in the OT and modifies many different subjects. The promised land of Palestine is said to be "broad" (Ex 3:8). In comparison to God's knowledge, the sea is not "so wide" (Job 11:9). In another image, the breach made by an invading army is said to be "wide" (Job 30:14). The word also describes the breadth of God's commands (Ps 119:96) and the height of human arrogance (Ps 101:5).

r'hōb. *Open place.* A noun developed from *rāḥab* and cognate to Ugaritic *rhb*, Akkadian *rê-bītu*. It is used in a slightly variant form, *r'hōb* without the *waw*. In all, it occurs forty-two times in all sections of the OT. The initial usage appears in Gen 19:2 in the angelic visitation to Lot in Sodom, KJV, RSV "street," JPS "broad place," but better translated, "open area." The term is always used of a square, market place, or pasture within a town or village (Neh 8:1). These "squares" were public areas and were unfortunately used for idol shrines in the time of Israel's apostasy (Ezk 16:24, 31), but they are to be distinguished from the broad area at the city gates where public business was done and courts operated.

W.W.

2144 רָחַה (*rhh*). **Assumed root of the following.**

2144a רָחָה (*rēheh*) *handmill*. Occurs only in the dual, *rēhayim*.

רָחֹב (*r'hōb*). See no. 2143d.

רָחֻם (*rahūm*). See no. 2146c.

2145 רָחַל (*rhl*). **Assumed root of the following.**

2145a רָחֵלָה (*rāḥēl*) *ewe*.

This very ancient feminine noun is cognate to Akkadian *lahru*, but underwent metathesis or transposition, a not uncommon phenomenon in words with both "r" and "l." It occurs four times in the OT (Gen 31:38; 32:15; Song 6:6). Its most important occurrence is in Isa 53:7 in the great prophecy of the atonement, "As a sheep (*rāḥēl*) before her shearers is dumb, so he opened not his mouth." This is the root of the feminine name Rachel (*rāḥēl*).

W.W.

2146 רָחַם (*rāḥam*) *I, love deeply; have mercy, be compassionate*. Denominative verb.

Parent Noun

2146a רָחֵם (*reḥem*), רָחַם (*rahām*) *womb*.

2146b רַחֲמִים (*rahāmīm*) *tender mercy*.

2146c רָחוּם (*rahūm*) *compassionate*.

2146d רַחֲמָנִי (*rahāmānī*) *compassionate women* (Lam 4:10).

This root refers to deep love (usually of a "superior" for an "inferior") rooted in some "natural" bond. In the Piel it is used for the deep inward feeling we know variously as compassion, pity, mercy. Probably *rāḥam* is related to Akkadian *rēmu* (cf. Ugaritic *rhm*, G. Schmuttermayr, "RHM — Eine lexikalische Studie," *Bib* 51:499ff.). This root is to be distinguished in emphasis from *ḥūs* and *ḥāmal*. Sometimes *ḥānēn* is rendered "mercy" with emphasis on the graciousness with which such is extended. This verb and its derivatives occur 133 times.

rāḥam is used infrequently (twelve of forty-seven times) of men. It is used only once in the Qal when the Psalmist confesses his love for Jehovah (18:1 [H 2]). The depth of this love is shown by the connection of this word with *reḥem/rahām*. Compare. Isaiah (49:15) who uses it of a mother's love toward her nursing baby. It can also refer to a father's love (Ps 103:13). Apparently, this verb connotes the feeling of mercy which men have for each other by virtue of the fact that they are human beings (Jer 50:42) and which is most easily prompted by small babies (Isa 13:18) or other helpless people. It is this natural mercy for the helpless that Israel's and Babylon's enemies will lack in their cruelty (Isa 13:18; Jer 6:23), although God may give Israel's enemies such feeling (compassion) (I

Kgs 8:50; Jer 42:12). Indeed, the prophets (Isa 13:18) conjoin *hūs* (the feeling which flows from one to another), *hāmāl* (the strength of feeling which leads one to action in behalf of another, i.e. to spare them some difficulty), and *rāham* (the deep inner feeling based on some "natural" bond) when describing what Babylon (Jer 21:7) and God (Jer 13:14) will lack toward Israel.

This root is frequently used of God. It incorporates two concepts: first, the strong tie God has with those whom he has called as his children (Ps 103:13). God looks upon his own as a father looks upon his children; he has pity on them (cf. Mic 7:17). The second concept is that of God's unconditioned choice (*hānēn*, grace). God tells Moses that he is gracious and merciful to whomever he chooses (Ex 33:19).

There are several ideas attached to God's deep, tender love: first, the unconditional election of God (Ex 33:19); next, his mercy and forgiveness toward his people in the face of deserved judgment and upon the condition of their repentance (Deut 13:17 [H 18]); also, God's continuing mercy and grace in preserving his unrepentant people from judgment (II Kgs 13:23). Thus this attribute becomes the basis in part of an eschatological hope (cf. Isa 14:1; 49:13; 54:7; Jer 12:15; 33:26; Ezk 34:25; Mic 7:19; Zech 1:16). It is noteworthy that Deuteronomy (30:3) prophesies the exile because of Israel's sin, stipulating that repentance will meet with God's tender compassion. So we read of the withdrawal of God's mercy resulting in harsh judgment at the hands of Babylon (Isa 9:17 [H 16]; 27:11; Hos 2:4 [H 6]). During the exile Israel's leaders encouraged the people with God's electing love and tender-mercy (Lam 3:32), and led them in humbling themselves in repentance, calling upon God to reinstate his fatherlike compassion (Zech 1:12). The restitution of the father-son relationship and the return from the exile witnesses this accompanying loving care (Hos 2:23 [H 25]). Scripture makes it certain that the exile was brought by God and terminated by God (Ezk 39:25) according to his sovereign providence (Isa 30:18; cf. E. J. Young, *The Book of Isaiah*, II, p. 353f.). Finally, the prophets' message regarding the return from the exile opens onto a permanent state where the father-son relationship will never be broken (Hos 2:23 [H 25]; Isa 54:8, 10).

reḥem, raham. Womb, maiden. The latter usage occurs in Jud 5:30 and is attested in Ugaitic (49:II:27) where *brlt 'nt* (Maiden Anat) is called *rh̄m 'nt* (Maiden Anat) (UT 19: no. 2321). 19: no. 2321).

reḥem/raḥam is to be distinguished from *beten* "belly." (Cf. Jud 5:30 where *pars pro toto* it refers to a woman.) Hence *beten* and *reḥem/raḥam* are used as parallels only when speaking of conception and birth.

That *reḥem/raḥam* designates the womb is clear from passages like Jer 20:17 where the prophet bemoans his birth. He wishes that he had been slain in the womb and thus his mother's womb would always have been great. Job (10:18) says that had he not been brought forth from the womb, no eye would have seen him. Even clearer is God's analogy depicting his sovereign cutting of the flood waters of Noah's day which broke forth "as if it had issued out of the womb" (Job 38:8).

It is clear that birth and conception are controlled by God who opens (Gen 29:31) or closes (Gen 20:18) the womb at will (cf. Num 8:16 where "firstborn" is the one who opens the womb). Consequently, birth is not merely a product of natural law, but a blessing from God (Gen 49:25). The rebellious sinner, however, bears no children ("the womb shall forget him," Job 24:20) or is to be cursed with a miscarrying womb (Hos 9:14). Israel is to confess that having and keeping children is God's doing. They do this by setting apart all the firstborn (human or beast) to God. God is a covenant God who requires a "covering" or "atonement" (see *kippēr*), a blood sacrifice. Because of the blood, God passed over the firstborn of "believers" in Egypt. Hence all firstborn of those under the covenant belong to God and are to be sacrificed to him. He does direct, however, that children (and unclean animals) are to be redeemed (Num 18:15). He claims the Levites in their place (Num 3:12). Israel's idolaters recognized God's claim on their firstborn children but wrongly sacrificed them to him (Ezk 20:26).

All men (righteous and wicked) owe their birth to God and are responsible to serve him (Job 31:15). God's people Israel were recipients of his special care (election) from conception to death. He sustained them in all of life (Isa 46:3). God encourages them by reminding them of this during the affliction of the exile. God applies this principle to an individual when he tells Jeremiah (1:5) that before he was formed in the womb, he had designated and appointed him a prophet to the nations. David, a type of the Messiah, finds solace in this thought when he freely confesses his dependence on God since his birth (cast forth from the womb, Ps 22:10 [H 11]). This is also true of the Servant, the messianic King, whose every step reflected his dependence on the Father (cf. Isa 49:1). The elect are sustained by God from birth. It is their responsibility to confess and submit to that calling (Jer 1:5). God so works in life to bring them to that confession and submission (Isa 46:3, cf. 'ānā, III, "affliction"). Contrariwise, from birth the wicked are estranged from God and go astray (Ps 48:3 [H 4]).

rahāmim. Tender mercy, compassion. This word shows the link between *rāham*, "to have compassion" (Piel) and *reḥem/raḥam*, "womb,"

for *rahāmim* can refer to the seat of one's emotions (Gen 43:30) or the expression of one's deep emotion (I Kgs 3:26); cf. J. Pedersen, *Israel*, 1936, pp. 309, 525).

rahāmim recalls in various situations that God's tender-mercy is rooted in his free love and grace. Hence, God's punishment is more desirable than man's wrath (II Sam 24:14). God's mercy is often combined with his *hesed* "love," "kindness" and *hēn* "grace," "unmerited favor." God's anger and wrath are the opposite of his loving mercy (Deut 13:18; Zech 1:12; Ps 77:9). In times of captivity (esp. the exile, Dan 9:18) Israel is summoned to repentance on the grounds of God's fatherlike compassion (II Chr 30:9), and God responds (Isa 54:7). The Psalmist often beseeches God for expressions of his tendermercies to relieve his distress (Ps 51:1 [H 3]) or confesses that undeserved relief is due to God's tendermercies and grace (Ps 103:4). The eschaton is to witness God's unconditional and unbroken love and care (Hos 2:19 [H 21]); when Israel repents (Deut 30:3; Isa 55:7; Zech 12:10).

rahūm. *Compassionate, merciful.* This adjective is used only of God (with the possible exception of Ps 112:4) setting forth one of his attributes, i.e. what God gives forth in *rāham* he has in *rahūm*.

rahāmāni. *Compassionate.* This adjective describes the depth of feeling a mother's love can reach. Women who so loved their children boiled them for food during the siege by the Babylonians (Lam 4:10).

L.J.C.

2147 רָחַם (*rḥm*) II. Assumed root of the following.

2147a רָחַם (*rāḥām*) *carrion vulture* (Lev 11:18).

2147b רָחַמָה (*rāḥāmā*) *carrion vulture* (Deut 14:17).

רָחֲמִים (*rahāmim*). See no. 2146b.

רָחֲמָנִי (*rahāmāni*). See no. 2146d.

2148 רָחַף (*rāḥap*) I, *grow soft, relax* (Jer 23:9).

2149 רָחַף* (*rāḥap*) II, *hover*. This verb occurs only in the Piel (Gen 1:2; Deut 32:11).

2150 רָחַשׁ (*rāḥaš*) *wash*.

Derivatives

2150a רָחַשׁ (*raḥaš*) *washing* (Ps 60:10; 108:10).

2150b רָחַשׂה (*rahšâ*) *washing* (Song 4:2; 6:6).

This root refers to ritual washings and is cognate philologically, although not semantically to Akkadian *raḥašu* "to overflow," "to flood." It is cognate to Egyptian and Ugaritic *rḥš* with the same meaning. It is used over seventy-five times in the OT. The initial occurrence is Gen 18:4, with over fortyeight occurrences in the Pentateuch, twenty-six in Lev. Among the parts of the body ritually rinsed were: the face (Gen 43:31); the hands (Ex 30:19, 21); the body (Lev 17:16); the feet (Gen 18:4ff). In the Levitical rituals the flesh of sacrificial animals was washed (Lev 1:9 et al.). This washing would normally take a great deal of water and perhaps suggests that Solomon's great brazen sea was used as a reservoir for such water as well as for other rituals. Several interesting uses of the term appear in Song of Solomon giving details on Israelite cosmetology. The root *rāḥaš* describes the ritual foot washing (5:3) and an eye washing with milk (5:12). A similar usage of washing for romantic appeal appears in Ruth 3:3. But the much more serious use of the root is reserved for the notion of its representing the cleansing from sin (Isa 1:16; 4:4). It is this meaning which is carried throughout Ezk (16:4, 9; 23:40) and on into the NT in the baptism of John and of Jesus. The NT has a number of references to the OT practices (Jon 2:6; Mt 15:2; Heb 9:10 etc.).

[This frequent washing with water doubtless added to the general cleanliness of the ancient Israelites. It also was symbolic of the cleansing from sin as said above. There is also an interesting catena of verses suggesting that the water of baptism specifically symbolizes the Holy Spirit the agent of cleansing: Mk 1:8, the Spirit baptism foretold; Acts 1:5, the back reference by Christ; Acts 10:47, the performance of the outward ritual as a sign of the inward; and Acts 11:16, the back reference to the words of Christ in Acts 1:5. R.L.H.]

Bibliography: TDNT, IV, pp. 300–302.

W.W.

2151 רָחַק (*rāḥaq*) *be(come) far, distant; be removed*.

Derivatives

2151a רָחַק (*rāḥēq*) *removing, departing* (Ps 73:27).

2151b רָחֹק (*rāḥôq*), רָחוֹק (*rāḥôq*) *remote, far*.

2151c מֵרָחֹק (*merḥâq*) *distance*.

rāḥaq is a common Semitic verbal root which is cognate to Akkadian *rêqu* and Ugaritic *rḥq*. It is found in all later Semitic versions of the OT, such as Syriac *reḥaq* and Ethiopic *reheqa*. The mean-

ings vary with the stem in which the root appears. However, the variation follows the typical usage of Hebrew grammar. An important participle is also formed from the root *rāhaq* and appears throughout the OT.

The verb appears over fifty times in the text and occurs in every section of the Hebrew Bible and in all types of contexts. The primary meaning of the Qal stem expresses the state of a person or thing as being "far" from someone or something else. In many passages there is also the notion of "being too far" as if the person or object was unreachable (Deut 12:21), or too distant to be heeded (Gen 21:16). The root is given an ethical and religious connotation in such passages as Ex 23:7 where the Israelites are commanded to stay "far away" from wicked peoples and alien cults. The same root is used to describe the exile which resulted from Israel's disobedience (Jer 27:10; Mic 7:11). The verb thus describes Israel's removal from the land.

In some passages the root describes the parting or separation of two previously joined objects. One of the best known of such occurrences is in the difficult verse (Eccl 12:6), כָּנַן "be loosed," rsv "snapped" and adds the note, Syr Vg. Compare Gk: Hebrew is *removed*. While many scholars have emended the verb, it is unnecessary since it merely means, "be removed." In the prophets the word is developed to its fullest theological significance. Jeremiah uses it once only (2:5) to describe the state of those who have rejected God's law as "to go far from him." Isaiah gives the root *rāhaq* its most profound meaning in the five occurrences which appear. In the first usage (46:13), God's righteousness will not "be far," in the second (49:19) the enemies which had troubled Judah during her affliction shall be "far away" so as not to trouble her anymore. In the third usage (54:14) oppression itself shall be removed "far off." In the last two occurrences (59:9, 11), God's judgment is again in view and the root refers to the separation which sin causes to come between God and his people. In these five uses in Isaiah, the verb receives its ultimate meaning for the theology of the OT.

rāhōq, rahōq. *Remote, far.* This is the common Hebrew adjective meaning "far" and the masculine noun used for "distant." It appears over fifty times in the OT. Although the basic meaning varies little it does have a variety of applications. It is used to describe a distant country (Josh 9:6, 9), "We have come from a far country"; distant cities (Jer 48:24), "All the cities of the land of Moab, both far and near." It is also used of persons estranged from God (Jer 2:5), "What wrong did your fathers find in me (God) that they went far from me?" In a particularly imposing passage (Jer 23:23) this root and its antonym are set in stark contrast, "Am I God

nearby says the Lord, and not a God afar off?" *rāhōq* is also used for distance (Ex 2:4), "And his sister stood at a distance," and for time (Isa 22:11), "But you did not look to him who did it, nor have regard for him who planned it long ago."

merhāq. *Distance.* This is a participle formed from the root *rāhaq*. It does not occur in the Pentateuch and is found mostly in Isa and Jer. It is translated as "far" or "afar" by all of the versions in its fifteen occurrences. In some passages it means, "most remote," "furthestest." II Sam 15:17 is translated thus: "And tarried in a place that was far off" (KJV); "And they halted at the last house" (RSV); "And they tarried in Bethmerhak" (JPS). The preferred translation is, "They remained at the most remote place." The same meaning is in evidence in the prophetic vision of Isa 33:17, "Your eyes will see the king in his beauty, they will behold the most remote land."

Bibliography: THAT, II, pp. 768-70.

W.W.

2152 רָחַשׁ (*rāhash*) *keep moving, stir* (Ps 45:2).

Derivative

2152a מִרְחֶשֶׁת (*marheshet*) *stew pan*
(Lev 2:7; 7:9).

2153 רָחַת (*rahat*) *winnowing shovel* (Isa 30:24).

2154 רָטֵב (*rātēb*) *be moist* (Job 24:8).

Derivative

2154a רָטֹב (*rātōb*) *moist, juicy, fresh*
(Job 8:16).

2155 רָטָה (*rātā*) *wring out* (Job 16:11).

2156 רָטַט (*rtt*). **Assumed root of the following.**

2156a רָטַט (*retet*) *trembling, panic* (Jer 24:49).

2157 רָטַשׁ (*rūtāpash*) *grow fresh* (Job 33:25).

2158 *רָטַשׁ (*rāṭash*) *dash to pieces*.

This unusual word appears only in the Piel and Pual stems. There are two occurrences of the Piel form, II Kgs 8:12, "Dash in pieces their children," and Isa 13:18, where כָּנַן, "Shall dash their young men to pieces" is to be much preferred to rsv, "Will destroy their young men." There are four usages of the Pual stem: Isa 13:16, "Their babies also shall be dashed"; Hos 10:14, "Mothers were dashed in pieces"; Hos 13:16 [H 14:1], "Babies shall be dashed in pieces"; and

Nah 3:10, "Young people will be dashed." The gruesome atrocity described by this root was common to ancient warfare. It was a punishment predicted by God for pagan nations and those who rejected the moral law and embraced pagan practices. The details of the action are not given in most of the texts, but in Isa 13:18 the instrument is said to be the bow. Apparently the word can mean just "slaughter" (Isa 13:18, RSV, NIV "strike down").

W.W.

רִי (*ri*). See no. 2130a.

2159 רִיב (*rib*) *strive, contend*.

Derivatives

- 2159a רִיבָה (*rib*) *strife, controversy*.
 2159b יָרִיב (*yārib*) *opponent, adversary*
 (Isa 49:25; Ps 35:1; Jer 18:19).
 2159c מִרִיבָה (*m'ribā*) *strife, contention*
 (Gen 13:8; Num 27:14).

This word is one of the few frequently used words middle *yod* (*ayin yod*) in the OT, the others being *din*, *shīt*, *gīl*, and *'it* (GKC, p. 73a). All appearances of *rib*, except two Hiphil participles (I Sam 2:10; Hos 4:4) used as nouns, are in the Qal stem. Many of these, however, have been identified as really shortened Hiphil forms (GKC, *ibid.*). Hence, some causative notion (as opposed to mere receptivity) may be expected to be present when this word appears.

1. To strive in the sense of physical combat is apparently primary. It may be of single combat between two men (Ex 21:18) or of contending groups (Deut 33:7; Jud 11:25, though the figure is of single combat). It is not surprising therefore that LXX, in ten of the approximately seventy occurrences of *rib*, renders by *machomai* (Hatch and Redpath, *Concordance to the LXX*) dependent middle and aorist pass., beginning at Gen 26:20, meaning "to fight," in physical combat between single men, men and beasts, or between armies (Liddell and Scott).

2. By an easy transition, the verb is employed for verbal combat, i.e. to quarrel, to chide one another, as Jacob with Laban (Gen 31:36) or the people with Moses (Ex 17:2, with *b'*; also with *'im* Gen 26:20; Neh 13:25). *'ēt* apparently in the sense of with, rather than as sign of direct object, is also sometimes used after this verb, as in Neh 5:7; 13:11, 17 and even with *'al* (Gen 26:21, 22). In the last case, the preposition may not designate the second contending party or parties but the matter of contention: "they strove" (*rābū*) "for that" (*'ālēhā*). Once the word means "to quarrel" and no object at all appears (Hos 4:4)—in negative command and parallel with *yākah* "to dispute, argue."

Some of these the LXX renders by *machomai*,

which has also the sense of verbal quarrelling, and others by *loidoreō* "to wrangle," "quarrel," "remonstrate angrily." This is an action severely reprimanded in the NT (I Cor 15:11; 6:10; I Tim 5:14; Mt 5:11, etc.; TWNT, IV, p. 293).

3. By another easy transition it takes on a legal-judicial significance and, strangely, usually with God as acting subject. Since God as creator is ruler of all, even his chidings have a judicial flavor, and BDB are not likely in error in placing many references where "chide" or "reprove" seem to be the best rendering in this category. Other verbs normally having to do with functions of civil magistrates are sometimes used in parallel with these occurrences of *rib*: e.g., *din* "rule," "judge" Isa 3:13; *qāṣap* "be angry." Sometimes, with accusative of person this word presents the Lord as acting as advocate (in parallel with *shāpat*, "judge") once to judge, once to vindicate and at least once to be a *din* "magistrate" (I Sam 24:15: the sense of "function as friendly magistrate" is clear here). On the other hand, the term also represents deity as an unfriendly civil officer (with accusative of person; Isa 27:8, in a context of great severity). God in friendly civil function is said to be the *gō'ēl* "redeemer" of Judah and Israel and the sense is enforced by absolute infinitive of *rib* (Jer 50:34). Similarly "plead thou my cause" *ribā/ribi* is parallel with *g'ālēnī*, which should be rendered "vindicate me" (cf. Job 19:25, ASV marg. on *gō'ālī*). God is also said to prosecute (*rib*, his own cause Ps 74:22) and to defend the righteous against ("from the hand of" *miyyad*) the wicked (I Sam 25:39).

In one clear case *rib* is used of human disputation in court (Prov 25:8; cf. context in 25:9). If there were contemporary records extant of ancient Israel's court proceedings or of speech about them, however, this word would surely be found. Its near restriction in the OT to use of the divine action, when civil functions are designated, is hard to explain.

It is worth noting that about a third of the appearances of *rib* (vb.) are in the LXX rendered by *krinō*, a word with prevalently legal-judicial overtones.

There has been much discussion in recent times of the *rib* motif as referring to the divine lawsuit against Israel for having broken the covenant. (Cf. H. B. Huffmon, "The Covenant Lawsuit and the Prophets," JBL 78:286-95. D. J. McCarthy gives a more balanced presentation in *Old Testament Covenant, a Survey of Current Opinion*, John Knox, 1972, pp. 38-40.) It is indeed true that the figure of God's "controversy" with Israel is couched in legal terms. But it may be doubted if the wording of the "lawsuit" is a necessary feature of the prophetic speech based on an appeal to a covenant form, or if it is a broader figure based on God's eternal relation of

love to his people (note the use in Hos 2:2 [H 4]; see further on *mishpāt*).

4. A single reference seems to require the sense of "lie in wait" or "set an ambush" (I Sam 15:5). For some reason BDB takes no notice at all of this occurrence, perhaps assigning the meaning "fight." But the LXX renders it by *enedrenō* "lie in wait," "plot against." This probably influenced KJV "laid wait" and KJV in turn ASV "laid wait," which meaning is not rejected by NASB "set an ambush." Even RSV, not overly awed by traditional renderings, has "lay in wait." The context almost certainly rules in favor of these common renderings against Gesenius and all his revisers to the present. It is a special kind of *hapax legomenon*.

5. Three times *rib* has the connotation of "to complain" (BDB). In these cases the special modification of "quarrel" is indicated by use of 'el also, to indicate the one to whom (Jud 21:22 "to complain unto us") or against whom complaints are made (Jer 2:29; 12:1; Job 33:13). A check of LXX reveals *krinesthai pros hēmas* Jud 21:22; *laleite pros me* Jer 2:29; *apolougēsomai pros se* Jer 12:1, indicating that this sense "complain" was understood to be one of the genuine, if rare, senses of *rib* in ancient times.

rib. *Strife, controversy, cause, etc.* This noun, whether cognate or derived, or if the verb is denominative, seems beyond our present knowledge. The noun has a similar range of translations to the verb.

In poetic parallel it appears with words for justification, pleading a cause, chastisement, punishment. Psalm 43:1 is striking in this regard and merits full examination by the expositor. Interestingly *rib* "strife," is in contrast with *shalwā* "quietness" (Prov 17:1).

rib is one of the rather large number of Hebrew words which must be examined by anyone wishing to construct a biblical theology of government.

Bibliography: For references to the considerable treatment of the *rib* motif in current critical thought, see Huffmon, H. B., "The Covenant Lawsuit in the Prophets," JBL, 78:285–95. Limburg, J., "The Root *RIB* and the Prophetic Lawsuit speeches," JBL 88:291–304. Westermann, Claus, *Basic Forms of Prophetic Speech*, Westminster, 1967, especially pp. 199–201.

R.D.C.

2160 ריף (ryp). Assumed root of the following.

2160a רִיקָה (*ripā*) a grain or fruit (II Sam 17:19; Prov 27:22). Meaning uncertain.

2161 *רִיקָ (riq) make empty, empty out (Hiphil only).

Derivatives

2161a רִיקָ (rêq) empty, vain.

2161b רִיקָ (riq) empty, idle, vain.

2161c רִיקָם (rêqām) vainly, emptily.

riq is used a few times literally of emptying vessels, sacks, etc. More often it is used in the extended meaning of drawing a sword (emptying the scabbard?). In Ps 35:3 it refers to drawing the spear; in Gen 14:14 to leading out troops.

rêq. *Empty, vain.* An adjective formed from the verbal root, it appears fourteen times in the OT. The initial use is Gen 37:24, "The pit was empty, there was no water in it." The adjective is also used of unfulfilled desires (Isa 29:8), "But he wakes and his soul is empty." *rêq* means "vain," "worthless" in some passages (Prov 12:11; 28:19), "He who follows worthless goals (*rêq*) will have plenty of poverty."

riq. *Empty, idle, vain.* This noun developed from a root cognate to Akkadian *rêqu*. The noun, *riq*, appears twelve times in the OT. The initial occurrence is Lev 26:16, "Sow your seed in vain." However, it more often means "empty" (Isa 30:7). It is used repeatedly to describe the vanity of human plans and efforts in the face of God's will (Ps 2:1). In Eccl the word used for "vanity, meaninglessness" is *hebel*, not *riq*.

rêqām. *Vainly, emptily.* This adverb appears sixteen times in the OT. The initial usage is found in Gen 31:42, "Surely now you would have sent me away emptily." The adverb is also used in the sense of "not fulfilled," "unsuccessful" (II Sam 1:22). "And the sword of Saul did not return unsuccessfully." Two specialized meanings are also developed, "without family" (Ruth 1:21), "I went away full and the Lord has brought me back empty"; and "without reason" (Ps 7:5), "If I have repaid my friend with evil, or plundered my enemy without reason." The sense "in vain" (Jer 50:9) is rare, being left more to *hinnām* (q.v.), the meaning "without cause" is found only twice (Ps 7:4 [H 5] and 25:3).

W.W.

רִיקָם (rêqām). See no. 2161c.

2162 רִיר (rîr) flow (like slime; Lev 15:3).

Derivative

2162a רִיר (rîr) slime juice, spittle (I Sam 21:14).

רִישׁ (*rish*), רִישׁ (*rêsh*). See nos. 2138a,b.

רָק (rak), רֹק (rök). See nos. 2164a,b.

2163 רָקַב (rākab) mount and ride, ride.

Derivatives

- 2163a רֶכֶב (*rekeb*) *chariot, chariotry*.
 2163b רִכְבָּה (*rikbā*) *act of riding*.
 2163c רֶכָב (*rakkāb*) *driver, charioteer*.
 2163d רִכּוּב (*r'kūb*) *chariot*.
 2163e מֶרְכָב (*merkāb*) *chariot*.
 2163f מֶרְכָבָה (*merkābā*) *chariot*.

rkb is a widely used verbal root cognate to both Ugaritic *rkb* and Akkadian *rakābu* from which the Hebrew may have derived the term. *rākab* appears seventy-five times in the OT, in both the Qal and Hiphil stems.

The initial occurrence of the verb is found in Gen 24:61, "And they (women) rode upon the camels." However, the verb is also used for riding upon asses (I Sam 25:42), mules (II Sam 13:29), and chariots (I Kgs 18:45). The term is not used of horses until the later prophetic books (Zech 1:8) because apparently they were not used for riding in Israel until late into the commonwealth period. There is little difference in meaning involved with the usage of the Hiphil stem (Gen 41:43; Deut 32:13, et al.). There has been some interest in the possible parallel usage of *rākab* in the sense of "riding on a cloud" or "riding on the clouds" (Isa 19:1), "Behold, the Lord rides upon a swift cloud." Cf. Ps 104:3 and certain passages from the Ugaritic poetic mythology where Ba'al is titled *rkb* 'rpt, "Rider of the clouds (UT 19: no. 1924)." Careful comparison of the two usages will demonstrate that although similar literary allusions are employed no dependency can be established.

rekeb. *Chariot.* A masculine noun, the common term for a horsedrawn vehicle used for warfare and royal travel. It appears over 120 times in the OT. Archeological evidence suggests Mesopotamia as the origin of the chariot, and it is highly possible that the term *rekeb* also originated in Mesopotamia. The verbal root of *rekeb* is *rākab*, which is cognate to Akkadian *rakābu*. The participial form of the Akkadian verb, *narkabtu* is the most common term for chariot. The Hebrew form of that word is *merkābā*. So then, both Hebrew terms are derived from the same root. The chariots mentioned in the Pentateuch in the Joseph narratives (Gen 41:13; 46:29; 50:9) are all Egyptian in origin. It appears that the Hyksos introduced chariot warfare into Syria and Egypt about 1600 B.C. The great destruction of Egyptian chariots at the Red Sea (Ex 14:9, 17-18, 23, 26; 15:19) is accounted as a signal act of God's salvation. When Joshua led the Israelites through Canaan they fought a powerful chariot force at Hazor (Josh 11:4). The Israelites kept largely to the hill country and away from the great royal highway along the sea coast, due in great measure to their lack of chariots. Naphtali and Zebu-

lun defeated Sisera and his nine hundred chariots near Mount Tabor (Jud 4:3). There is no doubt that it was David who introduced chariot forces to the armies of Israel (II Sam 8:4; I Chr 18:14). The chariot, *rekeb*, is used as a symbol of God's majesty and judgment (Ps 68:17 [H 18]). One of the uses of the term is in the descriptions of the fiery chariots which bore Elijah (II Kgs 2:11) and protected Elisha (II Kgs 6:17). Elisha is compared in his prophetic strength to "Israel's chariots and horsemen" (II Kgs 13:14). The word, *rekeb* is also used of the upper millstone probably in some sense that it was pulled by horses (Deut 24:6; Jud 9:53; II Sam 11:21), or possibly that it was the "rider," really *rōkēb*.

[In Hebrew often a collective noun has a corresponding feminine form used for individual items—the *nomen unitatis*. In line with this, *rekeb* more usually is collective "chariotry," the feminine noun *merkābā* is more usually the individual chariot. R.L.H.]

rikbā. *Riding.* A very rare and poetic noun, *rikbā* appears only in Ezk 27:20, "Dedan traded with you in saddle blankets for riding."

rakkāb. *Driver, charioteer.* This masculine noun is a technical term, semantically equivalent to its Akkadian cognate *rakibu*. It appears twice only, in I Kgs 22:34, "Therefore he said to his charioteer"; and in II Chr 18:33, the parallel passage. Some authorities locate this noun in II Kgs 9:17, "Summon a charioteer to go and meet them." However none of the versions accept this reading, all translate "rider."

r'kūb. *Chariot.* A rare noun found only in Ps 104:3, "Who makes the clouds your chariot." This expression also occurs in Ugaritic religious poetry, although there is no necessary connection between the Hebrew and Canaanite usage, the rarity of this form of the common word for chariot suggests that it is an expression limited to the needs of poetry.

merkābā. *Chariot.* This is a loan word from Ugaritic, which in turn is an Egyptianized form of the regular Akkadian participle *narkabtu*, literally, "a conveyance" or "chariot." While all of the Pentateuchal references are to foreign nations and their chariots (Gen 41:43; Ex 14:25 et al.) the historical references in the later books are to chariots bought or bartered for use in Israel. They were a royal province (I Kgs 12:18; 20:33; 22:35 et al.). They were used as symbols of royal prestige (I Sam 8:11) and in rituals to pagan deities (II Kgs 23:11). This root was also used as a place name (Josh 19:5; part of the land allotted to Simeon; I Chr 4:31), "Beth-mercaboth" or the "House of chariots."

2164 רַכַּךְ (*rākak*)

Personnel of Ugarit, JNES 24:17–27. THAT, II, pp. 777–80.

W.W.

רָכֹב (*r" kūb*). See no. 2163d.

רָכֹשׁ (*r" kūsh*). See no. 2167b.

רָכִיל (*rākil*). See no. 2165b.

2164 רַכַּךְ (*rākak*) *be tender, soft*.

Derivatives

2164a רָךְ (*rak*) *tender, soft, delicate*.

2164b רֶךְ (*rök*) *tenderness, delicacy* (Deut 28:56).

2164c מְרֶכֶךְ (*mōrek*) *weakness* (Lev 26:36).

A word found also in Ugaritic *rk*, *rākak* appears six times in the Qal stem. The initial occurrence is found in Deut 20:3, "Do not weaken." KJV, "let not your hearts be faint." The confusion among the versions has resulted in at least four different terms being used: "be softer" (Ps 55:21 [H 22]); "be tender" (II Chr 13:7); "faint" (Isa 7:4); "mollified" (Isa 1:6 in the Pual form), all of which actually detract from the precise meaning of the text. The Hiphil stem appears once (Job 23:16), "God has made my heart weak." It is an unusual term but not foreign to the experience of all human life. The psychological notion of "weak resolve," which is the basic and underlying meaning is easily understood in all of the contexts in which it occurs.

rak. *Tender, soft, weak.* This adjective is found sixteen times throughout the OT. The initial usage is in Gen 18:7, "Abraham ran to the herd and took a good and tender calf." It is also used in a derogatory sense in Gen 29:17, "Leah's eyes were weak." This also applies to the character of individuals (Deut 28:54, of a man; Deut 28:56, of a woman) and of maidens in Isa 47:1, "O daughter of the Chaldeans, you shall no longer be called tender and delicate." *rak* is also applied to the speech in the sense of "soft words," "Will he make many supplications to you, or will he speak soft words to you" (Job 40:27).

W.W.

2165 רָכַל (*rākal*) *go about* (in trading, etc.).

Derivatives

2165a רֶכֶלֶה (*r" kūllā*) *traffic* (Ezk 28:5, 16, 18), *merchandise* (Ezk 26:12).

2165b רָכִיל (*rākil*) *slanderer*.

2165c מַרְכֶּלֶת (*markōlet*) *market place* (Ezk 27:24).

The participle *rōkēl*, used as a substantive, is found in later Hebrew only and probably derives from a foreign term for "merchant." It appears

primarily in Ezk 27 as the description of Tyre in the lamentation over that city (Ezk 27:3, 12–13, 15, 17, 20, 22, 23 ([twice], 24, also in 17:14). It is found in only three other passages (I Kgs 10:15; Song 3:6; Neh 3:31).

rākil. *Slanderer.* This obscure masculine noun is used only six times in the OT. The initial occurrence is in Lev 19:16, "Thou shalt not go up and down as a slanderer among thy people." The other usages are in Jer 6:28, 9:4 [H 3]; Ezk 22:9; Prov 11:13a; 20:19a. The meaning is invariant in all occurrences. The translation "talebearer" found in some cases in the KJV and "gossip" in some versions is too light as the contexts show.

W.W.

2166 רָכַם (*rākas*) *bind* (Ex 28:28; 39:21).

Derivatives

2166a רֶכֶם (*rekes*) *roughness, or bound up, impeded, i.e. the impassable, or mountain chain* (Isa 40:4). Meaning doubtful.

2166b רֶכֶם (*rōkes*) *band, league*.

2167 רָכַשׁ (*rākash*) *collect, gather property* (e.g. Gen 31:18; 36:6).

Derivatives

2167a רֶכֶשׁ (*rekesh*) *steeds* (Mic 1:13; I Kgs 5:8).

2167b רָכֹשׁ (*r" kūsh*) *property*.

r" kūsh. *Property, goods, supplies.* A noun developed from *rākash*, cognate to Akkadian *rakāsu/ruksu*, but semantic relationship is not clear. The word *r" kūsh* appears twenty-nine times in the OT and means the goods owned by an individual, not necessarily wages or what is owed. It is most similar to English, "worth" or "estate." The root appears only in Gen, Num, I–II Chr, Dan, and Ezr. It covers a wide variety of property including: movable possessions of all kinds (Gen 14:16, 21); cattle and other domestic animals (Gen 31:18); movable property besides cattle (Gen 46:6); supplies and stores (Dan 11:13, KJV, "much riches," RSV "abundant supplies"); baggage and impediments are included. One special meaning is the "spoil" or "booty" of war (II Chr 20:25; 21:14, 17; Dan 11:24, 28.) Although the root certainly includes weapons and armor it does not do so primarily or exclusively. The OT points up the fact that both the supply and deprivation of *r" kūshā* is at the will and pleasure of God.

W.W.

2168 רָמָה (*rāmā*) *I, cast, shoot* (Ex 15:1, 10; Jer 4:29).

2169 *רָמָה (*rāmā*) II, *beguile, deceive, mislead*.

Derivatives

2169a רָמְיָה (*r^mmiyā*) *slackening, deceit*.2169b מִרְמָה (*mirmā*) *deceit, treachery*.2169c תְּרֻמָּה (*tormā*) *treachery* (Jud 9:31).2169d תְּרֻמִּית (*tarmit*) *deceitfulness*.

This root is philologically though not semantically cognate to Akkadian *ramû*. It appears eight times in the OT, always in the Piel stem. The initial usage of the verb (Gen 29:25) is read "wherefore then hast thou beguiled me" by the versions, KJV, JPS, RSV, "Why then have you deceived me" is preferred. The translation "deceive" fits well the use of *rāmā* in most occurrences (Josh 9:22; I Sam 19:17; 28:12; II Sam 19:27; Prov 26:19; Lam 1:19). However in one passage the meaning is somewhat more difficult. In I Chr 12:17, David addresses the volunteers from Benjamin and Judah, "If you have come to betray me," the root *rāmā* with the Hebrew prepositional prefix "le-" is translated by all authorities as "betray." Although this is the single case in the whole OT it seems to be quite correct.

r^mmiyā. *Slackening, looseness, sloth, deceit, fraud*. There is a centuries-old controversy as to which of the variety of meanings is associated with which verbal root, and whether or not more than one verbal root is involved. BDB differentiates three separate roots for *rāmā*, KB and the rabbinical scholars differentiate two. KB is correct on the basis of the original Akkadian cognates. *r^mmiyā* "slackening," "looseness." "Sloth" is found in Jer 48:10; Hos 7:16; Ps 78:57; Prov 10:4; 12:24; 27; 19:15. "Sloth casts into a deep sleep" (Prov 19:15) derives from the *rāmā* which is cognate to Akkadian *ramû*, with "u" vowel meaning "to loose." *r^mmiyā* "deceit," "fraud" is found in Job 13:7; 27:4; Ps 32:2; 52:4; 120:2-3; Mic 6:12. "Your inhabitants speak lies, and their tongue is deceitful in their mouths," (Mic 6:12) is better taken from *rāmā* "beguile" which is cognate to Akkadian *ramû*, with "i" vowel meaning "to throw." (Although KB derives both nouns from the *rāmā* meaning "to loose"—we believe by mistake. There is no psychological connection or semantic relationship between the meanings of the two *r^mmiyā* forms—they simply became confused by reason of their identical sound and spelling.

mirmā. *Deceit, treachery*. This participle occurs nearly forty times in the OT with the most frequent usage in Ps. It initially appears in Gen 27:35, describing the swindle perpetrated on Esau by Jacob. It is used particularly of treacherous or deceitful speech (Gen 34:13; Ps 10:7; 17:1; 24:4 et al.). *mirmā* is also used of false weighted

scales which are said to be "falsifying the scales with deceit" (Amos 8:5). An interesting usage is found in Jer 9:6, "Heaping oppression upon oppression, and deceit upon deceit." The OT makes clear that deceitful speech is one of the most heinous offenses against God. The repetition of the root in Ps in assurances that the prayer and praise of the righteous is without deceit, reinforces the importance of truth toward the Lord.

tarmit. *Deceitfulness*. This feminine noun bears the abstract meaning of deceitfulness. The word occurs five times in the OT (Ps 119:118; Jer 8:5; 14:14; and 23:26 where it is the reading of the Qere; Zeph 3:13), "Neither shall a tongue of deceitfulness be found in their mouth" (Zeph 3:13).

W.W.

רִמָּה (*rimmā*). See no. 2175a.רָמָה (*rāmā*). See nos. 2033d, 2168, 2169.2170 רִמּוֹן (*rimmôn*) I, *pomegranate*.

This is a term of unknown but very ancient origin, cognate to Akkadian *armannu*, an aromatic tree and fruit, possibly the apricot. The pomegranate is mentioned throughout the OT both as an actual fruit (Num 13:23), one of the samples brought back by the twelve spies who went into Canaan, and also as an architectural and decorative motif (Ex 28:34; Jer 52:22 et al.). The frequent mention of the root *rimmôn* in Song of Solomon (4:3, 6, 7, 13; 6:11; 7:13; 8:2) has led to speculation as to its use in love potions, etc. Although this practice is widely attested from Egypt and Mesopotamia, there is no evidence for it among the Israelites.

W.W.

2171 רִמּוֹן (*rimmôn*) II, *Rimmon*.

The name of a Syrian deity known to the Babylonians as *Ramānu*, apparently a minor weather god or storm deity. The name appears only in II Kgs 5:18 in connection with the story of Naaman, the Aramaean. The interchange of attributes and divine names among the ancient near eastern cults is almost impossible to trace. This is especially true since many divine names were local or topical designations. There are a number of place names "Rimmon" in the OT. The fact is that when these towns were taken in conquest the local idols and cults were added to the pantheon of the invading culture. The name Rimmon appears in a number of theophoric names of Syrian kings—Tabrimmon, "Rimmon is good," and Hadadrimmon, "Rimmon will attack." [Or a combination of the two deities Hadad and Rimmon. R.L.H.] Although the name appears from a

2172 רָמַח (rōmah)

few obscure texts from the Hellenistic age, nothing else is known.

W.W.

רָמוּת (rāmūt). See no. 2133e.

2172 רָמַח (rōmah). *spear, lance* (e.g. Jud 5:8; Num 25:7). Derivation uncertain.

רָמִיָּה (r' miyā). See no. 2169a.

2173 רָמָה (rammāh) *mare* (Est 8:10). Meaning dubious.

2174 רָמַם (rāmōm) *I, be exalted* (e.g. Job 24:4; Ezk 10:15). A by-form of rūm.

2175 רָמַם (rāmam) *II, be rotten, breed maggots*. Denominative verb.

Parent Noun

2175a רִמְמָה (rimmā) *maggot*.

The verbal root is philologically, although not semantically cognate to Akkadian *ramāmu*. The root *rāmam* appears only once in the OT, in the special provision of manna for the Israelites during the Exodus (16:20), כִּי, "it bred worms," followed by all other versions.

rimmā. Maggot, worm of decay. This word occurs seven times in the OT, always in contexts describing decay (Ex 16:24) in food, or in the body (Job 7:5; Isa 14:11). The root appears also in Job (17:14; 21:26; 24:20) and in a special metaphorical usage, 25:6, where *rimmā* appears as the "A" word in a very clear parallel phrase, "How much less (pure) is man, that is a maggot (*rimmā*); and the son of man that is a worm."

W.W.

2176 רָמַס (rāmas) *trample*.

Derivative

2176a מִרְמָס (mirmās) *trampling place, trampling* (e.g. Mic 7:10; Ezk 34:19).

This purely Hebrew verbal root occurs in the historical and prophetic books, but not in the Pentateuch. *rāmas* appears eighteen times in the OT. It refers to the trampling down with the feet of a number of objects. The initial occurrence is found in II Kgs 7:12, "And the people trod upon him." The term also describes the trampling of: animals (Ps 91:13), "the young lion and the serpent you will trample under foot"; plants (II Kgs 14:9), "a wild beast of Lebanon passed by and trampled down the thistle"; grapes (Isa 63:3), "I have trodden the wine press alone—I trampled them in my fury"; the potter's clay (Isa 41:25),

"he shall trample on rulers as on mortar, as the potter treads clay." In both of these passages in Isa the emphasis is on God's judgment of wickedness and triumph over it. It is a strong figure. It is also used of the Psalmist's life (Ps 7:5 [H 6]), "Let him trample my life to the ground." In another passage (Dan 8:10) the prophet sees the horn which grows until "it grew great, even to the stars of heaven; and some of the host of the stars it cast down to the ground and trampled upon them." The root is used once in the Niphal stem (Isa 28:3), "The crown of pride of the drunkards of Ephraim shall be trampled under foot."

W.W.

2177 רָמַשׁ (rāmaś) *creep, walk on all fours*.

Derivative

2177a רִמְשָׁה (remeś) *creeping organism*.

The Hebrew verb which describes the locomotion of small animals, especially reptiles. It appears primarily in the account of creation (Gen 1:21, 26, 28, 30; 7:8, 14, 21; 8:12, 19; 9:2) and in the prohibitions against unclean foods (Lev 11:44, 46; 20:25) and other such catalogues of beasts (Deut 4:18). It appears in two poetic passages (Ps 69:35; 104:20) and one prophetic passage (Ezk 38:20), "All the creeping things that creep on the ground."

remeś. Creeping organisms. This masculine noun is one of the Hebrew classifiers of living creatures. It is apparently related to the Arabic *ramaša*, and to the Akkadian noun *namashtu* "creeping things." *remeś* is used sixteen times in the OT, of which nine occurrences are in the creation account (Gen 1:24, 25, 26; 6:7, 20; 7:14, 23; 8:19; 9:3), and the account of the flood. The root encompasses all smaller animals but seems to exclude the large grazing animals, whales, birds, and insects. The root is used of sea creatures (Ps 104:25), "There, the sea, great and wide, in which are living creatures (*remeś*) innumerable." The most interesting limitation of the term is that given in one of the few prose passages in which *remeś* appears (I Kgs 5:13). The wisdom of Solomon is described, "And he spake of trees, from the cedar of Lebanon to the hyssop that grows out of the wall; he spoke also of animals, and of birds, and of creeping organisms (*remeś*) and also of fishes." Another slightly variant differentiation appears in Ezk 38:20, "The fish of the sea, and the birds of the air, and the animals of the field, and all creeping things that creep upon the ground." On the basis of these latter two usages it appears that *remeś* means not only small mammals such as rodents but the small reptiles common in the gravel and rocks of Palestine. They are included in the collective statements as a small part of God's creation [This root overlaps

the root *shāraš* "swarm" with its noun *sheres* (q.v.) which כַּנַּף also translates "creeping things." But whereas *remeš* is used extensively in the Genesis accounts and not in the catalog of unclean things in Lev 11 (except for the verb *rāmaš* twice), *sheres* is used sparingly in Gen and twelve times out of the total fifteen times in Lev. Apparently the verb *rāmaš* emphasizes the scurrying of smaller four-footed mammals, whereas *shāraš* emphasizes the teeming multiplication of some aquatic creatures and insects. The usage of *sheres* in Lev 11 clearly includes insects ("going on all fours." כַּנַּף refers perhaps to the front four legs of insects not counting the springing hind legs) vv. 20–23; small crawling creatures (mouse, lizard, snail, etc.) vv. 29–31; things that glide or have many legs (snakes, spiders, caterpillars, etc.) vv. 41–44. All these small creatures multiply rapidly and as a class are scavengers, parasites, or are otherwise inedible. For a rationale of these laws of diet, cf. R. L. Harris, *Man—God's Eternal Creation*. R.L.H.]

W.W.

רֶן (*rōn*). See no. 2179a.2178. רָנָה (*rānā*) *rattle* (Job 39:23).רִנָּה (*rinnā*). See no. 2179c.2179. רָנָן (*rānan*) *cry out, shout for joy*.

Derivatives

2179a. רֶן (*rōn*) *ringing cry* (Ps 32:7).2179b. רִנָּנָה (*r' nānā*) *ringing cry*.2179c. רִנָּה (*rinnā*) *ringing cry*.2179d. רִנָּנִים (*r' nānim*) *birds of piercing cries* (Job 39:13).

rānan is a primary Hebrew root, not developed in the other Semitic languages, passing into medieval Judeo-Arabic. The root and its verbal noun appear over fifty times in the OT. The most frequent occurrences are in Isa and Ps, generally in poetic passages.

The initial use of *rānan* is in Lev 9:24 where the shout of jubilation is connected with a divinely appointed sacrifice. This usage of the term to describe the joy of Israel at God's saving acts is carried on throughout the OT. In all of the fourteen occurrences of *rānan* in Isaiah, it is the connotation of holy joy which is being celebrated by Israel's shouting (Isa 12:6). The cessation of such emotion is portrayed as one of the grimmest aspects of Moab's fall. There is little variation in meaning as the root appears in several different stems. The overwhelming respect of the verb is toward God. The one particularly difficult occurrence is found in Lam 2:19 where the specific form is similar to three other passages (Isa 54:1;

Zeph 3:14; Zech 2:14). The Lam context has in view the tribulation and desolation and the prophet exhorts the daughter of the city to "cry out." However in all other passages it is to praise God that the root *rānan* is used. Here it is to supplicate, not to jubilate, that the cry is raised. The unifying factor in this and all other usages is the fact that it is to God that the cry is raised. In Ps the root is developed to its fullest. *rānan* appears in parallel poetry with nearly every term for "joy," "rejoicing" and "praise" but not clearly in any strict grammatical relationships. [It also occurs a few times in parallel with *shir* "sing" (Ps 59:16 [H 17]) and *zamar* "sing" (Ps 98:4). The jubilation which is the main thrust of the root is elsewhere also in a context of music (II Chr 20:22, cf. v. 21), and singing may well be indicated. In many cases the jubilation could equally well be expressed in shouting or song—either would suit the context. The כַּנַּף translates by "sing" half the time. In any case, Israel's song would have been somewhat different from ours and perhaps more similar to jubilant shouting. R.L.H.] Generally, *rānan* is the "A" or initial term in most parallel pairs of terms. The frequent employment of the term indicates decisively that the highest mood of OT religion was joy.

r' nānā. *Cry of joy*. This noun appears in only four poetic passages (Ps 63:6; 100:2; Job 3:7; 20:5), "The joyful cry of the wicked is short."

rinnā. *Ringling cry, of joy or sorrow*. This is very likely a later development from the root *rānan* which occurs in the Pentateuch where this word, *rinnā*, is absent. Like the older form, *rinnā* may mean both cry of joy (Isa 14:7), "They break out in cries of joy"; and cries of lamentation (I Kgs 8:28), "Yet have regard to the prayer of thy servant and to his cry of sorrow." The root occurs most frequently in the poetic context of the psalms.

2182 רָסַס (*rss*) II. Assumed root of the following.

2182a רָסַס (*rāsīs*) II, *fragment* (Amos 6:11).

רָעַ (rē'a). See nos. 2135a, 2186a, 2187a.

רָע (*ra'*), רָעָ (rōa'). See nos. 2191a,b.

2183 רָעַב (*rā'ēb*) *be hungry, voracious*.

Derivatives

2183a רָעַבָּ (rā'āb) *hunger, famine*.

2183b רָעַבָּ (rā'ēb) *hungry*.

2183c רָעַבּוּ (r'ābôn) *hunger* (Gen 42:19, 33; Ps 37:19).

This is a Ugaritic root, *rgb*, which occurs in its Hebrew form nineteen times in the OT. A few of those occurrences may be ascribed to the adjectival form, this being a stative verb in which the third person masculine and the perfect participle are like the adjective. It is used in reference to human hunger in all instances and appears in several stems. In one passage (Deut 8:3) God is stated to be sovereign over hunger and in a magnificent parallel poetic statement (Prov 10:3) God is praised as the provider for the hungry, who upholds the righteous and their offspring. In Prov 19:15, hunger is seen as the result of sloth.

rā'āb. Hunger, famine. This standard word for hunger occurs over one hundred times in the OT. The greatest number of usages are in Gen 41–47, the story of Joseph and the famine, and in Jer in chapters dealing with the coming desolation of Jerusalem and other cities. In many passages it is made clear that abundance and famine are both under the providence of God (Ps 33:19), "That he may deliver their soul from death, and keep them alive in famine."

In ancient days, with food distribution and food preservation very limited, famine meant severe hardship or starvation for many. It is therefore repeatedly classed by Jeremiah with sword and pestilence as one of the three great judgments of God (e.g. Jer 29:17). Ezekiel sometimes adds a fourth, fierce beasts (Ezk 14:21). The most famous famine in Israel was that caused by the three seasons without rain in Elijah's day. Not until the famine was severe did the nation admit that it was the judgment of God rather than "very unusual weather." The greatest famine, according to Amos 8:11 will be the "famine of hearing the words of the Lord."

r'ābôn. Hunger. This abstract masculine noun occurs three times in the OT (Gen 42:19; 23; Ps 37:19), "And in the days of hunger they shall be satisfied."

Bibliography: TDNT, VI, pp. 14–17.

רָעַבּוּ (*r'ābôn*). See no. 2183c.

2184 רָעַד (*rā'ad*) *tremble*.

Derivatives

2184a רָעַד (*ra'ad*) *trembling* (in fear, Ex 15:15; Ps 55:5 [H 6]).

2184b רָעַדָּ (r'ādā) *trembling, fear* (Job 4:14; Ps 48:6 [H 7]).

rā'ad and its derivatives occur only nine times. Cognate evidence and contexts both support meanings such as "tremble" or "fear." The Qal describes the earth's trembling before God (Ps 104:32). The Hiphil, without any clear causative meaning, describes trembling under threat of God's judgment (Ezr 10:9) and Daniel's trembling before a vision (Dan 10:11).

W.W.

2185 רָעָה (*rā'ā*) I, *pasture, tend, graze*.

Derivatives

2185a רָעָה (*r'ā*) *pasture* (I Kgs 5:3).

2185b מִרְעָה (*mir'eh*) *pasture, pasturage* (e.g. Isa 34:14; Ezk 34:18).

2185c מִרְעִית (*mar'it*) *pasturing* (Jer 23:1), *pasturage* (Hos 13:6).

The root *rā'ā* is cognate to Akkadian *re'ū*, a very ancient word, used as an honorific title in royal names and inscriptions from the time of Sargon of Akkad (c. 2300 B.C.). A cognate, *r'i*, is an important root in Ugaritic. Cognates are also found in Aramaic, Phoenician, and other Semitic languages. *rā'ā* occurs over 160 times in the OT, the participial form *rō'eh* "shepherd" occurring over 60 times. It is the primary term for "feeding" domestic animals. Since the most common occupation in Palestine from greatest antiquity was shepherding, the term is basic to the description of the people of the country in all historical periods. The initial occurrence (Gen 29:7) is translated "feed" by all the versions, however the very next occurrence (29:9) is read "kept" by KJV and RSV, but "tended" by JPS. The actual meaning is "pastured" or "herded." There is a degree of confusion among the versions over the translation of this root: Gen 37:2; Job 1:14, KJV "feeding," RSV reads "pasturing" (Gen 37:2), "feeding" (Job 1:14). There are many other confused passages such as: KJV "he fed" (Ps 37:3); "devour" (Ps 80:13 [H 14]); "eat" (Ezk 34:19) and in the same verse "eat up," "keep" (I Sam 16:11; 17:34; 25:16); "wander" (Num 14:33) "waste" (Mic 5:6 [H 5]). The root is used to describe the tending of sheep (Gen 30:36), asses (Gen 36:24), cattle (Gen 41:2), and gazelle fawns (Song 4:5).

It is used metaphorically for a variety of descriptions. Among them are: the tranquility of two animals, normally pursuer and prey, grazing to-

gether: bear and cow (Isa 11:7); wolf and lamb (Isa 65:25). The root *rā'ā* also appears in philosophical and theological metaphors as (Prov 15:14) "the mouths of fools feed on folly"; (Isa 44:20) "he feeds on ashes." Invading armies pictured as a horde of beasts or insects are said to "feed" in the sense of "devour" conquered towns (Mic 5:6 [H 5]). From very ancient antiquity, rulers were described as demonstrating their legitimacy to rule by their ability to "pasture" their people. Hammurabi and many other rulers of ancient western Asia are called "shepherd" or described as "pasturing" their subjects. In the OT, however, it is the Lord who feeds his people and is praised for his mercy in providing for them (Gen 48:15; Ps 23:1; 28:9; Isa 40:11; Hos 4:16 et al). This attribute of God is one of the marks of the offices of prophets, priest, and king. David's claim to the throne is based upon God's command that he feed the people (II Sam 5:2). Failure of the officers of Israel to feed the people either physical or spiritual nourishment was deemed a severe transgression (Ezk 24:2ff.) In this chapter the prophet plays repeatedly on the two forms of the root, *rā'ā*, the verb meaning "to pasture" and the noun meaning the "pastor" or shepherd. The true repetition of the ideas is lost in all the versions by supplying synonyms where the Hebrew uses the same term throughout. The OT theological idea of the good shepherd who feeds his flock with God's truth (Jer 3:15 etc.) becomes prominent in the NT (Jn 10:11).

W.W.

- 2186 רָעָה (*rā'ā*) *II*, associate with, be a friend of. Used in the Qal and Hithpael and as a denominative verb in the Piel—a total of seven times.

Derivatives

- 2186a רֵעָה (*rēa'*) *I*, friend, companion, another person.
 2186b רֵעִה (*rē'eh*) friend, sometimes technical Friend of the King."
 2186c רֵעָה (*rē'ā*) female companion.
 2186d רָעִיָּה (*ra'yā*) attendant maidens, especially in Song 1:9 etc.
 2186e רֵעוּת (*r'ūt*) *I*, female companion, mate (of birds).
 2186f מְרֵעָה (*mērēa'*) confidential friend.

rēa'. Friend, companion, another person. Of all these words, the most common is *rēa'*, friend (used 187 times). The others may have special usages that are not too clear to us.

The word *rēa'* is used for friend, neighbor, associate—close or occasional. Often it is used in

the phrase, one to another. It is used of the Hebrew companion slain by a fellow slave in Ex 2:13; of a man murdered by his fellow in Ex 21:14; of the soldier who heard the dream of a fellow soldier in the Gideon story (Jud 7:13); and of Job's three friends (!). It thus can be used of chance acquaintances and partners, but also of closer friends. Hirah the Adullamite was Judah's friend (Gen 38:12). The word is not used for David and Jonathan's friendship. The breadth of usage of this word shows that when Christ quoted Lev 19:18, "Thou shalt love thy neighbor as thyself," the lawyer need not have asked his famous question. The preceding verse in Lev is not so famous, but shows that the OT law was aimed at the heart as well as the action, "Thou shalt not hate thy brother in thine heart."

Bibliography: TDNT, VI, pp. 312-15. THAT, II, pp. 786-90.

R.L.H.

- 2187 רָעָה (*r'h*) *III*. Assumed root of the following. Apparently a synonym of *rāṣā* (q.v.) borrowed from the Aramaic *rā'ā*.

2187a רָעָה (*rēa'*) *II*, purpose, aim (Ps 139:2, 17).

2187b רָעוּת (*r'ūt*) *II*, longing, striving (Eccl 1:14; 2:11, 17, 26; 4:4, 6; 6:9).

2187c רָעִיוֹן (*ra'yôn*) longing (Eccl 1:17; 4:16; 2:220).

רָעָה (*rā'ā*). See no. 2191c.

רָעוּת (*r'ūt*). See nos. 2186e, 2187b.

רָעִי (*r'i*). See no. 2185a.

רָעִיָּה (*ra'yā*). See no. 2186d.

רָעִיוֹן (*ra'yôn*). See no. 2187c.

- 2188 *רָעַל (*rā'al*) quiver, shake, reel. This verb occurs only once, in the Hophal (Nah 2:4).

Derivatives

2188a רָעַל (*ra'al*) reeling (Zech 12:2).

2188b רָעָלָה (*r'ālā*) veil (Isa 3:19).

2188c תָּרָעָלָה (*tar'elā*) reeling (Isa 51:17, 22; Ps 60:5).

- 2189 רָעַם (*rā'am*) to thunder. Denominative verb.

Parent Noun

2189a רָעָם (*ra'am*) thunder.

2189b רָעָמָה (*ra'mā*) vibration (Job 39:19). Meaning uncertain (NIV "flowing mane").

r'm has no cognates in the contemporary Semitic languages. The Qal stem occurs three times in the OT (Ps 96:11; 98:7; I Chr 16:32), "Let the sea thunder" in praise. The Hiphil which means, "to

cause to thunder," occurs eight times. In the initial occurrence (I Sam 2:10), it is God himself who "thunders" in anger at his enemies. In I Sam 1:6, the description of Peninnah's vexation of Hannah because she was childless, *rā'am* appears in the MT. But there was apparently a stronger verb read by the Aramaic version, "And her rival troubled her sorely, to make her fret." The Aramaic Targum uses a word derived from "zeal, jealousy" (*qn'*). But "fret" is to be taken from *rā'am* as figurative of her loud complaints. In the OT view, God is sovereign over all of the natural elements so that the great violences of wind and storm are indicative of his will.

rā'am. Thunder. This masculine noun appears six times, all in poetic contexts. It is an attribute of God's presence (Isa 29:6); the reaction of the cosmos at God's presence (Ps 77:18 [H 19]; 104:7). Job asks concerning the contrast between God's whisper and his thunder (26:14). The same notion of the command of God in the thunder is mentioned by the Psalmist (81:7 [H 7]). Job compares the tumult and shouting of battle to thunder (39:25). God's voice (*qôl*, q.v.) is also used, figuratively, for thunder (Ps 29:3, 4, etc.)

W.W.

- 2190 *רָעַן (*rā'an*) *be(come) fresh, luxuriant, green.* This verb occurs only once, in the Pael (Job 15:32).

Derivative

- 2190a רָעָן (*rā'anān*) *luxuriant, fresh* (e.g. Song 1:16; Hos 14:9).

רָעָן (*rā'anān*). See no. 2190a.

- 2191 רָעַע (*rā'a'*) *I, be bad, evil.* Denominative verb.

Parent Noun

- 2191a רָעָה (*ra'*) *evil, distress;* also adjective, *evil, bad.*

- 2191b רָעָה (*rōa'*) *badness, evil.*

- 2191c רָעָה (*rā'ā*) *evil, misery, distress.*

Cognate adjectives of the root *r'* occur in Akkadian (*raggu* "bad, evil") and Phoenician (Karatepe 1. 15 "evil men"; substantive "all the evil" 3. 17). The root also occurs in Ugaritic according to AisWUS, no. 2533.

The essential meaning of the root can be seen in its frequent juxtaposition with the root *tōb*. Thus Moses concluded, "See I set before you today life and what is good [*tōb*], death and what is evil/bad [*ra'*]" (cf. Mic 3:2). Frequently they occur in the merism that one distinguishes "good and evil/bad" (II Sam 14:17; 19:35 [H 36]; I Kgs 3:9; Isa 7:15; cf. here "tree of good and evil," Gen 2:9, 17).

Since the decision that something is bad depends subjectively on one's taste, the root frequently occurs with the formula "in the eyes of." Thus Isaiah threatens those whose moral judgments are distorted: "Woe to those who call evil good and good evil." Because the Lord's judgment stands as a moral absolute, however, one can speak of objective evil, of sin. The formula '*āsā hāra' b' 'enē YHWH* "to do evil in the LORD's judgment" occurs frequently in the OT.

The root can have either a passive or active connotation: "misfortune, calamity," and "wickedness" respectively. It can occur in profane contexts, "bad" "repulsive," and moral contexts, "evil" "wickedness."

The denominative verb, occurring seventy-five times with meanings ranging from "displeasing, injurious," to be bad or evil [see above] inherits from its noun a dual meaning of being wrong in regard to God's original and ongoing intention and detrimental in terms of its effects on man. In some instances it may refer only to its injurious effects on man, either as physical or emotional harm to the person or as painfully unpleasant experiences. There are practically no philosophical or metaphysical connotations that bear upon theodicy or cosmology. The verbal forms of the root are basically descriptive of the interrelations between God and man and between man and man.

rā'a' designates experiences which entail physical pain (Num 16:15; I Chr 16:22; Ps 105:15), or emotional pain (Gen 43:6; Num 11:10–11), in the case of Naomi the loss of family (Ruth 1:21; cf. I Kgs 17:20).

In the moral and religious realm of meaning, the verb denotes activity that is contrary to God's will. Bildad alludes to this aspect of meaning in Job 8:20, and the prophets Isaiah (31:2) and Zephaniah (1:12) state it more strongly. A phrase which highlights God's evaluation of action is "in his sight" which appears three times in relation to the verb (Num 22:34; Prov 24:18; Mic 3:4). Another way is to contrast *rā'a'* activity with God's good acts (Josh 24:15) or with good people. The latter uses a participial form and is confined to the Psalms (26:5; 37:9; 92:11 [H 12]).

The range of activity associated with *rā'a'* begins with rejection of God (Isa 1:4; 9:17; Jer 7:26; 16:12), particularly in the practice of idolatry (I Kgs 14:9; 16:25; II Kgs 21:11; Jer 25:6) and once the destruction of his holy place (Ps 74:3). Abuse of people and exploitation of their property is common. This includes causing physical pain (Num 16:15; Ps 22:16 [H 17]); harsh slavery in Egypt (Ex 5:22–23; Num 20:15; Deut 26:6), dishonesty (Gen 31:7; 44:5; Deut 15:9), demand for immoral relations (Gen 19:7; Jud 19:23), verbal abuse (Ps 27:2), and efforts to kill (I Sam 25:34; 26:21; Jer 38:9). In one case it involves a harsh

oath (Lev 5:4) and in another King David's taking a census (but see *pāqad* for possibility that this was a mustering of the troops—still sinful R.L.H.) of the people (I Chr 21:17).

The biblical writers take *ra'a'* back into the inner sources of the acts. The people who do it lack understanding (Jer 4:22) of the true nature of their acts, yet go ahead and deliberately plan to hurt others (Prov 24:8). In fact it becomes a habit (Jer 13:23). More seriously, it becomes a compulsion (Gen 19:9; Prov 4:16; 17:4). Part of their lack of understanding is their failure to realize till too late the injury they cause themselves (I Sam 12:25; Ps 44:2 [H 3]; Jer 13:23).

God is the subject of the verb *ra'a'* in Ps 44:2 [H 3]; Jer 25:29; 31:28; Mic 4:6; Zech 8:14), but his infliction of pain on people is not due to viciousness; it is the just judgment of sinners who do not respond to his call for repentance. In the Old Testament, God is not depicted as committing an immoral act when he does *ra'a'* to the wicked.

Several times the Psalmist asked God to punish those who abuse him (64:2 [H 3]; 94:16; 119:115), but there were efforts made to urge, or even to challenge Israelites to face up to the way they ill-treat others (Lev 5:4; Josh 24:15) and to change their ways. Advice was given on how to keep from doing *ra'a'* (I Sam 25:34; Ps 15:4; 37:1, 8; Prov 24:19). Isaiah pointed to the future in which God promised that *ra'a'* would not be practiced in his holy mountain (11:9; 65:25).

ra'. *Bad, evil* (noun). The masculine noun *ra'* often is set in contrast with *tōb* (good) as opposite poles of the moral spectrum. Sometimes *shalōm* (peace) is given as its opposite. The noun is further defined as being that condition or action which in his (God's) sight is unacceptable (Jer 52:2; Mal 2:17; cf. Neh 9:28).

Starting with the purely secular meaning of the noun, one finds that *ra'* denotes physical injury (Jer 39:12), or times of distress (Amos 6:3 and the famous verse, Isa 45:7 "I bring prosperity and create disaster" *niv*), but mostly denotes unethical or immoral activity against other people, whether by speech (Ps 41:3 [H 6]; 73:8; 109:20), by practice (Mic 2:1; 7:3), or by offering improper sacrifices (Mal 1:8).

Twice *ra'* serves as an abstract of an inner condition (Ps 7:9 [H 10]; Prov 12:21; "wickedness"), but most often it helps depict inner attitudes toward either God or man. A person may plan, desire, love, and rejoice in *ra'* (Ps 52:3; Prov 2:14; 6:14; 12:20), or be apathetic (Ps 36:4; cf. Prov 28:4). *ra'* may be a refusal to respond to God's call (Neh 9:35) which issues in an all-out surrender to this activity (II Kgs 21:9; II Chr 33:9; Prov 1:16; Isa 59:7).

The person whose way of life is characterized

by *ra'* has a bleak future, if he continues in it. God is against him (Isa 31:2) and has declared sentence against him (Mic 1:12). Life itself is against him (Deut 31:39; Job 2:10; 30:26; Ps 54:5; 140:11–12; Prov 13:17; 14:22; Eccl 8:9).

Left to himself, an evil person has no chance of survival. But the God who is his judge is also the one who calls him to change his ways; it must be a radical action on man's part (Ps 34:15; 37:27; Prov 3:7; Amos 5:14–15; Zech 1:4). This is a far more beneficial method than the legal method mentioned about ten times in Deut as a "putting away" ("purge" *rsv*) of evil. God promises that man's turning from *ra'* will lead to a saving event (Job 5:19; Ps 121:7; Prov 19:23). Assurance is added to the promise (Ps 10:6; 23:4) that this salvation is an actual experience of life, which can be tied to commitment (Ps 119:101; Jer 42:6). And there is advice on how to keep free from *ra'*. A person is told to keep from it (Prov 6:24; Isa 56:2; Jer 7:6), which may include a strong attitude of hating *ra'* (Ps 97:10; Prov 8:13; Amos 5:15). Above all, do not provoke God with idols (Jer 25:7).

ra'. *Evil, bad* (adjective). This form of *ra'* qualifies the nouns to which it is related, indicating the quality or the injurious activity of the noun. The noun may designate the lack of quality or the inferior quality of things or people which are thus unable to meet standards of value or function beneficially.

In a secular sense, there are many illustrations of bad quality. First there were the ill-favored, lean cattle in Pharaoh's dream (Gen 41:21, 27), and the water which was unfit to drink (II Kgs 2:19; "naught," *kiv*; "bad," *rsv*), and trade goods which one claimed was unfit to buy (Prov 20:14 ("naughty," *kiv*; "bad," *rsv*). In II Kgs 4:41 there is reference to something ("harm," *rsv*) in the food of a cooking pot that was dangerous and which the prophet corrected. The adjective *ra'* may denote vicious beasts (Lev 26:6), angels which bring distress (Ps 78:49), famine (Ezk 5:16), diseases (Deut 7:15; 28:35, 59; II Chr 21:19; Job 2:7; Eccl 6:2). The term may refer to things which seem to function so as to bring distress, such as messenger reports (Ex 33:4; Neh 6:13) or wonders (Deut 6:22). Events (Eccl 2:17; 9:3) or the times (days) (Gen 47:9; Prov 15:15; Eccl 4:8) may go awry and be filled with distress. This adjective may designate displeasure (I Sam 29:7) or sorrow of heart (Neh 2:1–2; Prov 25:20).

More often *ra'* indicates moral deficiencies, moral qualities that injure oneself or others, or a condition that is below par. The measure of these negative qualities is God's evaluation (Prov 15:3) which is often couched in a phrase "in the sight of the Lord" which occurs about fifty-five times, mostly in the historical books. The term is also

defined by being set in contrast to *tōb* "good" about seven times. So people who disobey God are *ra'* (about eleven times) especially if they provoke God with idolatry (II Kgs 17:11; etc). In some instances, *ra'* seems to denote the inner condition of such people (Gen 6:5; Prov 26:23; Eccl 9:3; Jer 3:17; 7:24). Note the more abstract nuance of Eccl 9:3. Negative attitudes are labeled as *ra'*, i.e. pride (Job 35:12), resentment (Prov 15:10), resistance (Neh 9:35; cf. Ps 64:5; Ezk 13:22). Violence to others qualifies men's actions as *ra'* (Deut 17:5; I Sam 2:23; I Kgs 16:7; Ezk 20:44; 30:12).

God's response is not apathetic or whimsical. On the basis of adequate cause, God threatened and carried out judgment against people who had the trait of *ra'* (Ezr 9:13; Job 21:30; Prov 11:21).

But there is a brighter side to the situation. God also exhorted his people to turn from evil (Deut 13:12; II Kgs 17:13; II Chr 7:14; Ezk 33:11; 36:31; Zech 1:4), and declared that the prophets' main task was to proclaim this exhortation and turn people back to God (Jer 23:22). The wise man gave a promise that the obedient would be free of *ra'* (Eccl 8:5). Here also advice was given on how to keep free from it (Ps 141:4; Prov 4:14; Eccl 8:3).

rā'ā. Evil, misery, distress, injury, wickedness. The feminine noun *rā'ā* functions much like the masculine adjective, though somewhat more frequently. Often *rā'ā* is an adjective too, and qualifies its nouns in terms of the negative function, or condition, and the injurious activity of the noun. God's own character and attitude measures the value of things and people (II Kgs 8:12; Jer 29:11; cf. Jon 4:2, 6). The phrase "in the sight of the Lord" appears twice (I Sam 12:17; II Kgs 21:20). God's view deals mostly with moral qualities, but man has his own standards and tends to evaluate his environment as *rā'ā* in terms of the pain he experiences.

In a non-moral sense, things are counted as of inferior quality on the basis of their condition. The cows of Pharaoh's dream were inferior (Gen 41:3-4, 19-20), also land (Num 13:19), and the figs of Jer 24:2-3, 8 were useless for food because of their condition. Beasts were evaluated in terms of their danger to human life (seven references), so also the sword (Ps 144:10). Verbal reports, the times/days, events of life may be bearers of distress and so are *rā'ā* (some thirty-five times). The term may designate injury done to the body (over twenty times), or the sorrow one may experience (a dozen times). The feminine noun has the capacity to collectively denote the sum of distressing happenings of life (over twenty times).

This word *rā'ā* can label men (Num 14:27, 35; Jer 8:3) or thoughts (Ezk 38:10), but a number of times it is an abstract for the total of ungodly

deeds people do, or a person's inner condition which produces such deeds. The term may label a variety of negative attitudes common to wicked people, and be extended to include the consequences of that kind of lifestyle.

In Jud 9:23; I Sam 16:14-16, 23; 18:10; 19:9 the word qualifies the noun, angels, not to indicate that they were demonic, but that they brought distress, or an abnormal condition to the person affected.

In harmony with the contrast between *rā'ā* and *tōb* "good," God acts with painful punishment against the *rā'ā* kind of people (over seventy times; particularly prominent in Jeremiah). He also acts with mercy toward those who will respond to his exhortations (Eccl 11:10; Jer ten times; Jon 3:8), but man must confess (I Sam 12:19; Jer 17:17). On his part, God acts to save man from *rā'ā* (Ex 32:14; I Sam 10:19; 25:39) as he promised (I Kgs 21:29; Prov 1:33; Isa 57:1; Jer 23:17; 36:3; Ezk 34:25). And there was advice to the believers on how to keep themselves free from *rā'ā* (Ex 23:2; I Sam 12:20; Prov 3:29; 22:3; 24:1; 27:12).

rōa'. Badness, evil. The masculine noun *rōa'* occurs nineteen times in the OT; eleven of these are in Jeremiah. It refers to the poor quality of the cows in Pharaoh's dream (Gen 41:19), and of the figs unfit for food (Jer 24:2-3, 8; 29:17). The noun denotes the sadness of one's heart (Neh 2:2) or face (Eccl 7:3). Once it points to negative attitudes (I Sam 17:28). Mostly the word denotes an immoral quality of man's activity (eleven times).

G.H.L.

2192 רָעַע (*rā'a'*) II, break, shatter.

In the several instances in which this verb is used in a concrete sense, i.e. broken branches of an olive tree (Jer 11:16) or earth shattered (Isa 24:19), the effects of God's judgments are depicted. In Jer 15:12 the quoted proverb is used to describe the resistance of the Israelites to the

prophet's message. In Prov 25:19 the "broken tooth" (כִּיב; "bad," RSV) connotes the poor quality of a wicked man's friendship. Elihu uses the verb more figuratively to show how God punishes sinners (Job 34:24). A psalmist says almost the same thing (Ps 2:9).

The verb is apparently an Aramaic form cognate to the Hebrew *rāṣaṣ* (q.v.). *ra'a'* II is not used in the Pentateuch. *rāṣaṣ* is used there only once.

G.H.L.

2193 רָעַף (*rā'ap*) *trickle, drip* (e.g. Job 36:28; Isa 45:8).

2194 רָעַץ (*rā'aṣ*) *shatter* (Ex 15:6; Jud 10:8).

2195 רָעַשׁ (*rā'ash*) *quake, shake*.

Derivative

2195a רָעַשׂוּ (*ra'ash*) *quaking, rattling*.

This primary Hebrew root appears nearly thirty times in the OT. It does not occur at all in the Pentateuch, being confined to the prophets and writings.

The relationship of *rā'ash* to Akkadian *ra'āsu* "to knock down" appears to be mostly speculative. The most common meaning assigned by the versions is "tremble" although "quake," "shake" and "move" also are found. A variety of subjects are used with *rā'ash*; heaven, earth, and the Gentile nations are to be shaken by God (Hag 2:6-7, 21). In other passages the heavens are to quake (Joel 2:10) and the earth to tremble. In the "A" phrase of the same parallel sequence, *rā'ash* is used in most contexts to describe God's sovereignty over the physical world. Living creatures are said to quake (Ezk 38:20); horses shake the ground (Job 39:20) at the will of the Lord. The other usage of *rā'ash* is to describe invading armies and the din of battle (Jer 8:16); the trembling of walls (Ezk 26:10). And Babylon itself is to quake (Isa 14:16). In one poetic passage (Ps 72:16) a much milder action is involved. *rā'ash* must be taken to mean "wave" since it describes the full heads of grain on the hillsides. However some scholars would hold that this is another root, *rā'ash* "to increase" (cf. KB).

ra'ash. Quaking, rattling. This masculine noun refers to earthquakes and similar violent upheavals of the ground. Like the root from which it is derived, it appears only in the latter two sections of the Hebrew canon, Prophets and Writings. It is used of the earthquakes which attend the theophanies to OT prophets (I Kgs 19:11) and earthquakes as natural phenomena (Amos 1:1). It is extended to describe the tumult of warfare, the marching of soldiers (Isa 9:4); the tram-

pling of war horses (Job 39:24); and the rumbling of war chariots (Jer 47:3). In an especially obscure passage in the parallel poetry of Job, a different meaning of *ra'ash* is apparent. Job is asking the question, if a man cannot stand before one of God's more fearsome creatures, the crocodile, how can he hope to confront God? In the passage (Job 41:21), the statement is made, "Clubs are passed off (by the crocodile) as straws, it laughs at the rattling (*ra'ash*) of spears."

W.W.

2196 רָפָא (*rāpā'*) *heal, make healthful*.

Derivatives

2196a רִפְאוֹת (*r'pū'ā*) *remedy* (Ezk 30:21; Jer 30:13).

2196b רִפְאוֹת (*rip'ūt*) *healing* (Prov 3:8).

2196c מְרַפֵּא (*marpē'*) *healing* (Jer 8:15), *health* (Prov 4:22).

This is a purely Hebrew root which appears over sixty times in the OT and is cognate only to a few later forms in Afro-semitic dialects. The meaning is straightforward in virtually all passages. In the initial occurrence (Gen 20:17) in which God heals Abimelech, the Qal stem is employed. The root is also used of human healing, as a substantive, "physician" (Gen 50:2). *rāpā'* is also used of the healing and forgiveness of Gentile nations (Isa 19:22; 57:18). In the Piel and Hithpael stems the causative aspect is foremost (I Kgs 18:30), "He healed (repaired) the altar." However, a human subject is generally the object of the healing (Ex 21:19), "He shall cause him to be thoroughly healed." The Hithpael has the passive mood characteristic of the stem (II Kgs 8:29; 9:15), "In order that he could be healed." The other occurrence of the Hithpael is II Chr 22:6. Possibly the most significant usage is in the Niphal stem (I Sam 6:3), "Then you shall be healed"; (Deut 28:27), "of which you cannot be healed." The stem is also used for the restoration of objects (II Kgs 2:22); the turning of salt water into fresh (Jer 19:11). The themes of healing and restoration as connotations of *rāpā'* are combined in the usage of Isa 53:5, "With his stripes we are healed." In many of the occurrences, it is God who causes healing or afflicts with disease or catastrophes which cannot be healed but by divine intervention.

מְרַפֵּא (*r'pā'im*) I, II. See nos. 2198c,d.

2197 רָפַד (*rāpad*) *spread* (e.g. Job 41:22; 17:13).

Derivative

- 2197a רָפִידָה (*r^o pīdā*) *support* (Song 3:10).

- 2198 רָפָה (*rāpā*) *sink down, let drop, be disheartened.*

Derivatives

- 2198a רָפָה (*rāpeh*) *slack.*
 2198b רִפְיָיוֹן (*rippāyôn*) *sinking* (of hands, Jer 47:3).
 2198c רָפְאִים (*r^o pā'im*) *I, ghosts of the dead, shades.*
 2198d רָפְאִים (*r^o pā'im*) *II, giants, Rephaim.*

This root is cognate to the Phoenician verb *rph* with a similar meaning. *rāpā* appears forty-three times in the OT. It is used in the Qal, Piel, Hiphil, and Hithpael stems. The root bears a wide variety of meanings and connotations. The initial Qal occurrence (Ex 4:26) is difficult for the versions, כַּו, "So he let him go"; יָפָה, "So he let him alone," literally, "So he let drop from him." In other passages it is used of inanimate objects and forces (Isa 5:24), "As dry grass sinks down in the flame"; of the close of day in still other usages (Jud 19:9), "The day has sunk down toward evening." The Piel form occurs in several passages (Jer 38:4), "He is weakening the hands"; (Ezk 1:24), "They let sink their wings." The Hiphil stem is the most common in usage with twenty-one occurrences. It usually means "to let drop," "to abandon" in this form (Josh 10:6; Deut 4:31 et al.). It also means to "let alone," "refrain" (Jud 11:37; Ps 37:8). The Hithpael stem occurs three times, twice in Prov (18:9), "One that is slack in his work"; (24:10), "If you are disheartened in the day of adversity," כַּו, "If thou faint in the day of adversity" and other similar readings miss the full force of the root. The stem occurs once in Josh 18:3, כַּו, "How long are ye slack," does not do justice to the full weight of *rāpā*. The preferred reading is, "How long will you remain disheartened." This is an interesting and significant root. However, each occurrence must be carefully compared with other similar contexts. Interestingly enough, *rāpā* is used in poetic contexts only a very few times.

The nouns *r^o pā'im* (q.v.) "shades" and the proper name "Rephaim" may be related to *rāpā* or *rāpā*, but the connection is not clear.

r^o pā'im. *Ghosts of the dead, shades.* A word and idea of Ugaritic origin, *rp'i*, which means "the dead inhabitants of the netherworld" is cognate to both Hebrew and Phoenician *r^o pā'im*. In grave inscriptions from Sidon, the kings Tabnith and Eshmunazar refer to the *r^o pā'im*, but this usage dates from Hellenistic times. The pri-

mary fact concerning the eight occurrences of the root in the OT is that it appears exclusively in poetic passages. Its use is prescribed as a "B" word or second synonym in parallel series. The most common parallelism is death (dead) // ghosts (Prov 2:18; Isa 26:14, 19 a more complex poetic structure; Ps 88:10, 11 [H 11, 12]). The parallelism ghosts // sheol occurs in two passages (Prov 9:18; Job 26:5). In one other passage the parallelism is reversed to form sheol // ghosts (Isa 14:9) and in another single instance (Prov 21:16) a complicated parallelism of what has been called the modified "staircase" type sets "foolish men" // to ghosts. It is clear that this ancient quasi-mythological term was used merely to satisfy the requirements of Hebrew poetic structure and in no way indicates any specific connotation to the root *r^o pā'im* other than as a synonym for "the dead" and the "place of the dead."

[It may be added that the Ugaritic evidence is uncertain. The root *rp'i* is translated by Gordon as "deities, shades of the dead" (UT 19: no. 2346), by Aistleitner as "1) prince (Fuerst), 2) God as Prince, 3) Baal as Prince of the gods" (AisWUS no. 2575). Several of the passages refer to the gentilic Rephaites; in the Tale of Aqhat, Daniel is called a Rapha-man (ANET pp. 149ff., and see *r^o pā'im* below). In some of the other passages the translation is dubious, e.g. Ginsberg translates by "community" in italics (ANET, p. 146, KRT iii, 1.3). It is methodologically questionable to use these Ugaritic data extensively in determining the OT meaning of this word as some have done (see KB). There seems to be no clear Ugaritic connection of the root with the netherworld and the Hebrew theology differs from the Ugaritic in any case.

The Hebrew evidence adduced by W. White for parallelism of *rp'i* with death, dead, sheol (or grave, cf. also Ps 88:11 [H 12]) is important and convincing. However, the ghost-like character of the dead is not so clear. Really, as the term refers to dead persons, the translation "dead ones" would fit very well in all cases. This does not deny that other passages refer to continuing life of the soul, but not necessarily in shadowy semi-existence R.L.H.]

r^o pā'im. *Giants, Rephaim.* A term of Ugaritic origin, the designation for one of the most primitive pre-Semitic peoples of Palestine. According to the Ugaritic myths and legends the hero Danel (no relationship to the biblical Daniel), and the champion of Baal are both called "Rephaites." Whether this is a folk etymology or a term based upon some ancient historical term is unknown. The OT historians used it to describe the pre-Israelite inhabitants of Palestine. Deuteronomy 2:20 mentions that the Ammonites called them

the "Zamzummim" but no data is extant on this name. The versions are confused in translating the term. The usages are as follows: Gen 14:5; 15:20; Deut 2:11 KJV, "giants," RSV "Rephaim," JPS "Rephaim." In several passages, the KJV translates "giants," while the RSV renders "Rephaim": Deut 2:20; 3:11; Josh 12:4; 13:12; 17:15. In I Chr 20:4, 6, 8, KJV renders "giant," RSV "giants." Other passages follow a similar confused pattern. The KJV justification for substituting "giant" in all cases is based upon the details about the Rephaim in Deut 2:11, 28, where they are said to be "tall as the Anakim." The LXX also translated the word as "giant" in Josh 12:4; 13:14; I Chr 20:4, 6. The exact relationship between Rephaim I and II is very difficult and no plausible explanation as yet has appeared. [As to Og's famous bed, it may have been a sarcophagus which was large not because Og was a giant but because other objects would have been buried with him. R.L.H.]

- 2199a מָרַפֵּשׁ (*marpēs*) *be fouled*, (i.e. water befouled by trampling, Ezk 34:19).

- 2200 רַפְסֹדָה (*rapsōdā*) *raft* (II Chr 2:16, only). Derivation uncertain.

- 2201 רָפַפּ (*rāpap*) *shake, rock*. This verb occurs only once, in the Poal (Job 26:11).

- 2202 רָפַק (*rāpaq*) *support oneself, lean*. This verb occurs only in the Hithpael (Song 8:5).

רָפַשׁ (*rāpaś*). See no. 2199.

- 2203 רַפֵּשׁ (*rpsh*). Assumed root of the following.

- 2203a רִפֵּשׁ (*repesh*) *mire* (Isa 57:20).

- 2204 רִפֵּת (*repet*) *stable, stall* (Hab 3:17).

רָץ (*raṣ*). See no. 2212a.

- 2205 רָצָא (*rāṣā'*) *run* (Ezk 1:14).

- 2206 רָצַד (*rāṣad*) *watch stealthily, or with envious hostility* (Ps 68:17).

- 2207 רָצָה (*rāṣā*) *be pleased with, be favorable to*.

Derivative

- 2207a רָצוֹן (*rāṣōn*) *pleasure, delight, favor*.

A very ancient West Semitic root, *rāṣā* is found in a Rib-Addi letter from Amarna, 127:25 (c. 1370 B.C.). It is cognate to Ugaritic *rs'i* and is also found in Syriac, although with slightly altered meaning.

The verb appears fifty times in the OT and is distributed throughout all sections and contexts. It appears thirteen times in Ps and six times in Lev in the Niphal stem (Lev 1:4ff.) in the special sense "to be favorably received" as to the ritual cleanliness of offerings. The more normal Qal construction occurs initially in Gen 33:10 to describe Jacob's wishes toward Esau. *rāṣā* is frequently used in prayers (Deut 33:11, 24) and religious greetings (II Sam 24:23). The root frequently describes God's pleasure with his servants, particularly referred to the Messiah (Isa 42:1). *rāṣā* serves as the "B" word in the beautiful parallel phrases of Ps 147:10 [H 11]. The "A" word in the first hemistich is a synonym, *hāpēs* (q.v.). *rāṣā* is also used in passages dealing with the favor of men (Mal 1:8) and a father's son (Prov 3:12). It is used in contexts requiring the favor of a king (I Sam 29:4) or the favor of a people for their king (II Chr 10:7). It is used of the satisfaction of a debt both in the sense of atonement for sin (Mic 6:7) and fulfillment of ritual requirements (II Chr 36:21). In an obscure and difficult passage (Job 14:6) the root *rāṣā* seems at first out of place until carefully translated. Job mourns the frailty of mankind, "Look away from him, so that he can rest, so that he may enjoy his (single) day like a hired man." RSV confuses the use of the root.

rāṣōn. *Pleasure, delight, favor.* This masculine noun occurs over fifty times in the OT. It carries three major shades of meaning. The primary one is the "favor" or "good will" of God (Deut 33:16; Isa 60:10; Ps 5:12 [H 13]; 30:6, 8 et al.). The root also refers to the "pleasure" or "favor" of kings (Prov only, 14:35; 16:13, 15) and all men (Prov 10:32; 11:27 et al.).

The second shade of meaning is the "delight" or "acceptance" of an individual (Ex 28:38) and always in a religious or ritual sense. The word *rāṣōn* describes the "permissibility" or "acceptance" of a gift or sacrifice (Lev 1:3; 22:20; Isa 56:7 et al.).

The third shade of meaning which attaches to this word is "desire," "pleasure" in the specific sense of "will," as the "will" of God (Ezr 10:11;

2208 רָצַח (*rāṣaḥ*)

Ps 40:9 et al.). Even more texts describe the "desire" or "will" of man (II Chr 15:15; Dan 8:4 et al.). One obscure and difficult usage is found in Gen 49:6, the final benediction of Jacob. The versions are sharply divided on the proper reading, KJV "in their selfwill they digged down a wall"; AV "they hocked an ox"; RSV "in their wantonness they hamstring oxen"; JPS "in their self-will they houghed oxen." The KJV seems to follow the Hebrew text most closely. The root *rāṣâ* and the noun *rāṣôn* have a wide variety of connotations but are most important as the standard anthropomorphic expressions of God's preceptive will.

Bibliography: TDNT, II, pp. 743–45. THAT, II, pp. 810–12.

W.W.

רָצוֹן (*rāṣôn*): See no. 2207a.

2208 רָצַח (*rāṣaḥ*) *murder, slay, kill.*

Derivative

2208a רָצַח (*reṣaḥ*) *shattering* (Ps 42:11; Ezk 21:27).

rāṣaḥ is a purely Hebrew term. It has no clear cognate in any of the contemporary tongues. The root occurs thirty-eight times in the OT, with fourteen occurrences in Num 35. The initial use of the root appears in the Ten Commandments (Ex 20:13). In that important text it appears in the simple Qal stem with the negative adverb, "You shall not murder," being a more precise reading than the too-general KJV "thou shalt not kill." Much has been made of the fact that the root *rāṣaḥ* appears in the Mosaic legislation, as though this term bore a special connotation of premeditation, as though the Decalogue only proscribed premeditated crime. This is not the case. The many occurrences in Num 35 deal with the organization of the six cities of refuge to which manslaughterers who killed a person accidentally could flee. Numbers 35:11 makes completely clear that the refuge was for those guilty of unpremeditated, accidental killings. This makes clear that *rāṣaḥ* applies equally to both cases of premeditated murder and killings as a result of any other circumstances, what English Common Law has called, "man slaughter." The root also describes killing for revenge (Num 35:27, 30) and assassination (II Kgs 6:32). It appears in a few poetic contexts, as an "A" word in a peculiar parallel construction (Job 24:14); as an "A" word parallel to a general term for immorality, *zimmâ* (Hos 6:9); as a "B" word parallel to another synonym "to kill," "to slay" (Ps 94:6). In only one case in the whole OT is the root used of the killing of man by an animal (Prov 22:13). But even in that context it is the enormity

and horror of the deed which is primary. In all other cases of the use of *rāṣaḥ*, it is man's crime against man and God's censure of it which is uppermost.

W.W.

2209 רָצַע (*rāṣa'*) *bore, pierce* (Ex 21:6; Deut 15:17).

Derivative

2209a מַרְצֵא (*marṣēa'*) *awl* (Ex 21:6; Deut 15:17).

2210 רָצַפּ (*rāṣap*) *I, fit together, fit out* (Song 3:10).

Derivatives

2210a רִצְפָּה (*riṣpā*) *pavement* (e.g. Est 1:6; Ezk 40:17–18).

2210b מַרְצֶפֶת (*marṣepet*) *pavement* (II Kgs 16:17).

2211 רָצָה (*rṣp*) **II. Assumed root of the following.**

2211a רִצְפָּה (*riṣpā*) *glowing stone* (or coal, Isa 6:6; I Kgs 19:6).

2212 רָצַץ (*rāṣaṣ*) *crush, oppress.*

Derivatives

2212a רָץ (*raṣ*) *piece, bar* (Ps 68:31).

2212b מַרְרֹצָה (*m' rûṣā*) *crushing, oppression* (Jer 22:17).

This purely Hebrew root occurs in all segments of the OT, but less than twenty times in all. It has a wide application of meanings and appears in all stems. The initial occurrence is in the rare Hithpoel form (Gen 25:22). The rabbinical commentaries incorrectly derived the form from another verb which resulted in a degree of confusion among the versions. The basic meaning of the Qal stem is "crush" or "break in pieces" (II Kgs 23:12). It was developed to describe "oppression" (I Sam 12:3) and "maltreatment" (Deut 28:33). Among its important metaphorical and prophetic uses are "broken," as in "broken reed," a favorite expression of Isaiah (36:6).

רָק (*rōq*). See no. 2219a.

רָקָה (*raq*). See no. 2218a.

2213 רָקַב (*rāqēb*) *rot* (Isa 40:20; Prov 10:7).

Derivatives

2213a רָקַב (*rāqāb*) *rottenness, decay* (e.g. Hos 5:12; Job 13:28).

2213b רִיקְבָּוֶן (*riqqābôn*) *rottenness* (Job 41:19).

רִיקָבֹן (*riqqābôn*). See no. 2213b.

2214 רָקַד (*rāqad*) *skip about* (e.g. Eccl 3:4; Isa 13:21).

רָקָה (*raqqā*). See no. 2218c.

רִיקָה (*riqqūah*). See no. 2215e.

רִיקָה (*riqqūa'*). See no. 2217b.

2215 רָקַח (*rāqah*) *mix, compound*.

Derivatives

2215a רָקַח (*reqah*) *spice*.

2215b רִקְחָה (*rōqēah*) *ointment*.

2215c רָקַח (*raqqāh*) *perfumer*.

2215d רִקְחָה (*raqqāhā*) *female perfumer* (I Sam 8:13).

2215e רִיקָה (*riqqūah*) *perfume*.

2215f מִרְקָח (*merqāh*) *aromatic spices*.

2215g מִרְקָחָה (*merqāhā*) *ointment pot*.

2215h מִרְקָחַת (*mirqahat*) *ointment, mixture*.

This root is the Hebrew form of a loan word from Akkadian, *ruqqu*, which also means to compound ointments and unguents. There is evidence that the perfumers trade was already highly skilled by 2000 B.C. in Mesopotamia.

The root occurs in the Qal stem six times, three times in Ex 30 (vv. 25, 33, 35), with a strong prohibition against the making of any ointment similar to that used in the tabernacle ritual, and in Eccl 10:1; I Chr 9:30. In all of these occurrences it refers to sweet smelling ointments to be burned as incense or spread on the body. *rāqah* appears once in the Pual (II Chr 16:14) "with sweet odors and various kinds of spices compounded by the perfumer." *rāqah* also occurs once in the Hiphil stem (Ezk 24:10); rsv reads, "empty out the broth," which is without textual foundation, KJV, "spice it well," but the Hebrew actually says "spice the spices well," which adds to the cynical mood of the injunction, for no amount of spicing can make false worship suitable before God.

reqah. *Spiced.* This is a very obscure and highly poetic masculine noun. It appears only once, in Song 8:2. It is connected to the standard Hebrew word for wine, in a construction found in ancient texts from almost all cultures and eras. The passage reads, "I would cause you to drink of spiced wine."

rōqēah. *Ointment.* *rōqēah* is a form of the Qal participle of *rāqah*. It appears in three passages describing ointments and their uses in the Israelite culture (Ex 30:25, 35; 37:29) and one aphorism (Eccl 10:1), "Dead flies make the perfumer's ointment stink."

raqqāh. *Perfumer.* This was a widely renowned profession in the ancient near east. The

terms "spice," "compounder" and "perfumer" are all cognate. There is every evidence that this was a loan word from Ugaritic and then to Akkadian. It appears twice (I Sam 18:13; Neh 3:8), "and next after him came Hananiah one of the perfumers." The feminine form of this noun appears in I Sam 8:13, "And he will take your daughters to be perfumers (*raqqāhā*)."

riqqūah. *Perfume.* This masculine noun appears only once in the plural in Isa 57:9, "You made pilgrimage to Molech with oil and heaped up your perfumes." The term is a loanword from Akkadian *riqqu*.

merqāh. *Aromatic spices.* This rare word is a participle derived from the root *rāqah*. It is connected to the standard Hebrew term for "tower," *migdalot*. It can only be interpreted in the context of the words used with it (Song 5:13), "His cheeks are as a bed of spices; as banks of sweet herbs."

merqāhā. *Ointment pot.* The Hiphil participle derived from *rāqah* appears twice (Job 41:23; Ezk 24:10), "Empty out the ointment pot." However, such a reading is doubtful.

mirqahat. *Ointment mixture.* This unusual term occurs three times, Ex 30:25; I Chr 9:30; II Chr 16:14, "And many kinds of ointment mixtures prepared by the perfumers' skill."

W.W.

רָקִיעַ (*rāqia'*). See no. 2217a.

רָקִיעַ (*rāqīq*). See no. 2218b.

2216 רָקַם (*rāqam*) *variegate* (e.g. Ex 38:23; 35:25; Ps 139:15).

Derivatives

2216a רִקְמָה (*riqmā*) *variegated stuff* (e.g. Jud 5:30; Ezk 16:18).

2217 רָקַע (*rāqa'*) *stamp, spread out, stretch*.

Derivatives

2217a רָקִיעַ (*rāqia'*) *firmament*.

2217b רִיקָה (*riqqūa'*) *expansion* (Num 17:3).

The basic concept in *rāqa'* is stamping, as with the foot, and what results, i.e. a spreading out or stretching forth. In the or the foot-stamping connotation of *rāqa'* may be understood literally, indicating either a malicious glee (Ezk 25:6) or a threatening excitement (6:11). It may be used figuratively to describe beaten and crushed enemies (II Sam 22:43). In the Piel and Pual stems, the verb *rāqa'* acquires the sense of beating out precious metals, and of the spreading that results, e.g. to spread over (Asv, "overlay") an

image (Isa 40:19). For the gold of Ex 39:3 *riqqa'*, "hammer out" (RSV), is rendered "beat thin"; for the silver in Jer 10:9, "spread into plates"; and for the bronze in Num 16:39 [H 17:4], "make broad" (plates). *rāqa'* then comes to denote God's spreading forth the tangible earth (Isa 42:5; 44:24), stretching out its land above the water (Ps 136:6), or spreading out the intangible sky (Job 37:18).

rāqia'. *Firmament.* (NASB renders more correctly as "expanse"; cf. *riqqū'ē pahim* (Num 16:38 [H 17:3]), literally "an expansion of plates," i.e. broad plates, beaten out (BDB, p. 956). *rāqia'* may refer to a limited space, such as that of the canopy over the cherubim, under the throne in Ezekiel's vision (1:22, 26). Or it may refer to the broad "expanse of heaven" (Dan 12:3, NASB), as it does in thirteen of its seventeen occurrences.

rāqia' is the most important derivative of *rāqa'*. It identifies God's heavenly expanse. The Mosaic account of creation uses *rāqia'* interchangeably for the "open expanse of the heavens" in which birds fly (Gen 1:20 NASB), i.e. the atmosphere (H. C. Leupold, *Exposition of Genesis*, I, p. 59), and that farther expanse of sky in which God placed "the lights . . . for signs and for seasons" (vv. 14, 17, referring apparently to their becoming visible through the cloud cover; the stars, sun, and moon presumably having been created already in v. 3), i.e. empty space (ISBE, I, p. 315), over which, as Job said, "He stretches out the north" (Job 26:7). The former receives greater emphasis, particularly during that period before the second day, when the earth cooled sufficiently (?) to permit surface waters, separated from what must still have been a massive cloud-bank above, by the atmospheric expanse (Gen 1:6-8). Such circumstances serve to explain the OT's poetic references to "doors" or "windows" for the phenomenon of rainfall, e.g., "He commanded the clouds above, and opened the doors of heaven" (Ps 78:23). That the Hebrews knew rain came from clouds is clear from Isa 5:6, etc.

In pre-Christian Egypt confusion was introduced into biblical cosmology when the LXX, perhaps under the influence of Alexandrian theories of a "stone vault" of heaven, rendered *rāqia'* by *stereōma*, suggesting some firm, solid structure. This Greek concept was then reflected by the Latin *firmamentum*, hence כִּנּוּן "firmament." To this day negative criticism speaks of the "vault, or 'firmament,' regarded by Hebrews as solid, and supporting 'waters' above it" (BDB, p. 956); cf. the rendering of Job 37:18, "The skies, strong (*hāzāqim*) as a molten mirror (cf. Ps 150:1, their "mighty expanse"), changed by the RSV to read, "the skies, hard." Babylonian

mythology recounts how Marduk used half of Tiamat's carcass to form the heavens (*shamamu*) held in place by a crossbar (!). In the OT, however, Isaiah insists that God "stretches out the heavens [lit.] like gauze (*dōq*, Isa 40:22); and even Ezekiel's limited canopy (*rāqia'*) is "as the [lit.] eye of awesome ice" (Ezk 1:22), i.e. transparent, "shining like crystal" (RSV), though so dazzling as to be terrifying (KD; cf. Dan 12:3 "brightness").

J.B.P.

2218 רִקָּה (rqq) I. Assumed root of the following.

2218a רִקָּה (raq) *thin*.

2218b רִקִּיקָה (rāqiq) *a thin cake*.

2218c רִקְיָה (raqqā) *the temple* (Jud 4:21, 22; 5:26).

raq. *Thin.* This rare adjective is used only three times, in the narrative of Pharaoh's dream as told to Joseph. The root is used only to describe the seven lean cows which came up from the Nile (Gen 41:19-20, 27). The same root is developed into the common adverb meaning "only." It occurs over one hundred times in the OT, the initial usage appears in Gen 6:5, "His heart was only evil continually." The meaning is invariant.

rāqiq. *Thin cake of unleavened bread.* This masculine noun derived from the Hiphil stem of the verbal root *rāqaq* occurs eight times in the OT. It is the prescribed cereal offering (Lev 2:4), "Thin cakes of unleavened bread spread with oil." The preparation of *rāqiq* is said to be one of the responsibilities of the Levites (I Chr 23:29). The other usages are all in the Pentateuch (Ex 29:2, 23; Lev 7:12; 8:26; Num 6:15, 19).

W.W.

2219 רִקָּה (rāqaq) II, spīt (Lev 15:8).

Derivative

2219a רִקָּה (rōq) *spittle* (Isa 50:6; Job 30:10).

2220 רִשָּׁה (rshh). Assumed root of the following.

2220a רִשְׁיוֹן (rishyōn) *permission* (Ez 3:7).

רִשְׁיוֹן (rishyōn). See no. 2220a.

2221 רָשָׁם (*rāsham*) *inscribe, note* (Dan 10:21).

2222 רָשָׁע (*rāsha'*) *be wicked, act wickedly*. Denominative verb.

Parent Noun

2222a רָשָׁע (*resha'*) *wrong, wickedness, guilt*.

2222b רָשָׁע (*rāshā'*) *wicked, criminal*.

2222c רִשְׁעָה (*rish'ā*) *guilt, wickedness*.

2222d מִרְשָׁעַת (*mirsha'at*) *wickedness* (II Chr 24:7).

The verb is denominative from *resha'* "wrong, wickedness," and seems to have two meanings, a) to act wickedly, and b) to condemn as guilty. It occurs thirty-three times.

The verbal forms are only in the Qal and Hiphil stems. In the Qal the verb means to be wrong, unjust, or guilty, and in the Hiphil, it means either to condemn as guilty or to act wickedly.

In Aramaic the adjective *rshy'* "one who behaves wickedly" occurs in opposition to the adjective *šdyq* "one who does right" (*Words of Ahiqar*, ANET p. 430, ll. 168.171). In the OT the root *rāsha'* appears as the most important antonym of *šedeq* "righteousness" (cf. K. Richards, "A Form and Tradition-historical Study of *rsh'*," Ph.D. dissertation, Claremont, 1970 [cf. ZAW 83:402]). In contrast to *šdq* it denotes the negative behavior of evil thoughts, words and deeds, a behavior not only contrary to God's character, but also hostile to the community and which at the same time betrays the inner disharmony and unrest of a man (cf. Isa 57:20; cf. J. Pedersen, *Israel I-II* (London) p. 418f.).

In a case law it states that if two men are hostile regarding property, God will declare one of them guilty. In a similar law (Deut 25:1), judges are to be just in deciding which is guilty. These have to do with ruptures in social relationships. An example of a rupture of international relationship is seen in I Sam 14:47 which Saul settles by military conquest. The verb can describe a general breakdown of social relationships (Ps 94:21) in which bad people mistreat good people. This contrast between good and bad people is highlighted by reference to the way God treats people. He takes a stand against wickedness, for it is contrary to his nature (Job 40:8; Ps 37:33; Prov 12:2; Isa 50:9; 54:17). It was within this reference that kings of Israel and Judah were evaluated (II Chr 20:35; 22:3). So did the people of God protest their innocence; they did not act like wicked people (II Sam 22:22; Job 10:2, 7; Ps 18:21 [H 22]).

The reason there is a difference between them is that one type follows a life style contrary to the laws of God (Prov 17:15; Dan 12:10; cf. Job 32:3; I Kgs 8:32; Dan 11:32).

This life style is not irreversible; it can be changed, basically by confession. This is seen in several prayers of supplication (II Chr 6:37; Neh 9:33; Ps 106:6; Dan 9:5).

resha'. *Wrong, wickedness.* The masculine noun *resha'* denotes the kind of life that is opposite to God's character (Job 34:10; Ps 5:4 [H 5]; 45:7 [H 8]), and draws statements of indictment and judgment (Isa 58:4; Ezk 3:19; Mic 6:10-11).

During an encounter between David and Saul, David declared he could not harm the king's person, for it would be *resha'*, and elsewhere this sin is tied to injustice (Eccl 3:16), violence (Isa 58:4) and dishonesty in the marketplace (Mic 6:10-11). Twice, Elihu accused Job of *resha'*, against which Job vigorously protested.

In the Wisdom literature, *resha'* is set over against "righteousness" and "righteous," and pains are taken to show how inadequate and devastating the pursuit of *resha'* is (Prov 10:2; 12:3; Eccl 7:25; 8:8). Hosea concurred (10:13). The Psalmist pled to God for his exposure of this kind of sin (10:15) and a wise man declared his commitment to the opposite kind, the righteous life (Prov 8:7; cf. Ps 84:10 [H 11]).

Though Isaiah depicted *resha'* as a yoke, neither he nor others in the Old Testament regarded *resha'* as necessarily binding man forever. Even as early as Moses, that man of God testified that he pleaded with God to dismiss Israel's sin from his remembrance (Deut 9:27). The Psalmist asked for personal forgiveness from God (Ps 141:4). A prayer in Jer 14:2 acknowledges or confesses the reality of sin. There is a declaration of God that he will forgive by unloosing their yoke in Isa 58:6, but this is balanced by a divine decree that men bear heavy responsibility for both their sin and their forgiveness (Ezk 33:12).

rāshā'. *Wicked, criminal.* This masculine noun appears over 266 times, mostly in Job, Ps, Prov, and Ezk. It is used in parallel with almost every Hebrew word for sin, evil, and iniquity. The word functions also as an adjective to designate in concrete terms the actions and conduct of a type of person. Sometimes context points to the attitude and intention of people. Primarily, *rāshā'* is an objective fact, rather than a subjective phenomenon.

The measure of *rāshā'* is its contrast with the character and attitude of God. The questions in Abraham's intercession imply that God is against *rāshā'* (wicked) people. So does Ex 23:7; Job 9:22; Ps 37:28; Ezk 33:11; Mic 6:10.

Wicked people were guilty of violation of the social rights of others, for they were violent, oppressive, greedy, engaged in plotting against and trapping poor people, and quite willing to murder to gain their ends. In a word, they threatened the community. They were dishonest in business and

in the courtroom. For examples see Ex 2:13; Num 35:31; II Sam 4:11. Second Chronicles 19:2 notes that these people hate the Lord. Malachi 3:18 gives their refusal to serve the Lord as a major trait.

Frequently, eighty times, half of them in the book of Proverbs, *rāshā'* is placed in antithetic parallelism to *sedeq* (the righteous) and it is from this contrast we get the clearest profile of the *rāshā'* kind of people. The Psalmist protests that he is not one of them, for they persecute him and take a stand against God and his laws. At times he begs that God protect him from them. The book of Prov contains a great deal of antithetical parallelism, which contrasts the *rāshā'* and the *sedeq* in black and white terms. The focus is on both the quality of lifestyle and the results of these two ways of living. Whereas the wicked forsake God, the righteous cling to him. Though the wicked are oppressive and dishonest, the righteous are upright and lovers of truth, etc.

Other antonyms include: *tam* "blameless" (Job 9:22; Prov 11:5); *yashar* "upright" (Ps 37:37f; Prov 2:21f; 11:11, etc.); *maškil* "the wise" (Dan 12:10); "the poor" = "the afflicted" (*dal*, Isa 11:4; 'ani, Job 36:6; 'anāw, Isa 11:4; Ps 147:6), etc.

Words semantically parallel include "those who hate righteousness" (Ps 34:22); "those who do evil" (Ps 28:3; 92:7 [H 8]; 101:8; 141:10 [H 9]; cf. Isa 55:7; Job 22:16, 18); "those who do wickedly" (*m' rē'im*, Ps 26:5; 37:10 [H 9]; Prov 24:19, *ra'*, Ps 10:15; Prov 4:14; 14:19; 24:20; *m' 'awwēl*, Ps 71:4; 'awwāl, Job 27:7; Prov 29:27; *hānēp*, Job 20:5); "those who deal ruthlessly" Ps 71:4; *ōhēb hamas*, Ps 11:5; 'ish *hāmāsīm*, Ps 140:5); "tyrant" ('ariš, Isa 13:11; Job 15:20; 27:13; cf. Ps 37:35; *mōshēl* "ruler" Isa 14:5); "proud" (*gē'im*, Ps 94:3; cf. Job 40:12; *zēdīm* "arrogant" Isa 13:11; "foolish" *hōl'īm* (Ps 73:3; 75:4 [H 5]; "rich" ('āshir, Isa 53:9; cf. Ps 17:13ff), "sinners" (Ps 1:1, 5; 104:35); "scoffers" (Ps 1:1; Prov 9:7); "transgressors" (Ps 37:38); "liars" (Ps 58:3 [H 4]; 109:2); "faithless" (Jer 12:1; Hab 1:13; Prov 2:22; 21:18); etc.

The inner lives of the wicked correspond to their actions. They are vicious, haughty, treacherous, vile, polluted, and unstable. One might expect that such people would always be kept under the restraints of law and order and suffer defeat every moment of life. Not so. Job was troubled with the strange topsy-turvy nature of the moral order here and now (Job 9:24; 10:3; 16:11; 21:7; 17, 28). The Preacher struggled with this absurdity (Eccl 7:15; 8:14), as did Jeremiah (12:1).

The doubts of some in times of stress did not cloud the clear doctrine of God's strong opposition to wicked people. Psalmists and prophets not only pleaded that God punish the wicked, God

proclaimed his intention to do so, and there are descriptions of the horror of his judgments (Job 36:17; Ps 9:5 [H 6], 16 [H 17]; Prov 24:20–24; Jer 25:31; Zeph 1:3; Mal 4:3).

One might conclude that once God punished the wicked the moral order would be corrected, but God's servants knew that judgment was not God's best or most desired solution. Both God and man saw acts of salvation as the best way to deal with the wicked person. The Psalmist pled for forgiveness (71:4; 82:4), and God both promised (Isa 55:7) and provided for it (Isa 53:9). Moses (Num 16:26); a wise man (Prov 4:14); Isaiah, and a prophet (Isa 55:7) exhorted people to forsake the wicked life and turn to him. Particularly, in Ezk 18, 33, the responsibility for doing this was laid directly on the individual. And there is recorded both testimony (Ps 1:1; 37:40) and commitment to the reality of such salvation by God's mercy (Ps 39:1 [H 2]; 119:95).

rish'ā. Guilt, wickedness. This feminine noun appears fifteen times, mostly in the abstract sense of wickedness or act of wickedness. Moses explained to his people that the wickedness of Canaan was the reason Israel could enter Canaan. The conquest was to be a judgment, not a demonstration of Israel's greatness (Deut 9:4–5). Moses also told the civil judges to beat those who committed *rish'ā*. Twice the wise men contrasted *rish'ā* with righteousness (Prov 11:5; 13:6). In Mal 3:15 those who do wickedly are said to be arrogant enemies of God (cf. Ezk 5:6) with dire results (see Isa 9:18; Mal 1:4; 4:1). An angel showed Zech a woman (Wickedness) trapped in an ephah.

Ezekiel 18, 30 also sets forth the alternatives facing man. A person may turn to *rish'ā* and die, or turn from it to God and live.

mirsha'at. Wickedness. A feminine noun used once (II Chr 24:7) in the OT as an offensive title for Athaliah, (the [embodied] wickedness, BDB).

G.H.L.

2223 רָשָׁה (*rshp*). Assumed root of the following.

2223a רָשָׁה (*reshep*) *flame, firebolt, spark*.

The view has been expressed that *reshep* in Job 5:7 refers not to literal sparks but to Reshep

the god of fever and pestilence (see Pope, M., *Job*, AB, *in loc.*). There may indeed be some references in Job and elsewhere to mythological themes used for illustration without implying belief in their truth. W. F. Albright calls this Israel's true demythologizing (YGC pp. 185–189). E. Smick discusses the matter helpfully ("Mythology and the Book of Job," JETS 13:101–108). On the other hand, we must remember that Israel lived in a milieu of animism where natural objects had been deified for centuries. The sun was also the sun god. The sea was also the sea god. When Israel used terms like sun, sea, fire, etc. she did not necessarily demythologize. Usually she just refused to speak as animists did.

R.L.H.

- 2224 *רָשַׁשׁ (*rāshash*) **beat down, shatter**. This verb occurs in the Poel (Jer 5:17) and the Pual (Mal 1:4).

רַתּוֹק (*rattôq*). See no. 2227b.

- 2225 *רָתַח (*rātah*) **boil**. Is used in the Piel (Ezk 24:5); Pual (Job 30:27), and Hiphil (Job 41:23).

Derivative

- 2225a רֵתַח (*retah*) **boiling** (Ezk 24:5).
 2226 רָתַם (*rātam*) **bind, attach** (Mic 1:13).
 2226a רֵתֵם (*rōtem*) **a kind of broom plant** (I Kgs 19:5; Job 30:4; Ps 120:4).
 2227 *רָתַק (*rātaq*) **bind**. Occurs in the Pual (Nah 3:10) and Niphal (Eccl 12:6).

Derivatives

- 2227a רִתְּקָה (*r'tūqâ*) **chain** (Isa 40:19).
 2227b רַתּוֹק (*rattôq*) **chain** (Ezk 7:23; I Kgs 6:21).
 2228 רתת (*rtt*). **Assumed root of the following.**
 2228a רֵתֵת (*r'tēt*) **trembling** (Hos 13:1).

2229 שָׂרַר (*ś'r*). Assumed root of the following.

2229a שָׂרַר (*ś''ōr*) *leaven* (e.g. Ex 13:7; Deut 16:4).

שָׂרַר (*śē'r*). See no. 1421j.

2230 שָׁבַק (*śbk*). Assumed root of the following.

2230a שָׁבַק (*śōbek*) *network of boughs* (II Sam 18:9).

2230b שָׁבַק (*ś'bākā*) *lattice work* (probably window lattice, II Kgs 1:2; network, I Kgs 7:17).

2231 שָׂבַע (*śābē'a'*) *be satisfied*.

Derivatives

2231a שָׂבַע (*śōba'*) *fullness*.

2231b שָׂבַע (*śāb'ā*), שָׂבַע (*śib'ā*) *satisfaction*.

2231c שָׂבַע (*śābā'*) *plenty*.

2231d שָׂבַע (*śābē'a'*) *satisfied*.

The usual sense of the verb is "to be satisfied by nourishment." Thus in the episode with the manna the Israelites had food in the morning to the full (Ex 16:8). In the Hiphil stem it is used to make the point that the Lord satisfied his people with bread. For example, when he took up his residence in Zion, he satisfied the poor with bread (Ps 132:15). It may be, however, that more than physical bread is in view here. Jerusalem in turn is called upon to praise the Lord because he fills her with the finest of wheat (Ps 147:14). The apostates, however, in Jeremiah's time foolishly attributed their plenty of food to the queen of heaven (Jer 44:17).

The word is also used with this same notion in personification. The earth is satisfied with God's creative acts (Ps 104:13). In the day of the Lord the sword shall devour, and it shall be filled to the full and made drunk with the blood of his adversaries (Jer 46:10).

In addition to the idea of nourishment, the word is used to connote fullness in other areas of life. David and Jehoida were full of days when they died (I Chr 23:1; II Chr 24:15), and the trees of the Lord are full of sap (Ps 104:16).

śōba'. *Fullness, sufficiency.* In seven of its eight occurrences this masculine noun speaks of fullness of food. The people complain that in contrast to the wilderness they ate food to their fill in Egypt (Ex 16:3). The Lord in his grace sent them food to the full in the wilderness (Ps 78:25). According to the Law, Israel will eat food to the full

only as they keep the Lord's covenant (Lev 25:19; 26:5).

Likewise, according to the wise Solomon, the righteous man eats until he is satisfied (Prov 13:25). In these passages the thought of fullness extends beyond merely physical food. Moreover, the Possessor of the Land allowed the poor to enter his neighbor's vineyard and eat all the grapes he wanted (Deut 23:24 [H 25]). Like the verb, the noun has a metaphorical sense of being filled spiritually. Raised from the dead, the Messiah proclaims, "In thy presence is fullness of joy" (Ps 16:11).

A derived notion is its metaphorical sense of being satisfied spiritually with God's good gifts. Because the Lord answered the prayer of the Psalmist by delivering him from death at the hands of the wicked, the meek shall eat and be satisfied (Ps 22:26 [H 27]). In this messianic psalm a satisfaction is promised which extends beyond the bounds of merely having enough food and drink to a spiritual satisfaction because the Lord answered the prayer of the righteous. Jesus, in the Beatitudes, has a similar notion in mind when he says, "Blessed are those who hunger and thirst after righteousness for they shall be filled" (Mt 5:6; cf. Ps 107:9). Isaiah says that the charitable will find their own souls satisfied in drought (Isa 58:11), and Moses prays that the Lord will satisfy Israel early with his love (Ps 90:14). The Suffering Servant shall be satisfied when he sees the new life his death produced (Isa 53:11).

One can eat and not be satisfied because there was not enough food to be had (Lev 26:26; Mic 6:14). But it is also possible to be surfeited with physical wealth and not be satisfied (Eccl 4:8). In fact, he who loves money will never be satisfied with it (Eccl 5:10 [H 9]).

There are, then, some things that are never satisfied: the grave (Hab 2:5), the eye of man (Prov 27:20), the barren womb, the parched earth, and fire (Prov 30:16). However, the earth cannot stand a fool when he is full of bread (Prov 30:22).

While the uses cited above are more or less positive, others have negative connotations. Sometimes one is full of the wrong things. In these instances the word is used censoriously to denote excess. The Psalmist's soul is full of troubles (Ps 88:3 [H 4]), and the people have had their fill of contempt and scoffing (Ps 123:3). Sinners are rightfully filled with shame (Lam 3:30). Jeremiah (cf. Jer 9:18) is filled with bitterness (Lam 3:15); yet it is good for a man to be filled

with shame so that he may trust in the Lord (Hab 2:16) and the Lord will gorge the beasts with Pharaoh (Ezk 32:4).

The Lord is weary of unrighteous offerings (Isa 1:11) and guests are like fish—after three days they stink (Prov 25:17).

Finally there is spiritual danger in material abundance—it leads to a spirit of independence. Moses warns the people to beware lest they forget the Lord when their houses are full (Deut 6:11; cf. 8:10), and the Lord predicts that they will fall into this trap (Deut 31:20). Agur anticipates the Lord's prayer for one's daily bread when he declines to pray for riches lest he be full, and deny the Lord (Prov 30:9).

šāb'ā. šīb'ā. Satisfaction, fullness, enough. This feminine noun, used six times in the prophets, denotes satisfaction with reference to food, carnal desires, and spiritual well-being.

The merchandise of Tyre will be for those before the Lord that they might eat sufficiently (Isa 23:18). Ezekiel invites the fowl to eat the fat of Israel's most northern enemies to their full (Ezk 39:19).

The word is also used with the negative to denote a lack for various reasons. The restored exiles did not have enough to eat because of their erroneous priorities (Hag 1:6): Israel's watchmen, though gorging themselves on the people, never had enough because of their greed (Isa 56:11), and Jerusalem played the harlot even with Assyria because her carnal appetite was insatiable (Ezk 16:28). Whereas physical food can never satisfy, God's spiritual blessings can (Isa 55:2).

As seen in the study of the verb, physical satisfaction can be a snare to sin. So in Ezk 16:49, "fulness of bread" contributed to the fall of both Sodom and Jerusalem.

šābā'. Plenty, abundance, satiety. Found six times in Gen, once in Prov 3:10, and once in Eccl 5:12 [H 11], this masculine noun seems to refer to the possession of plenty and abundance of food.

šābēa'. Satisfied, sated, abounding in. This adjective is used ten times in the OT. In each case it conveys the idea of being full and satisfied. In Gen 25:8 Abraham dies being "old and full [of years]." Proverbs 27:7 speaks of a person full of food, while Job 10:15 shows Job "full of confusion."

B.K.W.

2232 שָׁבַר (*šābar*) *examine* (Qal), *wait, hope* (Piel).

Derivative

2232a שֶׁבַר (*šēber*) *hope*.

Whereas BDB distinguishes two roots, one occurring twice in the Qal stem with the meaning "to view, inspect" and related to the Arab root *sabara* "to probe" (a wound), and the other eight times in the Piel stem with the meaning "to wait, hope," KB considers them as one word. Both agree, however, that in the Qal stem the root *šbr* means "to examine" and in Piel it means "to wait, hope."

Thus it is used in the Qal stem when Nehemiah "viewed" or "inspected" the walls of Jerusalem" (Neh 2:13, 15).

In Ps 119:166 ("I have hoped for Thy salvation"), *šābar* is used for a confident expression of hope and waiting for God's salvation by one who could say that he had "done Thy commandments."

Just as the Psalmist in Ps 119:166 (above) hopefully *waited* in faith for God's salvation, Ps 145:15 declares that "the eyes of all *wait* upon (marg. or, *look unto*) Thee" (*šābar*) for "their meat in due season."

The word *šābar*, is also capable in Scripture of portraying waiting in vain. Thus in Est 9:1 the enemies of the Jews *hoped* to triumph, but failed.

šēber. Hope. Masculine noun found only in Ps 119:116 and 146:5, where both times it refers to God and his Word as the *hope* of the Psalmist. It looks abroad to that life and deliverance which alone has power to make a person safe (Ps 119) and happy (Ps 146).

G.G.C.

2233 נָשָׂא (*šāgā'*) *increase, grow, magnify*.

Derivatives

2233a נָשָׂא (*šaggi'*) *great* (Job 36:20; 37:24).

2233b נָשָׂא (*šāgā'*) *grow* (a by-form).

The form, *šāgā'*, occurs only twice in the OT (Job 12:23, 36:24). Job, in replying to his friends, accepts the sovereignty of God even in his own personal life's disposition, and explains, "He increaseth the nations, and destroyeth them" (12:23). That is, "God does what he wants to do as sovereign Lord, and your desperate search to find some precipitating cause for my suffering is unnecessary."

In Job 36:24, Elihu corrects Job for judging God: "Remember to magnify his work." He seems to be saying, "Listen Job, it is your duty to magnify God, and not to question him when he chastens you."

Thus *šāgā'* is used both for God's causing nations to grow great and for men to enlarge God's glory by recognizing and praising his works.

The by-form *šāgā*, is used similarly. Cf. Job 8:7, 11.

Psalm 92:12 [H 13] reminds us that, "The righteous . . . shall grow like a cedar in Lebanon," while "the ungodly . . . increase [only] in riches" (Ps 73:12)!

The above notes present part of the biblical philosophy of life intertwined about these little words, *śāgā* and *śāgā*. God causes the nations to grow great and he also causes the righteous to be increased at their end! The rich may grow in this world's goods, but they soon fall; while the godly grow more solid and enduring, like that of the great northern Palestinian cedars! Our task is to magnify him for all this!

G.G.C.

2234 שָׁנֵב (*śāgab*) *be inaccessibly high*.

Derivative

2234a מִשְׁגָּב (*mišgāb*) *high place, refuge*.

The verb is used in a local sense with reference to a lofty city (Isa 26:5) and high walls (Prov 18:11; Isa 30:13) even as it is used in the Amarna correspondence.

Associated with the notion of "height" it frequently has the connotation of security. Thus in Deut 2:36 the word is translated "strong" (of a city) and in the Piel stem it is rendered both "to set on high," and "to defend" or "protect" (Ps 20:1 [H 2]; 59:1, 2; 69:29 [H 30]; 91:14). This connotation is also present when David says of God's knowledge it is lofty, I am no match for it (Ps 139:6). But whereas man's most secure defenses are proved vulnerable before the Lord (Deut 2:36; Isa 2:11; 26:5), "The name of the Lord is a strong tower; the righteous runneth into it and is safe" (Prov 18:10).

Another connotation is that of exaltation to a position of honor. Thus the Lord (Isa 2:11, 17), his name (Ps 148:13), and his needy saints (Ps 107:41) are "set on high" i.e. "exalted."

mišgāb. *High place, high tower, refuge.* The masculine noun *mišgāb* is derived from the root, *śāgab* "to be high," and is found fifteen times in the OT, eleven of these being in Ps.

In most appearances of the word it is used in a favorable sense. *mišgāb* speaks of God being the believer's high tower (II Sam 22:3), or his refuge (Ps 46:7, 11 [8, 12]), or defense (Isa 33:16). The allusion is to the fact that in the ancient world, safety to either the one fleeing or to the one at rest was synonymous with reaching and remaining upon some fortified height which would be inaccessible to beast and enemy alike. The Psalmist, as well as the prophets, saw this to be the precise picture of the believer's security in God.

mišgāb "high place," is not to be confused with the *bāmā* "high place," which signifies a hill consecrated to the pagan Canaanite deities,

such as Baal. *mišgāb* is never used for such a location.

G.G.C.

שָׁגָה (*śāgā*). See no. 2233b.

שָׁגִי (*śāgi*). See no. 2233a.

2235 שָׂדֶד (*śādad*) *harrow* (Piel only, Job 39:10; Hos 10:11).

2236 שָׂדֶה (*śdh*). **Assumed root of the following.**

2236a שָׂדֵי (*śāday*) *field, land*. Poetic synonym of *śādeh* (e.g. Ps 8:7 [H 8]; 96:12).

2236b שָׂדֶה (*śādeh*) *field*.

śādeh. *Field, country, ground, land.* This masculine noun broadly designates the open field, country, or a definite portion of ground, a field.

In the former notion it is used of pasture land (Gen 29:2); unfrequented country exposed to violence (Gen 4:8; Deut 21:1; 22:25) or wild beasts (Ex 22:31 [H 30]); land containing flora and fauna (Gen 25:27; 30:14; Ex 10:15); open country outside a walled city (Jud 9:32, 42; I Sam 19:3) and an expanse of country in contrast to mountains (Jud 5:18; Jer 17:3).

As a definite portion of ground, it may denote cultivated ground (Gen 37:7; Ruth 2:2); private property (Gen 47:20; Isa 5:8); city land, adjacent to the town and subject to its control (Gen 41:48; Lev 25:34); the territory of a nation or tribe (Gen 41:48; Lev 25:34); and the personal estate of a king (II Sam 9:7; 19:29, 30).

Micah 3:12 gives the awful prediction of Zion being plowed as a field. Jeremiah 32:7-44 not only portrays the ancient process of buying and selling a field, but it also gives the marvelous prophecy that someday God will again redeem the fields of Israel. Then the voices of children playing without fear will replace the sound of the hooves of the conqueror's horses.

שָׂדֵי (*śāday*). See no. 2236a.

2237 שֶׁה (*śeh*) *lamb, sheep*. (ASV and RSV are the same.)

A *śeh*, either a sheep (e.g. *kebes*) or a goat (e.g. 'ēz), is a member of the flock. In Akkadian *shu'u* = "ram" and in Ug. ritual texts it is limited to "ram" or "he-goat"; elsewhere its use is more general, encompassing both sexes (B. Levine). This animal is clean; therefore, it may be eaten (Deut 14:4) and offered for a sacrifice. The firstling belongs to Yahweh (Ex 34:19; Lev 27:26). For the passover meal a year old male lamb without blemish is to be roasted (Ex 12:3ff.). A lamb is suitable for a guilt offering or a burnt offering (Lev 5:7; 12:8). One with some defects may be offered as a freewill offering (Lev 22:23). In

2238 שָׁהַד (*śāhēd*)

Ezekiel's new temple one sheep out of 200 was to be taken for offerings.

The presence of sheep and cattle indicates that a place is domesticated and can be safely inhabited (Isa 7:25). The peaceful, simple nature of a lamb also lends itself to various figurative uses. The psalmist compares himself to a lost sheep which has gone astray; but since he has not forgotten the commandments, he desires that God search for him (Ps 119:176). Jeremiah describes Israel in terms of a scattered flock of sheep (Jer 20:17). The most significant usage is in Isa 53:7 where the Messiah is led "like a lamb to the slaughter" but bore the suffering in silent submission—a verse echoed in the vision of the sacrificial lamb of Rev 5:6 and 13:8.

J.E.H.

2238 שָׁהַד (*śāhēd*) *witness* (Job 16:19; Gen 31:47). Loan word from Aramaic in Job. In Gen 31:47, Laban's designation of the heap of witness is in Aramaic.

2239 שָׁהַר (*śhr*). **Assumed root of the following.**
2239a שָׁהָרֹן (*śāhārôn*) *moon, or crescent* (Jud 8:21; Isa 3:18).

שָׁהָרֹן (*śāhārôn*). See no. 2239a.

2240 שָׁוַט (*śūt*) *swerve, fall away* (Ps 40:5).

Derivative

2240a שָׁטַט (*śēṭ*), שָׁטָן (*śēṭ*) *swerver, revolter* (Hos 5:2).

2241 שָׁוַךְ (*śūk*) *I, hedge or fence up* (Job 1:10; Hos 2:8). Alternate spelling of *sūk* II (q.v.).

Derivative

2241a מִשְׁכָּה (*m'śūkā*) *hedge* (Prov 15:19). Alternate spelling of *m'śūkā* (q.v.).

2242 שָׁוַךְ (*śūk*) **II. Assumed root of the following.**

2242a שָׁוַךְ (*śōk*) *branch or brushwood* (Jud 9:49).

2242b שָׁוַךְ (*śōkā*) *branch or brushwood* (Jud 9:48, 49).

2243 שָׁוַם (*śūm*), שָׁוַם (*śīm*) *I, put, place, set, appoint, make*.

Derivative

2243a תְּשֻׁמַּת (*t'śūmet*) *pledge, security* (Lev 5:21).

This verb is used 572 times in the Qal stem, scattered almost evenly throughout the Old Testament. It is used only two times in the Hiphil

(Ezk 14:18; 21:16 [H 21]; Job 4:20) and only once in the Hophal (Gen 24:33) to round out its 575 Old Testament usages.

The basic root idea of this verb is to put, place something somewhere. Hence it is translated in the LXX generally by *tithēmi* which almost identically means to put, place. The Arabic cognate is found in *šam* of the Medieval Yemenite where it is used "to set or constitute," e.g., a price (William Gesenius, *Gesenius' Hebrew and Chaldee Lexicon*, 1842; Eerdmans, 1957, *ad loc.*).

There are at least a half dozen utilizations of *śūm*, sometimes overlapping.

1. To Place In A Location. This usage affirms that some object has been placed in a named location. Thus in I Sam 17:54, David "put his armour in his tent," and in Lev 8:8 Moses "put the breastplate upon him [Aaron]." Not only inanimate objects receive this treatment, but also persons. Thus in the classic usage of the verb, Genesis 2:8, "God placed there [in the Garden] the man." *śūm* is also used in this way to signify the placing of the divine name in a location of his choice ("in Jerusalem will I put my name," II Kgs 21:4).

Gesenius divides this usage of *śūm* into two chief categories, viz., (a) the placing of people and things into an upright position (e.g., II Chr 33:7); and (b) the placing of things into a prone or lying position (e.g., Deut 10:5; *ibid.*). While *śūm* is indeed used to indicate both types of placing, upon examining individual texts it often is impossible to tell with any certainty whether *śūm* is being used to indicate an upright positioning or a supine positioning. Thus in Gen 30:41, "Jacob laid the rods before . . . the cattle," it is difficult from examining *śūm* alone to be certain whether the rods were set vertically or horizontally. BDB does not advance this distinction of vertical or horizontal positioning.

2. To Appoint People to Positions. *śūm* is typically used in II Sam 17:25; "Absalom made Amasa captain," and in I Chr 11:25, "and David set him [Benaiah] over his guard." In such instances *śūm* still carries its basic idea, only here the placing is into an authority position rather than into a physical location.

3. To Establish a New Relationship. Here *śūm* is used to indicate placing someone or something in a new relationship or situation. So it is in Gen 21:18, "For I will make him [Ishmael] a great nation." Here the Lord, to use the Hebrew idiom, "places Ishmael into a great nation." Likewise in Jud 1:28, "They put the Canaanites to tribute," *śūm* is used to show that the Canaanites have now been placed as people who are to pay tribute. That is, they have been put into a new relationship.

4. To Assign Something to Someone. Another way in which *śūm* is used is to show designation.

E.g., in II Sam 23:5 we read in the KJV, "He hath made with me an everlasting covenant." The Hebrew more literally reads, "For a covenant everlasting *he-has-put* to me." Here a covenant is now put to a designated recipient, David (Cf. Ps 19:4 [H 5]).

5. To Bring About a Change. In Ex 14:21, speaking of the dividing of the Red Sea, God "made the sea dry (land)." Here, again trying to capture the idiom, God "put the sea dry," changing not its location, but its condition. Also see Isa 41:15, 18; Ezk 35:4; etc.

6. To Set Aside for Special Purposes. *śum* is further used occasionally as the verb denoting God (and sometimes human agencies) designating certain times, places, or people to some special purpose. Thus in Ex 9:5 the literal, "And the Lord put (*śum*) a set time," is well rendered in the AV as, "And the Lord *appointed* a set time."

As we have demonstrated, the verb *śum* always denotes its basic significance, to place, while at the same time comprehending a multitude of derivative meanings extending even beyond the broad categories enumerated in this article.

As Creator-Redeemer, the Lord is frequently the subject of this verb. He set the boundaries of creation (cf. Job 28:3; 38:5; 39:6; Ps 19:4 [H 5] Ps 104:9). As redeemer he made the seed of the fathers as dust (Gen 13:16; 32:12 [H 13]; cf. Deut 10:22), and made David's seed endure (Ps 89:29 [H 30]). He appointed a law in Israel (Ps 78:5), brought about miracles (Ps 78:43), desolations in the earth (Ps 46:8 [H 9]) and Israel's afflictions (Ps 66:11). But in the end time he will make Israel his instrument of righteousness (Isa 41:15).

G.G.C.

2244 שׁוּם (*śwm*), שִׁים (*śym*) II. Assumed root of the following.

2244a שׁוּמָה (*śumā*) token of unluckiness, scowl (II Sam 13:32).

2245 שׁוּר (*śur*) Meaning uncertain.

Derivative

2245a שׁוּרָה (*śôrā*) row (or a kind of grain?) meaning and derivation uncertain.

BDB suggests "to sow" (I Chr 20:3), but the parallel in II Sam 12:31 (*śim*) suggests taking this verb as a by-form, Hiphil, of *sûr* "to turn aside" (NIV "consign"). Also in Hos 9:12 the meaning "turn aside" is probable. For Jud 9:22; Hos 8:4, 12:5 cf. either *śārār* or *śārâ* "rule".

2246 שׁוּשׁ (*śûś*), שִׁישׁ (*śiš*) rejoice, exult.

Derivatives

2246a שִׂשׂוֹן (*śāsôn*) joy, gladness.

2246b מְשִׂסֹּס (*māsôs*) joy, rejoicing.

The four usages of the verb *śûs* in the Mosaic writings occur in Deut 28:63 and 30:9, twice in each verse. Here, amid the Mosaic warnings of the blessings and cursings, three times the Lord is pictured as one rejoicing over Israel to bless them for obedience to his Law, and once as rejoicing over them to destroy them for disobedience! "As the Lord rejoiced over you to do you good; so the Lord will rejoice over you to destroy you" (Deut 28:63.) *śûs* here thus seems to convey the idea of God's enthusiasm to bless the righteous and to punish the wicked. Fortunately, by God's mercy, Deut 30:9 shows that when Israel at last turns back to him, that "the Lord will again rejoice over thee for good." Likewise in the prophets Israel is the object of his joy (Isa 62:5; 65:19; Jer 32:41; Zeph 3:17.)

In the Psalms, as might be expected, the subject is Israel and the Lord is the object, thus, "Let all those that seek thee rejoice" (Ps 70:4 [H 5]). In Ps 119, the Psalm that glories in God's written word, the psalmist in exultation declares, "I rejoice at thy word" (Ps 119:162). Likewise in the prophets the people rejoice in the Lord's salvation (Isa 61:10; 65:19; 66:14).

śāsôn. Joy, gladness, rejoicing, mirth. This masculine noun makes twenty-two appearances in the OT, and almost universally it speaks of human happiness and abounding delight. Typically in Jer 25:10 God announces that he will use Nebuchadnezzar to take from sinful Judah "the voice of mirth (*śāsôn*);" and in Jer 31:13 he will turn the mourning of repentant Israel in the last days "into joy (*śāsôn*)." See the synonym, *śimhâ*.

māsôs. Joy, rejoicing, mirth, gladness. This masculine noun, used seventeen times in the OT, is often used as a metonymy representing the object which causes joy (e.g., "the joy of the whole earth is Mount Zion" Ps 48:2 [H 3]). In Isa 8:6 ("this people... rejoice in Rezin") *māsôs* is used almost as a verb. Grammatically, a better translation might be, "this people... have-rejoicing towards Rezin" (See KD, ad loc.).

G.G.C.

שָׂהָה (*śēah*). See no. 2255c.

2247 שָׂהָה (*śāhā*) swim (Isa 25:11; Ps 6:7).

Derivative

2247a שָׂהָה (*śāhû*) swimming (Ezk 47:5).

שָׂהָה (*śāhû*). See no. 2247a.

2248 שָׁחַץ (śāḥaṭ)

2248 שָׁחַץ (śāḥaṭ) *squeeze out* (Gen 40:11).

2249 שָׁחַץ (śāḥip) *panelled with wood* (Ezk 41:16). Meaning and derivation doubtful.

שָׁחַץ (śāḥaq). See no. 1905c.

שָׁחַץ (ś'ḥōq). See no. 1905d.

שָׁחַץ (śēṭ). See no. 2240a.

2250 שָׁחַץ (śāṭā) *turn aside, go aside, turn, decline*.

In Aramaic it means "to stray" and in a certain form of Ethiopic "to be seduced." These notions are close to what it expresses in Hebrew.

śāṭā in Num 5:12 speaks of a woman who is suspected by her husband of having left the true path, so that she "goes aside" to commit adultery. It says that if she "goes aside, and trespasses a trespass against him," he may take her to the priest who will cause her to drink the bitter water of jealousy. Apparently by a special supernatural action God so acted as to make the guilty woman desperately ill from the water, while the innocent drank it with impunity. This procedure would in any case settle the matter and calm a suspicious husband, while at the same time frightening onlookers into remaining pure. It was not really a trial by ordeal as some have called it, for there was no inherent danger in the water. If anything, it included a lie detection provision. Any woman who could take such solemn oaths as were required without betraying guilt was probably innocent (see *b' tūlim*). śāṭā is used with reference to this matter also in verses 19, 20, 29 of this same chapter.

Proverbs 7:25 admonishes, "Let not thine heart turn aside (śāṭā) unto her (the prostitute's) paths." Here, as in the four cases in Num 5, śāṭā is used for turning aside into moral impurity.

In Prov 4:15, however, we seem to have a play on words against Num 5:12. In both cases in the Hebrew the expression is śāṭā *ma'al*. In Num 5:12 it means to turn aside in a trespass (*ma'al*); while in Prov 4:15 it warns the hearer to turn aside from-upon-it (*mē'al*) i.e. from the wicked path!

G.G.C.

2251 שָׂטָם (śāṭam) *hate, oppose oneself to*.

Derivative

2251a מַשְׁטָמָה (mašṭēmā) *animosity* (Hos 9:7, 8).

This term, according to BDB, means "to bear animosity against"; its wider usage indicates a more inclusive scope than mere hate. See *śānē'* for synonyms.

Esau, after he was deceived bore a deep grudge against Jacob and his parents (Gen 27:41). (This

same grudge is said to have festered in the bosom of Esau's descendants for generations. Amos (1:11)—which does not use *śāṭam* however—speaks of Esau's progeny having a perpetually tearing anger as they kept their wrath forever.) This grudge in Esau became a deep-seated animosity which motivated a continuous harassing and persecution of his brother and his descendants. Joseph's brothers were mistakenly concerned that Joseph was also nurturing a deep grudge against them for selling him as a slave (Gen 50:15). This term indicates the tragic results flowing from an unforgiving heart. Actually Gen 49:23 probably draws attention to the hatred (Speiser "hostility," *Genesis*, in AB) the brothers originally felt toward Joseph. But Joseph had forgiven it all.

Job (16:9; 30:21) speaks of being persecuted for an unknown reason; seems to be suggesting that God has a grudge against him? (If this is his meaning, one can more readily understand why Job received a strong rebuke from God.)

G.V.G.

2252 שָׂטָן (śāṭan) *be an adversary, resist*. ASV consistently renders the former, while RSV translates "accuse." Denominative verb.

Parent Noun

2252a שָׂטָן (śāṭān) *adversary, one who withstands*.

2252b שִׁטְנָה (śiṭnā) *enmity, accusation*.

The verb *śāṭan* occurs six times in the OT, often in participial forms for one who bears a grudge or cherishes animosity.

David employed this verb to describe his adversaries (Ps 38:20; 109:4) who were rendering him evil for good. He prayed for their overthrow (109:20, 29; cf. 71:13). It also represents in the noun form (Satan, KJV, NASB, NIV) a judicial accusing (Zech 3:1). Correspondingly the noun *śiṭnā* describes a written accusation (Ezr 4:6); it had earlier served as a name, Sitnah, "enmity," for a well over which men quarrelled (Gen 26:21).

śātān. Adversary, one who withstands, Satan. The nominal form *śātān* identifies Solomon's adversaries (I Kgs 11:14, 23, 25; cf. 5:4; I Sam 29:4). David spoke of his vengeful officer Abishai as a *śātān* (II Sam 19:22 [H 23]). Indeed, the pre-incarnate Christ, or Angel of Yahweh might be described or even identify himself as a *śātān*, when opposing Balaam (Num 22:22, 32).

Throughout history mankind's preeminent opponent has been Satan, "that old serpent" (Rev 12:9). He is a mighty angel (cf. his appearance with other "sons of God" in Job 1:6; Jude 9). [Whether Satan was also a cherub depends on one's interpretation of Ezk 28:12–16. These verses condemn the king of Tyre, but go beyond

him by comparing him to a figure of perfection who was in Eden, who was created holy and later fell. The figures of both Adam and Satan have been proposed for the person intended.

Three lines of evidence support the identification of this king with Satan: 1) Ezekiel may have intended to contrast the prince of Tyre (28:1–10) with the king of Tyre (28:11–19). Whereas the prince is a man aspiring to deity and heaven, the king is a heavenly being cast out of heaven. 2) The god of Tyre at this time is *malkart*, meaning “king of the city,” so that would be the king of Tyre. 3) The apostle Paul identifies Satan’s sin with pride (1 Tim 3:6), the sin of this king (v. 17). This may be the only passage in the OT from which he could have derived this truth.

Satan may be conceived as addressed through the Tyrian, even as Christ rebuked that evil angel through Peter (Mt 16:23). Further, if “Eden, the garden of God” (Ezk 28:13) refers to a heavenly garden, inhabited by angels (note how the phrases, “mountain of God” and “stones of fire” v. 14 do not well fit the earthly Eden), then it could be Satan who is here addressed as an “anointed cherub” (v. 14) or an overshadowing cherub (cf. *mimshah*), which is inapplicable to Adam.

On the other hand, if this Eden is the earthly one of Gen 2–3, and the “mountain” and “stones” refer to the pretensions of the pagan king seated in his temple at Tyre, deluded by his commercial success (cf. v. 16), then the monarch’s fall could be compared with Adam’s. This assumes that ‘att (v. 14) be read as ‘et “with” (rather than “you”). “With an anointed cherub I placed you.” *k’rûb* (v. 16) would be read as the subject of the verb repointing *wā’abbedkā* to *w’ibbadkā* (3 m.s. perf. for 1 common s. impf.), thus reading “the cherub drove you out,” as in RSV (cf. JBL 75:326–27). R.L.H.]

Satan’s career exhibits four stages of progressive failure.

(1) Satan fell into condemnation through a pride that induced him to rival God (1 Tim 3:6 and perhaps Isa 14:12–15, if the king of Babylon is there a tool of Satan, something more than “*hēlēl* (q.v.) son of dawn.” The Latin translation, *lucifer*, refers to the planet Venus, the morning star; see Rev 9:1). The NT identifies Satan as the tempting power behind Adam’s fall (Gen 3:15 in Rom 16:20). The OT makes no direct reference to this fact (citing “the serpent”), though Satan’s own fall may well have occurred with this same temptation (cf. creation’s unimpaired goodness in Gen 1:31). Yet despite his loss of status, the “devil” (Gr. *diabolos* “slanderer”) continued to exercise power on earth and to have access to heaven as *haśśātān* “the accuser” (Job 1:9; 2:4; Zech 3:1), or simply “the spirit” (1 Kgs 22:19–22). Only in Ezra’s (?) post-exilic composition

does *śātān* appear as a proper noun, Satan (1 Chr 21:1). Negative critics thus restrict *haśśātān* to the role of a “prosecuting attorney” who became evil only under later Persian concepts of dualism (M. Burrows, *Outline of Biblical Theology*, p. 125). Yet the testimony of the entire OT makes clear his consistent hostility toward God and animosity toward man (Job 1:11; 2:3–5).

(2) With the crucifixion and ascension of Christ, Satan was cast from heaven, no more to accuse the brethren (Jn 12:31; Rev 12:10), though he is still “the prince of the power of the [terrestrial] air” (Eph 2:2). (3) Isaiah predicted a time when Yahweh would punish the satanic hosts, as well as the evil kings of earth, by confining them in prison (Isa 24:21–22; cf. Rev 20:1 on Satan’s millennial binding).

(4) Then “after many days they will be punished” (Isa 24:22 NASB), words which point to the final judgment and Satan’s eternal torment in the lake of fire (Rev 20:10).

J.B.P.

2253 שִׁיב (*śib*) *be hoary*. Used only in 1 Sam 12:2 and Job 15:10.

Derivatives

2253a שִׁיב (*śēb*) *hoary age*.

2253b שִׁיבָה (*śēbā*) *age*.

2254 שִׁיד (*śid*) *to whitewash*. This denominative verb occurs only in Deut 27:2, 4.

Parent Noun

2254a שִׁיד (*śid*) *lime, whitewash* (Amos 2:1; Isa 33:12; Deut 27:2, 4).

2255 שִׁיחַ (*śiḥ*) *I, meditate, muse, commune, speak, complain*. Denominative verb.

Parent Noun

2255a שִׁיחָה (*śiḥā*) *meditation, complaint*.

2255b שִׁיחָה (*śiḥā*) *meditation, prayer*.

2255c שִׁחָה (*śēḥā*) *thought* (Amos 4:13).

The basic meaning of this verb seems to be “rehearse,” “repent,” or “go over a matter in one’s mind.” This meditation or contemplation may be done either inwardly or outwardly. Since English differentiates these two notions, the word is usually rendered “meditate,” or “talk.”

In the first instance it is used of silent reflection on God’s works (Ps 77:8 [H 7]; 9:12 [H 11]), and God’s word (Ps 119:15, 23, 27, 48, 78, 148). In the second instance it is used of rehearsing aloud

God's works (I Chr 16:9; Ps 105:2; 145:15). If the subject, however, is painful, it is translated "to complain" (Ps 53:17 [H 18]; Job 7:11). One can "talk disparagingly" (Ps 69:12 [H 13]).

The word functions as the "key word" in Ps 77. Here the Psalmist transfers his complaint (v. 3 [H 4]) based on a contemplation (v. 6 [H 7]) of God's absence in contrast to his past deeds precisely by meditating or talking of God's deeds.

In Prov 6:22 the son who has bound his father's teaching to his heart will find that the teaching, in turn, will "talk" with him.

śiaḥ. *Meditation, complaint, communication, talking, prayer, babbling.* This noun appears fourteen times in the OT. It is derived from the verb with essentially the same meanings, namely, "meditation" (Ps 104:34; I Kgs 18:27, marg.); complaint (I Sam 1:16; Job 7:13); talking (I Kgs 18:27); communication (II Kgs 9:11); prayer (Ps 64:1 [2]); and babbling (Prov 23:29). Proverbs 23:29, "Who hath *babbling*?" may also be translated, "Who hath troublesome-meditations?" The idea of the translation of the KJV, "babbling," is "cause-for-continual-outward-complaining."

siḥā. *Meditation, prayer, devotion.* This word appears only three times in the OT. Each time it represents pious meditation, e.g. in Ps 119:97 the Psalmist exults in his love for God's Law and declares, "It is my meditation all the day!"

G.G.C.

2256 שִׁיחַ (*śyḥ*) II. Assumed root of the following.

2256a שִׁיחַ (*śiaḥ*) *bush, shrub, plant* (Gen 2:5; 21:15; Job 30:4, 7).

שִׁימ (*śim*). See nos. 2243, 2244.

שִׁישׁ (*śiš*). See no. 2246.

שִׁדָּה (*śēk*). See no. 2262a.

שִׁדָּה (*śōk*). See no. 2260a.

2257 שִׁכָּה (*śkh*). Assumed root of the following.

2257a שִׁכְוִיָּה (*śekwī*) *a celestial appearance, phenomenon* (Job 38:36). Meaning uncertain.

2257b שִׁכְוִיָּה (*ś'kiyā*) *image*.

2257c מַשְׁכִּית (*maškit*) *image, idol, figure, picture, imagination*.

ś'kiyā. *Image, form, appearance.* This noun is found only once, in Isa 2:16. From its kinship to *maškit*, "a stone image that can be beheld visibly," various translations have been hazarded for it. Isa 2:16 is in a context of the Prophet announcing that the Day of the Lord will come and humble the proud and destroy the evil. Among the things upon which the judgment will fall are, literally in the Hebrew, "all *ś'kiyā* of

pleasantness!" The KJV renders these as "pictures;" perhaps we should say "beautiful images."

maškit. *Image, idol, figure, picture, imagination, opinion, thoughts, conceit, imagery.* This noun, according to Gesenius, comes from the hypothetical root, *śākā* which means "to look at," "to behold." Hence, *maškit* became "that which is visible," "that which can be beheld. BDB and KB render it "show piece," specifically carved figure."

It denotes a lovely silver setting for golden apples in Prov 25:11.

In Lev 26:1 God forbids Israel to "set up an image of stone in your land, to bow down unto it." So too in Num 33:52 Israel is commanded to destroy all of the stone-idols of the Canaanites. The KJV translates *maškit* in this latter verse as "pictures." They are actually "idols-of-stone" according to KD (in loc. Lev 26:1).

In Ezk 8:12 the prophet is shown that within the very precincts of the temple buildings some priests had secret rooms wherein they kept stone-idols (*maškit*).

In Ps 73:7 and Prov 18:11 *maškit* is used figuratively for "the conceits of the heart." The KJV renders it loosely, saying that the evil doers "have more than heart could wish."

sekwi. *A celestial appearance.* This word is used only in Job 38:36 in parallel with another enigmatic word *tūhōt*. It has been discussed by M. Pope (*Job*, in AB, pp. 302-303) and W. F. Albright (YGC, pp. 246-47). Pope, with others, concludes that it is connected with the Coptic name for the planet Mercury. Albright declares that this is a mistake of modern Coptic students and holds that it means "mariner, fisherman." The pair are discussed under *tūhōt*, see *tūah*.

G.G.C.

שִׁכְכָּה (*śākkā*). See no. 2262b.

שִׁכְוִי (*śekwī*). See no. 2257a.

שִׁכְיָה (*ś'kiyā*). See no. 2257b.

2258 שִׁכְנִי (*śakkin*) *knife* (Prov 23:2).

2259 שִׁכָּה (*śākak*) I, *cover, lay over* (Ex 33:22). A by-form of *sākak* I.

2260 שִׁכָּה (*śākak*) II, *weave* (Job 10:11). A by-form of *sākak* II.

Derivative

2260a שִׁדָּה (*śōk*) *booth, pavilion* (Lam 2:6).

2261 שִׁכָּה (*śkk*) III. Assumed root of the following. See *sūk* "to hedge."

2261a מִשְׁכָּה (*m'śākkā*) *hedge* (Isa 5:5).

2262 שָׂכַר (*śkk*) IV. Assumed root of the following.

2262a שֶׁךְ (*śēk*) *thorn* (Num 33:55).

2262b שֶׁכָּה (*śūkkā*) *barb, spear* (Job 40:31).

2263 שָׂכַל (*śākal*) I, *wise(ly), understand, prosper*. Nine other English words translate the verb: instruct, prudent, et al. (ASV same in most instances; RSV stresses the success, prosper concept for *śākal*).

Derivatives

2263a שָׂכַל (*śēkel*), שָׂכַל (*śēkel*) *understanding*.

2263b מַשְׂכִּיל (*maskil*) *a poem*.

Of the seventy-four times the verb form is used, all but two appear in the Hiphil stem. In many instances *śākal* is synonymous with *bin* (see *hokmā* for discussion of synonyms), but there is a fine distinction. While *bin* indicates "distinguishing between," *śākal* relates to an intelligent knowledge of the reason. There is the process of thinking through a complex arrangement of thoughts resulting in a wise dealing and use of good practical common sense. Another end result is the emphasis upon being successful.

śākal also involves one in what he considers, or pays attention to. God provides for the afflicted and needy that they ponder who is their benefactor (Isa 41:20). The righteous one is said to take note of the house of the wicked; this acting wisely is directed toward a thing, the evil abode (Prov 21:12, a difficult passage, taken as "the righteous one"). The leaders of Israel's household gathered together before Ezra in order to give attention to the words of the Law (Neh 8:13).

Still another usage of the verb is to have insight or comprehension. The man who would boast of anything should boast that he has insight into, and knows the Lord (Jer 9:23). The Hiphil infinitive *haskēl* is a substantive meaning "insight," seen as God's gift to Israel through his rulers and teachers (Jer 3:15). This word also occurs in Prov 1:3 where it is stated that the book was written to give the young man "insight" into wise behavior. As in Jeremiah, wise behavior means conforming one's life to the character of God.

Another usage stresses the idea of causing to consider, giving insight, and teaching. David indicates that the Lord made him understand the details of the pattern of temple furniture (used as the direct object relating to a thing, I Chr 28:19). Gabriel gave Daniel insight or skill (Dan 9:22).

There is also the meaning of acting circumspectly or prudently. In a time of evil the prudent know to keep silent (Amos 5:13). God has his way of determining whether a general

population is acting wisely so as to seek him (Ps 14:2). A wife who acts prudently is described as from the Lord (Prov 19:14). Likewise, the suffering Servant acted prudently in fulfilling the work assigned to him (Isa 52:13).

The verb also may mean to prosper or have success. Saul feared David because the latter was prospering greatly as a result of the Spirit's presence in his life to guide. Indeed, by this successful behavior David in effect ousted Saul from his position of leadership (I Sam 18:14, 15). Jeremiah emphasizes that judgment was pronounced on the shepherd leaders of a favored nation. The leaders were regarded as stupid because they did not seek the Lord. As a result, they would not prosper and their flocks would be scattered (Jer 10:21).

śēkel, śēkel. Understanding, wisdom. Used similarly to the verb. There is the display of prudence, or good sense, in Abigail's behavior. She exhibited her common sense in her handling of the crisis between her husband (a *nābāl* q.v.) and David (I Sam 25:3). Her approach to wisdom, however, proved faulty because she was looking for wisdom in a way not prescribed by God.

The noun also has the sense of insight or understanding. David prayed that the Lord would give his son Solomon wisdom (or discretion) concerning the affairs of Israel (I Chr 22:12). The man who does not neglect kindness and love finds favor and good understanding (here a synonym of grace, causing others to admire) in the sight of God and man (Prov 3:4). A man's prudence makes him slow to anger (Prov 19:11) and a man wins commendation in accordance to his wisdom (or insight, Prov 12:8).

The context can also indicate bad sense or cunning. Concerning an individual of the end time, it is said that he will through his shrewdness, in the example of Antiochus Epiphanes, cause deceit to succeed (Dan 8:25).

maskil. The Hiphil participle used as a noun appears in the titles of Pss 32, 42, 44, 45, 52–55, 74, 78, 88, 89, 142. In addition, Ps 47:7 [H 8] emphasizes that one is to sing praises in accordance with a *maskil* psalm. Some have considered a *maskil* to be a didactic poem which causes consideration or gives insight. Others have suggested it to be an artistic song having insight. More probably this can be considered a contemplative poem, with elements of the other two.

L.G.

maskil. Except for its first occurrence (Ps 32), *maskil* is always linked with an individual or the Sons of Korah. David is included in Ps 52–55 and 142, Asaph in 74 and 78 and Heman in 88 and 89. The root, *śkl*, denotes "insight" or "wisdom," so these psalms may be noted for their special

2264 שָׂכַר (*šākal)

instruction or their musical difficulty. For other such terms see *selā*.

2264.1b שָׂכַר (*šākār) *hire, wages*.

2264.1c שָׂכִיר (*šākīr) *hired*.

2264.1d מַשְׂכֶּרֶת (*mašköret) *wages*.

The basic idea of the word is engaging the services of a person in return for pay. The various contexts in which this verb appears adds the color to the meaning. It is used of hiring an army to help deliver one from his enemies (II Sam 10:6; II Kgs 7:6; I Chr 19:6; II Chr 25:6). The word appears in the Kilamuwa inscription as the king of Assyria (perhaps Shalmanassar III) was hired against the king of Damascus (*ANET*, p. 500). The word is used of hiring skilled workers for a particular job (II Chr 24:12; Isa 46:6) or counsellors for advice (Ezr 4:5). Leah "hires" the privilege of sleeping with her husband, Jacob, by giving Rachel the mandrakes of Reuben (Gen 30:16). Balaam is hired to curse Israel (Deut 23:5; Neh 13:2) and thereby becomes an example of false religious leaders who proclaim a message for money (Jude 11). God's prophet preaches his truth and is not "for hire." Prov 26:10 warns against hiring a fool for any kind of work.

The Niphal indicates that one hires himself to another for a price (I Sam 2:5) and the reflexive idea of receiving wages for one's work is found in Hag 1:6. It is interesting to note that God never hires his servants; they work for him freely out of love and thanksgiving and he rewards them for faithfulness out of his grace.

šeker. Hire, wages. The word occurs only in Isa 19:10 and Prov 11:18. The prophet Isaiah uses the phrase "those who work for wages" as a description of the working class. The writer of Proverbs uses the sure or certain wages of those who sow righteousness in contrast to the uncertain or disappointing recompense of the wicked.

C.R.

שָׂכִילַת (*šiklūt). See no. 1493d.

2265 שָׁלוּ (*š'law) *quail* (e.g. Num 11:32; Ex 16:13).

שָׁלְמָה (*šalmā). See no. 2270b.

2266 שָׁלַק (*šālaq) *be kindled, burn*. (ASV, RSV similarly.)

Due to its being written without *lamed* but with a double *sin* (cf. *sālēq*), the root and its etymology are in question. Some understood the root as *nāsaq* (נָשַׁק, KB, cf. Aramaic *nāsaq* "burn"). It can describe a literal burning (Isa 44:15; Ezk 39:9) or picture God's righteous anger against sin (Ps 78:21). It is also possible to consider it as a by-form of *sālaq* which exhibits the backward assimilation of the "l" known from Aramaic. This word also means "go up" but not in burning.

R.D.P.

2267 שָׁמַל (*šim'el) *take the left*. This denominative verb occurs only in the Hiphil, always signifying movement to the left.

Parent Noun

2267a שְׁמֹאל (*š'mō'āl), שְׁמֹאל (*š'mō'wl) *the left, the left hand, the left side*.

2267b שְׁמֹאֵל (*š'mā'li) *left, left side*.

š'mō'āl. The left, refers to that which pertains to the left side of someone's body (such as Ehud's left hand in Jud 3:21) or that which is in the left direction as opposed to the right (as in Neh 8:4, "And on his left hand stood Pedaiah"). The fact that Ehud was left-handed allowed him to carry out his plan for the assassination of Eglon. The guards would have noticed that he had no dagger on his left hip (the usual place). He, being left-handed, had it at his right side, easily concealed.

In numerous cases the expression, "to the right hand or to the left," appears in Scripture, describing a straying from the straight path. Thus in the literal geographical sense Moses, when leading the children of Israel into the promised land, promises the King of Heshbon that Israel will stay on the highway and "will neither turn unto the right hand nor to the left" (Deut 2:27). Figuratively, in Deut 17:20, a warning is given against turning aside from God's commandments "to the right hand or to the left."

Sometimes the right side is portrayed as the good alternative, and the left side as the evil one. Thus Eccl 10:2 reads, "A wise man's heart is at his right hand; but a fool's heart at his left." Likewise in the NT in Mt 25:33 Christ places the good sheep on his right, while the evil goats go to his left!

The left side, in some cases, however, merely refers to another alternative from that on the right—being equally evil (Isa 9:19, being hungry on the right and unsatisfied on the left) or equally

good (Prov 3:16, length of days on the right hand and riches and honor on the left).

ś^cmō'l also refers to "the north" (Gen 48:14; Job 23:9), as the Arabic root, *shamal*, means north, and *yamin*, "right hand," means south, and "before" and "behind" mean "east" and "west" to a person facing east.

ś^cmā'li. *Left, left side.* This adjective appears on nine occasions, referring to that which is on the left (I Kgs 7:21, "the left pillar . . . Boaz").

G.G.C.

2268 שָׂמַח (śāmah), שָׂמְחָה (śāmēah) *rejoice.*

Derivatives

2268a שָׂמַח (śāmēah) *joyful, merry.*

2268b שִׂמְחָה (śimhā) *joy, mirth.*

The root *ś-m-h* denotes being glad or joyful with the whole disposition as indicated by its association with the heart (cf. Ex 4:14; Ps 19:8 [H 9]; 104:15; 105:3), the soul (Ps 86:4); and with the lighting up of the eyes (Prov 15:30).

Many occasions and objects cheer a man: wine (Ps 104:15; Jud 9:13; Eccl 10:19), ointment and perfume (Prov 27:9); a wise son (Prov 15:20; 10:1; 27:11); a kind word (Prov 12:25), meeting a loved one (Ex 4:14); God's law (Ex 19:8 [H 9]), and the increase of the righteous (Prov 29:2), and God's feasts (Neh 12:43; cf. *śimhā*). But the Lord and his salvation are cited most frequently as the reason for joy (II Chr 20:27; Ps 5:11 [H 12]; 9:2 [H 3]; 16:9; 32:11; 40:16 [H 17]; 63:11 [H 12]; 64:10 [H 11]; 86:4; 90:15; 92:4 [H 5]). Indeed the joy of the Lord is a man's strength (*hedwā*, Neh 8:10). Moreover, many of these passages call upon man to share this joy. Thus Israel is called upon to rejoice at its festivals and central sanctuary (Deut 12:7; 14:26; 16:11; 26:11; 27:7). Israel's joy will be complete with their restoration (Ps 14:7; 126:2 [H 3]; Isa 9:2; 25:9; 35:10; 51:3, 11; 65:14–19; Zech 2:10 [H 14]).

On the other hand sometimes the wicked rejoice wrongfully at the affliction of the righteous (Ps 35:15).

Finally, many subjects rejoice: the Lord (Ps 104:31); Zion (Ps 97:8); the humble (34:2 [H 3]); the king (Ps 21:1 [H 2]); the heavens (I Chr 16:31); fir trees (Isa 14:8); and Egypt (105:38). But the prophets forbid Israel's enemies to rejoice (Hos 9:1; Ob 12).

The occasions for joy are manifold: against God, apart from God, and with God.

The heathen rejoice when they triumph over Israel (Jud 16:23) and the fool finds joy in his folly (Prov 15:21). But such joy must end, for the righteous will find everlasting joy (Isa 51:11).

Joy characterizes wedding (Jer 25:10) and farewell festivities (Gen 31:27), but most frequently the word is used for joy in the Lord on

holy days (Num 10:10), sacred occasions of many sorts (cf. II Sam 6:12; Ezr 3:12). Because Israel is a sacred community, however, one cannot sharply divide secular from sacred festivities. Thus the people rejoice in the day of Solomon's coronation (I Kgs 1:40), and Israel rejoices in victory (II Chr 20:27). Failure to worship the Lord with gladness will bring his judgment (Deut 28:47), and David appointed Levites to sing with joy at the temple (I Chr 15:16). Mirth apart from God may come to grief (Prov 14:13) and does not satisfy (Eccl 2:1ff).

B.K.W.

שְׂמִיכָה (ś^cmikā). See no. 2269a.

2269 שֹׁמֵר (śmk). Assumed root of the following.

2269a שְׂמִיכָה (ś^cmikā) *rug or thick coverlet* (Jud 4:18).

2270 שִׁמְלָה (śml). Assumed root of the following.

2270a שִׁמְלָה (śimlā) *garments, clothes, raiment, a cloth.*

2270b שְׁלָמָה (śalmā) the same word with metathesis of *l* and *m*.

This is the general word for clothes. Used twenty-nine times it usually has a literal meaning. Shem and Japheth covered Noah in his drunkenness with a garment (Gen 9:23). Clothes were rent as a sign of grief (Gen 44:13; Josh 7:6). A number of changes of clothes was a liberal gift (Gen 45:22). Men were not to wear women's garments (Deut 22:5). It is now thought that this custom was associated with the ignominy of military defeat and therefore there was a special stigma to it. The clothes and sandals of Israel were wonderfully preserved during the wilderness experience (Deut 8:4). The word *beḡed* is another general word for garments and is used much more often. There are many words for individual items of cloth and apparel: *shēsh* is linen, *taḥash* leather, *m^cil* is cloak; the word *k^ctōnet*, tunic, also refers to an outer garment and is one of the few Semitic words to be borrowed into Greek (*chitōn*).

Bibliography: For words designating various items of apparel, see Mare, W. H., "Dress," in ZPEB, II, pp. 164–70.

R.L.H.

2271 שְׂמִמִּית (ś^cmāmīt) *a kind of lizard* (Prov 30:28).

2272 שָׂנֵא (śānē') *hate, to be hateful.*

Derivatives

2272a שָׂנֵא (śānē') *hated, held in aversion* (Deut 21:15).

2272b שִׂנְאָה (śin'ā) *hate, hatred.*

The term *śāneh* has the same meaning in Ugaritic (UT 19: no. 2449). The verb *śānē* and its derivatives have the root meaning "to hate." It expresses an emotional attitude toward persons and things which are opposed, detested, despised and with which one wishes to have no contact or relationship. It is therefore the opposite of love. Whereas love draws and unites, hate separates and keeps distant. The hated and hating persons are considered foes or enemies and are considered odious, utterly unappealing.

God hates Israel's feast days; he has no delight in religious assemblies and will not accept sacrifices (Amos 5:17). Since in point of fact these prescribed elements of worship have become a mere cover-up for hypocrisy, deception, and spiritual adultery (Zech 8:17; cf. Is. 1:13-15). They are placed in the same category as idols (Deut 16:22) and other means to express sin (Prov 6:16).

God's hatred for idols and feasts is also directed against people, e.g. Esau (Mal 1:3, Gen 27: Ps 5:5 [H 6]: 11:5). In each case the character and/or activities of the hated ones are expressed; thus God is opposed to, separates himself from, and brings the consequences of his hatred upon people not as mere people, but as sinful people.

The OT speaks a number of times of men hating God. Men express in one way or other an absence of love and kindly sentiment or actual ill-will and aversion toward God (Ex 20:5; Deut 5:9; II Chr 19:2; Ps 22:8).

The hating that is usually referred to in the OT is the opposition, ill-will, and aversion men have for fellowmen. The extent and perversity of the depravity of the human heart is expressed by the hatred of a husband for a wife (Gen 29:31, 33) among brothers (Gen 37:4), of a brother for a sister (II Sam 13:15), among neighbors (Deut 19:11), among poor people (Prov 19:7), by a parent for his son (Prov 13:24), among nations (Isa 66:5).

There is also a hating on the part of man which is acceptable to God. Man must have an aversion to and depart from evil, hence the Psalmist says, "I have hated the assembly of evildoers" (Ps 21:5). This hatred is also in diametric opposition to a believer's trust in the Lord, for the man of God says, "I hate them who regard vain idols but I trust in the Lord" (Ps 31:6 [H 7]).

śāni'. *The hated one.* In Deut 21:15 Moses used this adjective to state plainly that an aversion to a wife is no good reason to disinherit her son as the firstborn, even though he may personally prefer a son (or sons) by a second wife.

śin'ā. *Hate, hatred.* This nominal derivative is used to express the intensity of men's hate. Amnon's hatred increased greatly (II Sam 13:15). Haters of good hate the Psalmist cruelly (Ps

25:19) and the Psalmist hates them in return with perfect hatred (Ps 139:2). Moses used this noun also to remind Israel of how they had raised God's ill-will toward them (Deut 1:27).

[An interesting usage of the word "hate" is found in Rom 9:13 which quotes from Gen 25:13 and Mal 1:2-3. Some have concluded that Paul grounds the reprobation of Esau on a divine decree in which God hated Esau before he was born. It may be helpful to offer an alternative suggestion. The statement in Rom 9:11 that God's choice of Jacob was apart from works may be completely satisfied by the quotation from Gen 25:23 which indeed was spoken before the twins were born. It does not necessarily follow that Esau was hated before he was born. This statement is quoted from Mal 1:3 which was written long after Esau had lived his predominantly secular life. Though the doctrine of election by God's grace alone is widely held, the condemnation of the lost is most widely held to be upon the basis of their own sin (so the *Westminster Confession* iii, 7). R.L.H.]

G.V.G.

שָׂנֵה (*śāni'*). See no. 2272a.
שָׂנֵה (*śā'ir*) I, II. See nos. 2274c,e.
שָׂנֵה (*śē'ir*). See nos. 2274g,h.
שָׂנֵה (*ś'irīm*). See no. 2277a.

2273 שָׂנֵה (*ś'p*). Assumed root of the following.

2273a שָׂנֵה (*ś'ippim*) *disquietings* (i.e. disquieting or excited thoughts, Job 4:13; 20:2).

2273b שָׂנֵה (*śar'ippim*) *disquieting thoughts* (Ps 94:19; 139:23).

שָׂנֵה (*ś'ippim*). See no. 2273a.

2274 שָׂנֵה (*ś'r*). Assumed root of the following.

2274a שָׂנֵה (*śē'ār*) *hair*.

2274b שָׂנֵה (*śā'ārā*) *a single hair* (the feminine used to specify a single item instead of a mass).

2274c שָׂנֵה (*śā'ir*) I, *hairy*. Used only in Gen 27:11, 23 of Jacob's deception of his father.

2274d שָׂנֵה (*śā'ar*) *be very afraid*. Probably a denominative verb, "bristle with terror." Used four times, in the Qal.

2274e שָׂנֵה (*śā'ir*) II, *he-goat, buck*.

2274f שָׂנֵה (*ś'ōrā*) *barley* (allegedly from its bearded grain).

2274g שָׂנֵה (*śē'ir*) I, *Seir, Mount Seir*.

2274h שָׂנֵה (*śē'ir*) II, *Seir, patriarch of the Horites*.

śē'ār. *Hair.* This word refers to hair in general of animals and of men—either of the head or

body. Used twenty-seven times, half of which are in Lev in connection with diagnosis of the progress of contagious diseases affecting the skin (כִּנֹּחַ "leprosy"). The way the body hair is affected was a symptom the priest was to look for to see if the disease was over. This observance of a kind of quarantine was a great step forward in the Hebrews' public health.

The other significant reference to hair is the dedication of the hair of the Nazirite. It is not clear why the Nazirite vow required the hair to be uncut. Perhaps the length of the hair was to be a reminder and testimony of the length of the vow. When the time of the vow was over, his hair was to be burned with his sacrifice (Num 6:1–21). Samson was to be a perpetual Nazirite (Jud 16:22) but was in some ways a sorry example. But even Samson was used by the Lord in his repentance.

Absalom's head of hair was of special note. But, contrary to the usual understanding, the text does not say that his hair was his undoing. It says his head was caught in the branches of the oak—how, is not related.

śā'ir II. He-goat, buck. Most of the fifty-two uses of this word concern the male goat used for the sin offering, especially the solemn sin offerings of the day of atonement (Lev 16). The regulations for the sin offering (Lev 4) specify that the animal must be a bull for a priest or the whole community, a male goat for a leader and a female goat or lamb for an ordinary citizen. The differences are clearly economic rather than a matter of sex. A sin offering by a commoner may not be eaten by the offerer—he is to get no monetary advantage from this offering; it is to be eaten by the priest. But if a priest brings it and its blood is sprinkled in the Most Holy Place, the meat is not eaten; it must be burned outside the camp (cf. Lev 16:27 and Heb 13:11–13). This total immolation of the goat of the sin offering is a meaningful type of Christ's total sacrifice as Hebrews so plainly says.

The Day of Atonement ritual is also significant in its typology of substitutionary sacrifice. The live goat of escape (Hebrew 'āzā'zēl, "goat of going out," see 'ēz) was presented to the High Priest. He would lay his hands on its head "and confess over it all the wickedness and rebellion of the Israelites—all their sins—and put them on the goat's head" (Lev 16:21). In this case the live goat symbolizes the removal of sin. But in other cases where in a similar ceremony the animal is killed, the symbolism shows that the imputed sin is judged (Lev 4:29). The ceremony symbolizes transfer of sin from the sinner to the innocent animal. Then in various ways the sin is dealt with, taken away and fellowship restored.

In four cases this word was translated by the

כִּנֹּחַ "satyr" or "demon" (Lev 17:7; II Chr 11:15; Isa 13:21; 34:14). There is no need to go to this bizarre translation. NIV translates the first two instances as "goat idol," the last two as "goat" or "wild goat". The NASB is similar, but uses "satyr" in II Chr 11:15.

ś'ōrā. Barley. Barley was the grain of the poor. Note the barley bread of the dream of the Midianite soldier (Jud 8:13). It seems to refer to Gideon's humble background. Barley ripens four weeks earlier than wheat. For this reason it was destroyed in the early spring plague of hail in Egypt while the wheat coming later survived (Ex 9:31).

R.L.H.

śē'ir I. Seir, Mount Seir. This proper name denotes the hundred mile tract of rough mountainous country east of the Arabah desert and extending from the Dead Sea to the Gulf of Aqaba. Connection with the root *sā'ar* doubtful.

The aboriginal inhabitants of this area were the Horites (=Hurrians q.v.) (Gen 14:6), one of whom, Seir (*sē'ir*), gave his name to the land (Gen 36:2). Esau migrated to Mount Seir because the land of Canaan could not sustain his household and livestock (Gen 32:3 [H 4]); his descendants dispossessed the Horites (Deut 2:12, 22). When Israel migrated from the Wilderness to possess Canaan, the Edomites allowed Israel to pass through their land because they feared them (Deut 2:29). Later, five hundred Simeonites migrated from Judah to Mount Seir (I Chr 4:42). During Israel's monarchy, however, the inhabitants of Seir rebelled on several occasions against Israel (cf. II Chr 20:10, 22, 23; 25:11, 14). Indeed, they hated Israel and sided with those invading Israel because they hoped to inherit Israel's land (Ezk 25:8; 35:1–15). About 300 B.C. Edom was dispossessed by the Nabateans.

Behind this history is the ruler over the kingdoms of all nations (II Chr 20:6). The Lord dispossessed the Horites and gave the Edomites the land (Deut 2:5; Jos 24:4), and from Mount Seir he marched forth to give Israel its land (Deut 33:2; Jud 5:4). But because the inhabitants of Seir turned against the Lord and his people, he dispossessed them even as he had prophesied (Isa 21:11f; Ezk 25:8; 35). Balaam, however, envisioned the day when Israel's king would possess this mountain (Num 24:17–19).

Thus the history of Seir closely parallels the history of Canaan, for in both lands the Lord dispossessed the aboriginal heathen inhabitants in favor of Abraham's seed. They in turn were disinherited from their land because of their idolatry and sin. But at last Israel's king will inherit both lands.

śē'ir II. Seir. The patriarch of the ancient Horites who were destroyed by the children of Esau

2275 שָׁעַר (*śā'ar*)

and routed out of the land of Edom (Deut 2:12; cf. Gen 36:20–21; I Chr 1:38).

B.K.W.

2275 שָׁעַר (*śā'ar*) *II*, *sweep away, whirl away*. An alternate form of *śā'ar* which is more widely used and of the same meaning.

Derivatives

2275a שָׁעַר (*śā'ar*) *storm*. Only in Isa 28:2. Alternate form of *sa'ar* (q.v.).

2275b שָׁעָרָה (*śē'ārā*) *storm*. Alternate form of *s'ārā* (q.v.).

2276 שָׁעַר (*śā'ar*) *III*, *be acquainted* (Deut 32:17). Meaning uncertain.

2277 שָׁעַר (*ś'r*) *IV*. Assumed root of the following.

2277a שְׁעִירִים (*śē'irim*) *raindrops* (Deut 32:2).

2278 שָׁפָה (*śph*). Assumed root of the following.

2278a שָׁפָה (*śāpā*) *lip, language, speech, shore, bank, brink, brim, side, edge, border, binding*.

Most frequently *śāpā* refers to the organ of speech. The lips are the gates of speech, and hence the gates of honesty or deception, righteousness or wickedness, wisdom or folly. Thus we read, "The lips of the righteous feed many," and "Let the lying lips be put to silence" (Prov 10:21; Ps 31:18 [H 19]).

Because speech is uttered through the lips, it was only natural that the lips should be used as a metonymy for language and "foreign language" per se. This is seen in such passages as Gen 11:1, "the earth was of one language," and in Isa 19:18, "Shall five cities . . . speak the language of Canaan." In like manner, "tongue" (*lāšhôn*) is used also as a synonym for lip (*śāpā*) to represent language and speech.

Concerning the origin of languages David Crystal concluded: "There is no contradiction between the biological and linguistic facts on the one hand, in so far as they are known, and the factual or metaphorical account of the linguistic situation as given in the first chapter of the Bible, on the other" (*Linguistics, Language and Religion*, London: Burns & Oates, 1965, p. 32).

As the lips were seen to be the outer edge of the mouth, the word *śāpā* was also used in various contexts to represent types of edges and borders. In Ex 26:4ff the *śāpā* is the edge of the curtain of the Tabernacle, and in Ex 28:26 it is used as the word for the border of the Ephod breastplate which was to be worn by the high-priest.

śāpā was also in the OT often used for the shore's edge next to the coastal oceanic sea. Joshua 11:4 speaks of the multitude of soldiers with Hazor and the northern Caananite cities which came against Israel and declares that they were "much people, even as the sand that is upon the sea shore" (literally: "as-sand which-is upon the-lip-of-the-sea"). Here since the sand is pictured as upon the lip or shore, it is clear that the "lip of the sea" is not the edge of the water, so much as it is the edge of the land which has sand upon it.

In Deut 4:48 *śāpā* is likewise used to describe the bank of the River Arnon, an inland river.

G.G.C.

שָׁפָה (*śāpah*). See no. 1534.

2279 שָׁפָם (*śāpām*) *moustache* (e.g. Mic 3:7; II Sam 19:25). Derivation uncertain.

2280 שָׁפַק (*śāpaq*) *suffice* (I Kgs 20:10).

Derivative

2280a שָׁפַק (*śēpeq*) *sufficiency, plenty* (Job 20:22).

שָׁפַק (*śāpaq*). See no. 1539.

שָׁפַק (*śēpeq*). See no. 1539a.

שָׁק (*śaq*). See no. 2282a.

2281 שָׁקַד (*śāqad*) *bind on* (Lam 1:14).

2282 שָׁקַד (*śaq*). Assumed root of the following.

2282a שָׁקַד (*śaq*) *sackcloth, sack*.

This masculine noun is represented in the KJV forty-two times as "sackcloth," and six times as "sack," i.e. a bag which held grain or some other commodity. The word is used also in Akkadian, where it has the same two meanings, and came into English by way of Greek and Latin.

śaq in the ancient world was a thick coarse cloth, usually dark in color and made mostly from goat's hair (though camel's hair was also used; cf. Mt 3:4). The dark color is mentioned in Rev 6:12 in the simile of the sun as being dark as sackcloth of hair.

Sackcloth was used as a garment by mourners and those who wished to express contrition. It was worn in such a way as to leave the breast free for beating. Thus in Gen 37:34, Jacob garbs himself in sackcloth to mourn for Joseph whom he supposes has been slain by a wild beast (cf. Isa 37:1).

As a garment of grief and self-abasement, sackcloth was sometimes the dress of the prophet who preached a message of repentance (cf. Rev 11:3). Such a sight would be a call to trembling and repentance. Both Elijah and John, preachers

of repentance, wore garments of camel's skin (II Kgs 1:8; Mt 3:4).

In Ps 30:11 [H 12] the psalmist sings of God's help with the words, "Thou hast put off my sackcloth."

G.G.C.

- 2283 שָׂקַר (*sāqar*) *ogle*. This verb occurs only once, in the Piel (Isa 3:16).

שָׂר (*sar*). See no. 2295d.

- 2284 שָׂרַג (*sārag*) *be intertwined* (Pual, Job 40:17), *intertwine themselves* (Lam 1:14).

Derivative

- 2284a שָׂרִיג (*sārig*) *tendril, twig* (Gen 40:10; Joel 1:7).

- 2285 שָׂרַד (*sārad*) *I, escape* (Josh 10:20).

Derivative

- 2286a שָׂרַד (*s'rad*) *plaited or braided work* (Ex 31:10; 35:18; 39:1, 49).

- 2286b שָׂרַד (*s'ered*) *stylus* (a marking tool for wood, Isa 44:13).

- 2287 שָׂרָה (*sārā*) *I, contend, have power*.

Derivative

- 2287a יִשְׂרָאֵל (*yisrā'el*) *Israel*.

The verb *sārā* limits itself to contexts which discuss the struggle of Jacob as he wrestled with the Angel of Yahweh at Peniel in Transjordan, upon his return from Mesopotamia to Canaan c. 1900 B.C. (Gen 32:24 [H 25]; Hos 12:4 [H 5]). The form in the latter passage, *wayyāsār*, might suggest a root *sūr*. But since biblical Hebrew includes no word with this meaning, it should probably be repointed to *wayyīser*, apocopated from *yīsreh* (BDB, p. 975), the normal imperfect of *sārā*. The importance of *sārā* lies in its derived noun, *Israel*.

The name *yisrā'el* was bestowed upon Jacob by the Angel of Yahweh (q.v.) himself, after he had wrestled with him all night (Gen 32:24 [H 25]). Jacob's struggle was spiritual, in prayer (Hos 12:4 [H 5]), as well as physical. And in it the patriarch "prevailed." Not that Jacob defeated God, but that he finally attained God's covenantal requirement of yielded submission (dramatically signaled by his injured thigh, Gen 32:25 [26]). And he persisted in refusing to let the Angel go until he had blessed him (v. 26 [H 27]). The

Lord then declared, "Your name shall no longer be Jacob, *ya'āqōb* "supplanter" (q.v.), but *yisrā'el* "Israel"; for you have striven, *sārītā* (אָנַן, for as a prince hast thou power, as if from the root *sar* "prince") with God and with men and have prevailed" (v. 28, NASB).

yisrā'el. *Israel*. Means "he contends with God" (Gen 32:28 [H 29]; contrast KB, p. 407). The noun *yisrā'el* appears 2507 times in the OT (plus its adjectival forms, *yisrā'ēli* and *yisrā'ēlit*), first as a name of honor for the patriarch Jacob, then for the nation Israel that descended from his twelve sons, then after 930 B.C. for the kingdom of Ephraim (the ten northern tribes) as opposed to the southern kingdom of Judah, and finally for the southern kingdom after the northern kingdom had fallen.

yisrā'el continued to be used as an alternate name for Jacob after his death (Ex 6:14; 32:13). But even as the phrase *b'nē yisrā'el*, "sons of Israel," moved from the literal designation of his twelve sons (Gen 42:5; Ex 1:1) to the more metaphorical description of his descendants in general (Gen 32:32 [H 33]; Ex 1:7), so "Israel" came to mean the Hebrew nation (Ex 3:18).

It appears in secular history on the Merneptah stele, c. 1230 B.C. As in the case of Jacob, the name emphasizes Israel's covenant-election (Ex 19:5; Isa 41:8; Ezk 20:5). Yet many of God's people proved unfaithful (Amos 3:1), an apostasy climaxed in their rejection of Jesus Christ at his first coming (Jn 1:11); "for they are not all Israel [God's elect] who are descended from Israel" (Rom 9:6, NASB). But Yahweh "will again choose Israel. . . . [Indeed,] strangers will join them and attach themselves to the house of Jacob" (Isa 14:1), a prediction fulfilled, some would say, first in the engrafting of gentile believers into the true Israel of Christ's church (Rom 11:17; Gal 6:16; Phil 3:3) and in any case at his second coming, when the Jews accept him whom they pierced (Zech 12:10) and all believers will find restoration in the Land of Israel (Isa 14:1).

- 2288 שָׂרָה (*srah*) **II. Assumed root of the following.**

- 2288a מִשְׁרָה (*misrā*) *rule, dominion* (Isa 9:5, 6).

שָׂרוּךְ (*s'rōk*). See no. 2290a.

- 2289 שָׂרַט (*sārat*) *incise, scratch* (Lev 21:5, Qal; Zech 12:3, Niphal).

2290 שָׂרָק (*šarak)

Derivatives

2289a שָׂרַט (*šeret*) *incision* (Lev 19:28).

2289b שָׂרַטַת (*šāretet*) *incision* (Lev 21:5).

שָׂרַטַת (*šāretet*). See no. 2289b.

שָׂרִיג (*šāriḡ*). See no. 2284a.

שָׂרִיד (*šāriḏ*). See no. 2285a.

שָׂרִיק (*šāriq*). See no. 2293a.

2290 שָׂרָק (*šarak) *twist*. This verb occurs only once, in the Piel (Jer 2:23).

Derivative

2290a שָׂרוּךְ (*š"rōk*) *sandal thong* (Gen 14:23; Isa 5:27).

2291 שָׂרַע (*šāra'*) *extend* (e.g. Lev 21:18; Isa 28:20).

שָׂרְעִים (*šar'appim*). See no. 2273b.

2292 שָׂרַף (*šārap*) *burn*. The cognates, Aramaic *s'rap*, Akkadian *sārāpu*, and Ugaritic *sh r p* are similar. A Ugaritic derived noun is used for a burnt offering, whereas the corresponding Hebrew noun is 'ōla.

Derivatives

2292a שָׂרָפָה (*šārāp*) *I, fiery serpents*.

2292b שָׂרָפָה (*šārāp*) *II, seraph*.

2292c שָׂרָפָה (*š"rēpā*) *burning*.

2292d מִשְׂרָפָה (*mašrēpā*) *burning*.

The verb is much used and always is used for a literal burning. It is used, sparsely, for burning sacrifices (Lev 4:12), the destruction of cities (Josh 6:24), the burning of children in human sacrifice (Jer 7:13) and in a very few cases of execution (only Lev 20:14; 21:9, cf. Gen 38:24). The word is used for destructive burning not usually for ordinary kindling of a fire or for metaphorical matters like burning with anger. There are over fifteen other words in Hebrew meaning "burn." The most used are *qāṭar* "burn incense or sacrifices", *bā'ar* "consume."

šārāp I. Fiery serpent. This word is used five times: of the poisonous snakes in the wilderness (Num 21:6, 8; Deut 8:15) and figuratively of threatened dangerous snakes (Isa 14:29; 30:6). The snakes in the wilderness were a natural phenomenon used by God to punish Israel's murmuring. But the healing brought about by the brass serpent Moses made was as miraculous as that which it prefigured (John 3:14). It is of interest that when Jesus referred to his being lifted up in terms of this verse he was actually predicting his crucifixion. "Being lifted up" was a well-understood euphemism in Jesus' day for death by crucifixion (John 12:32).

The fiery flying serpents of the כַּנּוּף of Isa are not mythical dragons as BDB suggests. The fire of these serpents was in the burning pain of the injected venom and the flying is doubtless a reference to the incredibly swift strike of the snake (NIV "darting snakes").

šārāp II. Seraph (plural, seraphim). Used only in Isa 6:2, 6, these angelic creatures are surely to be compared with the cherubim of the temple decoration and of Ezekiel's later vision. Indeed, the "living creatures" (NIV) of Rev 4 combine elements of Isa 6 and Ezk 1. They are not "originally mythically conceived with serpents' bodies" as BDB suggests. There is nothing in the context to suggest serpents' bodies. Indeed they are said to have feet (Isa 6:2). Rather than the noun being interpreted from the word *šārāp* I "serpent" it should be related to the parent root of both words "fire." These angelic beings were brilliant as flaming fire, symbolic of the purity and power of the heavenly court. They are *k"rûbîm* (q.v.) described from their brilliant appearance.

R.L.H.

2293 שָׂרַק (*šrq*) **I. Assumed root of the following.**

2293a שָׂרִיק (*šāriq*) *carded, combed* (of flax, Isa 19:9).

2294 שָׂרַק (*šrq*) **II. Assumed root of the following.**

2294a שָׂרָק (*šārōq*) *I, sorrel* (Zech 1:8).

2294b שָׂרָק (*šārōq*) *II, vine, tendrils*.

2294c שָׂרָק (*šōrēq*) *choice species of vine* (Isa 5:2; Jer 2:21).

2294d שָׂרָקָה (*š"rēqā*) *choice vine* (Gen 49:11).

2295 שָׂרַר (*šārar*) *rule, reign, act as a prince, govern*. Denominative verb.

Parent Noun

2295a שָׂרָר (*šar*) *prince*.

2295b שָׂרָרָה (*šārā*) *princess*.

An infrequently used verb whose forms seem early to have blended in with those of *šārā* "to rule," and *šûr*, "to hold dominion over." Forms are assigned among these three similar roots only with hesitancy.

Abimelech (Jud 9:22) is said to have "reigned" three years over Israel." In Num 16:13, Moses' opponents accused him "Thou make thyself altogether a prince over us."

šar. Prince, chief, captain, ruler, governor, keeper, chief captain, steward, master. This masculine noun is used 381 times in the OT.

The word may denote leaders, chieftains. Thus

in the plural it refers to the leaders of Israel (Num 21:18), Issachar (Judg 5:15), Midian (7:25), the Philistines (I Sam 29:3ff.), the Moabites (Jer 48:7), and the Ammonites (Amos 1:15). In the singular it refers to David as leader of freebooters (I Sam 22:2).

Closely related is its reference to a military commander. In Jud 4:2, after naming Jabin as the king of Canaan and Hazor, Sisera is called "captain of his host." Likewise, Abner is the "captain of the host" of Israel under King Saul (I Sam 17:55). Interestingly, in the theophany of Josh 5:14, 15, "the captain of the hosts of the Lord" appears to encourage Joshua before the siege of Jericho.

šar also appears frequently as a word representing royal rulers and officials, no doubt of sundry ranks and titles, hence, nobles and courtiers. Thus Jer 26:11 speaks of the princes of Judah, and the context (vv. 10–16) depicts them as occupying the "king's house," to possessing judicial power, ordering Jeremiah to die or to be spared. II Chr 21:9 mentions King Jehoram's princes, while II Chr 31:8 tells of the princes with Hezekiah. Jeremiah 26:21 deals with those of Jehoiaquim.

The pagan nations are also mentioned as having princes (e.g. Egypt, Gen 12:15; Midian, Jud 7:25; Assyria, Isa 10:8). Often it is not clear whether šar in a particular context refers to a military captain or to a prince of the royal court. Only the context tells whether a military or civil officer is meant.

It denotes a religious officer, i.e. heads of the classes or courses of priests (Ezr 8:24) and tribal heads (I Chr 27:22), and apparently "elders" (Ezk 11:1). These two usages are found mostly in later literature.

In Isa 23:8 ("merchant-princes") it is a term for rank and dignity (cf. Job 3:15).

šar is also used for a host of other high officials of various types, i.e. *chief, head*. Thus Joseph has dealings with Potiphar, the prison keeper, and the chief butler and chief baker, all four of which are entitled šar in the Mosaic account (Gen 39:1, 21; 40:2).

Finally, in the Hebrew portions of Dan, šar appears no less than seventeen times, and speaks of "the prince of the eunuchs" (1:7), "the prince of the host" of heaven (i.e. God: so KD: 8:11), Israel's princes (9:6), and the angelic princes of Persia and Greece who contend with Michael "the great prince" (10:13, 20, 21; 12:1). No less than the prophesied Messiah himself is called "Sar-Shalom" in Isa 9:5 [H 6], "Prince of Peace."

šārā. Princesses, royal ladies, queens. The feminine of šar "prince." It is used five times in the OT, always of royal ladies of the court (Jud 5:29; I Kgs 11:3; Est 1:18; Isa 49:23; Lam 1:1). This was the name given to Sarai, Abraham's wife (Gen 17:15), when the Lord blessed her and gave her her new name, "Sarah," i.e. princess-royal lady, "for... kings of people shall be of her."

Bibliography: See "Prince" in ISBE for a helpful discussion of synonyms.

G.G.C.

שָׂסוֹן (šāsôn). See no. 2243a.

2296 שָׂטָם (šātam) *stop up* (Lam 3:8). An alternative form of šātam (q.v.) which is of similar meaning and more widely used.

2297 שָׂטָר (*šatar) *burst or break out*. This verb occurs only in the Niphal (Ezra 5:12; I Sam 5:9).

2298 ש (sh). The twenty-first letter, with ש (ś), of the Hebrew alphabet. That the two letters were once considered the same is seen in the alphabetical psalms, e.g., Ps 119:161–168, where the two are used interchangeably to start the eight verses in this section.

2299 שה (she) *who, which, whose, whom* (particle used as relative pronoun), *that, because, where, when* (conjunction).

she appears in the OT 139 times, including 68 times in Eccl and 32 times in Song. It occurs primarily in poetical sections. It usually doubles the next letter if it is not a laryngeal. Alternative forms are *sha* (with doubling), *sh*, and *shā*.

As a relative pronoun it has a variety of grammatical usages within its own clause: e.g. nominative, as subject of a verbal sentence (Song 6:5) and subject of a nominal sentence (Eccl 6:10); accusative (Song 3:1); sign of the genitive (Song 3:7). *she* is also used without an antecedent (Jon 1:7, 12; Eccl 1:9; cf. Gotthelf Bergsträsser, "Das hebräische Präfix," ZAW 29:47f.). The usage which is closely related to this is the use of *she* as the sign of the genitive. In Song 1:6 it is used for emphasis strengthening the idea of ownership ("mine own vineyard," KJV) and draws a contrast with other vineyards.

The second basic use is that of a conjunction. It is used to introduce noun clauses which are the objects of such verbs as "to see" (Eccl 2:13), "to know" (Eccl 1:17), "to say" (Eccl 2:15). It also introduces purpose clauses (Eccl 7:14), result clauses (Song 5:9), causal clauses (Eccl 2:18b), spatial clauses (Ps 122:4) and temporal clauses (Song 5:9), which are almost conditional in nature (Eccl 9:12; Song 8:4).

The importance of the word for biblical studies becomes apparent when it is compared with 'āsher. Etymologically the two are not to be connected or considered to have developed from one another, either as an abbreviated form (e.g. BDB) or a lengthened form (see objections of Bergsträsser, op. cit., pp. 51–54). *she* is related to the Akkadian *sha* (Hans Bauer and Pontus Leander, *Historische Grammatik der Hebräischen Sprache*, p. 264), and both appear to go back to a common Semitic pronoun stem *ta* (Bergsträsser, op. cit. p. 54). 'āsher was probably originally a noun meaning "place" (KB). Syntactically both perform the same functions, but *she* appears to have been used in poetical sections or perhaps where a Canaanite influence

may be detected. This is suggested by its occurrence in Jon 1:7 in the mouth of the Canaanite sailors and its possible occurrence in a Canaanite cuneiform tablet dated in the twelfth or late thirteenth century B.C. (Frank Moore Cross, Jr., "The Canaanite Cuneiform Tablet From Taanach," BASOR 190:41–46). The chronological development of the two is the most important aspect of the comparison. It is generally stated that *she* is limited to late Hebrew (BDB), particularly where the Aramaic influence is supposed. The view is that *she* gradually replaced 'āsher until *she* completely dominated in the rabbinic period. This is then used as a criterion to help date a document late (e.g. Eccl, Song, Jon). Certain objections make such a view untenable. First, the connection of *she* with the Akkadian *sha* indicates that the word is old, and it could be that *she* is even older than 'āsher (Bergsträsser, op. cit., p. 56). It would indeed be strange if all occurrences were late and none were early. Second, early occurrences of the word indicate that its development is not late. Assuming that Cross is right, there is an early example of the relative *she* in the tablet from Taanach, where the text reads *rpr s yhtk* "the fee (ransom) 'which' is (was) set" (Cross, op. cit., pp. 44–45). There is no solid reason for denying the early occurrence in Gen 6:3. The Song of Deborah is acknowledged to be an early text and *she* (Jud 5:7) cannot be lightly dismissed as a gloss of late origin. Bergsträsser's explanation that the older *she* was systematically removed by later redactors and replaced by 'āsher (Bergsträsser, op. cit., pp. 43f., 56) is only an admission that the *she* is early and not late!

A third objection is the continued use of 'āsher, particularly at a late period. Eccl has the most single occurrences of *she* (sixty-eight), but at the same time it has over ninety occurrences of 'āsher. In fact both are in one verse, Eccl 8:14 (*she* 2; 'āsher 3). If Gordis's explanation of this use as "midway between classic Biblical and Mishnaic Hebrew" (Robert Gordis, *Koheleth: The Man and His World*, p. 417) were correct, it is strange that there are no occurrences of *she* in certain exilic or postexilic books. There is, however, in these works abundant use of the supposed earlier 'āsher (e.g. Dan, over 40; Ezk, over 180; Zech, over 30; Mal, over 10). In addition to biblical examples, extra-biblical sources show that 'āsher was being used constantly when it should have been on the way out. Another very strong argument is the evidence from the Dead Sea Scrolls. *she* is only used twice, both times in

2299.1 שָׁאֵב (*shā'ab*)

the Cairo Damascus Document (15:11; 20:4). But in the same work *'āsher* occurs over 125 times, as well as numerous times in the other writings (cf. Karl Georg Kuhn, *Konkordanz zu den Qumrantexten*, p. 24). It would be a grave mistake to use *she* as a criterion for classifying a work, or part of it, as late. It is an old word used for poetical purposes and was, for unknown reasons, later accepted by the rabbis instead of *'āsher*.

C.R.

2299.1 שָׁאֵב (*shā'ab*) *draw* (water).

Derivative

2299.1a מִשְׁאֵב (*mash'ab*) *place to draw water* (Jud 5:11, only). Meaning uncertain.

The verb *shā'ab* occurs nineteen times in the Old Testament and is always related to drawing water. This means that the word is related to the word-field of water. Whether a well or spring was deep or accessible either by tunnel or on the surface, it was necessary to draw water in order to have it available. Sometimes this was accomplished with a rope attached to a vessel and pulled through a pulley (NBD, p. 1325). Wells or springs were either just outside a city or located within the city wall. There were also tunnels leading to the water supply which was extremely important during war (cf. G. Denver, "The Water Systems at Hazor and Gezer," BA 32:61-68; Yigael Yadin, "Megiddo of the Kings of Israel," BA 33:89-93; ANEP Supplement, p. 366). Because water played such an important role in the ancient world, as a life-sustaining, refreshing, and cleansing element, the work of drawing the water was an important, but menial task done generally by women or slaves.

The daily work of drawing water was the work of women (cf. I Sam 9:11). The regularity of the women's work is highlighted in Gen 24:11, not only by the feminine participle stressing the continuous action, and the generic use of the article, but also by the fact that the phrase describes a particular time of the day: "the time that women go out to draw water" (קנן). God, however, in answer to prayer, uses this common task of drawing water to point to the bride for Isaac (Gen 24:12-21).

C.R.

2300 שָׁאָג (*shā'ag*) *roar*.

Derivative

2300a שָׁאָגָה (*sh'āgā*) *roaring*.

The verb *shā'ag* signifies the uttering of the loud deep rumbling cry of the lion, and it is so used in Amos 3:4, 8; Jud 14:5; and Ps 104:21.

In Ps 38:8 [H 9], David says, "I have roared by

reason of the disquietness of my heart," here using the verb *shā'ag* to describe his apparent deep groanings because of his sins (v. 18) and his enemies (v. 12). In contrast, Ps 74:4 declares that the enemies of the Lord "roar" in happy triumph as they set up their ensigns amid the ruins of the Lord's house which they have conquered and desecrated.

While the foes of God may roar in victory for a moment, the prophets speak of the Lord roaring back in judgment: Thus Amos 1:2 announces, "The LORD will roar from Zion," in judgment.

In Ezk 22:25 the Lord pictures Jerusalem's rapacious leaders, her princes according to the LXX and her prophets according to the MT, to be "like a roaring lion ravening [bellowing forth noises of conquest over] the prey." During this same period Zeph 3:3 likewise labels the princes of Jerusalem as "roaring lions."

sh'āgā. Roaring. This feminine noun is used to refer to roaring literally or figuratively. Of special interest is Ps 22, which, along with Isa 53, so well foretells the Messiah's suffering. Here in Ps 22:1 [H 2] the Messiah asks the Father why he is so "far from helping me, from the words of my roaring?" The Messiah—it must be answered—is roaring, groaning, as did David in Ps 38:8 [H 9] (*shā'ag*, see above), because of his estrangement from the Father or his abandonment to judgment upon the cross (see *'āzab*) as he bore the sins of many (Mt 27:46).

G.G.C.

2301 שָׁאָה (*shā'ā*) *I, make a din or crash, crash into ruins* (e.g. Isa 6:11; 17:12).

Derivatives

2301a שָׁאָהָה (*sha'āwā*) *devastating storm* (Prov 1:27, only).

2301b שָׁאָהָה (*sh'āyā*) *ruin* (Isa 24:12, only).

2301c שָׁאָהָה (*shā'ōn*) *roar* (as water), *din*, *crash*, *uproar*.

2301d שָׁאָהָה (*shē'r*) *ruin*. Meaning doubtful. Only found in Lam 3:47 but cf. *shēr* Num 24:17 which has a parallel in Jer 48:45 *shā'ōn*.

shā'ōn. Roar (as water), *din*, *crash*, *uproar*. This substantive comes from the root *shā'ā* which means "to make a din or crash," "to crash into ruins." The main idea of the noun is a loud noise produced by rushing waters, or a great crowd of people; that is, "rumbling," "crash," "roar," "tumult."

It is used eighteen times in the OT, and occurs primarily in the prophets (eight times in Isa; four times in Jer; once in Hos and Amos). It is found four times in Ps.

Basically, the word depicts the noise caused by

a great crowd of people. It is the loud rumbling, crashing din of a huge crowd. The activities of the crowd can vary and thus various connotations arise. Often the noise of the crowd is the thunderous crashing and clashing of an army, either in preparation for battle (Isa 13:4f.) or in attack (Jer 51:55; Hos 10:14; Amos 2:2; cf. 1Q H2:27). At other times it is the noise of a great city with its multitudes (Isa 66:6); or the riotous sounds of a crowd of merry-makers (Isa 24:8; but not Isa 5:14); or the noise of strangers (Isa 25:5).

A more vivid usage of the word is found in passages where the noise of the crowd is compared to the rushing, roaring, tumultuous noise of the sea of many waters (Isa 17:12–13; Jer 51:55; Ps 65:8; cf. 1QH2:27).

In two places the word seems to be used as a caricature of a person or people who are loud and boisterous, yet are void of effective action. Jeremiah calls the Pharaoh "big noise" (Jer 46:17; John Bright, in AB, *Jeremiah*, p. 303), and he calls the Moabites "sons of noise" (Jer 48:45; "tumultuous ones" KJV; cf. Amos 2:2).

A most difficult passage is found in Ps 40:3. The "horrible pit" (KJV is a "pit of roaring." This could be a pit of rushing waters signifying danger in general or referring to the waters of the underworld. It could be simply "a pit of devastation or destruction." Perhaps a parallel or allusion to this passage is found in 1QH 5:22, where the word seems to be interpreted like the like-sounding Aramaic word *seyan* "mud" (so T. H. Gaster, *The Dead Sea Scriptures*, rev. ed., Doubleday, 1964, p. 212).

A synonym which is constantly used as a parallel is *hāmōn* (Isa 5:14; 13:4; 17:12–13; Jer 51:55; Ps 65:8). It too conveys the idea of a loud noise, perhaps with an emphasis on what is seen or heard (cf. *Theologisches Wörterbuch zum Alten Testament*, II, pp. 444–49). Perhaps one reason for their occurrence together is the similarity in sound as well as meaning.

It is interesting to note that this word is used in the same basic meaning in both sections of Isa (e.g. Isa 5:14; 13:4; 66:6).

C.R.

- 2302 *שָׁאֵל (*shā'ā*) II, *gaze*. This verb occurs only once, in the Hithpael (Gen 24:21).

שָׁאֵא (*shā'āwā*). See no. 2301a.
שָׁאֵל (*sh'ōl*). See no. 2303c.
שָׁאֵן (*shā'ōn*). See no. 2301c.
שָׁאֵט (*sh'āt*). See no. 2345a.
שָׁאֵי (*sh'iyā*). See no. 2301b.

- 2303 שָׁאֵל (*shā'al*) *ask, inquire, borrow, beg*.

Derivatives

- 2303a שָׁאֵלָה (*sh'ēlā*) *request, demand*.

- 2303b שָׁאֵלָה (*mish'ālā*) *petition, desire*.
2303c שָׁאֵלָה (*sh'ōl*) *sheol, grave, hell, pit*.

The verb *shā'al* occurs 176 times in the OT, almost always in the Qal. It is used six times in the Aramaic of Dan and Ezr, where the form is *sh'ēl* (Dan 2:10–11, 27; Ezr 5:9–10; 7:21).

In its OT usage *shā'al* signifies "to ask" something of someone, whether the request be an asking for some physical object (Ex 3:22) or for some information, (Gen 32:17 [H 18]) or whether it be in the form of a demand for another's death (Job 31:30), the demand made by a superior upon an inferior (Job 38:3), or the begging petition of a suppliant (Prov 20:4). It may denote asking a favor for temporary use (Ex 22:14 [H 13]), or in a weakened sense, "to seek, desire" (Eccl 2:10). The accusative of either the person asked or the object requested normally follows, and sometimes both (e.g. Ps 137:3, "For there they-asked us, our-captors, words-of-song"). The KJV unfortunately translated this word as "borrow" in Ex 3:22; 11:2; and 12:35. But the word does not usually connote repayment and did not in this context. The RSV, NASB and NIV, e.g., use "ask."

Over and over again in the OT *shā'al* is used of men and women asking or failing to ask God for guidance, i.e., enquiring of the LORD. David, a man after God's own heart, many times "enquired of the LORD" (e.g. I Sam 23:2; 30:8; II Sam 2:1; 5:19, 23; I Chr 14:10, 14). Yet in Josh 9:14 the leaders of Israel "asked not (counsel) at the mouth of the LORD," and we read in Isa 30:1–2, "Woe to the rebellious children, saith the LORD... that... have not asked at my mouth." In the same sense *shā'al* is used for the sinful consultation of pagan deities, as in Ezk 21:21, "For the king of Babylon... consulted with images, he looked in the liver."

shā'al is also used to signify a request for something, and frequently this too is directed to God. Thus Ps 122:6 admonishes us to "pray for the peace of Jerusalem," and Isa 7:11 shows the prophet challenging wicked Ahaz, "Ask thee a sign of the LORD." Among the items mentioned in the OT as things which God has been asked for we find: understanding, life, a king, a child for the barren, rain, and in Isa 58:2, "the ordinances of justice." Thus men and women not only "ask" (*shā'al*) God for guidance (above), but they are seen in the OT as beseeching him through prayer and through a prophet for the needs and issues of life.

sh'ēlā. *Request, petition, demand, loan*. This feminine noun appears fifteen times in the OT, including its lone occurrence as *sh'ēlā* in Dan 4:17 [H 14] amid the Aramaic portion of Dan. It consistently represents a "request" or "petition" whether made to a person (Jud 8:24, Gid-

eon's request to the men of Israel for gold), a king (Est 5:6ff. Esther's petition to King Ahasuerus for a banquet), or to God himself (I Sam 1:27, Hannah's prayer to God for a son).

mish'ālā. *Petition, desire.* This feminine noun occurs only twice in the OT, in Ps 20:5 [H 6], "The LORD fulfill all thy petitions," and in Ps 37:4, "He (the Lord) shall give thee the desires of thine heart." Interestingly enough, both of these occurrences speak of God's fulness in granting the prayerful petitions of those who love his name amid evildoers and troublesome times.

G.G.C.

sh'ōl. *The grave, hell, pit.* The KJV uses "grave" thirty-one times, "hell" thirty times, "pit" three times. The ASV and RSV translate as "Sheol." NIV uses "grave" with a footnote "Sheol." The etymology is uncertain. The word does not occur outside of the OT, except once in the Jewish Elephantine papyri, where it means "grave" (A. Cowley, *Aramaic Papyri of the Fifth Century B.C.*, Oxford, 1923, no. 71:15). The word obviously refers in some way to the place of the dead.

There is much difference of opinion on the meaning of the term, occasioned in part by differing approaches to the OT teaching on a future life. Snaith, e.g., holds that there was no such teaching except in the intertestamental times of Dan 12:2 and "trito-Isa" (Isa 26:19; N. H. Snaith, *The Distinctive Ideas of the OT*, Schocken, 1964, p. 89). Dahood, quite to the contrary, finds the future life throughout the Pss and in other OT literature (see bibliography). The present writer holds that the future life is affirmed in many places in the OT, although details are not given. The intermediate state and the destiny of the wicked get less emphasis. Resurrection for the righteous is clearly and repeatedly expressed.

One problem with *sh'ōl* is that both good men (Jacob, Gen 37:35) and bad men (Korah, Dathan, etc., Num 16:30) go there. This led the early church to hold that the OT saints went to a *limbus patrum*, a kind of upper level of Sheol from which Christ delivered them at his resurrection (I Pet 3:19; Eph 4:9-10). The NT verses are highly problematical. The first one likely refers only to Noah's preaching by the Spirit of Christ; the second refers to Christ's descent from heaven and return there.

Rather than a two-compartment theory, it is easier to hold to a double meaning of *sh'ōl*. It can be held that originally the word meant just "the grave" and became specialized for "hell." This is the viewpoint of the KJV. "Hell" is more in point in the later passages than in the Pentateuch. Still Num 16:30, 33 and Deut 32:22 are "hell" in the KJV.

A common view today is that *sh'ōl* is a name for the underworld (Dahood and many). One

problem with this is the theological one. Does the OT teach, in contradiction to the NT, that all men after death go to a dark and dismal place where the dead know nothing and are cut off from God? In Mesopotamian sources all people go to the underworld, live in darkness and sorrow, eat clay and are plagued in various ways. There is no fiery torture. If the NT teaches otherwise (Lk 23:43), can such a view of the OT be held?

A third view is that *sh'ōl* does not describe the place where the souls of men go, but the place where their bodies go, the grave. Where their souls go is learned from other Scriptures (Ex 3:6; Mt 22:32). This view is attractive. It avoids the rather artificial two-compartment theory on the one hand and the theologically questionable theory of an undifferentiated underworld or place of departed spirits on the other hand, where all men go into dismal darkness and shadowy existence. It does not favor soul sleep or annihilation of the wicked, for it speaks only of the destination of bodies. The condition of the souls of men until the resurrection is not in view. The question is, can the passages be fairly interpreted as "grave?"

Space forbids detailed treatment, but a good number of verses can be collected where the meaning "grave" seems to be demanded. The four in Gen all refer to Jacob being brought down in sorrow to the grave. The references to Joab and Shimei in I Kgs 2:6, 9 are similar. All but eight of the passages concerned are poetic, and it may be that *sh'ōl* is just a poetic synonym for *qeber* which is used seventy-one times for "grave" (and the verb *qabar* is used all 132 times for "bury"). In two passages using *sh'ōl* (Ps 16:10 [H 11] and Hos 13:14), the OT is quoted in the New (Acts 2:27; cf. 13:35 and I Cor 15:55). In the first case the passage is used to support the bodily resurrection of Christ from the grave, in the second, the resurrection of believers.

Significant is the series of usages in Ezk 31 and 32. In highly poetic language the prophet declares that Pharaoh, king of Egypt, will fall before the king of Babylon, as Assyria had done. The expressions used are instructive. Assyria was destined for death. Elam, Meshech, Tubal and the nations are pictured as slain, lying with the uncircumcised, with those killed by the sword. These are all said to be in *sh'ōl* (31:15, 16, 17; 32:21, 27). They are said to be in the grave, *qeber* (32:22, 23, 25, 26). The word "pit," *bôr*, is used of them eight times (31:14, 16; 32:18; 23, 24, 25, 29). The "earth below" (NIV), *'eres tahtit*, is used five times (31:14, 16, 18; 32:18, 24). Once it is said that their "graves," *qeber*, are in the sides or depths (*yerek*) of the pit, *bôr*. It should be remembered that forty-two times out of sixty-two *bôr* simply means a hole dug in the ground: a cistern, well, or dungeon. Graves in Palestine were also dug just this way, usually in rock, and

the other twenty uses of *bôr* refer to the pit of death, most naturally interpreted as sepulcher, tomb. These tombs often had shelves cut in the sides where bodies were placed. The writer took part in excavation of a tomb at Dothan with three such shelves on which many bodies had been placed with pottery and spear points in abundance (cf. Ezk 32:27, "down to the grave, *sh'ôl*, with their weapons of war," NIV). The picture is one of universal slaughter and universal burial. They all "lie with the uncircumcised, killed by the sword." *sh'ôl* here means simply "grave," as is also argued by A. Heidel in an important treatment (see bibliography).

Similar is the usage in Isa 14:11–20, spoken of the king of Babylon. The same terms are used: *sh'ôl* twice (vv. 11, 15), pit, *bôr*, twice (vv. 15, 19). Grave, *qeber*, is used once (v. 19) and its verb once (v. 20). Interesting are vv. 18–20. Most kings get royal burial and lie in state in their tombs (*bayit* "house"). But this king lies covered by the slain of battle, trampled under foot, not buried with his fathers in royal pomp.

In Job 17:13–16 *sh'ôl* is said to be like a bed in darkness characterized by dust, the worm, and decay—a perfect picture of a Palestinian tomb. Job 24:19–20 also speaks of the worm feasting on those in *sh'ôl*. Job 21:13 poses the problem of the wicked who prosper in life and have an easy death. They lie side by side with others in the dust, and worms cover them both (v. 26). Clearly, the grave is meant. The parallel of *sh'ôl* and destruction, *'abaddôn*, in Job 26:6 should be compared with the parallel of *qeber*, grave, and *'abaddôn* in Ps 88:11 [H 12] (cf. the use of *sh'ôl* in Ps 88:3 [H 4] and *qeber* and *bôr* in vv. 5 and in 4 and 6 [H 6, 5, 7]). The mixture in this psalm is quite reminiscent of that in Ezk 31 and 32. The parallel of *sh'ôl* with *'abaddôn* occurs again in Prov 15:11 and 27:20 (cf. Prov 30:16).

Complete treatment of all the passages is beyond our space. A number of them are inconclusive and could refer either to deliverance from future punishment, such as Prov 15:24; 23:14; Ps 86:13 (but cf. Ps 88:3 [H 4] and 89:48 [H 49]). Or they can also be treated as referring to deliverance from untimely death.

There are three passages which use *sh'ôl* as a great depth, sometimes opposite to heaven (Ps 139:8; Job 11:8; Amos 9:2; and cf. Deut 32:22; Isa 57:9). It should be remembered that the Hebrews had no deep mines or oil wells to compare for depth. The royal tombs of Ur were dug thirty feet deep. The context of Amos 9:2 gives the contrast of the heights of Carmel and the bottom of the sea. Such figures for depth could well arise from the meaning "tomb."

As to the usage in Num 16 and the similar phraseology in Ps 55:15 [H 16], the picture is that Korah, Dathan, and Abiram with their families and with all their belongings were buried alive.

The KJV "quick" of course means "alive." That they went to hell (at least the principals in the rebellion) is doubtless true, but all the text refers to is the miraculous catastrophe by which they were killed.

If this interpretation of *sh'ôl* is correct, its usage does not give us a picture of the state of the dead in gloom, darkness, chaos, or silence, unremembered, unable to praise God, knowing nothing. Such a view verges on unscriptural soul sleep. Rather, this view gives us a picture of a typical Palestinian tomb, dark, dusty, with mingled bones and where "this poor lisping stammering tongue lies silent in the grave." All the souls of men do not go to one place. But all people go to the grave. As to the destiny of the souls of men in the intermediate state, the OT says little. Actually the NT says little too, but what it says is decisive. . . . The saved go to heaven and bliss; the wicked go to hell and torment. In the OT the hope of the righteous is life with God, the wicked have not this hope. Cf. Dahood's interpretation of Ps 23:6; 17:15 and others (*Psalms*, AB, in loc.), also Prov 23:18; 24:14, 20 (M. Dahood, *Proverbs and Northwest Semitic Philology*, Pontifical Biblical Institute, 1963, pp. 48, 51). Numbers of other verses speak of eventual resurrected life in a new heavens and a new earth, but that must be a further study.

R.L.H.

2304 שָׁאָן (*shā'an*) *rest, be quiet, be at ease.*

Derivative

- 2304a שָׁאָן (*shā'ānān*) *at ease, quiet, secure;* and when used as a substantive, *security, pride, arrogance.*

The verb, *shā'an*, represents the idea of being quiet and tranquil. In Jer 48:11 Moab is chided for her having been at ease in her sinful ways, and for this God's prophet announces judgment coming upon her.

A person who hearkens to wisdom shall be quiet (*shā'an*) according to Prov 1:33; and, ac-

cording to Job's lamentation, death also gives rest (*shā'an*) (Job 3:18). The Lord, however, is the ultimate giver of true tranquility, and using this verb in both Jer 30:10 and 46:27, he promises eventually to restore the nation of Israel and she shall be quiet (30:10) and be at ease (46:27), "And none shall make him (Jacob) afraid!" This condition of peace, full restoration and utter freedom from fear for a converted Israel has never yet occurred: it is awaited.

sha'ānān. *At ease, quiet.* This adjective describes the condition of life in peace and tranquility, and it is thus used in both a good and bad sense, "quiet" and as a substantive "pride."

In the KJV of II Kgs 19:28 and its parallel 37:29 we read, "Because thy rage against me and thy tumult (*sha'ānān*)."
"Tumult" here is misleading (probably mistakenly taken for *shā'on* "tumult, noise"), for *sha'ānān* is a substantive probably meaning "arrogance," i.e. the pride and ease by which Assyria threatened to destroy Jerusalem and the house of the Lord. Against this sinful tranquility on the part of God's enemies, the Lord arose and his angel destroyed in one night the massive army of Sennacherib, giving Hezekiah rest.

G.G.C.

שָׁאָן (*sha'ānān*). See no. 2304a.

2305 שָׁאָפַּ (shā'ap) *I, gasp, pant after, long for* (e.g. Isa 42:14, Jer 2:24).

2306 שָׁאָפַּ (shā'ap) *II, crush, trample* (e.g. Amos 8:4; Ezk 36:3).

2307 שָׁאָר (shā'ar) *I, remain, be left over, be left behind.*

Derivatives

2307a שָׁאָרִית (shē'ār) *rest, residue, remnant.*

2307b שְׁעָרִית (shē'ērīt) *remainder, remnant.*

shā'ar is used chiefly in the Niphal and Hiphil stems. It occurs once in the Qal, in I Sam 16:11.

shā'ar is used 130 times, and its derivative forms are used an additional 121 times. This root should probably be distinguished from *shē'ēr* II, "flesh, food, flesh-relation, blood revenge," which appears in the Hebrew, Aramaic, and even in an Arabic cognate.

shā'ar seems to be used almost exclusively to indicate the static action of surviving after an elimination process. This process of elimination may have been natural (Ruth 1:3, "Naomi's husband died; and she was left"). It may have been humanly caused (I Sam 9:24, "Behold that which is left!" Here Samuel is speaking of meat which was intentionally left for Saul to eat). Or the

elimination may have been the direct result of a divine intervention (Ex 10:19, "There remained not one locust in all the coasts of Egypt," when God blew them away). No matter what the cause, however, *shā'ar* points to that which remains or has survived, e.g. I Sam 16:11, "There remaineth yet the youngest," whereby Jesse informs Samuel that the prophet has examined every one of his sons except one who yet "remaineth," a survivor as it were from Samuel's earlier interviews.

shē'ār *Rest, residue, remnant.* This noun is used twenty-six times. It is also translated as the rest, remnant, and residue (e.g. Isa 10:19, 20, 21, 22; 11:11, 16; Zeph 1:4). It is a synonym of *sh'ērīt* (below). In the Septuagint it is translated occasionally by *kataleimma* which is used also to translate *shē'ērīt* (Isa 10:22; cf. Gen 45:7).

Usually, however, *shē'ār* was rendered in the Septuagint by the Greek aorist passive participle of *kataleipō*, "that which has been left." Thus the early rabbis seemed to see it simply as a participle of the root *shā'ar*. BDB calls it "late" (p. 984), probably because it is nowhere used in the Pentateuch. In any case, it too refers to that which has survived after an elimination, a judgment, or a catastrophe, and like *shē'ērīt* it may speak of the rest of trees, money, or a city (Isa 10:19; II Chr 24:14; I Chr 11:8), the remnant of Syria (Isa 17:3), a historic remnant of Israel then alive (Neh 10:28 [H 29]), or of that final blessed prophetic remnant of Israel yet to come (Isa 11:11, 16).

In Isa 7:3 *shē'ār* is used as part of the testimonial name of one of Isaiah's children, "Shear-Yashub," literally, "A-remnant shall-return." This name testified to wicked King Ahaz, as well as to all Israel, that for their sins God was about to drive Israel from their land—but yet by grace even here there still remained that grand promise of hope that someday indeed a remnant would return!

shē'ērīt. *Remainder, remnant, posterity, residue, survivors.* This noun, in every usage, carries forward the basic root idea of *shā'ar* and speaks of that which has survived after a previous elimination process or catastrophe.

shē'ērīt "remaining portion" may refer to that which is: (1) neither morally good nor bad, apart from its context (e.g. Isa 44:17, "and the residue thereof he maketh a god." Here the prophet speaks merely of a piece of wood which remains after a fire. Until the pagans carve it into a god it is still just a piece of wood, neither morally good nor evil); (2) an evil residue; (3) a good residue (e.g. Gen 45:7, "God sent me before you to preserve you a posterity." Joseph here speaks of his divine message to deliver the favored Israelites from the famine).

When applied to human survivors, *shē'ērīt* can

refer to Amalekites (I Chr 4:43) or heathen from Ashdod (Jer 25:20).

In the vast majority of cases, however, context shows that the remnant is that which has come or will come from out of the house of Israel. Here it may further refer to a remnant out of Israel which was in existence and living during the lifetime of the biblical speaker or writer, hence a historic remnant. This is the case in such passages as Isa 37:4, where Hezekiah seven centuries before Christ asks Isaiah to "lift up thy prayer for the remnant that is left," i.e. those Israelites still surviving in Jerusalem after Assyria had earlier slaughtered and led away captive the Northern Kingdom. This remnant was still alive when Hezekiah referred to them as such.

sh'ērīt, however, finds what may be its most intriguing usage as a prophetic technical term representing the final future remnant of Israel, namely, those Jews who survive to the end of this present age upon whom God showers all of the blessings which have been promised to Israel through the centuries. Thus *sh'ērīt* is used in Zech 8:6, 11, 12 speaking of the remnant and residue of Israel at a time when Jerusalem shall be called "a city of truth" (Zech 8:3), children will play in her streets (8:5), it will be marvelous (8:6), God will call them "my people" and will have brought them from the east and west (8:7), God will be their God "in truth and in righteousness" (8:8), her agriculture shall prosper with much rain (8:12), Israel and Judah will be a blessing, not a curse (8:13), nations will send representatives to worship the Lord in Jerusalem (8:22), and people of the various nations shall acknowledge that God dwells again with Israel in a special blessed way (8:23).

Any fair-minded person would have great difficulty in taking the above passages and those like it to represent the remnant of Israel in any of her past history—contrast, e.g., Rev 11:8 where John refers to first century A.D. Jerusalem as "Sodom and Egypt"! Thus God will in the end, after great tribulation, fulfill all of his promises of blessedness to the nation out of Abraham, and he will do it by blessing the remnant, the survivors by grace of time, human cruelties, and divine judgments (so Rom 11:25–29).

It may be of interest to note that the Septuagint (c. 270 B.C.) translated *sh'ērīt* by the Greek words *kataleimma* (Gen 45:7; I Sam 14:7) and *kataloipu* (Jer 6:9; Zech 8:6), both of which synonymously mean "that which is left behind." Today, almost two thousand five hundred years after Moses first used *sh'ērīt* in Gen 45:7, we still find it defined in Ben-Yehuda's pioneer Israeli dictionary as "remnant, remainder, remains" (Ehud Ben-Yehuda and David Weinstein, *Hebrew-English Dictionary*, p. 287).

2308 שָׂר (sh'r) II. Assumed root of the following.

2308a שָׂר (sh'ēr) *flesh, food, body, near kin, near kinswoman*. The *Englishman's Hebrew Concordance* lists sixteen usages of this word, and BDB suggest that it comes from the root *sh'r* II, "blood revenge . . . perhaps originally blood" (p. 984; but cf. Akkadian *šeru* "flesh"). Eight of the sixteen usages of this word occur in the Pentateuch (e.g. Ex 21:10; Lev 18:6, 12, 13).

2310 שִׁבֵּב (shbb) II. Assumed root of the following.

2310a שִׁבִּיב (shābib) *flame* (Job 18:5). Meaning uncertain.

שִׁבְבִים (sh' bābīm). See no. 2309a.

2311 שָׁבָה (shābâ) *take captive*.

Derivatives

2311a שְׁבִי (sh' bī) *captivity, captives*.

2311b שְׁבִיָּה (sh' biyā) *captive*.

2311c שְׁבִיָּה (shibyā) *captivity, captives* (collective noun).

2311d שְׁבִיתָ (sh' bīt), שְׁבִיטָה (sh' bût) *captivity*.

2311e שְׁבִי (sh' bō) *a precious stone in the high priest's breastplate*. Derivation uncertain.

In the OT *shābâ* chiefly conveys the idea of a military or para-military force subduing a foe and then taking into their possession the men, women, children, cattle, and wealth of the defeated party. Since confinement facilities were nigh unheard of in the OT, usually after battle the surviving male adults were put to the sword. Thus after the Amalekites smote Ziklag, I Sam 30:2 tells us that they "had taken captive the women," and the verses which follow show clearly that the children were also among these prisoners. In I Chr 5:21 we see an example of flocks being led away captive, and in II Chr 21:17 it is the wealth of King Jehoram which is taken away along with his wives and children.

An intriguing usage of *shābā* is found in the expression, "Thou hast led captivity captive," which appears in Ps 68:18 [H 19], and in Jud 5:12, "Arise, Barak, and lead thy captivity captive." This expression, *shābā sh' bi* seems to mean that Jehovah in Ps 68 and Barak in Jud 5 have taken captive a-host-of-captives (*sh' bi*). Psalm 68:18 [H 19] overtly refers to Jehovah's glorious ascension of triumph with the Ark unto Mount Zion and Jerusalem, and his figurative leading captive all of his foes. Paul, however, in Eph 4:8 sees this verse to be emblematic of Christ's ascension as he too rises in triumph over the host of enemies now taken captive. (See on Ps 68:18 [H 19] A. F. Kirkpatrick, *Psalms* [Cambridge: University Press, 1939]. On Eph 4:8 see Albert Barnes, *Notes on the NT*, Reprinted by Baker, 1957.)

Isaiah 61:1 speaks of one "anointed" (*māshaḥ* = Messiah), upon whom the Spirit of the Lord dwelled, who would come to "proclaim liberty to the-ones-taken-captive." Here this military word is used metaphorically to describe one's spiritual release from sin and Satan. Christ, in Lk 4:18, applies this to himself, and thus arouses the ire of those of his own Nazareth synagogue.

Thus Ps 68:18 [H 19] is seen by Paul in Eph 4:8 as showing the Messiah taking his foes captive; and Isa 61:1 is seen by Christ as showing the Messiah releasing those taken captive.

sh'bi. *Captivity, captive, prisoner.* This masculine noun, used forty-seven times in the OT, in at least three out of every four appearances indicates "captivity." That is, it speaks of the situation wherein people and/or animals (e.g. horses in Amos 4:10) are taken prisoner by a hostile military or para-military group, and with this comes a subsequent loss of freedom, various deprivations, and sufferings, and usually an enforced removal from their homes to a place of the captors' choosing, often to a foreign country.

Sometimes *sh' bi* refers to "captives" or "prisoners" as a body, e.g. Num 21:1, "King Arad . . . took some of them prisoners."

In 721 B.C. the northern kingdom was scattered by Assyria, and in successive waves in 606, 597, and 586 B.C. Babylon took the southern kingdom, Judah, into captivity. Thus Jeremiah bewails that the children of the daughter of Zion "are gone into captivity." Yet this weeping prophet sees beyond and gives God's promise to Israel that someday he would save Israel "from the land of their captivity" and "none shall make him afraid" (Jer 30:10).

sh'bit, sh'būt. *Captivity.* These alternate spellings of what appears to be the same word occur altogether in the OT some thirty-five times. They are found intermixed in the *Kethib-Qere*

readings. E.g., see KD on Ezk 16:53, where this word arises no less than five times.

In Num 21:29 *sh' bit* refers to the captivity of the children of Moab, and here is used as a synonym for *sh' bi* "captivity." In the other thirty-four cases where this word, *sh' bit*, appears it is used over and over in an idiomatic combination with the verb, *shūb* "return" to speak of a captivity, which is or will be terminated. Thus in Ps 85:1 [H 2] we read, "LORD . . . thou hast brought back (*shūb*) the captivity (*sh' bit*) of Jacob." The succeeding verses show that this ending of the captivity is accompanied by (a) a turning away of God's wrath, (b) a forgiveness for the sins of the past, and (c) a restoration to the former position of favor and blessing. [The phrase has been further studied however, by Dahood (*Psalms* III: in AB, p. 218) who cites the pertinent literature. He quotes the cognate Aramaic phrase in the Sefire Inscription to show that the Hebrew *sh' bit* and *sh' bāt* do not come from *shābā*, "take captive," but are cognate accusatives of *shūb* "restore." The phrase in the OT often means merely "restore the fortunes of" (Job 42:10, נִוַּן), though sometimes, of course this involves a restoration from captivity. Naturally this all included blessing, joy and the remission of God's wrath. R.L.H.]

It may be that the Hebrew writers felt that this *shūb-sh' bāt* alliteration well portrayed the joyous proclamation of captivity ended. Surely there is a note of joy even in Jer 29:14 as the prophet of Judah's doom looks ahead to see that day when *shūb-sh' bit*, Judah will have its days of captivity turned-away and be restored again to her Lord. So see Job 42:10.

shibyā. *Captivity, captives* (collective noun). Used nine times in the OT, always of those captured during and after military engagements, e.g. Deut 21:11; II Chr 28:5, 11, 13, 14. In the KJV it is translated captivity only in Neh 4:4 (3:36).

G.G.C.

שָׁבוּ (*sh' bō*). See no. 2311e.

שָׁבוּט (*sh' būt*). See no. 2311d.

שָׁבוּל (*sh' bül*). See no. 2316d.

שָׁבוּעַ (*shābū'a*). See no. 2318d.

שָׁבוּעָה (*sh' bū'ā*). See no. 2319a.

2312 *שָׁבַח (*shābah*) *I, soothe, still.* (Piel and Hiphil, only.)

This verb has Arabic and Akkadian cognates meaning "to be free of care," and "to grow calm," respectively. In Ps 65:7 [H 8], Almighty God is seen as stilling the violent waves. Jesus, too, calmed angry seas (Mt 8:23-27).

2313 *שָׁבַח (*shābah*) *II, praise, commend.* (Piel and Hithpaël, only.)

In Ps 63:3 [4], *shābah* is used ("my lips shall praise thee") in a context of adoration towards the power, glory, and sanctity of the Lord.

Qohelet (Ecc 8:15) commends mirth, and in 4:2 he praises the dead! The word, *shābah*, however, in the majority of cases is used to praise God for his mighty acts and deeds (Ps 117:1; 147:12; 63; [H 4]; 145:4; I Chr 16:35; and Ps 106:47, "to triumph in thy praise").

G.G.C.

2314 שֶׁבֶט (*shbt*). Assumed root of the following.

2314a שֶׁבֶט (shēbet) *rod, staff*.

2314b שֶׁרֶבֶט (sharbit) *dart, spear*.

shēbet. Rod, staff, scepter, tribe. This noun commonly denotes a rod. It was used for beating cumin (Isa 28:27), as a weapon (II Sam 23:21), and as a shepherd's implement either to muster or count sheep (Lev 27:32; Ezk 20:37), or to protect them (Ps 23:4; Mic 7:14). In Ps 23:4 it is used metaphorically of the Lord's protection of his servant as he walks in paths of righteousness.

The rod was also used as an instrument for either remedial or penal punishment. As a corrective instrument it was used for a slave (Ex 21:20), a fool (Prov 10:13; 26:3), and a son (Prov 13:24; 22:15; 23:13–14; 29:15). In Prov it is the symbol of discipline, and failure to use the preventive discipline of verbal rebuke and the corrective discipline of physical punishment will end in the child's death. Metaphorically, the Lord used Assyria as his instrument to correct Israel (Isa 10:15) and the nations to correct his wayward king (II Sam 7:14). It is also used metaphorically of penal affliction of Israel's ruler by the enemy (Mic 5:1 [H 4:14]) but the Lord's righteous King will smite the wicked with the "rod" of his word of judgment (Isa 11:4).

In II Sam 18:14 it refers to the shaft of a spear or dart.

Then, too, the word denotes a sceptre, the mark of authority. The association of smiting and ruling is evident. Significantly, in Akkadian the verbal cognate *shabātu* means to "slay, smite," and the noun *shibtu* (= Heb *shēbet*) means "rod, sceptre." Thus it is the symbol of rulership. Whereas the prophets predicted that the sceptre of Israel's enemies will be removed (Amos 1:5; Zech 10:11), Jacob predicted that "the sceptre shall not depart from Judah... until Shiloh come..." (Gen 49:1), and the psalmist predicted that the rule of Israel's ideal king would endure forever (Ps 45:7). These promises find their fulfillment in the Lord Jesus Christ. The close association of "smiting" and "ruling" is most obvious in the psalmist's prophecy that the Lord's King will smash the wicked, rebellious world with an iron rod (Ps 2:9, though possibly Ps 2:9

refers to shepherding or ruling the nations with a scepter of iron—cf. Ps 2:9 NIV and Rev 19:15; cf. Ps 125:3; Isa 14:5).

Finally, the word denotes "tribe." This meaning is probably derived by association with its use to express rulership. In Num 4 it denotes the subdivisions of the tribe, but elsewhere it refers to the tribes of Israel either individually (Deut 23:1; *passim*) or collectively (Num 36:3, *passim*). Israel's factious tribes (cf. Judg 20, 21; II Sam 19:9 [H 10]; I Kgs 11:31ff.) will at last be united in the Kingdom (Ezk 37:19). The word, however, is never used to refer to tribes of other nations.

The synonym *matteh* denotes "rod, tribe" but not "sceptre."

sharbit. Sceptre. This masculine noun is found only four times in the OT, all in the book of Esther (4:11; 5:2 twice; 8:4). It is the Aramaic form of *shēbet* (q.v.) "sceptre." Only the nod of this golden stick could save from certain death the one who entered the throne room of the Persian king unannounced. (See KD, *Esther*, pp. 351–52.)

שֶׁבֶלֶת (*shibbōlet*). See no. 2316b,c.

2317 שָׁבִים (*shbs*). Assumed root of the following.

2317a שָׁבִים (*shābis*) *front band* (Isa 3:18).

2318 שֶׁבַע (*sheba'*), שֶׁבַעָה (*shib'ā*) *seven*.

Derivatives

- 2318a שִׁבְעִים (*shib'im*) **seventy**.
 2318b שְׁבִיעִי (*sh'bi'i*), שְׁבִיעִית (*sh'bi'it*)
seventh.
 2318c שִׁבְעָתַיִם (*shib'atayim*) **sevenfold**.
 2318d שָׁבוּעַ (*shābūa'*) **a period of seven, a week, the Feast of Weeks**.

sheba', the numeral seven, must be considered first as having a simple numerical significance, and then secondly as having in many cases symbolic content.

sheba' is the feminine form of seven, and as such it (rather than the masculine form) is used as the Hebrew cardinal number. When a set of objects is being counted, then seven as an adjective is either masculine (Gen 7:4, "for yet seven days") or feminine (Gen 21:28, "and Abraham set seven ewe-lambs") depending on the noun modified.

sheba', as with other basic cardinal numbers, also was used in combinations to form other number quantities (e.g. Gen 37:2, here seven-ten, *sheba'-es' rēh*, is "seventeen").

It is, however, in its various symbolical usages that the number *sheba'* demands the special attention of the biblical scholar. While eschewing that extreme which delights to discover imagined truths by dividing the number of letters in a verse by seven, etc., it is sometimes easy for the more scholarly minded to fall into the opposite error of denying that there is ever any symbolic sense attached to this number. Scripture does use *sheba'* often as a mystic sign-word, and the fair-minded lexicographer can hardly fail to note this.

Thus we see Abraham sealing an oath (*shāba'*, q.v.) by Abimelech that a well of water is his, Abraham's, by forcing upon Abimelech seven lambs (Gen 21:28, 30). So too in Gen 29:18 it is precisely seven years that Jacob must serve Laban for Rachel and for Leah. These instances seem to be examples of an ancient traditional respect for the number seven, the original basis of which is a matter of conjecture and debate.

In creating a ceremonial for Israel the Lord himself establishes and confirms the symbolic and sacred significance of seven. Hence in Ex 29:30 the garments of a new high priest were ordered by Moses speaking for the Lord to be consecrated for seven days. This was a ceremonial action and it could just as well have been accomplished in more or less days, yet the Lord prescribed exactly seven! In Ex 23:15 the unleavened bread was to be eaten seven days, and in Ex 25:37 the Menorah, or sacred lamp stand of the tabernacle, was to have one main stem with six lateral stems, making seven.

Such examples of the sacred utilization of seven are legion and need not be multiplied here. The prime example, however, must lie in the spe-

cial hallowing of the seventh (*sh'bi'i*) day as the sabbath day and hence the chief day of normal worship activities (Ex 20:10; Deut 5:14). It was on this day, the seventh, that God rested from his days of creating, and hence for the benefit of man God set apart this seventh day for rest and worship (Ex 20:11; Gen 2:2). Hence from here an original symbolic significance is given to the number seven (1) as having a special sacredness; (2) as marking a totality of a cycle or an accomplished task; and (3) as marking a time for rest.

That there is such a significance in the number is confirmed further by such passages as Zech 4:2, 10. Here the seven flames of the Menorah are said to represent "the eyes of the Lord which run to and fro through the whole earth" (verse 10).

The Christian sees final confirmation of the sacred-completeness significances of this number in the NT, and especially in the book of symbols, Rev. In Rev 1:20 we see enumerated seven (*hepta*) stars, seven lampstands, seven angels, and seven churches. In like manner, the seven seal judgments, the seven trumpet judgments, and the seven bowls of wrath, not to mention the seven thunders, each denote a complete and entire judgment cycle (Rev 6, 8, 9, 15, 16; 10:3). So too in the OT see Dan 9:24 ff. for its Apocalyptic seventy seven's!

Not every biblical seven, of course, should be thought to have a symbolical intention. Thus in Ex 2:16 the fact that the priest of Midian had seven daughters may only indicate the actual number of his daughters and beyond this there may be no symbolism intended. Each case must be decided in light of its own context and in light of the totality of similar scriptural usages.

shib'im. Seventy. This cardinal number represents the quantity of seven tens. In Ex 1:5 it is reported that seventy souls came out of the loins of Jacob [although the Dead Sea Scroll reading agrees with the LXX seventy-five; cf. Acts 7:14—R.L.H.J.]. In Ex 24:1, 9, seventy elders are seen to have a subordinate position of authority under Moses! Such usages seem to share in the symbolism of the basic root, *sheba'* "seven" but in this number's interplay with ten (it being ten sevens) the clear meaning of the symbolism in each instance becomes more difficult to establish. In Christ's sending forth of his own new seventy (Lk 10:1), just as in the case of his creating and sending forth his own new twelve (Mt 10:1ff.), we see a new order being constituted replacing the ancient seventy of Moses—a NT sacred seventy setting aside the OT seventy!

sh'bi'i, sh'bi'it. Seventh. This ordinal number is used to signify the seventh of a given item when counting in order. The biblical usages of this word reflect all of the significances inherent in its root *sheba'* "seven." In I Chr 24:10 there is

an example of its simple ordinal usage, wherein the seventh lot fell to Hakkoz, with a sixth, etc., going before, and an eighth, etc., following after. In Num 6:9 a sacred-symbolical instance is exemplified in the defiled Nazarite shaving his head on the seventh day as part of his re-consecration ceremony.

shib'ātayim. *Sevenfold, seven times.* This word occurs seven times in the OT (Gen 4:15,4; II Sam 21:9; Ps 12:6 [H 7]; 79:12; Prov 6:31; Isa 30:26). The Amarna cognate usage of "seven times" is interesting because it is used often of bowing down seven times in craven submission—cf. Jacob bowing down to Esau. Isaiah declared (Isa 30:26) that in the future day of Israel's restoration "the light of the sun shall be sevenfold." This seems to signify figuratively that there will be a great increase in the sun's brilliance, rather than that the sunlight of that time will precisely be seven times the quanta of the prior age. In Gen 4:15, before the institution of capital punishment in Gen 9:5, 6, the Lord promised to take sevenfold vengeance on anyone who murdered Cain. In like manner the Psalmist in Ps 79:12 (an imprecatory psalm) asks that the wicked receive a reproach sevenfold of that which they had reproached the Lord. From such usages we may conclude that this term is often used figuratively to indicate something which has or will occur in a far greater intensity than previously. Such an understanding of *shib'ātayim*, however, in no way denies or forbids it signifying an exact seven times increase in any particular instance.

shābū'a. *A period of seven, a week, the Feast of Weeks.* This term occurs twenty times in the OT, always indicating a period of seven. Indeed, the word obviously comes to us from *sheba'* (q.v.) and could literally be translated always as "seven-period."

In Deut 16:9, *shābū'a* represents a period of seven days (literally "seven seven-periods you-shall-number-to-you"). The context in verses 9, 10, and 16 demands the time to be in terms of "days." No serious expositor has ever argued for "years" here.

It might be noted that in Deut 16:9 in the spelling of the plural, the central vowel letter—the *waw*—is omitted (*shābū'ōt*), as it is also at times in the singular (e.g. Gen 29:27, *sh'bū'a'*) where in an unpointed text it would then be spelled identically to seven, *sheba'*, in the feminine.

While in Deut 16:9, discussed above, *shābū'a* represents a period of seven days, in Dan 9:24,25,26,27 it denotes a period of seven years in each of its appearances in these four verses. This is proven by the context wherein Daniel recognizes that the seventy-year period of captivity is almost over. The land had been fallow for seventy years and thus repaid the Lord the seventy

sabbatical years owed to him for the prior seventy periods of seven years (Dan 9:2; Jer 25:12; cf. II Chr 36:21!). Just as Daniel is in prayer concerning this matter, the angel Gabriel appears and informs him that Israel's restoration will not be complete until she goes through another seventy periods-of-seven, *shābū'a'* (Dan 9:24ff)! Note also the apparent reference in Dan 12:11 to half of Daniel's last seventy (9:27); it is 1290 days, approximately three and a half years. Thus here it means years.

shābū'a' is also used as a technical term in Deut 16:10,16 where it denotes the Feast of Weeks (*hag shābū'ōt*), i.e. the Feast of Seven-Periods. American Jewry often still call this feast "Shāvū'ōs," but today's Israeli pronunciation is "Shāvū'ōt." It was so named because it was to be celebrated "on the morrow after" the seventh sabbath after the day of firstfruits (Lev 23:15–16)! Hence it was the feast of the day following the seven seven-periods, or the feast of *Hāmishim Yôm*, fifty days—"Pentecost" from the Greek. This feast marked the early wheat harvest at about the sixth of Sivan, at the end of our own month of May.

Christians remember Pentecost as the day when the Holy Spirit was poured out in fullness (Acts 2). As Christ was the "firstfruits" (I Cor 15:20,23), many also see in this later Feast of Weeks, *shābū'a'*, a picture of the coming resurrection of all the redeemed.

G.G.C.

2319 שבע (shāba') swear, adjure.

Derivative

2319a שבוּעָה (sh'bū'ā), שְׁבָעָה (sh'bū'ā) oath.

shāba' occurs 184 times in the OT. It is used mainly in the Niphal and Hiphil stems (occurring only once in the Qal, Ezk 21:28). In the Niphal stem, its meaning mirrors the stem's characteristic reflexive stress, to bind oneself by an oath (e.g. Gen 26:3, "I swore to Abraham," i.e. I bound myself by an oath to Abraham). In thirty-two instances *shāba'* is used in the Hiphil with this stem's typical causative thrust, i.e. to cause someone to swear (e.g. I Kgs 2:42, "Did I not make thee to swear?").

It is apparent that *shāba'* "swear" is identical in its consonantal root to the word *sheba'* "seven." It is identical, of course, to the feminine form of seven—the masculine adding a fourth letter, "he"—and it is in the feminine in which the Hebrew counts his cardinal numbers! [Another approach is to call *shib'ā* the fem. form though it is used with masc. nouns, and *sheba'* the masc. form used with fem. nouns. R.L.H.]

Not only is the Hebrew verb "to swear" iden-

tical in the ancient unpointed text to the number seven, but also a relationship is suggested by the 2000 B.C. incident of Gen 21:22–34. Here Abimelech desires Abraham to swear to deal uprightly, while Abraham in turn requires Abimelech to swear that the well of water belongs to him, Abraham. Abraham then seals the oath by giving exactly seven ewe lambs as a testimonial witness to Abimelech, and the well is called Beer-sheba, or Well-of-the-seven-oath! Thus BDB has defined *shāba'* by the pithy one-line paraphrase, “to . . . seven oneself, or bind oneself by seven things” (p. 989). Gesenius cites Herodotus iii:8 and the Iliad, xix:243, to give evidence that in the ancient world it was not uncommon to seal an agreement by the septenary number.

To swear in the Old Testament was to give one’s sacred unbreakable word in testimony that the one swearing would faithfully perform some promised deed, or that he would faithfully refrain from some evil act (Gen 21:23, “swear . . . that thou will not deal falsely with me”). Occasionally one swore that he freely acknowledged a truth and would continue to acknowledge it in the future. This was the case when Abraham in Gen 21:30,31 caused Abimelech to swear to the truth that he, Abraham, had dug, and hence owned, the well called Beer-sheba.

Often one would swear by (*b'*) another who was tacitly and mutually assumed to be greater or more precious than the one making the oath (e.g. 1 Kgs 2:8, “I swear to him by the Lord”). Among Jerusalem’s ancient sins was the fact that some had “sworn by them that are not gods” (Jer 5:7). In such cases God, or a false deity, would be invoked to witness the truth and sincerity of that which was sworn, and by implication, to judge the one swearing if he should either be lying or fail to live up to his pledge in the days and years to come.

God himself, in such passages as Deut 6:13 and Isa 19:18, commanded and showed himself favorable to his name being the name by which his people should swear. How is this to be reconciled with Mt 5:33–37? The answer seems to be that Christ was warning both against casual swearing which led people into sin and the then prevalent Pharisaic casuistry. Thus most Christians have not interpreted this as an absolute prohibition against swearing in a courtroom situation. In fact the opposite is the case with the devout seeing the more prevalent court “affirming” rather than swearing “so help you God” upon the Bible, to be a sign of evil days.

Great emphasis is placed upon God’s swearing to Abraham to bless him and his seed, and to bless all nations through his seed (Gen 22:16,18; cf. Gal 3:8,16). Joseph had so great a confidence that God would perform what he had sworn to

Abraham, Isaac, and Jacob—to give their children the land forever—that he in turn “took an oath of the children of Israel” (*yashba'*, Hiphil: caused them to swear to him) to bring his bones with them when they returned someday to that land (Gen 50:24–25).

In fact, we see God swearing by himself (Gen 22:16), by his holiness (Ps 89:35 [H 36]), by his right hand (Isa 62:8), and by his great name (Jer 44:26) in order that he might stress the absolute certainty and immutability of his performing that which he swore to Abraham, to Israel, and to David. See Heb 6:13–19!

So holy and sacred was an oath sworn in Jehovah’s name that the leaders of Israel, after being intentionally deceived by the nearby condemned Gibeonites, declared, “We have sworn (*nishba'nū*) unto them by the LORD God of Israel: now therefore we may not touch them” (Josh 9:19). Thus too the Bible pronounces woes and judgments upon false swearers (Zech 5:3,4; Mal 3:5). No wonder Jesus warned the casual or crafty that it was better simply to say “Yea, yea; Nay, nay” (Mt 5:37).

sh' bû'â, sh' bû'â. Oath. This noun appears thirty times in the OT, with the KJV translating it as “oath” twenty-nine times, and as “curse” once (Isa 65:15).

An oath, *sh' bû'â*, should be contrasted to a covenant, *b' rîit*, in order to better understand both. An oath in the OT is a solemn verbal statement or pledge that is affirmed, while the covenant is the substance of an agreement itself. In the Hebrew idiom, one would swear (*shāba'*) an oath (*sh' bû'â*), e.g. Gen 26:3, “I [God] will perform an oath which I swore unto Abraham.” A covenant, however, would be either established (Hiphil of *qûm*, literally, “caused to stand”) as in Gen 17:19, or it would be cut (*kārat*) as in Jer 31:31, “I [God] will make (cut) a new covenant with the House of Israel.”

Oaths were made by Jehovah to show the absolute certainty of his performance of that which he promised (e.g. to Abraham, Gen 26:3; and Isaac, Ps 105:9). Since a verbal promise from God is absolutely certain of fulfillment, we might properly inquire why God made oaths when he spoke with the patriarchs and David? It cannot be that the unchangeable one wished to prevent himself from later changing his mind. No! The answer must be that he made the oaths both for the benefit of the patriarchs and those who would follow them, including us who are alive today. They are a teaching method of God, a gracious instrument to help the weak faith of every generation to believe that God will someday absolutely accomplish his promises to his people, despite discouraging external circumstances.

Oaths were made by men or women to attest to

their innocence before judges (Ex 22:11 [H 10]; to vow to perform some future action (Josh 2:17, 20, to spare Rahab); to solemnize peace treaties (Josh 9:20); to renew their devotion to the Lord (II Chr 15:15); and to pledge loyalty to an important personage (Neh 6:18, here sworn literally: For many in Judah were masters of oath to him).

Although the *sh'bu'a* was basically an unalterable attestation, nevertheless there was a limited possibility to remit or be freed from an unfortunate oath. In Gen 24:8 Abraham pronounces a circumstance under which his servant would be "clear" (*nāqā*) of his oath to Abraham to take a bride for Isaac, namely, if the woman refused to go with Isaac. Thus, *circumstances beyond one's control* which made the oath impossible to fulfill were recognized by Abraham as leaving one clear of his oath.

In Josh 2:17, 20 the two spies declare to Rahab that they will be "blameless" and "guiltless" (both *nāqā*!) of their oath to save her family if any of them go outside the house marked by the red rope during the battle. Thus they make their oath conditional, valid only if the condition or conditions stated at the time of the swearing are kept.

Numbers 30 is devoted entirely to the subject of oaths (*sh'bu'a*, verses 2 [H 3], 10 [H 11], 13 [H 14]). A gracious provision is made for a father or a husband to declare an oath made by his daughter or wife void provided that he so declared it void on the day that he heard it uttered. After that it was forever too late—for oaths were serious business, especially in a nomadic society without court records and verbatim testimony.

In the perplexing case of Jephthah's "vow," *nādar* ("to willingly give") and *neder* ("a vow to give a gift freely"), rather than *shāba* or *sh'bu'a*, are used and hence the instance sheds little additional light on the study at hand.

שָׁבַעִים (*shib'im*). See no. 2318b.

שִׁבְעָתַיִם (*shib'atayim*). See no. 2318c.

- 2320 *שָׁבַעַשׁ (*shābaš*) **weave in checkered or plaited work.** Occurs only in the Piel (Ex 28:39) and the Pual (Ex 28:20).

Derivatives

- 2320a שָׁבַעַשׁ (*shābaš*) **cramp** (II Sam 1:9). Meaning and connection with *shābaš* uncertain.
 2320b מִשְׁבָּצִים (*mishbāzīm*) **filigree work, usually of settings for gems** (e.g. Ex 28:11, 13; 39:6, 13).
 2320c תִּשְׁבָּעַשׁ (*tashbēš*) **woven work** (Ex 28:4).

- 2321 שָׁבַר (*shābar*) **I, break, break in pieces.**

Derivatives

- 2321a שָׁבַר (*sheber*) **breach, ruin.**
 2321b שִׁבְבָּרוֹן (*shibbārōn*) **destruction.**
 2321c מִשְׁבָּר (*mashbēr*) **opening.**
 2321d מִשְׁבָּר (*mashbār*) **breaking.**

The verb *shābar* occurs 147 times in the OT, 53 times in the Qal, 56 times in the Niphal, 36 times in the Piel, and once each in the Hiphil and Hophal. The Ugaritic cognate is *ṭbr* (UT 19: no. 2642).

In the Qal stem (fifty-three times) most often God is the subject of the verb (thirty-three times), and here the verb is used to describe judgmental, punitive activity. Often such action is levelled against non-covenant peoples: the king of Babylon, Jer 28:2; the Pharaoh, Ezk 30:21; Damascus, Amos 1:5; Elam, Jer 49:35; the Assyrians, Isa 14:25; Nebuchadnezzar, Jer 28:11. In several instances "to break the yoke of" means that God will liberate his people from bondage to an alien people. Five times there appears the phrase "I/He has broken the staff of your bread" (Lev 26:26; Ps 105:16; Ezk 4:16; 5:16; 14:13). Although the exact meaning of this is uncertain, it would seem to indicate again that one of God's forms of retributive justice is to deprive people of what they consider essential to their diet.

We may note that in the Piel stem *shābar* is often used in the context of destroying idols. To convey the sense of the intensive Piel we may translate, colloquially, "smash to smithereens." Thus, Isa 21:9 (God); II Kgs 18:4 (Hezekiah); II Kgs 23:14; II Chr 34:4 (Josiah); II Chr 14:3, [H 2], Asa), Jer 43:13 (Nebuchadnezzar); II Kgs 11:18 (the people); and Moses with the tablets (Ex 32:19; 34:1; Deut 9:17; 10:2).

sheber. *Breach, ruin*, most frequently translated in the KJV by "destruction." Of the forty-five occurrences of *sheber*, twenty-eight of them are to be found in the prophets, where frequently the word is applied to the impending collapse of the northern or southern kingdom. "About the 'ruin/destruction' of Joseph (the kingdom of Israel) they do not care at all" (Amos 6:6). The substantive then is expressive of (physical) calamity either at the national level or at the personal level (Prov 16:18; 17:19; 18:12).

shibbārōn. *Destruction*, is used twice Jer 17:18, "destroy them with double destruction"; and Ezk 21:6 [H 11], "Son of man, groan with the breaking of (your) loins/heart."

mashbēr. *Opening*, three times, twice in the parallel passages II Kgs 19:3 and Isa 37:3, "Today is a day of suffering... Children come to 'birth' (the opening of the womb?) and there is no strength to bring them forth." This most likely is a proverbial expression to describe any kind of a

2322 שָׁבַר (*shābar*)

desperate situation. The third occurrence is Hos 13:13, again perhaps proverbially, "in the 'breaking forth' of children."

mashbār. *Breaking* (of waters), waves: Jonah 2:4; Ps 42:7 [H 8]; 88:6 [H 8]; 93:4; II Sam 22:5. Except for Ps 93:4 the references are figures of speech in the context of lamentations, "I almost drowned!"

V.P.H.

2322 שָׁבַר (*shābar*) II, *buy, purchase (grain)*. Denominative verb.

Parent Noun

- 2322a שֶׁבֶר (*sheber*) *grain*. Occurs chiefly in the last chapters of Gen (but also Amos 8:5; Neh 10:32).

This verb and its parent noun are related to *shābar* "to break" perhaps on the analogy of grain as that which is threshed, i.e. broken. Of some twenty uses of *shābar* II all but six of them are to be found in the Joseph cycle in Gen. These exceptions are Deut 2:6; 28; Prov 11:26; Isa 55:1; Amos 8:5-6.

Bibliography: Couroyer, B., "Corne et Arc," RB 73:510-21, esp. 513-16.

שִׁבְרֹן (*shibbārôn*). See no. 2321b.

2323 שָׁבַת (*shābat*) *cease, desist, rest*.

Derivatives

- 2323a שָׁבַת (*shebet*) *cessation*.
2323b שַׁבָּת (*shabbāt*) *Sabbath*.
2323c שָׁבַת (*shābat*) *keep the Sabbath* (Lev 25:2; 23:32). Denominative verb.
2323d שַׁבְּתוֹן (*shabbātôn*) *Sabbath observance*.
2323e מִשְׁבָּת (*mishbāt*) *cessation, annihilation* (Lam 1:7).

There is still some question as to whether the noun *shabbāt* is derived from the verb *shābat*, or whether *shabbāt* is primary, and the verb derived from it. In any case, it should be observed that the meaning of *shābat* is "to rest" in the sense of repose only when the verb is used in a Sabbath context (and this is confined to the Qal stem, thirteen of twenty-seven times).

The basic thrust of the verb is, when transitive, "to sever, put an end to," and when intransitive, "to desist, to come to an end." This may possibly indicate that the Sabbath is the day which 'puts a stop to' the week's work. Statistically, *shābat* is used seventy-one times in the OT. By stem it occurs twenty-seven times in the Qal (and thirteen of these, as we indicated above, are in connection with the Sabbath observance). The

translation "to cease, desist" can be illustrated in the following verses: "Day and night shall not cease" (Gen 8:22); "The seed of Israel shall cease from being a nation (Jer 31:36); "So these three men ceased to answer Job" (Job 32:1).

In the Niphal *shābat* appears four times. It is in the Hiphil, however, that the verb appears most often: forty times. Here the meaning is "to put an end to, to cause to cease." Preponderantly in the Hiphil of *shābat*, God is the subject of the verb. It is a favorite verb of the prophets to describe God's judgment on his people: "I will cause to cease the arrogancy of the proud" (Isa 13:11), most often in Ezekiel (ten times). Occasionally *shābat*, with God as subject, may have a hopeful ring to it: "He makes wars cease unto the end of the earth" (Ps 46:9 [H 10]; "The Lord who has not left you without a kinsman" (Ruth 4:14).

shebet. *Cessation, inaction* four times: Isa 30:7; Prov 20:3; II Sam 23:7. Especially the last reference has caused translation problems. BDB (992a) does not even list this reference under *shebet*. Actually the KJV is heading in the right direction when it translates "they shall be 'utterly' burned with fire." Literally we may translate, "With fire burning they will be burned without cessation," (Dahood) vs. the translation "they shall surely be burned by fire 'in the dwelling place'" (Fensham).

shabbāt. *Sabbath, the seventh day of the week*. The doubling of the middle consonant may indicate that the substantive is a Piel intensive noun, although the verb *shābat* is never used in the Piel.

Concerning the origin of the Sabbath and its possible relationship to similar institutions in ancient near eastern cultures, not a few scholars have opted for the explanation that the biblical Sabbath is an adaptation of an analogous day in Mesopotamia. Two reasons exist for the supposed comparison. One is the existence of the *ûmē lemnûti* "evil days." A few Babylonian texts (primarily in the seventh century B.C.) proscribe certain days of every month as "evil days" and were days on which certain types of work were prohibited. The particular days in question were: 7/14/19/21/28. But as De Vaux remarks (Al. p. 480) it is difficult to fit the seven day week into a lunar month of twenty-nine and a half days.

The second piece of evidence is the Akkadian word *šab/pattu* which stands for the festival of the middle day of the month or the day of the full moon. It is further identified as "the day of the appeasement of the (god's) heart" (*ûm nûh libbi*) and hence a day of good omen. It is not unreasonable to posit a semantic connection between Akkadian *šapattu* and Hebrew *shabbāt*. The former, we have seen, designated the middle day of the month, a day which marked a boundary

and a division. It could be that Hebrew *shabbāt* likewise functioned as a dividing point, separating not the month into two halves, but rather separating the month into weeks. The two words would then be analogous to each other not on the basis of Hebrew adaptation, but on the basis of a common etymology and function (AI, p. 477).

More important than the origin of the Sabbath is what we may call Sabbath theology. What is its religious significance and for what reason(s) was its observance invoked? Something of the importance of this institution can be gauged by observing that of the ten commandments the fourth commandment is treated more extensively than any of the others.

Perhaps the best procedure will be to observe the motives for observance attached to the Sabbath, a command which may be stated positively: "Six days you shall work but on the seventh you shall rest" (Ex 23:12; 31:15), or negatively: "You shall not work on the Sabbath" (Ex 20:10).

In the first place Ex 20:8ff. connects observance of the Sabbath with the fact that God himself rested on the seventh day after six days of work (Gen 2:2-3). Everything God made, as recorded in Genesis, he called good. Only the Sabbath, however, he sanctified, indicating perhaps that the climax of creation was not the creation of man, as is often stated, but the day of rest, the seventh day. The Sabbath is thus an invitation to rejoice in God's creation, and recognize God's sovereignty over our time.

Secondly, we observe in Deut 5:15 that a different reason is given for observing the Sabbath. "You shall remember that you were a slave in the land of Egypt, and Yahweh your God brought you out with a mighty hand....; therefore, Yahweh your God commanded you to keep the Sabbath day." Exodus then connects the Sabbath with creation described in Genesis and Deuteronomy connects the Sabbath with deliverance from Egypt described in Exodus. Thus every Sabbath, Israel is to remember that God is an emancipator, a liberator. The early Christians were on target, it seems, when they connected the day of rest with the remembrance of Christ's resurrection. He is the one who gives freedom. Actually there is no real conflict between Deuteronomy and Exodus at this point. Whereas Deuteronomy has in view the people of the Covenant, the Exodus verses place the emphasis on the God of the covenant (AI, p. 481).

Thirdly, the Sabbath is a social or humanitarian ordinance which affords dependent laborers a day of rest: Ex 20:10, Deut 5:14-15 and Ex 23:12, "That your ox and your ass may have rest, and the son of your bondmaid, and the alien may be refreshed." Here then this commandment takes a step in the direction of making all men equal before God. As the Sabbath recalls the liberation

from Egypt so it in turn must become an agent of freedom by setting the dependents in society free (see Andreasen, in bibliography). Is it possible to connect this with the fact that in I Cor 16:2 it is recorded that on the first day of the week there is a collection of money for the poor in Jerusalem?

Fourthly, the Sabbath is a sign of the covenant and in this way the Sabbath reaches into the future. The Sabbath now joins the signs of the rainbow and circumcision. The pertinent texts are Ex 31:13, 17 and Ezk 20:12, 20. This accounts for the reason that the penalty for profaning the Sabbath is death (Ex 31:14; Num 15:32-36; Jer 17:19-27). As long as Israel observes the Sabbath she affirms her loyalty to Yahweh and guarantees his saving presence. For the Christian believer these promises are fulfilled in a person, Christ. Through him we enter into God's own rest (Heb 4:1-11).

shabbātōn. Sabbath observance. In addition to designating the Sabbath (Ex 16:23), this word may apply to the day of atonement (Lev 16:31; 23:32); the feast of trumpets (Lev 23:24); and the first and eighth days of tabernacles (Lev 23:39). The ending *-ōn* is characteristic of abstract nouns in Hebrew such as *zikkārōn* "remembrance."

שָׁבָתוֹן (*shabbātōn*). See no. 2323d.

2324 שָׁגַג (*shāgag*) *go astray, err.*

Derivative

2324a שָׁגָגָה (*sh'gāgā*) *sin.*

The verb is used only four times. Leviticus 5:18 and Num 15:28 are verses dealing with the sin of "ignorance/inadvertence." The remaining two are Ps 119:67, "Before I was afflicted I went astray"; and Job 12:16, "'the deceived' and the

deceiver are his" (KJV). This last reference shows two roots side by side meaning the same thing and similar in consonantal skeleton (or maybe a bi-consonantal root that has expanded two ways). The word "deceived" is from the root *shāgag* and "deceiver" is from the root *shāgā* (q.v.).

sh'gāgā. *Sin* (of inadvertence). The noun appears nineteen times. Two clusters are particularly important. First is the use in the description of the sin offering (Lev 4:2, 22, 27). In v. 13 a form of *shāgā*, not *shāgag*, is used. Accompanying this is the use in the description of the guilt/trespass/reparation offering (Lev 5:15, 18). Thus Lev 4:22 reads, "When a leader has sinned and has done something inadvertently." Second is the paragraph in Numbers 15:22ff. dealing with atonement for sins of inadvertence (KJV, "ignorance"). Here *sh'gāgā* occurs seven times: Num 15:24, 25 (twice), 26–29. Note again that the paragraph begins, v. 22, not with a form of *shāgag* but of *shāgā*, our third illustration of the intermingling of these roots.

To the above may be added the following: Eccl 5:5, "do not tell the messenger/angel that it was an (unintentional) mistake"; 10:5, a reference to the "misjudgment" of rulers; Lev 22:14; Num 35:11, 15; Josh 20:3, 9 (cities of refuge as places of safety for perpetrators of acts of unintentional unpremeditated murder).

Protestant theology has been dominated by two basic concepts of sin. One concept is that sin is the breaking of a law knowingly or unknowingly. This is the objective view of sin or the legal interpretation. And certainly the illustrations above taken from Lev 4–5 and Num 15 buttress this approach. Sin was a positive violation of the covenant relationship, whether voluntary or involuntary. The presence or absence of volition did not alter the objective situation. Sins done in "ignorance" were still sins and needed atonement.

The other concept we may call the ethical understanding of sin. By this is meant the involvement of the human will and personal responsibility. The emphasis here is on the subjective. Neither view is correct to the exclusion of the other. Both are biblical and must be held in tension.

To return to *sh'gāgā*, a sin of this type may result from two causes: negligence or ignorance. Either the perpetrator knows the law but unintentionally violates it as in the case of accidental homicide (Num 35:22ff.; Deut 19:4–10; Josh 20:2–6, 9), or he acts without knowing he did wrong. Some illustrations of sins in this category would be: Gen 20:9 (Abimelech's complaint to Abraham); Num 22:34 (Balaam: "I have sinned. I did not know you were standing in my path"). In

opposition to these are sins committed with a "high hand" (Num 15:30) for which there is no atonement by any means of sacrifice. Here the NT believer can sense something of the inadequacy of the Levitical sacrificial system. The inability of this system to provide a sacrifice even for the presumptuous sin points to the way of a better sacrifice, that found in Christ.

2325 שָׁגָה (shāgā) *go astray, stray, err.*

Derivatives

2325a שְׁגִי'א (sh'gī'ā) *error* (Ps 19:13).

2325b מִשְׁגֶּה (mishgeh) *mistake* (Gen 43:12).

The verb occurs twenty-one times, seventeen times in the Qal and four times in the Hiphil (Deut 27:18; Job 12:16; Ps 119:10; Prov 28:10). In the KJV at least the most prevalent translation is "to err."

The primary emphasis in the root *shāgā* is on sin done inadvertently. This is indicated in several ways. First, the two derivatives from *shāgā*, *sh'gī'ā* and *mishgeh* indicate an act perpetrated in ignorance, not willfully. Second, in the Levitical discussion of "sins of ignorance" (Lev 4:2ff.) *shāgā* alone means "sins in ignorance" (v. 13) and is comparable to the phrase in the same chapter *hātā bishgāgā* (vv. 2, 27) and *'āsā bishgāgā* (v. 22). Third, Job never denies that he has sinned, but he does ask that he be made aware of where he has (Job 6:24; 19:4), implying unconscious sins. Fourth, this root is used to describe how sheep got lost (Ezk 34:6). They simply nibble their way to lostness.

The Scripture pinpoints at least three causes for such wandering. The first is wine and strong drink (Isa 28:7; Prov 20:1). The second is the seductive strange woman (Prov 5:20, 23) versus the love of one's wife, which ought to "captivate" one (Prov 5:19). The third is the inability to reject evil instruction (Prov 19:27). Only Saul in the OT admits culpability at this point (1 Sam 26:21).

sh'gī'ā. *Error, failing.* found only in Ps 19:12 [H 13], "who can detect his "errors"? Cleanse me from my hidden faults (*nistārōr*, from the root *sātar* "to hide, conceal" [but cf. Dahood *Psalms*, I, in AB, p. 124 for a possible derivation from *sūr* "go astray."]). The meaning then of

sh' gi'ā is established by its parallelism with *nis-tārôt*.

mishgeh. *Mistake, oversight*, found only in Gen 43:12, the words of Jacob to his sons before they return to Egypt to see their as yet unrecognized brother Joseph: "Take double the amount of money and return the money... it (i.e. Joseph's act) may have been a mistake/oversight."

Bibliography: TDNT, I, pp. 268–93.

V.P.H.

2326 שָׁחַח (shāḡaḥ) *gaze, stare*.

This verb is used three times in the OT and always in the Hiphil stem: (1) Song 2:9, "He 'looks in' at the window, he peers through (*šûš* in the Hiphil, and only here) the lattice"; (2) Isa 14:16, "All who see you (Lucifer/a pagan tyrannical king?) will gaze at you"; (3) Ps 33:14, "From his dwelling place he (God) gazes on all the inhabitants of the earth."

The word occurs several times in noncanonical literature: Ben Sira 40:29, "The life of a man ever 'eyeing' the table of another is no life at all," and also 50:5, "How splendid he (Simon the high priest) was as he 'looked down' from his sanctuary."

Most interesting is the development of this root in later Jewish writings. From *shāḡaḥ* there came the noun *hashgāhā* meaning "providence." Thus, in his *Guide of The Perplexed*, Maimonides discusses "providence" at some length, listing five views on the subject (*Guide*, III, pp. 17–24). In other literature a distinction seems to have been made between *hanhāgā*, universal providence determining the world's natural order, and *hashgāhā*, individual providence.

V.P.H.

שָׁחַח (sh' gi'ā). See no. 2325a.

2327 שָׁגַל (shāḡēl) *violate, ravish* (e.g. Deut 28:30; Isa 13:16).

Derivative

2327a שָׁגַל (shēgāl) *consort* (Neh 2:6; Ps 45:10).

2328 שָׁגַע (shāḡa') *be mad*.

Derivative

2328a שִׁגְגָּוָה (shiggā'ōn) *madness*.

The verb *shāḡa'* appears seven times in the OT, five times as a Pual participle, and twice in the Hithpael, as a participle (I Sam 21:14, [H 15]) and as an infinitive construct (I Sam 21:15 [H 16]). Etymologically the root has been connected with

Arabic *saḡa'a* "the (ceaseless) cooing of pigeons," or Assyrian *šēgu* "to howl, rage."

Of the five uses of *shāḡa'* in the Pual, three of them are found as derogatory names for prophets. First, the disciple of Elisha who anoints Jehu as Israel's king is referred to as a "madman" (*m'shūggā'*, II Kgs 9:11) by the army officers. Second, Shemaiah, one of the Babylonian exiles, was enraged by Jeremiah's words on the length of the deportation and wrote back to the officialdom at Jerusalem regarding "this crazy fellow" (Jer 29:26). Third, Hosea was the butt of similar innuendoes for he too was referred to as mad and "raving" (Hos 9:7).

It is unlikely that this designation refers to the mode of speech of the prophets, i.e. anything from inarticulate muttering to ecstatic babbling. More likely, it is the content of their speech that causes the mockery, a content antagonistic to the optimists of the day. Too much should not be made of the proposed identification, both in connotation and form, between Hebrew *m'shūggā'* and the Akkadian word *muhhum* "diviner" from a root meaning "to rave, become frenzied," (A. Malamut, Supp VT 15, 1966, pp. 210–11).

Only in I Sam 21:14–15 [H 15–16], relating David's performance before King Achish, is the verb associated with behavior that borders on the imbecilic. This may be comparable to I Cor 14:23, "Will they not say you are mad?"

shiggā'ōn. *Madness, abandon*, three times in the OT, two times as a form of judgment from God, either on Israel herself (Deut 28:28) or on those who attempt to destroy her (Zech 12:4). The noun is also used to describe King Jehu's mad antics on the highway with his chariot, "For he drives like a madman/with abandon/furiously" (KJV, II Kgs 9:20).

V.P.H.

שִׁגְגָּוָה (shiggā'ōn). See no. 2328a.

2329 שָׁגַר (shgr). *Assumed root of the following.*

2329a שָׁגַר (sheger) *offspring, young of beasts* (Ex 13:12; Deut 7:13; 28:4, 18, 51).

2330 שָׁד (shēd) *demon*.

The word appears two times in the OT: Deut 32:17, "They sacrificed unto demons (KJV: "powerless spirits"), to gods whom they knew not"; and Ps 106:37, "They sacrificed their sons and their daughters unto 'idols/demons'." Perhaps it occurs for a third time in Amos 2:1, "Because he (Moab) burns the bones... to a demon" changing MT *laššid*, "into lime" to *lashshēd* (Dahood, in AB, *Psalms*, III, p. 74).

Undoubtedly Hebrew *shēd* is to be connected with the Babylonian word *shēdu*, a demon either good or evil. In pagan religions the line between gods and demons is not a constant one. There are demons who are beneficent and gods who are malicious. Generally speaking though, a demon was conceived as being less powerful than a god. In Mesopotamian thought the *shēdu* was a supernatural protective power for whose presence the gods were invoked. Specifically, the function of *shēdu* may have been to represent the vitality of the individual, his sexual potency (Oppenheim, p. 201; see bibliography).

One cannot help but notice the paucity of references to the demonic in the OT and even where it occurs it is demythologized. Good and evil are in the moral, not the metaphysical, sphere. Kaufmann (p. 65, fn. 1) says, "When the gods of the nations are called *shēdim* it is not meant that they are evil spirits, but that they are insubstantial shades, 'no-gods,' with neither divine nor demonic functions."

The wraps are taken off the demonic in the Bible in the Gospels and the Revelation. That is to say, the demonic appears most profusely when Jesus is present. Perhaps God has opened to us the satanic world only in the presence of Christ (Kinlaw, p. 8).

V.P.H.

שָׁדָד (*shōd*), שָׁד (*shad*). See nos. 2331a, 2332a.

2331 שָׁדָד (*shādad*) *ruin, destroy, spoil.*

Derivative

2331a שָׁדָד (*shōd*) *havoc.*

The verb appears fifty-seven times in the OT: in the Qal, thirty-two times; Niphal once (Mic 2:4); Piel twice (Prov 19:26; 24:15); Poel once (Hos 10:2); Pual nineteen times; Hophal twice (Isa 33:1; Hos 10:14). Of these fifty-seven uses, forty-eight of them are to be found in the books of the classical prophets (with Jeremiah leading the way, twenty-six times), thus indicating in what parts of the OT canon *shādad* appears most frequently.

There seems to be no significant problem on the translation of *shādad*, as a comparison of the modern versions will bear out. The KJV opts preponderantly for "to spoil." Only in Prov 19:26 is there anything bordering on significant disagreement. The KJV reads, "He who 'wastes' his

father... is a son causing shame." One suggestion is to connect *shādad* with Ethiopic *sadada* "to expel, eject," (Thomas). We suggest the translation, "he that 'maltreats' his father."

The verb *shādad* has an interesting usage. In one sense it is applied to Babylon (in the Jeremiah passages obviously) as the "destroyer" of Jerusalem (Jer 6:26; 12:12, *inter alia*). This militaristic world power, far from being an independent entity, is an actor chosen for the cast by God. Its function is to be the medium through which God's holy anger is outpoured on his own covenant children. Babylon itself will subsequently become the object of equal devastation (Jer 51:48, 53, 55, 56; Ps 137:8). The ferocity of *shādad* is indicated by its coupling with the activities of a wolf (Jer 5:6) who pursues, attacks, and mauls its victim.

shōd. *Havoc, violence, destruction*, like the verb *shādad*, appears most often in prophetic books (twenty of twenty-five times). Fortunately, for purposes of definition, *shōd* is often used in parallelism with other substantives. The phrase *shōd wāsheber* "havoc and destruction" appears in Isa 51:19; 59:7; 60:18; Jer 48:3. The phrase *hāmās wāshōd* "violence and destruction" occurs in Jer 6:7; 20:8; Ezk 45:9; Am 3:10; (once as *shōd w' hāmās* in Hab 1:3).

This latter parallelism is of special significance because of the import of the word "violence" (*hāmās*). This word designates the type of sin preceding the deluge, "the earth was corrupt and filled with 'violence'" (Gen 6:11). What is meant by "violence"? We tend to agree with Cassuto (Commentary on *Genesis*, II, p. 52) that *hāmās* does not refer to deeds of outrage and violence, that is, lawlessness perpetrated by force. Rather, *hāmās* refers to anything that is unrighteous, e.g. injustice or social unrighteousness. Perhaps this sheds some light on the meaning of *shōd*. It is clear, however, that *shōd* is not only a cause for destruction but also may be the destruction itself (Hos 7:13; 10:14). Isaiah 13:6 and Joel 1:15 connect *shōd* with the day of the Lord. Such destruction is designed not for unbelievers but for apostate believers.

V.P.H.

2332 שָׁדָה (*shdh*). Assumed root of the following.

2332a שָׁדָה (*shad*) *breast, bosom.*

2332b שָׁדָה (*shiddā*). Only used in Eccl 2:8, harem (?); meaning uncertain.

shad. Breast, bosom. This noun occurs twenty-one times, twenty-four if one adds the three appearances of *shōd* in Job 24:9; Isa 60:16; 66:11). Eight of these are found in the Song of Solomon. Four of these are located in the intimate description by the groom of his bride: 4:5; 7:3, 7, 8 [H 4, 8, 9]. Once the bride refers to her own breasts as a resting place for her lover's head (1:13). There are two references to the undeveloped breasts of the "little sister" (?) (8:8, 10) and one to the mother of the bride (8:1). It should not be perplexing that in the OT canon there is at least one book devoted to the portrayal, among other things, of the physical side of the marriage relationship, the function of which is so clearly spelled out in Gen 1–2.

Besides the Song of Solomon passages the Hebrew word *shad* is used in the following contexts: (1) in a decidedly erotic, sensual situation where adultery and seduction are prominent: Hos 2:2 [H 4]; Ezk 23:3, 21 where *shad* is parallel with *dad* "the (nipple of the) breast"; (2) as a gesture of mourning, Isa 32:12; Ezk 23:34 (cf. "he smote upon his breast -*stēthos*," Lk 18:13 and also Lk 23:48); (3) as an indication of arrival at maturity and young adulthood and hence responsible for one's conduct or able to receive instruction: Ezk 16:7; Isa 28:9 (off the bottle!); (4) as a blessing of fertility and progeny, Gen 49:25, or the withholding of the same in judgment, Hos 9:14. In those days when bottle feeding of babies was unknown, dry breasts could be a tragedy indeed.

V.P.H.

- 2333 שָׂדָי (*shadday*) *Shaddai, (the) Almighty* (KJV), is one of God's names in the OT, in some versions left untranslated and simply transliterated, but in the KJV translated as "the Almighty."

It is one of a series of divine names beginning with the element 'ēl: 'ēl 'ōlām "the God of eternity/God, the Eternal One" (Gen 21:33); 'ēl 'elyōn "the God most high" (Gen 14:18); 'ēl 'elōhē yisrā'el "God, the God of Israel" (Gen 33:20); 'ēl bēl-'ēl "God of Bethel" (Gen 31:13).

Shaddai, as a divine title, is used forty-eight times in the OT. Most often it appears in Job (thirty-one times), on the lips of almost every person in this drama: Eliphaz, 5:17; Job, 6:4; Bildad, 8:3; Zophar, 11:7; Elihu, 32:8; the Lord, 40:2. Of these forty-eight times *shadday* is prefaced by 'ēl (God) seven times: Gen 17:1; 28:3; 35:11; 43:14; 48:3; Ex 6:3; Ezk 10:5. The remaining forty-one times *shadday* stands alone.

The translation "Almighty" goes back to ancient times, at least as far back as the LXX, which translates *shadday* as *pantokratōr* "all-powerful." This is also reflected in the Vulgate, *omnipotens*. The rabbinic analysis of this word is

that it is a compound word composed of the relative *she*, "who" and the word *day*, "enough: *she-day*," the one who is (self-)sufficient" (Babylonian Talmud, Hagigah 12a).

In recent times these earlier suggestions have been all but rejected and new ones have been put in their place. We need to mention only some of the more tenable suggestions. One is that *shad-day* is to be connected with the Hebrew verb *shadad* "to destroy," hence "my destroyer." A second possibility, and this is the most widely accepted today, is that *shadday* is to be connected with the Akkadian word, *šadu* "mountain." Thus El Shaddai would translate into English something like "God/El of the mountain," i.e. God's abode. The ending -ay is to be understood as an adjectival suffix (and thus the translation "of the..."), a morphological feature now demonstrated by Ugaritic: for example, one of El's three daughters is called 'r̥sy ('*arsai*) and means, "she of the earth." Also related etymologically, in addition to Akkadian *šadu* is Ugaritic *td*, (Cross, see bibliography pp. 248–250).

As El Shaddai God manifested himself to the patriarchs (Ex 6:3): specifically to Abraham, Gen 17:1; to Isaac, Gen 28:3; and to Jacob, Gen 35:11, 43:14; 48:3. The context for most of these references is the covenant, more precisely the command for obedience and faithfulness on the part of the vassal and the promise of progeny by God. It is not to the hills (natural phenomenon) that these men of faith looked for confidence but to the Lord of these hills, the Lord of the mountain (Ps 121:1–2).

- 2334 שָׂדֵם (*shdm*). Assumed root of the following.

2334a שָׂדֵמָה (*sh" dēmā*) *field* (e.g. Isa 16:8; Hab 3:17).

- 2335 שָׂדָה (*shādap*) *scorch, blight* (Gen 41:6).

Derivatives

2335a שָׂדָפָה (*sh" dēpā*) *blasted, blighted*.

2335b שִׁדְדָפוֹן (*shiddāpōn*) *blight*.

sh" dēpā. Blasted, blighted. Only in II Kgs 19:26 in a taunt song on Sennacherib, "As grass on the housetops, and 'blasted' before it has grown up." There are two problems here. One is that the Isaiah parallel, 37:27, reads *sh" dēmā* ("field") for *sh" dēpā*. Second, is that the reading

in the Isaiah scroll from Qumran suggests that both verses should read: "Blasted (*nishdāp*) before the east wind."

shiddāpōn. *Blight*, a natural catastrophe (1 Kgs 8:37; II Chr 6:28) or a form of divine punishment (Deut 28:22; Amos 4:9; Hag 2:17). "Blight" is the effect produced by the dry hot wind which blows into Palestine from the Arabian desert, sometimes blowing for two or three days at a time. Its destructiveness is such that it is capable of withering grass, flowers, and standing grain in a day.

V.P.H.

שִׁדְדָּפוֹן (*shiddāpōn*). See no. 2335b.

2336 שדש (*shdsh*). **Assumed root of the following.**

2336a שש (*shēsh*), שִׁשָּׁה (*shishshā*) *six*.

2336b ששי (*shishshī*), שִׁשִּׁית (*shishshit*) *sixth*.

2336c ששים (*shishshim*) *sixty*.

2336d ששה* (*shishshā*) *give sixth part of*. This denominative verb occurs only in the Piel (Ezk 45:13; 39:2).

2337 שחם (*shōham*) *a gem, probably onyx* (e.g. Gen 2:12; Ex 25:7).

2338 שוא (*shw'*) **I. Assumed root of the following.**

2338a שָׁוְא (*shāw'*) *emptiness, vanity, falsehood*.

This noun appears fifty-two times in the OT most often in Ps (fifteen times) followed by Ezk (eight times), Job (six times), Jer (five times, only in the adverbial phrase *lashshāw'* "in vain, vainly, to no avail," and always preceding the verb: 2:30; 4:30; 6:29; 18:15 (perhaps); 46:11).

The most familiar use of *shāw'* is in the third commandment, "You shall not take the name of the Lord your God in vain" (Ex 20:7; Deut 5:11). Literally the sentence reads, "You shall not lift up the name of the Lord your God *lashshāw'*," the same construction as noted above in the Jer passages. Before examining the decalogue reference it will be instructive to observe how the word is used elsewhere.

That the primary meaning of *shāw'* is "emptiness, vanity" no one can challenge. It designates anything that is unsubstantial, unreal, worthless, either materially or morally. Hence, it is a word for idols (in the same way that *hebel* "vanity" is also a designation for (worthless) idols, for example). Psalm 24:4 may then be rendered, "He who has not lifted up his mind to an 'idol'." Da-hood (*Psalms*, I, AB, p. 151) lists the following

passages: Ps 26:4; 31:6 [H 7]; 119:37; Isa 1:13; Jer 18:15; Job 31:5 with this implication, although some are dubious, the last one and Isa 1:13 especially.

Not only are idols "deceptions" but so too the words of a false prophet which whitewash and sugarcoat a gloomy situation (Lam 2:14, Ezk 13:6-9, 23).

The evidence points to the fact that taking the Lord's name (i.e. his reputation) "in vain" will surely cover profanity, as that term is understood today, or swearing falsely in the Lord's name. But it will also include using the Lord's name lightly, unthinkingly, or by rote. Perhaps this is captured by the LXX's translation of *lashshāw'* as *epi mataiō* "thoughtlessly."

Bibliography: Childs, B., *The Book of Exodus*, Westminster, 1974, pp. 388, 409-12. THAT, II, pp. 882-83.

V.P.H.

2339 שוא (*shw'*) **II. Assumed root of the following.**

2339a שוּאָה (*shō'ā*) שָׁחָה (*shō'ā*) *devastation, ruin*.

2339b מְשׁוּאָה (*m'shō'ā*), מְשָׁחָה (*m'shō'ā*) *desolation*.

2339c מְשָׁחָה (*t'shū'ā*) *noise* (e.g. Isa 22:2; Job 39:7).

shō'ā. *Destruction, desolation.* The word is used in a desert scene (Job 30:3), surely the epitome of desolation. Perhaps a similar scene in the habitable land is described in Job 38:27. Or the word may describe the intensity of a storm, playing havoc with anything in its path (Prov 1:27; Ezk 38:9). From these references we move to the remaining uses of *shō'ā* where the term becomes a designation for divine judgment.

It has been suggested (Milik) that *shō'ā* is a poetic term for hell (Ps 35:8) into which David hopes his enemies will fall. The meaning given here then is "pit" or "hole in the ground." Zephaniah 1:15 describes the day of the Lord as, among other things, "a day of ruin." The unpredictability and swiftness of such "devastation" is underscored by Isa 47:11, part of a lament for Babylon, or by Isa 10:3, on God's own backslidden people.

m'shō'ā. *Ruin, devastation*, always used following the word *shō'ā*: Job 30:3; 38:27; Zeph 1:15. Twice the word appears in the plural: Ps 73:18, "You (God) cast them down into 'destruction'" (hell?); Ps 74:3, "Pick your steps (God's) over these endless 'ruins'." Interestingly, both times the plural is vocalised *mashshu'ōt*. Should it be *m'shō'ōt*?

V.P.H.

2340 שׁוּב (*shûb*) (*re*)turn.

Derivatives

- 2340a שׁוּבָה (*shûbâ*) *retirement, withdrawal* (Isa 30:15).
 2340b שׁוּבָהּ (*shîbâ*) *restoration* (Ps 126:1).
 2340c שׁוּבָב (*shôbâb*) *backsliding*.
 2340d שׁוּבָב (*shôbêb*) *backsliding*.
 2340e מְשׁוּבָהּ (*m"shûbâ*) *backsliding*.
 2340f תְּשׁוּבָהּ (*t"shûbâ*) *answer*.

We have cited simply the basic meaning of *shûb* but as we shall see the verb branches into not a few different nuances. It is the twelfth most frequently used verb in the OT, appearing just over 1050 times. With very few exceptions *shûb* is restricted to the Qal and Hiphil stems. It appears most often in Jeremiah (111 times) followed by Psalms (seventy-one times), Genesis (sixty-eight times), Ezekiel (sixty-two times), I Kings (sixty-two times), II Chronicles (sixtyone times), II Kings (fifty-five times), Isaiah (fifty-one times).

The Bible is rich in idioms describing man's responsibility in the process of repentance. Such phrases would include the following: "incline your heart unto the Lord your God" (Josh 24:23); "circumcise yourselves to the Lord" (Jer 4:4); "wash your heart from wickedness" (Jer 4:14); "break up your fallow ground" (Hos 10:12) and so forth. All these expressions of man's penitential activity, however, are subsumed and summarized by this one verb *shûb*. For better than any other verb it combines in itself the two requisites of repentance: to turn from evil and to turn to the good.

In the Qal stem it has been suggested that there are ten different meanings for *shûb* with subdivisions within each, plus a few uses difficult to pinpoint (Holladay, p. 59ff.). Of these two or three merit special observance. To begin with, the basic meaning of *shûb* "to (re)turn" implying physical motion or movement appears over 270 times. A few times God is the subject, "At the appointed time I will return to you (Sarah)," (Gen 18:14). Most often the subject is a person: "I (Abraham) and the lad (Isaac) will go yonder and worship, and return to you" (Gen 22:5). In the Hiphil there are eighty-seven occurrences of *shûb* in the sense of "bring back, carry back."

Second, often (over 120 times) *shûb* acts as a sort of an auxiliary verb whose function is to repeat the action of the second verb: "and 'again' Isaac dug the wells (*wayyāshôb yishāq wayyāhpor*)," Gen 26:18).

The third important use of *shûb* in the Qal, and theologically the most crucial, is in passages dealing with the covenant community's return to God (in the sense of repentance), or turning away

from evil (in the sense of renouncing and disowning sin), or turning away from God (in the sense of becoming apostate). In such contexts *shûb* in the Qal is used 129 times. By contrast, in the Hiphil *shûb* is used only eleven times when discussing the divine-human relationship. "turn back (Qal imperative) and 'let yourself be turned from your idols' (Hiphil) from your idols" (Ezk 14:6).

Taking all stems into consideration, Holladay (p. 117) concludes that there are a total of 164 uses of *shûb* in a covenantal context. The majority of them, as one might expect, are to be found in the classical/literary prophets 113 times, with Jeremiah leading the way (forty-eight times). By way of contrast with Jeremiah, the covenantal usage of *shûb* is found only six times in the first thirty-nine chapters of Isaiah (maybe only five if we read 30:15 not, "in returning (to God) and rest shall you be saved," but "in sitting still *yāshab*, i.e. abstention from foreign alliances, resting shall you be saved"). In the remaining twenty-seven chapters it is found only four times: 44:22; 55:7; 57:17; 59:20. Thus, we encounter the interesting phenomenon of two prophets back to back in the canon, the first virtually silent on the subject and the second quite vocal. Perhaps the paucity of references in Isaiah is the prophet's way of saying the die has already been cast. Quite poignantly God says to Isaiah, "Make the heart of this people fat... lest they be converted (*shûb*) and healed." A point of no return has been reached. God has foreseen the stubbornness of his people and has incorporated it into his plan. The prophet, therefore, is not to be frustrated (Mt 13:13ff.).

It should be noted that in a number of places *shûb* means "to return from exile." In the Qal: naturally in Ezr and Neh (Ezr 2:1; Neh 7:6); also Isa 10:22; Jer 22:10; Zech 10:9, *inter alia*; in the Hiphil: I Kgs 8:34; Jer 12:15, *inter alia*. The association between the ideas of a return from exile and a return to the covenant should be obvious. A return from exile was reclamation as much as a return from any form of sin. That God should permit either return is corroborative of his covenantal faithfulness.

To be sure, there is no systematic spelling out of the doctrine of repentance in the OT. It is illustrated (Ps 51) more than anything else. Yet the fact that people are called "to turn" either "to" or "away from" implies that sin is not an ineradicable stain, but by turning, a God-given power, a sinner can redirect his destiny. There are two sides in understanding conversion, the free sovereign act of God's mercy and man's going beyond contrition and sorrow to a conscious decision of turning to God. The latter includes repudiation of all sin and affirmation of God's total will for one's life.

shibā. Restoration, returning. Used only in Ps 126:1, "When the Lord returns 'the returning' of Zion."

An older view is that *shibat* of Ps 126:1 should be read *sh'bit* (BDB p. 986) and the phrase should be translated "turned again the captivity" (so AV). This has therefore been called a post-exilic Ps! Dahood (Psalms III, AB, p. 218) agrees with the view adopted here that *shibā* is in fact from *shūb*. He offers the translation "restore the fortunes of" citing the Sefire inscription in support. He treats the word *sh'bit* of vs. 4 also as from *shūb*, offering a similar translation. This view, now widely adopted, makes it unnecessary to see in this phrase a mark of exilic literature (see *shābā*).

shōbāb. Backsliding, apostate. Appears three times, Jer 3:14, 22 and Isa 57:17, where KJV translates "frowardly," and JB "like a thief."

shōbēb. Backsliding, Jer 31:22; 49:4 and a somewhat problematic usage in Mic 2:4 where the versions differ considerably from each other, and several emend (JB).

m'shūbā. Backsliding, disloyalty, faithlessness. This noun appears twelve times, nine of which are in Jeremiah (3:6, 8, 11, etc.). Twice it appears in Hosea: 11:7 (where "backsliding" has become a way of life) and 14:4 [H 5] which indicates that Israel may still be cured from such a lamentable condition. Only in Prov 1:32 is *m'shūbā* applied to an individual, "The 'turning away/error' of the simple shall slay them."

t'shūbā. Answer, (re-)turn. Appears eight times, five times in reference to the spring as the "turn" of the year (II Sam 11:1; I Kgs 20:22, 26; I Chr 20:1; II Chr 36:10); once "return" to a place (I Sam 7:17), and twice in the sense of "answer, retort" (Job 21:34; 34:36).

שׁוּבָה (shōbēb) שׁוּבָה (shōbāb). See nos. 2340c,d.

2341 שׁוּג (shwg). Assumed root of the following. Probably a by-form of *shāgag* (q.v.).

2341a מְשׁוּגָה (m'shūgā) error (Job 19:4).

2342 שָׁוָה (shāwā) I, agree with, be(come) like, level.

Derivative

2342a שָׁוְהָ (shāwēh) level plain (Gen 14:5).

This verb is to be distinguished from *shāwā* II, "to set, place" although the commentaries and lexicons are often in disagreement which of the two verbs is so intended in a particular passage.

The suggestion has been made (Labuschagne: see bibliography) that *shāwā* is a Shapell form of the verb *hāyā* "to be" and means therefore "to cause to be" and in comparisons "to cause to be like." Then developed the meanings "to be like, alike," i.e. "to resemble." In seven passages *shāwā* is used in comparisons. These are: Prov 3:15, "Nothing you could desire 'is like' her (wisdom)"; Prov 8:11; 27:15; Lam 2:13, "To what can I compare you, daughter of Jerusalem?"; Est 7:4 (perhaps the hardest verse in this book to translate), "For would not this affliction (liquidation of the Jews) 'amount to/be comparable to' a loss to the king?" or "for our affliction is not 'to be compared' to the king?" Two verses, Isa 40:25; 46:5, use *shāwā* to express God's incomparability. With him no one can be compared.

The verb occurs also in Est 3:8, 5:13 and Job 33:27 where the idea of comparison is latent but not expressible in English translation.

Wieder has suggested a connection between *shāwā* and Ugaritic *ṭwy* "to rule" especially for Ps 89:19 [H 20], "a lad 'I made king' over the mighty." Cf. too Gen 14:17 ("Valley of Shaveh/the Ruler").

Bibliography: Labuschagne, C., *The Incomparability of Yahweh in the Old Testament*, Leiden: Brill, 1966, p. 29. Wieder, A., "Ugaritic-Hebrew Lexicographical Notes," JBL 84:160-62.

V.P.H.

2343 שָׁוָה (shāwā) II, to set, place.

One cannot be certain of the exact relationship, if any, of *shāwā* II to *shāwā* I. BDB (p. 1001a) suggests the development of an original "set, place" to "set together, compare."

The verb occurs in Ps 16:8, "I have 'set/kept' Yahweh before me always." Obviously if one translates *shāwā* as "set" the passage must be understood metaphorically. The idea of comparison, with the supporting preposition *k* "like," is found in Ps 18:33 [H 34] and II Sam 22:34: "He has made my feet like those of a hind." The word also designates the divine favors God bestows on the king, Ps 21:5 [H 6]. Hosea 10:1 may be rendered, "He is loaded with fruit for himself."

The use of *shāwā* in Ps 119:30 is open to ques-

tion. Is it, "Your judgments have I 'placed' before me," (*shāwā* II); or, "Your judgments I have 'accounted suitable'," (*shāwā* I, BDB p. 1000a); or, "Your judgments I 'consider supreme'," (Ugaritic *twy*, "to rule," "govern" Dahood), in *Psalms*, III, in AB, p. 177; II, p. 316. V.P.H.

2343.1 שָׁחַ (shūah) *be bowed down, humble.*

Derivatives

2343.1a שָׁחָה (shūhā) *pit.*

2343.1b שָׁחָה (shūhā) *pit.*

2343.1c שָׁחַתָּה (shahat) *pit, destruction, grave.*

The verb *shūah* occurs only three times, always referring to humiliation or moral danger. It is, perhaps, a by-form of *shāhah*, which is similar in meaning.

shahat. Pit, destruction, grave, corruption. The RSV always translates "pit" or "Pit"; the NASB "pit" except Ps 16:10; 49:9 [H 10]; 55:23 [H 24]; Isa 51:14. NIV substantially the same. The LXX translates with words for corruption or destruction eleven times, death five times, and pit three times—in those places where a verb "dig" is associated. The word occurs twenty-three times. It is obvious that the modern treatment differs considerably from the older.

It is usually held, indeed insisted upon, that the noun comes from the verb *shūah* "dig a pit." From there the word is taken to refer to a presumed netherworld deep below the earth. Such a derivation is possible; note *nahat* "rest" from *nāah* "to rest." However, equally possible is a derivation from *shāhat* "to go to ruin," note *nahat* "descent" from *nāhat* "go down." Quite possibly we are dealing here with two homonymous nouns, one from *shūah* "sink down" (not really "dig") and the other from *shāhat* "go to ruin."

The word is used three times in connection with a word for "dig" (Ps 7:15 [H 16]; 94:13; Prov 26:27) and five times where a pit is implied to serve as a trap (Isa 51:14; Ezk 19:4,8; Job 9:31; Ps 9:15 [H 16]). It is used fourteen times in close connection with death, possible death, or the grave: Job 17:14; 33:18,22,24,28,30; Ps 16:10; 30:9 [H 10]; 49:9 [H 10]; 55:23 [H 24]; 103:4; Isa 38:17; Ezk 28:8; Jon 2:66.

Whether we are dealing with two words or one, cannot be proved. It is possible that the word "pit" came to mean "the grave"—graves in those times were usually caves dug into the rock—and then was extended to mean the corruption of the grave. Or there may have been two words originally. It seems clear that sometimes *shahat* refers to the grave and its decay. In Job 17:14 it is parallel to "the worm." In Job 33:18–

30 the subject is death by sword or disease. Psalm 16:10, like 49:9 [H 10], refers to decay in death (cf. 49:14 [H 15]). Psalm 55:23 [H 24] speaks of the "pit of corruption" (*b'er shahat*). There is no warrant here for the RSV "lowest pit." The word *b'er* is used twenty-nine times out of thirty-three for a literal well. It just means a hole dug in the ground; here it is the pit of burial. This is the reference also of Ps 30:9 [H 10] where the dust of bodily decay is in the context. Isaiah 38:17 is almost a definition, *shahat b'li*. The root of *b'li* means "worn out." The word *bal* is used for a negative. *shahat b'li* is the place of total decay. The translation "grave" or "decay of the grave" fits very well most of these passages which do not refer to a pit dug for a trap. (For further treatment see under *shāhat*.)

R.L.H.

2344 שָׁטַח (shūt) *I, go or rove about, go to and fro* (e.g. Num 11:8; II Sam 24:8).

Derivatives

2344e מִשְׁשׁוֹחַ (māshōt) *oar* (Ezk 27:29).

2344f מִשְׁשׁוֹחַ (mishshōt) *oar* (Ezk 27:6).

2345 שָׁחַ (shūt) *II, treat with contempt* (Ezk 28:24, 26).

Derivative

2345a שָׁחַ (sh'āt) *despite, contempt* (Ezk 25:15; 36:5).

2346 שָׁחַ (shwl) *Assumed root of the following.*

2346a שָׁחַ (shūl) *skirt, of robe* (e.g. Nah 3:5; Jer 13:26).

שָׁחַל (shōlāl). See no. 2399a.

2347 שָׁחַ (shūm) *garlic* (Num 11:5).

2348 שָׁנַע (shāwa') *cry out (for help).*

Derivatives

2348a שָׁנַע (shūa') *cry.*

2348b שָׁנַע (shōa') *cry.*

2348c שָׁנַע (shaw'a) *cry for help.*

The intensity of the action conveyed by *shāwa'* is aptly illustrated by the fact that the verb occurs only in the Piel. It is used twenty-two times, most often in Ps (ten times) and Job (eight times). This leaves only four references in the

rest of the OT: Isa 58:9; Lam 3:8; Jon 2:2 [H 3]; Hab 1:2.

Several observations emerge from a study of the twenty-two uses of *shāwa'*. One is that the majority of them, thirteen of twenty-two, are in the first person singular, "I cried." Thus, the verb is used autobiographically more than it is descriptively, or for purposes of exhortation. Second, it is usually in a context of a psalm known as a lament or a hymn of thanksgiving that this verb appears. Thus, in Ps 30:2 [H 3] the Psalmist "cries" unto the Lord because his foes are rejoicing over him. Or, maybe he feels that even God has rejected him (Ps 88:13 [H 14]). The cry may be from the needy, the poor, who are either forgotten or taken advantage of (Ps 72:12; Job 29:13; 35:9). The same idea is expressed in the Sodom/Gomorrah story (Gen 18:20–21; 19:13) except that the verb here is *zā'aq/šā'aq*. *zā'aq* and *shāwa'* are parallel in Lam 3:8.

It is possible to "cry" to the Lord, but obtain no answer: Hab 1:2; Job 19:7; 30:20; Ps 18:41 [H 42]; Lam 3:8.

shaw'ā. A cry (for help). Again Ps accounts for the majority of uses of the noun (six of eleven times, plus the parallel II Sam 22:7; Ps 18:6 [H 7]). It is used to describe the cry of anguish, the cry of the oppressed, the cry of those who are approaching the breaking point. Exodus 2:23 illustrates this nicely: "The Israelites cried (*zā'aq*) and their cry (*shaw'ātām*) came up to God." Cf. Ps 39:12 [H 13]; 40:1 [H 2].

shōa'. A cry (for help), used only in Isa 22:5 in a day of the Lord context, "They are shouting/ crying to/on the mountains."

shūa'. Cry, if it is from *shāwa'*; *opulence, relief* if it is from *yāsha'* "to save, deliver" (cf. BDB p. 447*b* and 1002*b*). The first meaning is likely in Job 30:24, though the second meaning cannot be ruled out. In Job 36:19 (the only other occurrence) "opulence" or "riches" seems to be intended.

V.P.H.

שׁוּעַל (*shū'al*). See no. 2433a.

2349 שׁוּף (*shûp*) *bruise, crush, desire* (?), *seize* (?), *strike at* (?).

This verb is found in three passages in the OT+: Job 9:17; Ps 139:11 (the first referring to the crushing caused by a storm, the second crushing caused by darkness). Two references are in the memorable (and much debated) Gen 3:15, "It shall 'bruise' your head and you shall 'bruise' its heel." This passage has often been referred to as the "protevangelium," the first good news of a promised redeemer after man's original fall away from fellowship with God.

What, though, is meant by "bruising" or "crushing"? That such would describe the action of a man with a snake is obvious but would it equally describe the thrust of a snake's bite at a man's heel? The LXX translates both uses of *shûp* in Gen 3:15 with *tereō* "to watch, guard." The Vulgate, on the other hand, uses two different verbs. To describe what the woman's seed would do to the serpent it uses the verb *conterere* "to crush." To describe what the serpent would do to the woman's seed, it uses the verb *insidiari* "to lie in wait." This along with other factors has led several commentators to connect the first *shûp* with another Hebrew verb *shā'ap* II, "to trample under foot" and the second *shûp* with Hebrew *shā'ap* I, "to gasp, pant after."

Taken in the context of the OT and the fulfillment of promise, the verse finds a partial unfolding at Calvary. It is, however, not until Rev 20 that the implications of the verse reach their climax (cf. also Rom 16:20).

V.P.H.

שׁוּפָר (*shôpār*). See no. 2449c.

2350 שׁוּק (*shwq*) I. Assumed root of the following.

2350a שׁוּקָה (*shôq*) *leg*.

2350b שׁוּק (*shûq*) *street* (Prov 7:8; Eccl 12:4, 5; Song 3:2).

shôq. *Leg.* When *shôq* refers to a man's body it designates the lower part of the leg, the shank from the knees downward. When *shôq* refers to part of an animal's body it designates the upper, thicker part of the leg. The distinction is maintained rigidly by the כַּף which translates man's *shôq* as "leg" and an animal's *shôq* as "shoulder." The rsv less consistently renders the former also as "leg" and the latter as "thigh." The usual Hebrew word for the thigh of a person is *yārēk* (as with Jacob's "thigh," Gen 32:26).

Six times *shôq* refers to the leg of a person: Jud 15:8, "And Samson struck them leg (*shôq*) on thigh (*yārēk*)," perhaps a wrestling term (Burney; see bibliography). Cf. also Prov 26:7; Deut 28:35; Ps 147:10 (the infantry, "legs of a man"); Song 5:15, the legs of the bridegroom. Isaiah 47:2 is the one reference to the legs of a woman, here figuratively the Babylonian empire.

The remaining thirteen references are to the *shôq* of an animal, almost always a ram, and all are in a cultic context (animal sacrifice) except

for I Sam 9:24 (Samuel's hosting Saul which included sacrifice, cf. v. 12). In such sacrifices a good number of the verses state that the *shôq* of the animal is to be given to the officiating priest as his portion in the offering (Lev 7:32-34; 10:14-15; Num 6:20).

Bibliography: Burney, C., *The Book of Judges*, Ktav, 1970, pp. 369-70.

V.P.H.

- 2351 שׂוֹק (*shûq*) II, *be abundant*. Occurs in the Polel (Ps 65:10) and the Hiphil (Joel 2:24; 4:13).

- 2352 שׁוֹק (*shwq*) III. Assumed root of the following.

2352a תִּשְׁקָה (*ṭ' shûqâ*) *desire, longing*.

This noun appears only three times in the OT, once in Song 7:10 [H 11]. The woman says of her beloved: "I am my beloved's and his 'desire' is for me." The two remaining references are Gen 3:16 and 4:7. In the latter passage God is speaking to Cain and says to him that sin is like a crouching beast "hungering, intent upon" Cain. In the former passage God says, "Your 'desire' shall be to your husband and he shall rule over you." This is obviously neither an intensification nor a warping of a pre-existing hierarchy between the sexes for no such hierarchy is alluded to.

There are two differences between the Gen passage (3:16) and that in the Song of Solomon. In the former the reference is to the wife's desire for her husband. In the latter it is the bridegroom's desire for the bride. Second, in the Gen passage the reference to "desire" is in a context of sin and judgment. In the latter, the reference is in a context of joy and love.

Bibliography: Tribble, P., "Depatriarchalizing in Biblical Interpretation," JAAR 41:30-48, esp. p. 46.

V.P.H.

- 2353 שׁוּר (*shûr*) I, *travel, journey* (e.g. Isa 57:9; Ezk 27:25).

2353a תְּשׁוּרָה (*ṭ' shûrâ*) *gift, present* (I Sam 9:7).

- 2354 שׁוּר (*shûr*) II, *see, behold, observe*.

Derivative

2354a שׁוֹרֵר (*shôrēr*) *watcher* (e.g. Ps 56:3; 27:11). This may be considered a Polel part. with *mem* omitted (see below).

Altogether the root appears twenty-three times, sixteen times in the Qal, seven times in the Polel (six of which are in the Psalter, the exception being Job 36:24). Most often it is used in Job,

eleven times, seven of which are found in the Elihu speeches.

In several instances *shûr* II is simply a synonym for *râ'â* "to see," and is often paralleled to this verb. This, for example, appears in the oracles of Balaam: "From the top of the rocks I see him (*râ'â*), from the hills I observe him (*shûr*)" (Num 23:9). Cf. Num 24:17 (but here in a vision of the future).

In another context *shûr* assumes the meaning "to lie in ambush." The KJV rendering of Hos 13:7, "as a leopard by the way I will 'observe' them" is quite timid. The forcefulness of the passage is brought out by something such as, "Like a leopard I will 'lurk'" (NIV). God stalks his own apostate people. The same meaning is conveyed by Jer 5:26.

This may be the relationship between *shûr* in the Qal and the six uses of the Polel participle in Ps: 5:8 [H 9]; 27:11; 54:5 [H 7]; 56:2 [H 3]; 59:10 [H 11]; 92:11 [H 12] the last a Qal form of similar meaning. In all instances this is translated in KJV and RSV as "enemy." Dahood's argument in (*Psalms*, II, AB, pp. 25-26) that the participle should be translated as "defamer, slanderer" seems unnecessary. To be sure, the Psalmist is the butt of verbal abuse. But equally disconsoling is the fact that his enemies "watch" his every move and close in at the propitious time.

No unusual uses of *shûr* emerge from the Job passages. God may be the subject of the seeing (7:8; 33:27; 35:13) or the object of the seeing (34:29; 35:14).

Only in Hos 14:8 [H 9] does *shûr* go beyond the idea of gazing or inspecting to include that of caring for, watching over, protecting.

V.P.H.

- 2355 שׁוּר (*shwr*) III. Assumed root of the following.

2355a שׁוֹרֵר (*shôr*) *ox, bull*.

2355b שׁוּר (*shûr*) *wall* (e.g. Gen 49:22; Job 24:11).

2355c שׁוֹרָה (*shûrâ*) *row of olives or vines* (Job 24:11; Jer 5:10).

shôr. Ox, bull. Sometimes it is used collectively, but usually it refers to a single head of cattle of either sex (BDB). Oxen were very valuable, particularly for their work and as food. They were essential to abundant crops (Prov 14:4). However, they could not be yoked with an ass (Deut 22:10), nor muzzled while treading grain (Deut 25:4). The laws relating to them also reflect their great value. They are mentioned in two of the ten commandments: a neighbor's ox is not to be coveted (Ex 20:17) and the ox is to rest on the Sabbath (Ex 23:12). Several casuistic laws in Ex 21-23 relate to the ox. E. g., an ox that gores someone was to be stoned; its owner was

2356 שושן (*shūshan*)

clear unless the ox had been known to gore: then he too was put to death (Ex 21:28f.; cf. Ex 21:35f.). One was even to return his enemy's ox if he found it running away (Ex 23:4; cf. Deut 22:1-4).

The *shôr*, being the king of the domesticated animals, possessed great prominence and connoted majesty. Therefore the bull was frequently worshipped throughout the ancient near east, and at times Israel was strongly tempted to such worship, e.g. the golden calf (Ps 106:19f.; cf. Ex 32:1-6). Positively the bull was considered the most valuable sacrifice (cf. Deut 17:1; Lev 22:23; 4:3, 14 *pas.*). Further, in Moses' blessing on the tribes, Joseph is compared to a firstling bull for his majesty and superiority over all the nations (Deut 33:17). Most prominently, the face of an ox is one of the four faces of the living creatures that bear Yahweh's throne (Ezk 1:10; cf. Rev 4:6f.).

J.E.H.

שורר (*shôrêr*). See no. 2354a.

2356 שושן (*shūshan*) lily.

Related to *sshshn*, which means "big flower" or "water lily" in Egyptian. Some derive it from Akkadian *shushshu* "six-sided," referring to the six leaves of this lily. It appears mainly in poetic material as a symbol of beauty.

In the Song of Solomon, "lily" is used several times with reference to the bride. She is a "lily of the valleys" (2:1, not a technical designation of "lily of the valley") and a "lily among the thorns" (2:2; cf. 4:5, 6:11). The delightful lips of the bridegroom are compared with lilies in 5:13. This may refer either to their shape or their fragrance. In Hos 14:5 Israel shall "blossom as the lily," a reference to its restored beauty and abundance after repentance.

The temple of Solomon used the lily motif first found in Egypt. The seven-foot capitals on the pillars of Jachin and Boaz were made in the shape of a lily (I Kgs 7:19, 22), and the large cast metal sea had its rim decorated like a lily blossom (I Kgs 7:26).

Four psalm headings use the expression "according to" or "upon" the "lily" or "lilies" (45:1, 69:1). Two of them use "the lily of testimony" as a part of the title (60:1; 80:1). This obscure reference, which also baffled the LXX translators, is explained by most as a melody to which the psalm was sung. It is a musical notation of some kind. For other such notations see *selâ*.

H.W.

2357 שׂוּץ (*shāzap*) catch sight of, look on (Job 20:9; Song 1:6).

2358 *שׂוּר (*shāzar*) *be twisted*. Occurs only in the Hophal (Ex 26:1, 31, 36; 39:24).

שׂה (*shah*). See no. 2361a.

2359 שְׂחָד (*shāhad*) *bribe, ransom, offer gifts*.

Derivative

2359a שְׂחָדָה (*shōhad*) *bribe, present*.

The verb is used only in Job 6:22. Job says to his friends, "Did I say, give me something, 'ransom' me with your wealth?" and Ezk 16:33, "You have given presents away to all your lovers, you have 'offered gifts' to them."

shōhad. *Bribe, present, gift, reward, gratuity, inducement.* One may begin by observing that prohibitions on receiving bribes (presumably on the part of judges) are found in the legal sections of the Pentateuch: Ex 23:8; Deut 16:9. Although both verses begin similarly, Ex 23:8 ends, "For a bribe blinds the eyes of the wise (*hākāmim*)."¹ Cf. Isa 1:23; 5:23; Mic 3:11.

If the price is right a bribe can even produce a "hit-man" who will assassinate an innocent person: Deut 27:25; Ezk 22:12; Ps 26:10, or at least pervert judgment: Prov 17:23.

Only he who desists from such flagrant violation of both moral and criminal law can stand in God's presence: II Chr 19:7; Ps 15:5; Isa 33:15. God himself is above reproach on this point: Deut 10:17 (cf. I Pet 1:17).

Given the greed of man in any age and any civilization it is interesting that only three specific cases of bribery are alluded to (using *shohad*) in the OT: the sons of Eli (I Sam 8:3); kings Asa and Benhadad (I Kgs 15:19); and kings Ahaz and Tiglath-pileser (II Kgs 16:8).

Once again we see the uniqueness of the OT in contrast to pagan nations. In his study of Mesopotamian texts Finkelstein can state, "There is no known cuneiform law outlawing bribery specifically" (p. 79); "it (i.e. bribery) was not only a common practice, but was recognized as a legal transaction" (p. 80).

Bibliography: Finkelstein, J. J., "Middle-Assyrian *šulmānu* Texts," JAOS 72:77-80.

V.P.H.

2360 שָׁחָה (*shāhâ*) bow down.

Derivatives

2360a שָׁחָה (*sh'hât*) *pit* (Prov 28:10).

2360b שָׁחִית (*sh'hît*) *pit* (Lam 4:20; Ps 107:20).

Possibly cognate with Akkadian *shihû* "to wallow," "to descend." Used once in the Qal stem of the Jews' tormentors who had commanded, "bow down" or "lie down" (NEB) that they might walk over their backs (Isa 51:23).

It occurs once in the Hiphil stem at Prov 12:25 of the heaviness in a man's heart which "maketh it stoop" (KJV); "depresses it" (NAB); "weighs him down" (RSV).

The commonly occurring form *hishtaḥāwā* "to prostrate oneself" or "to worship," which was analyzed as a Hithpael of *shāḥā*, is now regarded on the basis of Ugaritic evidence as an Eshtaphal stem (the only example) of *hāwā* II (q.v.).

E.Y.

שָׁחוּר (*sh'ḥōr*). See no. 2368a.

שָׁחַת (*sh'ḥūt*). See no. 2360a.

2361 שָׁחַח (*shāḥaḥ*) **bow down.**

Derivative

2361a שָׁח (*shāḥ*) **low, lowly** (Job 22:29).

This verb is used seventeen times in the OT, eleven times in the Qal; four times in the Niphal; and two times in the Hiphil. Eight of the seventeen times it is parallel with *shāpel* also meaning "to be/become low, be abased." The root appears most often in Isaiah, eight of seventeen times: three times in the Qal, 2:11, 17; 60:14; three times in the Niphal, 2:9; 5:15; 29:4; two times in the Hiphil, 25:12; 26:5.

In all instances of *shāḥaḥ* in the Niphal and Hiphil the meaning is "to be brought low" in the sense of be humbled, to have one's arrogance knocked out of him. The one exception is Eccl 12:4 (Niphal): "And all the daughters of music shall be brought low." Exactly what this means is anybody's guess, but if we take chap. 12 as an allegory of old age the phrase may refer to deafness or the weakness of the voice.

In the Qal the meaning of "to depedestalise" the arrogant appears also in Isa 2:11, 17; Ps 107:39 and perhaps Job 9:13 where the best English translation would be, "they 'grovel' at his feet."

There are several extended meanings of *shāḥaḥ* in the Qal. One is to bow in the sense of doing obeisance before another human being. This is illustrated in Isa 60:14 and Prov 14:19, "The evil bow down before the good." A second would be to bow in the sense of to walk in a stooped posture, dejected as in a period of mourning: Ps 35:14; 38:6 [H 7].

V.P.H.

2362 שָׁחַט (*shāḥaṭ*) **kill, slaughter.**

Derivatives

2362a שָׁחַטָה (*sh'ḥitā*) **slaughtering.**

2362b שְׁחָטָה (*shahātā*) **slaughter.**

The verb *shāḥaṭ* appears eighty-four times in the OT. All are in the Qal except for two instances of the Niphal: Lev 6:25 (H 18) and Num 11:22.

With five exceptions, where it means "beaten/hammered out" gold (I Kgs 10:16, 17; II Chr 9:15, 16), *shāḥaṭ* means "to kill" most often in a ritual sacrifice and a few times to kill another person(s). It may be used for non-sacrificial killing of animals (Gen 37:31). It is translated in the LXX as *sphazō* and *thuō*. In Jer 9:8 (H 7) alone is the lethal weapon the tongue.

When *shāḥaṭ* is used in connection with the killing of human beings such killing may be in one of two contexts: the cultic, religiously prompted killing or simply plain murder and assassination. In the former category we may place Gen 22:10, "And Abraham took up the knife to slay Isaac," plus Isa 57:5; Ezk 16:21; (child sacrifice à la human sacrifice of Canaanite cults). In the latter category is one hypothetical situation where God himself would be the perpetrator of the deed and his people the victims (Num 14:16). Zedekiah was forced to observe the execution of his own sons on orders of Nebuchadnezzar: II Kgs 25:7; Jer 39:6; 52:10. Identical treatment was meted out to the leaders of Judah: Jer 39:6; 52:10 (cf. too Jer 41:7). Similar massacres happened to the prophets of Baal (I Kgs 18:40), royal families (II Kgs 10:7, 14), and the Ephraimites who could not say "Shibboleth" (Jud 12:6).

It is in the realm of the sacrifice rituals that *shāḥaṭ* finds its most popular usage. As such, it is in the book of Lev that the root occurs most often, thirty-five times. When one comes into the presence of God he never comes empty-handed. "Nothing in my hands I bring" would be a concept alien to the Israelite. The worshiper is to bring an animal, a domestic one and never a wild one ("I will not offer unto the Lord that which costs me nothing"). Depending on the particular situation the individual himself, the high priest, or the Levites, after the worshiper has laid hands on the animal's head, kills the animal and then sprinkles the blood.

The Bible never really spells out how the animal was slaughtered. Rabbinic sources would indicate that the animal was killed in the swiftest and most painless way possible, by cutting horizontally across the throat in an uninterrupted movement.

The Greek root used in the LXX for *shāḥaṭ*, *sphazō*, is used four times in the Revelation to describe Christ as the "slain" lamb: 5:6, 9, 12; 13:8. A synonymous root for *shāḥaṭ* is found in Ps 44:22 [H 23], "We are counted as sheep for the 'slaughter'" (*ṭibhā*), and Isa 53:7, "As a lamb which is brought to the slaughter" (*ṭebah*), both from the root *ṭabāḥ*, also meaning "to kill."

sh'ḥitā. Slaughtering. Appears only once, in II Chr 30:17, "The Levites had charge of the slaughtering of the passover victims," during the Passover invoked by Hezekiah. Originally it was

2363 שחל (shhl)

the duty of the offerer himself to slaughter the victim.

shahātā. Slaughter (?). This noun appears only in Hos 5:2 and its translation is open to question. Literally the passage reads "the revolvers have gone deep in slaughter." Many modern commentators emend *shāhat* to *shāhat* "destruction" and redivide the MT. Driver (see bibliography) suggested that the noun is to be connected with a semitic root *sh̄t* "to corrupt" and renders, "They deepened the corruption of Shittim."

Bibliography: On *shahātā*: Driver, G. R., "Studies in the Vocabulary of the Old Testament," JTS 34:33–44, esp. p. 40. On *shāhat*: Michel, O., in TDNT, VII, pp. 925–38. On Rabbinic sources for methods of slaughtering: Ber- man, J., "Ritual Slaughtering," *Universal Jewish Encyclopedia*, IX, pp. 562–65. Rabinowicz, H., "Shehitah," *Encyclopaedia Judaica*, XIV, pp. 1337–44.

V.P.H.

שחיטָה (sh'hitā). See no. 2362b.

שחי (sh'hin). See no. 2364a.

שחית (sh'hit). See no. 2360b.

2363 שחל (shhl). Assumed root of the following.

2363a שחל (shahal) *lion* (e.g. Hos 5:14; Job 4:10).

2363b שחלת (sh'hēlet) *onycha*.

sh'hēlet. Onycha. This noun is used only in Ex 30:34 as one of the ingredients in the production of incense. Besides incense of plant origin, aromatic ingredients were produced from fauna. In this latter category we would include onycha, to be connected perhaps with the shell of a mollusk (snails, clams, oysters for example) which when burned emits a pleasant odor.

This leads to the larger issue of the place of incense in the or cultic rituals. Following Haran (see Bibliography) we suggest there are three different uses of incense. The first is as a supplement to a sacrifice, especially the meal offering (Lev 2:1, 15). Second is a separate incense offering offered in a censer. The ingredients of this offering are not mentioned in the Scripture (Lev 10:1ff.; Num 16:6ff.). Third is the incense placed on the altar of gold (Ex 30:1–10, 34–37). Only here is the composition of the incense detailed (Ex 30:34–37): three kinds of powdered sweet spices (of which one is onycha) and frankincense, all in equal quantities and seasoned with salt.

Most likely the burning of incense was assumed to have a sanitary function in which it was an antidote to the smell of the sacrifice. Both Testaments draw a parallel between the offering of incense and prayer (Ps 141:2; Lk 1:10; Rev 5:8; 8:3, 4).

Frank, Abingdon, 1970, pp. 325–29 with plates and figures. Haran, M., "The Use of Incense in the Ancient Israelite Ritual," VT 10:113–29. Thompson, J. A., "Incense," in ZPEB, III, pp. 274–76.

V.P.H.

שחלת (sh'hēlet). See no. 2363b.

2364 שחן (shhn). Assumed root of the following.

2364a שחין (sh'hin) *boil, inflamed spot*.

The skin disease of boils was one of the ten plagues brought by the Lord on Egypt (Ex 9:9–11). The Lord threatens boils if Israel will not obey him (Deut 28:27, 35). God is viewed as the ultimate reason for the disease, even in the case of Job, where the more immediate agent is Satan (Job 2:7), and the proximate cause may well have been germs.

E.A.M.

2365 שחפ (shhp). Assumed root of the following.

2365a שחפ (shahap) *gull* (Deut 14:15 = Lev 11:16).

2365b שחפת (shahepet) *wasting disease* (Deut 28:22; Lev 26:16).

שחפת (shahepet). See no. 2365b.

2366 שחש (shhs). Assumed root of the following.

2366a שחש (shahas) *dignity, pride* (Job 28:8; 41:26).

2367 שחק (shāhaq) *rub away, beat fine, pulverize* (e.g. Job 14:19; Ex 30:36).

Derivative

2367a שחק (shahaq) *dust, cloud* (e.g. Isa 40:15; Deut 33:26).

2368 שחר (shāhar) *I, be black* (Job 30:30).

Derivatives

2368a שחור (sh'hōr) *blackness* (Lam 4:8).

2368b שחר (shāhōr) *black* (e.g. Lev 13:31, 37; Song 5:11).

2368c שחרות (shahārūt) *blackness of hair, i.e. dawn of youth* (Eccl 11:10).

2368d שחרחר (sh'harhōr) *blackish* (Song 1:10).

2369 שָׁחַר (shāḥar) *II, seek early, earnestly.*
Denominative verb.

Parent Noun

2369a שָׁחַר (shāḥar) *dawn.*

2369b מִשְׁחָר (mishhār) *dawn* (Ps 110:3).

All but one of the thirteen occurrences of *shāḥar* are in the Piel stem. The one exception is the Qal participle of *shāḥar* in Prov 11:27, "He that 'strives after' good obtains favor." Most often the object of the seeking is God: Job 8:5; Ps 63:1 [H 2]; 78:34; Isa 26:9; Hos 5:15. Of these five passages, four state that one seeks earnestly the Lord in a moment of affliction: Job 8:5; Ps 63:1 [H 2]; Ps 78:34; Hos 5:15. In Isa 26:9, the worshiper simply affirms his intense desire for fellowship with God.

God himself may be the subject of the seeking (Job 7:21). Wisdom may be the object of the seeking: Prov 1:28; 8:17 (and cf. further, Von Rad, *Wisdom In Israel*, p. 157ff.). Only in Isa 47:11 does the verb appear in a negative context, and even here the translation is uncertain.

shāḥar. *Dawn.* A masculine noun generally denoting the breaking of the day, that time just prior to sunrise. Some have taken a clue from the Ras Shamra texts in which *šhr* refers both to the common noun "dawn" and to the name of a deity, Dawn. *Šaḥar*, along with *Šalim*, is born to a woman who has been impregnated by the god El (UT 16; Text no. 52). The suggestion is then that there are (veiled) references to this Canaanite deity in the OT, albeit in a demythologized fashion.

It is of interest to observe the verbs with which *shāḥar* is used. Most frequent is the verb 'ālā "to ascend, rise." Cf. Gen 19:15, "When the morning arose/when the dawn broke" (also Gen 32:24, 26 [H 25, 27]; Josh 6:15; Jud 19:25; I Sam 9:26; Jon 4:7; Neh 4:21 [H 15]). Another is 'ūr "to awaken" (Ps 57:8 [H 9]; 108:2 [H 3]). Should these two verses, which are the same in parallel Pss, be translated "I shall awake in the morning" or "I shall awaken the dawn" or "I shall awaken Shāḥar"? Cf. Job 38:12, dawn (*shāḥar*) is given a daily assignment by God, though it would appear obvious that this is a case of poetic license. We may assume the same license in operation when the Psalmist (139:9) muses about riding on the wings of the dawn, or in those references to the dawn's eyelids: Job 3:9; 41:18 (H 10, Steadman).

The *crux interpretum* is Isa 14:12, "How you are fallen from heaven Lucifer (כִּינֹן son of the morning, *hēlēl ben shāḥar*). That the passage occurs in the context of a satire on the king of Babylon no one will deny. Yet many Christians have taken this verse (along with perhaps Ezk 28), and on the basis of verses such as Lk 10:18; I Tim 3:6, have assumed that here is something on

Satan's origin, especially his expulsion from heaven subsequent to his pompous display of arrogance. The *New Bible Commentary* (rev. ed., p. 600) calls such exegesis "a precarious conjecture." And E. J. Young can say flatly (p. 441), "It cannot apply to Satan." Among evangelicals Archer (WBC, p. 622) is the most open to a supernatural, cosmic interpretation. We feel safest with the application of the phrase to the Babylonian tyrant whose gross pride provided fuel for the prophet's invective.

שָׁחַרְרֹת (shāḥārūt). See no. 2368c.

שָׁחַרְחֹר (sh'harhōr). See no. 2368d.

2370 *שָׁחַת (shāḥat) *destroy, corrupt.*

Derivatives

2370a מַשְׁחִית (mashhit) *destruction.*

2370b מַשְׁחֵת (mashhēt) *destruction* (Ezk 9:1).

2370c מִשְׁחָת (mishhat) *disfigurement of face* (Isa 52:14).

2370d שָׁחַת (shāḥat) *pit, destruction.*

The verb occurs 151 times in the OT. It is used primarily in the Hiphil stem. It also occurs in the Piel, Niphal, and Hophal stems. There is no discernible difference in translation. To illustrate, Rabshakeh says to the envoys of Hezekiah, "Have the gods of the nations delivered them which my fathers have destroyed?" (*shāḥat* in the Piel). The exact correspondence to this verse is found in Isa 37:12 except that *shāḥat* appears there in the Hiphil.

The object of this verb may be a city (Sodom, Jerusalem); a dynasty (the house of David, II Chr 21:7); nations who harass God's people (Babylon, Jer 51:11); most often God's own covenant people and their possessions. Only against Amaziah (II Chr 25:16) does God launch an individual vendetta. Similarly Pharaoh Necho, contemporary of Josiah, said to the saintly king, "Do not oppose the God who is with me or else he may 'destroy' you" (II Chr 35:21). Rehoboam averted God's destruction by repentance (II Chr 12:12).

mashhit. *Destruction, destroyer.* Morphologically, this is a Hiphil participle of *shāḥat*. It is used to describe a lion (Jer 2:30), an angel (I Chr 21:12, 15). The most familiar usage will be

in connection with the angel of destruction at the Passover (Ex 12:23), "the destroyer." He is the messenger entrusted with the execution of God's vengeance.

shahat. Pit, destruction. At least two controversies focus on the substantive *shahat*. First, to what verbal root is the noun to be related? Many scholars have connected it with the verb *shûah* "to sink down," (BDB, p. 1001), or *shâhâ* "to bow down," or *shahat* "to destroy." There is a noun *shahat* meaning "pit" from *shûah* "sink down" (Ps 7:15 [H 16] and 35:7). This does not exclude the derivation of another *shahat* from *shâhâ*. Cf. *nahat* I from *nûah* and *nahat* II from *nâhat*, (see *shûah*). The second problem is to what degree, if any, can *shahat* legitimately be taken as a poetic designation of Sheol and thus be reflective of the Israelite concept of the afterlife?

shahat occurs twenty-three times in the OT, most often in Psalms (nine times) and Job (seven times). The KJV translates the word as "corruption" (Ps 16:10); "pit" (Ps 35:7); "destruction" (Ps 103:4); "grave" (Job 33:22); and "ditch" (Job 9:31). OT scholars, obsessed with the idea that the concept of immortality and the afterlife was a relatively late postexilic development in Israel, conveniently, but incorrectly, understood *shahat* only as an allegorical designation of the Babylonian exile!

Specifically fourteen of the sixteen combined references in Ps and Job would seem to entertain no possible interpretation other than an afterlife concept (exclude here Ps 7:15 [H 16]). See also *shahat*, no. 2343.1c.

V.P.H.

2371 שִׁטָּה (*shittâ*) *acacia, tree and wood* (e.g. Isa 41:19; Deut 10:3).

2372 שִׁטָּח (*shatah*). *spread, spread abroad* (e.g. II Sam 17:19; Jer 8:2).

Derivatives

2372a מִשְׁטָּח (*mishtâh*) *spreading place* (Ezk 26:5, 14).

2372b מִשְׁטָּח (*mishtâh*) *spreading place* (Ezk 47:10).

שִׁטָּה (*shittâ*). See no. 2344b.

2373 שָׁטַף (*shâtap*) *wash, rinse, overflow, engulf*.

Derivative

2373a שִׁטְפָּה (*shetep*) *flood, downpour*.

The meaning "to overflow, engulf" accounts for the majority of the uses of *shâtap*. The translation "to wash, rinse," is found only in the following passages: Lev 6:28 [H 21]; 15:11-12; I Kgs 22:38; Job 14:19 (in the sense of "erode") and figuratively Ezk 16:9, "I washed your blood off you," and here parallel with *râhas* "to wash" (cf. Lev 15:11).

The verb *shâtap* is most often associated with the flowing of water: "torrent" (*nahal*): Isa 30:28, 66:12; Jer 47:2; II Chr 32:4; Ps 78:20; "river" (*nâhâr*): Isa 43:2; Song 8:7; "rain, shower" (*geshem*): Ezk 13:11, 13; 38:22; "waters" (*mayim*): Isa 28:2, 17; Ps 124:4; "flood" (*shetep*): Dan 11:22.

A good many of the above verses used the "overflowing torrent" idea as a figure of speech for God's judgment on his people: Isa 8:8; 28:2, 15, 17-18; 30:28 (against Samaria in this case). It does not stretch one's imagination to feel the full force of the analogy. Conversely, however, note that the same combination of words occurs in Isa 66:12. But here the idea is the overflowing and dissemination of blessing (the only time *shâtap* carries a positive force when a water metaphor is employed). Also personal calamities, as well as national emergencies, may be described by *shâtap*. From such the victim will pray for rescue: Ps 69:2, 15 [H 3, 16] and 124:4.

shetep. Flood, downpour, used to describe "flood water" in Ps 32:6; Job 38:25; Nah 1:8; Dan 9:26; 11:22. The last three are in reference to judgment. The remaining reference is Prov 27:4, "The flood of wrath."

V.P.H.

2374 שֹׁטֵר (*shtr*). **Assumed root of the following.**

2374a שֹׁטֵרָא (*shōtēr*) *official, officer*.

2374b מִשְׁטָּרָא (*mishtār*) *rule*.

shōter. Official officer. This noun is a participial form from a root which is productive throughout the Semitic family (cf. Akkadian *šat-āru* "to write"; Arabic *ṣafara* "to write," "rule," *ṣitrūn* "row," "line," Aramaic/Syriac *š'tārā* "document," Sabeian *str* "inscription"). The word is used of a subordinate official. In distinction to many other known officials, these were probably originally trained in the scribal arts, as the root would indicate.

shōtēr is a general term, widely used for an official in many areas of government and society. It names the Jewish sub-officials under the Egyptian overseers who drove the Hebrews to hard labor (Ex 5:6, 10), being accountable for both the amount and quality of the work (Ex 5:14-19).

During the years of wandering in the wilder-

ness (Num 11:16), it designates the sub-officials of the seventy elders of Israel whom the Lord gave to Moses to share the weight of administration (Deut 1:15). Throughout the early days of Israel, they seem particularly attached to the elders, sometimes in the civil administration (Deut 31:28) or in matters relative to military affairs (Deut 20:5ff.; Josh 1:10; 3:2).

The position apparently continues into the united and divided monarchies where they are involved in military affairs (I Chr 27:1; II Chr 26:11) and as Levites, in judicial and religious matters (I Chr 23:4; 26:29; II Chr 19:11; 34:13).

mishtār. Rule. Depicts the rule of the heavenly bodies over the surface of the earth (only Job 30:33).

R.D.P.

2375 שִׁי (shay) *gift offered as homage* (Isa 18:7; Ps 76:12; 68:30). Derivation uncertain.

שִׁיבָה (shibā). See no. 2340b.

שִׁיחָה (shihā). See no. 2340.1 b.

שִׁיט (shayit). See no. 2344c.

2376 שִׁילוֹה (shiloh) *Shiloh*.

Shiloh was located about thirty miles north of Jerusalem in Ephraim. Joshua chose this city as headquarters (18:1) and had the tabernacle erected there. It functioned primarily as a religious center, only secondarily as a base for military operations. It is possible that at times there existed in Shiloh some fertility cult practices. This may be indicated in three ways: (1) the reference to an annual festival at Shiloh during which the daughters of Shiloh engaged in some kind of a dance. The Benjamites used this occasion to abduct for themselves wives (Jud 21:15-21); (2) the reference in I Sam 1:22 to sacred prostitution at the Shiloh temple engaged in by Eli's sons and the women; (3) when Samuel's mother Hannah went to the temple Eli saw her lips move but heard nothing. His startling conclusion was that she was drunk (I Sam 1:13). Could Eli have thought so presumably because it was quite common for pilgrims to get drunk at the annual festival?

Archeological excavations have shown that Shiloh was destroyed around 1050 B.C., apparently by the Philistines at the time they captured the ark of the covenant from the Philistines (I Sam 4). This fact is alluded to in Ps 78:60; Jer 7:12, 14; 26:6, 9.

The Jer passages are extremely interesting, for

they occur in his famous "temple sermon" (7, 26). He threatens that God will do to Jerusalem as he did to Shiloh. Why choose Shiloh for an analogy? Two reasons. One, Shiloh was the only locality that we know of outside Jerusalem with a temple of Yahweh that housed the ark of the covenant. Two, at both places the people had attempted to exploit their relationship to God (via the ark and temple respectively) to achieve security in a time of political distress. Religion had become magic.

We must now consider the reference to the verse in Gen 49:10, Jacob's blessing on his son Judah: "The staff shall not depart from Judah, nor the sceptre from between his feet until 'Shiloh' come, and the obedience of the people be unto him." What is meant by the phrase "until Shiloh come"? If it is a prophecy of Jesus, the NT nowhere alludes to it. It would be preferable to say it is a prophecy of David as a type of the Messiah, but what does Shiloh add?

What are the other possibilities of interpretation? One is to connect consonantal *shylh* with the rare Akkadian word *šēlu* "counselor." A second is to retain the translation Shiloh and read either, as in כִּינ, "Until Shiloh come(s)" but what can this possibly mean? Or read, "Until he (Judah/David) comes to Shiloh," expressing some expansion of the base of power beyond Judaeans borders. A third suggestion is made on the almost unanimous testimony of the ancient versions (LXX and Targums) that would infer a slight change in the MT, i.e. a change of *shylh* to *shlh* (= *shellô* "to whom it belongs"), the relative particle *sh*, the preposition *l*, the third person singular pronominal suffix *-ô*. The phrase then could read "until he comes into his own." Allegro notes the messianic interpretation of Gen 49:10 at Qumran where the verse is applied to the scion of David to come (see Bibliography). The similarity to Ezk 21:27 [H 32] is striking. A fourth suggestion is to divide the consonantal text *shylh* into *shay lô* "until tribute is brought to him" (Moran, Speiser).

V.P.H.

2377 שִׁינ (shyn). Assumed root of the following.

2377a שִׁינ (shayin), שִׁי (shên) *urine*
(II Kgs 18:27; Isa 36:12).

2378 שִׁיר (*shir*)

- 2377b שָׁתַן (*shātan*) *urinate*. Occurs only in the Hiphil (e.g. I Sam 25:22, 34; I Kgs 14:10). Doubtless derived from above noun, perhaps as an infixed "t" form.

2378 שִׁיר (*shir*) *sing*. Denominative verb.

Parent Noun

- 2378a שִׁירָה (*shir*) *song*.
2378b שִׁירָה (*shirā*) *song*.

In the Qal stem (plural) participial, "singers," and imperative forms of the verb predominate. "sing unto the Lord." *shir* also appears in the Polel stem and again as a participle designating the Levitical singers. This is found in numerous references in Ezra and Nehemiah.

shir. Song. It is to the Psalter that one turns for insight into the prevalence of singing in the Israelite cult. Phrases such as "sing praises unto the Lord" or "I will sing unto the Lord" occur over thirty-five times in the body of individual Psalms (Ps 13:6, "I will sing unto the Lord"; 27:6, "I will sing praises unto the Lord"; 33:3, "Sing unto him a new song").

Thirty psalms are subtitled (in the superscription) *shir* "a song." All of these are masculine except for Ps 18 where *shirā* is used. When a psalm is designated as a "song" this Hebrew word appears alone only in the superscription of Ps 46. Most often it is used in juxtaposition with the word *mizmōr* translated in the KJV as "psalm." In five instances the order is *shir/mizmōr* (a song/a psalm): Ps 48, 66, 83, 88, 108, and in eight instances the order is *mizmōr/shir* (a psalm/a song): Ps 30, 65, 67, 68, 75, 76, 87, 92. The significance of the sequence, if any, eludes our understanding.

It is also unclear if there is any appreciable difference between *mizmōr* "a psalm" and *shir* "a song." Rabbinic interpretation (the Midrash to Psalms) recognized *mizmōr* as a psalm accompanied by instruments and *shir mizmōr* as a psalm sung by a choral group alone. Several things are clear, however, in relating these two words. One is that the noun *mizmōr* appears exclusively in the Psalms and there always as a title and never in the body of a psalm. By contrast, *shir* is not confined to the Psalter and within the Psalter itself is used both as a title and in the psalm proper. Second, although *mizmōr* as a noun is limited to psalm superscriptions the verbal form (from which the noun is derived), *zāmar*, occurs in the Psalms and often in parallelism with the verb *shir*: 21:13 [H 14]: "We will sing (*shir*) and praise (*zāmar*) your power." This is comparable to the synonymous arrangement of the roots *yšr/dmr* in Ugaritic (for example, Dakhoud, in *Psalms*, II, AB, p. 54 on Ps 57:7 [H 8]).

A third observation to be made is that *mizmōr* is limited to religious song. *shir*, on the other hand, may occasionally refer to secular songs. Isaiah 23:16 refers to the songs of the harlot (Tyre). Amos 8:10 would indicate that religious songs can be turned into lamentations just as feasts can be turned into funerals.

A special category of psalms designated *shir* are Ps 120–134, fifteen in all. In their superscription they are called *shir ham-ma'ālōt*, "song of degrees" (KJV) or "song of ascents" (RSV). It is most likely that these psalms took their name from their use in the festal procession of pilgrims who at festival times "went up" to Jerusalem, an acropolis in itself. This is more likely than the suggestion these represent songs sung by Jews on the return from Babylon. Actually, in the group only Ps 126 would be suitable to such a context. (see *ma'ālā* for an additional alternative).

It is no accident that the hymn and the lament are the two leading types of psalms in the Psalter, both illustrating in turn the two ways of addressing God: praise and petition. In one way the hymn is an expansion of the lament. To illustrate, Ps 57 begins as a lament: "Take pity on me God... I take shelter in the shadow of your wings until the destroying storm is over... I lie surrounded by lions" (JB). By v. 7 [H 8], however, the Psalmist says, "My heart is steadfast, I will sing and make melody." The abrupt change of mood is obvious. Thus, most of the laments evolve into songs of praise in anticipation of God's deliverance. The Hebrew could always sing to his God in spite of forbidding circumstances.

The hymn and the song of thanksgiving praise God and sing to God not in anticipation for an expected deliverance but in response to something already experienced. And even here there is a distinction. One, the hymn, praises God for his actions or extols him for who he is (descriptive praise: God is... God does...). The song of thanksgiving praises God for a specific deed (declarative praise: God has...) (Westermann, p. 31ff.).

V.P.H.

- 2379 שַׁיִשׁ (*shayish*) *alabaster* (I Chr 29:2). Perhaps a loan word.

2379a שֶׁשׁ (*shēsh*) *alabaster or similar stone*.

- 2380 שִׁית (*shit*) *put, set*.

Derivatives

- 2380a שִׁית (*shit*) *garment* (Prov 7:10; Ps 73:6).
 2380b שָׂת (*shāt*) *foundation* (Ps 11:3; Isa 19:10).
 2380c שִׁית (*shayit*) *thorn bushes* (e.g. Isa 9:17; 27:4).

shit appears eighty-five times in the OT. It occurs in the Hophal stem twice in Ex 21:30. The root appears most frequently in the Psalter, thirty-one times, covering many different situations and contexts.

For at least one proper name the verb supplies an etymology, that is for Seth, the third son of Adam and Eve, "And she called his name Seth (*shēt*) for he has given/appointed (*shāt*) me another seed" (Gen 4:25). This in itself is quite interesting for the translation of *shit* "to give" is the exception, certainly not the norm in biblical Hebrew. Perhaps only two other occurrences of *shit* can be cited in support of the translation "to give." These are: (1) Ps 12:5 [H 6]: "I will 'grant' them safety who sigh for it" (vs. KJV and RSV); (2) Ps 21:6 [H 7], "You 'confer' on him blessings forever."

The most frequent object of *shit* is the word "heart." The phrase "to set the heart" is used ten times. The phrase is used once even for God, "What is man... that you set your heart on him?" (Job 7:17). Negatively the phrase means "to ignore, dismiss, take no notice of" as of Pharaoh's response to the first plague (Ex 7:23). Cf. I Sam 4:20; II Sam 13:20. Positively it means "to consider" (Ps 48:13 [H 14]; Prov 22:17; 24:32; 27:23).

A sampling from the thirty-one passages in the Psalter will give some idea of the extensive way the root is used. First we may note those passages in which the setting is hostile: Ps 3:6 [H 7]: "I will not be afraid of myriads 'set' against me." Cf. 140:5 [H 6]. Sometimes the tables are turned and the Psalmist prays for retributive justice on his enemies: Ps 9:20 [H 21], "'put' them in fear, O Lord." Cf. Ps 21:9, 12 [H 10, 13]; 73:18; 83:11, 13 [H 12, 14]. Second is the number of times the verb occurs in royal psalms dealing with the king: 110:1, "'sit... until I have 'made' your enemies your footstool." Cf. Ps 21:3, 6 [H 4, 7]; 132:11. Third, even in the same psalm *shit* may apply in quite different situations. The Psalmist says he has "put" his trust in the Lord (73:28) but the unbelievers in a sickening fashion "put" their mouth against heaven (73:9).

Bibliography: Dijk, H. J. van, "A Neglected Connotation of 3 Verbs," VT 18:16-30 (*shit* in Ex 10:1; Num 12:11, Ps 9:21 equals "to bring"). Ward, W., "Egypto-Semitic Roots," *Orientalia* 31: 407.

V.P.H.

2381 שָׁכַב (*shākab*) *lie down*.

Derivatives

- 2381a שָׁכְבָהּ (*sh'kābā*) *coating*.
 2381b שָׁכְבָתָה (*sh'kōbet*) *copulation*.
 2381c מִשְׁכָּב (*mishkāb*) *couch*.

shākab appears most often in the Qal primarily with the meaning "to lie down (in death)" or "to lie down (for sexual relations)."

Whenever the derivatives of *shākab* (see below) are used in a context of sexual relationships, those relationships are illicit (Gen 30:15, 16; II Sam 11:11 may be exceptions). This is no less true with the verb *shākab* itself. In one instance it is used in legal statements that forbid certain types of sexual liaisons. Exodus 22:16 (H 15) outlaws fornication: "If a man seduce a virgin who is not betrothed and 'sleep/lie' with her he shall pay her price and make her his wife." Deuteronomy 22:22 advocates the death penalty for two people caught in adultery: "If a man is caught 'sleeping/lying' with another man's wife both must die." Leviticus 18:22 and 20:13 use *shākab* in the statement that prohibits homosexual relationships: "The man who 'lies' with a man... they must die." Finally in Deut 27:21 "lying" with animals is cursed by the Law.

It is sobering to notice that for the above sexual aberrations usually the death penalty was prescribed. To be sure, the Bible does not tell us to what degree the punishment was enforced across the board. But why do the Scriptures inveigh so forcefully against tampering with the sexual relationship. Could not at least one reason be that Israel was surrounded by cultures in which such practices were par for the course at the human or even at the divine level? Perhaps one of the most degrading features of pagan religions is the way in which religious and sexual expression were often one and the same thing. It was, however, not a sacramentalizing of sex but rather an eroticizing of religion.

Apart from legal texts *shākab* is used in narrative sections that describe incidents of inappropriate behavior. The daughters of Lot made their father drunk and then 'slept' with him (Gen 19:32ff.). One of Abimelech's subjects almost inadvertently committed adultery with Rebekah (Gen 26:10). The verb is used to describe the rape of Dinah, Jacob's daughter, by Shechem (Gen 34:2, 7). Reuben "slept" with his father's concubine Bilhah while Jacob was absent (Gen 35:22). The sons of Eli engaged in amorous pursuits in their free time (I Sam 2:22). Amnon violated his half-sister Tamar (II Sam 13:11, 14), emulating, no doubt, the activities of his own father with Bathsheba (II Sam 11:4).

By contrast when the Bible makes reference to a sexual relationship that is within the boundaries

of God's will it usually uses a phrase such as "Adam knew his wife and she conceived" (Gen 4:1, 17) or "Abraham went in unto Hagar and she conceived" (Gen 16:4). The latter phrase is used even in Gen 38:18 of Judah and Tamar, father-in-law and daughter-in-law respectively, where Judah denied Tamar her levirate rights.

sh'kābā. *Coating, (seminal) discharge.* In Ex 16:13–14 the noun refers to the "coating" of dew on the ground. Elsewhere it connotes semen, "(seed of) copulation" (KJV, Lev 15:16–17; 19:20).

sh'kōbet. *Copulation, bed.* Occurs four times always with the verb *nātan* "to give" (Lev 18:20, 23; 20:15; Num 5:20) in context of adultery (Lev 18:20; Num 5:20) or bestiality (Lev 18:23; 20:15).

mishkāb. *Couch, bed, lying down.* The meaning "couch/bed" predominates, at least as a part of the furniture decor to be associated with the bedroom. As such the *mishkāb* is a place for sleeping (II Sam 17:28; Job 33:15); for sexual activity (Isa 57:7–8; Prov 7:17; Gen 49:4, the first two references in a context of harlotry, the last one in a context of incest); for recuperation from injuries (Ex 21:18); and a *mishkāb* could even function as a coffin (II Chr 16:14, in which King Asa was cremated).

We may also note that the Scriptures a few times state that the bedroom was a proper place for the expression of the most intense emotions. Thus Ps 149:5 states, "Let the saints be joyful, let them sing aloud on their beds"; Ps 4:4 [H 5]: "Commune with your heart on your bed" or "upon your beds weep." This same idea is expressed in Ps 6:6 [H 7]: "I water my 'couch' with tears" except that the Hebrew word for couch is *'eres*, not *mishkāb*. Conversely, iniquity can be plotted and schemed from one's bed (Ps 36:4 [H 5]).

Bibliography: Orlinsky, Harry M., "The Hebrew Root SKB," JBL 63:19–44.

V.P.H.

שָׁכַבְתָּ (sh'kōbet). See no. 2381b.

2382 *שָׁכַח (shākā). Occurs only once, in the Hiphil, in Jer 5:8. Meaning uncertain, perhaps "lustful," NASB, NIV, "well-fed."

שָׁכַח (sh'kōl), שָׁכַח (shākūl), שָׁכַח (shakkūl). See nos. 2385a,b,c.

2383 שָׁכַח (shākah) *forget, ignore, wüher.*

Derivative

2383a שָׁכַחַה (shākēah) *forget(ting).*

The verb appears 102 times in the OT, mostly in the Qal (eighty-six times) but also in the Niphal

(thirteen times) and once each in the Piel (Lam 2:6), Hiphil (Jer 23:27) and Hithpael (Eccl 8:10). It occurs most often in Ps (thirty-three times) followed by Jer (thirteen times) and Deut (eleven times). Interestingly though *shākah* means "to forget," the same root in Biblical Aramaic (in the Haphel stem) means almost the opposite, "to find," e.g. "I have found (*shkh*) a man of the captives of Judah" (Dan 2:25). One explanation for this phenomenon is that the root may originally have meant "he could not find," a meaning reflected perhaps in Jer 50:6, "they have gone from mountain to hill, they have 'forgotten'/they 'cannot find' their resting place" (Rabin).

The general meaning of *shākah* "to forget," without a specific theological nuance, is the exception for this verb. A few passages will, however, illustrate this basic meaning: Gen 27:45, "And (Esau) forgets what you (Jacob) have done unto him"; Gen 40:23, "The butler forgot Joseph"; Job 19:14, "My friends have forgotten me"; Job 39:15, "Ostrich . . . leaves her eggs on the ground . . . forgetting that a foot may tread on them."

It is in God and man's reciprocal relationship, that the verb *shākah* finds its most steady use. About ten times it is used as an antonym for *zākar* "to remember" as in Deut 9:7, "Remember, never forget how you provoked Yahweh your God in the wilderness." Or, *shākah* may be used as an antonym for *yāda'* "to know" especially in Hos 2:13 [H 15]; 4:6; 13:4–6 (Wolff). To forget God is not to know God.

Either God or man (Israel) may be the subject of *shākah*. Seventeen times God is the subject, nine of which are in the Psalter. Some of these may be statements of affirmation in God's faithfulness, "He forgets not/ignores not the cry of the humble" (Ps 9:12 [H 13]). More often it appears in the form of a lament, "How long will you forget me?" (Ps 13:1, [H 2]); "Why have you forgotten me?" (Ps 42:9, [H 10]); "Why do you hide your face and forget our affliction?" (Ps 44:24, [H 25]); "Why do you forget us forever?" (Lam 5:20). Of the wicked, however, God has no amnesia (Ps 10:11).

More often man is the subject of *shākah*, the one who forgets. Forgetting is not simply a psychological act of having a thought pass from one's consciousness, a temporary or permanent lapse of memory. This is indicated by the frequent identification of the verb with an action. To forget God is to ignore his commandments (Deut 8:11). To forget God is to follow other gods (Deut 8:19); to forget God is to stand in fear of harm and danger, to live fretfully and timidly (Isa 51:13). To forget God is to challenge him (Ps 106:13). The Bible would indicate that satiety is the major factor for forgetting God (Deut 8:12ff.; Hos 13:6 for example).

In a few instances *shākah* cannot mean "to forget" but something like "to wither." Psalm 137:5 illustrates this, "If I forget you (*shākah*), O Jerusalem let my right hand 'wither' (*shākah*)" and not as KJV who must supply "Let my right hand forget (its cunning)." Cf. also Ps 31:12 [H 13]; 59:11 [H 12]; 77:9 [H 10]; 102:4 [H 5].

shākeh. *Forget(ting), forget(ter)*, appears only in participial form in Isa 65:11, "You who have forgotten my holy mountain," and Ps 9:18, "May the wicked return to Sheol, all the nations forgetful of God."

V.P.H.

2384 שָׁכַח (*shākah*) *subside, abate*.

Used only five times in the OT, four times in the Qal: Gen 8:1; Jer 5:26; Est 2:1; 7:10; once in the Hiphil, Num 17:5 (H 20). In the last example the meaning is "put an end to": "This is how 'I shall put an end to' the complaints." There follows the story of the sprouting of Aaron's branch.

The translation in Jer 5:26 is uncertain (Bright, *Jeremiah*, in AB, pp. 38, 40), "who 'watch/crouch' (?) like fowls." In the Est passages the verb clearly describes the subsiding of the Persian king's wrath.

The Gen reference (8:1) is in the deluge episode. We are informed that the flood lasted forty days and nights (Gen 7:12, 17). The water level prevailed above the highest portions of the land for 150 days (Gen 7:24). Then the waters began gradually to subside (8:1).

V.P.H.

2385 שָׁכַל (*shākal*) *be bereaved, make childless, miscarry*.

Derivatives

- 2385a שָׁכַל (*sh'kōl*) *bereavement*.
- 2385b שָׁכַל (*shākūl*) *childless*.
- 2385c שָׁכַל (*shakkūl*) *bereaved*.
- 2385d שָׁכָלִים (*shikkūlim*) *childlessness*.
- 2385e מִשְׁכָּלֶת (*m'shakkelet*) *miscarriage*.

The verb is used twenty-five times in the OT mostly in the Piel (eighteen times) but also five times in the Qal: Gen 27:45; 43:14 (twice); I Sam 15:33; Isa 49:21, and twice in the Hiphil: Hos 9:14 and Jer 50:9 (though many here emend *maskil* to

maskil, "Like a 'trained' warrior"). In I Sam 15:33 the verb is used in two different stems without significant difference: "As your sword 'has made childless' (*shākal* in the Piel), so shall your mother 'be made childless' (*shākal* in the Qal) among women."

When the translation of *shākal* is "to make childless" inevitably the verb is used in a context of divine judgement: Lev 26:22; Deut 32:25; Jer 15:7; Ezk 5:17; 14:15; Hos 9:12; Lam 1:20. The poignancy of the threat to make one childless and barren is underscored when one recalls the premium the OT places on progeny and inheritance. Many an Israelite cried as did Rachel, "Give me children or else I die" (Gen 30:1).

There is a curious triad of uses of *shākal* in Ezk 36:12, 13, 14. Judah is accused of "robbing her nation of its children." Does this refer to the practice of infant sacrifice or cannibalism?

We may note that this is not the word used of Jeconiah in Jer 22:30. He indeed had children though they went to Babylon as slaves. The word there from 'ārār is somewhat more general, "stripped, destitute."

Finally we note those passages in which the idea of "miscarriage" is prominent. The reference may be to the miscarriage of (1) animals: ewes and she-goats, Gen 31:38; sheep, Song 4:2; 6:6; calf, Job 21:10; (2) the land (non-productive): II Kgs 2:19, 21; Mal 3:11; (3) a woman: Ex 23:26; Hos 9:14, "give them a 'miscarrying' womb."

sh'kōl. *Bereavement, loss of children, desolation.* Only three times: Isa 47:8–9, in a lament for Babylon who pompously says, "I shall never know loss of children" (v. 8). The third is Ps 35:12, "There is 'desolation' in my soul."

shākūl. *Childless.* Already discussed above in the Qal forms, appearing in Isa 49:21 as a Qal passive participle feminine: "Who has borne me these, 'I was childless' and barren." Even after exile a remnant has survived, a second generation.

shakkūl. *Bereaved, robbed.* Perhaps a Piel passive participle without the preformative *mem*. Three times it is used in the analogy of a bear "robbed" of her whelps (II Sam 17:8; Hos 13:8; Prov 17:12), a graphic picture of fierceness and determination. Cf. also Jer 18:21; Song 4:2; 6:6.

shikkūlim. *Childlessness.* Only in Isa 49:20, "The children 'you thought were lost' (נָבָ) shall speak in your hearing." The exile does not terminate Israel/Judah's existence.

m'shakkelet. *Miscarriage.* An abstract feminine noun, only in I Kgs 2:21, "But the water is bad and the earth suffers from miscarriages" (i.e. fails to be productive and fruitful).

V.P.H.

2386 *שָׁכַם (*shākam*)

שִׁכְּלִים (*shikkūlim*). See no. 2385d.

2386 *שָׁכַם (*shākam*) *rise early*. This denominative verb occurs only in the Hiphil.

Parent Noun

2386a שָׁכֶם (*sh'kem*) *I, shoulder, back*.

2386b שָׁכֶם (*sh'kem*) *II, Shechem*.

How the verb *shākam* is related to *sh'kem* "shoulder," or vice-versa, is not clear. Pope (*Job*, in AB, p. 8) gives the following suggestion. "The verb is apparently denominative, from the noun *škm*, shoulder, and perhaps originally had to do with the early morning activity of breaking camp which would involve the use of the shoulders of both man and beast, and no small degree of exertion." So also BDB.

The important thing to be observed here is that the meaning of *shākam* as "to rise early" can be certain only when some qualifying phrase or fact is added such as *babbōqer* "in the morning" (Gen 21:14), the reference to early morning dew (Hos 6:4; 13:3), the contrast with staying up late (Ps 127:2) and evening (1 Sam 17:16). And even here the finite use of the verb is rare. Most often it is used adverbially and is coordinated with another verb. Thus Gen 19:2 (and many more) should read not, "You shall rise early and go on your way," but "You can start 'early' on your way."

In this vein note that the root *shākam* sometimes has nothing to do with the idea of "earliness" but rather "diligence, persistence, eagerness." Thus Jer 7:13 reads, "You did not listen though I spoke to you 'earnestly/continuously'" (RSV) vs. "though I spoke unto you, 'rising up early'" (KJV). The NIV has "again and again." This idiom occurs eleven times in Jer and in II Chr 36:15 and Zeph 3:7, "They corrupted 'continually' their deeds." The idea of *shākam* as "to get/be busy" (a Hiphil elative) is illustrated by Job 1:5, "He would get busy in the morning" (Pope); Jud 7:1, "Jerubbaal and all the people busied themselves" (also Jud 19:8-9; 21:4).

When *shākam* means "to rise early" the rising is for several purposes, one, obviously to get a good start on a long journey; but two, to get a good start on a good day by engaging in some act of worship: Gen 22:3; 28:18; Ex 24:4; 32:6; 34:4; Josh 6:12; 1 Sam 1:19; II Chr 29:20; and three, to engage in battle.

sh'kem I. Shoulder, back. Designates not just the shoulders, but also the upper part of the back in general. Hebrew *sh'kem* can designate either the common noun "shoulder/back" or the place name "Shechem." How Shechem is derived from shoulder will be explained below. In at least one instance it is difficult to know which of the two is meant. In Gen 48:22 the KJV has Jacob

saying to Joseph, "I have given you one 'portion' above your brothers." For "portion" the RSV has "one mountain slope" and the JB and Speiser (*Anchor Bible*, p. 358) "Shechem." There is here a play on words. Jacob parcels out to Joseph Shechem, a place which becomes eventually the latter's burial place (Josh 24:32), just as one parcels out at a meal (and the shoulder is one of the choicest parts) various portions for consumption.

As one would expect, frequently the shoulder is referred to when something is being carried either in a literal sense (piggybacking, Gen 21:14; water pitcher, Gen 24:15, 45; dough, Ex 12:34; stone, Josh 4:5; branches, Jud 9:48), or in a figurative sense (the burden of Assyria, Isa 10:27; 14:25; a beating rod, Isa 9:4 [H 5]; oppression of the Israelites in Egypt, Ps 81:6 [H 7]).

Second, to wear something on the shoulder is to wear or display it proudly and assert authority. Isaiah 22:22, "The key of the house of David will I lay upon his shoulder." Job 31:36, "Surely I would take it (a letter of acquittal?) on my shoulder." In this context note in the messianic passage (Isa 9:6 [H 5]) the phrase, "The government shall be upon his shoulder." The Child is to be a King and Ruler.

One final usage should be observed. In Ps 21:12 [H 13] David says that God will make his enemies "turn their back," i.e. put them to flight (almost all versions). Dahood (*Psalms*, I, AB, p. 134) suggests the translation, "You make them all shoulder." The enemies are now supine and the King can put his feet on their necks as a sign of conquest.

sh'kem II. Shechem. Located in the territory of Ephraim between Mount Ebal and Mount Gerizim, and about forty miles north of Jerusalem. The significance of Shechem meaning "shoulder" is to be found in this geographical situation. The city's terrain could be thought of as the slope (shoulder) of the two surrounding mountains.

The most significant places where Shechem occurs in the OT are in the following. (1) Abraham stopped here shortly after his arrival in Canaan and there he built an altar (Gen 12:6). (2) Jacob visited there on friendly terms (Gen 33:18-20) but his only daughter among thirteen children is subsequently violated there (Josh 24:32) in a plot purchased by his father. (4) Shechem is not mentioned among the cities conquered by the Israelites under Joshua, perhaps indicating that it surrendered peacefully, but it was the scene of the great covenant rehearsal for which Joshua assembled all the tribes (Josh 24:1ff.). (5) It was the center for Abimelech, the son of Gideon, who attempted to establish the institution of monarchy, something from which his own father had backed away (Jud 9:1ff.). The whole fiendish

plan ended in a bloodbath. (6) After Solomon's death, Rehoboam was repudiated as king by the 10 tribes at Shechem (1 Kgs 12:1) when he refused to provide a charter. Jeroboam, crowned king in his place, established his first capital at Shechem (1 Kgs 12:25). Little more is said in the OT about the city. Shechem is referred to once in the NT, in Acts 7:16. Thus, throughout its history Shechem functioned as a base for worship (Abraham and Jacob) and as a base for political operations which eventually erupted into bloodbaths. It was at separate times a shrine and a morgue.

Bibliography: Reviv, H., "The Governmental Shechem in the El-Amarna Period and in the Days of Abimelech," *Israel Exploration Journal* 16:252-57. Wright, G. R. H., "Shechem and the League Shrines," VT 21:572-603.

V.P.H.

2387 שָׁכַן (*shākan*) *dwelt, tabernacle.*

Derivatives

2387a שָׁכַן (*shēken*) *dwelling* (Deut 12:5).

2387b שָׁכֵן (*shākēn*) *neighbor, inhabitant.*

2387c מִשְׁכָּן (*mishkān*) *tabernacle.*

The verb *shākan* is used 129 times in the OT, most often in the Qal (111 times) and in the Piel 12 times, in the Hiphil (6 times). God is the designated subject of the verb 43 times. He may dwell on Mount Zion (Ps 74:2). He dwells among his people (Ex 25:8). He will dwell in Jerusalem (Zech 8:3). It is Jerusalem in which God has chosen to cause his "name" to dwell (Deut 12:11, etc.). On several occasions some symbolic representation of the divine presence dwells among the people: the glory (of God) is to dwell in the land: Ex 24:16; Ps 85:9 [H 10]. More often, the subject of the dwelling is the cloud: Num 9:17, 18, 22; 10:12, Job 3:5 in a different sense.

The verb is translated most often in the LXX by *kataskēnoō* rather than simply *skēnoō* "to tent" on approximately a two-to-one ratio. Why the longer prefixed form should predominate is not totally clear but one suggestion is that the longer form reinforces and lays further stress on the idea of a longer or permanent stay rather than an overnight hop (Michaelis, see Bibliography, pp. 387-88).

There is another verb in Hebrew that also means "to inhabit, dwell" and it is *yāshab*. What is the difference between the two? Occasionally they are used in parallelism. Isaiah 18:3, "All ye inhabitants (*yāshab*) of the world and dwellers (*shākan*) on earth." Jeremiah 49:31, "Arise, march on a nation that dwells (*yāshab*) in confidence... that dwells (*shākan*) alone." Second Chronicles 6:1-2, "Lord has chosen to dwell (*lishkōn*) in thick darkness, I have built a dwell-

ing (*mākōn* l' *shibt* *kā*) for you." Basically the distinction is that *yāshab* is reserved for passages describing man's dwelling among his people on earth. Seldom is *yāshab* used when God's dwelling on earth is under discussion. Solomon even asks the rhetorical question, "Will God indeed dwell (*yāshab*) on the earth?" (1 Kgs 8:27). When *yāshab* is used in connection with God's dwelling it is his heavenly abode that is alluded to. "He that sits (*yōshēb*) in the heavens shall laugh" (Ps 2:4); "You remain forever" (Ps 102:12, [H 13]). The word is suggestive then of majesty and regality. For God's dwelling (*yāshab*) is Jerusalem and Zion (cf. Ps 135:21; 9:11, [H 12]). *shākan*, on the other hand, underscores the idea not of loftiness but of nearness and closeness.

shākēn. Neighbor, inhabitant. The latter meaning is shown in Hos 10:5, "The inhabitants of Samaria shall fear." As neighbor *shākēn* may designate those that are friendly (Ex 3:22; Ruth 4:17) or unfriendly (Ps 44:13, [H 14]; 79:4, 12).

mishkān. Tabernacle. The portable sanctuary constructed by the Israelites in the wilderness described in some detail in Ex 25-31 and 35-40.

Until recent decades biblical scholarship, *vis-à-vis* the tabernacle, was preoccupied with either affirming or denying the reconstructionist approach of Wellhausen in the nineteenth century. In a nutshell, he concluded that the Exodus account of the tabernacle was a literary fiction composed in the postexilic period, and was an idealization of the wilderness era using Solomon's temple as the model. To substantiate his position Wellhausen paraded such "proofs" as: it is doubted whether the Israelites possessed the necessary skills in the wilderness period, especially when they need Phoenician help with Solomon's building or, the quantities of material required and their costliness seem beyond the means of a wandering people recently freed from bondage. The weaknesses in these arguments have been fairly well detected by modern biblical scholarship.

[As to the structure itself, there is a close architectural and chronological parallel in the inmost chapel surrounding the sarcophagus in the tomb of Tutankhamun. The sides were demountable, made of framework boards covered with gold and fastened with sliding bolts. Over the structure was a linen curtain adorned with gold rosettes. The structure is on display in the Cairo Museum. R.L.H.]

A more pressing issue is the degree to which the institution of the tabernacle solves, or complicates, the problem of dovetailing the ideas of God's transcendence and immanence. The tabernacle is the dwelling place of the Lord among his people and yet the "heaven of heavens" are unable to contain him. How to reconcile the appar-

shēkār. Strong drink, beer. Most likely not "liquor" for there is no evidence of distilled liquor in ancient times. It denotes not just barley beer but any alcoholic beverage prepared from either grain or fruit. In all but two of its twenty-three uses in the OT (Num 28:7; Ps 69:12 [H 13]) it appears in connection with *yayin* "wine" usually following it, once preceding it (Prov 31:6).

shikkōr. Drunkard. Either literally: I Sam 1:13; 25:36; I Kgs 16:9; 20:16; Prov 26:9, or figuratively: Isa 19:14; 24:20; Jer 23:9; Ps 107:27.

shikkārōn. Drunkenness. Only in Jer 13:13; Ezk 23:33; 39:19.

V.P.H.

2389 שָׁכַר (*shkr*) **II. Assumed root of the following.**

2389a אֶשְׁכָּר (*'eshkār*) **gift** (Ezk 27:15).

שִׁכְּרֹון (*shikkārōn*). See no. 2388c.

2389.1 שָׁל (*shal*) possibly **error** from Aram *sh"lā'*. Only in II Sam 6:7, meaning and derivation uncertain.

2390 שָׁלַב (*shālab*) **be bound, joined.** Occurs only in the Pual (Ex 26:17; 36:22).

Derivative

2390a שְׁלָבִים (*sh"labbim*) **joinings of bases** (I Kgs 7:28, 29).

2391 שָׁלַג (*shālag*) **to snow.** This denominative verb occurs only once, in the Hiphil (Ps 68:15).

Parent Noun

2391a שֶׁלֶג (*sheleg*) **snow** (e.g. Isa 1:18; Ex 4:6). Symbol of cleansing.

2392 שָׁלַח (*shālā*) **I, be at rest, prosper.**

Derivatives

2932a שָׁלוֹחַ (*shālū*) **prosperity.**

2932b שְׁלִי (*sh"li*) **quiet, private.**

2392c שָׁלֵו (*shālēw*) **quiet, prosperous.**

2392d שְׁלֻוָּה (*shalwā*) **quietness, prosperity.**

The meaning of *shālā*, "be at rest," is applicable only in Job 3:26, "I have 'no rest', no quiet, no repose." In the remaining four passages the emphasis is on prosperity: of those who love Jerusalem, Ps 122:6; of the wicked, Job 12:6; Jer 12:1; Lam 1:5.

shālū. Prosperity. A separate word and found only in Ps 30:7 (according to BDB, p. 1017). The context suggests the idea of the gross delusion that prosperity guarantees stability and is founda-

tional: "In my prosperity I used to say, nothing can ever shake me."

sh"li. Quiet, private. Only in II Sam 3:27. Joab took Abner aside to speak with him in private and there killed him. Why did Joab do such a thing? For at least two reasons. One is for blood-vengeance on Abner for his killing of Joab's brother Asahel (II Sam 2:23). The second is that Joab viewed Abner as a rival of David whose mission of peace to Hebron was only a camouflage. Thus, since Abner has now started to show his hand he must be eliminated, quietly.

shālēw. Quiet, prosperous. The word may apply to the life of an individual (Job 16:12, prior to his physical calamity) or to a nation/country/city (I Chr 4:40, Palestine; Zech 7:7, Jerusalem, in a good sense, but in a bad sense, i.e. "care-free," Ezk 23:42). This root is also used to pinpoint the prosperity of the ungodly (Ps 73:12).

shalwā. Quietness, prosperity. A blessed character trait in anybody's life (Ps 122:7; Prov 17:1). Yet it can become an open door to disaster. Note that one of Sodom's sins was "abundance" of idleness (*shāqat*, Ezk 16:49). It may produce "carelessness" (Prov 1:32). And a political platform promising peace at all costs can be nothing more than a subterfuge and a personal expedient.

V.P.H.

2393 שָׁלָה (*shālā*) **II, draw out, extract** (Job 27:8).

2393a שְׁלִיָּה (*shilyā*) **afterbirth** (Deut 28:57).

2394 שָׁלַח (*shālāḥ*) **I, send, send away, let go.**

Derivatives

2394a שֶׁלַחַת (*shelah*) **weapon.**

2394b שְׁלוּחִים (*shillūhim*) **sending away.**

2394c שְׁלוּחָה (*sh"lūhā*) **shoot, branch** (Isa 16:8, only).

2394d מִשְׁלַח (*mishlah*) **undertaking (that to which one stretches out the hand), pasture (place where animals are let free).**

2394e מִשְׁלֹחַ (*mishlōah*) **outstretching, sending.**

2394f מִשְׁלַחַת (*mishlahat*) **discharge, deputation.**

The verb *shālāh* means "to send," "to send away," "to let loose," "to spread," used of strife and discord, "to stretch out," "extend," used of the hand or a rod, "to extend," "reach out," used of roots and branches, and with *ʿēsh* "fire," "to light a fire."

In the first category a man sends another person somewhere (Gen 28:5; 37:13) or he may send such things as tribute (Jud 3:15) or letters (I Kgs 21:8; II Kgs 5:5).

God is often depicted in a similar way as sending men on an official mission as his envoys or representatives. Thus God often speaks of sending his prophets with great earnestness that they might warn Israel (cf Isa 6:8; Jer 1:7; 25:4; 26:5; 35:15; Ezk 2:3-4; Jud 6:8). False prophets are not sent by God (Jer 14:14-15). Moses was God's representative (Ex 4:28; Deut 34:11), as was Gideon (Jud 6:14). The message of the prophets is likewise regarded as being sent from God (Zech 7:12; Isa 9:8 [H 7]) and will accomplish God's purpose (Isa 55:11). Most important, God will send his Saviour to bind up the brokenhearted and set the prisoners free (Isa 61:1).

God sent signs and wonders as he delivered Israel from Egypt (Ps 135:9), but he also warns them that if they turn from him to idols, he will send rebukes, confusion, and a curse on them (Deut 28:20).

The meaning "send away" is generally found in the Piel and is seen in Gen 12:20; 18:16. Genesis 3:23 clearly involves an expulsion, and in Jer 28:16 the meaning involves death. Divorce is a sending away of the wife (Deut 22:19, 29; Isa 50:1).

The third meaning "let loose, free" is also found mostly in the Piel. It is used in the mild sense of formally allowing a guest to leave (Gen 18:16; 24:54) or in the stronger sense of releasing captives such as Israel in Egypt (Ex 4:21), the exiles in Babylon (Isa 45:13), and the prisoners in the pit (Zech 9:11). In Ps 81:12 God gives rebellious Israel up to go their own ways and to suffer the consequences.

Those passages in which God releases various types of plagues on his people should no doubt be regarded in this same category, since the Piel is used. This means that God removes his protective hand and unleashes various hostile forces (Num 21:6; Jer 9:16; Amos 4:10 etc.).

Proverbs 6:14, 19 illustrates the fourth category, "spread" of strife, while the fifth, "stretching out" the hand is seen in I Sam 24:6 [H 7]. In Ps 110:2 Messiah extends his scepter as he rules the nations. The reaching out of roots and branches is seen in Jer 17:8 and Ezk 17:6, while the last category, "to light a fire," "send a fire" is seen in Hos 8:14 and Amos 1:4, 7, 10, 12.

shelah. *Weapon, missile.* Probably originally one that was thrown. Thus Nehemiah's men

worked with one hand while carrying a weapon in the other (Neh 4:17, 23). The word is used eight times with cognates in Ugaritic and Arabic. (This latter word may not be a true cognate since the Arabic verb means "to arm" and "to fight" rather than "to send or throw.")

shillūhim. *Sending away, parting gift.* Used three times. Ugaritic *tlh* "dowry" is cognate.

Bibliography: TDNT, I, pp. 413-20. THAT, II, pp. 909-15.

H.J.A.

2395 שלח (*shlḥ*) II. Assumed root of the following.

2395a שֻׁלְחָן (*shūlhān*) *table.* (So also in ASV and RSV.)

The verb *shālāh* is not found in the OT. Its Arabic cognate means "to strip off hide." The Syriac *shalha* refers to the hide that has been stripped from an animal. The Hebrew usage would seem to derive from the practice of spreading a hide on the ground for use as a table. Ugaritic employs the noun *tlhn* in a sense similar to that of the Hebrew. There are problems, however. The Ug cognate *tlhn* indicates a first consonant "t" which should be represented by "t" in Syriac and by "ṭ" in Arabic. The connection with Arabic and Hebrew may be misleading or some kind of borrowing may be involved. In any event, the meaning is *table* or more generally *place of eating*.

shūlhān is used in the OT with several variations, all of them deriving from the use to which a table is put. In the first place, it describes the physical table itself, as in II Kgs 4:10 and Jud 1:7. In the latter passage conquered kings are pictured as gathering up scraps of food under the table of their conqueror. More frequently the word describes the table spread with food, as in Neh 5:17. Here the emphasis is on the meal rather than on the table itself. (This is true of the table of shewbread also.) From this the metaphorical use derives easily, namely God's provision for man's needs (so Ps 78:19).

An important use of the word is to evoke the picture of the fellowship shared by those seated around the table, such as the beautiful family scene in Ps 128:3 or the false, treacherous fellowship of Dan 11:27, or the fellowship in evil counsel of Ps 69:22 [H 23]. This concept no doubt enters into the imagery of I Cor 10:21. Lastly the word is used to describe the altar of sacrifice, as in Ezk 40:39 and Ezk 41:22.

H.J.A.

שֻׁלְחָן (*shūlhān*). See no. 2395a.

2396 שָׁלַט (*shālaṭ*) I, *exercise power (over), dominate, have mastery.*

Derivatives

- 2396a שָׁלִיט (shallit) *master*.
 2396b שְׁלִטֹן (shiltōn) *mastery*.
 2396c שְׁלֵטֶת (shalletet) *imperious*.

The essential idea of this root is "to exercise autocratic control over," "to have one's way with" anyone. It appears with its derivatives fifteen times in the Hebrew and thirty-two times in the Aramaic, where the meaning is similar to the Hebrew. Akkadian and Arabic use the root in similar fashion. (The Arabic word "Sultan" is formed from the same root.) In Ugaritic, *shlyt* is used as an epithet of *ltn* (Leviathan).

The basic meaning of the root is well illustrated in Neh 5:15, in which the officials serving under the government of Judah before Nehemiah acted in a tyrannical, self-serving, domineering way with the people in imposing heavy burdens of taxation on them. The people were powerless to resist. In Ps 119:133, the psalmist prays that iniquity shall not have dominion over him. He wants to be firmly established in the Word of God so that he can be free from the terrible tyranny of sin. In a slightly modified sense the verb appears in Eccl 2:19, with the meaning "to exercise control over" the fruit of one's labor.

The causative force of the Hiphil is seen in Eccl 5:18 and 6:2 with the sense "empower." In the one passage God gives a man riches and wealth with the power or ability to enjoy them, whereas in the other, he has riches and wealth but lacks the power to enjoy them.

shallit. *Master, ruler, tyrant.* Used in Gen 42:6 to describe Joseph as ruler over all the land of Egypt. Pharaoh had delegated to him absolute control and authority. In Eccl 8:8, both *shallit* and *shiltōn* are used to state that just as man has no authority over the wind to restrain it, so is he lacking in power over the day of death.

shalletet. *Imperious, domineering.* This feminine adjective occurs only once, in Ezk 16:30. It refers to a prostitute who behaves as if she were a law unto herself ("brazen harlot," RSV).

H.J.A.

2397 שָׁלַט (shlt) II. Assumed root of the following.

- 2397a שֶׁלֶט (shelet) *shield* (e.g. II Sam 8:7 = I Chr 18:7).

- שְׁלִטֹן (shiltōn). See no. 2396b.
 שְׁלֵטֶת (shalletet). See no. 2396c.
 שָׁלִי (sh'li). See no. 2392b.
 שְׁלִיָּה (shilyā). See no. 2393a.
 שָׁלִיט (shallit). See no. 2396a.
 שְׁלִישׁ (shālīsh). See nos. 2403e,f,g.
 שְׁלִישִׁי (sh'lishi). See no. 2403b.

- 2398 *שָׁלַק (shālāk) *throw, cast, hurl*. Occurs in the Hiphil and the Hophal.

Derivatives

- 2398a שָׁלַק (shālāk) *bird of prey*, perhaps the cormorant (Deut 14:17; Lev 11:17).
 2398b שְׁלֵקֶת (shalleket) *felling of tree* (Isa 6:13).

shālāk occurs 111 times, always in Hiphil or Hophal. It is the verb normally used with the general meaning "to throw." *tūl* and *rāmā* are synonymous, but are not nearly as common (used eleven times and two times respectively). Other verbs which are sometimes synonymous have specialized meanings, such as *shāmaṭ* "let drop," *sāqal* "throw stones," *nāpal* Hiphil, "cause to fall."

The verb is used in a wide variety of situations ranging from the physical act of throwing an object to the metaphorical use of abandoning or rejecting a person or thing. A common use is illustrated in Jud 8:25; Ex 4:3; 7:9; Gen 37:20. In Ex 32:19 and Deut 9:17 Moses casts the tablets of the Law down to the ground as an expression of his wrath and indignation at Israel's defection from God. But it is more than an expression of wrath; it symbolizes as well the bitter truth that Israel had no sooner entered into the Covenant of Sinai than they had broken it.

Casting someone or something to the ground may be used as a gesture of victory over, and utter annihilation of, someone, as in Dan 8:7 in which the ram (Persia) is thrown to the ground and trampled on in complete defeat by the goat (Greece).

Another important use of *shālāk* is "throw away," "cast off or out." In Neh 13:8, Nehemiah throws Tobiah's things out of the temple. Similarly in Isa 2:20, when God begins to speak in judgment, the idolaters will throw away their idols and run to the caves and rocks. So in Ps 71:9 the Psalmist prays that God will not cast him away (i.e. abandon him) in his old age (cf. also Ps 102:10 [H 11]).

This usage seems to afford a proper explanation of Gen 21:15 in which Hagar "cast the child (Ishmael) under one of the shrubs." Since Ishmael was at this time a teenager it would not seem probable that a physical throwing was involved. Rather what is meant is that Hagar abandoned him under a bush, considering him to be in such a weakened condition that there was no hope for him. Though she remained and watched over him she had given him up for lost.

The sense of "abandon" appears in Ezk 31 and 20:7-8, in which God admonishes his people to abandon, renounce their sins, to throw them away entirely, having nothing more to do with them. This is an important spiritual truth as is

2399 שָׁלַל (*shālāl*)

also the admonition in Ps 55:23 to cast our burdens on the Lord. That is, our cares and burdens are to be thrown away, abandoned into his care, so that we have nothing more to do with them.

God's total forgiveness of sin is graphically portrayed in Mic 7:19, in which God casts the sins of his people into the depths of the sea. The obvious inference is that they are gone forever, never again to be brought to light. Similar to this is Isa 38:17 in which God has cast Hezekiah's sins behind his back (cf. Ps 103:12 using a different verb [Hiphil] of *rāhaq* for the same idea).

Casting someone or something out may also be a symbol of rejection, as in I Kgs 14:9. The idea of rejection is also portrayed as a "casting away from someone's presence or face," as in II Kgs 13:23; 17:20; 24:20.

H.J.A.

שָׁלַקֶת (*shalleket*). See no. 2398b.

2399 שָׁלַל (*shālāl*) I, draw out (Ruth 2:16).

Derivative

2399a שָׁלַל (*shōlāl*) *barefoot* (Mic 1:8; Job 12:17). Cf. *yāhēp* of similar meaning in Isa 20:4.

2400 שָׁלַל (*shālāl*) II, plunder, take spoil.

Derivative

2400a שָׁלַל (*shālāl*) *plunder*.

shālāl II occurs fourteen times, in the Qal and Hithpoel. It is frequently used in parallel to *bāzaz*. Also bearing the same meaning are *shāsā* and its by-form *shāsas*. There seems to be no significant difference among these synonyms.

Taking spoil or booty, was customary. Indeed it was sometimes one of the principle motivations for going to war. Thus Gog, in Ezk 38:10–13, will see a prosperous and apparently vulnerable Israel and will be moved to invade and plunder. Military raids were sometimes ill-disguised plundering expeditions, such as the ill-fated Amalekite raid against Ziklag described in I Sam 30.

God permitted Israel to take spoil in most battles (Deut 20:14). This consisted of women, children, cattle and valuable goods. That a portion at least of the spoil was commonly dedicated to the Lord and used in connection with the tabernacle or temple service is evident from II Sam 8:12 and especially I Chr 26:27, in which David is said to dedicate part of the spoils of victory to the Lord.

There were some occasions when the taking of spoil was not permitted, such as on the victory over Jericho or when an idolatrous Israelite city

was to be destroyed (Deut 13:17). Similarly when Saul was sent to exterminate the Amalekites, no spoil was to be taken (I Sam 15).

The Scripture is very clear that the downfall and spoiling of cities is not an accident of military or political history, but that here also God is in sovereign control. Thus Jerusalem is given into the hands of foreigners (Ezk 7:21), and in Isa 10:6 God sends the Assyrian armies as his instruments of judgment to take spoil. That God will not allow the nations to plunder his people forever is clear from Zech 2:8 [H 12] and Hab 2:8, and in Jer 50:10 it is Babylon's turn to be despoiled. The tables are turned also on Gog in Ezk 39:10.

Ill-gotten gain is called spoil in Prov 1:13, and in Isa 10:2 a corrupt administration takes advantage of those who are defenseless, and makes widows their spoil.

The great joy and the exuberant celebrations attendant on the division of spoils (cf. I Sam 30:16) becomes a point of comparison with the joy of an Israel finally freed from the yoke of oppression in Isa 9:3. The Psalmist (Ps 119:162) rejoices over the treasure of God's word as others rejoice over spoil. The division of spoil is used as a symbol of the fulfilled triumph of Jesus the Messiah (Isa 53:12).

shālāl. Plunder, spoil, booty. Used seventy-five times. Frequently used in parallel is *baz* less frequently *bizzā*, and in one passage *malqōah*. Note the name Maher Shalal Hash-Baz (Isa 8:1, 3 and see *bāzaz*).

H.J.A.

2401 שָׁלַם (*shālēm*) be complete, sound.

Derivatives

- 2401a שָׁלוֹם (*shālōm*) *peace*.
- 2401b שְׁלֵמָה (*shelem*) *peace offering*.
- 2401c שָׁלַם (*shālam*) *be in a covenant of peace*. Denominative verb.
- 2401d שָׁלַם (*shālēm*) *perfect, whole, full*.
- 2401e שָׁלַם (*shillēm*) *recompense* (Deut 32:35, only).
- 2401f שְׁלֵמוֹן (*shalmōn*) *reward, bribe* (Isa 1:23, only).
- 2401g שְׁלִיָּם (*shillūm*), שְׁלֵמָה (*shillūm*) *recompense, reward*.
- 2401h שְׁלִימָה (*shillūmā*) *reward* (Ps 91:8, only).
- 2401i שְׁלֹמֹה (*sh' lōmōh*) *Solomon*.

The general meaning behind the root *sh-l-m* is of completion and fulfillment—of entering into a state of wholeness and unity, a restored relationship.

Of this group, some take their meanings from the comparatively infrequent simple stems while

the others *shillēm*, *shillūm*, and possibly *shal-mōn* reflect the intensive Piel sense. The apparent diversity of meanings between the two stems can be accounted for in terms of the concept of peace being restored through payment (of tribute to a conqueror, Josh 10:1), restitution (to one wronged, Ex 21:36), or simple payment and completion (of a business transaction, II Kgs 4:7).

The payment of a vow (Ps 50:14) completes an agreement so that both parties are in a state of *shālōm*. Closely linked with this concept is the eschatological motif in some uses of the term. Recompense for sin, either national or personal, must be given. Once that obligation has been met, wholeness is restored (Isa 60:20; Joel 2:25).

Adjectivally, *shālēm* is used of an attitude (a "perfect" heart; e.g. I Kgs 8:61; I Chr 28:9), and of a complete amount (of money, Ruth 2:12; of sin, Gen 15:16; of a whole nation, Amos 1:6, 9). An accurate weight is called "perfect" (Deut 25:15) or "just" (Prov 11:1).

Interesting is that *shālēm* is used of the whole (i.e. uncut) stones for the altar (Deut 27:6; Josh 8:31) and also of the dressed stones used for the temple (I Kgs 6:7).

shālōm. *Peace, prosperity, well, health, completeness, safety.* ASV and RSV similar.

shālōm, and its related words *shālēm*, *shelem* and their derivatives, are among the most important theological words in the OT. *shālōm* occurs over 250 times in 213 separate verses (so Durham, p. 275. BDB lists 237 uses). The KJV translates 172 of these as "peace." The remainder are translated about 30 different ways, many only a single time each. The LXX uses various members of the *sōzō*, *eirēnē*, and *teleios* word groups to translate *shālōm*. *shālōm* which occurs in other members of the Semitic language family, was influential in broadening the Greek idea of *eirēnē* to include the Semitic ideas of growth and prosperity.

shālōm means "absence of strife" in approximately fifty to sixty usages; e.g. I Kgs 4:25 [H 5:4] reflects the safety of the nation in the peaceful days of Solomon when the land and its neighbors had been subdued.

"Peace," in this case, means much more than mere absence of war. Rather, the root meaning of the verb *shālēm* better expresses the true concept of *shālōm*. Completeness, wholeness, harmony, fulfillment, are closer to the meaning. Implicit in *shālōm* is the idea of unimpaired relationships with others and fulfillment in one's undertakings.

About twenty-five times in the OT, *shālōm* is used as a greeting or farewell (Jud 19:20; I Sam 25:6, 35). To wish one *shālōm* implies a blessing (II Sam 15:27); to withhold *shālōm* implies a curse (I Kgs 2:6). In modern Hebrew *shālōm* is

used for "hello" and "goodby." Note the cognate Arabic *salaam*.

shālōm is the result of God's activity in covenant (*b'rit*), and is the result of righteousness (Isa 32:17). In nearly two-thirds of its occurrences, *shālōm* describes the state of fulfillment which is the result of God's presence. This is specifically indicated in those references to the "covenant of peace" (*b'rit shālōm*, Num 25:12; Isa 54:10; Ezk 34:25; Mal 2:5) with his chosen representatives, the Aaronic priests and the Davidic monarchs. The peace that marks the conclusion of an agreement between adversaries (Isaac and Abimelech, Gen 26:29), business partners (Solomon and Hiram, I Kgs 5:12 [H 26]), and man and God (Abraham, Gen 15:15) is couched in terms of covenant agreement.

This sort of peace has its source in God. He is the one who will speak *shālōm* to his people (Ps 85:8 [H 9]). His promise to David in I Chr 22:9-10 puts *shālōm* in context with *m'nūhā* "calmness," *nūah* "rest," and *sheqet* "to be quiet," as these are gifts from God. The classic statement of this concept is the Aaronic benediction (Num 6:24-26) which identifies the man to whom God has given *shālōm* as the one who is blessed (*bārak*), guarded (*shāmar*), and treated graciously (*hānan*), by Yahweh. This is fulfillment through the divine gift.

There is also a strong eschatological element present in the meaning of *shālōm*. Messiah, "David's greater son," is specifically identified as the Prince of Peace (*šar shālōm*—the one who brings fulfillment and righteousness to the earth).

Paul (Eph 2:14) links these themes in his identification of Christ as our peace. He is the messianic prince who brings wholeness, but he is also God's last word—the "concluding sacrifice" that brings redemption to mankind.

shelem. *Peace offering, thank offering.* ASV and RSV similar, with RSV using "sacrifice" in Prov 7:14.

shelem occurs nearly ninety times in the OT, all but once (Amos 5:22) in the plural form *sh' lāmim*. Along with many other words in the cultic vocabulary, *shelem* has its roots in the

common ancient Northwest Semitic language group. It occurs in Ugaritic (*šlmm*, UT 19: no. 2424) and the apparent plural form parallels other loanwords (e.g. *ʾūrim*, *tūmmim*, *īʾrāpim*).

The ritual for offering a *shelem* is like that for the *ʾōlā* (q.v.), except that only the fat around the intestines, the kidneys, the liver, and the fat of the sheep's tail is burned on the altar (Lev 3). Characteristic of the *shelem* is the fact that the rest of the victim was shared by the priest and the worshiper who offered the sacrifice. The priests received as their part the breast and the right leg ("sample," *īʾrūmā*, *īʾnāpā*. See Driver, JSS 2:100 for a discussion of these terms usually translated "wave-offering" or "heave-offering," Lev 7:28–34; 10:14–15). The remainder was to be shared by the worshiper, his family, and guests. Whatever remained after three days was to be burned.

According to the prescriptions in Lev 7:12–17 and 22:18–30, there were *shʾlāmim* of praise (*tôdā*) which was a free gift (*minḥah*, q.v.) accompanied by leavened and unleavened cakes offered in thanksgiving; *shʾlāmim* of free inclination (*nʾdābā*) offered freely out of devotion; and *shʾlāmim* of special vows (*nādar*) offered in fulfillment of a previous promise. The distinctions among these three categories are not always precise.

Current understanding of the meaning of *shelem* follows three main lines of thought. First, *shelem* symbolizes the gift of *shālôm*, i.e. the blessing of wholeness, prosperity, and the status of being at peace with God. This involves more than forgiveness of sin, in that fullness of life, prosperity, and peace with men is the expected result of *shālôm* status.

A second alternative is identified by de Vaux as "communion sacrifice," i.e. one in which there is a sharing of the sacrificial animal and the resultant fellowship around a meal. The *shʾlāmim*, then, were social occasions "before" the Lord (never "with" the Lord; cf. Deut 12:7, 18; 14:23, 26; 15:20). There is no sense of attaining mystical union with God through these sacrifices. Rather there is a sense of joyful sharing because of God's presence. Note too, that a quarter of the animal is shared with the priest (Lev 7:32).

Thirdly, the fact that the *shelem* usually comes last in the lists of the offerings (though not in the description of Lev 1–5), has prompted some scholars to argue that this is a "concluding sacrifice." This derives *shelem* from the rare Piel meaning "to complete." If this sense is correct, the NT references to Christ our Peace (e.g. Eph 2:14) become more meaningful, as he is the final sacrifice for us (cf. Heb 9:27; 10:12).

shʾlômōh. *Solomon* (the man of peace). Second son of David and Bathsheba, third king of the united kingdom.

The last years of David's life were marred by political strife caused by his sons as they strove for the throne. Under the influence of Nathan the prophet and Bathsheba (I Kgs 1:11ff.), David acknowledged Solomon as his successor.

Solomon's reign is significant, for it marks the first of the dynastic rulers of Judah. Solomon is noted for his wisdom and his contributions to the OT scriptures.

His insight into the strategic value of his territory and his monopolistic control of the ancient near eastern trade routes plus his important copper mining from south of the Dead Sea and all his metal working, provided him with great wealth that enabled him to sustain a large standing army and to construct and maintain the fortified cities (e.g. Megiddo, Hazor, Eglon, Gezer), that guaranteed his independence. The institution of corvée (*mas*) and its imposition on Israelites was extremely unpopular, and when his son Rehoboam tried to continue this policy, he forced the division of the kingdom.

Solomon's prize jewel was the Jerusalem temple which was built under his direction. He appears as the precursor of the great messianic king (II Sam 7:12–16).

שָׁלַמֹן (*shalmōn*). See no. 2401f.

2402 שָׁלַף (*shālap*) **draw out, draw off** (ASV and RSV similar).

shālap is used twenty-four times, mainly of the drawing out of a sword from the sheath. It occurs similarly in Akkadian.

shālap is used in the ordinary sense of "drawing out" a sword in I Sam 17:51. The Qal active participle is used in such passages as Jud 8:10, II Sam 24:9 and II Kgs 3:26 to describe warriors: "those who draw the sword" (NASB translates "swordsmen," NEB "armed men").

An important series of passages involves the use of the Qal passive participle, and describes the Angel of the Lord as standing with "drawn sword." This expression portrays him as standing ready to strike. Thus in Num 22:23, 31 Balaam is met by the Angel and receives by this a solemn warning that he is in imminent danger of being struck down in judgment. In I Chr 21:16,

David sees the Angel standing between heaven and earth, drawn sword in his hand.

Two passages require brief mention. In Ruth 4:7-8, *shālap* is used of drawing off a shoe. In Ps 129:6 it is used of grass growing on the rooftops. Commentators are divided here between the translation "before it sprouts (or shoots up)" and "before it is plucked up". The latter would seem to be preferable (so LXX).

H.J.A.

2403 *שָׁלַשׁ (shālāsh) *do a third time, do three times.* Denominative verb occurring in the Piel and Pual.

Parent Noun

- 2403a שָׁלוֹשׁ (shālōsh) *three.*
 2403b שְׁלִישִׁי (sh'lishi) *third, one third.* Used fifteen times.
 2403c שְׁלֹשֹׁם (shilshōm) *three days ago, day before yesterday.* Used twenty-five times, always in conjunction with 'etmōl or t' mōl.
 2403d שְׁלֹשִׁים (sh'lōshim) *thirty.* This is the plural form of *shālōsh* "three."
 2403e שְׁלִישׁ (shālīsh) *I, third part* (of a measure). Found twice.
 2403f שְׁלִישׁ (shālīsh) *II, a musical instrument, three stringed (?), or triangular (?), or three-barred (?).*
 2403g שָׁלִישׁ (shālīsh) *III, shield carrier, adjutant.* Used sixteen times.
 2403h שְׁלֶשֶׁת (shillēsh) *third generation.*
 2403i שְׁלִשִּׁים (shālīshim) (*Qere*), שְׁלִשִּׁים (Kethib) *excellent things.*

shālōsh. Three. This number plays a significant role in the Old Testament. As the first of the plural numbers (two is considered dual) it very easily came to represent the smallest complete cycle. It cannot be accidental that periods of three days, weeks, months or years are so frequently encountered in the Scriptures. When Ezra assembled the Jews at the river in preparation for the return to Jerusalem (Ezr 8:15) he stayed there three days, during which time he mustered the people and found no Levites present. This was evidently a time of final preparation. After they arrived, he waited three days before tallying all the wealth they had brought along (Ezr 8:32-33). Similarly, Nehemiah waited three days after arriving in Jerusalem before beginning his survey of the walls (Neh 2:11).

A period of three units of time seems to have been appropriate for justice to have run its course when tempered by grace. Thus Joseph impris-

oned his brothers three days (Gen 42:17). Israel experienced a famine of three years (II Sam 21:1) before discovering the reason, and Elijah's drought lasted three years (I Kgs 18:1). In each case the deliberate design was a full taste of retribution to be followed by a gracious restoration. It is highly probable that there is a similar significance in the choice of the three day sojourn of Jesus' body in the grave, i.e., man's sin fully judged, yet grace triumphant.

A threefold act gives a sense of finality, of definitiveness. Elijah stretched himself three times on the dead boy (I Kgs 17:21). After Leah had given birth to three sons she felt that now she had proven herself and that Jacob must now surely accept her fully (Gen 29:34). The threefold blessing of Aaron in Num 6:24-27, in which the name of the Lord is invoked three times on Israel, has a definitive quality, as does the trisagion of Isa 6:3, and while the doctrine of the Trinity is not hereby proven, it is at least consistent with the New Testament revelation.

As the number of the smallest plurality, three was appropriate as representing an innermost circle of friends or followers. Thus, of David's thirty mighty men, three were distinguished as being most select (II Sam 23:9). (Cf. also the three select disciples among Jesus' twelve.)

The religious year had gone full cycle when the three major feasts had been celebrated (Ex 23:14, 17), and Daniel made it a rule to pray three times daily.

shālīsh. Shield carrier, adjutant, originally referred to the third man in a war chariot, the one who was the shield carrier for, and assistant to, the warrior. This followed the custom of the Hittites and Assyrians. Bidkar, in II Kgs 9:25 has this function. In most passages the word is used in the more general sense of a high military officer serving as adjutant to the king (cf. II Kgs 7:2 and 10:25).

shālīshim (Qere) shilshwm (Kethib). Excellent things. This word is difficult. KJV, NASB, NIV marg. translate "excellent things" as the pl. of *shālīsh*. RSV, NIV and many translate "thirty sayings" as from *sh'lōshim*. Another possibility is *shilshōm* "formerly" (NIV marg., NASB marg.). The question is complicated by the somewhat similar Egyptian work "Wisdom of Amen-em-Opet" which is divided into thirty chapters and urges attention to "these thirty chapters." Some claim that a dependence on this work can be found in the following sayings of Prov 22:22-24:22 which can be divided into thirty sayings. First, it may be said that dependence on the Egyptian work is sometimes overemphasized and cannot be found at all in the latter part of this section. Second, the division into thirty sayings is not certain. They may be divided differently. Still, it may be that

there was a schematic use of the number thirty in such writings and that this stylistic device is witnessed to both in the Egyptian work and in this section of Prov. For further discussion, cf. Harris, R. L., "Proverbs," WBC, pp. 556-57.

שִׁלְשֹׁם (*shilshōm*). See no. 2403c.

2404 שָׁם (*shām*) **there** (so ASV and RSV).

shām is a very common adverb which has cognates in Ugaritic *šm*, Arabic *tamma* and *tumma*, ancient Aramaic *shm* and Biblical Aramaic *tamma*.

It may have 1) a locational significance such as in Amos 7:12, "Eat your bread there and prophecy there"; 2) an ablative use with the preposition *min*, Gen 2:10 "from there," I Kgs 17:13 "from it," i.e. "out of it"; 3) a directive force, with or without the "Directive *he*" (Gen 2:8, Jer 19:2); or 4) a temporal force "then," "at that time" (Ps 132:17, "then will I cause the horn of David to spring up").

H.J.A.

2405 שֵׁם (*shēm*) **name**.

This noun appears 864 times, but less than 90 times in the plural. No certain etymology has been established for this root. Two earlier conjectures are now rejected: Redslob (*Zeit. deut. morgenländische Gesellschaft* 1872: 751-56) sought to derive it from the root *shm* "to be high" and thus "monument" (Gen 11:4), "excellence" or "majesty" (Ps 54:1 [H 3]), while others have regarded it as a shortened form of *shēma'*. But the argument put forth by W. R. Smith (*Kinship*, 213) is preferred by some today. It derives *shēm* from the Arabic root *wšm* "to mark or brand," hence an external mark to distinguish one thing or person from another.

The concept of personal names in the OT often included existence, character, and reputation (I Sam 25:25). Often the plural form of *shēm* is rendered as "persons," (e.g. Num 1:2, 18, 20; 3:40, 43; 26:55). Further "to cut off the name" was equal to liquidating the person himself (Deut 7:24; 9:14; I Sam 24:21 [H 22] etc.). The name chosen for a child was often descriptive of the parent's wishes or expectations for the personality that was to mature. This is particularly evi-

dent in the renaming process, e.g. Jacob becoming Israel (Gen 35:10).

One of the favorite devices (found in seventy-nine passages) was the use of word play; observe this literary form in Jer 1:11-12; Mic 1:10-15; Hos 1:4-5, etc. The same device is found in the Egyptian *Westcar Papyrus*, a story about the birth of triplets and how they were named and then a pun on each name was recorded!

The name of YHWH, generally vocalized as Yahweh is the great theme of the OT name-theology. In Ex 6:2-3 the Lord indicates that no special revelation had been granted to the patriarchs by his name, Yahweh. But since that name occurs in Genesis almost 150 times, many have been misled to conclude that this either indicates the lateness of those parts of Genesis or a flat contradiction between two traditions in the Pentateuch. The solution lies in the Niphal reflexive verbs in Ex 6:2-3 and the *Beth Essentiae* before El Shaddai and its extended force before Yahweh. The resulting affirmation made in the text is that God claims "I manifested myself in the character of [Beth Essentiae] El shaddai but in the character [Beth Essentiae implied] Yahweh, I did not make myself known to them." The same idea is implied in Ex 3:13 where the interrogative *mā* "what" asks for the character of a person, while *mī* "who?" only requires identity.

In some passages *shēm Yahweh* is so inextricably bound up with the being of God, that it functions almost like an appearance of Yahweh (Ex 23:20-21; Isa 30:27). Cf. the tabernacling of the Name at various spots almost like a Christophany (Ex 20:24; Deut 12:5; II Sam 7:13, etc.).

The name of God also signifies the whole self-disclosure of God in his holiness and truth (Ps 22:22 [H 23]). This Name can be "walked in," i.e. people are to live according to its teaching (Mic 4:5).

Several important formulas or prepositional phrases using *shēm* must be observed. "To call one's name" over something signifies ownership, possession, and protection, e.g. of David over a city (II Sam 12:28), of seven women requesting one man's name (Isa 4:1), of God over the nations (Amos 9:12) and over Israel (Isa 63:19). This is to be sharply set off from the formula "to appoint a name" (*šim shēm l'*) (Jud 8:31; II Kgs 17:34; Neh 9:7) which means "to confer a new name." More usual is the sense of commission by the use of *b' shēm Yahweh* or *b' sh' mī* (I Sam 17:45; I Kgs 18:32; Jer 14:14; Deut 18:20).

Contrary to the emphasis of von Rad (*Studies in Deuteronomy*, pp. 37-44), "name-theology" does not replace the older "glory-of-the-Lord theology" associated with the ark, cloud, and fire. Von Rad suggests an evolutionary development, whereby material presence was replaced

by a more sophisticated tendency toward hypothesis for all these concepts: the ark, the angel of the Lord, the face of the Lord, the glory of God and the Name of the Lord are presented as representations and pledges of Yahweh's presence. Rather it is our Lord's preparation for the full disclosure of the Trinity as well as the Incarnation of his Son to come.

W.C.K.

2406 שָׁמַד (*shāmad*) *be destroyed, exterminated (Niphal); destroy, exterminate (Hiphil)*. (ASV and RSV "be destroyed" and "destroy.")

shāmad occurs sixty-three times. There are a number of Hebrew verbs whose semantic range includes the meaning "destroy" (thirty-eight are so translated one or more times in the KJV), but many of them take on this meaning only in certain contexts. *kālā*, for example, has the perfectly innocent meaning "be complete," but may in the Piel mean "put an end to, destroy." Similarly *bāla* "to swallow" and *āsap* "to gather." *shāmad*, on the other hand, always means "to destroy" or "annihilate." It is always used in passages dealing with vengeance or with the judgment of God.

The objects of destruction occurring with *shāmad* are mostly persons, whether a nation (Deut 4:26; 28:20, 24, 45), groups of nations (Deut 7:23), a family, etc. Of the sixty-three occurrences of the verb, in only four (Lev 26:30; Num 33:52; Hos 10:8; Jer 48:8) is the object of destruction other than personal.

The destruction depicted by *shāmad* usually involves a rather sudden catastrophe such as warfare or a mass killing, but in one passage it is the result of attrition due to famine and oppression (Deut 28:48, 63). In yet another passage God is depicted as the basic cause of the destruction (*shāmad*), while his people are his instruments of destruction (*abad*, Deut 9:3).

The destruction may be permanent (Moab in Jer 48:42, Jacob in Gn 34:30, God's enemies in Ps 83:11) or, less frequently, impermanent as in II Kgs 10:28 in which Baalism was destroyed, but whose roots remained, and which reemerged later (II Kgs 21:3).

Bibliography: THAT, II, pp. 963–64.

H.J.A.

2407 שִׁמְהָ (*shmh*). *Assumed root of the following.*

2407a שָׁמַיִם (*shamayim*) *heaven, heavens, sky*. (ASV and RSV similar).

Cognates are found in Ugaritic *shmm*, Akkadian *shamû* (singular, "rain"; plural, "heaven"), Aramaic, Arabic, and South Arabic.

The usage of *shamayim* falls into two broad categories, 1) the physical heavens, and 2) the heavens as the abode of God. Under the first category, heaven includes all that is above the earth, and any given passage may include all or merely a part of the whole. Heaven and earth together constitute the universe (Gen 1:1). They yield rain (Gen 8:2), snow (Isa 55:10), frost (Job 38:29), fire (II Kgs 1:10), dew (Deut 33:13), and thunder (I Sam 2:10). They hold the sun, moon, planets, and stars (Gen 1:14; 15:5; Isa 14:12; Amos 5:26). Zechariah 2:6 [H 10] speaks of the four winds of the heavens, and Ps 135:7 says that God brings forth the wind from his storehouses.

The heavens are frequently described in figurative language as having windows (Gen 7:11; II Kgs 7:2; Mal 3:10, though the word here is more likely sluice-gates such as are used in irrigation, see 'arubbā), gates (Gen 28:7), doors (Ps 78:23), pillars (Job 26:11), and foundations (II Sam 22:8). They are stretched out and spread out like a tent or a curtain (Isa 40:22).

The use of such figurative language no more necessitates the adoption of a pagan cosmology than does the modern use of the term "sunrise" imply astronomical ignorance. The imagery is often phenomenological, and is both convenient and vividly forceful. Thus a disobedient Israel would find the heavens to be like iron (Lev 26:19) or like bronze (Deut 28:23), not yielding the much-needed rain. Note that if the heavens were conceived of as a metallic vault, as is commonly suggested from Gen 1:8, 14 etc., the above passages would be meaningless, since the skies would already be metal. The word *rāqia'* (q.v.) comes from the verb meaning "to hammer out" and "stretch (a piece of metal) out" as an overlay. It is the idea of spreading out that carries over to the noun, not the idea of a metallic substance. "Expanse" is an acceptable translation.

Heaven is, secondly, the abode of God (Deut 26:15; I Kgs 8:30), and it is from there that he reaches down to do his will on earth. As the heavens are infinitely high above the earth, so are God's thoughts and ways infinitely above man's ability to comprehend (Isa 55:8–9). God is in sovereign control (Ps 2:4). He is able to reach out in judgment (Gen 19:24ff) and in salvation alike (Ps 57:3 [H 4]; Deut 33:26). Jeremiah 23:24 states that God fills heaven and earth, and Solomon recognizes that all of heaven and the highest heavens themselves ("heaven of heavens") cannot contain the Almighty God. As vast as the heavens are, they are merely part of God's creation, and he stands above it all. Therefore Solomon has no illusions that God has need of his temple or that it can contain him. Yet God has graciously conde-

scended to dwell there and to be approached by sinful man. Isaiah states (Isa 57:15) that though God dwells in the high and lofty place, he will also dwell with those of a contrite and humble spirit.

The heavens tell of the glory of God (Ps 19:1 [H 2]), declare his righteousness (Ps 50:6), and praise him (Ps 69:34 [H 35]). As grand as they are, they merely point to the Creator and are not to be worshiped (Ex 20:4; Jer 44:17–25). Though the heavens are his throne, they will one day vanish like smoke (Isa 51:6) and be rolled up like a scroll (Isa 34:4). Then God will create a new heaven and a new earth, unmarred by the effects of sin (Isa 65:17; 66:22). The joy and glory of completed redemption will be reflected in all of creation.

H.J.A.

שָׁמָה (shammā). See no. 2409d.

שְׁמוּטָה (sh' mūtā). See no. 2412d.

2408 שָׁמַת (shāmat) **release, let drop, let loose, let rest.** (ASV and RSV similar.)

Derivative

2408a שְׁמוּטָה (sh' mittā) **a remitting,** used five times, always in connection with the dropping or remission of debts.

The verb is used in both the physical and the metaphorical senses. In the physical sense it means "to drop" something or someone or "to throw (something) down." In II Sam 6:6 and the parallel I Chr 13:9, the verb has been generally treated in one of two ways, 1) "the oxen stumbled" (ASV, NEB, RSV, NIV, Keil), or 2) "the oxen upset it" (NASB, KB) or "shook it" (KJV, LXX). Since the Qal is generally transitive, the second choice seems preferable, "the oxen caused (the ark) to drop."

The noun *sh' mittā* occurs only in Deut, always with the sense of the remission of a debt (Deut 15:1–2, 9; 31:10). The commandment with regard to the releasing of a debtor from his debts every seven years was a continuing reminder that those who had themselves experienced the grace of God in the remission of sins ought also to manifest the spirit of grace in their interpersonal relationships.

In another context the verb is used in the

command of Ex 23:11 to "let (the land) rest, lie fallow" every seven years. The lesson is one of obedience and trust in the provision of God. God promised to bless far beyond any loss that would come about by letting the land rest or by releasing the debtor every seven years.

2409 שָׁמָם (shāmēm) **be desolate, appalled.**

Derivatives

2409a שָׁמָם (shāmēm) **devastated, deserted.**

2409b שְׁמָמָה (sh' māmā) **devastation, waste.**

2409c שְׁמָמָה (shim' mā) **devastation** (Ezk 35:7).

2409d שְׁמָמָה (shammā) **waste, horror, appallingment.**

2409e שְׁמָמֹן (shimmāmōn) **horror** (the feeling of inner desolation at the prospect of divine judgment, Ezk 4:16; 12:19).

2409f מְשָׁמָה (m' shammā) **devastation** (e.g. Ezk 6:14; 33:28), **horror** (Ezk 5:15).

shāmam is used with its derivatives 195 times in the Hebrew Old Testament and once in Biblical Aramaic. Basic to the idea of the root is the desolation caused by some great disaster, usually as a result of divine judgment. The verb *hārab* with its derivatives is frequently found in close association with *shāmam* and often overlaps it semantically, but *hārab* has as its basic idea a state of heat and dryness with lack of vegetation. This may be due to divine judgment, but not at all necessarily so. In the case of *shāmam*, heat or dryness is not inherent in the root, but rather it describes the result of disaster and judgment.

"Desolation" most frequently applies to places and things. In Isa 64:10, Isaiah is praying for a restoration of Jerusalem, which had come under God's judgment and was now a desolation (q.v.). In Joel 2:3 the land which had been "like the Garden of Eden" before the locust plague has become a "desolate wilderness." Other objects of desolation are the high places (Ezk 6:6), the gates of Jerusalem (Lam 1:4), a camp (Ps 69:25 [H 26]), storehouses (Joel 1:7), highways (Isa 33:7 [H 8]), altars (Ezk 6:4).

The book of Daniel has four passages employing the Polel form of the verb (*m' shōmēm* and

shōmēm). There is a causative (or, better, factitive) force here similar to the use of the Hiphil, except that the Hiphil generally involves a physical devastation, while the Polel seems to put more stress on the fact that someone has caused the sanctuary or altar to be polluted, thus rendering it unfit for the worship and service of God. These passages are Dan 8:13; 11:31; 9:27; and 12:11. In the first two, Antiochus Epiphanes is depicted as doing away with proper sacrifices and in 11:31 as setting up an "abomination" (*shiq-qūs*), generally understood to be an idol or pagan altar. In this activity he foreshadows the Antichrist as described in 9:27 and 12:11. Jesus refers to the coming idolatrous practices of Antichrist by the term "the abomination of desolation" (Mt 24:15 and Mk 13:14). The presence of this abomination in the sanctuary makes it desolate, unfit for proper worship.

In just a few special instances, people are the objects of devastation. Thus Jeremiah speaks of himself as having been "torn to pieces" and "made desolate" in Lam 3:11 (cf. also 1:13). This is obviously figurative language. There are three passages in which a woman is referred to as "desolate." In Isa 62:4 God says that when he redeems Israel, his people will no longer be called a woman that is "forsaken" and "desolate," but rather Hephzibah ("My delight is in her") and Beulah ("Married"). Similar to this is Isa 54:1.

From the above it is not difficult to see how the second major use of the root is derived, the sense of "horror" and "shock" brought about by the vision of desolation. It is the inner response to the outward scene. Examples are Jer 4:9; I Kgs 9:8; Ps 40:15 [H 16]. In such passages as II Kgs 22:19 and Deut 28:37 Israel becomes an "object of horror" to those who behold him, *shammâ* here used with words such as "taunt," "proverb," "curse."

shammâ. Waste, horror, appallment. Used thirty-nine times. The basic distinction between *shammâ* and *sh'mâmâ* seems to lie in the fact that *shammâ* in most passages stresses the horror caused by the desolation of judgment. It is frequently used with words such as "curse," "reproach," "byword," "object of hissing." Thus in *sh'mâmâ* the stress is usually on the desolation itself, while in *shammâ* the emphasis is on the *spectacle* of the desolation, the reaction it causes. The verb *shāmam* covers both ideas.

H.J.A.

שָׁמֵן (*sh'māmôn*). See no. 2409e.

2410 שָׁמֵן (*shāmēn*) **I, be(come) fat.**

Derivatives

- 2410a שָׁמֵן (*shāmēn*) **fat, rich.**
 2410b שָׁמֵן (*shāmān*) **fatness** (Gen 27:28, 39, only).
 2410c שָׁמֵן (*shemen*) **oil.**
 2410d אֲשֵׁמָנִים (*'ashmannim*) **the stout** (Isa 59:10, only).
 2410e מִשְׁמָן (*mishmān*) **fatness** (e.g. Isa 17:14; Dan 11:24).
 2410f מִשְׁמָן (*mashmān*) **richly prepared food** (Neh 8:10, only).

shāmēn. Fat, rich, an adjective used ten times. It is used to convey the idea of prosperity and well-being. A synonym is *bārî'* which has reference to physical fatness, and then also to well-being.

shāmān. Fatness, used twice, in Gen 27:28, 39. It is used metaphorically, of the richness of the field.

shemen. Oil, generally olive oil whether pure or prepared for various uses such as perfume or ointment. It is used 190 times. A synonym is *yīshār* which also means "olive oil." *shemen* is the general word for olive oil in its various uses, while *yīshār* refers to the fresh product. It is regularly associated with *tīrōsh* "new wine" and *dāgān* "grain" in reference to the produce of the land. (*shemen* is sometimes associated with *yayin* as a part of provisions "wine.") The word *hēleb* refers to animal fat, though it may be used metaphorically in reference to that which is best or select. *shemen* has cognates in Akkadian, Phoenician, Arabic, Syriac, and Ugaritic.

It is generally used in the literal sense, though its metaphoric use is not uncommon. The oil referred to is generally olive oil (Est 2:12 "oil of myrrh" may be a liquid form of myrrh, or it could be myrrh mixed with oil), and it played a very important role in the life of the ancients. 1) It was used for shortening in cooking (I Kgs 17:12-16), mixing the oil with flour in the baking of bread. 2) It was used in various ways in connection with sacrifices and worship. The oil itself was given as an offering (Lev 2:15-16; Ezk 45:14), or it was mixed with flour (Lev 8:26; 2:1-3; Ex 29:40). Certain offerings were specifically not to have any oil with them, the sin offering (Lev 5:11) and the grain offering of jealousy (Num 5:15). 3) *shemen* played an important symbolic function in various consecration ceremonies. Thus kings and priests were anointed with oil (I Sam 16:13; I Kgs 1:39; Lev 8:12; Ex 30:23-33 gives the formula for preparing the anointing oil), symbolizing the rich blessing of God. The tabernacle and its contents was so consecrated (Lev 8:10). 4) It was important in cosmetics and perfumery (Amos 6:6; Song 1:3; II Sam 14:2; Ps 104:15) as well as 5) for medi-

cinal purposes (Isa 1:6). 6) Oil was also used in lamps (Ex 25:6; 27:20; Lev 24:2).

Oil came very naturally to be a symbol of prosperity. So in Moses' blessing on Asher, "Let him dip his foot in oil" (Deut 33:24). A mark of peculiar blessing of God on his people is given in Deut 32:13 as a situation in which even the rocks give forth honey and oil. That is, even that which would normally be sterile and unproductive gives forth rich yields under God's blessing (cf. also Job 29:6).

In Isa 61:3 and Ps 45:7 [H 8] the "oil of joy" symbolizes the blessed condition of one who is under God's special favor.

The verb, the adjective *shāmēn* and the nouns *shāmān* and *mishmān* speak, with one exception (Isa 6:10, where the hearts are fat—insensitive, unresponsive), of well-being and prosperity. So in Deut 32:15 and Jer 5:28, God's people have become fat and prosperous and have turned from their God who made their prosperity possible. What is in view here is not obesity but a state of being well-fed and healthy.

H.J.A.

2411 שִׁמְנוֹ (*shmn*) II. Assumed root of the following.

- 2411a שִׁמְנָה (*sh'mōneh*), שִׁמְנָה (*sh'mōnā*) **eight**.
 2411b שִׁמְנִים (*sh'mōnim*) **eighty**.
 2411c שִׁמְנִית (*sh'mīnī*), שִׁמְנִית (*sh'mīnīt*) **eighth, sheminith**.

A musical term meaning "eighth" found in I Chr 15:21 and in the headings of Ps 6 and 12. Possibly it refers to an instrument with 8 strings or to an octave. Each time it occurs with the preposition 'al, "upon" (KJV, NASB), "according to" (NIV), or "tuned to" (NASB, I Chr 15:21). In I Chr 15:21 several musicians were celebrating the bringing of the ark to Jerusalem by playing harps "'al the sheminith." For other such terms see *selā*.

H.W.

שִׁמְנִים (*sh'mōnim*). See no. 2411b.

2412 שָׁמַע (*shāma'*) **hear, listen to, obey**.

Derivatives

- 2412a שָׁמַע (*shema'*) **sound** (Ps 150:5, only).
 2412b שָׁמַע (*shēma'*) **report**.
 2412c שָׁמַע (*shōma'*) **news, fame**.
 2412d שְׁמוּעָה (*sh'mū'ā*) **news, rumor**.
 2412e הַשְׁמָעוּת (*hashmā'ūt*) **communication** (a causative form, "that which is caused to be heard," Ezk 24:26).
 2412f מִשְׁמָע (*mishmā'*) **rumor** (Isa 11:3, only).

2412g מִשְׁמַעַת (*mishma'at*) **subjects** (Isa 11:14), **body guard** (I Sam 22:14; II Sam 23:23 = I Chr 11:25).

The verb *shāma'* is used 1050 times in the Qal, Niphal, Piel (twice), and Hiphil. Cognates are found in Akkadian, Aramaic, Arabic, Ugaritic, and Ethiopic. The basic idea is that of perceiving a message or merely a sound. Synonyms are *qāshab* in the Hiphil, "give attention," "be attentive," 'āzan "give ear," a denominative from 'ōzen "ear" (hence "use the ear"), and 'ānā "answer."

shāma' has the basic meaning "to hear." This is extended in various ways, generally involving an effective hearing or listening: 1) "listen to," "pay attention," 2) "obey" (with words such as "commandment" etc.), 3) "answer prayer," "hear," 4) "understand" and 5) "hear critically," "examine (in court)." The derived stems have appropriately modified meanings.

Instances of the basic use of the verb are numerous. Examples are Num 12:2 (the Lord heard Miriam's and Aaron's grumbling), Deut 4:12 (the Israelites heard the sound of God's voice but saw no form) and Gen 3:8 (Adam and Eve heard the voice of God in the garden). The object of the hearing may be expressed in a dependent clause, such as in Gen 37:17 "heard (them) saying," Gen 14:14 "heard that his brother had been taken captive," Jud 7:11 "hear what they say."

The meaning "listen to" is illustrated in Gen 3:17 (Adam, to the voice of his wife, i.e. he followed her lead), I Kgs 22:19, "Hear thou the word of the Lord," Ps 81:11 [H 12], "My people would not listen to my voice" and Prov 12:15, "He that listens to counsel is wise." This usage shades into that of "to obey," such as in Ex 24:7; Isa 42:24 "obey his law"; Neh 9:16, "They did not obey Thy commandments"; and Jer 35:18, "You have obeyed the commandment of Jonadab."

In Jud 13:9 God "hears the voice of Manoah" in the sense of responding to, answering his prayer. Similar usage is found in Ezk 8:18; Ps 4:1 [H 2], "Hear my prayer," which is parallel to "answer me ('ānā) when I call"; and Ps 34:17 [H 18], "The Lord hears the cry (of the righteous)."

In connection with answered prayer, God states a very important and sobering principle in Jer 11:10–11. Because Israel has refused to listen to the words of God when he spoke to them, they will find that when they cry to him in time of trouble he will not hear (respond to) their cry. Micah 7:7 expresses the confidence of the righteous, the one who himself heeds the voice of God, that God will indeed hear his prayer. A further strong word of encouragement is given in Ps 94:9, "He who planted the ear, will he not hear?"

Effective hearing involves also the idea of

"understanding." Thus in Gen 11:7, after the confusion of languages at Babel, men could no longer "hear" (i.e. "understand") one another.

shēma'. *Report, news, fame, rumor.* Used 1) of news generally, whether good or bad, 2) of the fame attached to a person, and 3) of hearsay, as opposed to personal experiential knowledge. Thus it is used in Isa 23:5 of the report or news of Jacob's arrival. In I Kgs 10:1 it is used to describe Solomon's fame that had reached as far as Sheba. In Job's great confession (Job 42:5) he testifies that his former knowledge of God had been but hearsay, and that as a result of his personal encounter with God he has come to see his own nothingness in the face of the greatness of God.

shema'. *A sound.* Used with "cymbals" in Ps 150:5a, "sounding cymbals." According to KB these are small tinkling cymbals as opposed to the loud, crashing cymbals of v. 5b.

shōma'. *News, fame.* Is similar in meaning to *shēma'* and means 1) "news," "report" of an invasion (Jer 6:24), or of the deeds of God (Josh 9:9), and 2) "fame" (Josh 6:27).

sh'mū'ā. *News, rumor, report, message.* Used, as is *shēma'*, of "news" or a "report" that is received, whether good or bad. The "report" heard in II Kgs 19:7 and Dan 11:44 may possibly be of a less definite nature, not so much "news" as a "rumor" or "disquieting report." In Ezk 16:56 the word is used in the more basic sense (with regard to the morphology of the word), namely "something that is heard."

Exclusive to this form of the root, and theologically significant, is the meaning "(prophetic) message," i.e. the message which the prophet himself hears from God and which he then transmits to the people. This use emphasizes the divine origin of his message.

H.J.A.

2413 שָׁמַר (*shms*). **Assumed root of the following.**

2413a שָׁמַר (*shēmes*) *whisper* (Job 4:12; 26:14).

2413b שָׁמַר (*shimsâ*) *whisper, derision* (Ex 32:25).

2414 שָׁמַר (*shāmar*) **I, keep, guard, observe, give heed.**

2414a שָׁמַר (*shomrâ*) *guard, watch* (Ps 141:3, only).

2414b שָׁמַר (*sh'mūrâ*) *eyelid* (Ps 77:4, only).

2414c שָׁמַר (*shimmūr*) *night watch* (Ex 12:42, only).

2414d שָׁמַר (*shōmrôn*) *Samaria*.

2414e אֶשְׁמְרָה (*'ashmūrâ*), אֶשְׁמְרֶת (*'ash-mōret*) *night watch*.

2414f מִשְׁמָרָה (*mishmār*) *guard, guard post*.

2414g מִשְׁמֶרֶת (*mishmeret*) *obligation, service*.

shāmar is used 420 times in the Qal, 37 times in the Niphal, 4 times in Piel and Hithpael. The Akkadian cognate *shamāru* means "wait upon," "attend to"; the Phoenician, "watch; guard"; the Arabic *samara* "watch." The closest synonym is *nāṣar* "watch," "guard," "keep," "observe," which is used in much the same way as *shāmar*. There are other verbs which occasionally overlap one of the uses of *shāmar*, but which are otherwise quite distinct.

The basic idea of the root is "to exercise great care over." This meaning can be seen to underlie the various semantic modifications seen in the verb: In combination with other verbs the meaning is "do carefully or diligently". Thus Prov 19:8, "Give heed to understanding"; Deut 11:32, "Be careful to do (i.e. perform carefully) all the statutes and ordinances" and in Num 23:12, speak carefully or faithfully.

Secondly it expresses the careful attention to be paid to the obligations of a covenant, to laws, statutes, etc. This is one of the most frequent uses of the verb. Thus in Gen 18:19 Abraham is to command his children to keep the way of the Lord, that is, give careful heed to God's ways (cf. also Ex 20:6; Lev 18:26; Deut 26:16; Ezk 11:20). It should be noted that the observance of God's laws was not to be a matter of theory only or of perfunctory compliance. The expression "to do them" is frequently appended, such as in Ezk 37:24. Proverbs 4:21 states they are to be kept in the heart. Furthermore, the expression is used not only of an obligation to laws, etc., but also to a sacred occupation such as the priesthood (Num 18:7).

A third ramification is "take care of," "guard." This involves keeping or tending to things such as a garden (Gen 2:15), a flock (Gen 30:31), a house (II Sam 15:16). Or it may involve guarding against intruders, etc., such as the cherubim guarding the way to the tree of life in Gen 3:24, or gatekeepers (Isa 21:11) or watchmen (Song 5:7). The same is true with regard to persons. Thus Cain asks, "Am I my brother's keeper" (Gen 4:9). David frequently speaks of God's care and protection in such passages as Ps 34:20 [H 21]; 86:2; 121:3-4, 7, and others. In Job 2:6 God uses *shāmar* in his injunction to Satan not to touch Job's life. Again, David touchingly admonishes Joab, before he enters battle against Absalom to "watch over Absalom for me" in II Sam 18:12.

Frequently the verb is used to speak of per-

sonal discipline, the need to take heed in respect to one's life and actions: Ps 39:2 "I will heed my ways"; and Prov 13:3, of guarding the lips.

A fourth category is the meaning "regard" "give heed to." It is used of a man's attitude of paying attention to, or reverence for, God or others. Thus in Hos 4:10, Israel has abandoned paying heed to God. Psalm 31:6 [H 7] speaks of those who revere (*shāmar*) vain idols. In another related use, the Psalmist says in Ps 130:3, "If Thou shouldest mark (*shāmar*, truly pay attention to) iniquities, who would stand?" (see also Job 13:27). This may be used in a hostile sense as in II Sam 11:16, or in an expectant sense, as in Zech 11:11 and Ps 59:9.

The last category has to do with "preserving," "storing up," such as the anger against Israel which Edom cherishes and preserves (Amos 1:11), or knowledge in Mal 2:7. So also with food in Gen 41:35 and I Sam 9:24, or anything that is precious (Ex 22:7 [H 6]).

shōmrôn. Samaria (so ASV and RSV), used 190 times, is the name of the city which Omri built as the capital of the northern kingdom of Israel. It was located seven miles northwest of Shechem on a 300-foot hill which he had purchased from Shemer (I Kgs 16:24–32). Omri named the city after Shemer, with possibly a double significance intended, since the name may mean "Watch-post."

In Isa 28:1–4, though not mentioning it by name, Samaria is referred to as "crown of pride," "the glorious beauty, which is at the head of the fat valley." But though Israel gloried in Samaria because of its beauty and strategic location, God condemned it as the center and heart of Israelite idolatry. In Mic 1:5 it is called the "transgression of Jacob," that is, it epitomized Israel's rebellion against God. Jeremiah 23:13 speaks of its false prophets who prophesy by Baal and lead Israel astray. (Cf. also Hos 7:1 and Amos 4:1.)

It was for this reason that God pronounced judgment on the city (Amos 4:2–4; Isa 28:1–8). Second Kings 17 describes the downfall of Samaria at the hands of Assyria which removed its people and repopulated it with people from other vanquished countries. The territory over which Samaria had been capital was made a province and incorporated into the Assyrian, and later, Babylonian and Persian, empires. When Nehemiah, after the exile, was engaged in rebuilding Jerusalem, the inhabitants of Samaria formed his chief opposition. The hostility there exhibited continued into New Testament times.

mishmār. Guard, guard post, division of service. This noun is used 1) of the confinement in which someone is kept (Gen 40:3; Lev 24:12), 2) of a guardpost (Neh 4:3, 16–17; 7:3), and 3) of a

division of service, generally of the temple service, such as Neh 12:24 and 13:14.

mishmeret. Obligation, service. This noun is used in two principle senses. The first is an "obligation" or a "service" to be performed. The second has to do with something that is to be kept or preserved, such as the Paschal lamb in Ex 12:6, the manna in Ex 16:32–34, or the ashes of the red heifer in Num 19:9.

Bibliography: Beegle, D. M., "Samaria," in WBE. Kelso, J., "Samaria," in ZPEB. Wiseman, D. J., "Samaria," in NBD. Wright, G. E., "Samaria," *Biblical Archeologist* 22:67–78. TDNT, IX, pp. 237–39. THAT, II, pp. 982–86.

2415 שֹׁמֵר (*shmr*) II. Assumed root of the following.

2415a שֹׁמֵר (*shemer*) *lees, dregs* (e.g. Isa 25:6; Zeph 1:12).

2416 שֹׁמֵר (*shmr*) III. Assumed root of the following.

2416a שֹׁמֵר (*shāmīr*) *thorns, adamant, flint* (e.g. Isa 5:6; Jer 17:1).

שֹׁמְרוֹן (*shōmrôn*). See no. 2414d.

2417 שֶׁמֶשׁ (*shmesh*). Assumed root of the following.

2417a שֶׁמֶשׁ (*shemesh*) *sun*; only plural in Isa 54:12, "pinnacles." (ASV and RSV similar: they vary on translating *mizrah shemesh* "sunrising," "the rising of the sun," or "eastward.")

The word *shemesh* appears 131 times. The sun is used to designate time and direction; its rising equals the east and its setting the west (Zech 8:7). Sunset marks the end of the day and the beginning of a new calendar day. "When the sun becomes hot" refers to midmorning (e.g. Neh 7:3). Anything done in the light of the sun is considered done deliberately; e.g., one who killed a thief while breaking in during the day was held responsible for his blood (Ex 22:3 [H 2]; cf. II Sam 12:11f.). [Another view of this interesting passage is that the law allows killing a thief in self-defense while the thief is breaking in at night, but it forbids retaliatory killing of a thief who is caught later in the daytime—such a thief should be required to make restitution. Stealing was not a capital crime. R.L.H.] The book of Ecclesiastes frequently repeats the phrase "under the sun" to emphasize that this earthly life is lived in monotonous drudgery with little meaning when viewed from a godless perspective.

The sun is believed to have power. It could

strike a man and cause him to faint (Jon 4:8). The Shunammite's son probably died of sunstroke (II Kgs 4:19–20). But the Lord protected the pilgrims from the sun's striking (Ps 121:5 [H 6]). More frequently the sun was considered a blessing. It helps the fields bring forth rich crops (Deut 33:14). A just ruler is "like the sun shining forth upon a cloudless morning" (II Sam 23:4). The Lord himself is compared to the sun due to the fact he brings warmth and prosperity to the believer's life; "the LORD God is a sun and shield; he bestows favor and honor" (Ps 84:11 [H 12]). Since the sun survives the generations, it stands as a sign of longevity, e.g. for the enduring throne of David (Ps 89:36 [H 37]).

In the ancient world the sun was worshipped. In Egypt as Re, he was the supreme God. The ninth plague was a direct contest between Yahweh and Re; by eliminating the light of the sun through thick darkness Yahweh demonstrated his superior power. For the same reason Jeremiah pronounced the coming judgment on Egypt, "break the obelisks of Heliopolis," stone monuments raised to the sun in the city of the sun (Beth-shemesh *asv*, Jer 43:13; cf. Ezk 32:7). In Mesopotamia the sun played a crucial role as the god of justice. But in Israel worship of the sun was strictly forbidden (Deut 4:19). Israel's worship stressed that the sun owed its existence solely to God (Gen 1:14–19). The sun as a creature renders him praise (Ps 148:3). The sun also responds to his commands; e.g. it stood still for half a day so that Joshua could continue the rout of his enemies and to signify the healing Hezekiah was to experience it went backwards ten degrees according to the sun dial (or 10 steps on the royal buildings if sun dials were not yet used). Unfortunately sun worship entered Israel at various times, particularly at the time of Manasseh; then even the chariots of the sun were placed at the entrance to the temple (II Kgs 23:11). Ezekiel too describes worship of the sun conducted at the temple. Twenty-five men were worshipping the sun, facing east with their backs to the temple (Ezk 8:16). In looking for the sun, they had arrogantly turned away from Yahweh, provoking him to anger (Ezk 8:17).

The Lord's anger will reach its fullest outburst on the Day of the Lord. As God judges the nations, catastrophic events will take place in the heavens. "On that day... the sun [shall] go down at noon" (Amos 8:9; cf. Joel 2:31 [H 3:4]; Rev 6:12). Then in the new age the sun will not be needed as the source of light, but rather Yahweh will be the everlasting light and glory (Isa 60:19f.; Rev 21:23; 22:5). According to Malachi, the sun of righteousness will rise with healing in his wings (Mal 4:2 [H 3:20]).

Bibliography: THAT, II, pp. 987–98.

J.E.H.

שֶׁן (*shēn*). See no. 2422a.

שִׁנְאָן (*shin'ān*). See no. 2421d.

2418 שֶׁנֶב (*shnb*). Assumed root of the following.

2418a שֶׁנָּב (*'eshnāb*) window lattice
(Jud 5:28; Prov 7:6).

2419 שָׁנָה (*shānā*) I, *change*.

Derivative

2419a שָׁנָה (*shānā*) year.

The verb *shānā* is sometimes used to describe a change in character or way or life. Thus the immutability of God is expressed in Mal 3:6 by the statement that God does not change, and his faithfulness to his promise is shown in the statement that he will not alter that which he has spoken (Ps 89:34 [H 35]).

The verb is also used in the sense "be different," such as in the statement in Est 3:8 that the Jews have laws and customs different from any other people.

A change of clothes for Jehoiachin is involved in II Kgs 25:29 when he is released from prison. In I Sam 21:14 and I Kgs 14:2 it is used of a disguise. In the former verse David feigns madness, while in the second Jeroboam's wife disguises herself before visiting Ahijah the prophet. In one passage (Est 2:9) there is a physical transfer from one location to another.

shānā. Year. This noun is most frequently employed in ways paralleling modern usage. But certain expressions do call for comment here. Isa 16:14 and 21:16 speak of "years of a hireling." These passages speak of the coming downfall of a nation, and describe the intervening years by this expression as years of wearisome and dreadful counting of time. Date formulas generally relate to the reign of a king, but often they attach themselves to significant events such as a famine (Gen 41:50) or an earthquake (Amos 1:1).

Not date formulas, yet highly descriptive and sometimes with prophetic significance are such year names as *sh'nat rāṣôn* "year of favor" (Isa 61:2). This speaks of the salvation provided by the Messiah and uses imagery derived from the *sh'nat d'rôr* "year of release" (Lev 25:10–11; Ezk 46:17), also called the *sh'nat yôbēl* "year of Jubilee" (Lev 25:13) in which all who had sold themselves into slavery are released. Similar is the *sh'nat sh'mittā* "year of remission" (of debts, every seven years, Deut 15:1; 31:10). The *sh'nat g'e'ûlim* "year of vengeance," is a time of deliverance for God's people as God deals with their former oppressors (Isa 63:4).

Two expressions refer to the seasons of the year (the spring or fall equinox): *t'qûpat hashshānā* "the turning of the year" (Ex 34:22

2420 שנה (*shnh*)

[fall]: II Chr 24:23 [spring]), and *t'shūbat hashshānā*, "the returning of the year" (II Sam 11:1; I Kgs 20:22, 26 [spring]).

Bibliography: Bruce, F. F., "Calendar," in NBD. Finegan, J. *Light from the Ancient Past*, Princeton University, 1959, pp. 561-98. Lilley, J., "Calendar," in ZPEB. Smick, E. B., "Calendar," in WBE.

H.J.A.

2420 שנה (*shnh*) II. Assumed root of the following.

2420a שָׁנִי (*shānī*) *scarlet* (ASV and RSV similar), used forty-two times.

Ugaritic has a cognate, *tn*. The word refers to the dye (or sometimes the dyed material) obtained from the eggs of the female kermes or cochineal scale insects which attach themselves to the kermes oak. It occurs most often in Exodus in combination with *tôlē'ā* "kermes insect," "scarlet."

shānī is associated with well-being and with luxury in II Sam 1:24 in which Saul is described as having provided well for the women of Israel. Scarlet material was used in the making of such things as the curtains (Ex 26:1), the veil (26:31), the ephod (28:5-8), and the robe of the priest (28:33). Thus the best possible materials were used. But it also seems to have acquired a symbolic significance in that it was used in such purification ceremonies as in the cleansing of the leper (Lev 14:4, 6) and the leprous house (Lev 14:49, 52), and for general ceremonial uncleanness (Num 19:6). Since *shānī* was the color of blood it would be its natural symbol in such a ceremony. The word occurs again in Isa 1:18. Having told Israel that their worship is unacceptable to him because of the stains of bloodguiltiness on their hands (v. 15), God tells them that they must be cleansed and then cease from evil. Verse 18 is his invitation to come for cleansing. He will remove even bloodguiltiness, symbolized by a garment dyed scarlet. As impossible as it would otherwise be, God makes the garment pure, shining, white, representing an unsullied righteousness (cf. Ps 51:7 [H 9]; Rev 7:14).

Bibliography: Johnson, A. F., "Colours," in WEB. Wickwire, C. L., "Scarlet," in IDB.

H.J.A.

2421 שָׁנָה (*shānā*) III, repeat, do again.

Derivatives

2421a שְׁנַיִם (*sh"nayim*) *two*.

2421b שְׁנִי (*shēnī*), שְׁנִית (*shēnīt*) *second*,

2421c מִשְׁנָה (*mishneh*) *second, double, repetition*.

2421d שְׁנֵינָא (*shin'ān*) *repetition*.

The verb *shānā* is used of the repetition of an action such as in Elijah's command to repeat the pouring of water on the wood and sacrifice on the altar in I Kgs 18:34. Proverbs 26:11 compares a fool who repeats his folly with the dog returning to his vomit, while in Prov 17:9 it is used of one who repeats or broadcasts a mistake or failing of another.

sh"nayim. Two. Used 768 times. Morphologically *sh"nayim* is not plural but dual, a formation common in the Semitic languages. This indicates a conceptual differentiation between unity on the one hand and plurality on the other, i.e. a "pair," "couple." In Hebrew this formation is restricted to naturally occurring pairs such as feet, arms, legs, eyes, etc. It is more widely used in Ugaritic.

sh"nayim, is used, in addition to the counting of items, in passages which 1) show a pairing or joining together, 2) stress contrast or differentiation, or 3) indicate an indefinite small number. In the first category are included the frequent instances of the making of a covenant or agreement between two parties, such as between David and Jonathan in I Sam 23:18, and between Solomon and Hiram in I Kgs 5:12 (cf. also Zech 6:13).

Contrast and opposition is seen in I Kgs 18:21, in which Israel is undecided between two ways. Ezekiel 37:22 speaks of the end of the division and conflict between the two kingdoms of Israel. Job (9:33) desires someone who can bridge the gap between himself and God, who can lay his hand on both.

An indefinite small number is indicated by the expression "one or two" (Ex 21:21; Ezr 10:13), "two or three" (II Kgs 9:32; Amos 4:8) or simply "two" (I Kgs 17:12).

The granting of a double portion, *pi sh"nayim*, is the right of the heir, Deut 21:17 (cf. also II Kgs 2:9).

mishneh. Second, double, repetition. *mishneh* basically involves a doubling of an original item, whether it be 1) getting twice as much as originally, or 2) making a duplicate so as to have an exact copy, or 3) having a second item or person, a second rank or section. Thus Jacob's sons, on their second trip to Egypt took double the money they took on the first trip (Gen 43:15). In Zech 9:12 and Isa 61:7 God promises Israel a double portion, which may mean a superabundance of blessing, or perhaps better the full blessing and inheritance as the firstborn heirs, that special place which the heir occupies in the father's household and in his plans.

The sense of "duplicate" or "copy" is found in Josh 8:32, in which Joshua makes a copy of the Law from the very stones that Moses had inscribed (cf. Deut 17:18, hence the title of the Hebrew book on the Pentateuchal legislation, *The Mishnah*.)

The third sense of the noun is seen in Gen 41:43 in which Joseph rides in Pharaoh's second chariot. Several passages, such as II Kgs 22:14 and Zeph 1:10 speak of the Second Quarter or Section of the city.

shin'ān. Repetition. Occurs once, in Ps 68:17 [H 18] following the word "thousands of." BDB and most (including ASV and RSV) translate "thousands upon thousands." This interpretation understands the root *shānā'* to be a by-form of *shānā* II "to repeat." KB relates it to Arabic *saniya*, "be high in rank," and translates it "highness." Albright (*Norsk teologisk tidsskrift* 56:2-4) identifies it with Ugaritic *tnn* and with *shanānu* from the Alalakh tablets, both meaning "warrior" or better, "archer" (cf. also Ward, JNES 20:39). The rendering then would be "twenty thousand (chariots) and thousands of archers."

שְׁהַבִּים (*shenhabbim*). See no. 2422c.
שָׁנִי (*shānī*), שְׁנִי (*shēnī*). See nos. 2420a, 2421b.

שָׁנִים (*sh'nayim*). See no. 2421a.

שְׁנִינָה (*shēninā*). See no. 2422b.

שְׁנִית (*shēnīt*). See no. 2421b.

2422 שָׁנָן (*shānan*) **sharpen.**

Derivatives

2422a שָׁנָן (*shēn*) **tooth, ivory.**

2422b שְׁנִינָה (*sh'ninā*) **sharp word.**

2422c שְׁהַבִּים (*shenhabbim*) **ivory**, possibly compounded of *shēn* "tooth," and *habbim* "elephant" (African word, cf. KB). Occurs in I Kgs 10:22; II Chr 9:21.

Arabic *sanna* "whet," "sharpen" is cognate to *shānan*. It is used in the Qal, Piel, Hithpoel. The Piel is used once in Deut 6:7 in connection with the diligent instruction of children in the word of God. KB, however, followed by NEB and Jerusalem Bible take this from a second root *shānan*, with the meaning "repeat" (q.v.).

The verb *shānan* is used of the sharpening of swords and of arrows (Deut 32:41; Isa 5:28; Ps 45:6; 120:4; Pr 25:18). Twice it is used metaphorically of the sharpening of the tongue. Evil-doers in Ps 64:3 [H 4] are depicted as sharpening their tongues like a sword in preparation for attacking the innocent.

shēn. Tooth, ivory. May be used to describe the appearance of someone's teeth (Gen 49:12; Song 4:2; 6:6). It is also used in a variety of expressions that form vivid and colorful descrip-

tions of various emotions and situations. Thus the law of retribution is illustrated in the expression "a tooth for a tooth" (Ex 21:24; Lev 24:20; Deut 19:21). To break someone's teeth is to rob him of his power (Ps 3:7 [H 8]; 58:6 [H 7]). Expressions still current are to "escape by the skin of the teeth" (Job 19:20) and to "have one's teeth set on edge" by sour grapes or vinegar (Jer 31:29; 30; Pr 10:26).

shēn is also used of "ivory" (such as in I Kgs 22:39 and Amos 6:4), the tine of a fork (I Sam 2:13), and of rock crags (I Sam 24:4 [H 5]).

sh'ninā. Sharp word, taunt. This noun describes the type of cutting remark made by the enemies of Israel, using the same symbolism employed with the verb "to sharpen the tongue (for malicious words)".

H.J.A.

2423 שָׁנַם (*shānas*) **gird up.** This verb occurs only once, in the Piel (I Kgs 18:46).

2424 שִׁנָּר (*shin'ār*) **Shinar** (so ASV and RSV), used eight times.

Shinar is the OT designation for southern Mesopotamia, the alluvial plain between the rivers Euphrates and Tigris. The area was known by the Sumerians as Sumer and Akkad. It later became known as Babylonia. In two of the eight passages Shinar is called Babylonia in the LXX (Isa 11:11 and Zech 5:11).

In Gen 10:10 we are told that the great tyrant and empire builder Nimrod founded his kingdom in Babel, Erech (Sumerian Uruk), Akkad (Agade) and Calneh in the land of Shinar. From here he pushed north into Assyria. It was here also, in Shinar, that rebellious man built the well-known tower of Babel in direct defiance of God (Gen 11:2). In Dan 1:2 it is the land of Shinar to which Nebuchadnezzar removes the vessels of the temple of God, and in Isa 11:11 we are told that Shinar is one of the lands from which regathered Israel will return when the Millennial age is established. In Zech 5:11 the woman in the ephah, representing a concentration of evil (v. 8), is removed to the land of Shinar where a temple is built for her.

All of this points to a sinister significance for Shinar as being the major center for the development of a culture and civilization built on counterfeit religion, rebelliousness against the true God and his revealed word, the cradle of imperial tyranny and the enemy of God's people, in short, the epitome of wickedness. (Cf. as well the many biblical references to Babylon.)

In addition to the above passages, Amraphel who makes war on the king of Sodom is stated to be king of Shinar (Gen 14:1, 9). Also, part of the

2425 שָׁסָא (*shāsā*)

illegal spoil taken by Achan (Josh 7:21) is a garment from Shinar.

Bibliography: Jacobsen, Thorkild, "Shinar," in IDB. Smick, Elmer, "Shinar," in WBE. Wiseman, Donald J., "Shinar," in ZPEB.

H.J.A.

2425 שָׁסָא (*shāsā*) *plunder, take spoil.* (ASV and RSV similar.)

shāsā is used twelve times, usually in the Qal, once in the Poel. It is sometimes used in parallel with *bāzaz* which in turn is often in parallel with *shālal*. It has a by-form in *shāsas*.

This verb is used very much the same as *shālal* (q.v.), and the observations made there apply here as well. Most frequently the verb is used in the participial form and is translated "plunderer(s)." Thus in the capsule statement summarizing the times of the Judges (Jud 2:6–23), a disobedient Israel is given into the hands of plunderers (v. 14). When they cry out to God and repent, God sends judges to save them from the plunderers (v. 16).

In Ps 44:10–12 [H 11–13] the Psalmist complains that God has sold his people for a trifle, scattered them among the nations, made them objects of plunder and as sheep to be eaten at will. But Isaiah encourages Israel (Isa 17:12–14), saying that the gentile nations will, at God's direction, be subject to great upheavals, that terror will strike suddenly in the evening, and before morning they will cease to exist, "Such will be the portion of those who plunder us" (NASB). Jeremiah states the same principle in Jer 30:16 and 50:11.

H.J.A.

2426 שָׁסָס (*shāsas*) *plunder, spoil.*

Derivative

2426a שָׁסָסָא (*m' shissā*) *plunder, spoil.*

This root, a by-form of *shāsā*, is used similarly to *shālal*, (q.v.) and the comments made there apply here as well. In addition to the common uses of the word plunder, this root is clearly used to point out a moral to Israel. In Zeph 1:13, those who said in their hearts, "God won't do anything, whether good or bad," will find their wealth become plunder. Yet in Isa 42:22–25 God bitterly laments the fact that, though Israel "is a people plundered and despoiled," they don't ask themselves who it is that gave them over to be plundered, that is, they did not respond to the teaching of God's chastising. Therefore more serious punishment awaited them.

H.J.A.

2427 שָׁסָא (*shāsa'*) *cleave, part.*

Derivative

2427a שָׁסָא (*shesa'*) *cleft, split.*

shāsa' occurs nine times, in the Qal, always describing the cloven hoof of quadrupeds. In the Piel it is used of tearing an animal apart. Synonymous is *pāras* in the Hiphil. The distinction seems to be that *pāras* refers to a cleft or split in the hoof, but one which does not necessarily go all the way through, while *shāsa'* refers to a hoof that is completely split through. The general or common word for split or breach is *pāraṣ*.

shāsa' in the Qal is used in the description of clean animals. Those that divide the hoof, making split hoofs (NASB, similarly NEB), if they chew the cud, are clean (Lev 11:3; Deut 14:6). Those that do not meet all these conditions are unclean (Lev 11:7; Deut 14:7). Leviticus 11:26a refers to animals whose hoofs are not completely split from top to bottom. (The camel, which has a divided hoof but a broad single pad underneath, would seem to fall in this category.)

The Piel is used in Lev 1:17 in which the priest tears the sacrificial bird by the wings, and in Jud 14:6, in which Samson tears the lion apart.

H.J.A.

2428 שָׁסָפ (*shāsap*) *hew in pieces.* This verb occurs only once, in the Piel (I Sam 15:33).

2429 שָׁאָא (*shā'ā*) *look at, look to, regard.* (ASV and RSV similar.)

shā'ā is used fifteen times, mostly in the Qal, once in the Hiphil and twice in the Hithpael. Both Akkadian and Ugaritic have cognates in use. A frequent synonym is *rā'ā* "see," which is the most common verb relating to vision in general. Another verb with somewhat similar meaning is *nābat* "look," in the Hiphil, also quite common. Its semantic range, though occasionally overlapping that of *shā'ā*, is considerably broader.

The basic idea of *shā'ā* is "to look at with interest." It is never a casual or disinterested glance. This can be seen in the following expanded definitions. In Gen 4:4–5, it means "to look at with approval," "to approve of." Thus God approved of Abel, but not of Cain. And again in Isa 17:7–8 God says that the time is coming when a "man will regard his maker" and no more have regard for the altars which his hands have made.

The latter passage comes close to falling under the second meaning, "look to," "look with expectation." Thus in Isa 31:1 Israel is described as going to Egypt for help, relying on horses, chariots, etc., and "not looking to" the Holy One of Israel.

The third meaning is "look away from," used

with the preposition *min*, always in the request meaning "leave me alone!" (Isa 22:4; Job 7:19; 14:6; Ps 39:14).

In one passage, Isa 32:3, the verb must be regarded either as a by-form of *shā'a'* "be blinded," or repointed as the Qal of *shā'a'* (this involves no consonantal emendation). So virtually all commentators and translations.

The Hithpael, used twice, in Isa 41:10, 23 means "look about in fear."

H.J.A.

2430 שָׁטַט (*sh'ṭ*). Assumed root of the following.

2430a שָׁטְטָה (*sha'ṭā*) *stamping* (of hoofs; Jer 47:3).

2431 שָׁטְטָנוּ (*sha'atnēz*) *mixed stuff* (Deut 22:11; Lev 19:19). Perhaps a loan word.

2432 שָׁטַל (*sh'l*). Assumed root of the following.

2432a שָׁטַל (*shō'al*) *hollow of hand* (Isa 40:12), *handful* (I Kgs 20:10; Ezk 13:19).

2432b מִשְׁטוֹל (*mish'ōl*) *hollow way* (i.e. road shut in, Num 22:24).

2433 שָׁטַל (*sh'l*) II. Assumed root of the following.

2433a שׁוּטַל (*shū'al*) *fox* (e.g. Neh 3:25; Song 2:15).

2434 *שָׁאָן (*shā'an*) *lean on, trust in*. (ASV and rsv similar.) Occurs only in the Niphal.

Derivatives

2434a מִשְׁטָן (*mish'an*) *support*. (ASV and rsv, "stay.") Used four times.

2434b מִשְׁטָן (*mash'en*) *support*. (ASV and rsv "staff.") Used once.

2434c מִשְׁטָנָה (*mish'enā*) *support*. (ASV and rsv, "stay.") Used once.

2434d מִשְׁטָנָה (*mish'enet*) *staff, support*. (ASV and rsv similar.) Used eleven times.

The verb *shā'an* means primarily to lean on something or someone, as on a staff (Ezk 29:7), a spear (II Sam 1:6), or an arm or hand (II Kgs 5:18; 7:2, 17). The latter use probably refers to the relationship of a king to his confidant or second in command. Most importantly the verb is used figuratively of an attitude of trust. Thus in Prov 3:5 we are told not to rely on, *shā'an*, our own understanding. Rather we are to trust the Lord. Ezekiel 29:6-7 vividly illustrates both literal and figurative uses of the word. Egypt is a reed staff (*mash'enet*) that breaks in the hand of whomever is foolish enough to lean on it (i.e. trust in Egypt). (Cf. also Isa 10:20; 30:12; 31:1; 50:10.)

mish'an. *Support.* Is used figuratively as that on which one relies. David in II Sam 22:19 says that in the day of calamity God was his effective support. In Isa 3:1 it is used of the basic physical life supports, bread and water, that God will remove from Jerusalem. *mash'en* and *mash'enā* are used in the same passage with similar meaning.

mish'enet. *Staff.* Elijah had one (II Kgs 4:29-31), as did the Angel of the Lord in Jud 6:21 and the nobles depicted in Num 21:18. In Ps 23:4, the Shepherd's staff is a comfort to His sheep.

H.J.A.

2435 שָׁטַעַ (*shā'a'*) I, *be smeared over, blinded* (e.g. Isa 29:9; 32:3).

2436 *שָׁטַעַ (*shā'a'*) II, *sport, take delight in*. Occurs in the Pilpel (e.g. Isa 29:9), Palpel (Isa 66:12), and Hithpalpel (Ps 119:16).

Derivative

2436a שָׁטַעַתִּי (*sha'āshū'im*) *delight* (e.g. Isa 5:7; Jer 31:20).

2437 שַׁעַר (*sh'ar*) I. Assumed root of the following.

2437a שַׁעַר (*sha'ar*) *gate*.

2437b שַׁעֲרָה (*shō'ēr*) *gatekeeper, porter*.

sha'ar. *Gate.* This noun has cognates in Ugaritic, Arabic, and Phoenician. The root idea is "to split open" (so the verb in Ethiopic), "to break through" (so the Arabic). Two other words are sometimes translated "gate" *petah* and *delet*. The former actually means "entrance," from the verb meaning "to open." The latter refers to the "door leaves" making up part of the gate. *sha'ar* refers to the whole gate complex and to the open area on either side of it.

The *sha'ar* "gate" was of course the means of controlled access to a walled city. Depending on its size a city had varying numbers of gates, but always one main gate which often consisted of an outer and an inner gate (II Sam 18:24) and sometimes three or four doors, such as the Solomonic gateways at Hazor, Gezer, and Megiddo. The doors were generally wood, often covered with metal (Ps 107:16; Isa 45:2). They were secured by great bars, often of iron (Ps 107:16). The gate complex often had rooms at the sides for the guards. Second Samuel 18:24 speaks of a room above the gate. Towers also were built to strengthen the defense of the gate (II Chr 26:9) which was closed at night (Josh 2:5; Neh 7:3). In some passages the word refers to the gate of the temple, as in II Kgs 15:35; Jer 36:10; Ezk 9:2.

The city gate was extremely important in the life of the people, for social, administrative, and business intercourse took place there. The Ugari-

tic literature gives an interesting parallel here, "He (Daniel) sits in front of the gate, by the dignitaries who are on the threshing floor" (2Aqht 5.6-7). I Kgs 22:10 says, "The king of Israel and Jehoshaphat king of Judah were sitting, each on his throne—at the threshing floor at the entrance of the gate of Samaria." Here kings as well as city elders sat to administer justice (Deut 21:19; Josh 20:4). When Absalom laid the groundwork for his insurrection, it was at the gate where he intercepted the people who were coming to see the king (II Sam 15:2). It was considered an honor to sit among the elders at the gate (Prov 31:23).

The square (often a threshing floor) in front of the gate was the most natural congregating place, and it was here that the prophets frequently spoke to the people (II Kgs 7:1; Jer 17:19-20; 36:10) and to kings (I Kgs 22:10). It was here that Ezra read and explained the Law to the Jews in Neh 8:1, 3. Legal transactions also took place here (Ruth 4:1; Gen 23:10, 18), and it served as a marketplace as well (II Kgs 7:1).

The process of the administration of justice was frequently referred to as "at the gate." Thus Prov 22:22 "(do not) crush the afflicted at the gate" (NASB). Amos 5:15 calls for "justice in the gate." By metonymy the gate represents the whole city in Gen 22:17 and 24:60, in which Abraham is promised that his seed will possess the gate of his enemies. As a symbol of the means of access or entrance, gate is used in expressions such as "gate of death" (Ps 9:13 [H 14]), "gate of the Lord" (Ps 118:20), and "gate of heaven" (Gen 28:17).

[It is of interest that the descriptions and measurements of the gates of the courts of the temple in Ezk 40 accord in general with the Solomonic gateways unearthed in Megiddo, Hazor and Gezer. R.L.H.]

"Those who enter the gate" (Gen 23:10) refer, according to Speiser, BASOR 144:20-23, to those that have a voice in community affairs. "Those who go out the gate" in Gen 34:24 refers, according to Speiser, to those capable of bearing arms.

shō'ēr. Gatekeeper, porter. This is a participial form meaning "one who is occupied with the gate," that is, the gatekeeper or guard. It is used of the gatekeeper of the city in II Kgs 7:10-11, but otherwise mostly of the temple gatekeepers (I Chr 9:17-26; Neh 7:1).

שַׁשְׁעִים (*sha'āshū'im*). See no. 2436a.

2440 *שָׁפָה (*shāpā*) **I, sweep bare.** This verb occurs in the Niphal (Isa 13:2) and Pual (Job 33:21).

Derivatives

2440a שְׁפֹת (*sh'pōt*) **cream** (II Sam 17:29). Meaning dubious.

2440b שָׁפִי (*sh'pī*) **bareness** (Job 33:21), **bare place** (e.g. Num 23:3; Isa 41:18).

2441 שִׁפָּה (*shph*) **II. Assumed root of the following.**

2441a שִׁפָּת (*shāpat*) **set** (on the fire, e.g. II Kgs 4:38; Ezk 24:3); **ordain** (Isa 26:12).

2441b אִשְׁפֹּת (*'ashpōt*) **ash heap, refuse heap** (e.g. I Sam 2:8 = Ps 113:7).

2441c מִשְׁפָּתִים (*mishp'atayim*) **fire places or ash heaps** (Jud 5:16; Gen 49:14). Meaning uncertain.

שְׁפֹת (*sh'pōt*). See no. 2443b.

שָׁפִי (*sh'pī*). See no. 2440a.

2442 שִׁפָּה (*shph*). **Assumed root of the following.**

2442a שִׁפְחָה (*shiphā*) **maid servant.**

2442b מִשְׁפָּחָה (*mishpāhā*) **family, clan.**

shiphā. Maid-servant, maid (ASV and RSV similar). Used sixty-two times. Apparently *shiphā* is indistinguishable from, and in several passages interchangeable with *āmā* (I Sam 1:16, 18; Gen 30:3-4). The root *shiphā* has cognates in Ugaritic (where it means "family" and sometimes "offspring") and in Phoenician, "family." (The connection with Arabic *safāḥa* is not clear. The simple verb means "to pour", and KB sees the con-

nection with the idea of a maid pouring water over her mistress' hands. Hava, in the Al-Faraid Arabic Dictionary, lists *saffaha* as meaning "to work without profit." This forms a plausible connection with *shiphâ*, "maidservant.") It is possible that the *shiphâ* was originally more intimately associated with the family group, the *mishpāhâ*, than the other slaves were, though this is not evident in the Old Testament itself.

The variation of *shiphâ* and 'āmâ has been thought to be an argument for the division into Pentateuchal documents. The occurrence of both these roots in Ug now argues otherwise.

The *shiphâ* "maid," was a slave who could be given as a gift to a daughter when she married (Gen 29:24, 29). Pharaoh presented Abraham with gifts, including maidservants. Though the word seems to have had a wider use in the sense of "female slave" generally, those who are mentioned as individuals in the Old Testament are personal maids-in-waiting to a married woman. According to Nuzi law, a sterile wife could give her maid to her husband so that she might vicariously bear a child through her (Gen 16:2ff; 30:3-4). A boy born of such a union would become the heir unless the wife herself later bore a son.

Hebrews were not to acquire other Hebrews as slaves, including maidservants (Jer 34:9-11; II Chr 28:10). To be reduced to such a status among foreigners was a mark of degradation that would result from national apostasy (Deut 28:68), yet ultimately gentiles will so serve Israel (Isa 14:2).

mishpāhâ. *Family, clan, kindred.* This noun is used in a wider sense than the English term "family" usually conveys. The word for the inhabitants of one house is usually *bêt* "house, household" or *bêt 'āb*. *mishpāhâ* most often refers to a circle of relatives with strong blood ties.

mishpāhâ is frequently used as a subdivision of a larger group such as a tribe or nation. Thus in Num 11:10 Moses hears the people weeping "by families." In Josh 7:16-18, in which the search is carried out to find the man guilty of causing God's displeasure on Israel, first the tribe of Judah is isolated, then the "family" (*mishpāhâ*) of the Zerahites, then the next smaller unit, the "household" (*bêt*) of Zabdi. The household of Zabdi is then examined, and it is found that one of his grandsons, Achan, who is himself the father of children, is the guilty one. Jud 18:19 also contrasts the "house of one man" with a tribe or family (*mishpāhâ*).

In Num 27:11, if an heir was lacking in a household, a man's own brothers, then his father's brothers were next in line. After that the succession goes to the "nearest relative" from his family. The kinsman-redeemer, the *gō'el*, comes from the family clan in a similar order of preference.

Bibliography: Mitchell, T. C., "Family," in NBD.

H.J.A.

2443 שָׂפַט (shāpaṭ) judge, govern.

Derivatives

2443a שָׁפַט (shepeṭ) judgment.

2443b שָׁפֹט (sh'pōt) judgment.

2443c מִשְׁפָּט (mishpāt) justice, ordinance.

The primary sense of *shāpaṭ* is to exercise the processes of government. Since, however, the ancients did not always divide the functions of government, as most modern governments do, between legislative, executive, and judicial functions (and departments) the common translation, "to judge," misleads us. For, the word, judge, as *shāpaṭ* is usually translated, in modern English, means to exercise only the judicial function of government. Unless one wishes in a context of government—civil, religious, or otherwise—consistently to translate as "to govern or rule," the interpreter must seek more specialized words to translate a word of such broad meaning in the modern world scene. For the participle NIV uses "leader."

The meaning of *shāpaṭ* is further complicated by the fact that although the ancients knew full well what law—whether civil, religious, domestic or otherwise—was, they did not think of themselves as ruled by laws rather than by men as modern people like to suppose themselves to be. The centering of law, rulership, government in a man was deeply ingrained. "The administration of justice in all early eastern nations, as among the Arabs of the desert to this day, rests with the patriarchal seniors... Such... would have the requisite leisure, would be able to make their decisions respected, and through the wider intercourse of superior station would decide with fuller experience and riper reflection."

Hence the following analysis of use of this basic word for exercise of government appears.

1. To act as ruler. This might be done by the congregation of Israel (Num 18:22-28), by individual judges (Deut 1:16; Jud 16:31; I Sam 7:16, 17), by a king (Jud 8:20); by Messiah (Ps 72:4) or even God himself (Ps 96:13). God alone can exercise the true ultimate rulership for, he is "the one judging all the earth" (Gen 18:25). But Moses deciding cases (whether criminal, domestic, religious or otherwise) acts for God and by divine authority (Ex 18:13, 15) and the same is true of other rulers in the OT theocracy (Deut 1:17).

2. By way of eminence, *shāpaṭ* means to decide cases of controversy as judge in civil, domestic, and religious cases. In such cases it was the judge's duty specifically to judge with *mishpāt* (judgment, justice) and *sedeqs' dāqā* (righteousness) (see Ps 72:2-4) and in case of

charges "they shall justify the righteous and condemn the wicked" (Deut 25:1).

3. Inasmuch in a situation of government by persons rather than merely of laws, the civil officer (the *shōpēṭ* "one judging") had the executive as well as judicial powers. He also executed or caused to be executed judicial decisions. Hence, for example, in David's appeal to God as judge in his controversy with Saul he declares, "The LORD will be a judge and he shall judge (*shāpaṭ*) between me and thee and he will see and will plead my case and he will judge me (*yishp' tēni* i.e. "deliver me") out of thy hand" (I Sam 24:15 [H 16]). Hence such words as deliver, vindicate, condemn, punish, and related words of judicial-executive import are justly used in the translations.

4. Because all true authority is God's and he shall ultimately act as judge of the world in the last great assize, he is *shōpēṭ* pre-eminent (Ps 96:13; 50:6; 75:8 [H 7] and meanwhile through providence he is always supreme *shōpēṭ* (Ps 94:2; cf. 103:19) of the universe.

All the above uses are in the Qal.

The Niphal, in the occasional reciprocal sense of that stem, furnishes cases where the sense of governmental process is extended to carrying on a case of litigation. In such cases 'ēr "with" is furnished before the object of the verb; thus, "I will enter into judgment with thee" (Jer 2:35; cf. Ezk 17:20; 20:35, 36, 3; 38:22, in each God is actor and speaker). "Plead," in the legal sense of plead a case often occurs, viz. "that I may plead with you before the LORD" (I Sam 12:7); "have a controversy" (Isa 43:26, BDB) and "execute judgment" (Isa 66:16, rsv).

The Poel participle has the sense of denunciatory judgment, as "those who condemn" (Ps 109:31, rsv), "accuser" (Job 9:15), and "the judgments against you" (Zeph 3:15).

shāpaṭ, with its derivative noun *mishpaṭ*, is the commonest word to designate the function of government in any realm and in any form. It apparently differs from the rarer *din* (verb and noun) chiefly in being the more formal and technical term while *din* is more poetic.

shephēt. Judgment, always plural *sh'pātim*. Like *sh'pōṭ*, this noun seems to take its meaning from *shāpaṭ* BDB, p. 1047, judgment in the penal sense, i.e. punishment. In several cases the punishments are divine punishments. The plagues of Egypt are divine *sh'pōtim* (Ex 6:6; 7:4; 12:12). God punished Jerusalem with sword, famine, evil beasts and pestilences, all called God's "four . . . *sh'pōtim* (Ezk 14:21). *sh'pōtim* inflicted by men may be divine punishments (Ezk 16:41; cf. v. 38). Civil magistrates' punishments of breakers of human laws are also called *sh'pōtim* (Prov 19:29).

There is a definite theology of punishment as retribution, vindicative of justice, both divine and human, expressed in *shepeṭ* and *sh'pōṭ*.

sh'pōṭ. A judgment. This word in the two cases of its appearance takes the sense of punishment (penal judgement), parallel to meaning 3c of BDB (p. 1047) "condemning and punishing." The harlot's judgment is to be slain with the sword (Ezk 23:10). *sh'pōṭ* is parallel to sword, famine, and pestilence, divine punishments (II Chr 20:9).

mishpāt. Justice, ordinance, custom, manner. Represents what is doubtless the most important idea for correct understanding of government—whether of man by man or of the whole creation by God. Though rendered "judgment" in most of the four hundred or so appearances of *mishpāt* in the Hebrew Bible, this rendering is often defective for us moderns by reason of our novel way of distinctly separating legislative, executive, and judicial functions and functionaries in government. Hence *shāpaṭ*, the common verb (from which our word *mishpaṭ* is derived) meaning "to rule, govern," referring to all functions of government is erroneously restricted to judicial processes only, whereas both the verb and noun include all these functions.

An analysis of all uses in the Bible turns up at least thirteen related, but distinct, aspects of the central idea, which if to be rendered by a single English word with similar range of meaning, ought by all means to be the word "justice." Even the ASV, which inclines strongly toward regular rendering of Hebrew and Greek words has thus updated the rendering of *mishpāt*, though not regularly (contrast "thy judgments" [Ps 72:1] with "with justice" [72:2]). The noun *mishpāt* can be used to designate almost any aspect of civil or religious government, as follows:

1. The act of deciding a case of litigation brought before a civil magistrate. BDB finds 204 instances beginning at Ex 21:31—though rsv and NASB disallow this first, rendering otherwise. But most of the occurrences are very clear (Deut 25:1; Josh 20:6 are examples).

2. The place of deciding a case of litigation. A clear case of this rather rare (because indecisive) use is I Kgs 7:7.

3. The process of litigation is called *mishpāt*. There are many doubtful cases, it being hard to distinguish between meanings 1 and 2. An instance is Isa 3:14. "Litigation" would be an apt rendering for this class. The clearest instances employ 'im with a following noun "a judgment with so-and-so" (Job 22:4 or 'et (Ps 143:2).

4. A case of litigation (i.e. a specific cause brought to the magistrate). Solomon, e.g., asked God for understanding that he might "hear *mishpāt*,"—a case brought before him (I Kgs 3:11,

ASV marg.) If this case be disallowed (RSV) then Job's *ārakti mishpāt* ("I have set in order [my] case" 13:18) seems unassailable. See also 1 Kgs 8:59. This usage parallels the noun *rib*.

5. A sentence or decision issuing from a magistrate's court. This is very common. In such cases the prevalent "judgment" as rendering is entirely correct (1 Kgs 20:40). In Jer 26:11, 16 "worthy of death" renders *mishpāt mawwet*, in each case clearly meaning, a sentence of death.

6. The time of judgment. A clear case is Ps 1:5; Eccl 12:14, "God will bring every work into *mishpāt*" is close to presenting the same.

BDB assert that "execution of judgment" in general is the meaning in a group including the preceding instance. The cases cited, however, seem better classified in relation to the idea or attribute of justice.

All the above are examples mainly of *mishpāt* in the judicial side of government.

There now follows a use closely parallel to what men now think of as authority.

7. Sovereignty, the legal foundation of government in the sense of ultimate authority or right. Men today are accustomed to finding this in constitutions and the nature of man ("natural rights") but in the Hebrew Scriptures (a) *all authority is God's* and it is this authority which is denominated *mishpāt*. "The *mishpāt* is God's" (Deut 1:17); "The lot is cast into the lap; but the whole *mishpāt* thereof is of the LORD" (Prov 16:33). Individual men, as created by God, have inalienable *mishpātīm* ("rights"). (See R. D. Culver, *Toward a Biblical View of Civil Government*, 1974). (b) The magistrate's *mishpāt* is conferred by God as best shown by the reference to King Messiah's magisterial authority (Ps 72:1-2). Of course the doctrine of providence is basic to this idea (Ps 103:19; cf. Rom 13:1ff.). This universal reign and rule of God seems to be the idea conveyed by *mishpāt* in Jer 8:7, "My people do not know the law [*mishpāt*] of God."

There are also uses involving the legislative side of government.

8. The attribute of justice in all correct personal civil administration is emphasized.

(a) This justice is primarily an attribute of God, all true *mishpāt* finding its source in God himself and therefore carrying with it *his demand*. "When therefore the Scripture speaks of the *mishpāt* of God, as it frequently does, the word has a particular shade of meaning and that is not so much just statutes of God as the *just claims* of God. God, who is the Lord, can demand and He does demand" (Koehler, *OT Theology*, pp. 205-206). All the right (justice, authority, etc.) there is is his, "because Jehovah is the God of justice" (Isa 30:18; cf. Gen 18:25). God loves *mishpāt* in this sense (Ps 37:28). Psalm 36:6 [H 7] in *k'tib* reads, "Thy *mishpāt* (singular) is a great abyss."

(b) *mishpāt*, as justice, i.e. rightness rooted in God's character, ought to be an attribute of man in general and of judicial process among them (Ps 106:37). Wise men speak it (Ps 37:30) and think it (Prov 12:5) and God requires it of them (Mic 6:8). The righteous enjoy it (Prov 21:15) and righteous magistrates employ it in judgment (Mic 3:1; cf. Prov 29:4).

9. *mishpāt* also designates an ordinance of law—often used co-ordinately with *hōq* "ordinance" (Ex 15:25) and *tôrâ* "law" (Isa 42:4). The Pentateuchal ordinances are *mishpāt* (Lev 5:10; 9:16, et al.), in fact the individual ordinances of Mosaic law are *mishpāt* (Deut 33:10, 21; 16 times in Ps 119).

10. A plan (Ex 26:30) or 11. custom (II Kgs 17:33) or even 12. a fitting measure taken (I Kgs 5:8) seem to come under the scope of this word, though they are extended meanings, hardly standard.

13. One's right under law, human or divine, is denominated *mishpāt* (Deut 18:3; Jer 32:7).

Frequently associated with *šedeq* and *š' dāqā* in OT descriptions of God's reign and ways with his creatures, this idea lies at the very heart of a true understanding of the Biblical world-and-life view.

Note: The breastplate worn by the high priest is called a "breastplate of judgment" (Ex 28:15, 29-30), not from any alleged revelation given by the stones Urim and Thummim but because the breastplate covered Aaron's heart and "they shall be upon Aaron's heart when he goeth in before the LORD and Aaron shall bear the judgment (*mishpāt*) of the children of Israel upon his heart before the LORD continually." What Aaron was concerned with before God was Israel's justification, i.e. judicial sentence (see above) of guiltiness. Thus "in prophetic vision as in actual oriental life, the sentence of justification was often expressed by the nature of the robe worn. . . . Isaiah 61:10 is a good illustration of this." Also see Isa 62:3; Rev 3:5; 7:9; 19:14; Est 6:8-9, 12 (A. C. Hervey, *Smith's Dictionary of the Bible*, Hackett ed., II, pp. 1066-67).

R.D.C.

שָׁפַק (sh'pi). See no. 2440b.

שָׁפַק (sh'pīpōn). See no. 2448a.

2444 שָׁפַק (shāpak) *pour, pour out.*

Derivatives

2444a שֶׁפֶק (shepek) *place of pouring* (Lev 4:12).

2445 שָׁפַל (*shāpēl*)

2444b שֹׁפְקָה (*shopkā*) *penis* (as fluid duct, Deut 23:2).

This verb is used 113 times. Cognates are found in Akkadian, Aramaic, Arabic, Ethiopic, and Ugaritic. There are four common verbs that are synonymous in varying degrees with *shāpak*. 1) *riq* in the Hiphil means "pour out," but the Qal means "be empty," so the pouring out generally involves the emptying of a container; 2) *nāsak* means to "pour a libation"; 3) *nātak* means "pour forth" in an intransitive sense (note that the Accadian cognate means "to drip") in the Qal, while the infrequent Hiphil means "pour out," "melt"; 4) *yāšaḡ* is, with *shāpak*, a general word for pouring, but it is interesting to note that of the fifty-three occurrences, fifteen involve the oil of consecration or anointing on a head and another fifteen have to do with some form of metal casting. *shāpak* is not found in either of these latter usages. That there is some overlap, however, is seen from the comparison of Lev 8:15 with Ex 29:12. In the former *yāšaḡ* is used of pouring blood on the base of the altar. In the latter, *shāpak* is employed. On the other hand, *yāšaḡ* is not used of the shedding of blood, as is *shāpak*.

shāpak is used in both physical and metaphorical senses. In the former sense it is the common verb for describing the pouring out of a wide variety of materials. Thus, what is poured may be water (Ex 4:9; I Sam 7:6), broth (Jud 6:20), dust (Lev 14:41), or blood. This latter, the pouring of blood, constitutes the single most frequent use of the verb. In this connection it may be used in the ordinary sense of pouring, almost always as a part of the sacrificial ritual. More often it is used of the pouring out of a man's lifeblood, i.e. the shedding of blood. Thus in Num 35:33 God states that unpunished bloodshed (*shāpak*) pollutes the land (cf also Gen 9:6; Deut 21:7; II Kgs 24:4; Zeph 1:17; Ezk 22:3; Isa 59:7). In two passages in Amos (5:8; 9:6), it is said of God that he "calls for the waters of the sea and pours them out upon the surface of the earth," a vivid description of the rain cycle.

In two passages *shāpak* is used of pouring water out as a libation (*nāsak* is the normal word for a libation; but a libation was not usually water). The first is I Sam 7:6 in which Samuel gathered a repentant Israel at Mizpah, prayed for them, then they "drew water and poured it out before the Lord and fasted." The pouring out of the water perhaps symbolized their spirit of completely pouring out their souls before the Lord in devotion to him. The second passage is Isa 57:6, in which the libation is made, not to God, but to the pagan nature gods.

A common idiom is the use of *shāpak* in connection with the building of siege ramps (II Sam

20:15; Isa 37:33; Jer 6:6; Ezk 4:2). This usage may derive from the fact that soldier workmen carried dirt in baskets to the designated spot, then poured the dirt out.

In the category of metaphoric uses, that of the outpouring of God's wrath is most frequent. Thus in Isa 42:25 God is depicted as pouring out on Israel the heat of his anger. The symbolism is certainly obvious but nonetheless intensely sobering, and underlies the imagery of the bowls or vials of wrath in Revelation.

The expression "pour out your harlotries on every passer-by" (Ezk 16:15; 23:8) describes Israel's promiscuous idolatry. Pouring out one's heart or soul is an expression still commonly used and well understood.

Lastly there is the wonderful promise of the outpouring of the Spirit of God on his people, a lavish and blessed provision on God's part of his Spirit of grace which will bring about a startling change in men's hearts, lives and condition (Joel 2:28-29 [H 3:1-2]; Zech 12:10; Ezk 39:29).

H.J.A.

2445 שָׁפַל (*shāpēl*) *be low, sink, be humbled.*

Derivatives

- 2445a שֹׁפֵל (*shēpel*) *lowliness.*
- 2445b שִׁפְלָה (*shiplā*) *lowliness.*
- 2445c שָׁפַל (*shāpāl*) *low, humble.*
- 2445d שִׁפְלָהּ (*sh'pēlā*) *lowland, the Shephelah.*
- 2445e שִׁפְלוּת (*shiplūt*) *sinking* (i.e. lassitude, Eccl 10:18, only).

shāpēl is used thirty times in the Qal and Hiphil. Cognates appear in Ugaritic, Arabic, Akkadian, Aramaic, and South Arabic. Similar in meaning and sometimes appearing in parallel is *shāhah* which basically means "to crouch," "bow down."

Though the idea "be low" in the physical sense underlies the verb and its derivatives, its most important use is in the figurative sense of "abasement," "humbling," "humility." The exception is the proper noun Shephelah which will be treated separately.

"Be low," in the physical sense is seen in the use of *shāpāl* in connection with leprosy in Lev 13:20-21, 26 and in 14:37.

The most frequent use of the root is in those passages dealing with God's threat or promise to bring low and abase those who are haughty and proud, while he exalts those who have walked humbly before him. The humbling and restoration of Nebuchadnezzar in Dan 4 affords a graphic example. Even though this passage is in Aramaic, verse 34, which is part of the king's testimony, uses the root *sh'pēl* in exactly the

same sense as in Hebrew, "He is able to humble those who walk in pride." Similarly Dan 5:19, also Aramaic and I Sam 2:7, Hannah's prayer, and II Sam 22:28, David's testimony.

This truth is an important part of Israel's eschatology. Isaiah 2:6–22 warns of the coming downfall of the haughty and arrogant, in which there will be a day of reckoning against them. The enemies of Israel will all suffer this fate (Isa 25:11–12; 26:5). The ability to humble and exalt in this fashion is God's alone, and in Job 40:11, Job is challenged and asked, "Are you able to do this?"

The root is also used in the admonition to cultivate a humble spirit. In Isa 57:15 God says that he dwells with those of a humble spirit and will refresh and revive them. Again in Ps 138:6, though God is highly exalted, he nevertheless concerns himself with the lowly, but he keeps aloof from the haughty. Proverbs 29:23 reminds us that pride will bring a man low, but a humble spirit will obtain honor. Proverbs 25:7 advises that it is better to take a lowly seat at a banquet and then be invited to a more important spot than to suffer the reverse.

sh'pēlā. Shephelah (ASV "lowland," RSV Shephelah "lowland"). The idea of being low indicated in the root has reference to the fact that the range of hills represented by this word is low with respect to the Judean hills to the east. The average height of the Judean hills is 2000–3000 feet. For the Shephelah it is 500–800 feet, with a maximum height of 1500 feet. This range is 27 miles long and 10 miles wide, and intersected by several strategic valleys that lead from the coast to the Judean hills, the major ones being the valley of Ajalon, where Joshua fought his historic battle while the sun stood still; the Sorek valley, where Samson had his frequent skirmishes with the Philistines; and the valley of Elah, where David defeated Goliath.

That the Shephelah is a distinct geographical area (except for Josh 11:2, 16) can be seen from Josh 10:40; Jud 1:9; Jer 17:26 and others. Here it is distinguished particularly from the Negev and the Judean hills. In Deut 1:7, II Chron 26:10 and Ob 19 it is distinct as well from the coastal plain. Historically it formed an important line of defense for Judah with regard to attacks from the west. Until the Philistines were finally subdued under David it formed a buffer zone between them and Judah.

H.J.A.

שְׂפִלּוּת (*shiplūt*). See no. 2445e.

2446 שָׁפָן (*shpn*). Assumed root of the following.

2446a שָׁפָן (*shāpān*) *rock badger, coney, the hyrax*. See Klotz, J. W. "Animals of the Bible," in W.B.E., I, p. 78.

2447 שָׁפַע (*shp'*). Assumed root of the following.

2447a שָׁפַע (*shepa'*) *abundance* (Deut 33:19).

2447b שָׁפְעָה (*shp'ā*) *abundance, quantity* (e.g. II Kgs 9:17; Ezk 26:10).

2448 שָׁפָה (*shpp*). Assumed root of the following.

2448a שָׁפִיפֹן (*sh'pipōn*) *horned snake* (Gen 49:17).

2449 שָׁפַר (*shāpar*) *be pleasing*.

Derivatives

2449a שָׁפַר (*sheper*) *beauty* (Gen 49:21).

2449b שָׁפְרָה (*shprā*) *fairness, clearness* (of sky, Job 26:13).

2449c שֹׁפָר (*shōpār*) *ram's horn*.

2449d שָׁפְרוֹר (*shaprūr*) (*Kethib*), שָׁפְרִיר (*shaprir*) (*Qere*), *canopy*.

shāpar is used once, in the Qal (Ps 16:6). In this passage David is filled with praise to his God, not so much because of what God has done for him as for what God means to him personally. It is God who is his portion and his inheritance, and he is eminently satisfied and pleased with his inheritance, saying that that portion allotted to him is indeed most beautiful.

shōpār, shōpār. Shophar, ram's horn (ASV, "trumpet," sometimes "cornet," RSV "ram's horn," "trumpet," "horn"). Used seventy-two times. The word is related to Akkadian *shapparu* "wild sheep" and Arabic *sawāfirun* "ram's horns." In the Old Testament it is always used of the curved musical instrument made of the horn of a ram. The general word for the horn of an animal is *qeren*. This is used only once as a reference to a musical instrument. The word *yōbēl* means basically "ram" (so also in Phoenician and Arabic), but in the Old Testament it is used as an instrument and then as a name of the year whose beginning it signalled, the Jubilee (Year). The word *yōbēl* is seemingly interchangeable with *shōpār* (cf., for example, Ex 19:13, 16; Josh 6:4–5). Another word for "trumpet" is *hāšōšrā*. This latter is a straight tube, often metallic.

The *shōpār* played a very important role in Old Testament history. When Israel was at Mount Sinai, it was a strong blast on the *shōpār* that was

the signal for Israel to approach. The arrival of the new moon and new year was heralded by a signal from the shophar (Ps 81:3 [H 4]), as was the year of Jubilee (Lev 25:9). It played a vital part in Israel's expressions of praise (Ps 98:6; 150:3).

It was important in civil and military affairs as well. It announced a new king (I Kgs 1:34; II Kgs 9:13). It served as a bugle for signals in battle (Jud 3:27; II Sam 20:1). It was important in the fall of Jericho (Josh 6) and Gideon's defeat of the Midianites (Jud 7).

The Scripture frequently uses shophar in a figurative sense. The prophet is likened to the watchman who sounds the warning of impending disaster (Ezk 33:3-6; Isa 58:1; Jer 6:17).

שִׁפְרֹר (*shaprûr*). See no. 2449d.

שִׁפַּת (*shāpat*). See no. 2441a.

- 2450 שִׁפְתַּיִם (*sh^epattayim*) *hook-shaped pegs, hooks* (Ezk 40:43). Meaning doubtful.

שִׁצֵּת (*shešet*). A variant of no. 2373a.

- 2451 שָׁקַד (*shāqad*) *watch, wake*.

Derivatives

- 2451a שָׁקֵד (*shāqēd*) *almond tree, almonds*.

- 2451b *שָׁקַד (*shāqad*). This verb occurs only once, as a Pual participle meaning "cups shaped like almond" (blossoms, Ex 25:33, 34; 37:19, 20).

shāqad has cognates in both Phoenician and Syriac. *shāqad* occasionally overlaps, and is used with, *shāmar*, "guard," "watch over." In the latter the emphasis is on careful attention and preserving, while in *shāqad*, alertness is basic. Used in Qal and Pual, the latter in participial form only.

The idea of watchfulness which is basic to the root affords the key to the explanation of the Hebrew name for the almond tree. This tree, which in Israel blooms as early as January and February and is affectionately looked upon as the harbinger of spring, is appropriately enough called *shāqēd* "the waker."

This name for the almond forms the basis for God's vivid object lesson on the occasion of Jeremiah's call (Jer 1:11-12). The almond rod,

shāqēd, is a reminder to Jeremiah that God will be watchful and punctual, *shōqēd*, in carrying out what he has promised. The point of this is reinforced later in Jer (31:28) when God refers to this passage (cf. also 1:12 and 44:27) which forms the basis of Jeremiah's ministry. Daniel 9:14 indicates that this symbolism had impressed itself on Daniel.

The quality of alertness necessary to a watchman is stressed in Ps 127:1, but even this alertness is of no avail unless the Lord guards the city. This alertness takes on a sinister quality in Jer 5:6 where the calamity to befall Jerusalem is likened to a leopard watching its prey and awaiting the opportune moment to leap.

H.J.A.

- 2452 *שָׁקַח (*shāqā*) *give to drink, irrigate*.

Derivatives

- 2452a שָׁקוּי (*shiqqûy*) *drink, refreshment*.

- 2452b שִׁקֵּת (*shōqet*) *watering trough*.

- 2452c מִשְׁקָה (*mashqeh*) *cup bearer; irrigation, drink*.

shāqā is used in the Hiphil sixty times, and in the Pual once. It serves in place of the causative *shātā*.

The verb *shāqā* is used in the ordinary sense of giving drink to men (water in Gen 21:19, wine in Gen 19:32) or animals (camels in Gen 24:14, flocks in Gen 29:2 and Ex 2:16). It is also used in the sense of "watering" or "irrigating" the ground (Eden in Gen 2:6, 10, a garden in Deut 11:10, a forest in Eccl 2:6). Though *mātar* (in Hiphil) is the normal word for giving rain, *shāqā* seems to portray the rain in Ps 104:13 as a more personal activity of God. Unusual situations pertain in the following examples: Water out of the rock in Num 20:8; remains of the golden calf ground up in drinking water in Ex 32:20; water of bitterness (for a suspected adulteress) in Num 5:24-27, vinegar in Ps 69:21 [H 22].

In Jer 8:14, 9:14 and 23:15, God is said to give poisoned water to his people. This speaks of the bitter punishment Israel is being called on to bear, and from which there is no escape. Psalm 80:5 [H 6] speaks of the tears that Israel is made to drink. But in Ps 36:8 [H 9] David speaks of the abundant delights of fellowship with God, "Thou dost give them to drink of the river of thy pleasures."

mashqeh. *Cupbearer, drink, beverage, well-watered.* The Hiphil participle of *shāqā*. It is used 1) to describe the chief cup-bearer of a king, a position of trust and responsibility (mostly of Pharaoh's cup-bearer in Gen 40 and in Neh 1:11 in reference to Nehemiah), 2) of a beverage or drink (Isa 32:6; Lev 11:34, and in the expression

“drinking vessels” in I Kgs 10:21), and 3) of a wellwatered land (Gen 13:10; Ezk 45:15).

H.J.A.

שָׁקַץ (*shiqqūy*). See no. 2452a.

שָׁקַץ (*shāqūp*). See no. 2458b.

2453 שָׁקַט (*shāqat*) *be quiet, tranquil, at peace.*

Derivative

2453a שָׁקֵט (*sheqet*) *tranquility* (I Chr 22:9).

shāqat occurs forty-one times, in the Qal and Hiphil. Some of the words with which it is associated or whose meanings it sometimes overlaps are 1) *beṭaḥ* “security,” “a feeling of confidence”; 2) *nūaḥ* “settle down,” “rest”; 3) *hārash* “be silent,” “be inactive”; 4) *dāmā* “be silent”; 5) *dāmam* “be motionless, physically quiet”; 6) *sha’ānān* “ease,” “undisturbed, without anxiety” and 7) *shābat* “cease, rest from activity.”

The basic idea of the root is “tranquility.” It implies the absence of strife, war, or trouble on the one hand, and worry or anxiety on the other. It may also imply the absence of a pressing obligation, or again, of some disturbing element that mars a relationship between individuals.

The meaning “rest from war” is found particularly in Joshua, Judges, and Chronicles. Thus Josh 11:23 says, “The land had rest from war,” that is, Joshua’s portion of the task was now complete. Judges shows a pattern of peace, then apostasy, oppression, deliverance, followed once again by peace and rest from war and oppression. This state of peace and tranquillity is clearly seen to be dependent on, and a direct result of, God’s blessing on an obedient people. Both Asa and Jehoshaphat were godly kings whose kingdoms were blessed by God with lengthy periods of quiet (II Chr 14:1, 5–6 and II Chr 20:30).

Moab in Jer 48:11 is depicted as having for a long time been untroubled (*shāqat*), like wine sitting too long on the lees. Now God will pour it out, i.e. judge the nation. Similarly in Zech 1:11 the nations that have troubled Israel are themselves untroubled, but God will judge them as well. On the other hand God will bring Israel back to his land and cause him to live in tranquility, with no threats or dangers to disturb him (Jer 30:10; 46:27). Isa 14:7 states that the whole earth will be at rest when Babylon has fallen.

But *shāqat* is not only used when the threatening or disturbing element has been actually removed; God repeatedly challenges his people to rest in him, no matter how great the threat and danger might be. Thus he challenges Ahaz to be calm, completely at rest, despite the threat of an invasion. This sense of calm is not dependent on

some sort of psychological legerdemain, but in a willingness to put his trust in a God who is far greater than all his foes. The wicked on the other hand cannot know this peace, for they are like the tossing sea which never finds rest, but is in constant turmoil (Isa 57:20).

Another aspect of the verb is seen in Isa 62:1: He cannot keep quiet as long as Jerusalem is afflicted. He cannot be still until his full redemptive purpose is fulfilled. In Jer 47:6–7, the sword of the Lord cannot rest until it has completed its mission of judgment; and in Ps 83:1 [H 2] the Psalmist implores God not to rest while his enemies are raging and threatening his people. But in Ezk 16:42, God says that when his ministry of judgment has been completed he will be quiet, and no longer angry. And Job asks pertinently, “When he keeps quiet, who can condemn?”

H.J.A.

2454 שָׁקַל (*shāqal*) *weigh, weigh out.*

Derivatives

2454a שָׁקֵל (*sheqel*) *shekel.*

2454b מִשְׁקָל (*mishqōl*) *weight* (Job 4:10).

2454c מִשְׁקָל (*mishqāl*) *weight.*

2454d מִשְׁקֵלֶת (*mishqelet*), מִשְׁקֵלֶת (*mish-qōlet*) *leveling instrument, plummet.*

shāqal is used twenty-two times, in the Qal and Niphal. This common Semitic root appears in Akkadian, Ugaritic, Phoenician, Aramaic, Arabic, and Ethiopic. It means to weigh something in the balance to measure its amount, then very commonly to weigh out silver or gold as payment for something.

The verb *shāqal* may be used in the simple sense of weighing an object, such as in II Sam 14:26, in which the weight of the hair cut off Absalom’s head at his annual haircut was “two hundred shekels by the king’s weight.” In Isa 40:12 both the greatness of God and his ability to care for every part of his creation is portrayed in the expression “weighed the mountains in a balance.” This recalls Dan 5:25–26, in which the Aramaic equivalent appears, *qēl* “weighed” (and found wanting).

More commonly the verb means “to weigh out” silver (sometimes gold), that is, “pay,” such as in Gen 23:16 and I Kgs 20:39.

sheqel. Shekel. This was the common unit of weight throughout Canaan and Mesopotamia. The weight of the shekel seems to have varied somewhat according to time and place, but recent evidence indicates that in Israel there were three shekels in use, the temple shekel which weighed approximately ten grams, the ordinary or merchant’s shekel which weighed eleven and one-

2455 שִׁקְמָה (*shiqmâ*)

half to twelve grams, and the heavy or royal shekel which weighed approximately thirteen grams.

The temple shekel was equivalent to twenty gerahs (Ex 30:13; Lev 27:25). It is not known how the ordinary and the heavy shekel were related to the gerah. There were three thousand shekels to a talent (*kikkar*) as can be seen from Ex 38:25–26. An intermediate weight was the mina which was worth fifty shekels (Ezekiel 45:12 gives an alternative value of 60 probably reflecting Babylonian practice). Fractions of shekels were used for convenience's sake. Thus Saul's servant had in his possession a quarter shekel that could be used as a gift for Samuel (I Sam 9:8). Israel's yearly contribution for the sanctuary was one-half shekel (also called a *beqa'*, Ex 38:26) for each man of twenty years and over (Ex 30:13). In Nehemiah's time the amount was one-third shekel (Neh 10:33).

The purchasing power of the shekel can be seen in several passages.

According to the usual understanding of Lev 5:15, a ram was worth two or more shekels. In the New Testament the shekel was the standard wage for a day's labor. Abraham purchased the cave of Machpelah for four hundred shekels, which seems excessive in the light of Jeremiah's purchase of a field for seventeen shekels (Jer 32:9–10), even taking into consideration that in Jeremiah's time land values must have gone down and that Abraham's purchase may have involved more than the cave itself. Omri purchased the hill of Samaria for two talents (six thousand shekels), and David purchased the threshing floor from Ornan for fifty shekels (II Sam 24:24), and the larger area on which the temple was built for six hundred shekels of gold.

The valuation placed on the firstborn for purposes of redeeming him (Num 3:47; 18:16) was five shekels. Leviticus 27:3–6 gives monetary values for Israelites in connection with dedicatory vows. These range from fifty shekels for an adult male to three shekels for an infant girl. The value of a slave was thirty shekels (Ex 21:32). This renders the selling of the Shepherd in Zech 11:12 for thirty shekels all the more significant.

mishqāl Weight. Used in Lev 19:35 to express God's law that in all transactions honest weights shall be used. This admonition was very appropriate in the light of the ease of using differing weights in order to defraud another person (cf. also Amos 8:5).

Money?" PEQ 87:141–50. Sellers, O. R., "Weights," in IDB. Thomas, D. W., *Documents from Old Testament Times*, London: Nelson, 1958, pp. 227–30. AI, pp. 195–206.

H.J.A.

2455 שִׁקְמָה (*shiqmâ*) *sycamore tree* (e.g. Amos 7:14; Isa 9:9). This is not the common sycamore of America, but a fig sycamore, a large tree bearing edible figs. Johnson, P. C., "Plants" WBE, II, p. 1372.

2456 שָׁקַט (*shāqa'*) *sink, sink down* (e.g. Amos 9:5; Ezk 32:14).

Derivative

2456a מִשְׁקָא' (*mishqā'*) *what is settled, clarified* (Ezk 34:18).

2457 שָׁקַף (*shāqap*) *I, overlook, look down.* (ASV and RSV similar.)

Used twenty-two times in Niphal and Hiphil. The South Arabic equivalent means "to put a ceiling or roof over," the Arabic, "ceiling," "roof," "sky," the Aramaic, "rocky pinnacle," "rock." The basic idea is "to look down at a sharp angle from a great height" as one would look down from a pinnacle or onto the street from a high housetop.

The first category of passages employing the verb are those which speak of a peak or ridge which overlooks at a steep angle a plain or valley below. Such is Num 21:20, speaking of "the top of Pisgah which overlooks the Jeshimon (or wasteland)" (similarly also Num 23:28 and I Sam 13:18 and cf. Gen 18:16; 19:28).

A second category of passages speaks of God looking down from heaven upon earth and its inhabitants. In Ex 14:24 God looks down on the Egyptian army from the glory cloud. This is a hostile look. In Ps 14:2 and 53:2 [H 3] he looks down to see if there are any who seek after him. In Ps 102:19 [H 20] he looks down to redeem and set the prisoner free, a look of grace. Blessing is also in view in Ps 85:11 [H 12] which becomes true because "righteousness and peace have kissed each other."

The third major category comprises those passages in which someone looks out from a high window. Such is clearly the case in II Kgs 9:30, 32, since Jezebel fell to her death from that same window, and probable in Jud 5:28, II Sam 6:16, I Chr 15:29, Gen 26:8, Prov 7:6.

H.J.A.

שִׁקְמָה (*sh'qa'ārûrâ*). See no. 2047b.

2458 שָׁקַר (*shq*) **II. Assumed root of the following.**

2458a שָׁקַר (*sheqep*) *framework, casing of doors* (1 Kgs 7:5).

2458b שָׁקוּר (*shāqūp*), שָׁקוּר (*sh'qūp*) *frame, casing of windows* (1 Kgs 6:4; Ezk 41:16).

2458c מַשְׁקוֹפ (*mashqōp*) *lintel of door* (Ex 12:7).

2459 *שָׁקַץ (*shiqqēs*) *detest, make abominable*.
Denominative verb, occurring only in the Piel.

Parent Noun

2459a שָׁקֶץ (*sheqēs*) *detestable thing*.

2459b שָׁקֶץ (*shiqqūs*) *detestable thing, detestable idol*.

shiqqēs is used seven times, in the Piel. The Akkadian has a cognate, *šaqašu* "be spotted, unclean." Found in close association with *shāqas* are *tāmē* in the Piel, "make unclean" and *tā'ab*, "abhor."

The verb *shāqas* is used both in the sense of "consider abhorrent, detestable" (Lev 11:11, 13) and in the causative "make abominable," "contaminate" (Lev 11:43; 20:25). In the latter passages the one eating the abominable foods is said to make himself abominable in God's sight.

The object of abhorrence may be the forbidden foods as above, or "the abomination" (*tō'ēbā*), an idol. In one beautiful song of praise, the psalmist says of God, "He has not despised (*shāqas*) nor abhorred the affliction of the afflicted" (Ps 22:24 [H 25]).

sheqēs. *Detestable thing*. In contrast to *shiqqūs*, *sheqēs* is not necessarily related to idolatry, but rather is mostly used in reference to unclean and forbidden foods. Thus in Lev 11:10–12, it refers to forbidden sea creatures generally characterized as having no fins or scales. In Lev 11:13 it refers to various unclean birds, in Lev 11:20, 23 to winged insects (cf. *sheres*), and in Lev 11:41–42 to animals crawling on their belly (*sheres*).

Relegating certain animals to the category of "unclean" and "abominable" may in a number of instances involve considerations of health. Yet the main consideration here must be that, whatever the reason, or however much or little it was understandable to the Israelites, certain foods were forbidden and regarded as detested. This was to be accepted on the simple basis of trust in, and obedience to, God.

shiqqūs. *Detestable thing, idol*. This noun is always used in connection with idolatrous practices, either referring to the idols themselves as

being abhorrent and detestable in God's sight, or to something associated with the idolatrous ritual. Idols generally are referred to as an abomination (Jer 16:18; Ezk 5:11; 7:20; II Chr 15:8, etc). Not only are the idols an abomination, but they that worship them "become detestable like that which they love" (Hos 9:10), for they identify themselves with the idols.

Antiochus Epiphanes, as prophesied in Dan 11:31, and who is typical of Antichrist, set up an altar to, and image of, Zeus in the temple. This is called the "abomination that causes desolation," a desecration of the altar which destroys its true purpose. Just so will Antichrist establish an abomination in the sanctuary, a demonic counterfeit worship (Dan 9:27, 12:11).

The "abominable filth" of Nah 3:6 is *shiqqūs*. It seems likely that, since *shiqqūs* is everywhere else clearly related to idolatrous worship, the same would be true here.

It is important to recognize that by the use of such a strong word as *shiqqūs* God wants his people to recognize the extreme seriousness and wickedness of this sin, however attractive and popular it might be. God's own people need to view sin from God's perspective (Deut 7:26).

H.J.A.

2460 שָׁקַק (*shāqaq*) *run, run about, rush* (e.g. Isa 33:4; Nah 2:5).

Derivative

2460a מַשְׁשָׁק (*mashshāq*) *running, rushing* (Isa 33:4).

2461 שָׁקַר (*shāqar*) *deal falsely, be false*.

Derivative

2461a שָׁקַר (*sheqer*) *lie*.

shāqar is used six times in the Qal and Piel. There are cognates in Akkadian, Aramaic, and Arabic. It is used of the breaking of a promise, being false to a treaty or commitment, hence an empty promise. A close synonym is *kāzab* which is the general word for "lying" (some cognates of this root refer to an "unreliable spring" of water). Other words occasionally translated "to deceive" or "lie" are *kāhash* Piel, "deny the truth"; *pātā* Piel, "lead astray, seduce"; and *rāmā* Piel, "betray, forsake."

The significance of the verb in relation to covenant-breaking has been recognized by Moran, *Bib* 42:239; Wagner, *Supp VT* 16:364ff.; and Thomas, *JSS* (1960), p. 283. Thus the Psalmist can say that he has not been false with God's covenant (Ps 44:17 [H 18]), and God says in Ps 89:33 [H 34], "I will not break off my lovingkind-

ness (or covenant loyalty [but see *hesed* R.L.H.]) from him, nor deal falsely (*shāqar*) with my faithfulness." Verse 34 goes on, "My covenant I will not violate." The other passages are to be understood similarly (cf. Gen 21:23; I Sam 15:29; Isa 63:8; Lev 19:11).

sheqer. *Lie, falsehood, deception.* Used of words or activities which are false in the sense that they are groundless, without basis in fact or reality. Thus David says in Ps 38:19 [H 20], "Many are they that hate me without cause (*sheqer*)." The false witness of Ex 20:16 and Deut 19:18 involves a false accusation, an accusation that is groundless, not based on fact.

Jeremiah 23:32 speaks of those who "prophesy lying dreams," that are founded on nothing more substantial than the dreamer's imagination. He speaks similarly of those who prophesy falsehood in 27:10 (cf. also Zech 10:2; 13:3). No matter how persuasively or "logically" the prophet might speak, his words are groundless and false unless they are based on God's self-revelation. Isaiah 59:13 forms part of repentant Israel's confession. Included in this is the statement that they had conceived and uttered from their hearts lying (*sheqer*) words. Mic 2:11 portrays this attitude of Israel by saying that if a man whose way of life is "wind and falsehood (*sheqer*)" were to come to them with lies, that is the one they would choose as their prophet.

Job (13:4) accuses his friends of being "daubers of deceit." In a different context, Jeremiah (8:10; 11) says that from prophet to priest everyone is greedy for gain and practices deceit (*sheqer*) healing God's people superficially, pronouncing peace, that all is well when in fact all is not well.

Idols are called *sheqer* in a number of passages (e.g. Isa 44:20; Jer 51:17). Jeremiah 10:14–15 says of them that they are *sheqer* because "there is no breath in them. They are worthless, a work of mockery" (NASB). Habakkuk 2:18 speaks similarly of idols, asking what value they have, being "teachers of falsehood," that is, making empty promises and raising vain hopes.

There are other passages in which *sheqer* is used in a more general sense, such as Jeremiah's vigorous denial *sheqer* ("that's a lie!") in Jer 37:14. In II Kgs 9:12 the implication is, "You're evading the issue, holding something back!" *sheqer* is used in Prov 12:22 and 26:28 of lying lips and tongues, in Zech 5:4 and 8:17 of false oaths, and in Prov 20:17 of food gained by lying and fraud. In whatever context or circumstances *sheqer* is used, God will not condone it, for he is the God of truth, reality, and faithfulness, and his people are also to be so characterized.

שִׁרְרִירָה (*sh'rīrāt*). See no. 2469d.

2467 שָׁרַץ (*shāraṣ*) *teem, swarm*.

Derivative

2467a שָׁרָץ (*sheres*) *teeming, swarming things*.

shāraṣ is used fourteen times, only in the Qal. The Syriac cognate has the meaning "to crawl" and the Ethiopic, "to sprout." The verb *rāmaś* is to some extent synonymous and used interchangeably, yet there is clearly a distinction: *shāraṣ* views the same creatures as a teeming, swarming, prolific multitude, whereas *rāmaś* views them as a creeping, crawling, wriggling mass.

The basic idea of the root can be clearly seen in three passages: Ex 8:3 [H 7:28]), Ps 105:30, and Ex 1:7. In the first two references the subject is the plague of frogs that came on Egypt: "The river shall teem (swarm) with frogs" (The KJV rendering "the river shall bring forth abundantly" is somewhat misleading.) In the third passage, the prolific nature of Israel's growth is the subject: "The children of Israel were fruitful

and increased abundantly (lit. "teemed" *shāraṣ*) and multiplied, and the land was filled with them." From the Egyptian perspective the land was teeming with Israelites just as though a swarm of insects had come on them. The idea of "teeming" is the point of the use of *shāraṣ* in Gen 1:20–21 (cf. also Gn 8:17).

shereṣ. *Teeming, swarming things.* (RSV similar; ASV "creeping things.") Used fifteen times, it maintains the same similarities to and distinctions from the noun *remeś* as does the verb *shāraṣ* to its counterpart *rāmaś*.

In Lev 11, *shereṣ* is used 1) of sea creatures ("those things that teem in the sea," v. 10), 2) of flying insects (verses 20–21, 23), 3) rodents and various types of reptiles (vv. 29, 31), and 4) generally of small creatures that "go on the belly," "go on all fours" (i.e. insects that stand horizontally, as opposed to birds which stand upright on two legs; cf. v. 20), or "have many feet" (vv. 41–43).

In Lev 11:46, *shereṣ* is used to broadly classify all the smaller land animals as opposed to birds and beasts (the larger animals). Sea creatures are here referred to as those that wriggle (*rāmaś*) in the water. More commonly, when land animals are grouped into these three broad categories, *remeś* "crawling creatures" is used instead of *shereṣ* (cf. Gn 1:30; 7:8, 14). On the other hand all land animals are depicted as "crawling" (*rāmaś*) on the earth in Gen 7:21. Here *shereṣ* represents the third broad category of animals.

H.J.A.

2468 שָׁקַק (*shāraq*) *hiss, whistle.*

Derivatives

- 2468a שָׁקָקָה (*sh' rēqā*) *hissing, whistling.*
2468b שָׁקִיקָה (*sh' riqā*) *piping, whistling.*

This group of words most often describes the reaction displayed by those who pass by the ruins of a once great city or power, either a hiss or a whistle. Since it is used to describe the piping of a shepherd for his sheep (Jud 5:16), it must be understood to be a clearly audible sound. KB suggests that a form of whistling was practiced as a protection from the demons of destruction, but most see it as a sign of either shock, since it is so often found together with *shammā* "horror," or amazement (Jerusalem Bible), or derision (NEB, I Kgs 9:8; Jer 19:8; 18:16 etc.). Derision and joy at Jerusalem's discomfiture is seen in Lam 2:15–16 and Mic 6:16.

In Isa 5:26 and 7:18, God whistles for the nations to gather to destroy Israel, but in Zech 10:8 the whistling is God's signal to Israel, inviting them to return to enjoy God's blessing in the land

of promise. These last passages can be construed as piping with a shepherd's pipe.

H.J.A.

2469 שָׁרַר (*shrr*). Assumed root of the following.

- 2469a שָׁר (*shōr*) *umbilical cord* (e.g. Ezk 16:4; Prov 3:8).
2469b שָׁרָה (*shērā*) *bracelet* (Gen 24:22; Isa 3:19).
2469c שָׁרִיר (*shārīr*) *sinew, muscle* (Job 40:16).
2469d שָׁרִירוּת (*sh' rirūt*), שָׁרָרוּת (*sh' rirūt*) *stubbornness.*

sh' rirūt. Stubbornness. This noun is used ten times, eight times in Jeremiah. The root *sh' rar* is found in Aramaic with the meaning "be hard," "firm."

sh' rirūt is always found with *lēb* "heart," "mind" and refers to a people who stubbornly refuse to respond to God's admonitions. Thus Jer 7:24 says of Israel that they did not obey, but walked in their own counsels and in the stubbornness of their evil heart (cf also 9:13; 11:8).

H.J.A.

2470 שָׁרְשָׁה (*sharsh' rā*) *chain* (e.g. Ex 28:14, 22; I Kgs 7:17). Derivation uncertain.

2471 שָׁרַשׁ (**shārash*) *uproot* (Piel); *take root* (Poel, Poal, Hiphil). This denominative verb does not occur in the Qal.

Parent Noun

2471a שָׁרֵשׁ (*shōresh*) *root.*

This noun has cognates in Ugaritic, Akkadian, Phoenician, Aramaic, South Arabic, and Ethiopic.

shōresh is used mostly in a figurative sense in the Old Testament. It serves as a natural figure for the lower parts or foundations of something. Thus Job 28:9 speaks of miners' excavations at the roots of the mountains, and in Job 36:30 God covers the roots (i.e. depths) of the sea. The "root of a matter" is the key to a problem or a situation (Job 19:28).

More frequent is the concept of *shōresh* as the source of an existence, whether personal or corporate. Thus in Jud 5:14 Ephraim's root is said to be in Amalek, that is, Ephraim's territory was in the hill country of the Amalekites (Jud 12:15). In Dan 11:7 a "branch of the roots" of the daughter of the king of the south will arise, that is, one of her descendants will gain prominence.

The ability of the roots of certain trees, though they have been felled, to sprout again and develop new branches is used by Job (14:7–9) by way of contrast to man's future when he is struck down (but see *hālap*). It lies behind the imagery

in Dan 4:15, 26, in which the Aramaic cognate is used. Nebuchadnezzar will be struck down, but his root remains so that ultimately he will flourish again. Most importantly it underlies the Messianic use of the word. In Isa 11:1 a branch (Messiah) comes out of the (apparently defunct) root of Jesse. He will flourish and establish God's ideal kingdom. In v. 10 Messiah himself is referred to as the "root" of Jesse, that is, he is the root-sprout (cf. *hōter*, *nēser*, and *šemah*). This root-sprout is described in Isa 53:2 as being in an arid land, indicating the humble origins of, and seemingly unlikely prospects for, Jesus as the Messiah. In some passages the complete destruction of a nation's support in its past and its hope for a posterity is depicted as a destruction of root and branch (or fruit; cf. Amos 2:9; Mal 4:1 [H 3:19]).

To be firmly rooted, means to be secure and flourishing. Thus God had taken Israel out of Egypt as a vine and planted it in a good land where it took firm root. This is also the lot of the righteous (Prov 12:3, 12). Likewise, to have the roots well-watered promises a prosperous and fruitful future (Ezk 31:7, Job 29:9). The man who trusts in God rather than in man is as such a tree (Jer 17:8) and will flourish (cf. Job 8:17). After God has restored Israel, it will take firm root, and drawing from the rich provision of God's grace, will prosper and be fruitful as never before.

H.J.A.

2472 *שָׁרַת* (*shārat*) *minister, serve.*

Derivative

2472a שָׁרַת (*shārēt*) *service in the tabernacle* (Num 4:12; II Chr 24:14).

shārat occurs ninety-six times, always in the Piel. Of the ninety-six occurrences, twenty are in the form of the participle *m"shārēt*, used as the noun "minister." Phoenician uses the verb with the same meaning. *shārat* is distinguished from the more common *abad* (q.v.) in that *shrt* is generally a higher category of service, while *abad* is often used of menial employment.

The use of *shārat* falls into two natural categories: 1) of the personal service rendered to an important personage, usually a ruler, and 2) of the ministry of worship on the part of those who stand in a special relationship to God, such as the priests.

The high rank of the servant designated by this verb and the special relationship in which he stands in respect to his master is seen in Gen

39:4. Here Joseph was put over all the affairs of Potiphar's estate, and in vv. 8 and 9 Joseph was able to say that Potiphar did not concern himself with anything in the house. He left it all to Joseph's care, nothing being withheld from him except Potiphar's wife. In II Chr 22:8, king Ahaziah's nephews stand as ministers (*m"shar"tim*) to Ahaziah. These men would obviously not be menials. In Est 2:2 the king's attendants stand in a relationship close enough so that they have his ear and are able to make suggestions which the king follows. Elisha's personal servant was designated a *m"shārēt* "minister" (II Kgs 4:43; 6:15). Elisha himself, when he was first called to be a prophet, stood in this relationship to Elijah (I Kgs 19:21). Joshua was Moses' chief assistant (Ex 24:13; 33:11; Josh 1:1). Later, as was the case with Elisha, he succeeded his former master.

The second category involves mostly the Levites and priests who served in the tabernacle, and later the temple (in one passage, Ps 103:21, the angelic hosts are so designated). In a number of passages their service is specifically related to the sanctuary. Thus Ex 28:35 speaks of Aaron's ministry in the holy place, and v. 43 speaks of Aaron's sons as they minister at the altar (cf. Joel 1:13). The Levites were also so designated. I Chr 6:17 and 16:4, 37 speak of their ministry in song, worship, and praise. Samuel, in I Sam 2:11, 18 and 3:1, serves in the tabernacle as Eli's assistant.

The special status of the priest was not merely one of ritual or ceremony. He had the grave responsibility of representing the people before God, and it was through his ministry that Israel had access to God. He also stood before the people as God's official representative. As such they settled disputes among individuals (Deut 2:15), and in Deut 17:12 God decrees that whoever refuses to heed the priest, God's servant, shall be put to death.

Psalm 101:6 is an important reminder that he who would dwell in God's presence and serve him must walk blamelessly before him. This obviously goes far beyond mere ritual purity. Eventually the whole nation of Israel, not only one tribe, will serve God as his priests (Isa 61:6), thus fulfilling their calling as a "kingdom of priests" (Ex 19:6). Beyond that, the addition even of gentiles to this privileged class is anticipated in Isa 56:6–9. It should be noted here that they humbly recognize themselves as lowly servants (*'ebed*), but they love the name of the Lord and will minister to him.

H.J.A.

2473 שֶׁשׁ (*shēsh*) **fine linen**. (So ASV and RSV.)

The noun *shēsh* is used thirty-eight times. The word is derived from the Egyptian *ss* and is used in the Old Testament for fine white linen of exceptional quality imported from Egypt. Other words translated "linen" are *bûs* "fine white linen," used only in Ezk and Chr, *bad* "piece of fabric, linen," *pēshet*, "flax, linen," *pishtâ* "flax, linen," *ēṭûn* "red linen" from Egypt, and *sādin*, a luxury cloth.

Since *shēsh* was Egyptian linen, it is understandable that it is most frequently found in the book of Exodus. It formed part of the gifts that the Israelites gave in connection with the construction of the tabernacle, whose curtains were made of linen (Ex 25:4; 35:6, 23, 25, 35). The priest's clothes were all made of linen (Ex 28:5, 39; 39:28–29). One purpose of wearing the fine linen was to avoid making the priests sweat in their heavy labor near the heat of the altar (Ezk 44:18). Joseph had been magnificently clad in linen (Gen 41:42). It was also later part of a woman's wardrobe (Prov 31:22) as a mark of fine clothing.

2474 שִׁשְׁשֵׁ (*shishshē'*) **lead on** (Ezk 39:2).

שִׁשְׁשָׁ (*shishshâ*). See no. 2336d.

שִׁשְׁשִׁי (*shishshi*). See no. 2336b.

שִׁשְׁשִׁים (*shishshim*). See no. 2336c.

2475 שֶׁשְׁחַ (*shēshak*) **Sheshak** (ASV "Sheshach," RSV "Babylon.")

This name is used twice, by Jeremiah (25:26; 51:41).

shēshak, which refers to Babylon, is taken by most scholars to be an example of "Atbash," which involves a substitution of successive letters of a word by letters from the opposite end of the alphabet. Thus *bbl* ("Babel," "Babylon") becomes *sh sh k*. The second letter of the alphabet *b* is replaced by the second to last, *sh*, and the *l* by the *k*. The purpose of this code here is not clear, since Jeremiah certainly didn't hesitate to speak openly of the demise of Babylon. Keil suggests that *sheshak* is not only the result of Atbash, but signifies a crouching, sinking down, thus speaking of Babylon's fate. KB suggests a possible connection with the name Shish-ku found in late king lists. Another probable case of Atbash is found in Jer 51:1 where *lēb qāmāy* stands for Chaldeans (*kasdim*).

H.J.A.

2476 שָׁשֵׁר (*shāshēr*) **red color, vermilion** (Jer 22:14).

שֵׁת (*shēt*). See no. 2478a.

שָׁת (*shât*). See no. 2380b.

2477 שָׂתָה (*shâtâ*) **I, drink**.

Derivatives

2477a שָׂתִי (*sh'etî*) **a drinking** (Eccl 10:17, only).

2477b שְׂתִיָּה (*sh'tiyâ*) **manner of drinking** (Est 1:8, only).

2477c מִשְׁתֶּה (*mishteh*) **drink, banquet**.

Besides the common, expected use of *shâtâ* (e.g. Gen 9:21; 24:14, 30:38), there are sometimes special circumstances surrounding its use as well as special expressions which invite attention. "Eating, drinking, and rejoicing" is used with variations to describe the feasting associated with celebrations (I Sam 30:16; I Kgs 1:25). In I Kgs 4:20 it describes conditions during Solomon's reign as being prosperous and peaceful, as though it were a perpetual celebration. It may express a heedless unconcern for one's soul as in Isa 22:13, "Eat, drink, and be merry, for tomorrow we may die" (cf. also 56:12; Lk 12:19; 17:26–29). When Messiah has completed his work, then this banqueting and rejoicing will be appropriate for God's people (Isa 65:13f.).

When Israel drank of the waters from the rock and at Meribah and Marah (Ex 17:1–6; Num 20:5–13; Ex 15:23–24) they were experiencing God's provision for their needs in hostile surroundings. On the other hand, Hag 1:6 is a reminder that no amount of drinking can satisfy unless God's blessing is present.

Figuratively, Canaan is said to drink the waters of heaven (Deut 11:11), referring to an agriculture based on rain rather than irrigation. A full imbibing is described as drinking "iniquity" in Job 15:16, "derision" in Job 34:7, "violence" in Pr 4:17. To drink of one's own cistern (Pr 5:15) means to enjoy married love (cf. Song 5:1).

mishteh. Drink, banquet, feast. In Dan 1:5, 8, 16 and in Ezr 3:7 refers to that which is drunk, such as wine. Elsewhere it means a "banquet" or a "feast." It is used of a special meal prepared for honored guests, as in Gen 19:3, in which Abraham hosts the angels (cf. also Gen 26:30 and II Sam 3:20). It is used also of wedding feasts such as Jacob's in Gen 29:22 and the seven day wedding feast of Samson in Jud 14:10–17. Anything

2478 שִׁתָּה (*shth*)

that called for a celebration might be marked by a *mishteh*. Yearly holidays were also called a *mishteh* (cf. Est 9:19, 22 and Job 1:4-5).

God castigates Judah in Isa 5:12 for occupying themselves in elaborate revelry and not heeding the works of God.

A cheerful heart is likened to a "continual feast" in Prov 15:15, while the rich blessings awaiting Israel after God has completed his redemptive work is compared to a lavish, rich banquet (Isa 25:6). The rejoicing here is unmixed with grief or the prospects of sorrowful days in the offing.

Bibliography: THAT, II, pp. 1022-25.

H.J.A.

2478 שִׁתָּה (*shth*) II. Assumed root of the following.

2478a שִׁתָּה (*shēt*) *seat of body, buttocks* (Isa 20:4; II Sam 10:4).

2479 שִׁתָּה (*shth*) III. Assumed root of the following.

2479a שִׁתָּה (*sh"ti*) *warp* (Lev 13).

שִׁתָּה (*sh"ti*). See nos. 2477a, 2479a.

שִׁתָּה (*sh"tiyā*). See no. 2477b.

שִׁתָּה (*shātil*). See no. 2480a.

2480 שִׁתָּה (*shātal*) *plant*.

Derivative

2480a שִׁתָּה (*shātil*) *plant cutting* (Ps 128:3).

shātal is used ten times in the Qal. Its cognate is found in Arabic and Aramaic with the same

meaning. In Akkadian it means a shoot or cutting.

All occurrences of the verb involve figurative usage and refer to Israel or the righteous man in the form of a tree or a vine. Six of the ten occurrences appear in Ezekiel, four in chap. 17 (vv. 8, 10, 22-23). This is in the parable of Israel as a transplanted tree. Apparently the word means either "plant" or "transplant." In this parable Israel, which has broken its treaty with Babylon and depended on Egypt for help, is uprooted and caused to wither away. Such a tree cannot grow again, no matter how well it is planted. But God will ultimately plant Israel on a lofty mountain and cause it to thrive permanently. Ezekiel 19:10, 13 speaks of Israel as a flourishing vine planted in an ideal location. Then because of sin it is plucked up and set out in the wilderness where it cannot thrive. This describes Israel's deportation.

Psalm 1:3, Jer 17:8 graphically describe the righteous man who seeks God with all his heart and turns from evil. He shall flourish and be fruitful because he is planted by abundant and never-failing waters. However great the drought, he will prosper. Psalm 92:13 [H 14] adds that even in old age he will be full of sap and vigor and will thus by his vigor and fruitfulness declare the uprightness and faithfulness of God.

2481 שִׁתָּה (*shātam*) *open* (Num 24:3, 15).

2482 שִׁתָּה (*shātaq*) *be quiet* (Jon 1:11, 13; Prov 26:30; Ps 107:30).

2483 שִׁתָּה (*shātat*) *set, appoint* (Ps 49:15; 73:9).

ת

2484 **חֶמֶר** (*tā'*) **chamber** (e.g. I Kgs 4:28 = II Chr 12:11; Ezk 40).

2485 **תָּאַב** (*tā'eb*) **long for** (Ps 119:40, 174).

Derivative

2485a **תַּאֲבָה** (*ta'ābā*) **longing** (Ps 119:20).

2486 ***תָּאַב** (*tā'ab*) **loathe**, only Amos 6:8. Perhaps a by-form of *tā'ab*.

2487 ***תָּאַר** (*tā'ā*) **mark out** (Num 34:7, 8). This verb occurs only in the Piel.

2488 **תָּאוֹ** (*t'ō*) **antelope** (Deut 14:5; Isa 51:20).

תַּאֲוָה (*ta'āwā*). See no. 40d, 2496b.

תַּאֲלָה (*ta'ālā*). See no. 94b.

2489 **תָּאֵם** (*tā'am*) **be double** (e.g. Ex 26:24; 36:29). Denominative verb.

Parent Noun

2489a **תּוֹאֵם** (*tō'ām*) **twin** (e.g. Gen 25:24; Song 4:5).

2490 **תַּאֲנִיָּה** (*t'ēnā*) **fig, fig tree**. (ASV and RSV similar.) Derivation uncertain.

The fig tree, *Ficus carica*, is native to western Asia and has flourished in Palestine especially in the hill country throughout recorded history. Since sugar cane was not introduced into the region until the time of Alexander the Great, the fig was an important source of sweetness (Jud 9:11) in Palestine (and westward as far as northern Egypt; see Ps 105:33) during the OT period, as was honey also (Jud 14:18). More often than not, the fig is mentioned together with the grapevine in the OT. When figs and grapes were in short supply or lacking altogether, it was a sign of human distress or divine judgment (Ps 105:33; Jer 5:17; 8:13; Hos 2:12 [H 14]; Joel 1:7, 12; Hab 3:17; Hag 2:19). On the other hand, to be able to sit under one's own vine and fig tree was to share God's blessings of peace, prosperity and security, whether in past remembrance (I Kgs 4:25 [H 5:5]; see also I Macc 14:12) or in future eschatological hope (Mic 4:4; Zech 3:10). For similar imagery, see also II Kgs 18:31 = Isa 36:16; Joel 2:22. In Jotham's parable the olive, the fig, and the vine have first claim to royal dignity among fruits (Jud 9:7-15).

The earliest clothing was made by sewing together the tough, palmate leaves of the fig tree (Gen 3:7), but this does not necessarily imply that the fruit of the tree of the knowledge of good and evil (2:17; 3:5f.) was the fig, as some have held. But its presence in Eden is presupposed; in fact, it is the only tree mentioned by name.

Unlike the olive, the fig casts its leaves in autumn and blooms in the spring (late March). The early figs begin to form in March and are ripe in May (cf. Isa 28:4). The late figs, developing on new shoots, ripen in late summer and are gathered from the middle of August into October. For an excellent brief discussion of the miracle of the cursing of the barren fig tree in Mt 21:18f.; Mk 11:12-14, see F. F. Bruce, *Are the New Testament Documents Reliable?*, pp. 76-78. While the fig tree seems to have symbolized the Jewish nation on that occasion, there would appear to be no evidence that such was the case in the OT: see J. W. Wenham in JTS 5 (1954), pp. 206f. The closest OT parallel is the restricted comparison in Jer 24, where good figs (not fig trees) symbolize Judeans going into exile and bad figs symbolize Zedekiah, his princes, the remnant of Jerusalem staying in the land, and Judaeans who fled to Egypt (see also 29:17).

תַּאֲנִים (*t'ūnim*). See no. 48b.

2491 **תָּאַר** (*tā'ar*) **be drawn**.

Derivatives

2491a **תָּאַר** (*tō'ar*) **shape, form**.

2491b ***תָּאַר** (*tā'ar*) **draw in outline, trace out**. This denominative verb occurs only in the Piel (Isa 44:13; Num 34:7, 8).

tā'ar is used in the Qal in Josh 15 and 18 with the boundaries of the tribal allotments of Judah and Benjamin as subject. Piel: mark out. (ASV and RSV similar.) Found only in Isa 44:13 (twice) of tracing out the shape of an idol preparatory to its manufacture. The Pual *m'tō'ar*, found only in Josh 19:13, was understood by KJV as part of a compound proper name, while ASV, RSV, NASB and NIV with greater plausibility translated it like a verb. Traditional Jewish commentaries explain *tā'ar* as a synonym of *sābab* "to circle, trace, mark, sketch, delineate." BDB, with scant justification, considers the Piel a denominative verb

derived from the noun *tō'ar*, thereby needlessly separating it from its Qal base.

tō'ar. *Shape, form, beautiful, comely, fair, favored, goodly, resemble, visage.* (ASV similar; RSV usually similar with exceptions noted below.) The various nuances of the verbal root described in the preceding paragraph indicate that the noun means basically "shape, form." It probably never means "appearance" (contrast rsv in I Sam 28:14) because of the tautology that would result in passages like Gen 29:17. Furthermore, the phrase *shēm tō'ar* was used by traditional Hebrew grammarians to refer to "a certain type of noun which does not express a quality or a characteristic in the abstract . . . but denotes the agent or the bearer of a quality or characteristic" (D. J. Kamhi in *Bulletin of the School of Oriental and African Studies* 34: 261). Thus *tō'ar* in the OT describes the form, rather than the appearance, of a beautiful woman (Gen 29:17; Deut 21:11; I Sam 25:3; Est 2:7), a handsome (rsv) man (Gen 39:6; I Kgs 1:6), sleek (rsv) or gaunt (rsv) cows (Gen 41:18f.), etc.

Especially noteworthy is the use of *tō'ar* twice in the fourth Suffering Servant Song (Isa 52:13–53:12). The Servant's form was horribly marred and disfigured (52:14), repulsive to look at (53:2). As H. C. Leupold (*Exposition of Isaiah*, II, p. 224) puts it: "Little wonder that many of the fathers of the church of days of old claim that the account reads as though Isaiah had sat at the foot of the cross" (see Mk 14:65; 15:15–20).

R.F.Y.

תַּאֲשֹׁר (t'ashshūr). See no. 186g.

2492 תְּבָה (tēbā) **ark.** (ASV similar; RSV renders "basket" in Ex 2:3, 5.)

In Gen 6–9, the word is used twenty-six times to denote the huge, rectangular, box-shaped vessel which Noah, his family and the animals entered to escape the judgment of the flood. In Ex 2:3, 5, it denotes the tiny vessel in which Moses was hidden among the reeds in the Nile river to escape the wrath of the pharaoh. Generally thought to be an Egyptian loan word (although T. O. Lambdin does not include it in his comprehensive discussion in *Journal of the American Oriental Society* 73: 145–55), it is found only in Gen 6–9 and Ex 2, and is to be distinguished from the much more common word for "ark," *'ārōn* (q.v.), used to refer, among other things, to the ark of the covenant.

The Gen and Ex narratives both have Akkadian parallels, the closest correspondent to the Gen account being the famous eleventh tablet of the Gilgamesh epic (cf. ANET², pp. 93–97) while the Ex account may be compared to the legend of Sargon of Agade (cf. ANET², p. 119). The dis-

similarities between the OT narratives and their Akkadian counterparts are more theologically significant, however, than the similarities, as most recent commentators have pointed out (see, e.g., A. Heidel, *The Gilgamesh Epic and Old Testament Parallels*², pp. 268f.).

But the many theological similarities between the Gen and Ex narratives themselves are doubtless due to the working of the Spirit that inspired them both. In commenting on the Gen account, U. Cassuto summarizes as follows: "In both cases there is to be saved from drowning one who is worthy of salvation and is destined to bring deliverance to others; here it is humanity that is to be saved, there it is the chosen people" (*A Commentary on the Book of Genesis*, Part II, p. 59). Furthermore, Noah's ark as a symbol of salvation is compared to the ordinance of baptism in I Pt 3:20f., and as a symbol of God's protection from external evil, it was frequently sketched by the early Christians on the walls of the catacombs under the streets of ancient Rome.

2494 תָּהָה (thh). **Assumed root of the following.**

2494a תְּהוּ (tōhū) **confusion.**

2494b תְּהֻלָּה (tohōlā) **error** (Job 4:18).

tōhū. *Confusion, the empty place* (Job 26:7; ASV "empty space"; RSV "the void"), nothing, nought, vain, vanity, waste, wilderness, without form. (ASV similar; RSV renders "chaos" in Isa 24:10; 45:18f.). Since the word has no certain cognates in other languages, its meaning must be determined solely from its OT contexts. It refers to a desert wasteland in Deut 32:10; Job 6:18 (see ASV, RSV); 12:24b = Ps 107:40b; to a destroyed city in Isa 24:10 (see also 34:11); to moral and spiritual emptiness or confusion in I Sam 12:21 (twice) and several times in Isa (29:21; 41:29; 44:9; 45:19; 59:4); and to nothingness or unreality in Isa

40:17, 23; 49:4 (see also the Heb. text of Sir 41:10). In most (if not all) of these cases, *tôhû* has a negative or pejorative sense.

Two passages in particular call for more extended comment. The first is Job 26:7: "(God) stretches out the north over *tôhû*; he hangs the earth upon nothing." The context of chap. 26 stresses not only the omnipotence and sovereignty of God in creation and providence but also the ease with which he does whatever he pleases. While it would be improper for us to rigidly impose our own contingent, twentieth-century cosmology on this chapter and insist on interpreting it literally throughout (see, e.g., the obvious metaphor in verse 11), it is nonetheless striking that 26:7 pictures the then-known world as suspended in space. In so doing, it anticipates (at the very least!) future scientific discovery.

The other passage requiring discussion is, of course, Gen 1:2a: "The earth was *tôhû wābôhû*." The meaning of *bôhû* itself is uncertain (it appears elsewhere only in Isa 34:11 and Jer 4:23, both times in context with *tôhû*), although it apparently signifies "emptiness" (cf. the possible Arabic cognate *bahiya* "was empty"). Therefore, the phrase *tôhû wābôhû* in Gen 1:2a has been variously understood as a hendiadys meaning "a formless waste" (E. A. Speiser, *Genesis*, p. 5), "absolutely nothing whatever" (H. Renckens, *Israel's Concept of the Beginning*, p. 84), "void and vacancy" (H. E. Ryle, *The Book of Genesis*, p. 4—though without complete conviction). But the traditional rendering, "without form and void" (or "unformed and unfilled," to preserve something of the euphony of the Hebrew phrase), is ably defended by W. H. Griffith Thomas in *Genesis—A Devotional Commentary*, p. 29, where he writes that "the adjectives 'formless' and 'empty' seem to be the key to the literary structure of the chapter. The record of the first three days refers to the heaven and earth receiving their 'form,' and the record of the last three days to the filling-up of their 'emptiness.'" See further R. Youngblood in JETS 16:219–21. The "gap" or "interval" theory, which posits a millennia-long period of time implied by or in Gen 1:2 and which usually translates 1:2a by the less likely "but the earth became without form and void," has come into increasing disfavor in recent years. Its main exegetical support, Isa 45:18, reads "(God) did not create (the earth) *tôhû*," and has been interpreted to mean that therefore an original creation (described briefly in Gen 1:1) was destroyed; that the geologic ages ensued (during the "gap"); and that the new creation portrayed in Gen 1:3ff. was built on the wreckage of the old. But Isa 45:18, after the phrase quoted, goes on to say that God "formed (the earth) to be inhabited," thereby assuring the reader that *tôhû* was not his ultimate

purpose in creation. (For extended critiques of the "gap" theory, see especially O. T. Allis, *God Spoke by Moses*, pp. 153–159; B. Ramm, *The Christian View of Science and Scripture*, pp. 195–210). The word *tôhû* in Gen 1:2, likewise, refers not to the result of a supposed catastrophe (for which there is no clear biblical evidence) but to the formlessness of the earth before God's creative hand began the majestic acts described in the following verses. As Jer 4:23 indicates, the earth always has the potential of returning to *tôhû wābôhû* if God decides to judge it.

But as difficult as *tôhû* is to define, it is even more difficult for us to conceptualize it. Augustine, in his *Confessions* (Book XII, 6), admitted his failure to grasp it visually; Haydn, in the "Representation of Chaos" overture to his oratorio, *The Creation*, was much more successful in expressing it musically. [On the other hand, since "create" in Gen 1:1 is a summary statement epexegeted in the remainder of the chapter (cf. concluding summary in Gen 2:1–3), it may be that Isaiah designates by "create" all of God's works during the six days. He did not "create" chaos but a cosmos (cf. Bruce K. Waltke, *Creation and Chaos* (Portland, Oregon: Western Baptist Theological Seminary, 1974). B.K.W.]

2495 תהם (*thm*). Assumed root of the following.

2495a תהום (*t' hôm*) deep, depths, deep places. Modern versions are similar, but sometimes use "springs" or "seas." The word is used thirty-five times.

A number of times this word is used merely for a large body of water. Isaiah 51:10 and 63:13 refer to the crossing of the Red Sea as does Ps 77:16 [H 17]; 106:9; Ex 15:5 and others. There are other references to the deep waters of the Mediterranean Sea; Jon 2:5 [H 6] is clear, probably also Ezk 26:19; Ps 107:26 and others. There are some references to surface springs as coming from the deep waters below. What concept the Hebrews had of ground water we do not know, but they had the practical knowledge to dig wells and find springs in the valleys; Deut 8:7; Ps 78:15. They probably had not thought of a connection of springs with an underlying ocean because of the simple observable fact that oceans are salt and springs are fresh. Springs are more like the rivers they feed.

Both BDB and GB use this word to foster a strange cosmology. GB list one meaning as "the

Ocean, usually united to the great sea on which the earth rests and from where all the water of the earth comes." They do not note that Job 26:7 says that the earth is suspended on nothing. Passages alleged by GB include Gen 8:2 which simply speaks of sub-oceanic movement; Isa 51:10 and Ezk 26:19 which are not applicable; Ezk 31:4 which refers to ordinary springs and several other verses. They cite Gen 49:25 [H 24] "the deep that lies below," but the previous line shows that this is the deep that lies below the heavens above, not below the earth. Deuteronomy 33:15 is similar and may be dependent on the Gen poem. In fine, the interpretation of these verses is part of the fallacious cosmology foisted upon the OT by critical scholars and supported by overliteralizing such things as the windows of heaven (better "sluiceways" or "floodgates," נִוּי in the flood account (cf. Harris, R. L., "The Bible and Cosmology," JETS 5:11-17).

An older treatment of Gen 1:2 found a similarity between *t'hom* of the Gen creation account and the Enuma Elish story in which Tiamat was vanquished by Marduk and from her body earth and heaven were made. It is said that in Gen also there is implied a fight in which the spirit of God rushed on the chaos monster *t'hom* and thus made the ordered universe. Much of this is tendential exegesis. It is now admitted that linguistically *t'hom* cannot be derived from Tiamat because the middle radical, a laryngeal, is lost in Akkadian and would not be manufactured in a borrowed word. Thus, *ba'al* becomes in Akkadian *Bel* and is borrowed back in Isa 46:1 as *bēl*. Actually Tiamat and *t'hom* come from the same root. The root referred merely to deep waters and this meaning was kept in Hebrew as a noun for water in the deep ocean and deep in the ground. But in the animistic thought of Akkadian it became divinized into the goddess of the ocean, Tiamat. In Ugaritic the *h* is preserved (*thm*) as in Hebrew and the ocean is sometimes divinized as in Akkadian, though Ugaritic so far shows no creation account (UT 19: no. 2537).

Bibliography: White, W. "Tiamat," in ZEPB, V, pp. 744-45. For the critical view, cf. May, H. G., "Some Cosmic Connotations of Mayim Rabbim 'Many Waters'," JBL 74:9-21.

תַּהֲפֹכָה (tahpūkā). See no. 512f.

תָּו (tāw). See no. 2496a.

תֹּאֵם (tō'ām). See no. 2489a.

תִּגָּה (tīgā). See no. 839b.

תֹּדָה (tōdā). See no. 847b.

2496 *תָּוָה (tāwā) **I, scrabble** (Piel); *limūt* (Hiphil). Denominative verb.

Parent Noun

2496a תָּוָה (tāw) **desire, mark.**

2496b תַּאֲוָה (ta'āwā) **boundary** (Gen 49:26).

This verb, probably denominative from the noun *tāw*, is used in I Sam 21:13 [H 14] of making marks on a door and in Ezk 9:4 of putting a mark on a person's forehead. In Ps 78:41, KJV translates the verb as "limited," but because of the parallelism it is perhaps better to use there the homonym *twh* II, "to provoke, cause pain" (so ASV, RSV, BDB, KB). The root *t'h* (תָּה), found in the Piel with the meaning "point out" (ASV and RSV "mark out") in Num 34:7f., may very well be a secondary formation from the root *twh* I (so KB).

tāw. Desire (Job 31:35; ASV, RSV "signature"), **mark.** The *tāw*, the last letter (consonant) in the Hebrew alphabet, was shaped like an "x" in the most ancient script. Job 31:35 uses the word in the sense of a man's signature or mark of attestation, as the context shows. In Ezk 9:4, 6, it is used of a divinely authorized mark placed on a person's forehead for protective purposes. (A somewhat similar procedure is described also in Gen 4:15, although a different Hebrew word is used there and the forehead is not mentioned.) In ancient Mesopotamia, a cross-shaped mark on the forehead was called *ishpalurtu(m)* in Akkadian, written sometimes with the Sumerian logograph *BAR* which looks exactly like the older forms of the *tāw* (cf. CAD, VII, p. 253; E. A. Speiser in H. G. Güterbock and T. Jacobsen, editors, *Studies in Honor of Benno Landsberger on His Seventy-fifth Birthday*, p. 393). God's special marks of protection will be placed on the foreheads of his people in the eschatological future (Rev 7:2f.; 9:4; 14:1).

J. Finegan, in his recent historical novel entitled *Mark of the Taw*, notes that in the early Church the believers would use and think of the *tāw* as a sign of future salvation (because of the Ezk 9 references); of the Messiah (because it resembled the first letter of the Gr. word for Christ, "the Anointed One, the Messiah"); and, because of its shape, of the crucifixion of Jesus (see especially pp. 145f.).

R.F.Y.

2497 *תָּוָה (tāwā) **II, pain, wound.** This verb occurs only once, in the Hiphil (Ps 78:41).

תֹּהֶלֶת (tōhelet). See no. 859b.

2498 תָּוֶה (tāwek) **midst.** Derivation unknown. Derivative

2498a תִּכּוֹן (tikōn), תִּכּוֹן (tikōn) **middle.**

Isaiah 66:17 presents an interesting case where the very difficult word "in the midst" (*battawek*) can be read with different vocalization "your houses" (*bättēkā*) (see NIV text and footnote).

תֹּךְ (*tôk*). See no. 2509a.
 תֹּכְהָה (*tôkēhā*). See no. 865a.
 תֹּכְהַת (*tôkahat*). See no. 865b.
 תֹּלְדוֹת (*tôlēdot*). See no. 867g.
 תֹּלְעָה (*tôle'ā*). See no. 2516b.
 תֹּלְעָת (*tôla'at*). See no. 2516b.
 תֹּעֲבָה (*tô'ēbā*). See no. 2530a.
 תֹּעָה (*tô'ā*). See no. 2531a.
 תֹּעֲסָה (*tô'āpā*). See no. 886a.

2499 תוּה (*twp*). Assumed root of the following.
 2499a תֹּפֶת (*tōpet*) act of *spitting* (only in Job 17:6).

תֹּשָׁעָה (*tôšā'ā*). See no. 893e.

2500 תוּר (*tūr*) *seek, search out, spy out*.

Derivatives

2500a תוּר (*tôr*), תֵּר (*tôr*) *circlet, plait* (e.g. Song 1:10; Est 2:12).
 2500b יְתוּרָה (*y'tūr*) *range*.
 2500c תוּר (*tôr*), תֵּר (*tôr*) *dove*. Derivation uncertain.

In Prov 12:26, a difficult verse, כִּנְי understands *yātēr* (Hiphil jussive of *tūr*) as an anomalous form of the root *ytr* and translates "is excellent" (cf. Targum) and rsv emends to *yāsūr* (Qal imperfect of *sūr*) and translates "turns away" (cf. ICC for full discussion), while ASV makes the best sense out of the text as presently vocalized by reading "is a guide to" and by understanding the following *mērē'ehū* not as a suffixal form of *rēa* "friend, neighbor," with prefixed *min*, but as a suffixal form of *mērēa* "friend, neighbor," exactly as in Gen 26:26.

Of the twenty-three occurrences of *tūr* in the OT, more than half are found in Num 13f. in the sense of "spying out, reconnoitering" the land of Canaan preparatory to conquering it. "Careful examination" would thus seem to capture the basic meaning of the root, a meaning that is especially clear in Eccl 1:13; 2:3; 7:25, where an intense search for wisdom is such an important preoccupation in the mind of the author.

y'tūr. *Range* (Job 39:8; ASV similar; rsv takes it as a verbal form because of the parallelism, an analysis that may be correct in the light of the many unusual verbal forms that Job exhibits).

R.F.Y.

2501 *תָּזַז (*tāzaz*) *strike away*. This verb occurs only once, in the Hiphil (Isa 18:5).

תִּזְנוּת (*taznūt*). See no. 563c.
 תַּחְבּוּלָה (*tahbūlā*). See no. 596a.

תַּחְלָאִים (*tahālū'im*). See no. 648a.

תַּחְלָה (*t'hillā*). See no. 661d.

תַּחֲמָס (*tahmās*). See no. 678b.

תַּחֲנָה (*t'hinnā*). See no. 694f.

תַּחֲנָה (*tahānā*). See no. 690d.

תַּחֲנוּן (*tahānūn*). See no. 694g.

2502 תַּחְרָא (*tahrā'*) *corselet* (Ex 28:32; 39:23). Meaning uncertain.

2503 תַּחַשׁ (*tahash*) *badger*. (ASV "seal," marg. "porpoise"; rsv "leather" in Ezk 16:10, elsewhere "goat.")

Except in Num 4:25 and Ezk 16:10, the word is always governed by 'ōr(ōt)' "skin(s)," and is therefore doubtless the name of an animal. In Ezk 16:10 it refers to the leather in a woman's sandals; its thirteen other occurrences (in Ex 25-39 and Num 4) all refer to the skins used in covering the tabernacle and its accessories. Since the badger is rarely if ever seen in Sinai, and since Arabic *tuḥas* "dolphin," seems to be cognate to Hebrew *tahash*, most recent commentators translate the Hebrew word as "dolphin, porpoise, dugong" or the like (rsv "goat," though not impossible, lacks cognate language support, as does כִּנְי "badger"). The bottle-nosed dolphin (*Tursiops truncatus*) is found in the eastern Mediterranean, while the dugong (*Dugong dugong*) is plentiful in the Red Sea and the Gulf of Aqaba; the skin of the latter is still used by Bedouin to make sandals (see *Fauna and Flora of the Bible*, United Bible Societies, p. 22). If (as seems likely) the *tahash* was the outermost protective covering of the tabernacle (see especially Num 4:25), the skin of a marine animal like the dolphin or dugong would have been eminently suitable, both for its toughness and for its waterproofing properties.

R.F.Y.

2504 תַּחַת (*tahat*) *beneath, instead of, as, for, for the sake of, flat* (Josh 6:5), *unto, where, whereas*.

Derivatives

2504a תַּחְתּוֹן (*tahtōn*) *lower, nether*.

2504b תַּחְתִּי (*tahtī*), תַּחְתִּית (*tahtit*) *low*.

Although "beneath, instead of, in exchange for" would seem to be the basic meanings of *tahat* (which is used adverbially and prepositionally), its range has been broadened by recent research; see, e.g., J. A. Fitzmyer in *Journal of the American Oriental Society* 81:190, and especially J. C. Greenfield in ZAW 73:226-28. When it is combined or compounded with other particles, its meanings are rarely affected to any extent.

The word *taqt* is attested almost five hundred times in the OT and appears in numerous theolog-

ically significant contexts. The phrase "under the sun" wends its doleful way through the book of Eccl and has become common parlance in our own skeptical age, especially in the expression "There is nothing new under the sun" (Eccl 1:9 rsv). The phrase itself seems to signify simply "on this earth" (see especially 7:20; 8:16; 11:2) and perhaps underscores the frequently non-religious emphasis of the author of Eccl who both describes the apparent futility of life and yet lives by faith in it (see further J. Gammie in JBL 93 (1974), p. 363). "Under the tongue" is a place where something is held temporarily to be released when desired, e.g. sweetness (Song 4:11), evil (Job 20:12; Ps 10:7), or praise (Ps 66:17 in *The Amplified Bible* and marg. of asv). Although God has given man dominion over everything on earth and has put all things "under his feet" (Ps 8:6 [H 7], quoted in Heb 2:8), ultimate dominion, highlighted by the same expression, belongs to Jesus Christ (I Cor 15:25, 27; Eph 1:22). Thus "under" by itself can mean "under the authority of," as of a wife under the authority of her husband (Num 5:19–20, 29; Ezk 23:5; cf. similarly the use of *hypandros*, literally "under a man," in Rom 7:2). Likewise, "under the hand of" often means "under the authority/control of," as in Gen 41:35; Jud 3:30; Isa 3:6. But *taḥat* can also be used to express the idea of support and stability, as, e.g., in the widely-quoted and well-loved phrase from the Blessing of Moses: "Underneath are the everlasting arms" (Deut 33:27).

taqt in the sense of "in exchange for" finds widespread usage in the OT *lex talionis*, the law of retaliation, best known in the "eye for eye, tooth for tooth" phraseology of Ex 21:24 and Lev 24:20 (the same expression occurs in Deut 19:21, but there the preposition is *b'*). Far from being cruel and vengeful, the *lex talionis* was doubtless intended to insure that no more than a just and appropriate penalty would be exacted for crimes committed, whether accidentally or with malice aforethought, in an otherwise relatively cruel age. See further Harris, R. L., "Inspiration and Canonicity of the Bible," Zondervan, 1969, p. 51–52.

taḥat frequently means "instead of," as, e.g., when a man succeeds to the throne of a dead monarch and is then said to rule "instead of" him (I Kgs 11:43 and often). In this sense *taḥat* is also used in a passage prefiguring substitutionary atonement where Abraham is pictured as sacrificing a ram as a burnt offering "in the stead of his son" (Gen 22:13). The willingness of Abraham to offer Isaac, if necessary, made a deep impression on Paul, who saw in it the willingness of a greater Father to offer up a greater Son (cf. Gen 22:12, 16 with Rom 8:32).

tahti. *Low, lower, lowest, nether.* The derivative *tahti* is used twenty times. About a third of

these occurrences describe literal situations—the lower story of the ark, the lower springs of Caleb (Jud 1:15), the lower millstone (Job 41:24 [H 16]) etc. The other cases are used metaphorically to qualify the terms "the pit," "the earth," or "sheol" (q.v.). In Isa 44:23 the "earth beneath" is merely the earth in contrast to the heavens above (cf. NIV). But in most of the cases of the usage with *'eres* (six times in Ezk, twice elsewhere) the reference is to the place of those who have died. Much discussion revolves around this usage and what it involves. One view equates the "earth below" with "the realm of the dead" or the "netherworld." The netherworld is pictured in Akkadian sources as a cheerless place, a kind of cavern deep in the earth to which all people go at death and where there is deprivation and hardship (not penal suffering) but conscious existence. None of these details are in the OT picture, but the view is that the OT pictures some such realm deprived of its pagan associations.

Theologically, this view seems to have some problems. It differs from Christ's presentation in Lk 16 which describes two places widely separated and greatly different. An old view in the church is that in OT times there was one *limbus patrum* with two divisions from which Christ freed the believers when he descended into hell. This phrase in the Apostles' Creed is found only in forms of the creed used after the fourth century. It is not used in the Nicene Creed, an elaboration of the Apostles' Creed. The phrase may have originated in connection with this belief in a *limbus patrum* or in connection with a growing belief in purgatory; it is not clear. The verse in Eph 4:9 is sometimes cited in support of the idea, but it will not stand up. This verse merely refers to the descent of Christ to this earth from which he ascended again to heaven (cf. Eph 4:9 NIV). Besides, Lk 23:43 seems to make this interpretation impossible. The phrase in the Apostles' Creed has been otherwise interpreted—of Christ's suffering on the cross (Heidelberg Catechism) or of his burial and continuation in the grave for three days (Westminster Catechism).

An alternative view would find in the passages in Ezk and elsewhere merely a reference to the grave. The phrase "lower parts of the earth" is found eight times. Of special significance are those in Ezk 31–32, where Pharaoh and his contemporary kings are pictured as fallen, slain, lying with the uncircumcised. Note Ezk 32:24 where Elam and her army are said to be in the "grave" (*qeber*), in the "lower parts of the earth" (*'eres taḥtiyôt*) and in the "pit" (*bôr*). In these two chapters the place where the heathen lie is called "grave" (*qeber*) six times; "sheol" five times; "pit" (*bôr*) eight times and "lower parts of the earth" five times. It seems likely that these terms are here used as synonyms referring

to the tomb, which was typically a burial cave with ledges on the sides where bodies were buried, sometimes in state and with their armor. In this usage, *'ereš tahtīyôt* means no more than a place below ground where the dead are buried. It need not refer to any mythical location or subterranean place inhabited by ghosts or shades. No special cosmology or mythology is implied.

The other usages of *tahtī* are Deut 32:22 and Ps 86:13 (both "the depths of Sheol" rsv); Ps 63:9 [H 10] and 139:15 (both "the depths of the earth" rsv); and Ps 88:6 [H 7] ("the depths of the earth" rsv) which would seem to be in line with Ezk's usage. No emphasis on "depth" seems necessary in the translation. Naturally this does not deny that other vss. speak of conscious existence of the spirit after death. For extended treatment of these and other passages, cf. A. Heidel, "Death and the Afterlife in the OT," in *The Gilgamesh Epic*, University of Chicago, 1949, pp. 137-223.

R.F.Y.

תַּחְתּוֹן (*tahtôn*). See no. 2504a.

תַּחֲתִי (*tahtī*), תַּחְתִּית (*tahtit*). See no. 2504b.

תִּכּוֹן (*tikôn*). See no. 2498a.

תִּמָּן (*timân*). See no. 872e.

תִּמְרָה (*timârâ*). See no. 2523d.

2505 תִּירוֹשׁ (*tirôsh*), תִּירוֹשׁ (*tirôsh*) *wine, new wine*.

The KJV usually has "wine," rsv has "wine" except for "new wine" in Hos 4:11; 9:2; Hag 1:11; Zech 9:17. NASB has "new" or "fresh" wine (once "grapes") except for "wine" in II Chr 32:28; Neh 13:5, 12. NIV has "new wine" (once "juice," once "grapes") except for "wine" in Jud 9:13.

BDB defines *tirôsh* as "must, fresh or new wine." The word is used thirty-eight times, twenty of these in conjunction with grain and/or oil as the fresh produce of the field. It is said to be "in the cluster" (Isa 65:8); the vats or presses overflow with it (Prov 3:10; Joel 2:24). In Mic 6:15 *yayin* "wine" (q.v.) is said to be produced from *tirôsh*. The word is never associated with drunkenness except perhaps in Hos 4:11 where *yayin* is also mentioned. It is natural to suppose that this word for a product often associated with fruitfulness, productivity and blessing is to be distinguished from the *yayin* and *shêkâr* (q.v.) which definitely are intoxicating and are often mentioned together.

BDB lists this word under the root *yārash*, but recent evidence from Ugaritic studies suggests that it is a borrowed word (cf. Albright, YGC, p. 186). Albright says that because it was the name of a deity *Tirshu* the etymological argument for it being unfermented wine does not hold. But, as shown above, the view depends on Hebrew

usage rather than etymology. The Hittite *tuwarsa* means "vine" according to Gordon. He translates the word *trī* as "wine" in his Glossary (UT 19: no. 2613) but as "must" in his Ugaritic Literature (Pontifical Biblical Institute, 1949) p. 89.

R.L.H.

2506 תַּיִשׁ (*tayish*) *he-goat* (e.g. Prov 30:31; Gen 30:35). Derivation uncertain.

תֹּךְ (*tôk*). See no. 2509a.

2507 תָּקָה (*tākâ*). Meaning uncertain, perhaps, "were led" or "were assembled" (Deut 33:3).

תְּכֻנָּה (*t^ekûnâ*). See no. 964e.

2508 תְּכַיִּים (*tūkkiyim*) *peacock* (BDB), *baboon, ape* (KB from the Egyptian) (I Kgs 10:22 = II Chr 9:21).

2509 תֶּכֶךְ (*tkk*). Assumed root of the following.

2509a תֹּדֶף (*tôk*), תֹּךְ (*tôk*) *fraud, deceit, deceitful*. (ASV and rsv "oppression," "oppressor.")

To be carefully distinguished from *tôk* I, the construct form of *tāwek* (root *twk*), "midst," this word (root *tkk*) occurs three times in the singular in Ps and once in the plural (*t^ekākîm*) in Prov. The singular form is always found in context with words like "cursing" and "deceit" (Ps 10:7), "guile" (rsv "fraud"; Ps 55:11 [H 12]), and "violence" (Ps 72:14), and is condemned as a characteristic of wicked people. In Prov 29:13, the oppressor (literally, "man of oppressions") is paired with the poor man as a recipient of God's evenhanded blessing, emphasizing the fact that all people owe their existence to him.

R.F.Y.

תִּכְלָה (*tiklâ*). See no. 982e.

תַּכְלִית (*taklit*). See no. 982f.

2510 תְּכֵלֶת (*t^ekēlet*) *blue*. (ASV similar; rsv usually "blue," but "violet" in Jer 10:9 and "purple" in Ezk 23:6.)

Virtually all recent commentators agree that the dyes used by ancient peoples were rather impure and that the uncertainty of the results of dyeing in those days made it almost impossible for them to reproduce colors with any degree of precision. Words like *t^ekēlet* and *'argāmān* (and their Akkadian cognates), therefore, denoted colors that spanned the spectrum from brilliant red through deep purple, and "blue" is simply a conventional translation of *t^ekēlet*. It may well be that the ancients were more interested in richness, darkness, brilliance, and the like than in precision of tint or hue. At any rate, the best and

costliest ancient dyes were the blues and violets and purples that were made from the secretions of various mollusks (primarily *Murex brandaris* and *Murex trunculus*) that swarm in the coastal waters of the eastern Mediterranean, particularly near Sidon and Tyre (whence "Tyrian purple") but also near Elishah (probably Cyprus); see Ezk 27:7, and cf. especially R. J. Forbes, *Studies in Ancient Technology*, IV, pp. 110–22. The importance of such dyes to the prosperity of the region is underscored by the likelihood that "Canaan" is a Hurrian word meaning "land of purple"; "Phoenicia" has the same meaning in Greek. *Murex* dyes (and cheaper imitations) were prized far and wide by kings (II Chr 2:7, 14 [H 6, 13]; 3:14; Est 1:6; 8:15; cf. our expression "royal blue") and others who could afford them (Jer 10:9; Ezk 23:6; 27:24). Of the nearly fifty occurrences of *t'kēlet* in the OT, fully forty are found in Ex and Num, where they describe cloth used in the tabernacle and worn by the priests engaged in the ritual of worship. The same motif was carried over to the temple (I Chr 2:7 [H 6], 14 [H 13]; 3:14). Such regal colors were most appropriate to adorn the sanctuary of the King of kings. Then, too, the sons of Israel wore as a distinctive badge of their identity a cord of blue on the corner of each tassel on the corners of their garments (Num 15:38).

R.F.Y.

2511 תָּכֵן (*tākan*) *ponder, weigh* (Qal); *be equal* (Niphal); *weighed out* (Pual).

Derivatives

- 2511a תָּכֵן (*tōken*) *measurement* (Ex 5:18; Ezk 45:11).
 2511b תִּכְנִית (*toknit*) *measurement, proportion* (Ezk 43:10).
 2511c מִתְכַּנֵּת (*matkōnet*) *measurement* (e.g. Ex 5:8; Ezk 45:11).

According to Dhorme the basic meaning of the root *tkn* is "gauge," i.e., "estimate a thing by comparing it with a standard" (E. Dhorme, *Le Livre de Job*, Paris, 1926). This is also its meaning at Qumran (cf. M. Z. Kaddari in *Revue de Qumran*, 17:219–224). Driver, however, rejects this meaning and opts for the sense "to adjust (to a standard) set right" (G. R. Driver, "Hebrew Notes," VT 1:242f.). But R. N. Whybray contends that while the basic root meaning cannot be determined, both meanings are found. He finds the sense "to adjust" appropriate in Ezk 18:25, 29; 33:17–30; Ps 75:4, and the meaning "gauge, estimate" the only one possible in Prov 16:2; 21:2; 24:12; I Sam 2:3 (R. N. Whybray, *The Heavenly Counsellor in Isaiah XI, 13–14* [Cambridge: At the University Press, 1971], pp. 13ff.). Driver's sense is established in Ezk 18:25 where

it is said of God: "The way of the Lord is not just" (i.e. "not adjusted to ordinary standards"). In the second set of passages the point is made that God is able to gauge or correctly estimate the state of man's heart.

The tension between these two possible meanings is seen in Isa 40:13. Here the KJV, ASV, and RSV ambiguously translate our word by "direct." But in the preceding verse the same word is translated "measured out" and the sense, "to gauge," is extremely appropriate to the passage. The LXX correctly interprets the verse: "Who has known/comprehended the mind of the LORD" (cf. I Cor 2:16). Whybray translates the verse as follows:

Who has understood the mind of Yahweh,
 of who was his counsellor, who instructed him?
 Whom did he consult for his guidance,
 and who taught him the way to achieve order,
 and showed him how to exercise creative skill?

Unlike Marduk who needed the wisdom of his father Ea to effect the creation, Yahweh acted alone in his sublime intelligence. Unlike the pagan notion that creation continually takes place through opposing gods locked in deadly conflict, the cosmos is in fact orderly because it is the product of one creative mind.

2512 תָּלָה (*tālā*) *hang*. (ASV and RSV similar.)

Derivative

- 2512a תָּלִי (*t'li*) *quiver*.

The parallel form *tālā'* (cf. E. Kautzsch and A. E. Cowley, Gesenius' Hebrew Grammar, sections 75 nn and rr), rendered "be bent," "hang," "hang in doubt" (ASV and RSV similar), is attested only in Deut 28:66, Hos 11:7, and II Sam 21:12, the latter in a Qere-Kethib situation, whereas the major form, *tālā*, is found twenty-eight times (if II Sam 21:12 is included).

The verb means basically "to hang," whether a utensil on a peg (Isa 22:24; Ezk 15:3), weapons on a wall (Ezk 27:10f., both Piel; Song 4:4), or a lyre on a tree (Ps 137:2). Job 26:7 strikingly pictures the then-known world as suspended in space, thereby anticipating future scientific discovery, when it states that God "hangs the earth upon nothing." Other (more grisly) examples of

the verb may be seen in Lam 5:12 (Niphal); II Sam 4:12; 18:10.

Most frequently, *tālā* is used in reference either to the execution of a person or to the public display of his corpse after execution. Since Herodotus (*History*, 3.159) indicates that impaling was a common method of execution in Persia (see also Ezr 6:11 ASV and RSV), perhaps *tālā' al'ēs*, traditionally rendered "he hanged on a gallows/tree," means rather "he impaled on a stake," especially in Est (cf. particularly LXX *stauroō* "impale/crucify," which is used to translate *tālā* in Est 7:9). The same notion underlies Gen 40:19,22; 41:3, reflecting Egyptian practice. A somewhat similar sense underlies Lam 5:12 reflecting Mesopotamian practice. In any event, there is no evidence that the hangman's noose was employed in such contexts, while Assyrian reliefs during the time of the Hebrew monarchy often picture corpses hanging on the stakes where they have been impaled. If this interpretation is correct, Deut 21:22f. takes on greater vividness: "If a man has committed a sin worthy of death and he is put to death, and you hang him on a tree, his body shall not remain all night on the tree, but you shall bury him the same day, because a hanged man is accursed by God." [However, this passage may indicate that Israel's method of executing the criminal differed from that of her pagan neighbors; whereas the latter executed the offender by hanging or impaling, Israel stoned him and supplemented his punishment by hanging/impaling his body (II Sam 4:12; Josephus, *Ant.* 4.202; cf. Josh 10:26; 8:29). Since this supplementary act demonstrated that the victim was cursed by the Lord, his body had to be buried by nightfall in order not to defile the blessed land; cf. Dt 21:22, NIV. B.K.W.] This famous passage, alluded to in the commentary on Nahum found in Qumran Cave IV (see J. M. Allegro in JBL 75: p. 91), is also referred to in Acts 5:30; 10:39 and quoted in part in Gal 3:13. In all three NT passages, the crucifixion of Jesus is in view, OT impaling was accomplished most likely on the single upright post or *crux simplex*, while our Lord was crucified most probably on the notorious and all-too-familiar upright-plus-crossbar, the *crux immissa* (see Irenaeus, *Against Heresies*, 2.24.4), enabling the superscription to be nailed to the cross above his head (Mt 27:37; Lk 23:38). More significantly, his hanging on a tree denoted that he bore the curse of God for us.

R.F.Y.

תלול (tālūl). See no. 2513b.

2513 תלל (tll) I. Assumed root of the following.

2513a תלל (tēl) mound, heap.

2413b תלול (tālūl) exalted, lofty (Ezk 17:22).

2513c תלתלים (taltallim). Meaning uncertain; used figuratively of a woman's hair (Song 5:11).

tēl. Mound, heap, tel. A tel (Akkadian *tillu*; Arabic *tallu*) is a large mound covering ruins, usually shaped like a truncated hill, representing the site of an ancient city (or succession of cities built on top of each other). Its characteristic appearance is caused by the collapse of walls and buildings and/or the construction (primarily in the Hyksos or Middle Bronze II B-C period, c. 1750–1550 B.C.) of enormous sloping fortifications technically known as a *glacis*. The landscape of the Middle East is dotted with thousands of tels that (under current excavating and interpreting procedures) will keep archaeologists busy for centuries as they attempt to reconstruct the history of the sites (see especially E. Yamauchi, *The Stones and the Scriptures*, pp. 146–66). In the OT, nearly all the occurrences of *tēl* are in reference to the results of God's judgment on sinful people (Deut 13:16 [H 17]; Josh 8:28; Jer 49:2; and, by implication, Jer 30:18). During the exilic and postexilic periods, a few sites in Babylonia were already notable for their ruined condition, as their names demonstrate (Ezk 3:15; Ezr 2:59 = Neh 7:61).

R.F.Y.

2514 תלל (tālāl) II, mock, deceive, trifle with. Occurs in the Hiphil and Hophal (e.g. Gen 31:7; Isa 44:20).

Derivative

2514a מהתלה (mahātallā) illusions.

2515 תלם (tlm). Assumed root of the following.

2515a תלם (telem) furrow (e.g. Hos 4:10; Job 31:38).

תלמיד (talmid). See no. 1116c.

תלנא (t' lunnā). See no. 1097a.

2516 תלע (tl'). Assumed root of the following.

2516a תולע (tōlē') worm, scarlet, crimson.

2516b תולעת (tōlē'ā), תולעת (tōlē'at) worm.

2516c תלע (tālā') clad in scarlet. This denominative verb occurs only once, in the Pual (Nah 2:4).

2516d מתלעות (m' tall'ōt) teeth (Job 29:17; Joel 1:6; Prov 30:14). On *mal't'ōt fangs* (Ps 58:6 [H]). See Dahood AB, Ps II, p. 61.

tōlā', tōlē'ā, tōlē'at. Worm, scarlet, crimson. All three forms of this word mean "worm, maggot, larva"; two of them (tōlē'ā and tōlē'at)

2517 תַּלְפִּיּוֹת (*talpiyôt*)

also mean "scarlet, crimson." The worms referred to are probably the larvae of certain kinds of insects, primarily flies, moths, and beetles. In the OT they often symbolize the weakness and insignificance of man (Job 25:6; Ps 22:6 [H 7]; Isa 41:14); they are of a type that devour decaying matter (Ex 16:20), including corpses (Isa 14:11; 66:24; cf. also especially *tultu* in this sense in Akkadian; Gilgamesh refused to believe that Enkidu was dead "until a worm fell out of his nose"; see ANET, p. 90). They also are of a kind that feed on various plants (Deut 28:39; Jon 4:7), a fact that helps us to understand the relationship between "worm" and "scarlet." In ancient times a brilliant scarlet or crimson dye was obtained from the female bodies of the kermes (Arabic *qirmiz*, whence our word "crimson") insect, *Coccus ilicis*, which lives on the kermes oak, *Quercus coccifera*, native to the Middle East (see J. Lauder milk in *Natural History* 58:116f.; R. J. Forbes, *Studies in Ancient Technology*, IV, pp. 102–6). The dye was highly prized (Lam 4:5) and as such was employed to color cloth used in the tabernacle and by those who worshiped there; *tôla'at* is attested twenty-six times in Ex with the meaning "scarlet (stuff)." The permanent quality and deep red color of the dye made it suitable for use in the striking figure in Isa 1:18, where a forgiving God says to his wayward people: "Though your sins... be red like crimson, they shall be as wool."

Bibliography: TDNT, VIII, pp. 453–55.

R.F.Y.

2517 תַּלְפִּיּוֹת (*talpiyôt*) **weapons** (Song 4:4).
Meaning doubtful.

תַּלְתַּלִּים (*taltallim*). See no. 2513c.

תֹּם (*tôm*), תָּם (*tām*). See nos. 2522a,c.

2518 תָּמָה (*tāmah*) **be amazed, astonished.**

Derivative

2518a תִּמְהוֹן (*timhōn*) **astonishment.**

The root meaning is "be astounded, dumbfounded, bewildered," with an element of fear, whether because of an amazing or fearful sight (Ps 48:5 [H 6]; Isa 29:9; Hab 1:5; Eccl 5:8 [H 7]; Jer 4:9; Sir 11:13) or a terrifying sound (Job 26:11). Frightening or bewildering events may cause people to look at each other in amazement (Gen 43:33) or terror (Isa 13:8). The element of startled astonishment is also found in the context of Isa 14:16. The Aramaic cognate noun *t'mah* occurs three times in Dan (4:2f. [Aram. 3:32f.]; 6:27 [Aram. 28]) with the meaning "wonder" in the sense of "marvelous act, miracle," and also with the element of the fearful.

timhōn. Astonishment. The Heb. noun occurs only twice (Deut 28:28; Zech 12:4), both times in context with *shiggā'ôn* "madness," and *iwwārōn* "blindness," the three rhyming nouns all denoting aspects of divine judgment, a factor often in the background of the passages where the root *tmh* appears.

R.F.Y.

תִּמְהוֹן (*timhōn*). See no. 2518a.

2519 תַּמְּזוּז (*tammūz*) **Tammuz.** (ASV and RSV similar.)

The proper name Tammuz derives ultimately from Sumerian DUMU.ZI(D), "The Quickener of the Child (in the mother's womb)," the god of Mesopotamian myth who was the patron deity of the city of Bad-tibira in the broad and grassy steppeland in the heart of southern Babylonia. Tammuz was a food or vegetation deity embodying four different aspects: a power in the sap that rises in trees and plants, a power in the date palm and its fruit, a power in grain and beer, and a power in milk. This fourth aspect was his most characteristic one; since he represented the mysterious potential in the female sheep of giving birth to young and of producing milk with its life-giving powers, he became the patron saint of shepherds, the god of fertility and producer of new life who managed and cared for cattle pens and sheepfolds.

Of the three most important Sumerian ritual dramas (in which cultic concepts were acted out in a formal setting in order to coerce the gods to perform the desires and fulfill the needs of the actors), two related directly to Tammuz. The first was the *hieros gamos*, in which the king, taking on himself the identity of Tammuz, cohabited with a priestess (representing the goddess Inanna/Ishtar, the lover of Tammuz) to insure that the power of fertility would pervade nature and guarantee prosperity and plenty. The second was based on the observable fact that the end of spring brought the end of new life in nature, the end of the milking and lambing season; the obvious conclusion was that Tammuz, the power who had produced all these blessings, had died! So a dramatic lament for the dead god was held annually at the beginning of the hot, dry summer, in the fourth month of the Mesopotamian calendar (our late June and early July), the month that was named "Tammuz" after him. In the rites he was mourned by women who represented his bereaved mother, sister, and young widow. A characteristic Akkadian ritual reads in part as follows: "In the month of Tammuz, when Ishtar has the entire population wail over her lover Tammuz and one's family is gathered there, Ishtar is present..." (for the Akkadian text see E. Ebeling, *Tod und Leben*, Part I, p. 49).

In Ezk 8:14, "women weeping for Tammuz" is mentioned among several abominations that Ezekiel observed taking place in the Jerusalem temple area. Tammuz was represented in Mesopotamian literature as a youth, handsome, attractive, having no responsibilities (see especially T. Jacobsen, *Toward the Image of Tammuz and Other Essays, passim*). His cult was thus primarily (perhaps exclusively) a woman's cult, without positive ethical or religious value. [Believing that Tammuz rose from the dead, many scholars have used the myth to explain or illustrate material in the OT, NT, and Apocrypha. But E. Yamauchi has demonstrated that there is no good evidence that Tammuz rose from the dead ("Tammuz and the Bible," JBL 84:283-90). B.K.W.] It is no wonder that the one true God, who brooks no rivals, judged its Jerusalem devotees without pity (Ezk 8:17f.).

Similar to the cult of Tammuz was that of Adonis in Syria, which may have been simply a local variant of it. Many recent translators and commentators (cf., e.g., *The Amplified Bible*, *The New English Bible*, Leupold, ICC) find a reference to gardens planted in honor of Adonis in Isa 17:10. It is also possible that the "desire of women" of Dan 11:37 is Adonis (see footnote in *The Jerusalem Bible*, p. 1447).

 תְּמִים (tāmīm). See no. 2522d.

2520 תָּמַח (tāmāk) **grasp, lay hold of, hold fast, support.** (ASV, RSV similarly.)

The basic idea of this West Semitic root is "grasping securely," hence, it is found in parallel with verbs like 'āhaz "seize" (e.g. Prov 3:18).

The root is most frequently used in contexts that deal with moral matters or spiritual truths. To the former category belong most of the usages in Prov: The thinking son holds fast the wise words of his father (4:4). Indeed, all who lay hold on wisdom are happy (3:18). A humble man (29:23) and a gracious woman (11:16) attain honor, while a strong man lays hold on wealth (29:23). Unlike the virtuous woman who is praised for her industriousness (Prov 31:19), the steps of the adulteress lay hold on Sheol (5:5). While the wicked are held fast by their own sin (5:22), if the believer holds to God's paths (Ps 17:5) he shall have God's reward (Isa 33:15ff.).

The verb is also used of God's sovereign ordering of the affairs of history. He brings judgment where needed (Amos 1:5, 8) until he sends forth his righteous servant whom he will "uphold" in his just rule of the nations of the world (Isa 42:1).

Similarly in Ps 16:5 God "upholds" the Messiah (the form of the verb is an irregular active participle, or a mispointing for tōmēk).

R.D.P.

2521 תָּמַל (t'mōl), תָּמֹל (t'mōl), אֶתְמֹל ('etmōl), אִתְּמֹל (itt'mōl) **before, before that time, beforetime, heretofore, of late, of old, these days, time(s) past, yesterday.** (ASV similar, although reading "aforetime" in Josh 4:18; RSV similar, although reading "long" in Isa 30:33; "hitherto" in Ex 5:14; "the past" in Ex 21:29; "always" in I Sam 21:5 [H 6]; "some time past" in II Sam 3:17; and "formerly" in II Kgs 13:5.)

The word t'mōl and its derivatives signify "yesterday," but they are used in isolation only six times in that sense (I Sam 20:27; II Sam 15:20; Job 8:9; Ps 90:4; Isa 30:33; Mic 2:8; see also Sir 38:22). In all twenty-four occurrences they are combined with shilshôm "three days ago, the day before yesterday," in some fashion; cf., e.g., t'mōl shilshôm (Ex 5:8), literally "yesterday (and) the day before," idiomatically "formerly, recently, before." The phrase is an ancient one, appearing twice in a Canaanite Amarna letter of the fourteenth cen. B.C. as tumāl shalshāmi (cf. *Revue d'Assyriologie* [1922], p. 102, lines 14, 16). In OT poetic literature, t'mōl refers to the brevity and insignificance of life from man's standpoint (Job 8:9) and of time from God's standpoint (Ps 90:4).

R.F.Y.

2522 תָּמַם (tāmam) **be complete.**

Derivatives

- 2522a תָּם (tōm) **integrity.**
 2522b תָּמָה (tūmmā) **integrity.**
 2522c תָּם (tām) **perfect.**
 2522d תְּמִים (tāmīm) **complete.**
 2522e מָתָם (m'tōm) **entirety.**

tāmam may assume an auxiliary function, e.g. in Josh 3:16 the literal rendering, "They were complete, they were cut off," represents, "They were completely cut off."

With the verb's fundamental idea of completeness, Samuel inquired of Jesse, "Are here all (Heb hā-tammū) thy children?" (I Sam 16:11). Cf. tāmīm (the root tāmam's most common derivative), describing an entire day (Josh 10:13) or a whole, and therefore healthy, vine (Ezk 15:5). m'tōm indicates soundness of flesh (Ps 38:3). tāmīm delimits Israel's sacrifices, which were to be without blemish, perfect in that respect, so as to be accepted (Lev 22:21-22) as types of Christ, the spotless Lamb of God (I Pet 1:19). Speech which is tāmīm (Amos 5:10) corresponds to

"what is complete, entirely in accord with truth and fact" (BDB, p. 1071). Elihu was enabled to assure Job, "My words are not false; one who is perfect (*tāmim*) is with you" (Job 36:4), because of his inspiration by God, who is perfect (*tāmim*) in knowledge (37:16; cf. 32:8, 18; 33:4). In the fullest sense it is Yahweh's acts (Deut 32:4; II Sam 22:31 = Ps 18:30 [H 31] and law (Ps 19:7 [H 8] that are perfect.

tāmam moves naturally toward that which is ethically sound, upright (Ps 19:13 [H 14]). The "perfect" (*tāmim*) decision, as made by lots, is the correct one (I Sam 14:41). As made by men, it is the right one (Jud 9:16, 19). Asaph praised the completeness (*tōm*) or integrity of King David's heart (Ps 78:72). *tāmam* is used with the commandments of God meaning to fulfill them (Josh 4:10). The AV translates Job 22:3, "if you make your ways perfect." Abraham was instructed to be *tāmim* (Gen 17:1), as was all Israel (Deut 18:13; cf. II Sam 22:33; Ps 101:2a, 6). They were to be "wholly" God's; for, even here, "the words which are rendered in English by 'perfect' and 'perfection' denoted originally something other and less than ideal perfection" (IDB, III, p. 730).

From a concept of being "used up," as of money (Gen 47:15, 18), *tāmam* takes on the meaning of "come to a close, cease," as of a year (v. 18; cf. Ps 102:27 [H 28]). The verb denotes the finishing of various actions, such as building (I Kgs 6:22) or writing (Deut 31:24, 30). Finally, it refers to a people's destruction (Num 14:33).

Two problems of OT theology concern the verb *tāmam*: self-righteousness and perfectionism. Illustrating the former, David expresses the resolve, "I will walk within my house with a perfect (*tōm*) heart" (Ps 101:2b KJV, ASV; marg. and RSV, "in the integrity of my heart"); cf. his not infrequent professions of righteousness (Ps 7:8 [H 9]; 18:20). Yet the connection with NT Pharisaism remains one of "mere appearance" (KD, *Psalms*, I, p. 72). "Some of these utterances are no more than asseverations that the speaker is innocent of particular crimes laid to his charge; others are general professions of purity of purpose. . . . Those who make them do not profess to be absolutely sinless, but they do disclaim all fellowship with the wicked, from whom they expect to be distinguished in the course of Providence" (A. F. Kirkpatrick, *Cambridge Bible, Psalms*, I, p. lxxvii).

For the latter, other than in the above-listed passages referring to God himself, the OT resists claims to ultimate perfection. Noah was said to be *tāmim* "perfect" (Gen 6:9; NASB, "blameless in his time"). But compare Genesis 9:21-23 and even the creature "in Eden" (Ezk 28:13, whether Adam or Satan, see *sāṭan*) who was *tāmim* from his creation until unrighteousness was found in

him (v. 15), was by no means incapable of sin. Scripture's preeminent example of the *tām* "perfect" man, is Job (Job 1:1). He claimed to be *tām* (9:21-22) and *tāmim* (12:4) and held fast to his *tummā* "integrity" (27:5; 31:6), as recognized not only by his wife (2:9) but also by Yahweh in heaven (1:8; 2:3). In reference to the root meaning of *tāmam*, he was a "finished product," well rounded and balanced (IB, III, p. 909). Job, however, prefaced his own assertions by granting, "Though I be perfect, it (marg., he) shall prove me perverse" (9:20 ASV). He admitted his sins (7:20-21; 9:2, 15; 10:6; 14:16-17), even from his youth (13:26), confessed that he could not be held innocent (9:28), and ended by retracting his rash charges against God and by repenting in dust and ashes (42:6). As he explained, "If I have truly erred, my error lodges with me"; i.e. he was not guilty of the accusations made by his "friends" (22:6-9) and was *tāmim*, wholehearted in his commitment to the person and requirements of God.

tōm. Integrity. (In eleven of twenty-three usages); also strength, perfection (Isa 47:9; ASV, RSV translate "full measure"), or uprightness. The phrase *l' tōm*, concerning a soldier's bow, shot "at a venture" (I Kgs 22:34), literally (marg.) "in his simplicity," means unsuspectingly. The plural, *tummim* "perfections," describes the Thummin, the precious stones of Aaron's breastpiece (see *ūrim*).

tummā. Integrity. Appears five times in OT wisdom literature (e.g. Job 2:3; Prov 11:3).

tām. Perfect. So translated in nine of thirteen occurrences, many of which refer to the patriarch Job. Also means undefiled, upright. For young Jacob's identification as a "plain" man (Gen 25:27 KJV), the revised versions render *tām* as harmless (marg.), quiet.

tāmim. Complete. Refers to animals which are without blemish; also translated as such related adjectives as full, whole, upright, perfect. It represents the divine standard for man's attainment.

Bibliography: Deissley, A., "Perfection," in *Sacramentum Verbi*, II, 1970, pp. 658-63. Payne, J. B., *Theology of the Older Testament*, Zondervan, 1971, pp. 336-38. THAT, II, pp. 1045-50. J.B.P.

תָּמַם (*temes*). See no. 1223c.

- 2523 תמר (*tmr*). Assumed root of the following.
- 2523a תְּמָרָה (*tōmer*) *palm tree*.
 - 2523b תְּמָרָה (*tāmār*) *palm, palm tree*.
 - 2523c תְּמָרָה (*timōrā*) *palm tree*.
 - 2523d תִּמְרָה (*timārā*) *pillar*.
 - 2523e תְּמָרָר (*tamrūr*) *high leap* (Jer 31:21).

tômer. Palm tree. (ASV and RSV similar in Jud 4:5, but in Jer 10:5 ASV marg. has pillar and RSV has scarecrow.) Virtually all recent lexica and translations (BDB, KB, *The Amplified Bible*, *The Living Bible*, Moffatt, *The New English Bible*, and so forth) read "scarecrow" in Jer 10:5 on the basis of the parallel passage in the Apocryphal book of Baruch 6:70 (6:69 Gr.; = Epistle of Jer., verse 70 [verse 69 Gr.]), where the Gr. text uses the word *probaskanion*.

tāmār. Palm, palm tree. Among the tallest and most graceful of all trees found in the Middle East, the date palm, *Phoenix dactylifera*, performed numerous functions in OT times. It was used as a landmark (Jud 1:16), for shade and food (see Ex 15:27), as building material (Neh 8:15f.), and as a craftsman's model in adorning temples (1 Kgs 6:29; Ezk 40:16). [These "trees of life," as some think these palm trees were considered to be, were carved on the face of the pilasters and at the height of the wainscoting in the holy place (cf. Paul Leslie Garber, "A Reconstruction of Solomon's Temple," *Archaeological Discoveries in the Holy Land* (1967), pp. 101–11; cf. 1 Kgs 6:21–35. B.K.W.)] The palm was also a symbol of stateliness (Song 7:7 [H 8]) and prosperity (Ps 92:12 [H 13]).

timōrā. Palm tree. (ASV and RSV similar.) Used only in reference to architectural ornamentation.

timārā. Pillar. (ASV similar; RSV column.) Used only of a column of smoke in Song 3:6; Joel 2:30 [H 3:3].

R.F.Y.

תַּמְרוֹק (tamrûq). See no. 1246b.

תַּמְרוֹר (tamrûr). See nos. 1248l, 2523e.

תַּן (tan). See no. 2528a.

2524 תַּנָּה (tânâ) **I, hire.** (ASV and RSV similar.)

Derivative

2524a אֶתְנָה ('etnâ) **reward.** ASV and RSV "hire.")

The basic meaning of these words is "(to give/pay) the price demanded by a prostitute (for her services)." The word must be carefully distinguished from favorable words for hire, such as *sâkar*, *maškeret*, and *p'ullâ*. BDB posits two related roots for this group of words, *tny* and *tnn*, both of which it claims are akin to *ntn*. The root *yn/ntn* "to give/pay," may in fact be the ultimate origin of the group; KB, p. 101, states that 'entan (root *ntn*) is the forerunner of 'etnan, from which 'etnâ developed later. If so, *tânâ* could in turn have been derived as a denominative verb from 'etnâ. At any rate, most recent scholars assume a relationship with *ntn*, however distant. Perhaps we should also note Ezk 16:33 where *neden* and

neden (cf. Akkadian *nadānu* "ti give/pay," cognate to the Hebrew root *ntn*) are equivalent to 'etnan in 16:31, 34, 41.

The OT passages in which this group of words occurs (a) are always in contexts of condemnation and (b) always have spiritual considerations and/or ritual prostitution in view. Deuteronomy 23:18 [H 19] states that wages earned through prostitution were not to be brought as an offering to the house of the Lord. Micah 1:7 indicates that such wages (almost certainly from ritual prostitution in this case) will be destroyed by God. The words are used elsewhere in a figurative sense, usually of religious apostasy, in passages like Isa 23:17f. and Hos 8:9f. The blending of the literal and figurative meanings of these words is nowhere better illustrated than in Hos 2:12 [H 14] and its context, where Gomer's unfaithfulness to Hosea is a striking paradigm of Israel's unfaithfulness to God.

2525 *תַּנָּה (tânâ) **II, recount, rehearse.** Occurs only in the Piel (Jud 5:11; 11:40).

תַּנוּחָה (t'nu'â). See no. 1317a.

תַּנוּכָה (t'nu'bâ). See no. 1318c.

תַּנוּךְ (t'nu'k). See no. 2527a.

תַּנוּמָה (t'nu'mâ). See no. 1325b.

תַּנוּפָה (t'nu'pâ). See no. 1330b.

2526 תַּנּוּר (tannûr) **furnace, oven.** (ASV and RSV similar, although RSV renders "fire pot" in Gen 15:17.)

The word denotes basically the relatively small and sometimes portable stove or oven rather than the larger furnace. Constructed of clay and often sunk into the ground, they had a cylindrical or beehive shape and were two to three feet in diameter. (Similar ovens are still made and used today in the hinterlands of Palestine.) Bread and other foods were baked in them (Lev 2:4; 7:9; 26:26; cf. also 11:35 and Ex 8:3 [H 7:28]), and apparently a special area in the northwest sector of ancient Jerusalem was reserved for the bakers of the city, because it was defended by the Tower of the Ovens (Neh 3:11; 12:38). In Gen 15:17 a smoking oven and flaming torch represent the presence of God in a fiery theophany. The heat of an oven is used as a simile of anger and passion in Hos 7:4, 6–7 and of destructive famine in Lam 5:10. The fires of divine judgment are represented by a blazing oven in Isa 31:9 and Mal 4:1 [H 3:19]; (cf. also Sir 48:1), as well as in Ps 21:9 [H 10], with which G. R. Driver compares an Old Babylonian parallel (in *Archiv für Orientforschung* 18:129).

R.F.Y.

2527 תָּנָךְ (*tnk*)

תַּנְחֹם (*tanhûm*). See no. 1144d.
תַּנִּיךְ (*tannin*). See no. 2528b.

2527 תָּנָךְ (*tnk*). Assumed root of the following.

2527a תַּנְדָּה (*t'nûk*) *tip*, i.e. *lobe of ear*
(Ex 29:20; Lev 8:23,24; 14:14, etc.)

2528 תַּנּוּ (*tnn*) I. Assumed root of the following.

2528a תָּנִי (*tan*) *dragon, whale*.

2528b תַּנִּיךְ (*tannin*) *dragon, sea monster*.

tan. *Dragon, whale.* (ASV, RSV and NIV "jackal," except in Ezk 29:3; 32:2, where ASV and NIV read "monster" and RSV reads "dragon.") The word *tan* is attested only in various pl. forms, the most common being *tannim*, which was translated by KJV throughout the OT as "dragon, whale" through confusion with the unrelated sing. form *tannin* "sea monster" (q.v.). The same confusion exists in the Masoretic text itself in Ezk 29:3; 32:2, where the context demands that *tannim* be rendered "sea monster" or the like. The jackal (*Canis aureus*), a scavenger that feeds on carrion, was often observed in the OT period as roaming about in the ruins of abandoned cities and so was almost always used as a symbol of desolation and of divine judgment against sinful nations and individuals.

tannin. *Dragon, sea monster, serpent, whale.* (ASV and RSV similar, although ASV never renders "dragon" or "whale" and sometimes reads simply "monster"; RSV never uses "whale"; ASV and RSV both read "jackal," at Neh 2:13 and Lam 4:3.) The word denotes "any large reptile" (Ex 7:9, ASV marg.) and is twice spelled *tannim* in the Masoretic text (Ezk 29:3; 32:2), apparently through confusion with the plural of *tan* "jackal" (so BDB). In Lam 4:3 the context demands "jackals" for *tannin*; the Qere, in fact, reads *tannim*. If the spring mentioned in Neh 2:13 was named after jackals that drank there (so ASV and RSV), *tannin* in that passage would be an Aramaized pl.; LXX translates there *tôn sykôn* "of the fig trees," possibly from a Hebrew text that read *t'nym*. Referring to anything from large snakes (Ex 7:9–10, 12; Deut 32:33; Ps 91:13) to enormous sea creatures (Gen 1:21; Ps 148:7), *tannin/m* is also often used in a figurative sense to denote God's most powerful opponents, whether natural (Job 7:12) or national (Babylon: Jer 51:34; Egypt: Isa 51:9; Ezk 29:3; 32:2; see especially A. Heidel, *The Babylonian Genesis*, pp. 102–14). Ugaritic *tnn* refers to a mythological sea monster, and certain passages in which it occurs bear strong resemblances to OT passages mentioning *tannin*, including Ps 74:13f. and especially Isa 27:1 (cf. ANET, p. 138). If, as seems likely, the OT writers used such motifs of the Canaanite poets, they did so only in a literary and thoroughly demythologized (in the best sense!)

way to highlight the fact that the one true God always defeats all his enemies (see J. Bright, *The Authority of the Old Testament*, pp. 129, 178–80).

More particularly, Israel's poets used this imagery to show the LORD's power in history over his political enemies (Jer 51:34; Isa 51:9), and after history over the ultimate spiritual power (Isa 27:1; cf. Rev. 12, 13). On the subject of the biblical use of mythological allusions, see the judicious remarks of M. Dahood, in AB, *Psalms I*, p. xxxv., also Smick, E. B., "Mythology and the Book of Job," JETS 13: 101–108.

R.F.Y.

2529 תַּנּוּ (*tnn*). II. Assumed root of the following.

2529a אֶתְנַן (*'etnan*) *hire of prostitute*
(e.g. Ezk 16:34, 41; Isa 23:18). A by-form of *'etnâ* (q.v.).

תַּנְשֵׁמֶת (*tanshemet*). See no. 1433b.

2530 *תָּעַב (*tā'ab*) *abhor* (Piel), *be abominable* (Niphal), *do abominably* (Hiphil). Does not occur in the Qal. A denominative verb.

Parent Noun

2530a תּוֹעֲבָה (*tō'ēbâ*) *abominable* (custom, thing).

The ASV and RSV translate this verb similarly, although RSV renders "loathe" in Isa 14:19; Ps 107:18 and "prostitute" in Ezk 16:25. Attested twenty-two times in the OT, *tā'ab* never occurs in the Qal stem. The alternate spelling *tā'ab* appears in the Piel in Amos 6:8.

Since it never appears in the Qal stem, perhaps the verb is derived from the noun rather than vice versa (so BDB), since the Piel is frequently a denominative stem. Its basic meanings in the Piel are "abhor, loathe" in a physical sense (Job 9:31; 19:19; 30:10; Ps 107:18) and "detest, exclude" for ritual or ethical reasons (Deut 7:26; 23:7 [H 8]). Often the two meanings coalesce (Amos 5:10; Mic 3:9); in any event, the subject may be either God (Ps 106:40) or man (Isa 49:7). In the Hiphil, the verb means "commit abominable/detestable deeds" (I Kigs 21:26; Ps 14:1; 53:1 [H 2]; Ezk 16:52), while in the Niphal it means "be loathesome, detestable" (I Chr 21:6; Job 15:16; Isa 14:19).

tō'ēbâ. *Abominable (custom, thing), abomination.* (ASV and RSV similar, although RSV reads "thing of horror" in Ps 88:8 [H 9] and inexplicably omits the word entirely in Ezk 16:36.) The frequency of this word attests to its importance; it occurs 117 times in all. (For the notorious "abominations of desolation," see under the root *shāqas*.)

The nuances of *tô'ēbā* are numerous indeed (for the most complete recent study of both the noun and the verb, cf. P. Humbert, "Le substantif *tô'ēbā* et le verbe *t'b* dans l'Ancien Testament," ZAW 72:217–37). As with the verb, so also with the noun the abomination may be of a physical, ritual or ethical nature and may be abhorred by God or man. Sharing a meal with a Hebrew was ritually offensive to an Egyptian (Gen 43:32), as was offering certain kinds of sacrifices (Ex 8:22). Homosexuality and other perversions are repugnant to God and fall under his judgment (Lev 18:22–30; 20:13). Idolatry (Deut 7:25), human sacrifice (Deut 12:31), eating ritually unclean animals (Deut 14:3–8), sacrificing defective animals (Deut 17:1), engaging in occult activities (Deut 18:9–14), conducting one's business dishonestly (Deut 25:13–16), practicing ritual prostitution (1 Kgs 14:23f.), and similar acts of disobedience (for seven more abominations, see the list in Prov 6:16–19) were sure to bring God's wrath on those who perpetrated them. Twelve times the book of Proverbs uses the phrase, "is an abomination to the LORD." In Ps 88, a prayer for help written by a man close to death, the physically repulsive appearance of a *tô'ēbā* is stressed; the man's former friends avoid him because they consider him to be a thing of horror (Ps 88:8 [H 9]).

Sometimes *tô'ēbā* is used as a synonym for "idol," as in Isa 44:19, or even for a specific pagan deity, as in II Kgs 23:13 where Milcom is called "the abomination of the Ammonites," parallel to "Ashtoreth the abomination (*shiqqûs*) of the Sidonians" and "Chemosh the abomination (*shiqqûs*) of Moab." At the other end of the spectrum, even prayer is an abomination if offered by one who refuses to obey God's Word (Prov 28:9).

Whereas *tô'ēbā* includes that which is aesthetically and morally repulsive, its synonym *sheqes* denotes that which is cultically unclean, especially idolatry.

Bibliography: THAT, II, pp. 1051–54.

R.F.Y.

2531 תָּעָה (*tā'ā*) *err, wander, go astray*.

Derivative

2531a תֹּעֵה (*tô'ā*) *error*.

The verb *tā'ā* means "err, stagger, stray, wander." It occurs most frequently in the Qal stem but also appears twice in the Niphal (Job 15:31; Isa 19:14) and often in the Hiphil (with its normal causative stress). *tā'ā* attested only in Ezk 13:10 (Hiphil), is probably a secondary formation from this root.

It is possible to wander in a physical sense (cf., e.g., Gen 21:14), to stagger because of drunkenness (cf. Isa 28:7), and to err or stray mentally,

morally, or spiritually (Ps 95:10 and often). In Ps 58:3 [H 4] it is said of the wicked that they go astray from the very moment they are born. The most familiar passage in which *tā'ā* appears is Isa 53:6, where the physical and spiritual nuances blend beautifully: "All we like sheep have gone astray..." Whereas in the past Israel's shepherds led them astray (Jer 50:6), in the future the son of David will be their shepherd (Ezk 14:11).

tô'ā. Error (Isa 32:6; ASV and RSV similar), hinder (Neh 4:8 [H 2]; ASV and RSV "confusion"). The noun clearly carries the same basic meanings as the verb.

2532 *תָּעַטַּע (*tā'a'*) *deceive* (Pilpel), *misuse* (Hithpalpel). Does not occur in the Qal.

Derivative

2532a תַּעֲתִימִים (*ta'tū'im*) *errors*.

The verb means "mock" and appears only twice in the OT. In Gen 27:12, Jacob fears that Isaac will think he is mocking him if he pretends to be Esau. In II Chr 36:16, the people of Judah are criticized for having ridiculed the prophets; in the same verse, two other verbs meaning respectively "mock" and "despise" are used.

ta'tū'im. Errors. (ASV and RSV "delusion"; ASV marg. "mockery" in Jer 10:15.) This abstract plural noun means "mockery" and likewise appears only twice (Jer 10:15 = 51:18). Used in the phrase "work of delusion," it is an epithet of an idol in parallelism with *hebel*, "worthlessness, insubstantiality." As such, idols delude men and mock God.

2533 תִּפְיִינִים (*tūpînim*) *broken pieces*. Used only in Lev 6:14 [H 21]. Meaning dubious.

2534 *תָּפַל (tāpal)

2534 *תָּפַל (tāpal) *I, show oneself unsavoury* (Hithpael, only).

Derivatives

2534a תָּפַל (tāpēl) *foolish* (Lam 2:14; Job 6:6, only).

2534b תִּפְלָה (tiplā) *folly*.

The verb is found only in II Sam 22:27, and since the corresponding verse in Ps 18 exhibits the root *pātal* (Ps 18:26 [H 27]) instead of *tāpal*, perhaps we should assume that *pātal* was the original root in II Sam also (cf. ASV, RSV, and *Englishman's Hebrew and Chaldee Concordance*, p. 1055). In any event, *tāpal* I should be distinguished from *tāpal* II, the root of *tāpēl* "untempered (mortar)" (ASV similar; RSV "whitewash"; so also in Ezk 22:28 ASV marg.).

The root *tpl* I and its derivatives have "folly, foolishness" as their basic meaning but as Jer 23:13 shows, the folly is sinful folly, not mere mental weakness. The classic treatment of this important OT concept, as well as of many other Heb. words so rendered, is still that of Geerhardus Vos in HDB, II, pp. 43f. It is possible that Ahithophel *āhitōpel*, David's counselor, now trusted, now treacherous, means "(My) Brother Is Folly" or "Brother of Folly" (see especially II Sam 15:31).

tiplā. *Folly, foolishly.* (ASV similar; RSV reads "wrong" in Job 1:22, "unsavory thing" in Jer 23:13, and revocalizes as *t'pillā*, prayer, in Job 24:12, but without sufficient justification.) Attested only three times.

R.F.Y.

2535 תָּפַל (tpl) II. Assumed root of the following.

2535a תָּפַל (tāpēl) *whitewash* (Ezk 13:10, 11, 14, 15; 22:28).

The meaning is uncertain. Some think it is the poor quality mortar that contributes to the downfall of a wall (KJV); others say it is the whitewash that covers over the wall's defects (RSV, NASB, NIV).

R.F.Y.

תִּפְלָה (t'pillā). See no. 1776a.

תִּפְלֶשֶׁת (tipleset). See no. 1778c.

2536 תָּפַח (tāpap) *play the timbrel*. Denominative verb.

Parent Noun

2536a תָּפֹחַ (tōp) *timbrel, tambourine*.

tāpap is attested only twice. It is probably derived from *tōp* (so BDB, KB); see S. B. Finesinger in HUCA 3:64. In Ps 68, it means "beat (a tambourine)," in Nah 2 "beat (one's breast)."

tōp. Tabret, timbrel. (ASV similar; RSV "tambourine, timbrel" and, in Ezk 28:13, "setting.") The noun *tōp* is a general term for tambourines and small drums (the most common instruments of percussion in ancient times), examples of which have been found in Egyptian and Mesopotamian excavations. Often, though not always (cf., e.g., I Sam 10:5), used by women, they appear in contexts of merriment (Gen 31:27; II Sam 6:5; I Chr 13:8; Job 21:12; Isa 5:12; 24:8; Jer 31:4), victory in battle (Ex 15:20; Jud 11:34; I Sam 18:6; Isa 30:32), and, most importantly, praise to the Lord. However the timbrel is not among the instruments mentioned in Chr with the others prescribed for the temple worship (I Chr 15:16-24; 16:4-6, 42; 25:1-6). Only in the procession that brought the ark to Jerusalem were drums used (I Chr 13:8) and in three of the Pss (Ps 81:2 [H 3]; 149:3; 150:4). In Job 17:6, KJV "tabret" (for Hebrew *tōpet*, probably from the root *twp*, is better rendered "spit" in context [so ASV, RSV, BDB, KB]).

R.F.Y.

2537 תָּפַר (tāpar) *sew together* (e.g. Gen 3:7; Job 16:15).

2538 תָּפַס (tāpaš) *catch, handle, lay hold*.

This verb appears forty-nine times in the Qal stem and fifteen times in the Niphal. It is also attested once in the Piel, in Prov 30:28, where, in light of context, we should probably read, "You can take a lizard in your hands" (cf. ASV marg., RSV, BDB).

The verb means basically "seize, take hold of," sometimes preparatory to further action. It is therefore often used of capturing people (II Kgs 14:13) or towns (Josh 8:8), or of grasping weapons (Amos 2:15) to use them or musical instruments (Gen 4:21) to play them. It also thus has the figurative sense of "being expert/skilled in" the law (Jer 2:8) or warfare (Num 31:27). In fact, the figurative uses of the verb are in many respects the most interesting. In Ps 10:2, the wicked are said to be caught in their own schemes, while in Ezk 14:5 the Lord expresses his intention to seize or terrorize the hearts of his idol-worshipping people. Prov 30:9 warns against seizing or profaning the name of God and is an excellent example of how OT wisdom literature presupposes the Mosaic legislation (Ex 20:7; Lev 19:12; Deut 5:11).

R.F.Y.

2539 תָּפֶת (tōpet) *Topheth* (II Kgs 23:10), *Tophet* (Jer). (ASV and RSV always "Topheth.")

An alternate form, *topteh*, is found in Isa 30:33, where KJV renders "Tophet," ASV and RSV

marg. "Topheth," and RSV "burning place." For *tōpet* I, "spit" (Job 17:6 ASV RSV: "tabret"), see under *tāpap*.

The name "Tophet" referred to a place in the Valley of the Son(s) of Hinnom (II Kgs 23:10; Jer 7:31f.; 19:6) where children were burned to death as an offering to pagan deities. More specifically, it was a "high place" (Jer 7:32), an open-air shrine, located most probably at a point outside the southern end of Jerusalem where the Hinnom Valley meets the Kidron Valley in the vicinity of Akeldama, the "Field of Blood" (Acts 1:19; see J. Simons, *Jerusalem in the Old Testament*, pp. 12, 230). Jeremiah's reference to the "valley of the dead bodies and the ashes" (Jer 31:40) perhaps relates to the horrible practice of child sacrifice at Tophet. Since the Hebrew word for "place," *māqōm*, is often used as a technical term for "shrine" (BDB), it is likely that the "place of Tophet" (Jer 19:13) should be rendered "(pagan) shrine of Tophet." The place itself was probably a deep, wide pit containing a bonfire of blazing wood (Isa 30:33) into which the hapless children were thrown. From the abbreviated name "Valley of Hinnom" (see especially Josh 15:8; 18:16), Hebrew *gē-hinnōm*, so infamous that it could also be called simply "the Valley" (Jer 2:23), came Gehenna, Greek *geenna* (for complete discussion see TDNT, I, pp. 657f.), the NT word used to describe the place of eternal, fiery punishment for all who die without having exercised faith in Christ.

The origin of the word "Tophet" is obscure (for various theories, see W. Robertson Smith, *Lectures on the Religion of the Semites*, revised edition, p. 377, note 2; W. F. Albright, *Yahweh and the Gods of Canaan*, p. 275). The word itself is often used as a common noun meaning "place of child sacrifice" (cf. Albright, *op. cit.*, pp. 237f.; A. Menen, *Cities in the Sand*, pp. 56–63). Its vocalization may be original (note the alternate form *topteh*), although most commentators assume an intentional scribal change to that of *bōshet* "shame."

Child sacrifice among the ancient Israelites, though presumably infrequent, was nevertheless common enough to warrant its absolute prohibition in the Mosaic laws (Lev 18:21; Deut 18:10). In spite of the Lord's stern warnings, both Ahaz (II Chr 28:3) and Manasseh (II Kgs 21:6) burned their sons as offerings. Such burning was usually "to Molech" (e.g., II Kgs 23:10), which may mean either "to (the Ammonite god) Milcom/Molech" (see I Kgs 11:5, 7) or "as a sacrifice" (see conveniently Albright, *op. cit.*, p. 236); in any event, "Molech" may be another example of deliberate scribal alteration to the vocalization of *bōshet*.

Understandably, Jeremiah inveighed against the abominable practice of child sacrifice at

Tophet in the Hinnom Valley and predicted divine judgment on those involved in perpetrating it (Jer 7:31–34; 19:1–15). His contemporary, good King Josiah, defiled Tophet so that no one could ever practice the rite there again (II Kgs 23:10).

De Vaux gathers the evidence on child sacrifice (AI, pp. 441–46) and concludes that it originated in Canaanite culture, was extensively practiced in Carthage and "made its way into Israel from Phoenicia during periods of religious syncretism" (p. 446). It evidently was not a normal sacrifice, but one reserved for times of national emergency even at Carthage. Albright (*op. cit.*) remarks that the practice was extensive in the Phoenician colonies, but it diminished in Phoenicia itself, and he attributes this to the salutary influence of Israel's religion.

2540 תָּקַעַ (tāqan) **become straight** (Eccl 1:15; 7:13; 12:9).

2541 תָּקַעַ (tāqa') **blow, clap, strike, sound.**

Derivatives

- 2541a תָּקַעַ (tēqa') **sound** (Ps 150:3).
 2541b תְּקוּעַ (tāqōa') **trumpet** (Ezk 7:14).

tāqa' is attested sixty-six times in the Qal stem and three times in the Niphal. The verb bears three distinct but related meanings: (1) "thrust, pound"; (2) "blow (a horn)"; (3) "clap (hands)." Trumpets were blown to convene people (Num 10:2), to sound an alarm (Jer 6:1; note the pun with the place name Tekoa [תְּקוּעַ]), and as a sign of rejoicing (II Chr 23:13) or triumph (Josh 6:20). Clapping the hands was also a sign of joy (Ps 47:1 [H 2]) or triumph (Nah 3:19), and striking hands with someone else (serving a function similar to our handshake) signified pledging oneself as collateral in a business arrangement (Job 17:3; Prov 6:1; 11:15; 17:18; 22:26).

R. F. Y.

2542 תָּקַעַ (tāqēp) **prevail against.** (ASV and RSV similar.)

Derivatives

- 2542a תָּקַעַ (tōqep) **authority, power, strength.** (ASV and RSV similar.)
 2542b תַּקִּיפִי (taqqīp) **mighty.** (ASV similar; RSV "strong.")

2543 תִּרְגָּם (*tirgēm*)

The verb and noun appear three times each; the adjective is attested only once. Each of the three words has its corresponding cognate form in OT Aramaic and appears there with similar meanings. The Hebrew verb signifies "overpower," whether God over man (Job 24:20), one man over another (Eccl 4:12), or distress and anguish over the wicked (Job 15:14). The noun refers to the "power" or "authority" of a kingdom (Dan 11:17) or a ruler (Est 9:29; 10:2). Commentators are generally agreed that the unexpressed subject of the adjective in Eccl 6:10 is God; the verse, then, emphasizes the fact that God is mightier than man.

R.F.Y.

תִּר (tôr). See nos. 2500a,c.

תִּרְבּוּת (*tarbût*). See no. 2103e.

תִּרְבִּית (*tarbit*). See no. 2103f.

2543 תִּרְגָּם (*tirgēm*) *interpret*. (ASV and RSV marg. "set forth"; RSV "translate.")

The verb is a quadriliteral and is found only once in OT (Ezr 4:7) in a form constructed analogously to the Pual participle: *m' turgām*. Though often related to Akkadian *ragāmu* "shout," and Ugaritic *rgm* "speak," the Hebrew word is perhaps best described as denominative from Akkadian *targumānu* "interpreter, translator" (so KB), which in turn is probably derived from Hittite (cf. C. Rabin in *Orientalia* 32: 134–36). The function of the verb in Ezr 4:7 is to introduce the longer of the two Aramaic sections in the book of Ezr (4:8–6:18; 7:12–26). Aramaic was the *lingua franca* of the middle east during the post-exilic period and was therefore used in correspondence between rulers of various countries. The verb *tirgēm* was later employed in midrashic literature in the threefold sense of "recite, translate, interpret" (cf. M. Gertner in *Bulletin of the School of Oriental and African Studies* 25:17) and appears today in the modified form "dragoman" to refer (among other things) to an Egyptian tourist guide, one who "explains," or "interprets" Egyptian sites and ways to his clients. Oral (beginning in postexilic times) and written (beginning in pre-Christian times as the Targum of Job from Qumran shows) Aramaic paraphrases of the OT are known as "targums" or "targumim," and their importance for fuller understanding of the NT is only now being investigated adequately (cf. M. McNamara, *Targum and Testament*).

Bibliography: Levey, Samson H., *The Messiah, An Aramaic Interpretation: The Messianic Exegesis of the Targum*, Cincinnati: Hebrew Univ College-Jewish Institute of Religion, 1974. For the Targum of Job see Van der Ploeg, J.P.M.,

and Van der Woude, A. S., *Le Targum de Job de la Grotte XI de Qumran*, Brill, 1970.

תִּרְמָה (*t' rûmā*). See no. 2133i.

תִּרְמִית (*t' rûmît*). See no. 2133j.

תִּרְשָׁה (*t' rû'ā*). See no. 2135b.

2543.1 תִּרְזָה (*tirzā*) *cypress*. Meaning and derivation uncertain.

תִּרְמָה (*tormā*). See no. 2169c.

תִּרְמִית (*tarmît*). See no. 2169d.

2544 תִּרְוֹ (*tören*) *mast* (Ezk 27:5; Isa 30:17; 33:23).

תִּרְעֵלָה (*tar'ēlā*). See no. 2188c.

2545 תִּרְפִּים (*t' rāpīm*) *idolatry, idols, image(s), teraphim*. (ASV only "teraphim"; RSV similar to KJV, although rendering "household gods" in Gen 31.)

Attested fourteen times in OT, the word *t' rāpīm* is a plural noun, probably of Hittite origin (so H. A. Hoffner, Jr., in *Bibliotheca Sacra* 124:230–38, and in JNES 27:61–68). In all but one somewhat ambiguous context (I Sam 19:11–17), it is clear that the teraphim of ancient Israel were pagan household idols (cf. Gen 31:19 with 31:30, 32; Jud 18:17 with 18:24), corresponding in many respects to the contemporary *ilānu* ("gods") of Nuzi (cf. A. E. Draffkorn in JBL 76:216–24) as well as to the Roman *Penātēs* of much later times. Their primary function among the apostate element in Israel's population seems to have been that of divination (I Sam 15:23; II Kgs 23:24; Ezk 21:21 [H 26]; Zech 10:2), in which role they are often found in context with the ephod (see Jud 17:5; 18:14, 17, 18, 20; Hos 3:4). They were probably of Mesopotamian origin (Gen 31:19–21; Ezk 21:21 [H 26]) and make their appearance throughout the entire sweep of Israelite history, from the patriarchal (Gen 31) to postexilic (Zech 10:2) periods.

Since the discovery and interpretation of certain cuneiform legal documents (notably the one designated as *Gadd 51*) at the ancient site of Nuzi beginning in 1926, it has become a commonplace to assert, on the basis of such texts, that Rachel stole Laban's teraphim (Gen 31:17–50) in order to guarantee Jacob's title to Laban's inheritance after the latter had died or, at least, to secure for Jacob clan leadership and spiritual power (see, conveniently, C. H. Gordon, *The World of the Old Testament*, pp. 129f., and in BA 3:5–7). While this view of the matter is intriguing, Nuzi law implies that bequeathal, rather than mere

possession, of the household gods determined family leadership. Due to this and other difficulties with the Nuzi theory, it has been suggested that Rachel, not yet fully separated from her polytheistic heritage (see Gen 35:2; Josh 24:2), stole the gods for religious or divinatory purposes. Support for this possibility may be adduced from Jos who, in his *Antiquities* (18. 9. 5), states that it was customary even in much later times for inhabitants of Mesopotamia to carry their household gods along with them wherever they traveled (cf. M. Greenberg in JBL 81:239–48—though this very late witness may be merely a deduction from Gen).

Still unsolved is the problem of the nature of the teraphim in I Sam 19:11–17. It is scarcely possible that the word (used as a singular; cf. KJV, RSV "image") there refers to household deities, since archaeologists have found no such images that even begin to approach the size of a full-grown man (cf. W. F. Albright, *Archaeology and the Religion of Israel*, p. 114; cf. also Gen 31:34, where at least two teraphim could be hidden in a saddle). It has therefore been suggested that sometimes the word *ṭ-rāpīm* refers to an image in the shape of a head, bust, or cultic mask (cf. A. R. Johnson, *The Cultic Prophet in Ancient Israel*, p. 31, note 3), or, alternatively, that Michal's teraphim were "old rags" (W. F. Albright, op. cit., p. 207, note 63). The size and even meaning and use of teraphim may have varied widely over the centuries.

Needless to say, teraphim were never condoned in the OT as legitimate appurtenances to the worship of the Lord; in fact, they came under frequent prophetic condemnation (I Sam 15:23; II Kgs 23:24; Zech 10:2).

R.F.Y.

2546 תִּרְשִׁישׁ (*tarshish*) I, *precious stone*, perhaps yellow jasper (e.g. Ex 28:20; 39:13; Ezk 1:6).

2547 תִּרְשִׁישׁ (*tarshish*) II, *Tarshish, Tarshish*. (ASV and RSV only "Tarshish.")

This place name, which occurs twenty-six times in OT, must be carefully distinguished, on the one hand, from the personal name Tarshish (used of two different people: I Chr 7:10; Est 1:14) and, on the other hand, from the common noun *tarshish* I, a precious stone of uncertain identity.

Tarshish was presumably a town situated somewhere along the Mediterranean coastline or on an island in the Mediterranean. Sites all the way from Tarsus in the east (Asia Minor) to Tarrus in the west (Spain) have been suggested, with recent proposals concentrating on a more central location, such as Tharros in Sardinia (cf.

especially W. F. Albright, *Yahweh and the Gods of Canaan*, p. 219 and note 30; Y. Aharoni in *The Macmillan Bible Atlas*, p. 75). Its island/coastland associations are stressed in passages like Ps 72:10 and Isa 23:6, while its great distance from Palestine is emphasized in Isa 66:19 and Jon 1:3; 4:2. That it was related at least commercially to the islands of the eastern Mediterranean is indicated in Gen 10:4 and I Chr 1:7. If the Targumic reading "Italia" for "Kittim" in I Chr 1:7 reflects an accurate historical memory, the likelihood of the Sardinia location is enhanced.

It is entirely possible, of course, that more than one place was named Tarshish, particularly if the word itself originally meant "refinery" or the like, as W. F. Albright has argued (see conveniently Albright, *Archaeology and the Religion of Israel*, p. 136). We read often in the OT of "ships of Tarshish" which were large, oceangoing vessels (Ezk 27:25) that carried all sorts of precious cargo, especially metals such as silver and gold (I Kgs 10:22; 22:48 [H 49]; II Chr 9:21; Isa 60:9; Jer 10:9; Ezk 38:13) as well as iron, tin, and lead (Ezk 27:12). Tarshish, then, could have been or become a kind of generic name for places where metals were mined or smelted. Needless to say, a "ship of Tarshish" does not necessarily mean only a ship made at a place called Tarshish; it could also be simply any ore-carrying vessel, if the etymology proposed above is correct. Their Phoenician connections (I Kgs 10:22; II Chr 9:21; see also the oracles against Tyre in Isa 23 and Ezk 27) indicate that such vessels plied the Mediterranean, while II Chr 20:36 explicitly states that "ships to go to Tarshish" were constructed at Eziongeber (at the northern end of the Gulf of Aqaba), which engaged in trade to the south and east.

Ships of Tarshish, whether lying at anchor or heading out to sea, must have presented an imposing appearance indeed. But because of sinful pride on the part of their owners, those magnificent vessels were destroyed as one aspect of God's judgment (I Kgs 22:48 [H 49]; II Chr 20:37; Ps 48:7 [H 8]; Isa 2:16).

R.F.Y.

2548 תִּרְשָׁתָא (*tirshātā'*) *Tirshatha*. (ASV and RSV "governor.")

The word is attested five times in the OT (only in Ezr and Neh) and is always preceded by the definite article. It is a noun of Persian derivation meaning approximately "(His) Excellency, (His) Honor." A comparison of Neh 8:9 with 12:26 demonstrates that it is the Persian functional equivalent of *pehā* "governor," a noun of Akkadian derivation that appears in the latter verse. Nehemiah himself is the *tirshātā'* in Neh 8:9 and 10:1 [H 2]; an unnamed individual bears the title

in Ezr 2:63 and Neh 7:65, 69. If the latter was a native Persian, it is noteworthy that he nevertheless concerned himself with religious as well as political matters among a people some of whom were unable to prove their Israelite ancestry. Nehemiah's own role as governor likewise did not prevent him from taking an active part in the spiritual life of his people. To this day, he serves as a parade example of a dedicated political leader who, though bearing an alien title, acted uncompromisingly whenever and wherever spiritual issues were at stake.

R.F.Y.

2549 תַּרְתָּן (*tartān*) *Tartan*. (ASV similar; RSV "the Tartan," "the commander in chief.")

The KJV understood the word as a personal name, but recent research has shown it to be a military title (cf. ASV marg. at II Kgs 18:17 and Isa 20:1, the only two places in OT where the word appears). The term was borrowed from Akkadian *tartānu* "army commander"; its alternate Akkadian spelling *turtānu*, is reflected in the consonantal reading *twrtn* in Isa 20:1 on the great Isaiah scroll found in Qumran Cave One near the shores of the Dead Sea in 1947. The *tartān* was a very high official in the royal court of Assyria during the days of Sargon II (722–705 B.C.; see Isa 20:1) and Sennacherib (705–681 B.C.; see II Kgs 18:17) as well as under earlier Assyrian rulers,

although it cannot be said that he was "second" in command to the king (the word is unrelated etymologically to Akkadian *terdennu* "second [in age or rank]"). Rarely did an Assyrian king entrust his entire army to the command of a *tartān*, who might then institute a rebellion and assume absolute power; usually the rank of *tartān* was held by two men, each of whom commanded no more than half the army (A. L. Oppenheim, *Ancient Mesopotamia*, p. 102). The names of the two Assyrian army commanders mentioned in OT are not recorded, perhaps as a subtle reminder that prominence in the eyes of men is not necessarily the result of the directive will of our God.

תְּשֻׁרָה (*t'shūrā*). See no. 2353a.

2550 תֶּשַׁע (*tēsha'*) *nine*.

2551 תְּשִׁיעִי (*t'shi'i*), תְּשִׁיעִי (*t'shi'i*), תְּשִׁיעִית (*t'shi'it*) *ninth*.

2552 תִּשְׁעִים (*tish'im*) *ninety*.

ARAMAIC

THE ARAMAIC WORDS

The Aramaic vocabulary herewith is given brief treatment which, it is hoped, will still be helpful. Five important roots which are of special significance and which differ from the Hebrew are given fuller treatment. Most of the Aramaic words are already implicitly treated in discussion of their Hebrew cognates. References to these cognates are usually given if applicable. The longer articles are signed by Charles D. Isbell; the balance of the material was taken from BDB with some comments and expansion by R. Laird Harris.

Biblical Aramaic is a close sister to Biblical Hebrew. For the uninitiated, it may be helpful to say that the Aramaic noun has a definite form usually ending in Qames Aleph (א,) which closely approximates the meaning of the Hebrew noun with the definite article. The form without this definite suffix is the one given in the Wordbook. Also, the verb conjugation is very similar, but the vocalization of the stems varies somewhat from the Hebrew. The Hebrew Qal, Piel and Hiphil stems are matched by the Peal, Paal and Haphel (*q^eṭal*, *qatṭal* and *Haqṭel*). These also have reflexive/passive stems beginning with the prefix *hit*. There is no Niphal. These verb forms are referred to occasionally in the following treatment.

For brevity of treatment and because there are numerous loan words in BA, roots are not usually assumed where the verbs are lacking unless two or more derivatives occur. Also, in view of the smaller vocabulary, cross references are more sparing where the words concerned are close in spelling (especially when the variation concerns Aleph and Hē) and are practically adjacent in the listing.

- 2553 אב ('*ab*), אבא ('*abbā*') *father*. See Hebrew no. 4a.
- 2554 עֵב ('*ēb*) *fruit* (Dan 4:9, 11, 18, 'inbeh "its fruit"). See Hebrew no. 1a.
- 2555 אָבַד ('*abad*) *perish*. Usage similar to Hebrew.
- 2556 עֵבֶן ('*eben*) *stone*. Usage similar to Hebrew.
- 2557 אִגְרָה ('*igg^erā*) *letter*. Usage similar to Hebrew 'igget.
- 2558 אֶדַיִן ('*edayin*) *then, thereupon*. Cognate to Hebrew 'az. Used also with prepositions *b^e* and *min* (meaning "since").
- 2559 אָדָר ('*ādār*) *Adar*. The twelfth Babylonian month. Used also in Hebrew.
- 2560 אִדָּר ('*iddar*) *threshing floor*. Not found in Hebrew. Possibly a loan word.
- 2561 אֶדְרָגָזָר ('*ādargāzar*) *counselor*. Loan word from Persian. Occurs only in Dan 3:2, 3.
- 2562 אֶדְרַזְדָּא ('*adrazdā*') *correctly, earnestly*. Loan word from Persian. Occurs only in Ezr 7:23.
- אֶדְרַע ('*edra*') *arm, power*. See no. 2682b.
- 2563 אָזָא ('*āzā*') *make hot, heat*. Not used in Hebrew.
- 2564 אֶזְדָּא ('*azdā*') *sure, assured, made sure, proclaimed* (KB). Loan word from Persian.
- 2565 אָזַל ('*āzal*) *go, go off*. Occurs also in Hebrew, though uncommon.
- 2566 אח ('*aḥ*) *brother*. Used as in Hebrew.
- אֲחָוַיָּא ('*aḥāwāyā*). See no. 2722a.
- 2567 אֲחִידָה ('*ahidā*) *riddle*. Cognate to the Hebrew *hīdā* "riddle."
- 2568 אַחַר ('*aḥar*) *after*. Used as in Hebrew as are the following related words.
- 2568a אֲחֵרִי ('*ohōrī*) *another*.
- 2568b אַחְרִית ('*aḥārīt*) *end*.
- 2568c אֲחֵרָנָא ('*ohōrānā*) *another*.
- 2569 אֲחַשְׁדָּרְפָּנִין ('*aḥashdarp^enīn*) *satraps*. Loan word from Persian. Used also in the Hebrew of Ezr and Est.
- 2570 אֵילָן ('*ēlān*) *tree*. The Hebrew cognate is 'ēlōn (q.v.).
- 2571 אִמְתָּן ('*ēm^etān*) *terrible*. Cognate to Hebrew 'ēmā, no. 80b.
- 2572 אִתַּי ('*itay*) *there is, there are*. Used as the Hebrew cognate *yēsh*.
- 2573 אָכַל ('*ākal*) *eat, devour*. Usage similar to Hebrew.
- 2574 אַל ('*al*) *let not*. Used like the Hebrew 'al which negates the jussive.
- 2575 אֵל ('*ēl*) *these*. This demonstrative pronoun is used like the Hebrew 'ēlleh. See the more common 'illēn below.
- 2576 אֱלֹה ('*ēlāh*) *god, God*. This is the usual word for God in BA. Its determinative state is 'ēlāhā; the plural 'ēlāhīn. It is like the uncommon Hebrew 'ēlōah which is used largely in Job (see no. 93b). It differs from the Hebrew in that there is no plural of majesty in which the word "God" is plural but construed as a singular. The plural form in BA simply means "gods."
- 2577 אֵלֵה ('*ēlleh*) *these*. The same as in Hebrew, but perhaps not a borrowing. The usual Aramaic form is 'illēn. See below.
- 2578 אֲרֹ ('*ālū*) *behold*. Probably a by-form of 'ārū (q.v.).
- 2579 אִלִּין ('*illēn*) *these*. This demonstrative pronoun is an Aramaic form of the Hebrew 'ēlleh.
- 2580 אִלְלֶךְ ('*illēk*) *these*. Demonstrative pronoun.
- 2581 אֶלָּפ ('*ālap*) *a thousand*. Usage similar to Hebrew.
- 2582 אַמָּה ('*ammā*) *cubit*. Usage similar to Hebrew.

2583 אִמָּה ('ūmmâ)

2583 אִמָּה ('ūmmâ) *'nation*. Usage similar to Hebrew.

2584 אָמַן ('āman) *trust, believe in*. Used only in the Haphel. The passive participle means "trustworthy." Usage similar to Hebrew.

2585 אָמַר ('āmar) *say, relate, command*. Used like the Hebrew 'āmar. The Hebrew dābar has no parallel in BA. The verb is often used with 'ānā in the idiom "answered and said," a common semitism in the NT.

Derivative

2585a מְאָמַר (mē'mar) *word*. Used twice: Dan 4:14; Ezr 6:9.

אִנְבֵּה ('inbeh). See אֵב ('ēb), no. 2554.

2586 אָנָּה ('ānā) I. Usually used for emphasis, as is the corresponding Hebrew 'ānī.

2587 אִנְנִין ('innûn) *they, those*. Used like the Hebrew hēm. Like other third person pronouns, it may be used as a copula in a nominal sentence.

אֲנֹשׁ ('ānôsh). See אֲנָשׁ ('ānash), no. 2591.

2588 אֲנַהֲנָא ('ānahñā') *we*. Used like the Hebrew 'ānahñû.

2589 אָנַס ('ānas) *oppress*. Used like the Hebrew, which only occurs in Est 1:8.

2590 אָנַף ('ānap) *face*. Used like the Hebrew cognate 'ap, no. 133a.

2591 אֲנָשׁ ('ānash) *man, mankind*. Used like the Hebrew 'ēnôsh (no. 136a, q.v.), but also serves for Hebrew 'ish and 'ādām. Used with bar "son." The phrase "son of man" occurs only in Dan 7:13. The corresponding Hebrew phrase is used frequently in Ezk to mean "a person." In Dan 7:13, it refers to a heavenly person (perhaps in studied contrast to the preceding beast figures), coming before the Ancient of Days in the judgment scene. It is this verse that Jesus applied to himself in Mt. 26:64 et al., thus filling his often used self-designation "Son of Man" with the highest significance (see bar).

2592 אַנְתָּה ('antâ; Qere 'ant) *thou*. Usage similar to Hebrew 'attâ.

2593 אַנְתִּינוּ ('antûn) *you* (plural). Usage similar to Hebrew 'attem.

2594 אֲסַפְרָנָא ('āspārnā') *thoroughly*. Persian loan word.

2595 אָסַר ('sr). Assumed root of the following.
2595a אֲסוּר ('ēsûr) *bond, imprisonment*. Usage similar to Hebrew.

2595b אֲסָר ('ēsār) *interdict, decree of restriction*.

2596 אֵץ ('ā') *wood, beam*. Used like the Hebrew cognate 'ēs, but not used for "tree" (see ilān). Perhaps the aleph replaces the expected ayin by dissimilation.

2597 אַף ('ap) *also*. Usage similar to Hebrew.

2598 אֲפָרְסָיִעַ ('āpārsāyē'). Persian loan word. Perhaps a title of an official (so KB).

2599 אֲפָרְסָכַיִעַ ('āpārs'kāyē') *a people* (KJV); perhaps a title of an official (KB).

2600 אֲפָרְסָתְכַיִעַ ('āpārsat'kāyē') *a people* (KJV). Perhaps a title of an official (KB).

2601 אֲפֶטֶם ('appētōm) *treasury*. A Persian loan word.

2602 אֶצְבַּע ('ešba') *finger, toe*. Usage similar to Hebrew.

אַרְבַּע ('arba'). See no. 2986a.

2603 אֲרָגָנָא ('argēwān) *purple, red purple*. Usage similar to the Hebrew 'argāmān (no. 157, q.v.).

2604 אָרָא ('ārû) *behold*. Derivation uncertain. Probably a by-form to the less common 'alû.

2605 אֲרַחַ ('ārāḥ) *way, course of life*. Usage similar to the Hebrew 'ōrah (no. 161, q.v.).

2606 אֲרִיָּה ('aryēh) *lion*. Usage similar to Hebrew.

2607 אֲרִיף ('arik) *fitting, proper*. Possibly a Persian loan word (so KB).

2608 אֲרֻכָּבָא ('arkūbā) Derivation uncertain. Perhaps derived from b'erak (q.v.) by metathesis.

2609 אֲרַכָּה ('ar'kâ) *a lengthening*. Used similarly to the Hebrew root 'arak (no. 162, q.v.).

- 2610 אָרָע ('āra') *earth, world, ground*. Used similarly to the Hebrew cognate 'ereṣ, but the usage "land" is not established. An alternative form, 'āraq, is used in Jer 10:11a. The *tsadhe* of Hebrew may be represented in Aramaic by either *ayin* or *qoph*.
- 2611 אָרְעִי ('ar'i) *bottom*.
- 2612 אָרָק ('āraq) *earth*. A by-form of אָרָע ('āra').
- 2613 אָש ('ēsh) *foundation*. Perhaps a loan word from Akkadian.
- 2614 אֶשְׁשֶׁה ('ēshsheh) *fire, fire offerings*. Used similarly to the Hebrew 'ēsh (no. 172, q.v.).
- 2615 אֶשָּׁפ ('āshap) *enchanter, conjurer*. Used similarly to the Hebrew 'ashshāp (no. 181, q.v.).
- 2616 אֶשְׁשָׁרְנָא ('ūshsharnā') *beams, structure*. Derivation and precise meaning uncertain.
- אֶשְׁתַּדּוּר ('eshtaddūr) *revolt*. See no. 3021a.

אֶשְׁתִּי ('ishtīw). See *sh'êtā*, no. 3051.

- 2617 אָת ('āt) *miraculous signs, wonders*. Occurring only three times, this word is used similarly to its Hebrew cognate 'ôṭ (no. 41a, q.v.).
- 2618 אָתָּה ('ātā), אָתָּא ('ātā') *come*; in the Haphel, *bring*. This is the usual word for "come" in BA, which lacks the Hebrew *bô'*. The word is used also in Hebrew (see no. 188), but only twenty times to twenty-five hundred of *bô'*. It appears in the NT in the phrase *maran-atha*, "Come, Lord!"
- 2619 אַטּוּן ('attûn) *furnace*. A loan word from Akkadian.
- אֵיטִי ('itay). See אֵיטִי ('itay), no. 2572.
- 2620 אָטָר ('ātar) *trace, place*. *bā'tār*, with *beth*, is used for time, after. Used similarly to the Hebrew 'āsher (no. 183d, q.v.).
- אֶטְרֹו ('attarû). See (*n'etar*), no. 2881.

ב

2621 כּ (b^e) *in, with, through, etc.* Inseparable preposition used as in Hebrew, except that the meaning "from" witnessed in Ugaritic does not apply.

2622 בָּאֵשׁ (b^e'ēsh) *be evil*. The Hebrew cognate primarily means to smell bad, thence to be odious to someone.

Derivative

2622a בָּאִישׁ (bi'ysh) *bad*.

בָּאֲתָר (bā'tar). See no. 2620.

2623 בָּרַר (b^edar) *scatter*. Used like the Hebrew cognate *bāzar*.

2624 בָּהֵל (b^ehal) *alarm, dismay*. Similar to Hebrew.

Derivative

2624a בָּהִילוּ (b^ehilū) *haste*.

2625 בָּטַל (b^etēl) *cease*. The Hebrew cognate is used only in Eccl 12:3.

2626 בֵּין (bēn) *between*. Preposition used as in Hebrew.

2627 בִּינָה (bînā) *understanding*. Similar to Hebrew.

2628 בִּירְתָּא (birtā') *castle, citadel*. Similar to Hebrew, but Hebrew *birā* includes the meanings "palace" and "temple."

2629 בֵּית (bit) *pass the night*. This denominative verb is not used in Hebrew.

Parent Noun

2629a בַּיִת (bayit) *house*. Similar to Hebrew. As in Hebrew, the word includes the temple, the house of God.

2630 בָּל (bāl) *mind*. Only used in Dan 5:14 [A 15] in the phrase "put to mind," i.e. determine.

2631 בָּלָא (bālā') *wear away*. Used only in the Pael. Similar in usage to Hebrew *bālā*, which, however, also occurs in the Qal.

2632 בָּלוּ (b^elō) *tribute*. Loan word from Akkadian.

2633 בָּנָה (b^enā), בָּנָא (b^enā') *build*. Similar to Hebrew.

Derivative

2633a בִּנְיָן (binyān) *a building*. Similar to the Hebrew (only in Ezk 40–42), which may have borrowed it from Aramaic.

2634 בָּנָם (b^enas) *be angry*. Not found in Hebrew. Used only in Dan 2:12, where it refers to the king's anger.

2635 בָּעָא (b^e'ā') *ask, desire, make (petition), pray, request, seek*.

Derivative

2635a בָּעוּ (bā'ū) *petition, request* (in Jewish liturgy, always "prayer").

The primary meaning of the root is "to search for." Secondly, the idea of searching for favor from God (=praying) or asking a king (=making a petition) are also attested. In the Pael (only in Dan 4:36), the element of eagerness is added, so that one's search must be done with intensity or from a standpoint of urgency. The Hebrew cognate, *bā'ā* is used only infrequently with the meaning "to search for," "inquire."

The root is used only in Daniel, where it carries five shades of meaning. First, it connotes the idea of the search made by one group of men for another (individual or group). In Dan 2:13, executioners from the king were sent forth with instructions to seek out all the wise men in the kingdom who, by their association with those who had failed to meet the expectations of the king, were to be killed. In Dan 4:36, the former counselors and nobles of King Nebuchadnezzar began seeking him (for leadership) once again. Second, the word refers to the enemies of Daniel who were attempting to uncover legal grounds to have him killed (Dan 6:4). Their activities are described as a searching (*bā'ayin*). Third, the word refers to the attempt on the part of a person to gain favor from a human king. Thus in Dan 2:16, Daniel "requested" (b^e'ā) that the king grant him more time in which to respond to his order both to recall and to interpret the monarch's dream. This meaning also applies to Dan 2:49. Fourth, the word describes the requesting of compassion and grace from God (=praying) in a situation of real crisis. Thus in Dan 2:18, Daniel and his three friends know that they will be killed unless they receive compassion from God in the

form of revelation of the mystery which had stumped the entire nation of intellectuals. Daniel 2:23; 6:11, 13 fall in this category. Fifth, the word may mean simply "to ask" (a question), as in Dan 7:16.

These meanings are not always used with rigid precision. More than one meaning may apply to a passage with great symbolic impact. For example, the whole of Dan 6 revolves around the attempt of Daniel's enemies to have him killed. As their pretext, they advise the king to decree that no one be allowed to "make a petition" (*yib'e' bā'ū*) other than to him. With great literary skill, the text employs meanings three and four together two times. In verses 7 and 12, accordingly, the root *bē'ā'* means petitioning either another human being or any deity known to the ancients. This is precisely the issue at stake for Daniel. Although the author of Daniel doubtless remembered that in an earlier chapter it is stated that Daniel had made a request of a human ruler (2:16, 49), when it boils down to a question of divine sovereignty it is only to God that Daniel is willing to "pray," or make a request, as his enemies knew well. Clearly the root *bē'ā'* is a key word in Dan 6 because of its function elsewhere in the book as well as its ability to convey a wide range of seemingly simple meanings.

C.D.I.

2636 בָּעַל (*bē'ēl*) *owner, lord*. Similar to the Hebrew *ba'al*.

2637 בִּקְעָא (*biq'ā'*) *plain*. Similar to the Hebrew.

2638 בִּקְרָ (*bē'qar*) *inquire, seek*. A synonym of *bē'ā'* (q.v.). Like its synonym and the Hebrew cognate *bāqar*, this word may have a religious use (inquire of God) as well as a secular use (search).

2639 בָּר (*bar*) *I, son*. Used as in Hebrew. (Cf. the Aramaism *bar* in Ps 2:12 and Prov 31:2). Most Semitic languages use *nun*, as in the Hebrew *bēn* "son." The origin of the *resh* is not clear, but note the variant forms Nebuchadnezzar and Nebuchadrezzar in Hebrew. The plural of *bar* is spelled with *nun*.

The significant verse is Dan 7:13 which J. G. Machen and many others have taken as the

source of Jesus' self-designation, "Son of Man." Many argue that this phrase in Dan 7:13 means merely "man" as does *ben 'ādām* (Ezk 2:1, etc.) in Hebrew, and as *bēnē 'ānāshā'* means "mankind" in Dan 2:38; 5:21. This may be true. Daniel's vision in 7:1–14 introduces four kingdoms symbolized as beasts. The fifth kingdom is given to a man, not a beast. But this man is the heavenly man whom all men will worship eternally (7:14). When Jesus used this title, therefore, his adversaries could not prove that it meant more than "man." But as Jesus used it to his disciples (Mt 24:30) and at last to his enemies (Mt 26:64), it is clear that he identified himself with this heavenly man of Dan 7:13, worthy of eternal praise and worship.

2640 בָּר (*bar*) *II, field*. Cf. Hebrew *bar* "grain."

2641 בִּרְךָ (*bē'rak*) *kneel, bless*. As in Hebrew, the two ideas of kneel and bless are in this word. The usage is very like Hebrew in that "kneel" is restricted to the active participle Peal with "bless" in the Qal for "kneel" and the Hiphil for "make kneel," with bless in the infinitive and passive participle Qal and in the Piel (extensively) and Niphal and Hithpael. The word is used of blessing or praising God. It is not used of blessing men, but perhaps only because BA is so scant in amount.

Derivative

2641a בִּרְךָ (*bē'rak*) *knee*. Related to the above.

2642 בִּרָם (*bē'ram*) *only, nevertheless*. Derivation uncertain.

2643 בִּשָּׂר (*bē'sar*) *flesh*. As in Hebrew, this word may refer to literal "flesh, meat," and also to mankind, and creatures in general (Dan 4:9 [A 12]). Note the modern Jewish phrase *kosher basar* "permitted food."

2644 בַּת (*bat*) *bath*. A liquid measure, the same as the Hebrew. See Huey, F. B., "Weights and Measures," in ZPEB, V, p. 916.

בָּתָר (*bātar*). See אָתָר (*'ātar*), no. 2620.

2645 גַּב (*gab*) *back or side*. In Dan 7:6 the word is singular in the Qere, which derives it from the Hebrew root *gābah*. The Kethib takes it as plural, "sides," probably deriving it from a root *ḡanaba* found in Arabic.

2646 גֹּב (*gōb*) *pit, den*. This word is like the Hebrew *gēb* "ditch," from the verb *ḡûb* "to dig."

2647 גִּבְר (*gbr*). **Assumed root of the following.**

2647a גִּבְרָר (*g^ebar*) *man*. Similar to the Hebrew *geber*, which, however, has more the connotation "strong man." But see below.

2647b גִּבְרָה (*g^ebûrâ*) *might*. Similar to the Hebrew. The verb from which these three words come is well represented in Hebrew, though not in BA.

2648 גִּזְבְּרָיָא (*g^edābrayyâ*) *treasurer*. Derivation uncertain. Probably a by-form of *gizbār* "treasurer," itself a loan word from Persian.

2649 גָּדַד (*g^edad*) *cut down*. Similar to the Hebrew, which, however, is not used of cutting down trees. The Hebrew word specialized for this is *gāda'*.

2650 גָּו (*gaw*) *midst*. The usual form has a final *aleph* and the preposition *b^e*, *b^egô'*, "in the midst of," used like the Hebrew *b^etôk*. The word is probably related to the Hebrew *gaw* "back" considered as the middle of the body.

גֹּב (*gōb*). See *gōb*, no. 2646.

2651 גִּוְהָ (*gēwâ*) *pride*. Similar to the Hebrew word, which is derived from the root *gā'â*.

2652 גִּוּחַ (*ḡuah*) *stir up*. Similar to Hebrew *ḡiaḥ*.

2653 גִּזְבָּר (*gizbār*) *treasurer*. A Persian loan word.

2654 זָר (*g^ezar*) *cut, determine*. Similar to Hebrew, which, however, emphasizes more the idea of to cut or cut in two. That the two ideas are related is seen from our "decide" from the Latin "to cut off."

Derivative

2654a זִרְרָה (*g^ezērâ*) *decree*.

2655 גִּיר (*gîr*) *plaster*. The Hebrew equivalent, *gēr*, is used only once, in Isa 27:9. It refers to powdered stones of an altar. The Arabic equivalent refers to quicklime or heat. The connection may be that limestones are heated to produce quicklime, a powder, which when slaked is the chief ingredient of lime plaster. According to Albright, lime plaster was used in Israel after 1200 B.C.

2656 גָּלָה (*g^elā'*), גָּלָה (*g^elâ*) *reveal; in the Haphel, take into exile*. The Hebrew *gālâ* has the same double usage.

Derivative

2656a גָּלוּ (*g^elû*) *exile*.

2657 גָּלַל (*gll*). **Assumed root of the following.**

2657a גָּלְגַּל (*galgal*) *wheel*. Similar to the Hebrew. BA does not have the other Hebrew word for wheel, 'ōpan.

2657b גָּלַל (*g^elal*) *rolling*. Occurs only in Ezr 5:8; 6:4, where it refers to large stones, i.e. stones that must be rolled or moved on rollers. The root is common in Hebrew, but not this idiom.

2657c מְגִלָּה (*m^egillâ*) *scroll*. Similar to the Hebrew, which is derived from the verb *gālal* "to roll." The scroll form of documents persisted through the days of the Qumran community (i.e. A.D. 68). The Rylands fragment of John (c. A.D. 130) is one of our earliest books in the form of a codex.

2658 מָר (*g^emar*) *complete*. Similar to Hebrew.

2659 נָזַן (*g^enaz*) *treasure*. Similar to the Hebrew plural *g^enāzîm* "treasury" which is

2660 גַּף (*gap*)

used only in Ezk 27:24 and Est 3:9; 4:7. It is probably a loan word.

2660 גַּף (*gap*) *wing (of bird)*. Derivation uncertain.

2661 גֶּרֶם (*g^eram*) *bone*. Similar to Hebrew *gerem*.

2662 גֶּשֶׁם (*g^eshēm*) *body*. A noun from this root is used in Hebrew for a heavy shower. The meaning “body” is attested only in Arabic and Syriac.

- 2663 דָּא (dā') *this*. This demonstrative pronoun is cognate to the Hebrew *zeh*, the Hebrew *zayin* becoming a *daleth* in Aramaic regularly if the original Proto-semitic sound were *ḏ* (Arabic *Dhal*).
- 2664 דֹּב (dōb) *bear*. Similar to Hebrew.
- 2665 דְּבַח (dēbah) *to sacrifice*. Cognate to the Hebrew verb *zābah* and used similarly. The verb occurs only in Ezr 6:3 in the king's decree for the building of the temple. Other words are used, especially *qērab*.
- Derivatives
- 2665a דְּבַח (dēbah) *a sacrifice*. Similar to Hebrew *zebah*. Occurs only in Ezr 6:3.
- 2665b מִדְּבַח (madbah) *altar*. Similar to Hebrew *mizbēah*. Used only in Ezr 7:17, the only Aramaic passage in Ezr which specifically mentions the altar.
- 2666 דְּבִיק (dēbēq) *cling*. Similar to Hebrew.
- 2667 דִּבְרָה (dibrā) *cause, reason*. Similar to Hebrew and likewise used with 'al in a set phrase. Probably the usage arises in Hebrew from the meaning "thing" of *dābār*.
- 2668 דְּהָב (dēhab) *gold*. Similar to Hebrew *zahab* and exhibiting the common *zayin* to *daleth* shift of Hebrew to BA.
- 2669 דִּיר (dūr) *dwel*. Similar to Hebrew. The participle of such *ayin-waw* verbs regularly develops a medial *aleph* in BA: *dā'rīn*. For related nouns see *dār* "generation," *mēdôr*, *mēdār* "dwelling," and *tēdirā* "continuance." The basic meaning of the root seems to be "move in a circle." Some early houses were circular. Generations recur in a cyclical fashion. The basic meaning may refer to dwell, which is a derived meaning indicating that which is circular, e.g. a heap. The cognate Akkadian noun refers to a city wall, which in our thinking goes "round" the city.
- Derivatives
- 2669a דָּר (dār) *generation*.
- 2669b מְדֹר (mēdôr) *dwelling place*.
- 2669c מְדָר (mēdār) *dwelling place*.
- 2669d תְּדִירָא (tēdirā) *continuance*.
- 2670 דִּוַּשׁ (dûsh) *tread down*. Similar to Hebrew.
- 2671 דַּחְוָה (dahāwā) *music*. Only in Dan 6:18 [A 19]. Meaning and derivation uncertain. NASB, NIV "entertainment."
- 2672 דְּחַל (dēhal) *to fear*. Similar to the Hebrew *zāhal* II found only in Job 32:6.
- 2673 דִּי (dī) *who, which, that*. This very common BA relative pronoun is used: 1) like the Hebrew relative 'āsher; 2) in the name of God, Dan 2:20; 3) as a construct state (often a pleonastic pronoun is used, "his name which was of God," i.e. the name of God (Dan 2:20); 3) as a conjunction, that, whereas, because, etc. It is also used in various combinations, especially *kōl-qōbēl-dī* "because."
- 2674 דִּין (dīn) *to judge*. Similar to Hebrew.
- Derivatives
- 2674a דַּיָּאן (dayyān) *judge*. The same word is used twice in Hebrew, in I Sam 24:16 and Ps 68:5 [H 6]. The more common Hebrew word for a "judge" is from a different root, *mishpāt*, which occurs but once in BA.
- 2674b דִּינָא (dīnāyē) *a people* (KJV), *judges* (KB). Occurs only in Ezr 4:9.
- 2674c מְדִינָה (mēdinā) *district, province*. Later the name of the famous city of Arabia.
- 2675 דֵּךְ (dēk) *this*. A demonstrative pronoun derived from *dā'* by addition of the element "k." The plural is 'illēk.
- 2676 דִּיקָן (dikkēn) *this, that*. A demonstrative pronoun composed of *dēk* with the ending "n."
- 2677 דִּכְר (dkr). Assumed root of the following.
- 2677a דִּכְר (dēkar) *ram*. Cognate to Hebrew *zākār*, male specialized for the male animal for sacrifice.

2678 דִּלֵּק (*d^elaq*)

2677b דִּכְרוֹן (*dikrôn*) *memorandum, record*. Cognate to the Hebrew *zikkārôn* and used similarly.

2677c דִּקְרָן (*dokrân*) *memorandum, record*. See *dikrôn* above.

2678 דִּלֵּק (*d^elaq*) *to burn*. Similar to Hebrew.

2679 דִּקָּה (*d^emâ*) *to be like*. Similar to Hebrew.

2680 דִּנָּה (*d^enâ*) *this*. This demonstrative pronoun is formed from the simple *dā'* plus the ending "n." The plural is *illên* (q.v.).

2681 דִּקֵּק (*d^eqaq*) *be shattered*. Similar to Hebrew.

דָּר (*dār*) *generation*. See no. 2669a.

2682 דִּרְע (*dr'*). Assumed root of the following.

2682a דִּרְעָ (*d^erā'*) *arm*. Similar to Hebrew *z^erôa'*. Note the *zayin* to *daleth* shift. From the same root comes the word '*edra*' "strength" (with prosthetic *aleph*).

2682b אֶדְרַע (*'edra'*) *arm, power*.

2683 דָּת (*dāt*) *decree*. A Persian loan word used also in the Hebrew of Ezr and in Est.

2684 דִּתָּא (*dete'*) *grass*. Used similarly to the Hebrew *deshe'* to which it is doubtless related. Words with a *shin* in Hebrew characteristically shift to a *taw* in Aramaic if the Proto-Semitic sound had been "th" (Arabic "tha").

2685 דִּתְבָּר (*d^etābār*) *judge*. A Persian loan word.

ה

- 2686 הַ (hă). The interrogative particle. Form is *ha* before words beginning with a half vowel. The usage is similar to Hebrew. In Aramaic, the Hebrew definite article (*ha*, q.v.) is not used. Instead a determinate state is used for a definite noun which ends in *aleph*.
- 2687 הָא (hā') *behold, lo*. A demonstrative particle (cf. Hebrew *hē'*).
- 2688 הֵא (hē') *behold*. Used only in Dan 2:43 in the phrase *hē' k^edī* which some would read *hē'k dī*. A demonstrative particle.
- 2689 הַדְבָר (haddābār) *counselor*. A Persian loan word.
- 2690 הַדָּם (haddām) *member of the body, limb*. A Persian loan word.
- 2691 הָדָר (hādar) *glorify (God)*. Used as in Hebrew, except that the Hebrew *hādār* is used for honor given to men.
- Derivative
- 2691a הֹדָר (hōdar) *honor, majesty*. Used as in Hebrew.
- 2692 הָוָא (hāwā'), הָוָה (hāwā) *come to pass, become*. In general this verb is used like the related Hebrew verb *hāyā*. A peculiarity of the Aramaic is that in the imperfect a *lamedh* is used instead of the usual preformative *yodh*. Also in Aramaic the verb *hāwā* is often used with a participle to make a periphrastic tense expressing continuous and habitual action (e.g. Dan 6:10 [A 11], "as he used to do formerly").
- 2693 הּוּא (hū'), הִיא (hī') *he, she, it*. In general, this pronoun is used as in Hebrew, but it is also often used as the copula in a nominal sentence, even where the subject is a pronoun of the first or second person. The masculine is also used as a demonstrative pronoun. The plural is 'innūn "they," "those," (q.v.).
- 2694 הֵיכַל (hēkal) *palace, temple*. This word, also used in Hebrew, is a loan word from the Sumerian via the Akkadian.
- 2695 הָלַךְ (hālak) *go, walk*. Used as in Hebrew. BA, however, does not attest the idiomatic use as an auxiliary verb in the infinitive absolute to express emphasis.
- Derivative
- 2695a הָלָךְ (hālāk) *tribute, toll*. This is a usage borrowed from the Akkadian.
- 2696 הֵמוֹן (himmō), הִמּוֹן (himmōn) *they, them*. The first form is used in Ezr, the second in Dan. Like the singular forms *hū'* and *hī'* (q.v.), these pronouns may be used as the copula in a nominal sentence. They parallel the Hebrew *hēm* and *hēmmā*.
- 2697 הַמְּנִיקָא (hamnikā') *necklace*. A loan word from the Persian, perhaps through Greek.
- 2698 הֵן (hēn) *if*. Used like the Hebrew *hēn* when it means "if" (not when it means "behold"). It is also used in indirect questions similarly to the Hebrew 'im.
- 2699 הַסִּיק (hassiq). See the Haphel of *s^elaq*.
- 2700 הַרְהוֹר (harhōr) *image, mental picture*.

2701 ܐܠܐ (ܐܠܐ) ܐܠܐ (ܐܠܐ) *and, but*. The conjunction is used very much as in Hebrew, except that Aramaic does not use the so-called

waw consecutive. The *waw* attached to the verb does not alter the tense.

זָאֵן (zā'ā'in). Participle of zûa' no. 2706.

2702 זָבַן (z^eban) *buy, gain*. A related Akkadian noun refers to the balances of sale transactions.

2703 זָהַר (z^ehar) *warn*. Usage similar to Hebrew.

2704 *זָדַד (zûd) *be presumptuous*. Used only in the Haphel. Cf. Hebrew *zîd*.

2705 *זָוַן (zûn) *feed*. Used in the Hithpael. Cf. Hebrew *zûn*.

Derivative

2705a מָזוֹן (māzôn) *food*.

2706 זָוַע (zûa') *tremble*. Like the Hebrew *zûa'*, this verb can mean tremble in fear; indeed, this is the only meaning witnessed in BA.

2707 זָיַן (zîw) *brightness, splendor*. Perhaps a loan word from Akkadian.

2708 זָכָה (zākû) *purity, innocence (in God's sight)*. Used similar to the Hebrew root *zākā*.

2709 *זָמַן (z^eman) *agree together* (Dan 2:9, Haphel [Qere reads as Hithpael]). Cf. the Hebrew denominative verb meaning "to fix a time, appoint," which suggests the

semantic path by which "time" becomes "agree."

Parent Noun

2709a זָמַן (z^eman) *time*. Probably a Persian loan word. Used for seasons, appointed times, periods of times—but not for the celebrated seven times (years) Dan 4:13ff., which is 'iddān. The Hebrew equivalent is used only in Ezr, Neh, Est, and Eccl.

2710 זָמַר (zmr). Assumed root of the following.

2710a זָמַר (z^emar) *music*. Used as in Hebrew.

2710b זָמַר (zammār) *singer*.

2711 זָן (zan) *kind, sort*. Used similar to Hebrew but the derivation in both languages is uncertain.

2712 זָעַק (z^e'aq) *to cry, call*. Usage similar to Hebrew.

2713 זָעִיר (z^e'êr) *little, small*. Usage similar to Hebrew.

2714 זָקַף (z^eqap) *raise, lift up*. The Hebrew word is general. The Aramaic word may refer to impaling (Ezr 6:11, NIV).

2715 זָרַע (z^era') *seed*. Usage similar to Hebrew.

- 2716 *חָבַל (*hābal*) **destroy, hurt**. Used only in the Pael and Hithpael. Usage similar to the Hebrew *hābal* II.

Derivatives

- 2716a חָבַל (*hābāl*) **hurt, injury**.
 2716b חֲבוּלָא (*hābūlā'*) **hurtful art, a wrong**.
 2717 חָבַר (*hbr*). **Assumed root of the following**.
 2717a חָבַר (*hābar*) **friend, comrade**. Usage similar to Hebrew.
 2717b חֲבֵרָה (*hābrā*) **fellow, companion**.
 2718 חָד (*had*), חָדָה (*hādā*) **one**. Used similarly to the Hebrew 'eḥād: as a numeral, as a noun, "the same," as an ordinal, "first," as the indefinite article "a," etc.
 2719 חֲדָוָה (*hedwā*) **joy**. Used similarly to the Hebrew root *hādā*.
 2720 חָדִי (*hādī*) **breast, chest**. The Hebrew cognate, *hāzeh*, shows the *zayin-daleth* interchange.
 2721 חֲדָת (*hādat*) **new**. Cognate to the Hebrew *hādash*.
 2722 חָנָה (*hāwā*) **explain, interpret, show, inform, tell**. (RSV consistently translates "show," כָּנַח "shew.")

Derivative

- 2722a אֲחָוָיָה (*'ahāwāyā*) **declaration, interpretation**. This Aphel infinitive is used in a nominal construction in Dan 5:12a.

The basic meaning of the root in Daniel (it does not occur elsewhere) is "to explain" or "point out." Both Pael and Haphel (or Aphel) forms are employed, but with no distinction in meaning. The Hebrew cognate, *hāwā*, is used several times with the meaning of "make a report, inform, let someone know about something."

The root is used only in three chapters of Daniel, always with meanings which are closely related to the basic idea of explanation or interpretation. The specific breakdown of shades of meaning includes the following. First, in Dan 2, *hāwā* is used to signify the act of explaining the meaning of (i.e. interpreting) the king's dream. The traditional English translation of the word as "show" (or "shew") does not emphasize the fact

that not only is the king seeking to be shown the dream which he insisted the professionals must recount to him, but he is also demanding an appropriate interpretation of that dream. Related to this idea of explaining the meaning of a dream (as seen in Dan 2:4, 6, 7, 9, 10, 11, 16, 24, 27) is the picture presented in chapter 5 of Daniel. In this context, Daniel is called upon not to interpret a dream but to decipher and explain some cryptographic writing which had mysteriously appeared on the wall (see Dan 5:5). That the writing was extraordinary is clear from the fact that the king (Belshazzar) needed a person not only to read it but also to explain its meaning (lit., "explain [or declare] its interpretation").

A second function of *hāwā* is attested in Dan 4:2 [H 3:32]. Here the king is quoted as saying, "it has seemed good to me to show (*l' haḥāwayā*) the signs and wonders that the Most High God has wrought toward me" (RSV). As the following verses show, the king understood these signs and wonders only because Daniel had previously interpreted them for him. So in this context, *hāwā* apparently means simply "to announce" (in public what Daniel had explained privately).

The most obvious significance of the word *hāwā* in Daniel is thus to denote the ability to do something which the great intellectuals of the Babylonian empire were incapable of doing. Daniel could explain current and coming events as well as their political and theological implications. The Babylonian soothsayers, magicians, and other professionals could not. But Daniel does not emerge as merely a human hero because of this. Rather, the God of Daniel emerges as the only deity through whose revelation history makes sense. This distinction is plainly made both in chapter two (vv. 26–28) and in chapter five (vv. 9, 18).

C.D.I.

- 2723 חָוַט (*hūt*), חִיט (*hīt*) **repair, join (foundations)**. Occurs only in Ezr 4:12. Derivation uncertain. Cf. Hebrew *hūt* "thread."
 2724 חִיּוּר (*hiwwār*) **white**. Usage similar to Hebrew.
 2725 חָזָה (*hāzā*) **see, behold**. This word is used frequently in the normal sense "see" and with reference to seeing visions. The usage is similar to Hebrew, but BA does not call a prophet a "seer," as does Hebrew.

2726 חטא (ḥṭ')

Derivatives

- 2725a חזו (ḥēzû) *vision, appearance*. Used similarly to the Hebrew ḥiz-zāyôn.
- 2725b חזות (ḥāzôt) *sight, visibility*.
- 2726 חטא (ḥṭ'). **Assumed root of the following.**
- 2726a חטוי (ḥāṭay) *sin*. Used only once, in Dan 4:27 [A 24]. It is used similarly to Hebrew ḥēṭ'.
- 2726b חטויא (ḥāṭṭāyā') *sin offering*. Used once (Ezr 6:17), similarly to the Hebrew ḥaṭṭa't.
- 2727 חיא (ḥāyā') *to live*. Used similarly to Hebrew. However, the courtly phrase in the imperative, "O King live forever," used five times in Dan, is not quite the same as the Hebrew jussive.

Derivatives

- 2727a חי (ḥay) *living*. Usage similar to Hebrew. Derived from ḥāyā'.
- 2727b חיה (ḥêwâ), חיוא (ḥêwā') *beast*. The Hebrew ḥay means both "living" and "living thing or animal." The Aramaic ḥêwâ seems more specialized for beasts—both the literal animals and the symbolic beasts of Daniel.
- 2728 חיל (ḥayil) *strength, army*. Usage similar to Hebrew.
- 2729 חכם (ḥkm). **Assumed root of the following.**
- 2729a חכים (ḥakkīm) *wise men*. Used mostly of the court astrologers in Daniel.
- 2729b חכמה (ḥokmâ) *wisdom*. Used similarly to Hebrew. Related to ḥakkīm.
- 2730 חלם (ḥēlem) *dream*. Used like the Hebrew ḥālôm.
- 2731 חלה (ḥālap) *pass over*. Used of the passage of years (Dan 4:16 [A 13], etc.) in a way not exactly witnessed in the Hebrew.
- 2732 חלק (ḥlq). **Assumed root of the following.**
- 2732a חלק (ḥālāq) *portion, possession*. Usage similar to Hebrew.
- 2732b מחלקה (maḥl'qâ) *class, division (of temple functionaries)*. Used like the Hebrew maḥālōqet. Related to the noun ḥālāq.
- 2733 חמא (ḥēmā') *rage*. Usage similar to the Hebrew ḥēmâ. The root in both languages is y ḥ m.

2734 חמר (ḥāmar) *wine*. Usage similar to the rare Hebrew word ḥemer. Used for the wine at Belshazzar's feast (Dan 5:1ff.) and for the wine to be given for the temple offering (libations?) in Ezr 6:9; 7:22.

2735 חנפא (ḥinṭâ) *wheat*. Usage similar to the Hebrew ḥiṭṭâ. The Arabic as well as the Aramaic, and possibly the Egyptian, witnesses to an "n" assimilated in the Hebrew word.

2736 חנכה (ḥānukkâ) *dedication*. Usage similar to Hebrew. The Jewish feast of Hanukkah is a postbiblical festival celebrating the rededication of the temple by Judas the Maccabee in 165 B.C. Cf. John 10:20 (NIV footnote).

2737 חנו (ḥānan) *show favor*. Usage similar to Hebrew. As in Hebrew, the meaning "implore favor" or "make supplication" is found in the reflexive Hithpael stem.

2738 חסו (ḥāsan) *take possession*. The related Hebrew words emphasize strength and riches. The semantic connection to possessing is obvious.

Derivative

- 2738a חסו (ḥēsen) *power (of the king)*. Related to the above verb. Note the Hebrew nuance of strength.
- 2739 חסא (ḥāsap) *clay, potsherd*. The word is not used in Hebrew. Its use in BA is restricted to the feet and toes of the image of Dan 2. The only question is, was the clay miry (2:41, כנר), or was it already baked, like pottery. Since the picture is one of smashing breakable things, probably the latter is intended (so NIV).
- 2740 *חסא (ḥāsap) *show insolence*. Only used in the Haphel and not in Biblical Hebrew.
- 2741 *חרב (ḥārab) *be waste*. Only used in the Hophal of a city being laid waste. So used also in the Hebrew Hophal.
- 2742 חרטום (ḥarṭôm) *magician-astrologer*. Usage similar to the Hebrew (q.v.). It may be an Egyptian loan word through the Hebrew (cf. KB, Hebrew ḥarṭôm).
- 2743 חרה (ḥārak) *singe*. Found only in Dan 3:27. It never occurs in Hebrew.

2744 חֲרָץ (*ḥāraṣ*) *loin, hip joint*. Probably related to Hebrew *ḥālāṣ* with interchange of the liquid consonants.

2745 חָשַׁב (*ḥāshab*) *think, account*. Usage similar to Hebrew.

2746 חָשַׁח (*ḥāshah*) *need*. Not used in Hebrew, but the root is found in Akkadian.

Derivatives

2746a חָשַׁחָה (*ḥashḥâ*) *thing needed*.

2746b חָשַׁחוּ (*ḥashḥû*) *things needed (collective)*.

2747 חָשׁוֹךְ (*ḥāshôk*) *darkness*. Used like the Hebrew *ḥōshek*. Occurs only in Dan 2:22.

2748 חָשַׁל (*ḥāshal*) *shatter*. Used once in Hebrew (Deut 25:18, Niphal). There are cognates in Akkadian and Arabic.

2749 חָתַם (*ḥātam*) *to seal*. Usage similar to Hebrew.

- 2750 טָאָב (*ṭē'ēb*) *be good*. Used like the Hebrew *ṭōb*. The *aleph* developing from the root *yē'tab* (a by-form related to Hebrew *tōb*) is unusual outside of the participle Peal.
- Derivative
- 2750a טָב (*ṭāb*) *good*.
- 2751 טָבָח (*ṭabbāḥ*) *guardsman*. Used in Hebrew for both cook and (in the plural) the king's guard. Potiphar was a captain of the guard (Gen 37:36).
- 2752 טוֹר (*ṭūr*) *mountain*. Used similarly to the Hebrew *šūr* with the usual interchange of *ṭ* and *š* when the Protosemitic sound is emphatic fricative (like an emphatic th in "that"). Cf. also the Aramaic *qayit* "summer," Hebrew *qayiš*.
- 2753 טָוֵת (*ṭē'wāt*) *fasting*. Used only of the king's fasting in Dan 6:18 [A 19]. Not used in Hebrew.
- 2754 טִין (*ṭîn*) *clay*. Cf. the word *ḥāsap* used in the same context of the image's feet in Dan 2. This word is not used in Hebrew. Baked clay would fit the context.
- 2755 טַל (*ṭal*) *dew*. Used similarly to the Hebrew *ṭal*, derived from a root *tālal*.
- 2756 *טָלַל (*ṭ'ṭal*) *have shade*. Used only in the Haphel. This word is not related to the noun *ṭal*, but comes from the Hebrew *šālal*. Note the *ṭ*-*š* interchange.
- 2757 *טָעַם (*ṭ'ēm*) *feed*. Used only in the Pael. The Hebrew equivalent used in the Qal means "taste," which is in accord with the following derivative.
- Derivative
- 2757a טָעַם (*ṭ'ēm*) *taste, judgment, command*. The Hebrew is similar, but the meaning "command" is rare in Hebrew.
- 2758 טָפַר (*ṭ'par*) *nail, claw*. The Hebrew cognate *šippōren* also means fingernail, but more broadly includes a stylus (Jer 17:1), a meaning not witnessed in BA.
- 2759 טָרַד (*ṭ'rad*) *chase away*. Used similarly to the Hebrew *ṭārad*.

2760 *יָבַל (y^ebal) *bear along, carry*. Used in the Haphel, y^ebal is similar to the Hebrew Hiphil of yābal.

2761 יַבְבֶּשֶׁת (yabbeshet) *the earth*. The Hebrew yabbāshā is more specialized to mean dry land. Indeed the Aramaic word in Dan 2:10 may emphasize the land part of the earth where people live, rather than the total earth.

2762 יָגַר (y^egar) *heap (of stones)*. Laban's name for the pile of stones which witnessed the oath between him and Jacob. The Aramaic name was y^egar sāhādūta "heap of witness." Jacob's name for it was the Hebrew gal'ēd. It has been pointed out that the "mizpah benediction" spoken on this occasion was not a benediction, but a threat and a sanction that the covenant of peace would be kept. See sāhādū.

2763 יָד (yad) *hand, power*. This common word is used similarly to the Hebrew.

2764 *יָדָא (y^edā') *praise, give thanks*. As in the case of the Hebrew cognate yādā, there is difference of opinion as to whether this root (used only in Dan 2:23 and 6:11) means "give thanks" or "praise." See the discussion at the Hebrew root. One possible view is that general thanks can well be called praise. But when a particular point of deliverance is in view, it can be translated by "give thanks" (so NIV in Dan).

2765 יָדַע (y^eda') *know*. It may be said that this word is used quite like its common Hebrew cognate. But as it is used in the more restricted compass of BA, all of the Hebrew usages (e.g. carnal knowledge) are not represented.

Derivative

2765a מַנְדָּא (manda') *knowledge*. Derived from the verb y^eda', this Aramaic noun develops the *nun* by dissimilation from the form maddā'. This noun was later used as the equivalent of the Greek gnosis. The Aramaic Gnostics were called Mandaeans.

2766 יָהַב (y^ehab) *give*. In BA this word is much more widely used proportionately

than the corresponding word yāhab in Hebrew. That word (q.v.) is restricted to the Qal imperative and often used as a courtesy word, "come now." In Hebrew, nātan is used characteristically as the word for "give." In BA the situation is reversed; n^etan is restricted to the Peal imperfect and imperative, with y^ehab used in other forms and stems. Semantically, y^ehab in Aramaic supplemented by n^etan covers the main usages of Hebrew nātan.

2767 יוֹם (yôm) *day*. Usage similar to Hebrew. However, since the number of usages in BA is only 15, against 2285 in Hebrew, some of the less common Hebrew usages are not found in BA. Of interest is the usage in Dan 2:28 b^e'ahārīt yômayyā' "in the latter days" (KJV) or "in days to come" (NIV). See the discussion of Hebrew 'ahārīt, no. 68.

2768 יָטַב (y^etab) *be pleasing*. Related to ṭ^e'ēb, as Hebrew yātab is related to ṭōb. But the Hebrew idiom for "be pleasing" usually is the fuller expression "be pleasing in the eyes of . . ."

2769 יָכַל (y^ekil) *be able*. Usage similar to Hebrew.

2770 יָם (yam) *sea*. Usage similar to Hebrew.

2771 יָסַפּ (y^esap) *add*. Only used in Dan 4:36 [A 33]. The different idiomatic usages are not witnessed to in the limited literature of BA.

2772 *יָעִט (y^e'aṭ) *advise, take counsel*. Only used in the Ithpael. The usage is similar to the Hebrew cognate yā'aṣ. The meaning of "consult together" is found in the Niphal of Hebrew, whereas the one use of the Hithpael in Hebrew means "conspire." Is the Aramaic of Dan 6:7 [A 8] really saying that the officials had conspired together?

Derivatives

2772a יָעִט (yā'ēṭ) *counselor*. A participle Peal of the above verb used as a noun.

2772b עֵטָא ('ēṭā) *counsel*.

2773 *יָצַב (*y^eṣab*)

2773 *יָצַב (*y^eṣab*) *make certain*. Only used in Dan 7:19, in the Pael. The Hebrew *yāṣab* is probably cognate, but means more “to take a firm stand.” It is used only in the Hithpael.

Derivative

2773a יָצַיִב (*yaṣṣib*) *certain, true*; with *min.* of a truth.

2774 יָקַד (*y^eqad*) *burn*. Used six times in the record of the fiery furnace of Dan 3. Its range of meaning is similar to the Hebrew *yāqad*.

Derivative

2774a יָקַדָּה (*y^eqēdā*) *burning*. Used similarly to the Hebrew *y^eqôd*, which is also derived from the root *yqd*.

2775 יָקַר (*yqr*). *Assumed root of the following.*

2775a יָקָר (*y^eqār*) *honor*. The basic meaning of the Hebrew root is “to be precious.” The semantic extension to honor is seen in the Hebrew word *y^eqar* as well as in the Aramaic.

2776 יָרַח (*y^erah*) *month*. Usage similar to Hebrew.

2777 יָרָכָה (*yar^ekā*) *thigh, loins*. Used only in Dan 2:32. Extensions of this meaning (“side, extreme parts, recesses”) found in Hebrew are not witnessed in BA.

2778 יָשָׁן (*yshn*). *Assumed root of the following.*

2778a שָׁנָה (*shēnā*) *sleep*. The verb is not found in BA. It occurs frequently in Hebrew, and the parallel form *shēnā* is among its derivatives.

2779 יָתַת (*yāt*) *mark of the accusative*. Used only in Dan 3:12. The Hebrew *’ēt* (q.v.) is very common in the Bible, but is rare in poetry and is absent in Ugaritic. The one instance in BA argues that it is not at home in that dialect, though it is found in the other Aramaic/Syriac dialects.

2780 יָתַב (*y^etib*) *sit, dwell*. Used similarly to the Hebrew cognate *yāshab*.

2781 יָתִיר (*yattîr*) *pre-eminent, surpassing*. Used like the Hebrew *yeter*, which however, has another meaning “remainder, excess,” not attested in BA.

- 2782 כָּ (k^e) *like, as, about*. Usage similar to Hebrew.
- 2783 כָּדָב (k^edab) *false*. Cf. the cognate Hebrew noun, *kāzāb* "falsehood." Note the *daleth-zayin* interchange.
- כָּדִי (k^edī). See *dī*, no. 2673.
- 2784 כָּה (kā) *here*. The Aramaic does not alter the accented long "a" to "o" as seen in the Hebrew demonstrative adverb *kōh*.
- 2785 כָּהַל (k^ehal) *be able*. A root not attested in Hebrew, which uses *yākōl*. Possibly there is a relation with a by-form, but evidence seems to be lacking.
- 2786 כָּהֵן (kāhēn) *priest*. Usage similar to Hebrew.
- 2787 כֹּר (kōr) *cor*. A dry measure equal to ten ephahs. See the discussion under Hebrew 'ēpā, no. 82.
- 2788 כָּלַל (k^elal) *complete*. Used only in the Shaphel and Ishtaphel stems, possibly a loan word from Akkadian. But *kālal* is used similarly in Hebrew, and there are Shaphels in Ugaritic. The Shaphel is not as surprising in Aramaic as sometimes thought.
- 2789 כֹּל (kōl), כֹּלִי (kol-) *the whole, all*. Usage similar to Hebrew.
- 2790 כֵּן (kēn) *thus, as follows*. Usage similar to Hebrew.
- 2791 כְּנִמָּא (k^enēmā') *accordingly, as follows*. Can refer either backward (Ezr 6:13) or forward (Ezr 4:8). It introduces a letter in Ezr 5:4—the ancient "Dear Sir."
- 2792 כָּנַשׁ (k^enāsh) *gather*. Cognate to the Hebrew *kānas* (q.v.) and used similarly.
- 2793 כָּנַת (k^enāt) *associate*. The same word is used in the Hebrew of Ezr 4:7. But there it is probably a loan word from the Aramaic which in turn may be borrowed from the Akkadian.
- 2794 כֶּסֶף (k^esap) *silver*. Used like the Hebrew *kesep* and without clear reference to coin-
- age, although coins both Greek and Persian were in use in Ezra's day (cf. Ezr 7:17).
- 2795 כְּעַן (k^e'an) *now*. A combination of the preposition *k^e* plus a derivative of the root 'ānā, which is back of the Hebrew word 'ēt "time." The meaning is "at this time" or "now."
- 2796 כְּעֵנֶת (k^e'enet) *now*. A feminine form of the above.
- 2797 כְּעֵת (k^e'et) *now*. A contraction of the form *k^e'enet*.
- 2798 כָּפַת (k^epat) *bind*. Not attested in Hebrew, but cognates occur in Akkadian and Arabic.
- 2799 כָּרָא (k^erā') *be distressed*. Not attested in Hebrew. Cognates occur in Akkadian and Arabic. Not used in the Peal.
- 2800 כַּרְבֵּלָא (karb^elā') *cap, turban*. The Hebrew word involves clothing thrown over like a mantle. The Akkadian cognate refers to some kind of cap. Perhaps the reference is to a turban, but the precise significance is uncertain. Occurs only in Dan 3:21.
- 2801 כָּרַז (k^eraz) *make a proclamation*. A denominative verb from *kārōz*, suggesting that the word had been borrowed some time previously. Used only in Dan 5:29. Not used in the Peal.
- 2802 כָּרוֹז (kārōz) *herald*. This is one of the three or four celebrated Greek words found in Daniel (3:4). The argument has been that these words prove a date in the days after Alexander. But it is remarkable, if Daniel were of Maccabean date, that there would be so many Persian loan words and so few Greek ones. Obviously Susa and Babylon were not isolated from Greek merchants, artisans and soldiers in the days of Daniel. That there were Greek musicians with instruments bearing Greek names (cf. Dan 3:5 etc.) in the days of Daniel is to be expected. KB argues that *kārōz* is really derived from an Old Persian root cognate to the Greek word.

2803 כְּרִסְאָ (korsē')

2803 כְּרִסְאָ (korsē') *throne*. Used like the Hebrew *kissē'* with an inserted liquid consonant.

2804 כִּכְרָ (kikkār) *talent*. Usage similar to Hebrew.

2805 כְּתַב (k^etab) *write*. Usage similar to Hebrew.

Derivative

2805a כְּתָב (k^etāb) *a writing*. The Aramaic word expresses the meaning of both the Hebrew *k^etab* and *miktāb*.

2806 כְּתֵל (k^etal) *wall* (Dan 5:5). The Hebrew equivalent also appears but once (Song 2:9).

2807 ל (l^e) *to, for, in regard to, at; the sign of the accusative.* This inseparable preposition is used very like the corresponding Hebrew. The forms with *m* seem to be lacking in BA, as they are also for *b^e* "in," and *k^e* "as," "when," "like." The *l^e* is used as it is in Hebrew to mark the object of a verb, but a parallel to the Hebrew 'ē^t is lacking. One may question whether the *l^e* is ever used in the sense of "from," as is now recognized in Hebrew. The answer seems to be that such a usage has not been observed, but our material is too limited to exclude the possibility.

The *l^e* is used more in BA than in Hebrew as a periphrastic idiom to express the genitive "belonging to." The use with an infinitive to express purpose is the same as in Hebrew. There is no cognate to Hebrew *l^ema'an* in Aramaic.

2808 לā' (lā') *not.* Used as in Hebrew. Note that in BA the accented *qameṣ* does not change to *holem*. Two usages are more common in BA than Hebrew. *lā'* may, in BA, be used to negate a participle. And since Aramaic does not use *l^ebilti*, the plain negative *lā'* is found with an infinitive of purpose preceded by the preposition *l^e*.

2809 לבב (lbb). Assumed root of the following.

2809a לב (lēb) *heart.*

2809b לבב (l^ebab) *heart.* This word is more common in BA than is *lēb*. The reverse is the case in Hebrew.

2810 לבש (l^ebēsh) *be clothed.*

Derivative

2810a לבוש (l^ebūsh) *garment* (Hebrew the same).

2811 להו (lāhēn) *I, therefore.* Hebrew the same.

2812 להו (lāhēn) *II, except, but.* This usage differs from the Hebrew *lāhen* and serves for Hebrew *kī'im*.

2813 לנת (l^ewāt) *to, at, beside.*

2814 לחם (l^ehēm) *feast.* The cognate in Hebrew is used for food, but "feast" in Hebrew is usually *mishteh*. See *mishtēy*.

2815 לחנה (l^ehēnā) *concubine.* Not used in Hebrew.

2816 לילא (lēylā') *night.* Used as in Hebrew.

2817 לשון (lishshān) *tongue, i.e. language; therefore people.*

מָא (mā'). See mā, no. 2822.

Parent Noun

2818 מֵאָה (mē'ā) *one hundred*. The same as the Hebrew.

2828a מֶלַח (mē'lah) *salt*. Parent noun of the verb *mē'lah*. See the Hebrew cognate.

2819 מֹאזָנִיָּא (mō'zanyā') *scale, balance*. Occurs in Dan 5:27, only.

2829 מֶלֶךְ (mlk) I. Assumed root of the following.

מֵאֵמָר (mē'mar). See no. 2584a.

2829a מֶלֶךְ (melek) *king*. See Hebrew *melek*.

2820 מֵאֵן (mā'n) *vessel, utensil*.

2829b מַלְכָּה (malkā) *queen*.

מְגִלָּה (mē'gillā). See no. 2656c.

2829c מַלְכוּ (malkû) *royalty, reign, kingdom*. See Hebrew *malkût*.

2821 מְגַר (mē'gar) *overthrow*. Used only in the Pael.

2830 מֶלֶךְ (mlk) II. Assumed root of the following.

מַדְבָּח (madbah). See no. 2665b.

2830a מְלִיָּה (mē'lēk) *counsel, advice*. The Hebrew cognate verb is used once, in Neh 5:7. It is probably a loan word and therefore from Aramaic. Akkadian also witnesses to this root, which is to be distinguished from *mlk* I.

מִדָּה (middā). See no. 2834.

מְדוֹר (mē'dôr). See no. 2669b.

מְדִינָה (mē'dinā). See no. 2674c.

מְדָר (mē'dār). See no. 2669c.

2822 מָה (mā) *what? whatever*. Used in Hebrew with prefixed preposition: *k'mā* "how!" *l'mā* "why?"

2831 מְלַל (mē'lal) *speak, say*. Used only in the Pael.

2823 מוֹת (mût) *death*. Occurs only in Ezr 7:26.

2831a מִלְלָה (millā) *word, thing*. This word appears also in Hebrew, where it has been called an Aramaism equivalent to the native Hebrew word *dābār*. But there is no sound shift to indicate a borrowing of the word either way. It may be a word native to Hebrew, but used less and therefore a good poetic parallel to *dābār*.

מֹזֶן (māzôn). See no. 2705a.

2824 מַחָא (mē'hā') *smite, strike, kill*.

מַחְלָקָה (mahl'e qā). See no. 2732b.

2825 מָטָא (mē'tā'), מָטָה (mē'tā) *reach, attain*. Probably cognate to Hebrew *māšā* of the same meaning (so KB).

This word, and others, have been used to date portions of the OT as late. But more recently the significance of the argument has lessened with more discovery of and resultant appreciation of Aramaic. See the helpful discussion in Archer, *Survey of Old Testament Introduction*, pp. 137-141.

2826 מָלֵא (mē'lā') *fill*. See Hebrew *mālē'* and *mālā*.

2827 מַלְאָךְ (mal'ak) *angel*. The usage parallels Hebrew.

2832 מֶן (man) *who*. Used also with *dī*, "who is there that?" Cf. Hebrew *mī*.

מִלְלָה (millā). See no. 2831a.

2833 מִן (min) *from, by reason of, more than*. The range of uses is similar to the Hebrew.

2828 מֵלַח (mē'lah) *eat salt*. This denominative verb is used only in Ezr 4:14. It probably reflects the common Near Eastern idiom "to be under obligation to." If a host gives a guest salt, the guest is under the protection of his hospitality which is considered a binding obligation.

מְנָא (mē'nē'). See *mē'nā*, no. 2835.

2834 מִנְדָּה (mindā), מִדָּה (middā) *tribute*. A loan word from Akkadian, found also in Hebrew (*middā*).

2835 מְנָה (*m^enâ*)

מְנַדֵּעַ (*manda'*). See no. 2765a.

מְעָל (*me'âl*). See no. 2911a.

2835 מְנָה (*m^enâ*) *number, reckon; Pael, ap-
point*. Similar to the Hebrew.

2839 מָרָא (*mārē'*) מָרֵה (*mārēh*) *lord*. This word is used of God, and also of the king.

Derivatives

2835a מְנָא (*m^enē'*) *maneh, mina*. The same as Hebrew. Usually fifty shekels made a mina, but in the sexagesimal system, sixty would be expected and is witnessed in Ezk 45:12. The word is probably used in Dan 5:25, 26 in a word play on *mānâ* "to number."

2840 מָרַד (*mrd*). Assumed root of the following.

2840a מָרַד (*m^erad*) *rebellion*. The root is common in Hebrew, and the meanings of the derivatives in BA reflect the Hebrew usage.

2840b מָרַד (*mārād*) *rebellious*.

2835b מִנְיָן (*minyān*) *a number*.

2841 מָרַט (*m^erat*) *pluck, pull off*. Similar to the Hebrew.

2836 מִנְחָה (*minhâ*) *gift, offering*. Similar to the Hebrew.

2842 מִשַּׁח (*m^eshah*) *olive oil*. The cognate in Hebrew means more the compounded anointing oil. The Hebrew *shemen zayit* used for olive oil is not used in BA.

2837 מִעָא (*m^e'ā'*) *abdomen, belly* (but not including the internal organs). Used like the Hebrew *m^e'â*.

מַעְבֵּד (*ma'ābad*). See no. 2894c.

מִשְׁכָּב (*mishkab*). See no. 3029a.

מִשְׁכָּן (*mishkan*). See no. 3031a.

מִשְׁרוֹקִית (*mashrôqîṭ*). See no. 3049a.

מִשְׁתָּה (*mishteh*). See no. 3051a.

מַתְנָא (*matt^enā'*). See no. 2879a.

2838 מְעוּהִי (*m^e'ôhî*) *abdomen, belly*. This noun is composed from *m^e'â* with a suffix.

- 2843 נבא (*nb'*). Assumed root of the following.
- 2843a נביא (*n^ebi'*) *prophet*. Probably a loan word from Biblical Hebrew. See the discussion under Hebrew *nābā'*, no. 1277.
- 2843b נבואה (*n^ebū'ā*) *prophesying*.
- 2844 נבזכה (*n^ebizbā*) *reward*. Probably a Persian loan word.
- 2845 נברשתא (*nebrashtā'*) *lampstand*. Not the seven-branched lampstand of the temple.
- 2846 נגר (*n^egad*) *stream, flow*. The relation of this root to the Hebrew *nāgad* is unclear.
- Derivative
- 2846a נגד (*neged*) *in front of, facing*. Not used in Aramaic outside of the Bible and probably a borrowing from Hebrew.
- 2847 נגה (*nōgah*) *brightness, daylight*. The same as the Hebrew.
- 2848 נדב (*n^edab*) *volunteer, offer freely*. Hebrew the same.
- 2849 נדבך (*nidbāk*) *row, layer, course (of stones)*. Probably a loan word.
- 2850 נדר (*n^edad*) *flee*. Similar to Hebrew.
- 2851 נדנא (*nidnā*) *sheath*. Meaning uncertain. Probably a Persian loan word. See the Hebrew in I Chr 21:27.
- 2852 נהר (*n^ehar*) *river*. The same as the Hebrew *nāhār*.
- 2853 נהר (*nhr*). Assumed root of the following.
- 2853a נהיר (*n^ehîr*), נהור (*n^ehôr*) *light*. See the Hebrew root *nhr* II.
- 2853b נהירו (*nahîrû*) *illumination, insight*.
- 2854 נוד (*nūd*) *flee*. The Hebrew cognate means more "to move back and forth."
- 2855 נולו (*n^ewālû*), נולי (*n^ewālî*) *refuse-heap*. Probably an Akkadian loan word.
- 2856 נור (*nûr*) *fire*. The Hebrew root gives rise to *nēr* "lamp" and *m^enôrâ*, the seven-branched lampstand.
- 2857 נזק (*n^ezaq*) *suffer injury*. This verb is not used in Hebrew, but is used in Akkadian.
- 2858 נחש (*n^ehāsh*) *copper, bronze*. The same in Hebrew.
- 2859 נחת (*n^ehēt*) *descend*. This root in Hebrew is called poetic and late in BDB (p. 1102), but now is witnessed in Ugaritic. The meaning is the same.
- 2860 נטל (*n^etal*) *lift up*. The Hebrew cognate means more to lift up a thing and lay it upon something. The Akkadian *naṭālu* corresponds more closely to the BA.
- 2861 נטר (*n^etar*) *keep*. The same as the Hebrew cognate *nāsar*. But the form *nātar* is, only scantily, represented in Hebrew.
- 2862 נוחם (*niḥôah*) *soothing*. Used as in Hebrew of acceptable offerings and rewards.
- 2863 נכס (*n^ekas*) *riches, property*. The same as in Hebrew.
- 2864 נמר (*n^emar*) *leopard*. The same as in Hebrew.
- 2865 נסח* (*n^esah*) *pull away*. Used in the Hithpeal. The same as in Hebrew (where it occurs in the Qal).
- 2866 נסק (*n^esak*) *offer sacrifice*. Used in Hebrew especially for pouring out libations. In BA the verb is used of offering sacrifice in general (only Dan 2:46).
- Derivative
- 2866a נסך (*n^esak*) *libation offering*.
- נסק (*nsq*). See *s^elaq* no. 2889, which assimilates the "l" backward to make forms like a *pe-nun* verb.
- 2867 נפל (*n^epal*) *fall*. Used as in Hebrew.
- 2868 נפק (*n^epaq*) *go out or come out, come forth*. Not found in Hebrew, but widely used in Aramaic dialects.
- Derivative
- 2868a נפקה (*nipqâ*) *outlay*.
- 2869 נצבה (*niṣbâ*) *firmness*. The root is used extensively in Hebrew meaning "to stand firm," etc.

2870 *נָצַח (*n^eṣah*)

- 2870 *נָצַח (*n^eṣah*) *distinguish oneself*. Similar to the Hebrew *nāṣaḥ* “be pre-eminent,” which, however, is treated as one root in BDB, as two in KB.
- 2871 *נָצַל (*n^eṣal*) *rescue, deliver*. The same as in Hebrew.
- 2872 נָקָא (*n^eqē'*) *clean, pure*. Similar to the Hebrew root *nāqā* with its derivatives.
- 2873 נָקַשׁ (*n^eqash*) *knock (of knees)*. Probably the same root as the Hebrew, which, however means more to catch in a snare.
- 2874 נָשָׂא (*n^esā'*) *lift, carry, take away*. The same as in Hebrew, where the word is common.
- 2875 נָשִׁין (*n^eshîn*) *wives*. Occurs only in Dan 6:25. *n^eshîn* is related to the Hebrew *nāshîm* (singular *'ishshâ*). Its relation to *'ēnōsh* is not clear. BDB lists two roots *'nsh*, one for the masculine noun, one for the feminine. The Hebrew *'ish* and *'ishshâ* have similar problems as to their derivation and relation.
- 2876 נִשְׁמָה (*nishmâ*) *breath*. Occurs only in Dan 5:23. See the Hebrew *nishmâ*.
- 2877 נֶשֶׁר (*n^eshar*) *vulture, eagle*. Used like the Hebrew *nesher*.
- 2878 נִשְׁתָּוָן (*nisht^ewân*) *letter*. Probably a Persian loan word.
- 2879 נְתִינִין (*n^etinîn*) *temple servants*. Similar to the Hebrew *n^etinim*.
- 2880 נָתַן (*n^etan*) *give*. In Aramaic this word for give is used only in the Peal infinitive and imperfect. The other word for “give,” *y^ehab*, is widely used in the perfect, imperfect, and participle Peal and in the passive of the Peal. In Hebrew, on the contrary, *nātan* is widely used and *yāhab* restricted.
Derivative
- 2880a מַתָּנָא (*matr^enā'*) *gift*.
- 2881 *נָתַר (*n^etar*) *strip off (leaves)*. Occurs only in Dan 4:11, in the Haphel.

ס

- 2882 סָבַל (*s^ebal*) *bear, carry a load*. Meaning uncertain. See Hebrew *sābal*.
- 2883 סָבַר (*s^ebar*) *think, intend*. The Hebrew cognate is *šābar*.
- 2884 סָגַד (*s^egid*) *worship, pay homage*. Used of God, idols, and men. Used like the Hebrew *sāgad*.
- 2885 סָגַן (*s^egan*) *prefect, governor*. This Akkadian loan word is found also in Hebrew.
- 2886 סָגַר (*s^egar*) *shirt*. Used as in Hebrew.
- 2887 סוּמְפֹנְיָה (*sūmpōnyā*) *wind instrument*. This word (Dan 3:5, 15) is borrowed from the Greek *symphonia* (whence English "symphony") and was long taken as a proof that Daniel was written in the Greek period after Alexander's conquests. It is now generally recognized that since there were many earlier contacts between the Greeks and Persians, this name of a musical instrument could well be found along with the instrument at the Persian court. Cf. our Hawaiian borrowing "ukelele." The same can be said of the three other Greek words in this section of Daniel, "harp" (*qīt^erōs*), "sackbut" (*šabb^ekā*) and "psaltery" (*psan^tērīn*). See R. K. Harrison, "Daniel," in ZPEB, II, p. 18.
- 2888 סוּף (*sūp*) *be fulfilled, come to an end*. The Hebrew is similar but does not include the idea of fulfillment.
- Derivative
2888a סוּף (*sōp*) *end*.
- סוּפְּוֹנְיָה (*sūppōnyā*). See *sūmpōnyā*, no. 2887.
- 2889 סָלַק (*s^elēq*) *come up*. A common BA equivalent of the Hebrew 'ālā. The word shows the backward assimilation of the "l" known elsewhere in Aramaic, so certain forms look like *n^esaq*. The Hebrew cognates are *sālēq* and *sālaq* (q.v.).
- 2890 סָעַד (*s^e'ad*) *support, sustain*. Used as in Hebrew.
- 2891 סָפַר (*spr*). Assumed root of the following.
- 2891a סָפַר (*s^epār*) *book*. Like the Hebrew *sēper*.
- 2891b סָפִיר (*sāpīr*) *scribe, secretary*. Like the Hebrew *sōpēr* which is not limited to mere writing, but is also a term applicable to governmental and military officials.
- 2892 סָרְבַּל (*sarbāl*) *mantle*. Probably a loan word. KB suggests Scythian origin.
- 2893 סָרַק (*sārak*) *chief, overseer*. Probably a loan word. BDB suggests Persian origin; KB, Hittite.
- 2894 סָתַר (*s^etar*) *I, hide*. Like the Hebrew *sātar*.
- 2895 סָתַר (*s^etar*) *II, destroy*. May be compared to the Hebrew *sātar*.

2896 עָבַד ('*abad*) *make, do, perform, create (Peal); be made, be done, be performed, executed/carried out (Hithpeal).*

Derivatives

- 2896a עֶבֶד ('*abad*), עֲבָד ('*abēd*) *slave, servant.*
 2896b עֲבִידָה ('*abidā*) *service, work, ritual, worship.*
 2896c מַעֲבָד ('*ma'abad*) *action (of God in history).*

The primary meaning of this root indicates service, performance of a duty, or activity. The Hithpeal is used as the passive of the Peal. The formal Hebrew cognate is '*abad*', but the functional equivalent is '*āsā*'.

The root '*abad*' occurs frequently in the Aramaic portions of the Old Testament with a variety of functions. First, one may be said to "make" an image (Dan 3:1, 15), a feast (Dan 5:1), or a war (Dan 7:21). The passive (Hithpeal) is employed to indicate a search which needs to "be made" (Ezr 4:15, 19); to indicate the gory process of human bodies "being made" (i.e., torn or hacked) into pieces (Dan 2:5; 3:29); or to describe the process of a house "being made" into a dung heap (Ezr 6:11).

Second, God may "do" or "perform" in divine ways. For example, God may perform miraculous signs (Dan 6:27), or otherwise act in accordance with his own sovereign freedom (Dan 4:35). Of course, one of the major activities of God is creation, designated in Jer 10:11 as something in which gods fashioned by human hands (idols) did not participate.

Third, in Ezr 7:26, all the people in the province Beyond the River (The Trans-Euphrates province) were enjoined to "do" (i.e. "obey") both the law of the God of Ezra and the law of the king. Doing the law of God is closely related to the idea of "worship," which, as understood in Semitic thought, was "service" or "slavery" to God. Indeed, this idea continued down into NT times, as is plainly attested by the number of times that Paul refers to himself as the "slave" of Jesus Christ. (Greek *doulos* is the regular LXX translation for Hebrew and Aramaic '*bd.*')

Fourth, the most frequently attested function of the root '*abad*' in Biblical Aramaic is to denote the simple idea of activity, of "doing" a wide variety of things (see Ezr 4:22; 6:8, 12, 13; 7:18; Dan 4:35; 6:10, 22).

The most intriguing use of the root is in connection with the name of one of the three com-

rades of Daniel. These four lads went into Babylonian captivity bearing good Hebrew names, each of which had symbolic meaning related to the worship of Yahweh the God of Israel. Hananiah and Azariah contain the shortened form of Yahweh and mean respectively "Yahu has been gracious" and "Yahu has helped.") However, their Babylonian captors quickly changed these Hebrew (Yahwistic) names into Babylonian ones. While the etymology of the new names of Hananiah (Shadrach) and Mishael (Meshach) is uncertain, the meaning of the new name given to Azariah is fairly clear. Abed-nego ('*abēd n' gō*) appears to be a form which has dissimilated from Abed-nebo (Akkadian *abdinabu*). Part of the humiliation of captivity was symbolized by the ignominy of one whose real name meant "Yahu has helped" being redesignated as "the slave of Nabu" (the Babylonian god of wisdom). A major thrust in the book of Daniel is the concern to illustrate that Yahweh is still in control of history despite the exilic condition of his people. Related to this theological affirmation is the message that no Babylonian god deserves the worship or devotion of the people of God. Accordingly, although the Babylonians could change his name to Abed-nego ('slave of Nabu'), his faith remained solely grounded in Yahweh. So Azariah ("Yahu has helped") can say with his two friends: "Our God whom we serve (not '*abad*' but *p'lah* throughout) is able to deliver us from the burning fiery furnace; and he will deliver us out of your hand, O king. But if not, be it known to you, O king, that we will not serve your gods" (Dan 3:17-18).

'abad, 'abēd. Slave, servant; i.e. the person who does the action described by the verbal forms. In Biblical Aramaic are found both a servant of God (see Dan 3:26, 28; 6:21; Ezr 6:11) and a servant of a human king (see Dan 2:4, 7; Ezr 4:11).

'abidā. Service, work, ritual, worship. The uses of this word in Ezra refer to work done in rebuilding the temple in Jerusalem (Ezr 4:24; 5:8; 6:7) as well as to the general task of priests and Levites which is service to God connected with ritual and spiritual worship (Ezr 6:18).

ma'abad. Action (of God in history). Found only in Dan 4:37 [A 34], this word is used to describe the dealings of the God of heaven with Nebuchadnezzar. The human king, by acknowledging that the dealings of God with him were just and right, also acknowledged his own sinful-

2897 עֲבָר ('ābar)

ness and frailty in comparison with the sovereign God.

C.D.I.

2897 עֲבָר ('ābar) *region across, beyond*. This word is used in BA only in the phrase "beyond the River," i.e. the region west of the Euphrates ("Trans-Euphrates," NIV). See the discussion of the similar Hebrew usage under 'ābar, no. 1556. In BA as in Hebrew, "across the river" does not mean from the standpoint of the speaker or author. Ezra's adversary Rehum in Samaria spoke of his territory as "beyond the River" (Ezr 4:17).

2898 עָדָה ('ādā) *pass on, pass over*. Not used of death. Usage similar to Hebrew 'ādā I.

2899 עַד ('ad) *even to, until*. Used as in Hebrew.

2900 עֶדֶן ('iddān) *time, period, span, year, era*. (KJV always "time"; RSV always "time" except when the word is used in a temporal clause.) 'iddān is probably a loan word from Akkadian *eladānu, adānnu, ḥadānnu*. Two basic meanings are equally a "point" in time or a "span" of time.

The word occurs thirteen times, all in Dan, with three shades of meaning. First in Dan 3:5 and 3:15, 'iddān occurs in the temporal clause *bē'iddānā dī*, the literal meaning of which is "in the time of," or "at the time which." However, as the RSV has noted correctly, the phrase as a whole simply means "when," and is comparable in function to three other idiomatic expressions for "when" in Dan 3: *bah sha'tā*, at the hour (v. 6); *bēh zimnā*, at the time (v. 7), and the usual expression *kēdī* (also v. 7).

Second, 'iddān may be used as a synonym of *zē mān* to mean a specific length of time. In Dan 2:8, King Nebuchadnezzar accuses the Chaldeans of attempting to stall for time ('iddān) and assures them that he is aware of their plans and will punish them severely unless they retell and then interpret his dream immediately. But in Dan 2:16, Daniel's request for extra time (*zē mān*) is granted. Accordingly, he and his friends go to prayer so that God might reveal to them the information which the king is demanding. It is noteworthy that in this same chapter 'iddān is used in three different ways by the author. In addition to the meaning just discussed, Dan 2:9 employs 'iddān to mean "situation" (NASB), i.e., circumstances. Later, in his prayer praising God for revealing the king's dream to him, Daniel proclaims that God is the one who changes

"times and epochs" ('iddānāyā wēzimnāyā' v. 21). In this context, 'iddān refers to far more than the brief moment of one tough circumstance comparable to that facing the would-be wise men of King Nebuchadnezzar. Rather this is testimony to the sovereign power of God to control the sweep of history.

Third, the function of 'iddān in Dan 4 is somewhat problematic. In this chapter, verses 16, 23, 25, and 32 [A 13, 20, 22, 29] employ the phrase *shib'ā 'iddānīn*, literally, "seven times" (KJV, RSV). However, the LXX, Josephus, and traditional Jewish commentators have understood the phrase to mean "seven years" (See J. J. Slotki, *Daniel, Ezra, Nehemiah*, London: The Soncino Press, 1951, p. 33). Still, it is not necessary to view 'iddān as a specific period in these verses, and the NASB translation, "seven periods of time" is probably preferable to anything more specific both in Dan 4 and in Dan 7:12.

The same thing must be said with respect to the occurrence of 'iddān in Dan 7:25 in the phrase "time, times and one-half a time" [*'iddān wē'iddānīn ūpēlag 'iddān*]. In this key verse, several factors must be taken into consideration. First, MT 'iddānīn may not be translated "two times" (i.e. "two years"), but must be simply "times," i.e., plural rather than dual. If one chooses to interpret the second word as "two times" (RSV) one must repeat the consonants (i.e., 'iddānāyīn). Second, the phrase as a whole may simply be a conventional, apocalyptic way to indicate an indefinite period of time. Third, because of the difficulties involved in arriving at an interpretation of this phrase which is satisfying to a wide range of scholars, the translation of the phrase is better left as indefinite as the Aramaic original itself appears. Clearly 'iddān may mean either "time" or "year." But to press beyond this to a specific interpretation demanding the phrase "three and one-half years" is unwarranted. All that may be said with certainty is that Dan 7 (along with Dan 2 and 8-12) points to a period of time during which evil powers will appear to be in control of world affairs followed by a moment at which God will reassert his sovereignty in history and will bring to an end those forces which have worked against his kingdom.

[The above remarks are carefully considered and rightly urge caution in the interpretation of these expressions. Some may wish to add, however, that the similar Hebrew term is found in Dan 12:7 which may perhaps be elucidated by the reference to the periods of 1290 and 1335 days in Dan 12:12-13. Cf. also Rev. 11:2; 13:5 and 12:6. R.L.H.]

C.D.I.

2901 עוֹד ('ōd) *still, yet*. Used as in Hebrew.

- 2902 עָוְיָה ('āwāyā) *iniquity*. Occurs only in Dan 4:27 [A 24]. See the Hebrew 'āwā and its derivative 'āwôn.
- 2903 עוֹף ('ôp) *fowl*. Used as in Hebrew.
- 2904 עוֹר ('ûr) *chaff*. Derivation uncertain.
- עֹז ('ez). See no. 2920a.
- 2905 עֶזְקָה ('izqâ) *signet ring*. Apparently derived from the Hebrew "to go around," "dig around."
- עֵטָא ('ēṭā'). See no. 2772b.
- 2906 עֵין ('ayin) *eye*. Used like the Hebrew cognate. The meaning "spring" is not found in BA.
- 2907 עִיר ('ir) *waking, watchful (i.e. an angel)*. Cognate to the Hebrew 'ûr I, "awake."
- 2908 עַל ('al) *upon, over, on account of, above, to, against*. This preposition answers to both Hebrew 'al and 'el. Aramaic does not have 'el "to." This circumstance possibly contributes to occasional confusion in the Hebrew texts between 'al and 'el. This interchange in Hebrew may be scribal or may be in the language itself (see BDB, p. 757). The use of Aramaic 'al "to" may be influenced by the Aramaic verb 'ālal "to go in."
- עֲלָא ('ēllā'). See no. 2909a.
- 2909 עֵלָה ('lh). **Assumed root of the following.** (See the Hebrew 'ālā.)
- 2909a עֲלָא ('ēllā') *above*.
- 2909b עֲלִי ('illi) *roof chamber*.
- 2909c עֲלִיּוֹן ('elyôn) *the Most High*.
- 2909d עֲלִי ('illāy) *the highest, the Most High*. This usage of 'illāy may be compared with the occasional Hebrew usage of 'al as "the Most High." This usage, recognized now by Dahood in several Pss, has already been adopted by the כּוּן in translation of Hos 7:16 and 11:7.
- 2909e עֲלָת ('āllāt) *burnt offering*. Occurs only in Ezr 6:9.
- 2910 עֵלָה ('illā) *matter, affair*. Probably derived from a root 'ālal used in Hebrew.
- עֲלִי ('illi), עֲלִי ('illay). See nos. 2909b,d.
- עֲלִיּוֹן ('elyôn). See no. 2909c.
- 2911 עָלַל ('ālal) *go or come in*. The corresponding verb is used only once in Hebrew. Instead, the verb bô' is used, which does not appear at all in BA.
- Derivative
- 2911a מְעָל (me'al) *going in*.
- 2912 עָלַם ('ālam) *perpetuity, antiquity*. The cognate in Hebrew, 'ōlām, shows the Hebrew tendency to change an accented long "a" to "o."
- 2913 עָלַט ('āla') *rib*. The Hebrew cognate šela' shows the common sound shift of tsadhe and ayin between Hebrew and Aramaic.
- עֲלָת ('āllāt). See no. 2907e.
- 2914 עָם ('am) *people*. Used as in Hebrew.
- 2915 עִם ('im) *with*. Used as in Hebrew.
- 2916 עֲמִיק ('āmīq) *deep, deep mysteries*. The Hebrew is more extensively used both in literal and metaphorical meanings.
- 2917 עֲמָר ('āmar) *wool*. Used like its Hebrew cognate, šemer.
- 2918 עָנָה ('ānā) **I, answer**. In every one of the twenty-four times this word is used, it is followed by the verb 'āmar, making the idiom "answered and said." The phrase is an Aramaic expression merely meaning "to reply, respond." This Aramaizing expression is frequent in the Gospels, where the כּוּן always renders it fully. The נִיב translates the idiom more naturally, "answered," "replied," and the like.
- 2919 עָנָה ('nh) **II. Assumed root of the following.**
- 2919a עָנִי ('ānī) *poor, needy*. Cognate to the Hebrew 'ānī and related words.
- 2920 עָנָז ('nz). **Assumed root of the following.**
- 2920a עֹז ('ēz) *she-goat*. Only in Ezr 6:17. Used as in Hebrew.
- 2921 עָנָן ('ānān) *cloud*. Similar to the Hebrew cognate.
- 2922 עָנָפָה ('ānāp) *bough*. Used like the Hebrew equivalent.
- 2923 עָנַשׁ ('ānāsh) *confiscation, fining*. The root is used similarly in Hebrew, but includes broader punishment, tribute, etc.

2924 עָפִי ('ōpî)

עָנֵת ('enet). See no. 2796.

2924 עָפִי ('ōpî) *foliage*. The word is used once in Hebrew (Ps 104:12) where a Qere/Kethib variation occurs. The Kethib includes an *aleph*, perhaps influenced by Aramaic forms.

2925 עָצַב ('āṣab) *pain, grieve*. Used like the Hebrew cognate 'āṣab.

2926 *עָקַר ('āqar) *be rooted up*. A denominative verb used only in the Hithpeal.

Parent Noun

2926a עָקַר ('iqqar) *root, stock*. Its usage is paralleled closely in Hebrew.

עָר ('ār). See no. 2930a.

2927 *עָרַב ('ārab) *mix*. The usage parallels 'ārab I in Hebrew where, however, only derivative nouns appear, not the root.

2928 עָרָד ('ārād) *wild ass*. The Hebrew parallel is only used once (Job 39:5) and is thought by BDB to be a borrowing from Aramaic. But both may be borrowings.

2929 עָרְוָה ('arwā) *dishonor*. The Hebrew equivalent 'arweh "nakedness" is used more generally in Aramaic.

2930 עָרַר ('rr). **Assumed root of the following.**

2930a עָר ('ār) *foe*. There is a Hebrew word 'ār (Ps 139:20) meaning "foe," which may be a borrowing from Aramaic. The cognate Hebrew word is šar (from šārā II) "enemy" which is used extensively.

2931 עָשַׁב ('āṣab) *herbage, grass*. Used as in Hebrew.

2932 עָשָׂר ('āsar), עֶשְׂרֵה ('aśrā) *ten*. Used as in Hebrew.

Derivative

2932a עֶשְׂרִין ('eśrīn) *twenty*.

2933 עָשָׂה ('āshit), עֲשִׂית ('āšīt) *think, plan*. Hebrew has a cognate possibly borrowed from Aramaic, but this is by no means certain.

עֵת ('et). See no. 2797.

2934 עָתִיד ('ātid) *ready*. Used as in Hebrew.

2935 עָתִיק ('attiq) *ancient (of days)*. Used only of God, in Dan 7:9, 13, 22. Derivatives of the Hebrew root include the ideas of value and eminence.

- 2936 מִשְׁתָּה (pehâ) *governor*. Loan word from Akkadian.
- 2937 פֶּהָר (pehâr) *potter*. Probably loan word from Akkadian.
- 2938 שֹׁשׁ (p^eash) *a garment*. Precise meaning uncertain.
- 2939 פֶּלַג (p^elag) *divide*. Used as in Hebrew.

Derivatives

- 2939a פֶּלַג (p^elag) *half*.
- 2939b פֶּלְגָה (p^eluggâ) *division*.
- 2940 פָּלַח (p^elah) *serve, worship, revere, minister for* (KJV and RSV always "serve").

Derivative

- 2940a פִּלְחָן (polhân) *service, worship* (only in Ezr 7:19).

The original meaning of the root was "to cleave [open]" or "divide in two." From this meaning was derived the idea of cultivating a field and ultimately of cultivating (i.e. working hard at) the worship of a deity, hence the idea of service or worship of a deity. In Biblical Hebrew, the root is used only in the sense of cleave or split, and apparently did not develop into a term for religious service, as is the case in Aramaic.

The verb *p^elah* occurs only in Dan. In chapter 3, the basic meaning of the word is employed to portray the paramount concern of the incident of the "furnace of burning fire." In verse 12 it is learned that Shadrach, Meshach, and Abed-nego have refused to "serve" the god (singular here because it is parallel in the context to the "image" which the king had erected) of Nebuchadnezzar. The king himself could not believe that anyone would refuse to "serve" the god/golden image which he had publicly erected (v. 14), and graciously offered the three men a second chance to obey his commandment! Verse 17 reports the response of the men to the king which sets the issue in black and white. "If our God whom we serve is able to deliver us out of the furnace of burning fire, he will also deliver us from your power, O King." Now the die is cast. The reputation of the God of Shadrach, Meshach, and Abed-nego has been linked to the question of his ability to deliver his servants from a furnace of fire in much the way that the reputation of Elijah's God had been linked to the question of his ability to create fire (I Kgs 18). However,

verse 18 indicates clearly that the three men intend to say something even more radical. "Even if he does not (literally, "if not"), let it be known to you, O King, that we will not serve your god and we will not worship (*nisgûd*) the golden image which you have erected." That is, idolatry is so wrong in the minds of Shadrach, Meshach, and Abed-nego that they will not worship or serve a false god, even though their God should choose not to work a special miracle in their case, as he had in the past. So Shadrach, Meshach, and Abed-nego refused to commit idolatry, even to save their own lives.

It should be noted that neither in Dan 3 nor elsewhere in the book is the ability of the Hebrew God in question. In fact, just the opposite is true, for the book of Daniel was composed to show historical examples of the fact that God had indeed become savingly and redemptively involved in the lives of those who served him. Thus in Dan 6:16 [H. 17], even a pagan Persian monarch (Darius) is quoted as stating his belief that the God of Daniel was capable of delivering Daniel from the den of lions. Verse 20 [H 21] is framed as a rhetorical question, but obviously the king expected an answer from Daniel, and that would mean that Daniel's God had in fact been capable of delivering him.

C.D.I.

- 2941 פִּם (pûm) *mouth*. Used like the Hebrew *peh*.
- 2942 פֶּם (pas) *palm of the hand*. Used like the Hebrew word derived from *pâsas*.
- 2943 פֶּסַנְטֵרִין (p^esantêrîn) *a stringed instrument*. This word is doubtless borrowed from the Greek *psalterion* which is often used in the LXX to translate the Hebrew *nebel* "harp." See the discussion under "Music; Musical Instruments," in ZPEB, IV, p. 320. For the question of the date of this borrowing, see *sûmpōnyâ*, no. 2887.
- 2944 פָּרֶזֶל (parzel) *iron*. Cf. the Hebrew *barzel*. The variation of the "b" and "p" in Hittite, Akkadian, Ugaritic, Hebrew, and Aramaic suggests a non-Semitic origin, probably Indo-European. Cf. old Latin "ferzum."
- 2945 פָּרַם (p^eras) *break in two, divide*. Hebrew similar.

2946 פָּרַק (p^eraq)

Derivative

- 2945a פָּרַם (p^eres) **probably half-mina** (KB, *half-shekel*). The word is probably used as a word play in Dan 5:25, in the handwriting on the wall, "Mene, Mene, Tekel, Upharsin." The words can be taken to mean a mina, a shekel, and a half mina (or half shekel). This makes little sense and Daniel interpreted it as the verbs number, weigh, and divide. The last verb may have a double word play in its similarity to Persia, which was about to conquer Belshazzar. The word "upharsin" is the conjunction "and" plus the plural of p^eres.

- 2946 פָּרַק (p^eraq) **tear away, break off (sins)**. The Hebrew word is used more literally.

- 2947 פָּרַשׁ (p^erash) **make distinct**. Only Ezr 4:18 (NIV, "translate"). Used both in Hebrew and Akkadian in the broader meaning "explain."

- 2948 פָּרְשֵׁגֶן (parshegen) **copy**. A loan word from Persian.

- 2949 פָּשַׁר (p^eshar) **interpret**. Used also in Akkadian.

Derivative

- 2949a פָּשַׁר (p^eshar) **interpretation (of a dream)**. The noun is used once, in Hebrew, Eccl 8:1, of interpretation in general. The word became a standard introduction to the exegetical sentences in the commentaries written in Qumran. A sentence of scripture is followed by pishrô "its interpretation is:".

- 2950 פִּתְגָּם (pit^egām) **command, word, affair**. Loan word from Persian.

- 2951 פָּתַח (p^etah) **open**. Used as in Hebrew.

- 2952 פָּתִי (p^etî) **breadth**. The root pātâ is found in Hebrew meaning "be wide." But the Hebrew derivative is specialized to mean "be simple," "easily enticed," a meaning not shared in BA.

- 2953 **צָבָא** (*ṣ^ebā'*) *be inclined, desire*. Possibly connected with Hebrew *ṣābā* II.
- Derivative
- 2953a **צָבוּ** (*ṣ^ebû*) *thing (apparently something desired)*.
- 2954 ***צָבַע** (*ṣ^ebā'*) *I, dip, wet*. Cf. Hebrew *ṣāba'* "to dye." Used in the Pael and Hithpael.
- 2955 **צָר** (*ṣad*) *side*. Used as in Hebrew.
- 2956 **צָדָא** (*ṣ^edā'*) *purpose*. The equivalent in Hebrew (*ṣ^edīyâ*) also is used of evil purpose.
- 2957 **צִדְקָה** (*ṣidqâ*) *right doing, righteousness*. Daniel 4:27 [A 24] is the only instance in BA of this common Hebrew root.
- 2958 **צָוּאָר** (*ṣawwa'r*) *neck*. Used as in Hebrew.
- 2959 ***צָלָא** (*ṣ^elā'*) *pray*. Used in the Pael. Not used in Hebrew, which uses mainly the Hithpael of *pālal*. Cf. Arab. *ṣalâ* "pray."
- 2960 ***צָלַח** (*ṣ^elah*) *prosper*. Used in the Haphel. Used like its Hebrew equivalent.
- 2961 **צֶלֶם** (*ṣ^elēm*) *image*. Used like the Hebrew, except that Dan 3:19 uses the expression "image of his face" to mean "attitude," an extension not witnessed in Biblical Hebrew.
- 2962 **צִפּוּר** (*ṣippar*) *bird*. Similar to the Hebrew.
- 2963 **צִפּוּר** (*ṣ^epîr*) *he-goat*. Used like the Hebrew *ṣāpîr* which, however, is only used in Dan, Ezr, and II Chr, and may itself be borrowed from the Aramaic.

ק

- 2964 קבל* (*q^ebēl*) *receive*. A denominative verb used only in the Pael.
- 2965 קבל (*qōbēl*) *front, in front of, before, because of; when followed by di, because that*. This very common Aramaic preposition is often preceded by *l^e* or *kol*. It is more often used for causation than for mere position, which is usually *qōdām* (q.v.).
- 2966 קדם (*qdm*). Assumed root of the following.
 2966a קדם (*qōdām*) *before*. Used like the Hebrew prepositions *qedem* and *lipnē*.
 2966b קדמה (*qadmā*) *former time*.
 2966c קדמי (*qadmay*) *former, first*.
- 2967 קדיש (*qaddish*) *angels, saints*. The only usage in BA of the very common Hebrew root *qādash*.
- 2968 קום (*qūm*) *arise, stand*. Used extensively and very like its Hebrew counterpart.
- Derivatives
- 2968a קים (*q^eyām*) *statute*.
 2968b קים (*qayyām*) *enduring*. These two derivatives show natural extensions of the meaning of the root which, however, are not found in Hebrew.
- 2969 קטל (*q^eṭal*) *slay*. This verb, so familiar to Hebrew students as a paradigm verb, is only found three times in Hebrew (Job 13:15; 24:14; Ps 139:19). It may be a borrowing into Hebrew from the Aramaic, and it occurs in early Aramaic inscriptions (KB).
- 2970 קטר (*q^eṭar*) *knee joint, difficult questions*. Possibly the original meaning was to tie a knot (KB), thence a knot, joint, problem. There is a cognate in Akkadian, but not in Hebrew.
- 2971 קיט (*qayit*) *summer*. The Hebrew cognate is *qayiš*.
- קים (*q^eyām*), קים (*qayyām*). See nos. 2968 a,b.
- 2972 קיתרם (*qitrōs*) *lyre, zither*. A loan word from the Greek *kitharis*. On the significance of this and other Greek loan words for the date of Daniel, see *sūmpōnyā*, no. 2887.
- 2973 קל (*qāl*) *voice*. Used like the Hebrew *qōl*.
- 2974 קנא (*q^enā'*) *acquire, buy*. Used like the Hebrew *qānā* I.
- 2975 קצף (*q^eṣap*) *be angry*. In the limited material of BA, this verb is used of the wrath of the king. The Hebrew equivalent is used of both God and men.
- Derivative
- 2975a קצף (*q^eṣap*) *wrath (of God)*.
- 2976 קצת (*q^eṣāt*) *end*. Derived from a root *q ṣ* ' which appears in Hebrew as *qāṣā* "to cut off."
- 2977 קרא (*q^erā'*) *call, read aloud*. Used like the Hebrew *qārā'* I. The Hebrew *qārā'* II meaning "encounter, meet" is not used in BA.
- 2978 קרב (*q^erēb*) *approach*. Used as in Hebrew where also the verb means "approach," but the causative includes the meaning "offer sacrifice."
- Derivative
- 2978a קרב (*q^erāb*) *war*. Derived from "approach," in a hostile sense.
- 2979 קריה (*qiryā*), קריא (*qiryā'*) *city*. Used like the Hebrew.
- 2980 קרן (*qeren*) *horn*. Like the Hebrew. Refers to the horn of an animal as well as the horn as a musical instrument.
- 2981 קרץ (*q^eraṣ*) *piece*. Used with the verb *'ākal* "to eat a piece," idiomatically to mean "slander, denounce," an idiom well attested in Akkadian (e.g. in the Amarna tablets).
- 2982 קשם (*q^eshōṭ*) *truth*. The Hebrew equivalent is only used once (Prov 22:21) and may itself be from the Aramaic.
- קתרם (*qatrōs*). See *qitrōs*, no. 2972.

- 2983 ראש (*rē'sh*) *head, chief*. Used like the Hebrew *rō'sh*. The medial vowel i/e also is found in Ugaritic.
- 2984 רבב (*rbb*). Assumed root of the following.
 2984a רב (*rab*) *great*. Used substantively to mean "captain, chief." The plural shows reduplication, i.e. *rabrēbin*.
 2984b רבו (*ribbô*) *myriad*. Only used in Dan 7:10 for a very large number "ten thousand times ten thousand." The Hebrew equivalent is also so used, but appears to mean literally ten thousand in Ezr 2:64, parallel to Neh 7:66.
 2984c רב־רבן (*rabrēbān*) *lord, noble*.
- 2985 רבָה (*rēbā*) *grow great*. Used as in Hebrew.
- Derivative
- 2985a רבו (*rēbū*) *greatness*.
 רביעי (*rēbi'i*). See no. 2986b.
- 2986 רבע (*rb'*). Assumed root of the following.
 2986a ארבע (*'arba'*) *four*.
 2986b רביעי (*rēbi'i*) *the fourth*. These numbers are used as in Hebrew. The number "forty" does not appear in BA.
- רב־רב (*rabrab*). Plural of *rab*, no. 2984a.
 רב־רבין (*rabrēbin*). Plural of *rab*, no. 2984a.
 רב־רבן (*rabrēbān*). See no. 2984c.
- 2987 רגז (*rēgaz*) *rage*. The Hebrew also uses this root in its literal sense "tremble," "quake." In BA only the specialized use "be angry" appears.
- Derivative
- 2987a רגז (*rēgaz*) *rage*.
- 2988 רגל (*rēgal*) *foot*. Used as in Hebrew, but not as broadly in the limited material of BA.
- 2989 רגש* (*rēgash*) *be in tumult*. Used in the Haphel. Also found in Hebrew, but not common.
- 2990 רָו (*rēw*) *appearance*. Only found with the suffix, *rēwēh* (Dan 2:31; 3:25). From the common root *rā'ā* unused in BA.
- 2991 רוח (*rwh*). Assumed root of the following.
 2991a רוח (*rūah*) *wind, spirit*. Used as in Hebrew. One may note that the expression "Holy Spirit" is only used twice in the OT: Ps 51:11 [H 15]; Isa 63:10. The terminology changed from Spirit of the Lord to Holy Spirit (used also in the DSS) during the intertestamental period, perhaps partly to avoid the use of the sacred name. The use in Daniel, "Spirit of the holy gods," perhaps contributed to the eventual usage.
 2991b ריח (*rēah*) *smell*. Used as in Hebrew.
- 2992 רום (*rūm*) *rise*. Used very much like the Hebrew.
- Derivative
- 2992a רום (*rūm*) *height*.
- 2993 רוז (*rāz*) *secret*. A Persian loan word, translated in the LXX, rather naturally, by the Greek *mysterion*.
- 2994 רחיק (*rēhîq*) *far off*. Used like *rāhōq* in Hebrew.
- 2995 רחמי (*rahāmîn*) *compassion*. Used in the plural to express intensity. Common in Hebrew, which also uses the root *rāham*.
- 2996 רחץ (*rēhaṣ*) *trust*. Used in the Hithpeal. Found in Akkadian, but not in Hebrew.
- ריח (*rēah*). See no. 2991b.
- 2997 רמא (*rēmā'*) *cast, throw*. Used like the rather rare Hebrew *rāmā* I. Used twelve times in BA.
- 2998 רעה (*r'h*). Assumed root of the following.
 2998a רעו (*rē'u*) *good pleasure, will*.
 2998b רעיון (*ra'yôn*) *thought*. The Hebrew cognate to this root is *rāšā*, which shows the *š/ʾ* sound shift (cf. *'ereš/ 'āra'*). But Hebrew uses derivatives of *r'h*, perhaps as Aramaisms, in Eccl and Ps 139:2.

2999 רַעְנָנוּ (*ra'ānan*)

2999 רַעְנָנוּ (*ra'ānan*) *flourishing*. Used like the Hebrew equivalent derived from *rā'an*.

3000 רָעַע (*r^e'a'*) *crush, shatter*. Used like the cognate Hebrew *rāṣaṣ* (note the sound shift ṣ/').

3001 רָפַס (*r^epas*) *tread, trample*. Used like the Hebrew equivalent which, however, is not common.

3002 רָשַׁם (*r^esham*) *inscribe, sign*. Used a number of times in the Aramaic of Dan, once in the Hebrew of Dan (10:21), possibly borrowed from Aramaic.

- 3003 שָׁבֶקָא (*šabbēkā'*) *musical instrument*. Apparently a triangular instrument with four strings. The Greek equivalent is *sambykē*, but it is not sure whether the Greek borrowed from the Semitic or vice versa. For the bearing of Greek words in Daniel on the dating of the book, see *sūmpōnyā*, no. 2887.
- 3004 שָׁגָא (*šēgā'*) *grow great*. The verb is used also in Hebrew, but restricted to the book of Job. It may be an Aramaism there or a dialectical variant of ancient Hebrew.
- 3006 שֹׁם (*šūm*), שִׁים (*šīm*) *set, make*. Used like its very common equivalent in Hebrew.
- 3007 שְׂטָר (*šēṭar*) *side*. not used in Hebrew.
- 3008 שִׁיב (*šib*) *be hoary-headed*. The plural participle is used substantively for "elders." Used as in Hebrew.
- 3009 שָׁכַל (*šēkal*) *consider, contemplate*. The Hebrew equivalent is common and broadly used for meanings related to "insight, prudence, attention, success," etc.
- 3004a שָׁגִיא (*šaggi'*) *great, much*.
- 3009a שָׁכַלְתָּנוּ (*šāklē tănū*) *insight*.
- 3005 שְׁהָדוּ (*šāhādū*) *testimony, witness*. The Hebrew equivalent is used once in Job. The word is used as part of the language of Laban in Gen 31:47 in the emphatic form *šāhādūtā'*.
- 3010 שָׁנָא (*šēnā'*) *hate*. The plural participle is used substantively for "enemies." Usage is similar to that of Hebrew.
- 3011 שְׂעָר (*šē'ar*) *hair (of head)*. Used like the Hebrew *šē'ār*.

- 3012 שאל (shē'ēl) *ask*. Used like the Hebrew. The word shē'ōl does not occur in the BA.

Derivative

- 3012a שאלה (shē'ēlā) *affair, request*. The same semantic development appears in Hebrew.
- 3013 שאר (shē'ār) *rest, remainder*. The Hebrew equivalent is shē'ērīt.
- 3014 *שבח (shē'bah) *laud, praise*. Used in the Pael, as is the equivalent Hebrew, shābah II.
- 3015 שבת (shē'bat) *tribe*. Used like the Hebrew shebet. However, the meaning "scepter, staff," common in Hebrew, is absent in BA.
- 3016 שביב (shē'bib) *flame*. There is a Hebrew equivalent found only in Job 18:5. It cannot be concluded which word sprang from the other or whether both were native to their own languages.
- 3017 שבע (shē'ba') *seven*. See the corresponding Hebrew.
- 3018 שבע (shē'baq) *leave, let alone*. The Aramaic counterpart to the Hebrew 'āzab. The most famous usage is the cry from the cross in which Jesus quotes Ps 22:1 [H 2], using the Aramaic shē'baqtanī for the Hebrew 'āzabtānī (Mt 27:46).
- 3019 שבש (shē'bash) *confuse*. Not found in Hebrew, but the Akkadian cognate is similar.
- 3020 שגל (shēgāl) *king's wife or concubine*. Used only in the plural (Dan 5:2, 3, 23). Origin obscure. Hebrew uses a verb "to ravish" which may be related. But shēgāl may be a loan word.
- 3021 *שדר (shē'dar) *struggle, strive*. Used in the Hithpael. Not found in Hebrew.
- Derivative
- 3021a אשחדור ('eshdaddūr) *revolt*.
- 3022 שדת (shdt). Assumed root of the following.
- 3022a שת (shēt), שית (shit) *six*.
- 3022b שיתין (shittin) *sixty*. The Hebrew cognate shdsh shows the common sh/t interchange. The only problem with this root is found in Ezr 6:3 where the second temple is said to be sixty cubits wide and sixty cubits high. The expected figures are twenty cubits wide and high. If the writer might offer a suggestion, the number shittin there, the plural of six, may have been confused with the plural of two (not otherwise used for twenty). The Hebrew dual of two is shṭayim. The two words are remarkably similar.
- 3023 *שנה (shē'wā) *I, become like*. Used in the Pael. The Hebrew equivalent means "make like" in the Hiphil.
- 3024 *שנה (shē'wā) *II, be set, made*. Used in the Hithpael. The Hebrew equivalent is used in the Piel. Aramaic as well as Hebrew uses more widely the synonym sūm or šim.
- 3025 שור (shūr) *wall*. The Hebrew cognate from shwr III also means "wall," but the more common Hebrew synonym is hōmā (from hmh), which does not occur in BA.
- 3026 שחת (shē'hat) *corrupt*. Used as in Hebrew.
- 3027 שיזב (shēzib) *deliver*. Not used in Hebrew. Probably a loan word from Akkadian where it is a development in the causative stem (Shapel) from the verb ezēbu.
- 3028 שיצא (shēšī') *bring to an end, finish*. Like the above verb, this is probably a loan word from an Akkadian causative form (Shapel) of the verb ašû (cognate to the Hebrew yāšā').
- 3029 שכב (shkb). Assumed root of the following.
- 3029a משקב (mishkab) *bed*. This root is common in Hebrew, and the derivative mishkab is used like the Hebrew equivalent.
- 3030 שכלל (shaklāl). A form of the verb k'lal which has a Shaphel causative under the influence of Akkadian.

3031 שָׁכַן (*sh^ekēn*)

3031 שָׁכַן (*sh^ekēn*) *dwel*. Used like the Hebrew equivalent.

Derivative

3031a מִשְׁכָּן (*mishkan*) *abode (of God, in Jerusalem)*.

3032 שָׁלַח (*shlh*). **Assumed root of the following.** This verb appears in Hebrew, along with similar derivatives.

3032a שָׁלַח (*sh^elēh*) *at ease*.

3032b שָׁלְוָה (*sh^elēwā*) *ease, prosperity*.

3033 שָׁלַח (*sh^elah*) *send*. Used like the Hebrew equivalent.

3034 שָׁלַט (*sh^elēt*) *have power, rule*.

Derivatives

3034a שָׁלוֹטָן (*sholtān*) *dominion*.

3034b שָׁלִיט (*shallīt*) *having mastery, authority*. This root appears also in Hebrew, where it is called late by BDB. But a derivative of it (*shlyt*) appears in Ugaritic as a by-name of Leviathan (AisWUS no. 2612). The Arabic form gives rise to the title "sultan."

3034c שִׁלְטֹן (*shiltōn*) *ruler, official*.

3035 שָׁלַם (*sh^elēm*) *be complete, be finished*.

Derivative

3035a שָׁלַם (*sh^elām*) *welfare, prosperity*. The verb and its derivative are similar to the widely-used Hebrew equivalents.

3036 שָׁם (*shūm*) *name*. Used like the corresponding Hebrew word *shēm*.

3037 שָׁמַד (*sh^emad*) *destroy*. Used in the Haphel, it is similar to the Hebrew verb, which is used in the Niphal.

3038 שָׁמַיִן (*sh^emayin*) *heavens, sky, heaven*. Like the Hebrew equivalent, this dual noun refers both to the atmospheric sky, the starry sky, and the abode of God and angels.

3039 שָׁמַם (*sh^emām*) *be appalled*. Used only in Dan 4:16. This is the word which in the Hebrew sections of Dan refers to the "abomination of desolation," Dan 12:11, etc.

3040 שָׁמַע (*sh^ema'*) *hear*. Used like its Hebrew equivalent.

3041 שָׁמַשׁ (*sh^emash*) *sun*. This is the common Semitic word for "sun" appearing in Hebrew, Akkadian, Arabic. In Ugaritic it appears as *shpsh*, a form witnessed to also in Akkadian.

3042 שָׁמַשׁ (*sh^emash*) *to minister, serve*. Unrelated to the above word "sun"; probably a loan word from Egyptian.

3043 שָׁן (*shēn*) *tooth*. Used like the Hebrew where it is derived from *shānan* meaning "to sharpen."

שָׁנָה (*shēnā*). See no. 2778a.

3044 שָׁנָה (*shā'ā*) *brief time, moment*. Derivation uncertain. An Akkadian cognate means "time, hour." Some suggest derivation from Hebrew *shā'ā* "gaze," but this is questioned by BDB and KB.

3045 שָׁפַט (*sh^epat*) *judge*. See the discussion under the Hebrew equivalent. The word includes many of the aspects of government—executive, military, legislative, judicial. In BA (Ezr 7:25) it is apparently used primarily for the judicial, not because the meaning of the word had changed, but because the political situation was different.

שָׁפִיר (*shappīr*). See no. 3046a.

3046 שָׁפָר (*sh^epar*) *be fair, seemly*. The Hebrew equivalent emphasizes more the idea of beauty, which appears in an Aramaic derivative also.

Derivatives

3046a שָׁפִיר (*shappīr*) *fair, beautiful (of foliage)*.

3046b שָׁפָרָר (*sh^eparpār*) *dawn (as beautiful?)*. Relation to the above root not certain.

שָׁפָרָר (*sh^eparpār*). See no. 3046b.

3047 שָׁק (*shāq*) *leg*. As in Hebrew, this word refers to the lower leg, the calf when used of the human figure (only Dan 2:33). The upper leg, the thigh, is called *yarkā*. In Hebrew usage *shāq* also refers to the upper leg of a sacrificial animal. The root, attested in Hebrew, is *shwq*.

3048 שָׁרָא (*sh^erā'*) *loosen, abide; in Pael, begin*. The Hebrew cognate *shārā* means "let loose." The meaning "abide" apparently comes from untying the baggage etc. at a

campsite. The development of the meaning "begin" is not clear. Strangely, the Hebrew verb *ḥālāl* III means "pollute" and has an unexplained meaning "begin" in the Hiphil.

3049 שָׂרַק (*shrq*). Assumed root of the following. The verb is not used in Aramaic, but regularly means "hiss, whistle" in Hebrew.

3049a מַשְׂרוּקִי (*mashrôqî*) *pipe*. See "Music; Musical Instruments," in ZPEB, IV, p. 320.

3050 שָׂרַשׁ (*shrsh*). Assumed root of the following.

3050a שָׂרַשׁ (*sheresh*) *root*. Used like the Hebrew equivalent.

3050b שָׂרַשִּׁי (*sh^erôshi*) *uprooting, banishment*. Kethib: *shrshw*.

שֶׁת (*shêt*). See no. 3027a.

3051 שְׁתָּה (*sh^etâ*) *drink*. Used like the Hebrew. The causative "give drink" (Hebrew *shāqâ*) is not found in BA.

Derivative

3051a מִשְׁתָּה (*mishteh*) *feast, banquet*.

שִׁתִּין (*shittin*). See no. 3022b.

ת

- 3052 תִּבַּר (*t^ebar*) **break**. Used like the Hebrew cognate *shabar*. Note the sh/t interchange.
- תִּדְרֶא (*t^edirā*). See no. 2669d.
- 3053 תִּוב (*tûb*) **return**. Used, as is the Hebrew cognate *shûb*, to include restoration and returning an answer. The common Hebrew adverbial usage of doing something again ("return and do") is not witnessed in BA.
- 3054 תָּוָה (*t^ewāh*) **be startled, alarmed**. Not used in Hebrew.
- 3055 תֹּר (*tôr*) **bull, young bull (for sacrifice)**. Used like the Hebrew cognate *shôr*.
- 3056 תַּחֲוֹת (*t^ehôt*) **under**. Used like the Hebrew *tahat*, referring to things under the heavens (Dan 7:27; Jer 10:11) or under the shadow of a tree (Dan 4:12, 21 [A 9, 18]).
- 3057 תִּלַּג (*t^elag*) **snow**. Used in a simile for whiteness, as is the Hebrew cognate *sheleg*.
- תִּלִּיתִי (*t^eliti*). See no. 3058c.
- 3058 תִּלַּת (*tl̥t*). **Assumed root of the following.**
- 3058a תִּלַּת (*t^elat*) **three**. The feminine form is *t^elâtâ*, used like the Hebrew cognate *shālōsh*. Note the sh/t interchange in this and the following derivatives.
- 3086b תִּלַּת (*t^elat*) **third, i.e. the third ruler, one of three** (Dan 5:16, 29). *taltî* (Dan 5:7) is a different word of the same meaning (BDB) or a variant form (KB).
- 3058c תִּלִּיתִי (*t^eliti*) **the third (in a series) the ordinal number**. As in Hebrew, the ordinals from three to ten have the two long "i" vowels inserted. The Hebrew cognate is *sh^elishî*.
- 3058d תִּלְתִּין (*t^elātin*) **thirty**.
- 3059 תַּמָּה (*tammā*) **there**. The Hebrew cognate is *shām, shammā*.
- 3060 תִּמָּה (*t^emah*) **wonder (BDB), miracle (KB)**. This word has a cognate verb in Hebrew, *tāmah* "to be astounded." But in the three times the noun is used in Dan (4:2, 3 [A 3:32, 33] and 6:27 [A 28]), it is used in the expression "miraculous signs and wonders" (*'āt* and *t^emah*), very similar to the Hebrew *'ôt* and *mōpēt*. The references in Dan are to the miraculous deliverances from the fiery furnace and the lions' den.
- 3061 תִּנָּא (*tn'*). **Assumed root of the following.** The Hebrew, Akkadian, and Arabic use the root verb "to repeat, do again" (Hebrew *shānā*).
- 3061a תִּנְיָן (*tinyān*) **second** (Only in Dan 7:5).
- 3061b תִּנְיָנוֹת (*tinyānūt*) **the second time** (only in Dan 2:7).
- 3061c תִּרְיָן (*t^erên*) **two**. The Hebrew cognate is *sh^enayim*. For the dissimilation of "n" to "r" (cf. KB), one may note the famous shift of Hebrew *bēn* "son" to Aramaic *bar*.
- 3061d תִּרְתִּין (*tartên*) **second, the ordinal number**.
- תִּנְיָנוֹת (*tinyānūt*). See no. 3061b.
- 3062 תִּפְתָּיָא (*tiptāyē*) **magistrate** (KB, NIV). Name of a provincial officer of unknown station.
- תִּקְיָא (*tāqqip*). See no. 3065c.
- 3063 תִּקַּל (*t^eqal*) **weigh**. Cognate to Hebrew *shāqal*.
- Derivative
- 3063a תִּקֵּל (*t^eqēl*) **shekel**. For discussion of the handwriting on the wall, see *p^eras*.
- 3064 תִּקֵּן (*t^eqan*) **be in order**. The Hebrew equivalent means also "make straight." There is a cognate in Akkadian.
- 3065 תִּקֵּץ (*t^eqēp*) **grow strong**. The Hebrew equivalent may be an Aramaism. It is found only in Job and Eccl but there is no proof here that the word is late, as BDB asserts. Aramaic influence is now recognized as much older than the exilic period.
- Derivatives
- 3065a תִּקֵּץ (*t^eqāp*) **might**.
- 3065b תִּקְוָה (*t^eqōp*) **might**.
- 3065c תִּקְיָא (*tāqqip*) **strong, might**.
- תִּרְיָן (*t^erên*). See no. 3061c.

3066 תַּרְעַת (*t^era'*)

3066 תַּרְעַת (*t^era'*) *gate, door*. The Hebrew *sha'ar* ("gate") is most naturally taken as related, although this would involve a metathesis in the Aramaic form (cf. BDB under *sh'r*, p. 1044). As in Hebrew, the word "gate," because the city gate was

the seat of administration, became a word for the king's court, the palace.

3067 תַּרְעָא (*tārā'*) *porter, doorkeeper*.

תַּרְתֵּינָא (*tartên*). See no. 3061d.

INDEX

This index is intended to assist the reader who is only slightly familiar with the Hebrew language. By referring to the well-known Strong's *Exhaustive Concordance of the Bible*, he can find for any word in the KJV of the Old Testament a number for the Hebrew word used in the translation. By referring to that number in this Index, he can find the corresponding number in the Theological Wordbook and turn immediately to it for a definition and a discussion of its use if the word is theologically significant. Most names are omitted and an asterisk indicates this omission.

It should be noted that the analysis of words by

Strong is not always exactly parallel to the treatment in other authorities. Strong may treat as a noun what the Wordbook considers a verb form (or vice versa). Strong may analyze a Hebrew word as representing one root, where the Wordbook may analyze it as two roots. Strong may analyze a verb form as derived from a middle-weak verb where the Wordbook may analyze it as a middle double consonant verb. But it is believed that the correspondences given in the Index will be sufficiently clear to assist the student in finding the definition desired.
